Peerage, and the passages which we have quoted from Rapin and the British Biography. There were, likewise, one or two accounts of him, published soon after his death, which were entirely of a panegyric nature. These we have read, but do not think them worthy of particular notice, as they are rather party publications than just pieces of Biographical composition. Mr. Locke's account of our eminent Statesman, though short, and very imperfect, is a sufficient testimony of the high opinion which that great Philosopher entertained of his Lordship.

A complete life of the Earl of Shaftesbury, by which we mean a full and particular narrative of his political conduct, and which would, in fact, comprehend the principal events of his time, is still a desideratum in the historical literature of this country: nor have the noble family been unmindful of the subject. His Lordship's descendants have wished to rescue their ancestor from the obloquy with which his memory has been loaded, and to set his actions in a just light; but the design has not yet been fully carried into execution. The Earl had himself written a history of his own times, which, when he was obliged to flee to Holland, he entrusted to the care of Mr. Locke. Unfortunately for the public, when Algernon Sidney was infamously put to death, on a charge of treason grounded upon papers which were found in his closet, Mr. Locke, intimidated with the apprehension of a like prosecution, committed Lord Shaftesbury's manuscript to the flames. The professed design of the work was to display to the world the principles and motives by which his enemies had been actuated, and to give a true and impartial account of his own conduct. Whatever degree of self-love may be supposed, in certain cases, to have operated upon his Lordship's mind, it will be allowed, that, in consequence of his genius, his knowledge, the eminent stations he occupied, and his access to the sources of information, he must have been capable of throwing great light on the transactions of the time. The history began with the Reformation, and traced the course of events down to the Civil War, with a view of pointing out the defects of the Constitution, and of stating what ought farther to be done, in order to strengthen and confirm the liberties of the people. It is understood that the Earl was particularly excellent in his characters. Some of these, in loose papers, are still in the possession of the family. The largest fragment now remaining is in the early part of the work, where the author has drawn the characters of the principal Gentlemen who flourished in the county of Dorset, at the time in which he arrived to man's estate. From this fragment, a curious extract, some years since, made its way to the public. We mean the account of the Hon. William Hastings, of Woodlands in Dorsetshire, by his quality son, brother, and uncle to the Earls of Huntingdon; which account is said to have first appeared in Peck's *Desiderata Curiosa*, and has since been published in the *Connoisseur*, and the *British Biography* (89). Were it not to be seen in books of easy access, we should here have inserted it with pleasure. It affords a striking example of Lord Shaftesbury's talent in characteristic composition; and Mr. Walpole, who in no other respect has spoken favourably of his Lordship, has observed, that it is a curious and well drawn portrait of our ancient English gentry (90).

Authors, vol. ii.
p. 55, 56.

For the loss which was occasioned by Mr. Locke's timidity or prudence, he was solicitous to make some degree of reparation. Accordingly, he formed an intention of writing, at large, the history of his noble friend; and if he had accomplished his intention, his work would undoubtedly have been a very valuable present to the public. It must, therefore, be regretted, that he was prevented from proceeding any farther in the completion of his design than collecting the few materials which occur in his letter to a person of quality.

But though Lord Shaftesbury's own memoirs were thus

(p) Dugdale's Baronage, vol. ii. p. 482; where he is entirely mistaken as to his Lordship's having issue by his last wife, and not by his second.

(q) This appears from the inscription upon his monument.

had Anthony his son and heir (p); and thirdly, Margaret, daughter of William Lord Spencer, by whom he left no issue (q). Anthony, his only son and successor, was born on the 16th of January, 1651, and married Dorothy, daughter to John Earl of Rutland, by whom he had two sons, Anthony and Maurice, and four daughters, Lady Frances, married to

thus unfortunately destroyed, and Mr. Locke failed of executing his purpose, there was another Biographer, who wrote a Life of the Earl, soon after his decease. This was Thomas Stringer, Esq; of Ivy Church, near Salisbury, a Gentleman of great integrity and excellent character; who had held, we believe, under his Lordship, when High-Chancellor of England, the office of Clerk of the presentations; and who was much esteemed by some of the principal persons of the age. With Mr. Locke in particular, he maintained an intimate friendship to the time of his death, which happened in 1702. Mr. Stringer's account has been the ground-work on which the narrative intended for the public eye, by the noble family, has been built. It contained a valuable history of the Earl's life; but was probably much inferior in composition to what Mr. Locke's would have been; and indeed, in its original form, it was too imperfect for publication. Sometime about the year 1732, this manuscript, together with the rest of the Shaftesbury papers, was put into the hands of Mr. Benjamin Martyn, a Gentleman who was then known in the literary world, in consequence of having written a tragedy, entitled Timoleon, which had been acted with success at the Theatre Royal in Drury Lane. Mr. Martyn made Mr. Stringer's manuscript the basis of his own work, which he enriched with such speeches of the Earl as are yet remaining, and with several particulars drawn from some loose papers left by his Lordship. He availed himself, likewise, of other means of information, which more recent publications had afforded; and prefixed to the whole an introduction of considerable length, wherein he passed very high encomiums on our great Statesman, and strengthened them by the testimonies of Mr. Locke and Monf. Le Clerc. He added, also, strictures on L'Estrange, Sir William Temple, Bishop Burnet, and others, who had written to his Lordship's disadvantage. One anecdote, which we well remember, it cannot but be agreeable to the public and to the noble family to see related. It is well known with what severity the Earl of Shaftesbury's character is treated by Dryden, in his Absalom and Achitophel. Nevertheless, soon after that fine satire appeared, his Lordship, having the nomination of a Scholar, as Governor of the Charter-House, gave it to one of the Poet's sons, without any solicitation on the part of the father, or of any other person. This act of generosity had such an effect upon Dryden, that, to testify his gratitude, he added, in the second edition of the poem, the four following lines, in celebration of the Earl's conduct as Lord Chancellor.

In Israel's court ne'er sat an Abethdin
With more discerning eyes, or hands more clean,
Unbrib'd, unsought, the wretched to redress,
Swift of dispatch, and easy of access.

When King Charles the Second read these lines, he told Dryden that he had spoiled by them all which he had before said of Shaftesbury.

Notwithstanding the pains that had been taken by Mr. Martyn, the late Earl of Shaftesbury did not think the work sufficiently finished for publication; and, therefore, somewhat more than twenty years ago, he put it into the hands of his friend, Dr. Gregory Sharpe, Master of the Temple. All, however, that Dr. Sharpe performed, was to recommend it to the care of a Gentleman still living, who is distinguished for his accurate acquaintance with the history of England; and for the astonishing precision and extent of his memory with respect to the minutest circumstances of the facts, dates, and persons which occur in the whole course of that history. This Gentleman examined Mr. Martyn's manuscript with attention, pointed out its errors, made references, and suggested a number of instances in which it might be improved, but did not proceed much farther in the undertaking.

At length, the work was consigned to another person, who spent considerable labour upon it, enlarged it by a variety of additions, and had it in contemplation to avail himself of every degree of information which might render it a correct history of the time, as well as a narrative of the Life of Lord Shaftesbury. The reasons (not unfriendly on either side) which prevented the person now mentioned from completing his design, and occasioned him to return the papers to the noble family, are not of sufficient consequence to be here related. Whether the work is likely soon to appear, it is not in our power to ascertain. In the mean while, it is a necessary act of justice to the memory of the first Earl of Shaftesbury, and cannot but be agreeable to every one of his descendants, and to our readers in general, to mention a few of the things which may be expected to be elucidated, whenever the account of him shall be published.

In the twenty-first volume of the Parliamentary history, there is a long speech against Richard Cromwell's House of Lords, concerning which the writers of that history say, that they do not warrant the authenticity of it, because they think it too bold for the time. They add, "but that it is as old, is clear from all appearances." Indeed, soon after it is said to have been delivered, it was published under the title of "A seasonable Speech, made by a worthy Member of Parliament in the House of Commons, concerning the other House." According to the Shaftesbury papers, the person by whom it was actually spoken was Sir Anthony-Ashley Cooper; and it reflects great credit on his spirit, courage, and eloquence. Were it not too long, we should gladly have inserted it from the Parliamentary History (91).

It is well known that few things have been deemed more censurable in the Earl of Clarendon's conduct, than the part he took with regard to the sale of Dunkirk. This transaction Lord Ashley strenuously opposed; and he was equally hostile to that Statesman's narrow principles and policy respecting the Dissenters. The penalties of the Act of Uniformity, and the severities of the Five Mile Act were regarded by him with the greatest abhorrence, and he contended against them to the utmost of his power.

Another object displayed in the unpublished Life of Lord Shaftesbury, is his zeal for the promotion of manufactures, trade, and commerce. This object he was particularly led to by his situation as Chancellor of the Exchequer, and he employed himself upon it with unremitting attention and ardour. The numerous papers which are now in the possession of the family, relative to matters of a commercial nature, are full proofs of what is here asserted.

A farther circumstance, mentioned and enlarged upon to the credit of Lord Ashley, is his having prevented the King, in 1666, from going to war with the Hamburgers, on account of an attack which four Dutch men of war had made on some English merchant ships that lay in the Elbe. The city of Hamburg was in no degree blameable on this occasion. It was, however, with difficulty that Lord Ashley could dissuade his Majesty from proceeding to extremities. No account of this transaction has, we believe, made its way into any of our general histories.

After the Earl of Clarendon's disgrace, some popular measures were, for a short time, pursued by Government. The triple alliance was formed against the encroaching power of France; new regulations were issued with regard to the mode of conducting public business; several rules and ordinances were established and ratified, respecting navigation; a declaration was made by the King, to Parliament, in favour of Protestant Dissenters; and an order appeared in the Gazette, calculated to suppress, as much as possible, the practice of duelling. In these and other instances, the narrative endeavours to shew, that Lord Ashley was the principal Agent, and not Sir Orlando Bridgeman;

(91) Parliamentary History, vol. xxi. p. 297—310. second edit.

to Francis Stonehouse of Hungerford Park, in the county of Berks, Esq; Lady Elizabeth, wife of James Harris, of Salisbury, Esq; Lady Dorothy, who was espoused to Edward Hooper, of Hern-court in the county of Southampton, Esq; and Lady Gertrude, who died unmarried,

Bridgeman; who, though he was made Lord Keeper on the dismissal of the Earl of Clarendon, did not succeed that Nobleman in his political power and interest. Without presuming to determine this point, one thing is certain, and will decisively be proved by the work in question, that, at the period we are speaking of, Lord Ashley addressed a memorial to the King, which contained excellent advice with relation to the management of public affairs.

One of the most important parts of the Earl of Shaftesbury's life was whilst he was a Member of the CABAL; and, at this time, his conduct, with no small appearance of justice, has almost universally been considered as very liable to censure. The four things principally brought as charges against him, are the shutting up of the Exchequer; the Declaration of Indulgence; the issuing of Writs for vacant Boroughs, during the Recess of Parliament; and the Speech against the Dutch, in which was introduced, "Delenda est Carthago." That his Lordship was the person who gave or suggested the advice for shutting up the Exchequer, has been asserted by several writers, in consequence of a passage in Bishop Burnet, and an idle story related by Echard. We say an idle story related by Echard; for nothing can be more certain than that it is totally without foundation. So far was Lord Ashley from advising the measure in question, or even concurring in it, that it was directly opposed by him; and he contended so powerfully against it, that the design was at first laid aside. When it was renewed, he drew up his reasons in writing against it, and left them with the King. The paper containing these reasons, together with a letter of his Lordship to a friend, in which he justifies himself against the charge of having supported the scheme, will be found in the family narrative.

With respect to the Declaration of Indulgence, the advice was given by Sir Thomas Clifford, whose principal view in it was to favour the Papists; and, for the same cause, the measure was readily adopted by his Majesty. Lord Ashley, however, closed in with it, from his ardent zeal for Toleration, and his regard for the Protestant Dissenters. His reasons for this part of his conduct are specified in the work. He seems to have entertained a notion, which we have no intention of vindicating, that, for the sake of exercising mercy, and in matters of mere penalty, the King might exercise a dispensing power. Bishop Burnet, with an inaccuracy not uncommon in him, speaking of the Declaration, says, the Lord Keeper Bridgeman refused to put the Seal to it, as judging it to be contrary to law; and that on this account he was dismissed, and the Earl of Shaftesbury made Lord Chancellor (92). Now the fact is, that Sir Orlando Bridgeman did put the Seal to the Declaration, and that Shaftesbury was not appointed Lord Chancellor till eight months after that event.

Our great Statesman's conduct in issuing writs, before the meeting of Parliament, for the election of Members, in the room of those who were deceased, has often, and we do not say unjustly, been condemned. Burnet says, "that Lord Shaftesbury resolved to recommend himself to the confidence of the court by a new strain, never before thought of" (93); but this is an assertion which is grounded on a total ignorance of the subject. That in the three preceding reigns of Queen Elizabeth, King James the First, and King Charles the First, several writs had been issued out, for electing Members, during the prorogation of Parliament, is clearly evinced in the work we are speaking of; and the reasons are assigned, why the Earl chose to obey the King's commands. Though we are far from believing that any thing can fully justify his compliance in this respect, it may, nevertheless, be remarked, that his memory ought not to be loaded with aggravations which are not founded in truth.

The last of the four accusations urged against him, as one of the Cabal, is his famous Speech, delivered

in Parliament, on the fourth of February, 1672-3, on the Dutch war. Even the candid Rapin observes, that the Earl of Shaftesbury must have had a forehead of brass to pronounce such a speech before so august an assembly (94). In the family narrative, great pains are taken to shew, that the Earl spoke only officially; that this was the constant mode in that reign; that the speech he himself had prepared was entirely changed by the council; that the offensive words in particular, "Delenda est Carthago," were there inserted; and that he was obliged to deliver the speech as it had been framed at the board. These things are maintained with a considerable degree of apparent strength; and it is sufficiently shewn, that his Lordship was far from being satisfied with the task which was imposed upon him. Whether he ought not rather to have given up his office, than thus to have submitted to compliances which were contrary to his inclination and his principles, is another question, which firm integrity will easily decide.

There are various other instances in which the manuscript so often referred to, endeavours to throw light on the Earl of Shaftesbury's character and conduct, and to clear him from the aspersions with which his name has been blackened. Many circumstances are, likewise, recorded concerning him, which have not yet appeared before the public eye. But not to touch on all the particulars that our memory might furnish, we shall only advert to his reception in Holland, and to the manner of his death, which last, as we have already seen, has greatly been misrepresented. Mrs. Macaulay Graham asserts, that in order to secure the protection of the States of Holland, he solicited the Magistrates of Amsterdam to be made one of the Upper Burghers of that city; but had the mortification to sustain a refusal, through the intrigues of the English Consul, who took care to put the Dutch in mind of the part the Earl had formerly taken against their Commonwealth. "Thus," adds our female historian, "did this unfortunate refugee, once the idol of a numerous party, once the terror of a government which he hated, and respected for his abilities even by those who were acquainted with his vices and imperfections, languish through a period of six weeks, surrounded only by a few inconsiderable refugees, and without receiving from the inhabitants of that place where he had sought an asylum, any of the common comforts usually paid to men in his station (95)." A very different representation of things is given in the narrative that is in the possession of the family. From that narrative it will appear, that, when the Earl of Shaftesbury arrived in Holland, he was visited by several of the States, and by persons of the greatest quality; that the principal men of Amsterdam assured him of their protection, and, for this purpose, made him a Burghers of their city; and that they shewed him all the respect and honours which were in their power. Indeed, these circumstances are confirmed by the testimony of Monf. Le Clerc, in his *Bibliothèque Choisie*, than whom no one could be better informed upon the subject. With regard to the manner of the Earl's death, he did not expire, as hath often been represented, in the arms of Ferguson, but in the arms of Mr. Wheelock, one of his Gentlemen; and it is asserted, that he maintained, to the last, an uncommon patience, resignation, and fortitude of mind.

After the different, and, in various respects, contradictory accounts which have been given of Lord Shaftesbury by a number of writers, it may be thought difficult to form a just estimate of his character. However, as our advantages for coming to a judgment upon this head have been superior to those which were enjoyed by the general run of historians, we shall state our sentiments concerning him with integrity and impartiality. On his abilities, his eloquence, and the eminent talents he possessed for

(94) *Hist. of Eng.* vol. xi. p. 381. fourth edit.

unmarried, in 1704. His Lordship departing this life on the 10th of November, 1699, was succeeded by Anthony his son and heir (r), of whom an account will be given in the next article. (r) Collins's Peerage, vol. iii. p. 385.

gaining an ascendancy over mankind, we need not enlarge; as these have already been sufficiently ascertained, and are acknowledged by most of his enemies. In private life he appears to have had many estimable qualities; nor have any proofs been afforded of the profligacy which has sometimes been ascribed to him. According to the records of the family, he was very constant in his attendance on divine worship, and kept a Chaplain in his house, whose name was Highmore. Dr. Benjamin Whichcot is likewise said to have lived much with his Lordship, and to have preached before him the greater part of the sermons that were afterwards printed. The friends of the Earl of Shaftesbury were ardently attached to him; and he numbered among his friends persons of the most respectable character. To have enjoyed the good opinion, the regard, and the affection, of such men as Mr. Stringer, Dr. Whichcot, and Mr. Locke, is no mean testimony in his favour. As to the Earl's public life, we are of opinion that it was often highly culpable; and that no history will ever be able to clear him of having occasionally been guilty of manifest inconsistencies, and submitted to shameful compliances. His bold and daring mind was not sufficiently restrained by scruples, when his ambition could be gratified; and perhaps there are instances in which the violence of his measures may be suspected of having been tarnished with the colours of revenge. But

however justly he may be censured for particular parts of his conduct, and whatever sacrifices he might make to the urgency of strong passions, his views appear to have been generally directed to the promotion of the interest and freedom of his country. Whilst we condemn his vehemence in the affair of the Popish Plot, we are convinced that, in other respects, the actions of the latter period of his life may be justified, and that the tyrannical designs of King Charles the Second merited the utmost warmth of his opposition. Upon the whole, there were three points in which, through the usual tenor of his life, the Earl of Shaftesbury was entitled to applause. These were his attention to the protection and advancement of Trade and Commerce; his endeavours to counteract the growing power of France; and his attachment to the cause of religious liberty. He wrote an Essay on Toleration, still preserved in the family, which was evidently the ground-work of Mr. Locke's admirable letters on that subject. Several of the measures proposed and supported by him were preparatory to those that were adopted at the Revolution; and he contributed, by his ardour, to raise and animate the spirit, which, in the end, produced that illustrious event; so that, amidst all his obliquities and faults, he deserves to be celebrated, as having been no small benefactor to the free Constitution of England.] K.

* * [COOPER (ANTHONY-ASHLEY), third Earl of Shaftesbury, was born on the 26th of February, 1670-71, at Exeter House in London, which was at that time the town residence of his grandfather, concerning whom so much has been said in the preceding article. His father was Anthony-Ashley Cooper, afterwards second Earl of Shaftesbury, and his mother the Lady Dorothy Manners, daughter of John Earl of Rutland (a). Of his father there is such a total silence in the histories of the times, and the memorials of the family, that he was probably of a very insignificant character, or at least, not at all distinguished by his mental abilities. Dryden speaks of him with great contempt, in his *Abraham* and *Achitophel*, as an unfeathered two-legged thing, and born a shapeless lump, like Anarchy (b). If this language had a reference to his external form, it was altogether unjust; for it appears from the pictures which remain of him, that in person he was remarkably handsome; and it has been imagined that his decease was hastened by his solicitude to remove some excrescence which began rather to disfigure his countenance. An improper application of remedies was productive of diseases that were fatal to his constitution, and ultimately the occasion of his death (c).]

(a) General Dictionary, Historical and Critical, vol. ix. p. 179.

(b) Johnson's English Poets, vol. xiii. p. 131.

(c) From the information of the Reverend and learned Mr. Huntingford.

The third Earl of Shaftesbury was destined to make a very different figure. Immediately upon his birth, his grandfather conceived so tender an affection for him, that he undertook the care of his education; and being sensible of the great advantages which would accrue from a good share of literature, he thought that no time could be too early for endeavouring to attain such a necessary and desirable object. That his grandson, therefore, might be as speedy as possible in his literary progress, he chose a method of instilling into him, as it were insensibly, the ancient languages, by placing a person about him, who was so thoroughly versed in the Latin and Greek tongues, as to be able to speak either of them with the greatest fluency. This person was a female, a Mrs. Birch, the daughter of a Schoolmaster in Oxfordshire or Berkshire: and a woman who could execute so extraordinary a task, deserves to have her name recorded with honour, among the learned ladies of England. Such was the effect of her instructions, that her pupil could read with ease both the Latin and Greek languages, when he was only eleven years old. At that age he was sent by his grandfather to a private school, where he continued till after the Earl's decease. In the end of the succeeding summer, 1683, he was carried by his father to Winchester School, then under the care of Dr. Harris. Here our young Nobleman was very indifferently treated by all excepting the Master, being frequently insulted on his grandfather's account, whose memory was extremely odious to the Zealots for despotic power. The ill usage which he met with at Winchester was so irksome to Lord Ashley, that he prevailed upon his father to remove him from that seminary, and to consent to his desire of going abroad. Accordingly, he began his travels in 1686 [A], under the care of Mr.

[A] Accordingly, he began his travels in 1686. Lord Ashley was accompanied in his tour, by Sir John Cropley, (with whom he continued in friend-

ship to the end of his life) and by Mr. Thomas Sclater Bacon. His Lordship spent a considerable time in Italy, where, as is evident from all his writings, he acquired

Mr. Daniel Denoune, a Scotch Gentleman of great ingenuity and integrity, and every way qualified for the employment of a tutor (*d*). The Biographers of the third Earl of Shaftesbury have generally represented him as having been principally under the tuition of Mr. Locke. There can be no doubt but that this great Philosopher was anxiously concerned for the improvement of the grandson of his intimate friend; and it is highly probable that his sentiments were consulted, and his advice followed, with regard to the mode of the young Gentleman's education. But that he ever acted in the capacity of a direct Tutor to him, appears to have been an opinion which hath been taken up without a sufficient foundation.

After a residence of three years abroad, Lord Ashley returned, in 1689, to England, and was offered a Seat in Parliament for some one of the Boroughs in which his family had an interest. There were, however, several reasons which induced him not to accept of such an offer at this particular time; and what prevailed upon him more strongly than any thing to decline the proposal, was a resolution he had formed of applying himself entirely to study, and encreasing his knowledge with regard to subjects of the greatest importance. In these views he happily succeeded, and laid a foundation in learning which was accurately extensive, and truly liberal. After ardently prosecuting his literary pursuits for nearly five years, he was elected, in consequence of Sir John Trenchard's death, a Burgess for Poole in Dorsetshire. He had not been long in Parliament before an opportunity was afforded him of expressing that spirit of liberty, which he maintained to the end of his life, and by which his conduct, on all occasions, was uniformly directed. The fact we refer to, was owing to the bringing in of the Bill for regulating Trials in cases of High Treason. One Part of the Bill in particular, which allows counsel to the prisoner, was regarded by most of the friends of liberty as a matter of the last importance. For this reason Lord Ashley had prepared a Speech in its behalf, which those to whom he shewed it judged to be a very proper one upon the occasion. But when his Lordship stood up to speak it in the House of Commons, he was so intimidated by the greatness of the auditory, that he lost his memory, and was totally unable to proceed. The House, after giving him a little time for recollection, called loudly for him to go on, which he did in the following terms: "If I, Sir, (addressing himself to the Speaker) who rise only to give my opinion on the Bill now depending, am so confounded, that I am unable to express the least of what I proposed to say; what must the condition of that man be, who, without any assistance is pleading for his life, and under apprehensions of being deprived of it?" This sudden turn of thought pleased the House extremely, and is believed to have had a greater effect than any of the other arguments that were urged in favour of the Bill. During the remainder of that Parliament, Lord Ashley persevered in the same mode of conduct, always zealously concurring in every motion that tended to the farther security of Liberty [*B*]; and though motions of this kind frequently came from persons with whom he had no connection in politics, and who belonged to a party of a different denomination, he, nevertheless, thought it his duty to support them, whenever he apprehended that the proposals they made were likely to be of service to the kingdom. With these principles and dispositions, it was justly to be lamented that the fatigues of attending regularly the business of the House of Commons, had in a few years such an effect upon his health, the frame of his body not

acquired no small degree of knowledge in the polite Arts. What his skill was in the art of painting in particular, may be determined by the treatise which he composed on the judgment of Hercules. It was his endeavour, while abroad, to improve himself, as much as possible, in every accomplishment. He did not, therefore, greatly seek the company of other English young Gentlemen; and whenever it happened that this could not be avoided, it was observed, that his discourse was principally addressed to their Tutors, from whom he might either learn something, or at least converse on such topics as were most agreeable to his genius. French was spoken by him so readily, and with so good an accent, that in France he was often taken for a native; and the ease and agility he displayed in performing the exercises in which that nation excelled, contributed to lead them into such an opinion (*1*).

(1) Gen. Dict. ubi supra, vol. ix. p. 179, note [*A*].

[*B*] Zealously concurring in every motion that tended to the farther security of liberty.] His zeal in defence of the freedom of the Constitution, notwithstanding the clamours to which he was exposed, will appear from the following passage of a letter of his to Thomas Stringer, Esq; his grandfather's friend, of whom mention has been made in the life of the first Earl of Shaftesbury.

London, February 15, 1695.

"I WILL not trouble you any farther now, nor indeed have I time. We have got the Bill to be engrossed, which lays an incapacity on the elector

"(as the late passed act does on the elected) in case of corruption, meat, drink, &c. and which obliges the Knight of the Shire to have 500*l.* a year, or the inheritance of it, as freehold within the county, and a Burgess 200*l.* a year somewhere at least in England on the same terms. You could, I believe, scarcely imagine with yourself, who these are in the world, or who they are in the House, who oppose this, and all other such Bills as this, might and main; and who they are that are condemned for flying in the face of government, as they call it, by being for such things as these are, and pressing such hard things on the Prerogative or Court. In short, you would hardly believe that your poor friend, who now writes to you, has sentence (and bitter sentence too) every day passed upon him for going, as you may be sure he goes, and ever will go on such occasions as these, whatever party it be, that is in or out at Court, that is, in possession of the places, and afraid of losing their daily bread, by not being servile enough, or that are out of places, and think by crossing the Court, and siding with good and popular things against it, to get into those places of profit and management. No more. My kind service to Mrs. Stringer, and my service too to your son. Your sincere friend, &c.

"A. ASHLEY (*2*)."

(2) Ibid. p. 179, 180, note [*C*].

being naturally robust, that he was obliged to decline coming again into Parliament, after the dissolution in 1698.

Lord Ashley being now at liberty to pursue the course of life that was most agreeable to his inclination, he went directly to Holland, where he spent his time in conversation with Monf. Bayle, Monf. Le Clerc, and several other ingenious and learned men who then resided in that country. The pleasure and improvement arising from an acquaintance with these Gentlemen, his Lordship found to be so great, that he was induced to continue there more than a twelvemonth. Being determined not to be interrupted in what was one of his principal objects in going to Holland, the diligent and effectual prosecution of his literary pursuits, he concealed his name and title, pretending to be only a Student in Physic. It was solely in that character that he contracted an intimacy with Monf. Bayle. However, a little before his return to England, being willing to be known to him by his proper appellation, he contrived to have Monf. Bayle invited to dinner by a friend (e), for the purpose of meeting Lord Ashley. That morning Monf. Bayle accidentally called upon his Lordship, and being pressed by him to stay, answered, that he could not by any means do it, because he had an appointment to meet Lord Ashley, and must be punctual to his engagement. The interview at dinner, occasioned, as may reasonably be supposed, no small degree of mirth; and the discovery contributed to strengthen the friendship that had already been formed, and which was preserved by an uninterrupted correspondence to Monf. Bayle's death. During this time, there was printed at London, in 8vo. an imperfect edition of Lord Ashley's "Inquiry concerning Virtue." It had been surreptitiously taken from a rough draught, sketched when he was no more than twenty years of age. His Lordship, who was greatly chagrined at this event, immediately bought up the impression before many books were sold, and set about completing the treatise, as it afterwards appeared in the second volume of the *Characteristics*. The person by whom he was thus unhandsonely treated was speedily discovered to be Mr. John Toland, who, in this transaction, repaid with ingratitude a very generous benefactor (f).

(e) Mr. Furly, an English Merchant at Rotterdam, a Quaker, and a man of excellent sense and learning.

(f) Gen. Diet. ubi *supra*, p. 179, 180.

Soon after Lord Ashley's return to England, he became, by the decease of his father, Earl of Shaftesbury. As he was endued with the prudence of paying a proper regard to his own affairs, he was involved in such a multiplicity of business on coming to the possession of his estate, that he was prevented from attending the House of Lords, during the first Session after he had succeeded to the Peerage. Nor did he appear in that House, in the second Session, till his friend the Lord Somers sent a messenger to acquaint him that his presence was necessary, on account of the Partition Treaty, which at that time was under the consideration of Parliament. This was in February 1700-1. The Earl of Shaftesbury immediately went post to London; and though, when Lord Somers's letter was brought to him, he was beyond Bridgwater in Somersetshire, and his constitution was ill calculated for sustaining any extraordinary fatigue, he travelled with such speed, that he was in the House of Peers on the following day; exhibiting an instance of dispatch, which at that time was more uncommon, and less easy to be performed, than it is at present. During the remainder of the Session, he attended his Parliamentary duty as much as his health would permit, being earnest to support the measures of King William, who was then engaged in forming the grand Alliance. Nothing, in the Earl of Shaftesbury's judgment, could more effectually assist that glorious undertaking, than the choice of a good Parliament. He used, therefore, his utmost efforts to facilitate the design; and such was his success, upon the election of a new House of Commons, (parties at that crisis being nearly on an equality) that his Majesty told him he had turned the scale. So high was the opinion which the King had formed of the Earl's abilities and character, that an offer was made him of being appointed Secretary of State. This, however, was an offer which his declining constitution would not permit him to accept. But although he was disabled from engaging in the course of official business, he was capable of giving advice to his Majesty, who frequently consulted him on affairs of the highest importance. Nay, it is understood, that he had a great share in composing that celebrated last Speech of King William, which was delivered on the 31st of December, 1701.

Upon the accession of Queen Anne to the throne, Lord Shaftesbury returned to his retired manner of life, being no longer advised with in relation to public concerns. At the same time, he was removed from the Vice-Admiralty of the county of Dorset, which had been in the family for three successive generations. This slight, though it was a matter of little consequence, was the only one that could have been shewn him, as it was the single thing which he had ever held under the Crown. The measure of taking it from him was supposed to have originated in certain Statesmen who resented his services to another party in the late reign. In the beginning of 1703, the Earl made a second journey to Holland, where he resided till nearly the close of the following year. Soon after this, the French Prophets occasioned a great disturbance throughout the nation by their enthusiastic extravagancies; and some were of opinion that, in order to suppress them, it was necessary to have recourse to methods of severity. Lord Shaftesbury, who had well considered the affair, and who abhorred any step which looked like persecution, apprehended that

that such measures tended rather to enflame than to cure the disease. This was the origin of his "Letter concerning Enthusiasm," which he sent to Lord Somers, then President of the Council, and which, being approved of by that Nobleman and other Gentlemen to whom it was shewn, was published in 1708, though without the name of the author, or that of the person to whom it was addressed. His "Moralist, a philosophical Rhapsody, being a Recital of certain Conversations on natural and moral Subjects," appeared in Jan. 1709; and in the May following his "Sensus Communis: An Essay upon the Freedom of Wit and Humour; in a Letter to a Friend." The three works now mentioned were printed at London in 8vo. It was in the same year that he entered into the marriage state, with Mrs. Jane Ewer, the youngest daughter of Thomas Ewer, Esq; of Lee in Hertfordshire. By this Lady, to whom his Lordship was related, he had an only son, Anthony the late Earl of Shaftesbury (g). It is certain that Miss Ewer was not the first object of our noble author's affections, and that he did not think of paying his addresses to her till after he had met with a disappointment with regard to another Lady of greater fortune and family. In forming this union, he seems to have been chiefly influenced by the solicitations of his friends; and evidently did not engage in it with any very romantic ideas of love and happiness [C]. In 1710, his "Soliloquy; or, Advice to an Author," was published, at London, in 8vo. While he was thus employing himself in literary composition, his health declined so fast, that it was recommended to him to seek assistance from a warmer climate. Having taken this resolution, he took leave, by letter, of several of his acquaintance, among the number of whom was Robert Harley, Earl of Oxford, and who had then been lately advanced to that title. As this letter is not in the usual strain of those addressed to Ministers of State, it shall be inserted below, together with another to the Lord Godolphin [D]. In July, 1711, the Earl of Shaftesbury set out for Naples,

(g) Gen. Dict.
ubi supra, p. 180
—182.

[C] *He seems to have been chiefly influenced by the solicitations of his friends, and evidently did not engage in it with any romantic ideas of love and happiness.* In a letter written to his friend, Robert Moleworth, Esq; afterwards Lord Viscount Moleworth, previously to his marriage, he thus expresses himself: "What other people will say of such a match I know not, nor what motives they will assign for it, when interest is set aside. Love, I fear, will scarcely be a tolerable pretence in such a one as I am: and for family, I have a brother still alive, whom I may have still some hopes of. What a weakness, then, would it be thought in me, to marry with little or no fortune, and not in the highest degree of quality neither? Will it be enough that I take a breeder out of a good family, with a right education, fit for a mere wife; and with no advantages, but simple innocence, modesty, and the plain qualities of a good mother and a good nurse? This is as little the modern relish, as that old fashioned wife of Horace's;

"Sabina qualis, aut perusta solibus
"Pernicis uxor Appuli.

"Can you or my friends who press me to this, bear me out in it? The experiment, however, shall be made, if I live out this summer: and you shall hear me say as the old batchelor in the Latin Menander, with a little alteration;

"*Etsi hoc molestum, atque alienum a vita mea*
"Videtur, si vos tantopere istuc voltis, fiat."

After his Lordship's marriage, having received, from the same friend, the compliments that are usual on such an occasion, he returned the following answer: "Were I to talk of marriage, and forced to speak my mind plainly, and without the help of humour or raillery, I should doubtless offend the most part of sober married people, and the ladies chiefly. For I should in reality think I did wonders, in extolling the happiness of my new state, and the merits of my wife in particular, by saying, *that I verily thought myself as happy a man now as ever.* And is not that subject enough for joy? What would a man of sense wish more? For my own part, if I find any sincere joy, it is because I promised myself no other than the satisfaction of my friends, who thought my family worth preserving, and myself worth nursing in an indifferent crazy state, to which a wife (if a good one) is a great help. Such a one I have found, and if by her help or care I can regain a tolerable share of health, you may be sure it will be employed as you

VOL. IV.

"desire, since my marriage itself was but a means to that end (3)."

If we did not make allowances for the effect which a continued indisposition of the body is apt to have upon the mind, we should be ready to say, that these letters do not place Lord Shaftesbury in the most amiable point of view.

[D] *It shall be inserted below, together with another to the Lord Godolphin.* They are as follows.

"Reygate, March 29, 1711.

"MY LORD,

"THE honour you have done me in many kind inquiries after my health, and the favour you have shewn me lately, in forwarding the only means I have left for my recovery, by trying the air of a warmer climate, obliges me ere I leave England to return your Lordship my most humble thanks and acknowledgments in this manner, since I am unable to do it in a better. I might, perhaps, my Lord, do injustice to myself, having had no opportunity of late years to pay my particular respects to you, if I should attempt: any otherwise to compliment your Lordship on the late honours you have received, than by appealing to the early acquaintance and strict correspondence I had once the honour to maintain with you and your family, for which I had been bred almost from my infancy to have the highest regard. Your Lordship well knows my principles and behaviour from the first hour I engaged in any public concern, and with what zeal I spent some years of my life in supporting your interest, which I thought of greater moment to the public, than my own or family's could ever be. What the natural effects are of private friendship so founded, and what the consequence of different opinions intervening, your Lordship, who is so good a judge of men and things, can better resolve with yourself, than I can possibly suggest. And being so knowing in friends, (of whom your Lordship has acquired so many) you can recollect how those ties or obligations have been hitherto preserved towards you, and whose friendships, affections, and principles you may for the future best depend upon in all circumstances and variations public and private. For my own part, I shall say only, that I very sincerely wish you all happiness, and can with no man living congratulate more heartily on what I account real honour and prosperity. Your conduct of the public will be the just earnest and insurance of your greatness and power; and I shall then chiefly congratulate with your Lordship on your merited honours and advancement, when by the happy effects it appears

to the Biographia
Britannica;
p. 37.

* 3 Z

"evidently

Naples, and pursuing his journey by way of France, was obliged to pass through the Duke of Berwick's army, which at that time lay encamped near the borders of Piedmont. Here he was entertained by that famous General in the most friendly manner, and every assistance was given him to conduct him in safety to the Duke of Savoy's dominions. Our noble author's removal to Italy was of no service to the re-establishment of his health; for after having resided at Naples about a year and a half, he departed this life on the 4th of February, Old-style, 1712-13, in the forty-second year of his age. The only pieces which he finished after he came to this city, were the "Judgment of Hercules," and the "Letter concerning Design," which last was added to that impression of the Characteristics that appeared in 1732. It was in 1711 that the first edition was published of all the Characteristics together, and in the order in which they now stand. But this publication not being entirely to his Lordship's satisfaction, he chiefly employed the latter part of his life in preparing his writings for a more elegant edition, which was given to the world in 1713, soon after his decease. The several prints that were then first interspersed through the volumes were all invented by himself, and designed under his immediate inspection; and for this purpose he was at the pains of drawing up a most accurate set of instructions, the manuscript of which is still preserved in the family. That no mistakes might be committed, the Earl did not leave to any other hands so much as the drudgery of correcting the press. In the three volumes of the "Characteristics of Men, Manners, Opinions, and Times," he completed the whole of his works which he intended for the public eye. Not long before his death he had formed a scheme of writing a discourse on Painting, Sculpture, and the other Arts of Design, which, if he had lived to have finished it, might have proved a very pleasing and useful work, as he had a fine taste in subjects of that kind: but his premature decease prevented his making any great progress in the undertaking. In 1716 some of his letters were published at London, in 8vo. under the title of "Several Letters written by a noble Lord to a young Man at the University [E]. Five years after-

" evidently in the service of what cause, and for the
 " advantage of what interest they were acquired and
 " employed. Had I been to wish by what hands the
 " public should have been served, the honour of the
 " first part (your Lordship well knows) had fallen to
 " you long since. If others, from whom I least
 " hoped, have done greatly and as became them, I
 " hope, if possible, you will still exceed all they have
 " performed, and accomplish the great work so glo-
 " riously begun and carried on for the rescue of li-
 " berty, and the deliverance of Europe and mankind.
 " And in this presumption I cannot but remain with
 " the same zeal and sincerity as ever,

" MY LORD, &c.

" Reygate, May the 27th, 1711.

" MY LORD,

" BEING about to attempt a journey to Italy to
 " try what a warmer climate (if I am able to reach it)
 " may do towards the restoring me a little breath and
 " life, it is impossible for me to stir hence, till I
 " have acquitted myself of my respects the best I
 " can to your Lordship, to whom alone, had I but
 " strength enough to make my compliments, and pay
 " a day's attendance in town, I should think myself
 " sufficiently happy in my weak state of health. I
 " am indeed, my Lord, little able to render services
 " of any kind; nor do I pretend to offer myself in
 " such a capacity to any one, except your Lordship
 " only. But could I flatter myself that ere I parted
 " hence, or while I passed through France, or stayed
 " in Italy, I could any where, in the least trifle, or in
 " the highest concern, render any manner of service
 " to your Lordship, I should be proud of such a com-
 " mission. Sure I am, in what relates to your honour
 " and name (if that can receive ever any advan-
 " tage from such an hand as mine) your public as well
 " as private merit will not pass unremembered into
 " whatever region or climate I am transferred. No
 " one has a more thorough knowledge in that kind
 " than myself, nor no one there is, who on this ac-
 " count has a juster right to profess himself, as I shall
 " ever do, with highest obligation and most constant
 " zeal,

" MY LORD,

" Your Lordship's most faithful and most
 " Obedient humble Servant,

" SHAFTESBURY (4)."

[E] *Several letters written by a noble Lord to a young Man of the University.* These letters were written to Michael Ainsworth, of the parish of St. Giles's, where Lord Shaftesbury lived, at whose expence he was educated and maintained at Oxford. The collection contains ten letters upon philosophical and theological subjects, but were never designed by the author to be made public. They contain many valuable reflections upon the most important subjects; of which we shall give the reader a specimen. In the second letter, which is dated May 10, 1707, he observes, that *the highest principle, which is the love of God, is best attained, not by dark speculations and Monkish philosophy, but by moral practice and love of mankind, and a study of their interests, the chief of which, and that which only raises them above the degree of brutes, is freedom of reason in the learned world, and good government and liberty in the civil world. Tyranny in one is ever accompanied or soon followed by tyranny in the other. And when slavery is brought upon a people, they are soon reduced to that base and brutal state, both in their understandings and morals. True zeal therefore for God and religion must be supported by real love for mankind; and love of mankind cannot consist but with a right knowledge of man's great interests, and of the only way and means (that of liberty and freedom) which God and nature has made necessary and essential to his manly dignity and character. They therefore, who betray these principles and the rights of mankind, betray religion even so as to make it an instrument against itself.* In his third letter he remarks that *it is the business of all, as many as are raised in knowledge, above the poor illiterate and laborious vulgar, to explain, as far as possible, the reasons of the divine laws, delivered to us in positive commands by our sacred legislator, their consent with the law of nature, their suitableness to society, and to the peace, happiness and enjoyment of ourselves.* "It is there alone, that we have need of recourse to fire and brimstone, and what other punishments the Divine Goodness (for our good) has condescended to threaten us with, where the force of these arguments cannot prevail. Our business within ourselves is to set ourselves free, according to that perfect law of liberty, which we are bid to look into. . . . And I am delighted to read these words from you, viz. that we are made to contemplate and love God intirely, and with a free and voluntary love. But this, you will see, is a mystery too deep for those souls, whom you converse with, and see around you. They have scarce heard of what it is to combat with their appetites and senses."

(4) Gen. Dict.
 ubi supra, p. 183.

afterwards, in 1721, another collection of the same kind appeared, entitled, "Letters from the Right Honourable the late Earl of Shaftesbury, to Robert Molesworth, Esq; now Lord Viscount of that Name, with two Letters written by the late Sir John Cropley: to which

" senses. They think themselves sufficiently justified, as men, and sufficiently qualified as holy men, and teachers of religion, if they can compass matters, by the help of circumstances and outward fortune, so as happily to restrain those lusts and appetites of theirs within the bounds of ordinary human laws. Hence those allurements of external objects (as you well remark) they are so far from declining, that they raise and advance them by all possible means, without fear of adding fuel to their inflamed desires, in a heart, which can never burn towards God, till those other fires are extinct. God grant, that since you know this better way, this chaste and holy discipline, you may still pursue it, with that just and pious jealousy over your own heart, that neither your eyes, nor any of your senses, may be led away to serve themselves, or any thing, but that Creator, who made them for his service, and in whom alone is happiness and rest." In the fourth letter, dated April the 2d 1708, he tells us, that of virtue there can be no reward but of the same kind with itself: nothing can be superadded to it. And even heaven itself can be no other, than the addition of grace to grace; virtue to virtue, and knowledge to knowledge; by which we may still more and more comprehend the chief virtue, and highest excellence, the giver and dispenser of all. In the fifth letter, dated January the 28th 1708-9, he remarks, that "all that we call improvement of our minds in dry and empty speculation; all learning or whatever else, either in theology or other sciences, which has not a direct tendency to render us bonester, milder, juster and better, is far from being justly so called. And even all that philosophy, which is built on the comparison and compounding of ideas, complex, implex, reflex, and all that din and noise of metaphysics; all that pretended study and science of nature called natural philosophy, Aristotelian, Cartesian, or whatever else it be, all those high contemplations of stars and spheres and planets; and all the other inquisitive curious parts of learning, are so far from being necessary improvements of the mind, that without the utmost care they serve only to blow it up in conceit and folly, and render men more stiff in their ignorance and vices." He observes afterwards, that we never more need a just cheerfulness, good humour, or alacrity of mind, that when we are contemplating God and Virtue. So that it may be assigned as one cause of the austerity and harshness of some men's Divinity, that in their habit of mind, and by that very morose and sour temper, which they contract with their hard studies, they make the idea of God so much after the pattern of their own bitter spirit. . . . But here is the great and essential matter of the last consequence to our souls and minds, to keep them from the contagion of pleasure. And to shew you, that I am not by this an imitator of the severe ascetic Monastic race of Divines, or an admirer of any thing that looks like restraint in knowledge, or learning or speculation, consider of this that I am going to say to you, and carry your reflection as far back, as to that first little glimmering of ingenuity, which shewed itself in you in your childhood, I mean the art of painting. Had you been to have made one of those artists of the nobler kind, who paint history, and actions, and nature, and had you been sent by me into Italy or elsewhere, to learn the style and manner of the great masters; what advice, think you, should I have given you? I say, what advice, not as Christian, or Philosopher, or man of virtue, but merely as a lover of the art; supposing I had even been of a very vicious life, and had no other end in sending you abroad than to have procured pictures, and have got you a masterly hand in that kind, and to have employed afterwards for my own use, and for the ornament of my house. Most certainly my advice must have been this; (and thus any other master or patron of common sense would have accosted you;) "You are now going to learn what is excellent and beautiful in the way of painting. You will go where there are many pictures of many different hands, and quite contrary in their manner and

style. You will find many judges of different opinions; and the worst masters, the worst pieces, the worst styles and manners will have their admirers. How is it you should form your Relish? By what means shall you come to have a right admiration yourself, and praise and imitate only what is truly exquisite and good in the kind? If you follow your sudden fancy and bent, if you fix your eye on that, which most strikes and pleases you at the first sight, you will most certainly never come to have a good eye at all. You will be led aside, and have a florid, and gay, and foolish fancy; and any lewd tawdry piece of dawbling will make a stronger impression on you than the most majestic chaste piece of the soberest master; and a FLEMISH or a FRENCH Manner will more prevail with you than a true ITALIAN. How shall we do then in this case? Why even thus, (for what way is there else?) Make it a solemn rule to yourself, to check your own eye and fancy, which naturally leads to gaiety; and turn it strongly on that, which it cares not at first to dwell upon. Be sure that you pass by on every occasion, whatever little idle piece of a negligent loose kind may be apt to detain your eye; and fix yourself upon the nobler, more masterly, and studied pieces of such, as were known Virtuoso's, and admired by all such. If you find no grace or charm at the first looking, look on, continue to observe all that you possibly can; and when you have got one glimpse, improve it, copy it, cultivate the idea, and labour till you have worked yourself into a right taste, and formed a relish and understanding of what is truly beautiful in the kind." This is what any ordinary master or pattern of common good sense would have said to you upon your enterprise on painting; and this is what I now say to you on your great enterprise on knowledge and learning. This is the reason I cry out to you against pleasure; to beware of those paths, which lead to a wrong knowledge, a wrong judgment of what is supremely BEAUTIFUL and GOOD. In the sixth letter dated February the 8th, 1709, his Lordship writes thus. "Time will be, when your greatest disturbance will arise from that antient difficulty, *ποδὶν τὸ καλόν*. But when you have well inured yourself to the precepts and speculation, which give the view of its noble contrary (*τὸ καλόν*), you will rest satisfied. But be persuaded in the mean time, that wisdom is more from the heart than from the head. Feel goodness, and you will see all things fair and good. Let it be your chief endeavour to make acquaintance with what is good, that by seeing perfectly, by the help of reason, what good is and what ill, you may prove whether that, which is from revelation, be not perfectly good and conformable to this standard. For if so, the very end of the gospel proves its truth; and that, which to the vulgar is only knowable by miracles, and teachable by positive precepts and commands, to the wise and virtuous is demonstrable by the nature of the thing. So that how can we forbear to give our assent to those doctrines, and that revelation, which is delivered to us, and enforced by miracles and wonders? But to us the very test and proof of the divineness and truth of that revelation is from the excellence of the things revealed. Otherwise the wonders themselves would have little effect or power; nor could they be thoroughly depended on, were we even as near to them as those, who lived more than a thousand years since, when they were freshly wrought, and strong in the memory of men. This is what alone can justify our easiness of faith; and in this respect we can never be too resigned, too willing, or too complaisant. Mean while let your eye be simple, and turn it from the *αἰθερ* to the *θεός*. View God in goodness and in his works, which have that character: dwell with honesty, and beauty, and order; study and love what is of this kind; and in time you will know and love the author (5)."

(5) Gen. Dict. ubi supra, p. 134, 135.

is prefixed a large Introduction, by the Editor (*b*).” This editor was Mr. Toland, who, in the present, as well as in the former case, assumed a liberty not very agreeable to the family. In their opinion, as the correspondence was almost entirely of a private nature, it was on that account unfit for public view. However, it set his Lordship’s integrity in the most amiable point of light. As to Mr. Toland’s introduction, it is chiefly founded on conjecture, and many things in it are absolutely false. An extract or two from the letters will be inserted below [*F*]. The Earl of Shaftesbury had an esteem for the works of the best English Divines; one remarkable instance of which was displayed in his writing a Preface to a volume of Dr. Whichcot’s Sermons, published in 1698. Copies of these Sermons had been taken in short-hand, as they were delivered from the pulpit; and the Earl had so high an opinion of them, that he not only introduced them to the world by his Preface, but had them printed under his own particular inspection (*i*). In his letters to a young man at the University, he speaks of Bishop Burnet and Dr. Hoadly in terms of great applause, and has done justice to the merits of Tillotson, Barrow, Chillingworth and Hammond, as the chief pillars of the Church against Fanaticism (*k*). But whatever regard his Lordship might have for some of our Divines, it was to the writings of Antiquity that his admiration was principally directed. These were the constant objects of his study, and from them he formed his system of Philosophy, which was of the civil, social, and theistic kind. His favourite books were the moral works of Xenophon, Horace, the Commentaries and Enchiridion of Epictetus as published by Arrian, and Marcus Antoninus. These authors he always carried with him in his various excursions, and they are now extant in his library, filled throughout with marginal notes, references, and explanations, all written in his own hand (*l*). To this catalogue Plato should undoubtedly have been added, of whom it is evident that the Earl of Shaftesbury was a diligent reader, an ardent admirer, and a zealous imitator. Simplicius is, likewise, spoken of by him in high terms of approbation, as may be seen in his letter to a Student (*m*). In the Supplement to the Biographia Britannica, Lucian is mentioned as one of the ancient writers whom his Lordship admired. But this is certainly a mistake, for it appears, on the contrary, that he had a particular aversion to that author (*n*).

(*b*) These Letters were published at London, in 8vo.

(*n*) This Remark, communicated by Dr. Towers, is grounded on the authority of the Letters to a Student.

(*s*) Philological Inquiries, p. 28, 29.

Concerning his Lordship’s brother, Maurice Ashley Cooper, it may not be improper to take notice, that he was the author of a translation of Xenophon’s Cyropædia, or the institution of Cyrus. “This translation,” says the late Mr. James Harris, “is made in all the purity and simplicity of the original, and to it the translator has prefixed a truly philosophical Dedication to my mother, who was one of his sisters. I esteem it an honour to call this author my uncle, and that not only from his rank, but much more from his learning and unblemished virtue; qualities which the love of retirement (where he thought they could be best cultivated) induced him to conceal, rather than to produce in public (*o*).”

The only child left by the third Earl of Shaftesbury was Anthony Ashley Cooper the fourth Earl; a Nobleman concerning whom Mr. Huntingford remarks, that there never existed a man of more benevolence, moral worth, and true piety; and this is a character which we can confirm by our own testimony, having had the honour of enjoying his acquaintance and correspondence. We were particularly informed by him, that, whilst he had the greatest reverence for the memory and character of his father, and a high esteem

[*F*] An extract or two from the letters will be inserted below.] In the seventh letter to Mr. Moleworth, dated from Beachworth, in Surry, January the 6th, 1708-9, his Lordship writes thus: “I never thought I should see any of the great men at Court so inclinable to public good, as to regard or hearken to a man, who has chiefly that at heart. And, to say truth of myself, I always thought I had a stubbornness of nature, which would hinder me from making a right advantage of good Ministers, whenever we should come to have any such. But being taken down very early in my life from those high imaginations I had, and those hopes of doing service in the plain way of business and Parliaments, the mortification wrought so far in my advantage, that I became milder and more tractable; and in this condition you found me, when you laid hold of an opportunity, and with a particular mark of friendship recommended me to a great man, and brought me under obligation to him. The little time I have had since with him, I employed the best I could, in such advices and such offer of service as became me. Nor do I think I have been any way unfortunate in giving the least offence, at raising that frightful idea, which courtiers are apt to have of patriots and men of rigid virtue. I flatter myself egregiously, or I am well in his opinion, and have lost no ground. But if it be so, and as I faithfully believe, I will be sworn, there never was

“a more disinterested man in his station; for if I may judge by myself, he leaves it to his friends, and those he has obliged to be grateful, and to act for him as they fancy, and as their heart prompts them; but for his part, he lays no burdens, nor requires any service in return.” In the fourth letter dated from Beachworth, November the 4th, 1708, he writes thus: “You may think me melancholy, if you will. I own, there was a time in public affairs, when I really was; for saving yourself, and perhaps one or two more (I speak the most) I had none that acted with me against the injustice and corruption of both parties; each of them inflamed against me, particularly one, because of my birth and principles; the other, because of my pretended apostasy, which was only adhering to those principles, on which their party was founded. There have been apostates indeed since that time. But the days are long since past, that you and I were treated as Jacobites. What to say for some companions of our’s, as they are now changed, I know not; but as to my own particular, I assure you, that since those sad days of the public, which might have helped on perhaps with that melancholy or spleen which you fear in me, and for certain have helped me to this ill state of health, I am now however as free as possible; and even in respect to my health too, excepting only the air of London, I am, humanly speaking, very passable (*6*).”

(*6*) Gen. Dict. ubi supra, p. 186.

for

for his writings, he did not concur with him in those parts of his works which appear to be sceptical with regard to the Christian Religion.

Such are the circumstances of the third Earl of Shaftesbury's life, the materials of which we have principally taken, not from the Supplement to the Biographia Britannica, but from the great General Dictionary; and that for a very sufficient reason. The article in that work was written by the late Earl, as he himself informed the present Biographer. On the authenticity, therefore, of its facts we may safely rely; and in other respects it is superior to the account which has been drawn up by one of our predecessors.

It now remains that we consider Lord Shaftesbury as a writer: and in this character such different representations have been given of him; he has been so much applauded, and so much condemned, that it will be necessary to be somewhat copious on the subject. And that we may the more effectually attain our purpose of forming a just estimation of him in his literary capacity, we shall pursue his works in the order assigned to them by himself; after which we shall take a general survey of him as an author, and attend particularly to his style and composition.

The first piece which occurs in the Characteristics, is his "Letter concerning Enthusiasm," with regard to which we have but few remarks to make. We have before seen that his view in publishing it, was laudable, as his design was to prevent the French Prophets and their adherents from being persecuted: and it will scarcely now be denied that it was better to treat them with contempt than severity. As to the tract itself, we do not think that it is entitled to any high degree of applause. It is written with vivacity, and sometimes with humour; but, on the whole, it is a desultory performance, and there are in it several exceptionable passages. There is but little precision in it; nor does it convey much philosophical information on the subject of Enthusiasm. However, on its first appearance, it greatly excited the public attention, both at home and abroad [G].

He

[G] It greatly excited the public attention, both at home and abroad.] Very soon after its appearance, it was attacked in a pamphlet in 8vo. entitled, "Remarks upon a Letter by a Lord concerning Enthusiasm, not written in Raillery but good Humour."

(7) In octavo.

Another Answer was published in May, 1709 (7), under the title of "Bart'lemy Fair: or, an Enquiry after Wit, in which due Respect is had to a Letter concerning Enthusiasm, by my Lord ***." The author of this publication was Mr. Wotton. A third attack came out in the same year, entitled, "Reflections upon a Letter concerning Enthusiasm, by Lord *****: In another Letter to a Lord (8)."

(8) Ibid.

(9) Ibid.

In 1708, a French translation of the "Letter concerning Enthusiasm," was printed at the Hague (9). Even the great Leibnitz condescended to make this tract the object of his attention: for he wrote some remarks upon it in French, which are published by Monsieur des Maireaux, in the second Volume of "Recueil de diverses Pieces sur la Philosophie, la Religion Naturelle, l'Histoire, les Mathematiques, &c. par Mess. Leibnitz, Clarke, Newton, et autres Auteurs celebres." Printed at Amsterdam,

(10) Gen. Dict. ubi supra, p. 181, 182. note [F].

In 1720 (10). The following extract, from the General Dictionary, will farther explain our noble Author's sentiments and views upon the point in question. "Lord Shaftesbury had perhaps a greater antipathy to Enthusiasm than most other persons, having seen many of the fatal consequences attending this deception in some people, with whom he was particularly acquainted. He wrote a little treatise upon the subject some years before the *Letter concerning Enthusiasm*, which he addressed to his brother, and which has never been made public. We shall quote the following passage from it, where he speaks of himself and his brother. *Being risen both of us pretty late in the morning, which was Sunday, we went, you know, to Church for the first time this new year. Thither I never went with truer zeal, in a better disposition, or with wholesomer reflections. And, what satisfied me still the more, it was by appointment, that we were that day to receive the Sacrament together, having had no opportunity of a long time. Here we both of us joined in blessing that good Providence, which had by reason and education separated us from the impure and horrid superstitions, monstrous enthusiasms, and wild fanaticisms of those blasphemous Visionaries we saw abounding in the world, and which had given us on the contrary side such established rules of worship, as were so decent, chaste, innocent, pure; and had placed us in a Religion and Church, where in respect of the moderate party and*

far greater part, the principle of Charity was really more extensive than in any Christian or Protestant Church besides in the world; where zeal was not phrensy and enthusiasm; Prayer and Devotion not rage and fits of loose extravagance; Religious discourses not cant and unintelligible nonsense, nor the character of a Saint resembling that of their inspired and godly men or women leaders; but where a good and virtuous life, with a hearty endeavour of service to one's country and to mankind, joined with a religious performance of all sacred duties, and a conformity with the established rites, was enough to answer the highest character of Religion, and where all other pretences to gifts and supernatural endowments beyond these moral and Christian perfections were justly suspected and treated as villainy, cheat, imposture, and madness. In a letter of his dated May the 5th 1709, he writes thus of the *Letter concerning Enthusiasm*: "I think your genius has dictated right to you about a little pamphlet, which, it seems, is commonly sold with the *Reflections* lately wrote upon it; which, if short, I would not for once debar you from, but have you hear what is said in answer, lest you should seem to yourself mistaken or diffident, as to the truth. For my own part, I cannot but think from my heart, that the author of the pamphlet (whatever air of humour he may give himself, the better to take with the polite world) is most sincere to virtue and religion; and even to the interest of our Church. For many of our modern assertors of toleration have seemed to leave us destitute of what he calls a *public leading* or *ministry*; which notion he treats as mere enthusiasm or horrid irreligion. For in truth Religion cannot be left thus to shift for itself, without the care and countenance of the Magistrate. But in the *Remarks* or *Reflections* I find the answers are so far from understanding this plain sense of *leading*, that they think it means only *leading by the nose*. So excellent are these Gentlemen at improving ridicule against themselves. They care not who defends religion, or how it is defended, if it be not defended in their way. They cry out upon a deluge of Scepticism breaking out and overwhelming us, in this witty knowing age; and yet they will allow no remedy proper in the case, no application to the world in a more genteel, polite, open, and free way. They for their parts (witness Dr. A——y against the good Mr. H——y) have asserted virtue upon baser principles and more false and destructive by far, than Epicurus, Democritus, Aristippus, or any of the ancient Atheists. "They

The next treatise is the "Sensus Communis: an Essay on the Freedom of Wit and Humour." This work is more considerable in point of extent than the former one, but is nearly entitled to the same character. The noble author, in our opinion, is far from being specific in his ideas. Some of the sentiments here advanced had been occasionally thrown out in the Letter concerning Enthusiasm; but in the present tract he enters into a larger defence of the application of raillery to subjects of speculative enquiry, and among the rest to matters of religious opinion. His advocates have asserted, that unjust representations have often been given of the positions maintained by him upon this head [H]. This assertion we acknowledge to be true; but, at the same time, we are convinced, that Lord Shaftesbury, by the inaccurate and unguarded manner in which he hath written, hath laid himself fairly open to animadversion and censure. Many persons have expressed great disapprobation of his ideas concerning the use of wit and humour. To expose his Lordship's notions in this respect, is the business of the first of Dr. Brown's Essays on the Characteristics. The Doctor contends, with great ingenuity, that Ridicule is a species of Eloquence; that reason alone is the detector of falshood, and the test of truth; that ridicule can never pretend to this character; that it is one of the most powerful engines, by which error can be maintained and established; and that its proper object is folly of conduct and chiefly affectation. What Dr. Brown maintained was not admitted without controversy. Several writers appeared in defence of the Earl of Shaftesbury, and amongst others, the Reverend Mr. Charles Bulkley, an ingenious and learned Dissenting Minister

(11) Gen. Dict.
ubi supra, p. 181,
 182. note [F].

"They have subverted all morality, all grounds of honesty, and supplanted the whole doctrine of our Saviour, under pretence of magnifying his revelation. In Philosophy they give up all foundations, all principles of Society, and the very best arguments to prove the Being of a Deity. And by the way, this pamphlet, which they are so offended at, is so strong on this head, that the author asserts the Deity even on the foundations of his *innate idea*, and the power of this notion even over Atheists themselves, and by the very concession of Epicurus and that sect (11)."

[H] *That unjust representations have often been given of the positions maintained by him upon this head.* We shall here insert what has been urged in his Lordship's defence, in the General Dictionary. "This author has been much misrepresented with respect to his notions of wit and ridicule. From his having recommended them in some cases as useful, he has been treated as an advocate of that low, mean and vicious buffoonery, which without decency or distinction seeks a laugh from every thing. The falshood of this charge may be sufficiently seen from an impartial view of what he has said on this subject, and that more particularly in this second treatise. His opinion if fairly examined, seems indeed to be no more than this, that ridicule may be made of excellent use, either against *ridicule itself*, when false and misapplied, or against *grave, specious, and delusive imposture*. It is with a view to the rendering it subservient to these two purposes, that he justly condemns other uses of it more licentious, and with great care distinguishes the decent from its contrary. Thus (vol. i. p. 63.) "To go about indoltriously (says he) to confound men in a mysterious manner, and to make advantage or draw pleasure from that perplexity they are thrown into, by such uncertain talk; is as unhandsome in a way of raillery, as when done with the greatest seriousness, or in the most solemn way of deceit—*Again*—It is certainly a mean, impotent and dull sort of wit, which amuses all alike, and which leaves the most sensible men, and even a friend, equally in doubt and at a loss to understand what one's real mind is upon any subject. This is that gross sort of Raillery, which is so offensive in good company. And indeed there is as much difference between one sort and another, as between fair-dealing and hypocrisy, or between the genteel wit and the most scurrilous buffoonery. —*Again*, vol. i. p. 128.—By this time (my friend!) you may possibly, I hope, be satisfied, that as I am in earnest in defending raillery, so I can be sober too in the use of it. It is in reality a serious study to learn to temper and regulate that humour, which nature has given us as a more lenitive remedy against vice, and a kind of specific against superstition, and melancholy delusion. There is a great

difference between seeking how to raise a laugh from every thing, and seeking in every thing what justly may be laughed at." See also pages 82, 3, 4, 5. of the same vol.—But a more remarkable instance than all these may be given from a manuscript epistle of this author to Monsieur Coste, when censuring a criticism of Monsieur Dacier (who would suppose the 34th Ode B. 1. of Horace to be ironical banter) he says, "There is a due proportion in irony well known to all polite writers, especially Horace, who so well copied that noted Socratic kind. Go but a little further with it, and strain it beyond a certain just measure, and there is nothing so offensive, injurious, hypocritical, bitter, and contrary to all true simplicity, honesty, or good manners."

"As to those uses of ridicule which he allows, with regard to imposture he tells us (vol. i. p. 11.) that we can never too much honour or revere any thing for grave, if we are assured the thing is grave, as we apprehend it. The main point is to know always true gravity from the false; and this can only be by carrying the rule constantly with us, and freely applying it not only to the things about us, but to ourselves. For if unhappily we lose the measure in ourselves, we shall soon lose it in every thing besides. Now what rule or measure is there in the world, except in considering the real temper of things, to find which are truly serious and which ridiculous? And how can this be done, unless by applying the ridicule, to see whether it will bear? But if we fear to apply this rule in any thing, what security can we have against imposture in all things?" Again, as to the use of ridicule against ridiculers themselves, and universal scoffers, he very pertinently says (vol. i. p. 134.) that "if it be the complaint of our standing Reformers, that they are not heard so well by the Gentlemen of fashion; if they exclaim against those airy wits, who fly to ridicule as a protection, and make successful sallies from that quarter; why should it be denied one, who is only a volunteer in this cause, to engage the adversary on his own terms, and expose himself willingly to such attacks, on the single condition of being allowed fair play in the same kind?"

"So little, as appears from hence, was this author an advocate for a vague, indecent, and boundless ridicule, or inclined to employ his wit and humour, otherwise than under the abovementioned restrictions, and when the above occasions called for it. What indeed he contended for, was not the droll and the buffoonish, but the humorous, the easy, and the facetious, the same genius and spirit, in which one of the most important facts of our Christian faith has been lately defended, and in which Free-thinking itself was once vigorously attacked; both of them with universal approbation as well of the manner, as of the argument (12)."

(12) *Ibid.* p. 182.
 note [H].

of the city of London [I]. In a work which was ascribed to the late Mr. Ramsay, the painter, the author attempted to shew that Ridicule is of two kinds, and that it may be applied to opinions as well as to manners: and we cannot avoid expressing our concurrence with the writer in this view of the subject. The usual objects of Ridicule are, indeed, certain improprieties and peculiarities of character and conduct, and to assert, in general, that it is the test of truth, is advancing a false position. Reason is undoubtedly the genuine and proper test of truth. Nevertheless, Ridicule may in some cases be justly applied to opinions. There are tenets so flagrantly absurd, that it is not easy to refrain from viewing them in the light of Humour and Raillery; and perhaps the best way of exposing them, may be to display them in that light. That some of the doctrines of Popery (not to mention other doctrines) cannot stand this mode of trial, has more than once been evinced, and particularly appears in Tillotson's Rule of Faith. We confess, however, that Ridicule, when applied to grave and important subjects, is a very dangerous weapon; that it ought to be adopted with the utmost discretion, and that it hath often been made use of in an improper manner.

In the third work, the "Soliloquy; or, Advice to an Author," the Earl of Shaftesbury rises in his literary character; for there are not many things in the performance which are liable to much censure. Dr. Brown speaks of this treatise in terms of high applause. "Here," says the Doctor, "bating only a few accidental passages, which will be occasionally pointed out hereafter, we shall have little more to do, than to approve and admire; the whole dissertation being, in its general turn, one continued instance of its author's knowledge and refined taste in books, life, and manners. I could dwell with pleasure on the beauties of this work, if indeed they needed an explanation. But that noble union of truth and eloquence which shines through the whole, as it supercedes, so it would disgrace any attempt of this kind. To the work itself therefore, I recommend the Reader (p)." Perhaps this encomium is carried higher than strict truth and justice will warrant. The writer of the present article, upon a late re-perusal of the "Advice to an Author," did not find himself struck with that admiration of it which he experienced in his younger days. There appeared to be too many things in it of a desultory, not to say of a trifling nature. It contains, however, a variety of excellent matter; and what the noble Lord has advanced in recommendation of self-examination, and in defence of critics and criticism, is particularly valuable. In this treatise those passages occur, which are supposed to cast a censure on the Philosophy of Mr. Locke, and for which the Earl of Shaftesbury hath often been condemned. One of them is as follows: "In reality, how specious a study, how solemn an amusement is raised from what we call philosophical speculations!—the formalities of ideas—their compositions, comparisons, agreement, and disagreement! What can have a better appearance, or bid fairer for genuine and true philosophy? Come on then. Let me philosophize in this manner; if this be indeed the way I am to grow wise. Let me examine my ideas of space and substance; let me look well into matter and its modes; if this be to look into MYSELF; if this be to improve my understanding, and enlarge my mind. Let me observe, therefore, with diligence, what passes *here*; what connection and consistency, what agreement or disagreement I find

fifth edit.

[I] And, amongst others, by the Reverend Mr. Charles Bulkley.] This Gentleman, in a piece entitled "A Vindication of my Lord Shaftesbury on the Subject of Ridicule," observes, "that as his Lordship was fully persuaded, that the highest Ridicule may possibly take place in matters of speculation, controversy, and argument, and that it hath actually been introduced into them; so, he, as well as others, knows that the natural and proper rule by which to discover what was ridiculous in Reason's Province was the use of reason: in like manner, as our sense of order, beauty and proportion judges and determines as to what is ridiculous in Architecture, Painting, and Dress, or whatever else must be supposed naturally to fall under our cognizance and inspection. But then he justly supposed, that there must be some certain way and method of using this reason, which might be more successful than any other, not only towards detecting the ridiculous, but also towards discovering the solid and the true. This method it was his design in the two treatises to recommend;" and it was "no other than reasoning upon every subject in an easy, cheerful, good humoured way, which the noble author recommends in opposition to that sour and melancholy, that magisterial and imposing manner of treating religion, which, in his opinion, has done such infinite mischief in the world. Nothing can be plainer than that his Lordship uses the word Ridicule as synonymous to freedom, famili-

arity, good-humour, and the like." Mr. Bulkley, throughout his pamphlet, endeavours to prove, that Lord Shaftesbury's Test of Ridicule is "no other than the Test of free and cheerful Enquiry, or that unrestrained, sociable, and pleasant manner of investigating truth, and examining opinions, which the noble author had observed, with such high approbation, in the writings of the ancients." His Lordship was vindicated, likewise, in this respect, in an anonymous piece, entitled, "Animadversions on Mr. Brown's three Essays on the Characteristics." In this publication it is contended, that it was the Earl of Shaftesbury's design "to recommend the Way of Ridicule, the cheerful and facetious Exercise of Reason, as a Preservative from the Gloom of Superstition, and the Extravagances of Enthusiasm." The same author farther remarks, that his Lordship, in his Essay on the Freedom of Wit and Humour, "has favoured us with a specimen of that humorous kind of writing which he means to recommend. And whoever reads it in an accurate and studious manner, will not find his humour to be (as Mr. Brown represents it) a light, trifling and superficial wit; which diverts itself with unmeaning jokes, and ambiguous innuendoes; but will be pleased to see how chaste it is, how happily tempered with gravity in treating the most important subjects, and how successfully it is employed in defence of Liberty, Honesty, and Religion (13)." (13) British Biog. vol. vii. p. 444, 445.

within:

within: whether, according to my present ideas, that which I approve this hour, I am likely to approve as well the next: and in case it be otherwise with me, how or in what manner I shall relieve myself; how ascertain my ideas, and keep my opinion, liking and esteem of things the same. If this remains unolved; if I am still the same mystery to myself as ever, to what purpose is all this reasoning and acuteness? Wherefore do I admire my Philosopher, or study to become such a one myself (q)? These sentiments are pursued by our noble author, in a manner that is very unjust and illiberal. It was, likewise, an act of ingratitude in him, thus to treat the man to whom he was under so many personal obligations, and who had been so closely connected with, and attached to his family. We should, however, remember how much the Earl of Shaftesbury was devoted to the sentimental philosophy, which was directly opposite to that of Mr. Locke. It ought also to be added, that his Lordship, in one of his works, has spoken highly in favour of the "Essay on human Understanding." That book he recommended to a Student, as no less fit to qualify for business and an intercourse with mankind, than for the Sciences and University. "No one," says he, (meaning Mr. Locke) "has done more towards recalling of true philosophy from barbarity into the use and practice of the world, and into the company of the better and politer sort, who might well be ashamed of it in its other dress. No one has opened a better and clearer way to reason. And above all I wonder to hear him censured by any Church of Men, for advancing reason and bringing the use of it so much into Religion (r)."

(r) Supplement to Biog. Brit. p. 34. note [B].

The second volume of the *Characteristics* opens with the "Inquiry concerning Virtue," for the introduction of which preparations had been made by many sentiments occasionally delivered in the former treatises. On the whole, it is a very valuable performance, being finely written, and containing an excellent display of the nature, tendency, and effects of virtuous and benevolent dispositions and actions. Here, if any where, Lord Shaftesbury must be allowed to appear to great advantage. We do not mean, however, to assert that the work is perfect, or that it is not in some respects liable to censure, or, at least, to just criticism. Though, from its first appearance it was much admired, and continued long to be held in admiration, it was, nevertheless, early the subject of animadversions. It was attacked by Dr. Bernard de Mandeville, in his "Fable of the Bees," as founded on chimerical principles. But the attack of such a writer was an honour, not a discredit to the work. Dr. Fiddes, in the Preface to his "General Treatise of Morality, founded upon Principles of Reason only," has vindicated the "Inquiry" against Mandeville's censures: and has pointed out the truth and beauty of the sentiments advanced by Lord Shaftesbury. Another writer, who distinguished himself in defence of his Lordship, was the ingenious Professor Hutcheson, of Glasgow. Indeed, this Gentleman may be considered as having founded in some degree, his system of morals on that of our noble author; or, at least, there was such a coincidence in their ideas, that they must ever be ranked as supporting the same principles, and engaged in the same cause. Several writers, however, of characters far superior to that of Mandeville, and totally abhorrent of his sentiments, have expressed their dissatisfaction with some parts of the "Inquiry concerning Virtue." Mrs. Cockburn, while she allows that the Earl of Shaftesbury's notions of moral Virtue were very noble and very just, and perfectly agreeable to Dr. Clarke's doctrine, says, that he seems to be defective in the foundation (s). Bishop Butler, with that sagacity which he so eminently possessed, has made some strictures on the "Inquiry," that are too rational and too important to be omitted; and, therefore, they shall be inserted below [K]. The Philosophers,

(q) *Characteristics*, vol. i. p. 299, 300.

(s) Mrs. Cockburn's Works, vol. ii. p. 268. 294.

[K] *And, therefore, shall be inserted below.* "The not taking into consideration this authority, (the authority of reflection or conscience) says the Bishop, which is implied in the idea of reflex approbation or disapprobation, seems a material deficiency or omission in Lord Shaftesbury's inquiry concerning virtue. He has shewn beyond all contradiction, that virtue is naturally the interest or happiness, and vice the misery of such a creature as man, placed in the circumstances which we are in this world. But suppose there are particular exceptions; a case which this author was unwilling to put, and yet surely it is to be put: or suppose a case which he has put and determined, that of a sceptic not convinced of this happy tendency of virtue, or being of a contrary opinion. His determination is, that it would be *without remedy*. One may say more explicitly, that leaving out the authority of reflex approbation, or disapprobation, such an one would be under an obligation to act viciously; since interest, one's own happiness, is a manifest obligation, and there is not supposed to be any other obligation in the case. "But does it much mend the matter, to take in that natural authority of reflection? There indeed would be an obligation to virtue; but would not the obligation from sup-

posed interest on the side of vice remain?" If it should, yet to be under two contrary obligations, that is, under none at all, would not be exactly the same, as to be under a formal obligation to be vicious, or to be in circumstances in which the constitution of man's nature plainly required, that vice should be preferred. But the obligation on the side of interest really does not remain. For the natural authority of the principle of reflection is an obligation the most near and intimate, the most certain and known: whereas the contrary obligation can at the utmost appear no more than probable; since no man can be *certain* in any circumstances, that vice is his interest in the present world, much less can he be certain against another: and thus the certain obligation would entirely supersede and destroy the uncertain one; which yet would have been of real force without the former.

"In truth, the taking in this consideration, totally changes the whole state of the case; and shews, what this author does not seem to have been aware of, that the greatest degree of scepticism which he thought possible, will still leave men under the strictest moral obligations, whatever their opinion be concerning the happiness of virtue. For that mankind upon reflection felt an approbation of what was good, and disapprobation

Philosophers, in general, who deduce the principles of virtue from self-love only, and refer the obligation of it solely to the Will of God, are, of course, direct enemies to the moral system of Lord Shaftesbury, and are not sparing of their censures of it, whenever it comes in their way. Of this class was Dr. Brown, who hath made the "Inquiry" the particular object of his animadversions, in the second of his Essays on the Characteristics. Whilst we acknowledge the ingenuity and importance of some of the Doctor's observations, we are far from thinking that he appears to as great advantage in this as in other parts of his work. In opposition to Dr. Brown, our noble author found an able defender in Mr. Bulkley, who published a pamphlet, the title of which was "A Vindication of my Lord Shaftesbury, on the Subjects of Morality and Religion, being farther Remarks on a Book entitled Essays on the Characteristics." Dr. Reid, in his late Treatise on the active Powers of Man, hath spoken of his Lordship, in different places, in language of approbation, and hath reckoned him with the judicious Moralists (t). Lord Monboddo is transcendent in his praises of the "Inquiry." "I have elsewhere said," observes his Lordship, "that the Inquiry is the best book in English upon the subject of Morals; and I am not at all disposed to retract that opinion, but, on the contrary, after having read it over again—I am fully convinced, that it is the best demonstration to be found, in any book that I know, ancient or modern, of the most important truth, the foundation, I think, of theism, that virtue is the greatest happiness, and vice the greatest misery of men: for we cannot otherwise be convinced ourselves, nor convince others, that the world is under the government of Supreme Intelligence, Power and Goodness (u)."

(t) Essays on the active Powers of Man, p. 145.

(u) Origin and Progress of Language, vol. iv. p. 351. note.

In the "Inquiry concerning Virtue," the Earl of Shaftesbury appeared in the close, the logical, and the didactic form. But in the "Moralists, a philosophical Rhapsody," he assumes a higher tone, and figures in a new character. Here he presents himself in the mode of dialogue, and is the emulator of the Ancients, and particularly of Plato, in the boldest poetic manner of that eminent Philosopher. Whatever may be thought of some things in the "Moralists," and especially of the rapturous kind of language into which his Lordship is frequently carried, it is, we think, on the whole, a work of great and extraordinary merit. Dr. Brown had asserted, that the noble author hath strangely attempted to ridicule and dishonour religion in every shape (w). But, Mr. Bulkley has justly observed, that this assertion is so far from being true, that the whole treatise we are speaking of is written in defence of a Deity and a Providence; and that the cause of pure, genuine and perfect theism is maintained in it with such strength of judgment, such superiority of reason, such invincible force of argument, such a commanding eloquence, and such a sublime strain of piety, as cannot but naturally and justly recommend it to the strictest attention of all who interest themselves in that highest and most momentous subject (x). With regard to the mode of composition adopted in the "Moralists," Bishop Hurd ranks it among the best of the kind which we have in our language. "There are,"

(w) Essay on the Characteristics, p. 230.

(x) British Biog. vol. vii. p. 445.

bation of the contrary, he thought a plain matter of fact, as it undoubtedly is, which none could deny, but from mere affectation. Take in then that authority and obligation, which is a constituent part of this reflex approbation, and it will undeniably follow, though a man should doubt of every thing else, yet, that he would still remain under the nearest and most certain obligation to the practice of virtue; an obligation implied in the very idea of virtue, in the very idea of reflex approbation.

"And how little influence soever this obligation alone can be expected to have in fact upon mankind, yet one may appeal even to interest and self-love, and ask, since from man's nature, condition, and the shortness of life, so little, so very little indeed, can possibly in any case be gained by vice; whether it be so prodigious a thing to sacrifice that little to the most intimate of all obligations; and which a man cannot transgress without being self-condemned, and unless he has corrupted his nature, without real self-dislike? This question I say may be asked, even upon supposition that the prospect of a future life were ever so uncertain.

"The observation that man is thus by his very nature a law to himself, pursued to its just consequences, is of the utmost importance; because, from it, it will follow, that though men should, through stupidity or speculative scepticism, be ignorant of or disbelieve any authority in the universe to punish the violation of this law; yet, if there should be such authority, they would be as really liable to punishment, as though they had been beforehand convinced, that such punishment would follow. For in whatever sense we understand justice, even supposing what I think would be very presumptuous to assert,

that the end of divine punishment is no other than that of civil punishment, namely, to prevent future mischief; upon this bold supposition, ignorance or disbelief of the sanction would by no means exempt even from this justice: because it is not foreknowledge of the punishment, which renders obnoxious to it; but merely violating a known obligation.

"And here it comes in one's way to take notice of a manifest error or mistake, in the author now cited, unless perhaps he has incautiously expressed himself so as to be misunderstood; namely, that *it is malice only, and not goodness, which can make us afraid*. Whereas in reality, goodness is the natural and just object of the greatest fear to an ill man. Malice may be appeased or satiated; humour may change: but goodness is a fixt, steady, immoveable principle of action. If either of the former holds the sword of justice, there is plainly ground for the greatest of crimes to hope for impunity: but if it be goodness, there can be no possible hope, whilst the reasons of things, or the ends of government, call for punishment. Thus every one sees how much greater chance of impunity, an ill man has in a partial administration, than in a just and upright one. It is said, that *the interest or good of the whole, must be the interest of the universal Being, and that He can have no other*. Be it so. This author has proved, that vice is naturally the misery of mankind in this world. Consequently it was for the good of the whole, that it should be so. What shadow of reason then is there to assert, that this may not be the case hereafter? Danger of future punishment (and if there be danger, there is ground of fear) no more supposes malice, than the present feeling of punishment does (14)."

(14) Preface to Butler's Sermons, vol. i. p. xxii—xxviii. Glasgow edit.

says the Bishop, "in English three Dialogues, and but three, that are fit to be mentioned—all of them excellently composed in their way, and it must be owned, by the very best and politest of our writers. The Dialogues I mean are, the "Moralists" of Lord Shaftesbury; Mr. Addison's "Treatise on Medals;" and the "Minute Philosopher" of Bishop Berkeley." According to Dr. Hurd, the sole fault of these applauded persons is, that they suffered themselves to be misled by modern practice, and with every ability to excel in this nice and difficult composition, have written beneath themselves, only because they did not keep up to the ancient standard. An essential defect in his opinion, runs through them all. "They have taken," he adds, "for their Speakers, not real, but *fictitious* Characters; contrary to the practice of the old writers; and to the infinite disadvantage of this mode of writing, in every respect (y)." Perhaps the Bishop has here carried the matter somewhat too far. However, without disputing the propriety of his general sentiments upon the subject, one thing is plain, that the Earl of Shaftesbury is regarded by him as amongst the first of our authors in the dialogistical form of composition. But the most complete eulogium on the "Rhapsody," is that which is given by Lord Monboddo: nor hath this learned writer satisfied himself with bestowing upon it some general praises, but hath favoured the public with a large and elaborate analysis of it, from which its excellence will more fully be displayed. This analysis our readers will be glad to see below [L]; and when they have perused it, they will be sensible that it is not necessary to add any farther testimonies in commendation of the "Moralists."

(y) Hurd's moral and political Dialogues, vol. i. Pref. p. xiv—xvi.

Concerning

[L] *This analysis our readers will be glad to see below.*

"The finest dialogue of modern times, so fine, that I think it may be compared with any thing of the kind we have got from antiquity, is my Lord Shaftesbury's rhapsody, entitled *The Moralists*. It has every thing which a dialogue requires; for it has a fable, characters, manners, incidents, and scenery too, and in short, every thing belonging to a dramatic piece. The subject of it is the conversion of a sceptic to theism. This conversion is made by a Philosopher, who is possessed of the noblest of all passions, an enthusiastic admiration of God and Nature. So here are two very different characters distinctly marked: and in the course of the action, which lasts three days, there are other characters introduced; for my Lord has not fallen into the error, which, I think, Plato has committed, of making but one conversation of his ten books of *Polity*, and likewise only one of his thirteen books of *Laws*, and so drawing out each of these dialogues to an immeasurable length, an error, which, as I have observed, Cicero has also avoided. In the first day's conversation, Philocles (so the sceptic is called, who is the narrator of the dialogue), recites a conversation which passed betwixt him and his friend Palemon, in the Park at London, upon the subject of the miseries of human life, in which Philocles having thrown out some things of the sceptical kind that gave offence to Palemon, as tending to show, that there is no distinction of right and wrong in actions, any more than of truth and falsehood in arguments,—Philocles, using the privilege, as he says, of a sceptic, entertained him with a discourse of some length upon the order and beauty which appears in nature, the government of the universal mind, which we ought from thence to infer, and to conclude, that all those ills natural and moral, of which they had been speaking, were no more than ills in appearance, being only the necessary consequences of the universe being a system. This sudden change having surprised Palemon, he asked Philocles what had produced sentiments so different from those he had before expressed. In answer to this, Philocles informs him, that some days ago he had had a conversation with a friend in the country, whom he calls Theocles, who had made a perfect convert of him to the firm belief of theism, and the government of an universal mind of infinite goodness and wisdom. This conversation Palemon earnestly desired to hear; but, as it was then growing late, Philocles could not satisfy him at that time, but promised that he would become author for his sake, and set it down in writing.

"This is the first day's conversation, and I think a very natural and proper introduction to what is principal in the piece, viz. the conversations with Theocles, which make the subject of the two other days. The scene of these is Theocles's country seat, where Philocles had gone upon a visit to him. There he finds him in the forenoon, walking in the fields

with a Virgil in his hand. This rural scene is very well described. Here, after some discourse, which the company, that Theocles had with him, naturally gave occasion to, the conversation took a philosophical turn; and they began to talk of pleasure and happiness, and of what was good or ill in human life. Upon this subject they at last agreed, that, what made perfect happiness, was the love and admiration of what was perfectly beautiful and good. Such an object, Theocles said, was to be found in the universe, and which he promised to discover to him the next morning; for, by this time, a servant had come from the house to let Theocles know, that company was come to dine with him.

"And here we have an episode very naturally introduced, in which we have two new characters that give an agreeable variety to the piece, and furnish matter for conversation on different subjects, but all having a relation to the principal subject of the piece. One of these characters is an old Gentleman, a religious bigot, and a man not at all of pleasant manners: the other is a modest young Gentleman, and more agreeable in conversation.

"The dinner was such, as to give occasion to Theocles to speak in praise of the virtue of temperance; from which it appears to have been a dinner very different from what is now given by men of fashion. From temperance in eating and drinking, they came to speak of temperance with respect to wealth and honours, and of virtue in general. Upon this subject it was observed, that to exalt virtue and its happiness, was understood by some religious men to be depressing and undervaluing religion: for virtue, they said, was misery; and that there was no happiness in this life, nor any except what religion promised in our future state. By arguing in this way, Theocles observed it was impossible to convince an atheist, who, if he believed that there was so much disorder in the present state of things, would not be disposed to think better of the future, and never could be persuaded, that the world was under the government of a Wise and Good Being. This naturally led the conversation to speak of atheism, and of the common way of arguing against Atheists; when it was observed, that if an author argued calmly against Atheists, and stated the arguments fully and fairly, he was understood to be a friend to them. This, it was said, was the case of the learned and pious Dr. Cudworth: and the same objection was made to a late author, viz. the author of the *'Inquiry concerning Virtue.'* And here Lord Shaftesbury introduces, I think not improperly, a defence of his own work from the mouth of Theocles, who speaks of that author as his friend, and therefore very willingly undertakes his defence in a pretty long discourse, where he shows, that the only way to convince an Atheist, is to treat him with good manners, and with calmness and moderation: that solidly to refute the arguments

Concerning the third volume of the *Characteristics*, we have little to say. It is entitled, "Miscellaneous Reflections on the preceding Treatises, and other critical Subjects:" and

is

ments of the Atheists, and to establish upon sound principles the existence of a Deity, must necessarily be previous to our belief in any revelation from that Deity: that genuine theism and just notions of the Divinity must necessarily produce that divine love, which is acknowledged to be the perfection of religion, arising from the high idea we have of the Being which is the object of it. This, he says, was what his friend recommended, maintaining that we were not truly religious, unless our devotion proceeded from such a principle, and not from the hopes of reward, or the fears of punishment; though such motives might be very properly used, with those who were by nature incapable of so liberal a devotion. This, says Theocles, I think is sufficient to defend the morality of my friend's inquiry, and shew, that it is nowise inconsistent with religion, but quite the contrary. At the same time, as his work is entirely confined to morality, he has not proved that a Being exists worthy of that disinterested love and admiration, in which he makes the perfection of religion to consist: to supply this defect, says he, I must become preacher, and give you a system of theology agreeable to his principles.

"Here this conversation ended, by the coming in of some visitants, who took up the remaining part of the afternoon in other discourse. In the evening, the scene is changed from the house to the fields, and all the rest of the company being gone, Philocles, with the old Gentleman and his young friend who remained, insisted with Theocles, that he should give them the sermon he had mentioned, which accordingly he did, taking occasion to begin it from observations made by Philocles upon the structure and organization of the plants they saw in the fields.

"And here begins what may be called the catastrophe or *denouement* of the piece, to which every thing preceding has a tendency more or less; I mean the demonstration of the existence of a Sovereign Mind and Supreme Intelligence, given by Theocles in language as beautiful and as much ornamented as science can be delivered in. Nor does Philocles forget his character of sceptic, and the part assigned to him of objecting to the arguments of Theocles, which part he acts exceedingly well; and thus the argument is fully laid before us, and according to the fair method in which even atheism, as Theocles thinks, should be treated, every thing is said in its behalf that can be said, but to which Theocles gives a sufficient answer. In this debate the old Gentleman takes a part suitable to his character, answering or endeavouring to answer the objections of Philocles, but in an angry passionate way: whereas the answers of Theocles are perfectly mild and good humoured; for he is a most amiable enthusiast, without any mixture of that passion, violence, and furious zeal, which we often see in religious enthusiasts.

"What follows after this is to be considered as corollaries or consequences of Theocles's demonstration; tending at the same time to strengthen it, by shewing that his theory is agreeable to fact and observation. The last conversation of this second day is after supper, and the subject of it is prodigies, miracles, apparitions, and other things altogether out of the ordinary course of nature. By these the old Gentleman would prove the existence of a Deity; but Philocles, taking up the argument of Theocles, shews that it is only from order, regularity, and uniformity in the operations of Nature, that we can infer the existence of a Supreme Intelligence; but from such violation of the laws of Nature, as those mentioned by the old Gentleman, and the confusion in the system thence resulting, nothing could be inferred except either the chaos and atoms of the Atheists, or the magic and demons of the Polytheists. This conversation is agreeably varied and distinguished from the preceding conversations of the same day, not only by the subject, but by Theocles, who was the chief Speaker in those, saying nothing in this, and likewise by the modest young Gentleman, who had been only

a hearer before, now taking a very proper part in the conversation, and joining Philocles to the great offence of the old Gentleman, who gave him a rebuke in such rough terms, that Philocles interposed, and finished the argument, which the young Gentleman had so well begun, but his modesty would not allow him to finish.—And thus ends the second day.

"The third and last day begins with Theocles dismissing his two guests early in the morning, (such was the custom in those days) and going out to his morning walk in the fields, where Philocles finds him. It is the same beautiful rural scene, where these two met the preceding morning. Here Theocles, at the desire of Philocles, addressed that Universal Mind in a strain very different from that in which he had proved the existence of such a Mind. Before he reasoned as a Philosopher, now he speaks as one inspired, not by the demon which inspired the Delphic priests or the Sybil of Virgil, but by Divine Love, which is mild, gentle, and humane. There is nothing therefore in Theocles of the *os rabidum*, or the *fera corda*, though his language be so much elevated, that it may be said to be *nil mortale sonans*. It is of that kind which the antients called dithyrambic, but much less obscure than the dithyrambics of Pindar, nor indeed is it at all obscure. It has those *loose numbers*, of which, as we have seen, the antients speak so much, as much as our language will admit; and the only fault I find with it is, that the numbers are sometimes too much stricted and altogether verse, though that happens but very rarely. But, upon the whole, I think it the most splendid language we have in prose, and the finest stile of the kind in English, but absolutely unfit for any other purpose, except for that for which the author has employed it.

"There are, I know, who, now that inspiration has ceased, will think such extatic effusions altogether unnatural. But those men know not the powers of human nature, and judge of other men by themselves. Even now the *Improvisatoris* and *Improvisatrices* of Italy will pour forth extempore, upon any subject assigned to them, a great many of their *ottavo rima* verses, of more difficult composition than any verse we now use in English, and much more difficult than the measured prose of Theocles. And I have no doubt, but one of these, if he was as great a Philosopher as Theocles, could make verses extempore upon the same subjects.

"The first Rhapsody of Theocles, is an invocation in very sublime language, but without any thing like what we call Fustian or Bombast, of that Sovereign Mind, the existence of which he had proved, praying for assistance to enable him to trace, in the works of creation, the marks of Wisdom, Goodness, and Power.

"In the second Rhapsody (or rant, as those who are not initiated into this Sublime Philosophy, would call it), he, in a still higher strain, goes through the works of nature, observing how the vital principle, diffused through the whole, operates in so many different ways, producing still new forms out of the ruins of the old, so that, amidst the greatest seeming profusion, nothing is lost. Here a great deal is said of matter and of mind, and of those two entities so difficult to be apprehended, Time and Motion. Then he proceeds in the same rapturous strain to survey the heavens, describing the sun, the planets, and the fixed stars, in language equal, if possible, to the subject.

"The subject of the third Rhapsody, is this our earth; where, in describing the minerals and the four elements, and particularly fire diffused, as he says, through the whole globe, and animating every thing in it, he shows more of natural knowledge than I thought he had been possessed of.

"In his fourth and last *transport*, he surveys the surface of this our globe, going through every climate and every country of it, where there is any thing very remarkable, and describing with great accuracy, as well as great pomp of language, all the wonderful scenes which it presents to us.

"Betwixt

is a kind of defence and explanation of what had gone before. This volume abounds with pleasantries, and contains a number of ingenious remarks; but we cannot regard it as deserving

“ Betwixt these fallies there is interjected a great deal of close reasoning by way of question and answer in the Socratic manner, which was very proper in a conversation betwixt them two, but would, I think, not have been so proper in the mixt company they were in before. The tendency of this reasoning, is to strengthen still farther, the proof of the existence of a Mind in nature, which unites the whole, and makes *one* of the universe. For proof of this, he appeals to every plant and every animal, in every one of which it is evident, that there is some one thing, which makes a *whole* of each of them. And, as every thing in nature is connected, as well as the parts of a plant or animal, for the same reason, there must be something in nature which makes a whole of it. In this interlude, as it may be called, there is a most satisfactory answer given to an objection made before by Philocles, but which had not been answered, namely, that though there may be union, order, and regularity, in so much of the system of the universe as we see, yet all might be disorder and confusion in the rest of the universe, which is infinite with respect to the small part of it than we can discover; for, if it were so, says Theocles, the infinite must prevail over the finite, and all be disorder and confusion.

“ Betwixt the second and third Rhapsodies there is nothing interposed, but an interruption which Theocles makes to himself, supposing that Philocles had something to object to what he had said; but Philocles saying that he had nothing to object, he proceeded to descant, as I have said, upon the elements and minerals.

“ Betwixt the third and fourth there is also nothing interposed except an admonition of Philocles, that he would not insist so much upon the power of the element of fire, which, though so friendly to life, Theocles had said, might, when let loose, destroy every thing, and bring on an universal conflagration. But, says he, describe to me the mass of nature as it appears upon this our earth; and accordingly Theocles proceeds to give that beautiful map of the earth above mentioned.

“ The conclusion of the work is very proper and suitable to the main design. The subject of this conclusion is, *1mo*, Beauty, and the different kinds of it: *2do*, The necessity of philosophizing in order to be happy. As to Beauty, he shows, that it is essential both to virtue and religion; for beauty is the object of love, and we love no person, no action, no thing, in which we do not perceive beauty. Now, there can be no virtue without the love of virtue, nor any religion without the love of God. We must therefore perceive beauty both in God and in Virtue. Then he proceeds to shew, that body has in itself no beauty, but that the beauty we admire in it is all from mind: so that what we admire in the works of art is the genius of the artist; and the beauty in the works of nature, where else can it be, but in the Mind of the Sovereign Artist, who therefore is the fountain of all Beauty, whether of body or of mind, as well as of all Intelligence. As there can be no love without admiration, and as admiration to a great degree is enthusiasm, he from thence derives the enthusiasms of Poets, Painters, Musicians, and the nobler enthusiasm still of the truly virtuous man, and the noblest of all enthusiasms, that arising from the love and admiration of the Supreme Beauty.

“ He next proceeds to show, that the sense of the *fair* and the *beautiful*, the *pulchrum* and *bonestum*, the *graceful* and the *becoming*, not only in outward forms, but in sentiments and actions, is in man from nature, not from art or teaching, institution or habit. This is so clear a proposition, that I wonder it should be denied, or even doubted of by any: and yet I am told, that in a book lately published upon the subject of morality, it is at least doubted of, if not denied. I think the author might have as well doubted whether such a thing as virtue or religion existed; or indeed whether such an animal as man existed: for I hold that there is nothing, which more eminently distinguishes

the man from the brute, than the sense of the fair and the beautiful.

“ The other thing he mentions in the conclusion of the dialogue, namely, the utility of philosophy, does also belong to the subject; for it was very proper, after having philosophized so much, to show that it was not to no purpose, but on the contrary, of the highest use. This he proves, not by a continued discourse, as he proves other things, but by close pungent interrogations and answers, which, at the same time that they are most convincing, make a beautiful variety in the style; and he concludes the whole by showing, that, in fact, all men do philosophize right or wrong; for they deliberate about what is useful or hurtful, what contributes to their happiness or not; and, even if they should determine not to deliberate at all, but to follow every fancy or conceit that is uppermost, still that will be in some sort to philosophize.

“ Thus I have analyzed this most beautiful piece; so beautiful in its style and composition, that it shews the author well qualified to write upon the Beautiful, which indeed is the chief subject of the piece. I will conclude with some general observations upon it.

“ And, in the first place, as the principal thing, according to Aristotle, in every dramatical piece, such as I hold this to be, is the fable, that principal part in the Moralists is, I think, admirable: for, at the same time that there is a perfect unity in it, there is a greater variety of characters and incidents, than in any dialogue of Plato, and more than even in Cicero's dialogue *De Oratore*, where the two days are not near so well filled up as the three days of the Moralists; and there are several changes of the scene, besides the introduction of new personages, which I think are very agreeable. It is therefore a fable of the kind which Aristotle calls complex; and which, if the unity of the action is preserved, he prefers to the simple.

“ The style is such as might be expected from a thorough well bred Gentleman, well acquainted with life and manners, at the same time an accomplished scholar, and who in his travels had acquired a very high taste for the fine arts, as appears from many passages of his writings. The style of such a writer must needs be copious and rich in all the ornaments which the knowledge of mythology, antient history, and the fine arts can furnish. His style is too luxuriant, as I have observed elsewhere, in some other of his writings; but I think it is chaste and sober enough in this piece. The style of the Rhapsodies of Theocles, is, as I have observed, very uncommon, excellent however of the kind, but very different, as it ought to be, from that of the dialogue, which is easy and natural, and a very good imitation of the conversation of Gentlemen upon learned subjects: and it has that politeness, which I have commended so much in Cicero's dialogue, particularly in what is said by the two principal personages Theocles and Philocles, and which has a contrast in Shaftesbury, that is not to be found in Cicero; I mean the roughness and ill-breeding of the old Gentleman.

“ As to the philosophy of this work, though it do not belong to the subject of this volume, I cannot help making some observations upon it. It is plainly a supplement, as the author has told us, to the *Inquiry concerning Virtue*; and he has in it carried the philosophy of morals to theology, and, I think, the most sublime theology that is to be found in English: and he has very properly connected the doctrine of morals, that is, the knowledge of ourselves, with theology; for, as I have observed elsewhere, we can know nothing of Divinity, without first knowing ourselves. He has therefore founded morality and theology upon the same principle, namely, that the beautiful and good are one and the same thing; and that what is beautiful and good in the characters of men, is beautiful and good, but in an infinitely higher degree, in the Divinity. This proposition therefore, that the beautiful and the good are the same, and which is a fundamental proposition in this treatise, I hold to be the basis

erving of any great applause. It is written, on the whole, in a desultory manner; and there are in it many exceptionable passages, especially with respect to revelation. The ingenious author of "Pompey the Little," in one of his introductory chapters, has humorously reckoned the "Miscellaneous Reflections" among the nothings.

Lord Shaftesbury's advocates have taken great pains to shew the connection that subsists between his different works: and that we may do full justice to his Lordship upon this head, we shall transcribe what has been advanced by the writer of his life in the General Dictionary [M]. That there is a connection between our noble author's treatises, and

basis both of morality and theology, though it be not so laid down in any treatise of morality in modern times, nor explicitly in any antient work, as far as I know, upon that subject.

"And, as beauty is the object of love, without which, as I have observed, love cannot be conceived, I find a wonderful agreement betwixt the philosophy of my Lord Shaftesbury upon this subject and the doctrine of our holy religion. The first and fundamental precept of the law, as our Saviour tells us, was 'to love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind, and thy neighbour as thyself.'—Again, our Saviour says to his Disciples, 'a new commandment I give unto you, that ye love one another.'—'By this shall all men know, that ye are my Disciples, if ye have love one to another.' And St. Paul, in that remarkable passage in I. Corinthians chap. 13, where he commends love, makes it the essential duty of every Christian, without which nothing that he can do, neither prophesying, understanding mysteries, nor working miracles, nor even martyrdom, will signify any thing.

"From this principle of beauty, which he has made the foundation, as we have seen, both of virtue and religion, Shaftesbury has deduced a demonstration of the Being, as well as the Attributes of God, better, I think, than what is to be found in any modern book: for he has proved, from the order, regularity, and beauty we see in all the works of Nature above, below, and round about us, that Supreme Intelligence governs in the universe; and, as there can be no beauty without an unity of design, and as such unity appears to be in every particular work of Nature, and in the whole, as far as falls under our observation, he from thence very justly, I think, infers that there is but one Supreme Intelligence (13)."

[M] *What has been advanced by the writer of his life in the General Dictionary.*

"With regard to the Characteristics, as they stand here methodised, it is to be observed that the several pieces, which compose them, are not only perfectly finished in themselves, according to the nature and genius of that species of writings to which each belongs, but that all together they form a complete whole, whose parts have a certain order and relation to each other, and which cannot be inverted without the whole's being injured.

"Such a dependency and connexion of the several joint tracts, is what the author himself in many places hints at. See vol. iii. p. 135, 189, 190, 284, 285, &c. Particularly vol. iii. p. 190, he says, that in this joint edition it will appear, that the three former treatises are preparatory to the fourth, and the fifth a kind of apology for this revived treatise concerning virtue and religion.

"Indeed, as he had a peculiar system, as well of Divinity as of Ethics, and had many things to advance, to which the ears of mankind had been little accustomed, it was necessary before he assumed the formal systematic and didactic character, that he should first appear in the preparatory, the corrective, or refutative.

Sincrum est nisi vas, &c.

To this preparatory therefore or refutative method may be referred the treatises of his first volume. And though in general they may be all three said to attack the follies, vices, and false taste of mankind, and so prepare the mind for the better doctrine it was to receive from the two following; yet each piece in particular seems to have a peculiar end of its own.

Vol. IV.

"The letter concerning Enthusiasm for instance, is more immediately levelled against the primary and most capital enemy of all true philosophy, and liberal sentiment, superstition. The causes of this evil are here accurately inquired into, and its sources traced to a natural passion, which if properly managed and turned upon its proper objects, is shewn to be productive of whatever is most amiable. This passion we are told is no other than enthusiasm, concerning the nature and rise of which he informs us (vol. iii. p. 20) that *there is a power in numbers, harmony, proportion, and beauty of every kind, which naturally captivates the heart, and raises the imagination to the opinion or conceit of something majestic and divine.* He adds in another place, (vol. iii. p. 37.) that *in itself this is a very natural and honest passion, and has properly nothing for its object, but what is good and honest.* It is apt however, he confesses, to run astray. And by modern examples, says he, *we know perhaps yet better than by any antient, that in religion the enthusiasm, which works by love, is subject to many strange irregularities; and that which works by fear, to many monstrous and horrible superstitions.* These then are those excesses of it, which he here professes to encounter, and against which he makes no small use of the weapons of wit and ridicule.

"It was this manner of attack, as well as a constant pursuit of it through his following pieces, which made it necessary that in his second treatise he should accommodate his reader to that free, easy, and humorous method, to that spirit of mirth and wit, and raillery, which he uses so freely upon occasions and subjects, where the usual style had been only the most grave and magisterial. As the method indeed was new, so it well wanted an apology. But of this see above remark [H] upon the essay, &c.

"The third treatise called *Soliloquy, or Advice to an Author*, besides a great share of subjects in common with the treatises abovementioned, has still something farther which is peculiar to its self. As the philosophy he had to exhibit, was calculated not only to furnish the head, but to mend the heart; as it was to correct those fancies and opinions, which are the springs of all our actions, for this reason it was absolutely necessary that the reader should be taught to turn his eye inward, and shewn how to recognize within himself the order as well as disorder, the œconomy as well as confusion of his own passions, appetites, imaginations and sentiments. This, in the judgment of this author, was the only means, by which a man might come to be sensible (vol. iii. p. 147) *who or what he is; whence he arose or had his being; to what end he was designed; and to what course of action he is by his own natural frame and constitution destined.* And (to use the words of vol. ii. p. 285) *as we have more or less of this intelligence or comprehension of ourselves, so this author held that we were accordingly more or less truly men, and either more or less to be depended on in friendship, society, and the commerce of life.* To assist therefore in this important business of self-converse and examination, appears to have been the principal purpose and design of the soliloquy.

"And now if we may suppose by the force of these previous treatises the dark and suspicious apprehensions of superstition to have been dissipated; the freedom of wit and humour to have been justified and established; and the method of self-converse and inspection to be made intelligible; we may well consider the preparatory part of his philosophy to have been discharged, and no obstacle left unremoved, which might prevent passing to the didactic part or preceptive.

* 4 C

To

(13) Origin and Progress of Language, vol. iv. p. 344—371.

(z) *Characteristics*, vol. ii. p. 263—290.

and that it was intended by himself, cannot be denied; but whether that connection be so accurate and close as is represented below, may justly be called in question. Perhaps the "Letter concerning Enthusiasm" and the "Essay on the Freedom of Wit and Humour" might have been spared without any loss to the most valuable part of his Lordship's design; and the same may be said of the "Miscellaneous Reflections." The "Advice to an Author" may be considered as in some degree preparatory to the "Inquiry concerning Virtue;" and between the "Inquiry concerning Virtue" and the "Moralists" there is a real and apparent union. This union has been fully insisted upon, and well displayed, in the last of the works now mentioned (z). The "Historical Draught or Tablature of the Judgment of Hercules" and the "Letter concerning the Art, or Science of Design," are two adventitious pieces, which have been annexed to the "Characteristics" ever since the edition of 1713. With respect to these pieces it may be sufficient to observe, that they afford specimens of the noble Writer's love for the fine Arts, and of that degree of taste in them to which he had arrived.

On the whole of the Earl of Shaftesbury's character as an author, much has been said to his praise, and much to his disadvantage. Mr. Bulkley and others have bestowed upon him the highest commendations. With these persons must be joined Lord Monboddo, who, speaking of the Rhapsodist in particular, is not afraid to pronounce it not only the best dialogue in English, out of all degree of comparison, but the sublimest Philosophy, and if we will join with it the Inquiry—the completest system both of Morality and Theology, that we have in our language, and, at the same time, of the greatest beauty and elegance for the style and composition. "Whatever may be said," continues our learned Grammarian, "against the other writings of Lord Shaftesbury, I never heard any serious objection made against this piece of his, though I know Mr. Pope has endeavoured to ridicule the rapturous Visions of Theocles. And I know very well that in my younger days, that is, about fifty years ago, all his writings, and particularly his Rhapsody, were much esteemed. But I do not know how it has happened, none of his writings at present appear to be in any estimation. I should wonder the more at this, if I did not know some other fine writings that appear to be forgot in much less time; such as the Art of Health by Dr. Armstrong, as fine a didactic Poem as in any language, and for diction and versification not exceeded by any thing in English: and the Castle of Indolence, written by his friend Mr. Thomson, is the best allegorical and descriptive poem that I know in any language, and the richest and best rhyming versification, for so long a work, that is to be found in English. As to my Lord Shaftesbury's works, they are now so much out of fashion, that I have no doubt that I shall give offence to several readers, by endeavouring to bring them again into vogue. But I do not write to flatter the prejudices of any man, or set of men, but to do justice to all authors, both ancient and modern, dead or living, as far as I am able. The faults of Lord Shaftesbury I have censured pretty freely elsewhere, and particularly the too great freedom which he has used with religion upon some occasions, to which he appears to have been provoked by the arrogance and high style of authority which was assumed by some Churchmen of those days. But in this work, at the same time that he has established the truth of natural Religion, better than any other writer in English, there is not a word in the whole work that carries the least insinuation against the Christian Religion; but on the contrary, he makes Palæmon, in the end of the second Section of the first Part, speak of Christianity in the most respectful terms. And what have we got to put down such a writer as Lord Shaftesbury? Writings, which for the honour of the nation ought not to be mentioned.—I would have those writers of the day, who affect to despise such a writer as Lord Shaftesbury, try to produce a dialogue like the Moralists; or if they say that they have not time or leisure to compose a work of such length, (for I am sure they will not think that they want genius or learning) let them try to write but a Letter of such elegance and style, and politeness of compliment, as the Letter on Enthusiasm (a)."

(a) *Origin and Progress of Language*, vol. iv. p. 383—388.

Several of the authors who have distinguished themselves by their direct opposition to many of the sentiments which occur in the *Characteristics*, have, nevertheless, mixed no small degree of applause with their censures. "I have again perused, with fresh pleasure, and fresh concern," says Mr. Balguy, in his Letter to a Deist, "the volumes of Cha-

"To this therefore we arrive in his second volume, where, as he confesses himself (vol. iii. p. 187) *the reader is about to see him in a new aspect, a formal and professed Philosopher, a system writer, a dogmatist, and expounder*. Here then we have his real sentiments, his philosophy and system. Here is the completion of that, to which his former treatises were but preparatives, and to which they are considered as being wholly made subservient, like those drugs and medicines, which Physicians often administer, only to prepare the body for that subsequent regimen, from which

alone it is to expect a sound and healthful establishment.

"As to the third volume (excepting the two last small treatises, which are independent and foreign) it is, what its name declares, a number of miscellaneous reflections upon the whole; a sort of defence and explanation of what had gone before; a comment, in which not only the scope and genius of his philosophy, but the nature, species, conduct, and design of each particular treatise are examined and criticised with the greatest wit and accuracy (14)."

(14) *Gen. Dis.* ubi *supra*, p. 183, 184. note [M].

"*Characteristics*

“ characteristics—I heartily wish the noble author had been as unprejudiced in writing, as I
 “ was in reading. If he had, I am persuaded his readers would have found double plea-
 “ sure and double instruction. It seems to me, that his Lordship had little or no temp-
 “ tation to pursue any singularities of opinion by way of distinction. His fine genius
 “ would sufficiently have distinguished him from vulgar authors, in the high road of truth
 “ and good sense; on which account his deviations seem the more to be lamented. The
 “ purity and politeness of his style, and the delicacy of his sentiments, are, and must be
 “ acknowledged by all readers of taste and sincerity. But nevertheless, as his beauties
 “ are not easy to be overlooked, so neither are his blemishes. His works appear to be
 “ stained with so many gross errors, and his fine thoughts are so often mingled with
 “ absurdities, that however we may be charmed with the one, we are forced to condemn
 “ the other.” Mr. Balguy hath farther observed, with regard to the “ Inquiry concern-
 “ ing Virtue,” which is the immediate object of his animadversion, that though he cannot
 agree in every particular contained in it, he finds little more to do than to tell how much
 he admires it; and that he thinks it indeed, in the main, a performance so just and exact,
 as to deserve higher praises than he is able to give it (b).

(b) Balguy's
Tracts, p. 1—4.

Dr. Brown's encomium on the “ Advice to an Author,” we have already mentioned. But with regard to the Characteristics in general, his commendations are more restricted; for he observes, that the Earl of Shaftesbury hath mingled beauties and blots, faults and excellencies, with a liberal and unsparing hand. At the same time, the Doctor applauds that generous spirit of freedom which shines throughout the whole. “ The noble author,” says he, “ every where asserts that natural privilege of man, which hath been so often
 “ denied him, of seeing with his own eyes, and judging by his own reason. It may pos-
 “ sibly appear strange to some, why he should so extremely labour a point so plain. But
 “ in justice to his Lordship, these Gentlemen must remember, or be informed, that in for-
 “ mer times, some well-designing men among ourselves, from a groundless dread of the
 “ unlimited freedom of the press, attempted to make the most unnatural and cruel sepa-
 “ ration between truth and liberty. Having shaken off the corruptions of Popery, and
 “ established what they thought a pure and perfect system, they unhappily stopped short
 “ in their full career of glory; preposterously attempting to deprive others of that com-
 “ mon privilege which they had nobly exercised themselves. This mistaken spirit seemed
 “ entirely subdued by the excellent Locke and others, about the time of the Revolution.
 “ But at the period when our noble author wrote, it not only revived, but was heightened
 “ by a terrible accession of bitterness and rancour. Hence those frequent sallies of invective
 “ which he throws out against those intolerant principles, which he justly stigmatizeth as
 “ equally impolitic, irrational, and unchristian.—It will ever be our truest praise therefore,
 “ to join the noble apologist in his encomiums on freedom; the only permanent basis
 “ on which religion and virtue can be established. Nor can we less approve his frequent
 “ recommendations of politeness, cheerfulness, and good humour, in the prosecution of
 “ our most important inquiries. The morose, contemptuous, and surly species of compo-
 “ sition is generally an appendage to bigotry, as appears in instances innumerable, both
 “ among the mistaken friends and enemies of religion. On the contrary, the amiable
 “ qualities of cheerfulness and good-humour cast a kind of sun-shine over a composition,
 “ and naturally engage us in favour of the writer. They resemble that gentle smile that
 “ often lights up the human countenance, the never-failing indication of a humane temper.
 “ How naturally then must we be disposed to listen; how open our minds to receive convic-
 “ tion, when we perceive our opponent's intention is benevolent? When we perceive
 “ that his aim is not victory but information: that he means not to insult but to instruct
 “ us (c)!”

(c) Essays on the
Characteristics,
p. 2, 3, 5, 6.

Another direct antagonist of the Earl of Shaftesbury, Dr. Leland, has observed, that no impartial man will deny him the praise of a fine genius. “ The quality of the writer,” continues the Doctor, “ his lively and beautiful imagination, the delicacy of taste he hath
 “ shewn in many instances, and the graces and embellishments of his style, though perhaps
 “ sometimes too affected, have procured him many admirers. To which may be added
 “ his refined sentiments on the beauty and excellency of virtue, and that he hath often
 “ spoken honourably of a just and good Providence, which ministers and governs the
 “ whole in the best manner; and hath strongly asserted, in opposition to Mr. Hobbes, the
 “ natural difference between good and evil; and that man was originally formed for
 “ society, and the exercise of mutual kindness and benevolence; and not only so, but for
 “ religion and piety too. These things have very much prejudiced many persons in his
 “ favour, and prepared them for receiving, almost implicitly, whatever he hath
 “ advanced (d).”

(d) View of the
Principal Deisti-
cal Writers, vol. i.
p. 49. fourth
edit.

There are writers, and those too of no mean name, who have spoken concerning Lord Shaftesbury as an author, in the language of general contempt and indignation. In this number we are sorry to reckon the admirable Jortin; who in the case before us, has, we think, departed from that candour of expression, which might have been expected from a man of so liberal a mind. He calls his Lordship a conceited, fantastical, and half-learned writer (e). The eminent Poet Gray is not less severe. “ You say,” addressing himself

(e) British Biog.,
vol. vii. p. 445.

to Mr. Stonehewer) "you cannot conceive how Lord Shaftesbury came to be a Philosopher in vogue; I will tell you. First, he was a Lord; secondly, he was as vain as any of his readers; thirdly, men are very prone to believe what they do not understand; fourthly, they will believe any thing at all, provided they are under no obligation to believe it; fifthly, they love to take a new road, when that road leads no where; sixthly, he was reckoned a fine writer, and seemed always to mean more than he said. Would you have any more reasons? An interval of above forty years has pretty well destroyed the charm. A dead Lord ranks but with Commons: vanity is no longer in the matter, for the new road is become an old one. The mode of freethinking is like that of ruffs and farthingales, and has given place to the mode of not thinking at all. Once it was reckoned graceful, half to discover and half conceal the mind; but now we have been long accustomed to see it quite naked. Primness and affectation of stile, like the good breeding of Queen Anne's court, has turned to hoydening and rude familiarity (f)."

(f) Mason's
Memoirs of the
Life of Mr. Gray,
p. 263, 264.

Dr. Johnson, as we are informed by Sir John Hawkins, bore no good-will to Lord Shaftesbury; "neither did he seem at all to relish the cant of the Shaftesburian School, nor inclined to admit the pretensions of those who professed it, to tastes and perceptions which are not common to all men; a taste in morals, in poetry, and prose writing, in painting, in sculpture, in music, in architecture, and in government! A taste that censured every production, and induced them to reprobate every effort of genius that fell short of their own capricious standard (g)."

(g) Life of Dr.
Samuel Johnson,
p. 255.

The grand point in which our noble Author has rendered himself justly obnoxious to the friends of religion, is his having interspersed through the *Characteristicks* a number of insinuations that appear to be unfavourable to the cause of Revelation. There have not, however, been wanting many among his admirers, who have thought that he ought not to be reckoned among the Deistical writers. The author of "*Animadversions upon Dr. Brown's three Essays on the Characteristicks*," observes, that it is "imprudent, to say no worse, in some sincere advocates for Christianity, to reject the friendly advice and assistance of so masterly a writer as the Lord Shaftesbury, and to give him up to the Deists, as a Patron of Infidelity (h)."

But it is matter of fact, and not considerations of prudence or imprudence, that must determine the question. In support of his Lordship's having been a believer in our holy religion, may be alledged, his Preface to *Whichcot's Sermons*, and his Letters to a Student at the University; in both which works he constantly expresses himself in such language as seems to indicate that he was really a Christian. And with regard to the "*Letters*" it may be remarked, that they were written in 1707, 1708, and 1709, not many years before his Lordship's death. Nevertheless, there are in the *Characteristicks* so many sceptical passages, that he must be considered as having been a doubter at least, if not an absolute disbeliever, with respect to Revelation. But if he must be ranked amongst the Deists, we agree with the observation of one of his Biographers, that he is a very different Deist from numbers who have appeared in that Character; his general principles being much less exceptionable (i).

(h) British Biog.
supra, p. 445.

(i) *Ibid.* p. 446.

The insinuations that have been thrown out by the Earl of Shaftesbury, to the prejudice of the scriptures, have been frequently animadverted upon, and fully confuted. Occasional strictures on his writings occur in Berkley's "*Minute Philosopher*," in Warburton's "*Divine Legation of Moses*" and in a multitude of other works. Bishop Warburton has entered pretty copiously into the question, whether Ridicule be a Test of Truth (k). In the productions of Mr. Balguy, Dr. Brown, and Dr. Leland, Lord Shaftesbury's direct and principal antagonists, will be found a compleat answer to whatever is justly exceptionable in the *Characteristicks*; and a particular consideration of that part of his Lordship's scheme which represents a regard to future rewards, as derogating from the dignity and excellency of virtue, as well as of his objections to the New Testament, because it does not inculcate, as positive duties, the love of our country and private friendship. On the last of these heads, Mr. Melmoth, in the concluding note to his elegant translation of Cicero's "*Laelius*," has made some remarks so admirably judicious, that we cannot fail of gratifying our readers, by giving them a place below [N].

(k) *Divine Legation of Moses*, vol. i. fourth edit. Dedication, p. 12 —23.

That

[N] *We cannot fail of gratifying our readers, by giving it a place below.* "The antient moralists were not agreed in what class of social merit to rank friendship; some placing it high in the scale of moral virtues, and others considering it as having no claim, in a strict and proper sense, to be admitted into their number. The notions of two celebrated moderns in estimating the value of this connection, are at a still greater distance from each other. The noble author of the *Characteristicks*, animated with a warm sensibility of the moral charms of this generous affection; and not being able, it seems, to discover that it is either enjoined, or encouraged, by the Christian institution; imputes this pretended omission as a capital

defect in the code of evangelical ethics. On the contrary, a late ingenious advocate for that sacred cause, which it was the unhappy direction of this accomplished Nobleman's learning and talents to depreciate; far from discerning any thing laudable or meritorious in private friendship, has attempted to prove, that "it is totally incompatible with the genius and spirit of the gospel." Thus the very same supposed circumstance, which appears to have been no inconsiderable obstruction to the noble philosopher's faith; is assigned by the elegant defender of Christianity, as one of those internal marks which authenticate its Divine origin!

—Mihi

That a man of Lord Shaftesbury's excellent character, and whose principles were, in various respects, so favourable to piety and virtue, should, in any degree, have been hostile to

—*Mibi convivæ prope dissentire videntur
Poscentes vario multum diversa palato:
Quid dem, quid non dem? Renuis tu, quod Jubet alter.*
HOR.

Widely, however, as these admired writers differ in their moral taste; there is one point in which they may be perfectly united: for the same mode of reasoning which overturns either of their respective positions, will equally confute both.

"That private friendship does not expressly enter into the precepts of Christianity, is unquestionably true: for, the nature of the connection necessarily excludes it from being the subject of a religious, or moral, obligation. The distinctive character of this relation, consists in a spontaneous sentiment of the heart, unconstrained and uninfluenced by compulsive, or external, motives of every kind and degree. To attempt therefore to produce a voluntary affection, by the authority of a positive command; would be to publish a law evidently destructive of its own end: for, its sanctions could no sooner operate as primary, or determining, inducements, than the sentiment they were designed to create would utterly be prevented from existing.

"But a general ordinance for this purpose, would not merely be absurd; it would be unjust: because it would require universally, what is not in every man's power to perform. A great variety of circumstances must concur, to form and cement this union: and these are of a nature so exceedingly contingent and fortuitous, that they are frequently never realized in the course of the longest life. Indeed, they so rarely meet together, that what a sagacious observer of mankind remarks concerning love, holds equally true in respect to friendship; *il est du véritable comme de l'apparition des esprits; tout le monde en parle, mais peu de gens ont vu.*

"If what the noble author requires from Revelation is, in the first instance, inconsistent with the essential nature of its object; it implies, in the next, an assertion no less contrary to fact: for although friendship could not, either in reason or justice, have been commanded by the precepts, it is evidently encouraged by the spirit of Christianity. Universal benevolence or good will to mankind, is the vital principle that animates and pervades the whole system of evangelical morality: and it is by a proper cultivation of this enlarged and comprehensive virtue, that the heart is best prepared and qualified to enter into the engagements, and discharge the offices, of private friendship. This the noble moralist himself acknowledges in a subsequent treatise: for when the religion of his country was not in his immediate contemplation, and his inveterate prejudices had not their usual object to call them forth; his Lordship asks "can any friendship be so heroic, as that towards mankind? Do you think—that particular friendship can well subsist without such an enlarged affection and sense of obligation to society?" This kind of reasoning, however, when applied to revelation, will not satisfy his demands; he contends, that "friendship is no essential part of a Christian's charity." But if there were any force in this objection, it would overshoot its intended aim, and wound natural religion no less than revealed; as friendship, for the reasons above assigned, can no more be the essential part of a theist's benevolence, than it is of a Christian's.

"In confirmation of his Lordship's opinion, he cites the authority of Bishop Taylor, who asserts that "the word friendship, in the sense we commonly mean by it, is not so much as named in the New Testament; and our holy religion takes no notice of it." But it may be questioned, perhaps, whether this very respectable ornament of our Church, would have been able to justify his assertion in its full latitude. Does not Christ himself make the most honourable mention of friendship, in the precise and proper sense of that word? For, discoursing with his disciples upon the subject of his approaching crucifixion, he illustrates the magnitude of that benevo-

lence which induced him to submit to the painful and ignominious death he was going to suffer, by a comparison drawn from the highest possible instance of human amity: "Greater love than this," he observes, "hath no man, than that he layeth down his life for his friends." To which he immediately adds, "ye are my friends if ye do whatsoever I command you:" that is, ye shall stand to me in the same relation as that term imports. For, the meaning of the word friends in the latter of these passages, must bear the same sense it evidently does in the former; otherwise the idea would be suddenly changed, without the least mark to distinguish its difference.

"But the texts just cited, are not more unfavourable to the learned Prelate's assertion, than that of the ingenious author of the "Internal Evidence." For it cannot, surely, be supposed with the least degree of reason, that our Saviour, either by way of analogy, or comparison, would have chosen to represent himself under a character, the genuine principles of which "are totally incompatible with the genius and spirit" of those moral laws, which it was one great object of his divine commission to confirm, or promulgate.

"Nor is it solely by necessary implication, or circumstantial inferences, that the Christian revelation recognizes friendship: it strongly and expressly recommends and encourages this amiable alliance; if exhibiting it in the noblest and most animating exemplar, may be allowed to have an immediate and direct influence over the heart of man. Two very remarkable instances for this purpose occur, in the history of our Saviour's life: and they have repeatedly been pointed out. Nevertheless, as the principal writers who have animadverted upon the respective tenets under examination, have contented themselves with slightly alluding to them; it may not, perhaps, be altogether unnecessary to state them in all their striking circumstances; especially as they seem to have been overlooked, or not duly considered, by the truly Right Reverend Author, on the credit of whose opinion Lord Shaftesbury has endeavoured to support his own.

"The Evangelist, in relating the miracle which Christ performed at Bethany by restoring a person to life who had lain some days in the grave; introduces his narrative by emphatically observing, that "Jesus loved Lazarus;" intimating, it should seem, that the sentiments which Christ entertained of Lazarus, were a distinct and peculiar species of that general benevolence with which he was actuated towards all mankind. Agreeably to this explication of the sacred historian's meaning, when the sisters of Lazarus sent to acquaint Jesus with the state in which their brother lay; they did not even mention his name; but pointing him out by a more honourable and equally notorious designation, the terms of their message were, "Behold! He whom thou lovest is sick!" Accordingly, when he informs his disciples of the notice he had thus received, his expression is, "our friend Lazarus sleepeth." Now that Christ did not upon this occasion use the word friend in its loose undistinguishing acceptation, but in a restrained and strictly appropriated sense; is not only manifest from this plain account of the fact itself, but appears further evident from the sequel. For, as he was advancing to the grave, accompanied with the relations of the deceased, he discovered the same emotions of grief as swelled the bosoms of those with whom Lazarus had been most intimately connected; and sympathizing with their common sorrow, he melted into tears. This circumstance was too remarkable to escape particular observation: and it drew from the spectators, what one should think it must necessarily draw from every reader, this natural and obvious reflection, "behold! how he loved him!"

"But in the concluding catastrophe of our Saviour's life, he gave a still more decisive proof that sentiments of the strongest personal attachment and friendship, were not unworthy of being admitted into his sacred bosom: they were too deeply, indeed, im-

pressed,

to Revelation, has been matter of regret to many of his admirers; and they have endeavoured to account for so disagreeable a circumstance. Mr. Huntingford has favoured us with some anecdotes and observations upon the subject, which we insert with peculiar pleasure. "From undoubted authority it is related, that the Preface prefixed to Dr. Whichcot's volume of Sermons, was dictated by Lord Shaftesbury to his sister the Lady Elizabeth, who with her own hand wrote it as he proceeded in pronouncing it. From the sentiments contained in this Preface, there is every reason to believe what Bishop Butler used to assert, that had Lord Shaftesbury lived in the present century, when Christianity is more perfectly understood, he would have been a good Christian. The intolerant doctrines of the Church, which in the last century were unfortunately too prevalent, and the intemperate zeal of those Ministers who signalized themselves by enforcing those doctrines, gave great offence to the benevolent mind of this Philosopher: and the transition, from a dislike of such teachers, to disapprobation of the system, which he erroneously conceived to inculcate and encourage persecution and spiritual pride, was easy and natural. And hence it seems to have arisen, that the letters in which Mr. Locke recommended Christianity to his Lordship, were of no avail. It is to be lamented that these letters are not now to be found; though many years have not elapsed since they were read by two Gentlemen, who were so affected by the strong and pressing terms in which Mr. Locke expressed his sentiments, that they could not abstain from tears. Perhaps however these letters might have less effect on his Lordship's mind, from a degree of dislike with which he considered Mr. Locke's philosophy respecting the human mind, and its being void of natural tendencies to what is right and fit. Mr. Locke does not seem to have been so thoroughly read in ancient philosophy, or indeed ancient learning of any kind, as Lord Shaftesbury was; and it is said that disputes on the real excellence of such learning were sometimes carried on between them with a degree of warmth; insomuch that Mr. Locke, in a great measure, lost the affection of Lord Shaftesbury. No man seems to have studied the Greek Philosophers to more effectual purpose than the author of the *Characteristicks*; for he has not only caught their manner of investigating the subject, not only explained the magnanimous principles on which the best school founded its system, but has left indisputable marks of a mind deeply impressed with a love of rectitude."

There is a tradition, that, amongst other difficulties which occurred to the Earl of Shaftesbury with regard to the truth of the Christian Revelation, he was startled at the idea of its containing the doctrine of the Eternity of Hell Torments; that he consulted some eminent Churchmen, whether the New Testament positively asserted that doctrine; and that, upon being assured that it did, he declared himself incapable of assenting to a system of Religion which maintained a tenet so repugnant to all his views of the benignity of the great Governor of the Universe. If his Lordship had lived in the present day, he would have found a number of Divines who would have given him quite a different answer. They would have informed him, that, in their opinion, Christianity holds out no doctrine of so dreadful a nature; and that, at the very utmost, it only denounces the final extinction of the impenitently wicked; so that such, if there be any such, who after all, shall remain incorrigibly corrupt and abandoned, will, at length, no longer exist in the Creation of God.

The stile of Lord Shaftesbury's compositions is a point upon which various and contradictory sentiments have been entertained. For a considerable time he was deemed one of our most polite and elegant writers; and how highly he was thought of in this respect, has appeared from several of the passages already cited. A recent authority in his favour

pressed, to be extinguished even by the most excruciating torments. In those dreadful moments, observing among the afflicted witnesses of his painful and ignominious sufferings, that faithful follower who is described by the historian as "the disciple whom he loved;" he distinguished him by the most convincing instance of superior confidence, esteem and affection that ever was exhibited to the admiration of mankind. For, under circumstances of the most agonizing torments, when it might be thought impossible for human nature to retain any other sensibility but that of its own inexpressible sufferings; he recommended to the care and protection of this his tried and approved friend, in terms of peculiar regard and endearment, the most tender and sacred object of his private affections. But no language can represent this pathetic and affecting scene, with a force and energy equal to the sublime simplicity of the Evangelist's own narrative: "Now there stood by the cross of Jesus, his mother and his mother's sister,—and Mary Magdalene. When Jesus saw his mother, and the disciple (standing) by, whom he loved; he saith to his mother,—behold thy son! then he saith to the

"disciple, behold thy mother! And from that hour that disciple took her to his own home."

"It may safely be asserted, that among all those memorable examples of friendship, which have been celebrated with the highest encomiums by the ancients; there cannot be produced a single instance, in which the most distinguishing features of exalted amity are so strongly displayed, as in the foregoing relation. The only one, perhaps, that bears even a faint similitude to it, is that famous transaction, recorded by a Greek author, which passed between Eudamidas and Aretheus. But when the very different circumstances attending the respective examples, are duly considered; it must be acknowledged, that the former rises as much above the latter in the proof it exhibits of sublime friendship, as it does in the dignity of the characters concerned."

"Upon the whole then it appears, that the divine Founder of the Christian Religion, as well by his own example as by the spirit of his moral doctrine, has not only encouraged but consecrated Friendship (15)."

(15) *Laelius: or an Essay on Friendship*; by Marcus Tullius Cicero. With Remarks by William Melmoth, Esq. p. 328—343.

is Mr. Knox. "It is to be lamented," says this ingenious Essayist, "for the sake of virtue, that Lord Shaftesbury was a sceptic. His style was a fine imitation of Plato, and displays such beauties, as might conceal the ugliness of a deformed system (l)." On the other hand, Mr. Walpole observes concerning our noble author, that his writings are much more estimable on account of their breathing the virtues of the mind, than for their style and manner; and that he delivers his doctrines in extatic diction, like one of the magi inculcating philosophic visions to an eastern auditory (m). It is obvious to remark, that this stricture can only be deemed just with regard to a small part of his Lordship's works, and especially the Rhapsodies that occur in the "Moralists." Dr. Campbell has pointed out a great fault which sometimes occurs in the Earl of Shaftesbury's Compositions; and that is, the becoming unintelligible from the affectation of excellence. "I proceed," says the Doctor, "to give examples of a still higher order, in sentences more complicated. These I shall produce from an author, who, though far from being deficient in acuteness, invention, or vivacity, is perhaps, in this species of composition, the most eminent of all that have written in the English language." In proof of this assertion, three sentences are alledged, which undoubtedly deserve the censure cast upon them (n); but it is observable, that they are taken from the "Miscellaneous Reflections," which we do not reckon amongst the most valuable parts of the Characteristics. Of all the criticisms that have been made upon Lord Shaftesbury's style, that of Dr. Blair is the most full, and the most judicious. Upon the head of precision the Doctor expresses himself as follows.

"Lord Shaftesbury's faults, in point of precision, are much greater than Mr. Addison's; and the more unpardonable, because he is a professed philosophical writer; who, as such, ought, above all things, to have studied precision. His style has both great beauties, and great faults; and, on the whole, is by no means a safe model for imitation. Lord Shaftesbury was well acquainted with the power of words; those which he employs are generally proper and well sounding; he has great variety of them; and his arrangement, as shall be afterwards shown, is commonly beautiful. His defect, in precision, is not owing so much to indistinct or confused ideas, as to perpetual affectation. He is fond, to excess, of the pomp and parade of Language; he is never satisfied with expressing any thing clearly and simply; he must always give it the dress of state and majesty. Hence perpetual circumlocutions, and many words and phrases employed to describe somewhat, that would have been described much better by one of them. If he has occasion to mention any person or author, he very rarely mentions him by his proper name. In the treatise, entitled, "Advice to an Author," he descants for two or three pages together upon Aristotle, without once naming him in any other way, than the Master Critic, the Mighty Genius and Judge of Art, the Prince of Critics, the Grand Master of Art, and Consummate Philologist. In the same way, the Grand Poetic Sire, the Philosophical Patriarch, and his Disciple of Noble Birth, and lofty Genius, are the only names by which he condescends to distinguish Homer, Socrates, and Plato, in another passage of the same treatise. This method of distinguishing persons is extremely affected; but it is not so contrary to precision, as the frequent circumlocutions he employs for all moral ideas; attentive, on every occasion, more to the pomp of language, than to the clearness which he ought to have studied as a Philosopher. The moral sense, for instance, after he had once defined it, was a clear term; but, how vague becomes the idea, when, in the next page, he calls it, "That natural affection, and anticipating fancy, which makes the sense of right and wrong?" Self-examination, or reflection on our own conduct, is an idea conceived with ease; but when it is wrought into all the forms of, "A man's dividing himself into two parties, becoming a self-dialogist, entering into partnership with himself, forming the dual number practically within himself;" we hardly know what to make of it. On some occasions, he so adorns, or rather loads with words, the plainest and simplest propositions, as, if not to obscure, at least, to enfeeble them (o)."

In the article of the construction and distribution of his sentences, Dr. Blair observes, that Lord Shaftesbury has shewn great art. He is, indeed, in the Doctor's opinion, unfit to be considered as a general model. "But, as his ear was fine, and as he was extremely attentive to every thing that is elegant, he has studied the proper intermixture of long and short sentences, with variety and harmony in their structure, more than any other English author: and for this part of composition, he deserves attention (p)." Dr. Blair farther remarks, that some writers practise that degree of inversion which our language bears, much more than others: Lord Shaftesbury, for instance, does it much more than Mr. Addison; to which sort of arrangement is owing, in a great measure, that appearance of strength, dignity, and varied harmony which his Lordship's style possesses. The words are often placed, not strictly in their natural order, but with that artificial construction, which may give the period most emphasis and grace (q). "Of later writers," adds the Doctor, in another lecture, "Shaftesbury is, upon the whole, the most correct in his numbers. As his ear was delicate, he has attended to music in all his sentences; and he is peculiarly happy in this respect, that he has avoided the monotony into which writers, who study the grace of sound, are very apt to fall: having diversified his periods with great variety (r)." In treating concerning simplicity and affectation of style, Dr.

Blair is far less favourable to the compositions of Lord Shaftesbury; and as the Doctor has here taken occasion to give a general view of his Lordship's character in the point we are considering, the whole passage shall be produced.

"Of authors, who, notwithstanding many excellencies, have rendered their style much less beautiful by want of simplicity, I cannot give a more remarkable example than Lord Shaftesbury. This is an author on whom I have made observations several times before, and shall now take leave of him, with giving his general character under this head. Considerable merit, doubtless, he has. His works might be read with profit for the moral philosophy which they contain, had he not filled them with so many oblique and invidious insinuations against the Christian Religion; thrown out, too, with so much spleen and satire, as do no honour to his memory, either as an author or a man. His language has many beauties. It is firm, and supported in an uncommon degree: it is rich and musical. No English author, as I formerly shewed, has attended so much to the regular construction of his sentences, both with respect to propriety, and with respect to cadence. All this gives so much elegance and pomp to his language, that there is no wonder it should have been sometimes highly admired. It is greatly hurt, however, by perpetual stiffness and affectation. This is its capital fault. His Lordship can express nothing with simplicity. He seems to have considered it as vulgar, and beneath the dignity of a man of quality, to speak like other men. Hence he is ever in buskins; full of circumlocutions and artificial elegance. In every sentence, we see the marks of labour and art; nothing of that ease, which expresses a sentiment coming natural and warm from the heart. Of figures and ornament of every kind, he is exceedingly fond; sometimes happy in them; but his fondness for them is too visible; and having once laid hold of some metaphor or allusion that pleased him, he knows not how to part with it. What is most wonderful, he was a professed admirer of simplicity; is always extolling it in the ancients, and censuring the moderns for the want of it; though he departs from it himself as far as any one modern whatever. Lord Shaftesbury possessed delicacy and refinement of taste, to a degree that we may call excessive and sickly; but he had little warmth of passion; few strong or vigorous feelings: and the coldness of his character led him to that artificial and stately manner which appears in his writings. He was fonder of nothing than of wit and raillery; but he is far from being happy in it. He attempts it often, but always awkwardly; he is stiff, even in his pleasantry; and laughs in form, like an author, and not like a man (s)." (s) Ibid. p. 396, 397.

We have been the more large in our extracts from Dr. Blair, because he has so particularly considered the Earl of Shaftesbury's style, and because his sentiments upon the subject appear, on the whole, to be very accurate and judicious. On the re-perusal of the Characteristics, we have been clearly convinced that the noble author was almost always excellent in the disposition of his words, but that in the choice of them he is frequently liable to censure. A striking instance of his nicety, not to say fastidiousness, with regard to composition, is displayed in the difference between the surreptitious edition of his Inquiry concerning virtue, and the corrected one, as it now stands in his works. It affords a curious and useful example of the *Limæ Labor*; the art of polishing language, breaking long sentences, and working up an imperfect draught into a highly finished performance (t). (t) Ibid. p. 397, 398. note. There is one disagreeable circumstance in reading Lord Shaftesbury's compositions, which is, that he adopted the fashion which at that time prevailed, of writing many of our words in a contracted form. This was then supposed to contribute to the ease and politeness of style; but it was far far from producing such an effect; and accordingly, it is now wisely rejected by our best authors.

It has been mentioned before, that it was customary with the Earl of Shaftesbury to write notes in the margin of the ancient authors that were his principal favourites. This custom he exercised very copiously with regard to Horace. By the friendship of Mr. Huntingford, we are enabled to give a large specimen of his Lordship's remarks on the Satires and Epistles of his admired Poet; and we are persuaded that it will be an acceptable present to our classical and critical readers [O]. It is observable, that the Earl of Shaftesbury entertained exactly the same idea concerning the design of the Epistle to the Pisos,

[O] *And we are persuaded that it will be an acceptable present to our classical and critical readers.* Mr. Huntingford's communication is entitled, "A critical Epistle from George Isaac Huntingford to Henry Addington, Esq; containing notes on Horace, by the Author of the Characteristics," and is as follows.

DEAR SIR,

You may remember perhaps that part of our last conversation was on the various excellencies of Horace. You expressed your opinion, that the works of this author were particularly calculated for the reading of a Gentleman, abounding as they do with so many exquisite strokes of satire on the foibles of Human Nature, and containing such an extensive knowledge

of men and the world. You were perfectly right in this, as in every other opinion. Horace is indeed a most thorough master of Moral Science; and no wonder, since he was educated in that best school of ancient philosophy, the Socratic.

The writings of all the Socratics, and particularly those of Xenophon (who has most faithfully as well as most elegantly recorded the tenets of his Master) perpetually teach us, "to know ourselves; to study mankind; to form liberal and magnanimous sentiments of morality, which may be not only *beautiful* in speculation, but also *practicable* in common life." The doctrines of this sect Horace imbibed (as plainly appears from his works) at that early period of his age when he says of himself,

Adjecere

Pisos, which has since been so ably and judiciously supported by Mr. Colman. We need not add, that Mr. Colman could not have any knowledge of his Lordship's opinion upon the subject. The

Adjecere bonæ paulo plus artis Athenæ:
Scilicet ut possẽm curvo dignoscere rectum,
Atque inter silvas Academi quærere verum.
Lib. 2. Ep. 2. V. 43.

It were to be wished that Horace had uniformly adhered to this high philosophy: but dire necessity compelled him to court the favour of Augustus, and to accommodate himself to the dissolute Mæcenas; from which unfortunate circumstances he became tainted with Epicurean notions. These notions he seems to have favoured for some time, but at length however he happily emerged from so degrading and degenerate a system, and rose again with all the dignity and superior beauty of his first principles.

The different influence, which at different times these various changes of philosophy could not fail to produce on the mind and writings of this Poet and Moralist, is so strongly marked in very many of his Odes, Satires, and Epistles, that it can scarcely escape any observant reader. But no one seems to have noted it so accurately, as the truly noble, because truly virtuous, author of the Characteristics. Indeed that elegant scholar and admirable philosopher seems to have studied the writings of Horace with uncommon attention; for he has left behind him some valuable notes, which are written with his own hand in a Cambridge edition of that author. Some of these notes may perhaps be thought worth your perusal, and therefore they are transmitted to you for your inspection.

LIB. I. Ode 34. Infanientis Sapientiæ.

Ab Epicureis discedens jam Senex ferè Horatius solùm Socraticam Sapientiam amplectitur. Vid. inf. Epist. 1. Neque adeo scurra aut impius Horatius ut ironicè hic *risus captans*, pietatem et Patriæ Ritus ita palam contemneret, et malignè laudans roderet. Hæc illa esset *Ærugo Mera* (Sat. 4. V. 100). *Quod Vitium procul abfore chartis promisit.* At ille magis apertè quidem et ingenuè quando Epicureus fuit, opinionem suam de Providentiâ profitetur. Sat. 5. Circa Deos tamen et Deorum templa quanta Cura et Pietas Horatii, Vide Sat. 2. L. 2. V. 104. Testantur quoque tot Odæ in honorem Deorum. Vid. Od. 6. Lib. 3.

V. 5. *Relictos.* Quia olim in Academiâ et Philosophiâ Socraticâ nutritus. Ut inf. Ep. 2. L. 2. V. 45.

Satyrarum LIB. I.

Sat. 1. V. 1. Quis fit.

Inconstantia causam quærit. Respondet Avaritiam speciosis nominibus velatam. (Inf. V. 30, &c.) Cupiditatem inexplibilem extra naturam. (V. 50.) Hinc Invidia, Æmulatio, Dolor (V. 109, &c.) et exitus e vitâ querulus. V. 117.

V. 14. Fabium.

Vide Vet. Comment. et Inf. ad Vers. 82. Sat. 3. de Labeone, et rursus ad Vers. 3. Ep. 4. de Cassio. ubi apparet Horatium idem fecisse in gratiam Augusti. Sic etiam Sat. 6, V. 24 et 107. Vide et Inf. Sat. 7. V. 1.—et Sat. 8. Lib. 2. V. 1.

V. 29. Caupo—Miles—Nautæ.

Hi omnes Avari, insatiabiles, miseri. Nemo avarus ergo se probat: omnes diversa laudant, sibi invident invicem, &c. V. 108.

V. 31. Ut in otia, &c.

Eadem Hominis Avari Excusatio.—Infr. V. 80.

V. 80. At si condoluit.

Excusatio Hominis Avari. Ut sup. V. 31.

V. 88. At si.

Respondet superiori, *At si* (V. 80.) ubi Avarus loquitur: hinc Horatius. Et est argumentum a fortiori: ut sup. V. 84. *Non filius*, &c.—Quomodo ergo habebis *Qui affideat, fementa parat*, &c. (V. 82.) Noli ergo excusationes istas adferre. (V. 80 et 31.) Avaritiamque defendere, sed tandem aliquando *fit finis quærendi*, &c.

VOL. IV.

V. 90. Operam perdas.

Etiam cooperante Naturâ, operam avaritiâ perdas. Surdi Cognati. Afini ad Lyræ.

V. 92. Denique fit finis.

Cum superioribus conjungo, ut sit sensus, at si in ipsis Cognatis retinendis operam perdas, tandem aliquando *fit finis quærendi*, &c. possunt tamen hæc in eodem sensu disjunctivè legi, sine mutatione inter-punctionis, et hoc rectius.

V. 108. Illuc.

1. 6. Sup. V. 95 et 101. Priora enim de avaris se non probantibus, et huc faciunt, jam inde a Versu 30.

V. 108. Nemon' ut Avarus.

Itane fieri? Ut nemo avarus, &c.—Sic Lambinus, latinitatis optimus judex, sensu quidem optimo. Cruquius ex M. S. legit, *nemo ut sine elisione quod* in Horatio non adeo rarum. Sic imitator Horatii Persius. Sat. 4. V. 23.

Ut nemo in sese tentat descendere, nemo.

Quòd autem *Avarus se probat* Horatius non dicit, sed e contra, viz. Inconstantia, Invidia, Æmulatio, causam esse Avaritiam (Vide Sup. Annot. V. 1.) Neque iste quidem Atheniensis sordidus, de quo sup. V. 65, &c. ideo vitam suam et lucrandi genus laudavit, quia lucrum ipsum omnimodum et ex omni re probavit. Si Mercator enim fuit, adversâ Tempestate aliquando militem laudavit; si agricola, civem, &c.—ut supra in initio Satyræ. Si ergo legimus *nemo ut*, possumus interrogationis notas amittere: si verò Lectionem receptam sequimur, sensus tamen erit affirmativus, *itane scilicet comparatum esse vel a naturâ constitutum, ut nemo avarus*, &c.? et sic, ni fallor, Lambinus accipit; aliter non tam benè, pessimè autem qui Avarum a cæteris distinguunt, quasi alius Horatio esset Avarus, alius Inconstans, ut inf. in Annot. Cantab.

V. 117. Inde fit.

Inde. i. e. Ab eadem hac avaritiâ. Ergo ne hoc sensu quidem Avarus se probat, et ad extremum miser est.

SAT. 2.

V. 77. Pœniteat te.

Scilicet. Te tuo non rerum vitio laborantem. Dum tibi res, non te rebus subjungere studes. Vid. Epist. L. 1. V. 19. Sic Epist. 17. V. 24. *Tentantem majora*, &c. non æquo animo presentia quæque accipientem, sed splendidiora et difficiliora captantem—sicut inf. V. 108, &c.—Sunt hæc tamen Epicurea vel Cyrenaica magis quàm Stoica. Hi enim neminem nisi suo vitio laborare dixerunt: illi laborare quidem, sed multum referre, *suo vitio rerumne laboret quis*.

V. 117. Verna.

Sic Lucretius secundum præcepta Epicuri (quem et noster in prioribus his Satyris sequitur) et *jacere humorem collectum in corpora quæque*.—In hac enim Philosophiâ, ne umbra quidem τὸ καλὸν.

SAT. 3. Ad Mæcenatem. V. Inf. V. 64.

V. 1. Omnibus, &c.

Correptus, credo, a Stoico quodam et coram Mæcenate Horatius apologiam hanc Mæcenati scribit, et contra Stoicos et Severiores invehitur. Anticipatione utitur in initio: ac veluti infra (Ep. 15.) propter inconstantiam suam, ubi Mænio se confert, sic in hac Satyrâ cum Tigellio. Et hinc quidem cum Stoicis verum Bellum. Inf. Sat. 3 et 7. Lib. 2. fictum gerit.

V. 29. Iracundior est, &c.

Planè Ipsus Horatius est. Et in sequentibus his 6 versibus seipsum describit, uti nominatim inf. V. 63. Hic verò tacitè quia seipsum laudat magis quàm infra, Sat. 6. V. 70. Vide integrum locum et confer. De Iracundiâ autem et Asperitate Suâ erga Monitores etiam Amicos, Vid. Ep. 8. V. 9. Vide et Ep. 2. Lib. 2. V. 210. Confer et V. 63, &c. infra.

V. 66. Communi Sensu.

Stoicus loquitur (Vide sup. V. 1.) et est hic *sensus communis*

* 4 E

The fate of Lord Shaftesbury as an Author, may furnish useful instruction to those who build their expectations on literary fame. For a considerable time he stood in high reputation

communis idem quod Juvenalis indicat. Sat. 8. V. 73. viz. *κοινοῦ νομοῦ*. Vid. Casaub. et Gat. in Mar. Ant. Sat. 16. Lib. 1. Neque adeo Stultus aut fatuus accusator Horatii, ut illum puræ putæ stultitiæ argueret.—Vide quod infr. Sat. 4. V. 77.—*Sine sensu*; quod planè ad societatem refertur.

V. 76. Stultis.

Ironice, credo, contra Stoicos. Sic inf. L. 2. Sat. 3. V. 81. *Dum doceo insanire omnes*. Si omnes irascuntur, insaniunt omnes et stulti sunt. Sed omnes irascimur (inquit Horatius) ergo omnes Stultifumus.

V. 82. Labeone insanior.

V. Vet Comment. et Sup. Sat. 1. V. 14. Vide etiam Lambinum, et Chabotii censuram. Alibi etiam Horatius hoc facit in gratiam Augusti (Hactenus enim Aulicus fuit, nec *Liba recusavit*. Inf. Ep. 10. V. 10.) et quia a partibus Reipublicæ olim steterat, unde illi in Aulâ Principis invidia conflata. Nunquam tamen ipsam Causam deseruit, neque de viris majoribus (Catone Scil. vel Bruto) malè loquitur: de Minoribus verò sæpe occasione quovis modo arrepta. Sic est Sat. 6. V. 24 et 107. Vid. Inf. Sat. 1. Lib. 2. V. 76.

V. 96. Paria.

Stoicum Dogma; sed inter spinosa et subtiliora disciplinæ; ad Praxin minimè referentia; in Logicis reservata; neque a Nobilioribus (Arriano Scil. et Marco Ant.) tractatum est. Non tam acriter tamen Horatius in hoc dogma, inf. Ep. 16. V. 52, &c. Ubi potius favet Stoicis etiam in hoc paradoxo.

V. 113. Nec Natura.

Hæc omnia cum Epicureis Horatius: postea non item. V. inf. Sat. 2. V. 75. Lib. 2.

V. 122. Magnis parva mineris.

Imperitissimus sanè Stoicus (sive Crispinus sive alius aliquis Romæ) qui hæc dixerit: nec reverà philosophus, sed imitator ipsius, quales tunc temporis Romæ multi. Sic infra Damasippus (Sat. 3. Lib. 2.) et ipse Davus (Sat. 7. ejusdem libri) introducitur.

SAT. 4.

V. 1. Eupolis, &c.

Apologia hæc est pro Satyris suis: plures ergo ante hanc scripsit. Sequitur Apologia altera pro hac ipsâ Satyrâ inf. Sat. 10. Prima quoque Sat. Lib. 2. Apologia est, uti et 6ta hujus Libri. quæ potius Epistola est, quàm Satyra.

V. 6. Pendet.

Significat, Satyram (cujus inventor Lucilius) veteris Comœdiæ locum occupasse.

V. 11. Lutulentus.

V. inf. Sat. 10. V. 50. et Od. 29. Lib. 3. V. 36.

V. 44. Comœdia.

Quia in initio Epistolæ Satyras Romanæ inventionis Lucilianas cum Comœdiâ Græcâ Veteri conjunxit, tanquam inde derivatas.

V. 47. In est.

Horatius quidem inesse dicit. Vide Artem Poet. V. 93 et 148.

V. 63. Aliàs.

Inf. Art. Poet. V. 93. Ubi Horatius affirmativè: regulas etiam de Comœdiâ tradens a versu 153 ad 178.

V. 91. Nigris.

Quia priùs dixerat Horatio Censor ille, *Ledere gaudes, pravus*, niger es. Sup. V. 78. Quis verò, et omnium maximè niger est, Horatius dicit. V. 100.

V. 136. Hoc.

De seipso et suo facto loquitur.

V. 137. Simile.

De irâ suâ intellige. Vide infr. Ep. 20. V. 25. et Ep. 8. V. 9.—Vid. et Ep. 2. Lib. 2. V. 210, 211.

V. 142. Plures.

Vide Epist. Ad Augustum. V. 108, &c.

SAT. 5.

V. 101. Deos, &c.

Juvenis adhuc Horatius et *parcus Deorum cultor*,

ut in Od. 34. Non sic postea. Vid. Sat. Sequent. V. 114. et quæ supra ad Od. 34. Lib. 1. Scripta est hæc Satyra Anno ab ter. Cond. 713, quando Pax inter Octavium et Antonium. Sup. V. 27.

SAT. 6.

Tota Apologetica est hæc Satyra, vel potius Epistola Horatii, commendantis se Mæcenati. Omnia enim ad seipsum referuntur, nec reverà apologiam relinquit, quanquam, V. 45. *Nunc ad me redeo* inquit. Sed tacite et cum aliis collatione factâ, seipsum laudat. Non immerito ergo, inf. V. 70. *Ut me collaudem*.—Vide Annot. Inf. V. 19. 24. &c.

V. 8. Ingenuus.

Rectè Vet. Com: Ingenuus, hic ad morum probitatem pertinet.

V. 22. Vel merito quoniam.

V. Inf. V. 49.—Et Ep. 20. V. 21.

V. 19. Populus Lævino, &c.

Vide interim (inquit Horatius) quanta ambitionis vis, etiam in ignotis! Populo enim non favente, censore et senatu prohibente, nihilominus pergunt (et *fulgente trahit*, &c.) etiam exclusi (uti *Tullius*) redeunt rursus, instant, clamant. Mox verò exclamante populo, *Tunc Syria*, &c.—reclamat ambitiosus. *At Novius*, &c. respondent omnes, *Hoc tibi*, &c. *Tunc ergo Paulus et Messala*? Ille vero, Homo impudens, pro se dicere, et eodem modo clamare non desistit. Eandem excusationem semper profert. Supra omnes vociferatur, et exultans *sonat* (*cornua quod vincatque tubas*). *Saltem tenet hoc nos*. i. e. *Saltem hoc nobis conceditur*. Hæc nostra est Solatio. V. Inf. V. 44.

V. 24. Ignotos.

Tacite se Mæcenati commendat Horatius. Non enim, inquit, quia ignobilis ideo ambitiosus non sum (Ignobiles enim æquè ac Nobiles ambitiosi sunt) sed quia Bonus, Modestus, et *Vitâ et peccore puro*. Inf. V. 51. 55. 57. et 64. Et est quidem tota hæc Satyra quasi Epistola Apologetica et commendabilis.

V. 24. Tulli.

Tullius hic senatu motus a Cæsare quasi Pompeianus: occiso vero Cæsare recepit latum Clavum, et Tribunus Militum factus est.

V. 40. At Novius.

Apologia Hominis Ambitiosi novi, rursus alia Apologia inf. V. 90.

V. 44. Saltem tenet hoc nos.

Verba Ambitiosi Hominis qui *Paulus et Messala sibi videtur*, clamans perpetuò, *at Novius Collega*, &c. Quid illi facias? Silebit nunquam: eandem cantilenam cantabit *Saltem tenet hoc nos*. i. e. *Solatur* (nam ita Lambinus; quanquam verba hæc ad Populum refert, ut Commentatores omnes: quod moror.) Sic sup. Sat. 2. V. 53. *Verum hoc se amplectitur uno, hoc amat, et laudat Matronam nullam ego tango*. Hæc Amatoris, illa Ambitiosi vox est: Horatii verò longè discrepans et *Vox et Ratio* inf. V. 90 et 93. Non enim solatur se vel defendit, sed congratulatur sibi. Vid. Sup. V. 19.

Tenet nos—verbum *tenet* hic in bonam partem sumitur, ut inf. Ep. 18. V. 23. *Quem tenet argenti fitis*. Sic etiam, Sat. 3. Lib. 2. V. 45. *Hæc magnos formula reges tenet*. inf. autem Epist. 7. V. 18. *tam teneor dono*.

V. 46. Rodunt.

Verisimile est Horatium hanc Satyram ante, Od. 3. Lib. 4. scripsisse. Vide istic, V. 16.

V. 47. Olim.

Temporibus Bruti et Reipublicæ. Hinc Horatio Invidiæ crevit qui *Majores pennas*, &c.—Inf. Ep. 20. V. 21.

V. 49. Diffimile.

Quasi seipsum damnans, ut sup. V. 22. Etiam hoc modo purgans se Mæcenati et Augusto, quod olim pro Republicâ stetit, a Bruto honoratus, olim enim ambitiosus (inquit) fui. Nunc non ita. Non ergo jure mihi invideat.

V. 114. Assisto divinis.

Non jam ergo amplius, uti olim *Parcus Deorum cultor*, &c. Od. 34. Lib. 1. Quanquam aliter accipiunt

reputation as a polite writer, and was regarded by many as a standard of elegant composition. His imitators, as well as admirers, were numerous, and he was esteemed the Head of

cupiunt Vet. Com. et Torrentius, fortè non immeritò. Mæcenati enim scribit, et nondum senex Horatius.

V. 123. Tacitum juvet.

Sup. Sat. 4. in fine. *Hæc ego mecum compressis agito labris.* Hic ergo philosophica ista intelligit, quæ ad sui emendationem pertinent, non poetica et vulganda. Id enim est *chartis illudere*, et aliis scribere; hoc verò *philosophari*, dum tacitus sibi legit et scribit. Sic inf. Ep. 2. Lib. 2. V. 143. *Sed veræ numerosque modosque ediscere vitæ.*—Seneca de Tranquil. Cap. 10. *In studiis puto meherculè melius esse res ipsas, &c.—minus molestiarum habet Funus tacitum, &c.*—Sequitur, Quæro meherculè tacitus, &c.

SAT. 7.

Pugna hæc jocosa inita est paulo ante cladem Philipensem (ut constat ex versu 18 et 19, infra). Scripta verò postea, si ipsi quidem Horatio fides adhibenda est Ep. 2. Lib. 2. V. 50. Ille enim, si Respublica stetit, omnino Poeta nunquam exstitisset, minùs adhuc scurriles hos ludos scripsisset. Nec credibile est Horatium serium, et res serias adeò atque arduas sub Amico et Patrono Bruto agentem, pro Patriâ periclitantem, Tribunum etiam Militum, talia scripsisse. *Decisus* vero *Pennis* Paupertati succumbens, postquam Poeta factus est, atque *audax* victum quærebat, facetiis jocisque ad Cæsarianos Victores se commendans, non mirum est, si occasionem hanc citò arripuit recentem adhuc injuriam ulciscendi sine magnâ Bruti Nominis reverentiâ. Quòd si Bruto et Cassio et præcipuis istis viris pepercit Horatius, non tamen eodem modo et aliis militantibus, et eidem causæ faventibus.

Perfusus hic Græcus, Dives; et Rupilius olim Prætor et in Triumviratu proscriptus, ut in Vet. Com. An ergo tunc temporis et in Castris Bruti odiosum erat *Proscripti* nomen? Id quasi odiosum tamen Horatius profert, et in initio Statim in Rupilium jactat. Mortuo ergo Bruto et in humili statu Horatii, sub tyrannide scripta est hæc Satyra. Vid. Annot. ad Sat. 3. V. 82. et ad Sat. 1. V. 14.

SAT. 9.

V. 44. Paucorum.

Garruli, non Horatii, verba. Turn. et Torr.

V. 45. Nemo.

De Mæcenate intelligendum. Cruq. et Torr.

V. 47. Hunc.

Me. *δεικτικῶς* Lamb.

V. 54. Velis.

Velis me tradere. Ut sup. V. 44. Garruli verba sunt. Commentatores Horatium quoque garrulum faciunt, dum hæc et quæ sup. V. 44, 45. illi tribuunt. Neque Horatio digna Ironia hæc, nec rei vel tempori conveniens. Laborat Horatius. Longè abest quòd colloquia jam ferat. Longissimè verò quòd Hominem hunc sponte accendat.

V. 55. Eoque Difficiles.

Optimè Turnebus. Sicut et in superioribus. *Qui se facile* (inquit) *vinci expugnarique sentiunt, se muniunt, &c.* Hæc omnia garrulus, difficultates preponderans, minuens. Vid. infra Horatius, V. 60. *Hæc dum agit.* Ille enim omnia: Horatius nihil, vel faltem negativè, et ad dissuadendum; ut Vers. 48. Vid. sup. V. 14.

V. 64. Lentissima.

Languida, labentia, quasi mortua, *Prensationi* minimè respondentia. Hinc potius *prensare*. Quia sic Candidati et Supplices.

LIB. 2. SAT. 1.

V. 7. Verum nequeo dormire.

Non sic infra, Sat. 3. V. 1. et Ep. 1. V. 10. et Ep. 2. Lib. 2. V. 20, 25, &c. ad 57. (Hæc ergo Satyra prius scripta) Neque idem ardor infra (Sat. 6. V. 17.)

V. 29. Melioris.

Genere, Censu, Ingenio, inf. V. 75. Vide et V. 70. Ubi Lucilium Optimum et Divinum planè virum fuisse constat. Ergo non solum Ingenio sed Vir-

tute *melioris utroque.* Et hoc potius intelligo, renuente Torrentio, aliisque.

V. 53. Imperet.

Apologeticè ad Trebatium Jur. Consultum. scilicet quòd coactus Satyram scribit.

V. 76. Magnis.

Brutum intelligit, non Augustum: quanquam priorem in posterioris gratiam non nominat. Vid. infr. Ep. 20. V. 23, et supra ad Sat. 3. V. 82.

SAT. 2.

Vetus Commentator, Ofellum quendam narrat quædam Sectæ Stoicæ e Græco transtulit. Alii ergo Stoicum, alii Epicureum, alii Medium, ego ne Philosophum quidem fuisse credo, neque ad examen Dogmatum descendisse: quippe qui *Rusticus Colonus Abnormis.* Horatius vero ipse loquens, sententiamque Ofelli explicans jam statim a versu 53, Philosophiam sequitur Epicuræ plane contrariam. Vid. V. 79. Ubi de Divinitate Animæ. Sic de Pietate, Societate, et Amore Patriæ, V. 103, 104, 105, et reversus iterum ad ipsa Ofelli verba (ad Philosophiam paululum detorta) de *Proprio* et rebus quæ sunt *in ipso*, ut Ep. 2. Lib. 2. V. 158, &c. Talia enim hæc sunt *Nam propriæ Telluris Herum, &c.* V. 129, et *Nulli Proprius, V. 134.* Sequitur Hortatio ista *Vivite Fortes, Fortiaque adversis, &c.* Fortiorem ergo severiorem et sanctiorem Philosophiam (Socraticam nempe) Horatius hic sequitur *iterato cursu* ut Od. 34. L. 1. Hæc ergo Satyra non inter priores, sed post Sat. 3^m et 5^m, aliasque Libri primi. Nihil autem ad rem quicquid Ofellus supra de Voluptate, V. 19. Sic enim indocti, imò ipsi Stoici ad indoctos et extra Scholam. Quàm fortiter autem Socraticum agit Horatius etiam Ofelli personam planè induens, uti Vers. 5, 6, 7, videre licet ex Max. Tyrio qui ex iisdem fontibus ista hausit (his equidem simillima) Diff. 1. *Ἰσται γὰρ περὶ καὶ φυτὰ, καὶ λίθοι, καὶ φῶται, καὶ θυμοὶ, καὶ ὄρμαι, καὶ σχήματα, καὶ χροαὶ, ὑπο τῆς ἐθερῆς συναγεγνημένα, καὶ τῇ καθ' ἡμέραν διαίτῃ ἀνακρινόμενα παρσκευακὲ τὴν ψυχὴν, καὶ ἀναπέπτικε μηδὲν ἄλλο ἡγεῖσθαι εἶναι ὅτι μὴ ταῦτα—ὡς περὶ ἐν Συμπόσιῳ μετ' αὐτοῦ πολλῆς, καὶ οὐκ ἡγεῖσθαι, καὶ αὐτὸν ἡγεῖ, &c.*—Scio equidem Ofellum hæc non dicere. Horatius verò huc spectat: et suo (i. e. Socratico) more, præcepta tradit. Interim notandum est simplicius multo et rudiùs Ofellum dicere, quando in fine iterum redit, V. 112. Atque hæc tertriâ vice Manifestior venit, Horatio Historicum agente et fidelitèr omnia narrante. In tres ergo partes præcipuas divisa est hæc Satyra, ubi ter narrat Horatius; in initio, scilicet et rursus, V. 53, et apertius denique, V. 112. Ergo V. 53, legendum est *Distabat*, ex omnibus ferè M. S. ut fatentur Commentatores: et hinc Marcelli (quem secutus est Dacierus) eo magis inepta videtur applicatio *Lupi et Canis*, V. 64. quia hæc a prioribus disjunguntur, et Horatius quæ de novo Ofelli Sententiam explicat.

Nemo est vel paululum versatus in Libris Socraticis (Xenophontis præcipuè) qui non statim ista agnoscat, unde *putas, &c.* V. 18. et in secundâ parte, V. 80. *Alter ubi dicto citius, &c.* Tota enim hæc Satyra Civilis, agilis, fortis, pia; non Epicurea vel Aristippica. Vid. Ep. 1. V. 16.—Mirum equidem non est quòd Horatius in Satyrâ sequenti (V. 11.) Platonem præcipuè comitem habuisse ait. Hos enim Nobilissimos Socraticos (Xenophontem scilicet et Platonem) imitari nunquam destitit, non ut Philosophus solum, sed ut Poeta. Sic in arte Poeticâ, V. 310. *Rem tibi Socraticâ, &c.*

V. 10. Indomito.

i. e. *Fero. Forti.* (Vet. Com.) Equitatum Romanum intelligit, unde *vel si Romana, &c. Græcari*, i. e. Græcanicis Exercitationibus (Pilâ, Disco) uti. Turn. et Lamb.

Græcari. Non hoc in pejori sensu Horatius: absurdum hoc et indignum. Verum Græcari quid sit, non comico sensu ex Plauto, sed ex Livio discit: Ille enim de Scipione, L. 29. "Ipsius etiam Imperatoris non *Romanus* modo sed ne *militaris* quidem cultus jactabatur. Cum Pallio Crepidisque inambulare in Gymnasio,

of the School of the sentimental Philosophy. Of late years, he has been as much depreciated as he was heretofore applauded; and in both cases the matter has been carried to an

naſio, Libellis etiam Palæſtræque operam dare; æquè ſegniter molliterque Cohortem totam Syracuſarum amœnitate frui!"

V. 11. Pila.

Molliſſimus Homo Mæcenæ aſſuetus etiam hoc modo Græcari et pilâ ludere. Sup. Sat. 5. V. 48, 49.

V. 18. Unde putas.

Unde? a Naturali appetitu, Naturam ergo ſequens non Gulæ ſerviens ſuaviter vives. Huic Unde contrarium eſt illud Unde infra, V. 31. nec rectè diſjunxit Cantabrigienſis Noſter, qui alias quidem optimè Periochas diſtinguit.

V. 53. Diſtabit.

Diſtabat, omnes ſerè M. S. ſic ſup. V. 2. præcepit. et inf. V. 112, &c. Ofellum novi narrantem, i. e. Narrabat hæc.

V. 55. Alio.

Hæc et ſequentia uſque ad V. 112. Horatius magis ex ſua quàm Ofelli perſonâ profert. Confer cum Sat. 2. Lib. 1. V. 24, &c.

V. 64. Hæc.

Inepta mihi videtur Dacieri a Marcilio deſumpta Applicatio Lupi et Canis ad Lupum Tiberinum (Sup. V. 31.) et Avidienum Canem (V. 56.)

V. 67. Albuti.

Non hic Avaritia Luxuriæ opponitur, ſed Elegantiæ Negligentia. Optimè ergo Torrent. et ſic ſupra Horatius (Sat. 2. Lib. 1.) poſt Figellium et Fuſidium oppoſitos ad Ruſillum et Gorgonium tranſit.

V. 73. Sederit.

Quam facile digreſſeris. Vet. Com. Non quæ placuerit. Hoc enim ad Voluptatem ſpectat, contra Ofelli ſenſum.

SAT. 3.

V. 9. Multa.

Sic Ep. 8. V. 3. Hic autem de Scriptis, illic de Moribus.

V. 10. Si vacuum.

Sic Epist. 7. Lib. 1. V. 10. Quod ſi Bruma, &c. Ubi tamen ſcripta non promittit, ſibi ſtudent et jam ſeneſcens: hæc quidem non Juvenis.

V. 11. Platona.

Signanter nominavit Platonem, ex hujus enim Alcibiade poſtérieure Materia et Seges Satyræ. Theod. M. V. 92. Vitium.

i. e. Malum Stoicè. Cruq. ſed in utroque ſenſu. quia inf. ſibi nequior. V. 94. Stoicis quidem Dogmatibus omnino in contrarium et perverſè utitur Stertinius, Staberi cauſam agens εἰρωνικῶς. Sic inf. V. 97. Clarus erit.

V. 104. Si quis emat citharas.

Ex Xenophontis Oecon. ut monet Lambin. Vide et Απομν. Lib. 1. in fine.

V. 132. Quid enim.

Nil mutandum cum Lambino. Hic enim το Quid enim? Idem valet quod πῶς ἢ; vel τί ἢ; uſitatiſſimum in Dialogis (Vid. Arrian.) ubi Philoſophus pro Diſcipulo ſive Adverſario reſpondet vel interrogat πῶς ἢ; quo modo et hic Stertinius pro Parricidâ ito.

V. 169. Antiquo Cenſu.

Dives antiquo cenſu, i. e. Mediocri non hodierno; quia Privatus illis Cenſus erat brevis, (Qd. 15. L. 2.) Hodiè vero Si quadringentis ſex ſeptem millia deſint, Plebs eris (Ep. 1.) inde ſtatim infra, V. 178. Quod ſatis eſt, &c. et Natura coerces. Sic Antiquis Moribus, Antiquâ Fide, &c.

V. 192. Conſulere.

Socratico more. Viciffim.

V. 223. Circumtonuit.

Vide Lamb. et quid Torr. de Bellonæ fanaticis, et ſic Stoico quidem ſenſu Ambitioſi, et Glorioſi, Fanatici: haud abſimile quod, ſup. Sat. 6. Lib. 1. V. 23. ſed fulgente, &c.

V. 287. Meneni.

In Gente Meneniâ (celebri quidem) Conſulem fuiſſe quendam non ſatis ſanæ mentis ait Lambinus, ex Dion. Halicar. L. 9. Cruquius tamen inveniffe ſe ait in quibuſd. M. S. Menæci. Sed ridiculè prorfus explicat. Nunquam enim Stoicus vel Pius aut Bonus

quiſquam inter Antiquos Menæci factum damnaret. Longè aliter Epictetus apud Arrian. L. 3. C. 20.

V. 308. Ædificas.

Confer hæc cum iis quæ infra in fine, Sat. 7, et Epist. 1. et cum Epist. 8. et Ep. 15. in fine.

V. 310. Corpore.

Vide Ep. 20. V. 24. et Epist. Auguſti in Vitâ Horatii. Sed per brevitateſtaturæ, tenuitateſtaturæ et anguſtias Rei familiaris præcipuè ſignificat (ut ait Lamb.) ad illam tamen alteram Brevitateſtaturæ alludens.

V. 323. Cultum.

Non ſimpliciter de Veſtitu ſed de omni Vitâ intelligendum; quo ſenſu ſup. Sat. 2. V. 66. Cultum enim appellant interdum Latini Vitæ colendæ Rationem. Lamb. in iſtum locum, ubi exempla poſuit, et inter alia hunc Horatii Verſum. (Horatius autem quamquam lautius vixerit, Genioque in Juventute præcipuè indulſerit, in Veſtitu tamen non adeo curioſus. Vid. Epist. 1. V. 96. et Sat. 3. L. 1. V. 31.

SAT. 4.

V. 2. Signa.

Vide Heinſium et Arriani præſationem, et locum Platonis in Thæteto a Daciero citatum. Talia ſunt Philoſophorum ὑποσημασία (Xenophontis ἀποσημασμέναι) ἀποσημασμέναι.

V. 94. Fontes.

Hæc cum dicit Horatius ironice contra Epicureos, ſeriò innuit fontes ſe adire velle Socraticos, quos ſuis Catius oppoſuit, V. 3. Hanc ergo Satyram inter poſteriores pono.

SAT. 5.

Hanc Satyram inter iſtas pono quarum cauſâ Horatius dictus erat nimis acer. Sat. 1. L. 2. Vide inf. V. 20. Scriptam ergo Satyram hanc credo ante, Sat. 1. L. 2. et Sat. 4. L. 1. — Satyra hæc Νεκρίας Homericæ quaſi quoddam ἀποσημασμένον eſt. Ubi enim deſinit Homericus Ulyſſes conſulere Tireſiam, ibi incipit Horatianus. Heinſius.

V. 20. Hoc.

Ingenioſè ſed minùs rectè Dacierus in hunc locum, illud hoc ad Paupertatem referens, non ad Contumeliā illam: quippe indignum (ait) Ulyſſis ut ita ſentiret. Horatius vero antiquiorem potiùs quàm novam et Sanctiorem Comœdiam ſecutus, non modò hic ſed ubique in hæc Satyrâ abutitur Perſonis Ulyſſis, Penelopes, et Tireſiæ, et eſt in hæc Satyrâ in alios acerrimus et contumelioſus, Vid. Sup. Verſ. 1.

V. 22. Dic.

De Teſtamenti enim nondum dixit, et Ulyſſes hic quaſi tardus inducitur, ignarus ſcil. morum iſtorum. et hoc etiam ad Comœdiam illam licentioſiorem facit, et ad Contemptum Ulyſſis.

SAT. 6.

V. 7.

Facturus in futuro, quaſi olim tale aliquid feciſſet. Vid. inf. Sat. ſeq. V. 110. In hanc partem peccare paululum Horatius fortè potuit, in illam non potuit, quia minimè avarus.

V. 9. Denormat.

Normam noſtrates Quadram vocant. Sic Anglicè to break ſquares, et inf. Ep. 6. V. 35.

V. 17. Quid prius.

Scribit adhuc libenter et gaudens Horatius; ardor tamen minor eſt. Vid. ſup. Sat. 1. V. 7.

V. 38. Signa.

Sigillum Auguſti intelligit, cujus cuſtos Mæcenæ teſte Dione et Xiphilino.

V. 40. Septimus.

Hoc tempore ergo Horatius circiter 34 annos natus.

V. 42. Duntaxat ad hoc.

Nec mentitur Horatius (ut vult Dacierus) nec Mæcenatem notat vel ludit (ut Vet. Com.) ſed de initio Amicitie loquitur. Quam lentus in hæc re Mæcenæ. Vide ſup. Sat. 6. L. 1. V. 60.

V. 65.

an extreme. At length, it is to be hoped, that he will find his due place in the ranks of literature; and that, without being extravagantly extolled, he will continue to be read, and in

V. 65. Meique.

i. e. Amici, Familiares, (ut Vet. Com.) non servi vernæque procaces, qui libatis dapibus, Herilis mensæ reliquiis pascebantur, ut ait Lamb. et Torrent. Hic tamen sibi non constat, cum illud Meique de servis intelligere videtur. Horatium quidem convivas servos ipsos eisdemque procaces dixisse vix credibile est: nec magis verisimile in tali Cœtu de Philosophiâ locutum fuisse; adeo ut quæri etiam posset ane graviora sint hæc quam res convivalis ferat: ut ait Torren- tius (ad Verf. 75, infra) immemor conviviorum So- craticorum et Socratici Horatii.

V. 75. Rectumne.

Planè huic inferiori opinioni favet. et sic inf. Ep. 16. V. 52, &c.—At non ita olim. Vide sup. Sat. 3. L. 1. V. 113.

V. 78. Ex re fabellas.

i. e. Ex usu, utiles, Lambinus. Sed melior Cru- quii Explicatio, viz. *Ex re natus*: hoc est *ex argumento quod controversitur a convivis*. . . . ut si quis Sto- icus Divitias neget censendas inter Bona, contra Peripa- teticus . . . hic confestim Cervius Apologum, &c.

V. 91. Prærupti.

Optimè Cruquius. *Quam quæso procul abludit hæc Descriptio ab Horatianâ Villâ in superno Tusculo? ita ut hæc verba Muris Urbani delicati sunt quasi Mæcena- tis Horatium pellicientis ad Vitam Urbanam, vel potiùs Aulicam.*

SAT. 7.

V. 9. Priscus.

Vid. Ep. 15. V. 26. et sup. Sat. 3. L. 1. in initio. Priscus enim hic a Davo pro Horatio ponitur. inde Horatius mox Verf. 21. *Quorsum? Davus, Ad Te* —atque inde, V. 53. *Tu cum projectis*, &c. i. e. *Tu Priscæ.*

V. 19. Levius.

Levius quam Priscus ille, i. e. quam Tu, O Horati!

V. 22. Ad Te.

Ad Te scil. quia ut mutabilis et levis ille Priscus, laudas, &c.

V. 37. Ille.

i. e. *Dixerit aliquis ò diva* (Lamb.) modestè vel potiùs timidè pro Seipso. quia supra, V. 2. *Reformidat.* et sic infr. etiam magis, V. 44 et 116. neque enim Personam suam planè hic agnoscit Davus, neque Heri, cum dicit Tu cum sis quod, ego, &c. V. 40.—et *Tu cum projectis*, V. 53. Mox verò audacior factus, re- spondente Horatio (vel pro Horatio Davo ipso) V. 72. palam et sine ambagibus expostulat.

V. 38. Nasum.

Ut inf. V. 102. De seipso enim loquitur Davus. Sic inf. V. 100. *Cessator Davus*, uti hic *inert.*

V. 53. Tu cum projectis.

Vid. sup. ad Verf. 9 et 37. Dacierus interim planè asserit Augustum Horatio et Annuli Equestris et Augusti Clavi jus dedisse. quâ auctoritate fretus nescio. Quod si hoc verum est, non necesse est ad Priscum recurrere (Ut sup. V. 9.) neque tantam ti- miditatem Davo tribuere (Ut sup. V. 37.) qui semel tantum personam mutat, quando dixit *dixerit ille* pro seipso. Postea magis audacter; jam statim ad V. 40. *Tu cum*, &c. ut antea, V. 22. *Ad Te inquam.* Sed cum rursus infra, V. 60. *Quo te demisit* non tam commodè de ipso Horatio explicavi potest (quia potiùs quid factum, quam quid futurum narrat Davus) ideo et rursus fortasse de Prisco illo, Horatii Personam ex- hibente, intelligendum est. Facilis et Naturalis sem- per est Poeta Noster Horatius, et in Compositione atque Ordine minimè obscurus. Vel ergo notissima fuit olim ista Fabula de Prisco; vel simile aliquid sibi evenisse aut evenire potuisse indicat Horatius jam so- brius et securus, non ut olim *Calidus Juventâ Consule Planco*, Od. 14. L. 3. Mox ergo respondet *Non sum Mæchus* (V. 72.) *Non sum*, in præsentia. Ad ista, quæ olim facta sunt, nihil respondet.

V. 72. Non sum.

Quasi dixisset *jam non amasius sum vel futurus sum mæchus*, quia supra Davus *Evâsti? Credo metues*, &c.

εὐαντικώς.

VOL. IV.

V. 75. Rerum.

Stoicè. Sic Arr. L. 3. C. 20. Πάντασθ' ἰαυτῆς δαλῆς ποιήσεις, πρῶτον τῶν πραγμάτων, εἴτε δι' αὐτὰ καὶ τῶν ἀνθρώπων τὰ ταῦτα περιποιεῖν ἢ ἀφαιρεῖσθαι δυναμένων. Et Lib. 3. C. 24. Τοῦ γὰρ ὑπ' ἀνθρώπῳ μελλόντα ἵπτασθαι, πολὺ προτερον ὑπὸ τῶν πραγμάτων δεῖ ἵπτασθαι. Et C. 26: Τα γὰρ πρᾶγματα προτερὸς τετῶν κυρίως ἔχοντες. Hic ergo per *Res* intelligendum est τὰ πρᾶγματα (Scil. Divitiæ, Honores, aliæque exteriora interioribus opposita) infra vero, Ep. 1. V. 19. Τα γινόμενα a Providentiâ scil. vel Fortunâ. Hic reluctandum; illic cedendum; ut Libertas nobis contingat.

V. 86. Totus teres.

Virtus enim ex Stoico Dogmate ita secum Virtu- tem trahit ut concatenati Annuli. Cruq.

V. 87. Læve morari.

Perf. Sat. 1. V. 64. *Ut per læve severos effundat junctura ungues.* Sic sup. Sat. 5. L. 2. V. 32. Nec tamen contemnendus Dacierus, qui altiore sensum petit ex Platone, quem cum cæteris Socraticis Hora- tius sæpe in animo habet.

V. 101. Veterum.

De hoc Morbo vide Ciceronem in Paradox. Stoicis. C. 5. ubi Lucullum planè innuit, callidum nimis et barbaro isti L. Mummio nimis contrarium. Vide Plutarchum in Vitâ: ubi et de Mummio et Cethego. Cicero autem, uti Docti et Viri bonè omnes, Lucullum amavit, qui etiam si his Vitiis detentus, reipublicæ, Phi- losophiæ, et huic præcipuè Socraticæ sive Stoicæ favebat.

V. 118. Opera.

Sic Custodia pro iis ipsis accipitur qui aliquid custodiunt.

SAT. 8.

V. 3. Sic.

Respondet Fundanius (Ut inf. V. 19.) *Mare Co- mico, Sic ut nunquam melius*, i. e. *jucundius* (propter Risus et res ridiculas) non *lautius*.

EPIST. LIB. 1.

Ep. 1. Confer cum Epist. 7. 10. et Lib. 2. Ep. 2.

V. 10. Ludicra.

Inf. Ep. 14. V. 36.—Ep. 2. L. 2. V. 143. Carmina scil. amatoria, Satyrasque jocofas (quales sunt Sat. 5. 7. 9. L. 1.—et 8. L. 2.) et mordentes de quibus. Vid. Sat. 1. L. 2. V. 21 et 46, &c.

V. 11. Decens.

Τὸ καλὸν καὶ πρεπόν. Secundum Stoicòs. Jam enim ad Socraticam veram et divinam Sapientiam ab infan- nienti illâ (Sup. Od. 34. L. 1.) revertitur Horatius.

V. 16. Agilis—Civilibus.

Πρακτικὸς καὶ πολιτικὸς cum Socraticis, Stoicis, &c.— Contra Epicureorum præceptum.

V. 17. Veræ custos rigidusque.

Sic inf. *Vera Vita*. Ep. 2. L. 2. V. 144. Vide et Ep. 18. V. 8.—Custos, i. e. nihil præter Virtutem in bonis ducere. Vide Cic. de fin. Bon. et Mal. et quid ibi Cato in initio Libri. Vid. inf. Ep. 6. V. 30.

V. 18. Nunc.

Quasi dixisset *pudet fateri*. Sed revera alius pudor Horatium urget, dum Mæcenati scribit, et Amico molli conversionem suam ad severiorem Philosophiam indicat, et quia olim Aristippum tantoperè laudavit. Vid. Ep. 17.

Relabor—quia olim Epicureis et Cyrenaicis re- nunciavit. Vide Od. 34. L. 1.

V. 19. Subjungere.

Vera lectio. Vide Ciceronem in Acad. Quæst. Lib. 2. 45. prope finem. “Veruntamen (inquit) video quam suaviter Voluptas sensibus nostris blandi- atur. Labor ut assentiar Epicuro aut Aristippo. re- vocat Virtus vel potius reprehendit manu; pecudum illos motus esse dicit: *Hominem jungit Deo*, &c.”

Horatius noster melius. Labor (inquit) ut assentiar Socrati, Zenoni, &c. revocat Voluptas. in Aristippi et Epicuri præcepta relabor, *Virtutem veram* defero. Fortunæ non responso (Ut inf. V. 68.) sed subservio, Deo me nec jungo nec subjungo. *Majore tento* (Ep. 17.

* 4 F

V. 24.)

of the School of the sentimental Philosophy. Of late years, he has been as much depreciated as he was heretofore applauded; and in both cases the matter has been carried to an

natio, Libellis etiam Palæstræque operam dare; æquè segnitèr mollitèrque Cohortem totam Syracusarum amœnitate frui!"

V. 11. Pila.

Mollissimus Homo Mæcenæ assuetus etiam hoc modo Græcari et pilâ ludere. Sup. Sat. 5. V. 48, 49.

V. 18. Unde putas.

Unde? a Naturali appetitu, Naturam ergo sequens non Gulæ serviens suavitèr vives. Huic Unde contrarium est illud Unde infra, V. 31. nec rectè disjunxit Cantabrigiensis Noster, qui alias quidem optimè Periochas distinguit.

V. 53. Distabit.

Distabat, omnes ferè M. S. sic sup. V. 2. præcepit. et inf. V. 112, &c. Ofellum novi narrantem, i. e. Narrabat hæc.

V. 55. Alio.

Hæc et sequentia usque ad V. 112. Horatius magis ex suâ quàm Ofelli personâ profert. Confer cum Sat. 2. Lib. 1. V. 24, &c.

V. 64. Hæc.

Inepta mihi videtur Dacieri a Marcilio desumpta Applicatio Lupi et Canis ad Lupum Tiberinum (Sup. V. 31.) et Avidienum Canem (V. 56.)

V. 67. Albuti.

Non hic Avaritia Luxuriæ opponitur, sed Elegantiæ Negligentia. Optimè ergo Torrent. et sic supra Horatius (Sat. 2. Lib. 1.) post Tigellium et Fufidium oppositos ad Rufillum et Gorgonium transit.

V. 73. Sederit.

Quam facile digresseris. Vet. Com. Non quæ placuerit. Hoc enim ad Voluptatem spectat, contra Ofelli sensum.

SAT. 3.

V. 9. Multa.

Sic Ep. 8. V. 3. Hic autem de Scriptis, illic de Moribus.

V. 10. Si vacuum.

Sic Epist. 7. Lib. 1. V. 10. Quod si Bruma, &c. Ubi tamen scripta non promittit, sibi studens et jam senescens: hæc quidem non Juvenis.

V. 11. Platona.

Signantèr nominavit Platonem, ex hujus enim Alcibiade posteriore Materia et Seges Satyræ. Theod. M.

V. 92. Vitium.

i. e. Malum Stoicè. Cruq. sed in utroque sensu. quia inf. sibi nequior. V. 94. Stoicis quidem Dogmatibus omnino in contrarium et perversè utitur Stertinius, Staberî causam agens εἰρωνείας. Sic inf. V. 97. Clarus erit.

V. 104. Si quis emat citharas.

Ex Xenophontis Oecon. ut monet Lambin. Vide et Απομν. Lib. 1. in fine.

V. 132. Quid enim.

Nil mutandum cum Lambino. Hic enim το Quid enim? Idem valet quod πως εἴ; vel τί εἴ; usitatissimum in Dialogis (Vid. Arrian.) ubi Philosophus pro Discipulo five Adversario respondet vel interrogat μὴ πως: quo modo et hic Stertinius pro Parricidâ illo.

V. 169. Antiquo Censu.

Dives antiquo censu, i. e. Mediocri non hodierno; quia Privatus illis Censu erat brevis, (Od. 15. L. 2.) Hodie vero Si quadringentis sex septem millia desint, Plebs eris (Ep. 1.) inde statim infra, V. 178. Quod satis est, &c. et Natura coerces. Sic Antiquis Moribus, Antiquâ Fide, &c.

V. 192. Consulere.

Socratico more. Vicissim.

V. 223. Circumtonuit.

Vide Lamb. et quid Torr. de Bellonæ fanaticis, et sic Stoico quidem sensu Ambitiosi, et Gloriosi, Fanatici: haud absimile quod, sup. Sat. 6. Lib. 1. V. 23. sed fulgentè, &c.

V. 287. Meneni.

In Gente Meneniâ (celebri quidem) Consulem fuisse quendam non satis sanæ mentis ait Lambinus, ex Dion. Halicar. L. 9. Cruquius tamen invenisse se ait in quibusd. M. S. Menæci. Sed ridiculè prorsus explicat. Nunquam enim Stoicus vel Pius aut Bonus

quisquam inter Antiquos Menæci factum damnares. Longè aliter Epictetus apud Arrian. L. 3. C. 20.

V. 308. Ædificas.

Confer hæc cum iis quæ infra in fine, Sat. 7, et Epist. 1. et cum Epist. 8. et Ep. 15. in fine.

V. 310. Corpore.

Vide Ep. 20. V. 24. et Epist. Augusti in Vitâ Horatii. Sed per brevitem Staturæ, tenuitatem et angustias Rei familiaris præcipuè significat (ut ait Lamb.) ad illam tamen alteram Brevitatem alludens.

V. 323. Cultum.

Non simpliciter de Vestitu sed de omni Vitâ intelligendum; quo sensu sup. Sat. 2. V. 66. Cultum enim appellant interdum Latini Vitæ colendæ Rationem. Lamb. in istum locum, ubi exempla posuit, et inter alia hunc Horatii Versum. (Horatius autem quamquam lautius vixerit, Genioque in Juventute præcipuè indulserit, in Vestitu tamen non adeò curiosus. Vid. Epist. 1. V. 96. et Sat. 3. L. 1. V. 31.

SAT. 4.

V. 2. Signa.

Vide Heinsum et Arriani præfationem, et locum Platonis in Thæteto a Daciero citatum. Talia sunt Philosophorum ὑπομνηματα (Xenophontis ἀπομνημονεύματα) Απομνημονεύσεις.

V. 94. Fontes.

Hæc cum dicit Horatius ironicè contra Epicureos, ferè innuit fontes se adire velle Socraticos, quos suis Catius opposuit, V. 3. Hanc ergo Satyram inter posteriores pono.

SAT. 5.

Hanc Satyram inter istas pono quarum causâ Horatius dictus erat nimis acer. Sat. 1. L. 2. Vide inf. V. 20. Scriptam ergo Satyram hanc credo ante, Sat. 1. L. 2. et Sat. 4. L. 1. — Satyra hæc Νεκρῖας Homericæ quasi quoddam ἀποσπασματιον est. Ubi enim definit Homericus Ulysses consulere Tiresiam, ibi incipit Horatianus. Heinsum.

V. 20. Hoc.

Ingeniosè sed minùs rectè Dacierus in hunc locum, illud hoc ad Paupertatem referens, non ad Contumeliam illam: quippe indignum (ait) Ulyssis ut ita sentiret. Horatius vero antiquiorem potius quàm novam et Sanctiorem Comœdiam secutus, non modò hic sed ubique in hæc Satyrâ abutitur Personis Ulyssis, Penelopes, et Tiresiæ, et est in hæc Satyrâ in alios acerrimus et contumeliosus, Vid. Sup. Vers. 1.

V. 22. Dic.

De Testamentis enim nondum dixit, et Ulysses hic quasi tardus inducitur, ignarus scil. morum istorum. et hoc etiam ad Comœdiam illam licentiosem facit, et ad Contemptum Ulyssis.

SAT. 6.

V. 7.

Facturus in futuro, quasi olim tale aliquid fecisset. Vid. inf. Sat. seq. V. 110. In hanc partem peccare paululum Horatius fortè potuit, in illam non potuit, quia minimè avarus.

V. 9. Denormat.

Normam nostrates Quadram vocant. Sic Anglicè to break squares, et inf. Ep. 6. V. 35.

V. 17. Quid prius.

Scribit adhuc libenter et gaudens Horatius; ardor tamen minor est. Vid. sup. Sat. 1. V. 7.

V. 38. Signa.

Sigillum Augusti intelligit, cujus custos Mæcenæ teste Dione et Xiphilino.

V. 40. Septimus.

Hoc tempore ergo Horatius circiter 34 annos natus.

V. 42. Duntaxat ad hoc.

Nec mentitur Horatius (ut vult Dacierus) nec Mæcenatem notat vel ludit (ut Vet. Com.) sed de initio Amicitiae loquitur. Quàm lentus in hæc re Mæcenæ. Vide sup. Sat. 6. L. 1. V. 60.

V. 65.

an extreme. At length, it is to be hoped, that he will find his due place in the ranks of literature; and that, without being extravagantly extolled, he will continue to be read, and in

V. 65. Meique.

i. e. Amici, Familiares, (ut Vet. Com.) non servi *verneque procaces*, qui *libatis dapibus*, Herilis mensæ reliquis pascebantur, ut ait Lamb. et Torrent. Hic tamen sibi non constat, cum illud *Meique* de servis intelligere videtur. Horatium quidem *convivas* servos ipsos eisdemque procaces dixisse vix credibile est: nec magis verisimile in tali Cœtu de Philosophiâ locutum fuisse; adeo ut quæri etiam posset ane graviora sint hæc quàm res convivalis ferat: ut ait Torren- tius (ad Vers. 75, infra) immemor conviviorum So- craticorum et Socratici Horatii.

V. 75. Rectumne.

Planè huic inferiori opinioni favet. et sic inf. Ep. 16. V. 52, &c.—At non ita olim. Vide sup. Sat. 3. L. 1. V. 113.

V. 78. Ex re fabellas.

i. e. Ex usu, utiles, Lambinus. Sed melior Cru- quii Explicatio, viz. *Ex re natus*: hoc est *ex argumento quod controversatur a convivis . . . ut si quis Sto- icus Divitias neget censendas inter Bona, contra Peripa- teticus . . . hic confestim Cervius Apologum, &c.*

V. 91. Prærupti.

Optimè Cruquius. *Quam quæso procul abludit hæc Descriptio ab Horatianâ Villâ in superno Tusculo? ita ut hæc verba Muris Urbani delicati sunt quasi Mæcena- tis Horatium pellicientis ad Vitam Urbanam, vel potius Aulicam.*

SAT. 7.

V. 9. Priscus.

Vid. Ep. 15. V. 26. et sup. Sat. 3. L. 1. in initio. Priscus enim hic a Davo pro Horatio ponitur. inde Horatius mox Vers. 21. *Quorsum? Davus, Ad Te* —atque inde, V. 53. *Tu cum projectis, &c. i. e. Tu Priscæ.*

V. 19. Levius.

Levius quàm Priscus ille, i. e. quàm Tu, O Horati!

V. 22. Ad Te.

Ad Te scil. quia ut mutabilis et levis ille Priscus, laudas, &c.

V. 37. Ille.

i. e. *Dixerit aliquis à diva* (Lamb.) modestè vel po- tiùs timidè pro seipso. quia supra, V. 2. *Reformidat.* et sic infr. etiam magis, V. 44 et 116. neque enim Personam suam planè hic agnoscit Davus, neque Heri, cum dicit *Tu cum sis quod, ego, &c. V. 40* —et *Tu cum projectis*, V. 53. Mox verò audacior factus, re- spondente Horatio (vel pro Horatio Davo ipso) V. 72. palam et sine ambagibus expostulat.

V. 38. Nasum.

Ut inf. V. 102. De seipso enim loquitur Davus. Sic inf. V. 100. *Cessator Davus*, uti hic *inert*.

V. 53. Tu cum projectis.

Vid. sup. ad Vers. 9 et 37. Dacierus interim planè asserit Augustum Horatio et Annuli Equestris et Augusti Clavi jus dedisse. quâ auctoritate fretus nescio. Quòd si hoc verum est, non necesse est ad Priscum recurrere (Ut sup. V. 9.) neque tantam ti- miditatem Davo tribuere (Ut sup. V. 37.) qui semel tantum personam mutat, quando dixit *dixerit ille* pro seipso. Postea magis audacter; jam statim ad V. 40. *Tu cum, &c.* ut antea, V. 22. *Ad Te inquam.* Sed cum rursus infra, V. 60. *Quo te demisit* non tam commodè de ipso Horatio explicavi potest (quia potius quid factum, quam quid futurum narrat Davus) ideo et rursus fortasse de Prisco illo, Horatii Personam ex- hibente, intelligendum est. Facilis et Naturalis sem- per est Poeta Noster Horatius, et in Compositione atque Ordine minimè obscurus. Vel ergo notissima fuit olim ista Fabula de Prisco; vel simile aliquid sibi evenisse aut evenire potuisse indicat Horatius jam so- brius et securus, non ut olim *Calidus Juventâ Consule Planco*, Od. 14. L. 3. Mox ergo respondet *Non sum Mæchus* (V. 72.) *Non sum*, in præsentia. Ad ista, quæ olim facta sunt, nihil respondet.

V. 72. Non sum.

Quasi dixisset *jam non amasius sum vel futurus sum mæchus*. quia supra Davus *Evâsti? Credo metues, &c.*

εὐαστῶς.

VOL. IV.

V. 75. Rerum.

Stoicè. Sic Arr. L. 3. C. 20. *Πάντας ἰαυτὸς δόλης ποιήσεις, πρῶτον τῶν πραγμάτων, εἴτε δι' αὐτὰ καὶ τῶν ἀνθρώπων τὰν τὰντα περιποιῇς ἢ ἀφαιρῇς δυνάμεων.* Et Lib. 3. C. 24. *Τὸ γὰρ ὑπ' ἀνθρώπου μέλλοντα ἡττάσθαι, πολὺ προτερον ὑπο τῶν πραγμάτων δεῖ ἡττάσθαι.* Et C. 26: *Τὰ γὰρ πρᾶγματα προτερὸς τῶν κυρίων ἔχουσιν.* Hic ergo per *Res* intelligendum est *τὰ πρᾶγματα* (Scil. Divitiæ, Honores, aliæque exteriora interioribus opposita) infra vero, Ep. 1. V. 19. *Τὰ γινόμενα a Providentiâ scil. vel Fortunâ.* Hic reluctandum; illic cedendum; ut Libertas nobis contingat.

V. 86. Totus teres.

Virtus enim ex Stoico Dogmate ita secum Virtu- tem trahit ut concatenati Annuli. Cruq.

V. 87. Læve morari.

Perf. Sat. 1. V. 64. *Ut per læve sevēros effundat junctura ungues.* Sic sup. Sat. 5. L. 2. V. 32. Nec tamen contemnendus Dacierus, qui altiorē sententi- am petit ex Platone, quem cum cæteris Socraticis Hora- tius sæpe in animo habet.

V. 101. Veterum.

De hoc Morbo vide Ciceronem in Paradox. Stoicis. C. 5. ubi Lucullum planè innuit, callidum nimis et barbaro isti L. Mummio nimis contrarium. Vide Plutarchum in Vitâ: ubi et de Mummio et Cethego. Cicero autem, uti Docti et Viri bonè omnes, Lucullum amavit, qui etiam si his Vitiis detentus, reipublicæ, Phi- losophiæ, et huic præcipuè Socraticæ sive Stoicæ favebat.

V. 118. Opera.

Sic Custodia pro iis ipsis accipitur qui aliquid custodiunt.

SAT. 8.

V. 3. Sic.

Respondet Fundanius (Ut inf. V. 19.) More Co- mico, *Sic ut nunquam melius, i. e. jucundius* (propter Risus et res ridiculas) non *lautius*.

EPIST. LIB. I.

Ep. 1. Confer cum Epist. 7. 10. et Lib. 2. Ep. 2.

V. 10. Ludicra.

Inf. Ep. 14. V. 36.—Ep. 2. L. 2. V. 143. Carmina scil. amatoria, Satyrasque jocosas (quales sunt Sat. 5. 7. 9. L. 1.—et 8. L. 2.) et mordentes de quibus. Vid. Sat. 1. L. 2. V. 21 et 46, &c.

V. 11. Decens.

Τὸ καλὸν καὶ περιεργόν. Secundum Stoicòs. Jam enim ad Socraticam veram et divinam Sapientiam ab infa- nienti illâ (Sup. Od. 34. L. 1.) revertitur Horatius.

V. 16. Agilis—Civilibus.

Πρακτικὸς καὶ πολιτικὸς cum Socraticis, Stoicis, &c.— Contra Epicureorum præceptum.

V. 17. Veræ custos rigidusque.

Sic inf. *Veræ Vitæ*. Ep. 2. L. 2. V. 144. Vide et Ep. 18. V. 8.—Custos, i. e. nihil præter Virtutem in bonis ducere. Vide Cic. de fin. Bon. et Mal. et quid ibi Cato in initio Libri. Vid. inf. Ep. 6. V. 30.

V. 18. Nunc.

Quasi dixisset *pudet fateri*. Sed revera alius pudor Horatium urget, dum Mæcenati scribit, et Amico molli conversionem suam ad severiorem Philosophiam indicat, et quia olim Aristippum tantoperè laudavit. Vid. Ep. 17.

Relabor—quia olim Epicureis et Cyrenaicis re- nunciavit. Vide Od. 34. L. 1.

V. 19. Subjungere.

Vera lectio. Vide Ciceronem in Acad. Quæst. Lib. 2. 45. prope finem. “Veruntamen (inquit) video quàm suaviter Voluptas sensibus nostris blandi- atur. Labor ut assentiar Epicuro aut Aristippo. re- vocat Virtus vel potius reprehendit manu; pecudum illos motus esse dicit: Hominem jungit Deo, &c.”

Horatius noster melius. Labor (inquit) ut assentiar Socrati, Zenoni, &c. revocat Voluptas. in Aristippi et Epicuri præcepta relabor, Virtutem veram defero. Fortunæ non responso (Ut inf. V. 68.) sed subservio, Deo me nec jungo nec subjungo. *Majora tento* (Ep. 17. V. 24.)

of the School of the sentimental Philosophy. Of late years, he has been as much depreciated as he was heretofore applauded; and in both cases the matter has been carried to an

nasio, Libellis etiam Palæstræque operam dare; æquè segnitèr molliterque Cohortem totam Syracusarum amœnitate frui!"

V. 11. Pila.

Mollissimus Homo Mæcenas assuetus etiam hoc modo Græcari et pilâ ludere. Sup. Sat. 5. V. 48, 49.

V. 18. Unde putas.

Unde? a Naturali appetitu, Naturam ergo sequens non Gulæ serviens suavitèr vives. Huic Unde contrarium est illud Unde infra, V. 31. nec rectè disjunct Cantabrigiensis Noster, qui alias quidem optimè Periochas distinguit.

V. 53. Distabit.

Distabat, omnes ferè M. S. sic sup. V. 2. præcepit. et inf. V. 112, &c. Ofellum novi narrantem, i. e. Narrabat hæc.

V. 55. Alio.

Hæc et sequentia usque ad V. 112. Horatius magis ex suâ quàm Ofelli personâ profert. Confer cum Sat. 2. Lib. 1. V. 24, &c.

V. 64. Hæc.

Inepta mihi videtur Dacieri a Marcilio desumpta Applicatio Lupi et Canis ad Lupum Tiberinum (Sup. V. 31.) et Avidienum Canem (V. 56.)

V. 67. Albuti.

Non hic Avaritia Luxuriæ opponitur, sed Elegantiæ Negligentia. Optimè ergo Torrent. et sic supra Horatius (Sat. 2. Lib. 1.) post Tigellium et Fufidium oppositos ad Rufillum et Gorgonium transit.

V. 73. Sederit.

Quam facile digresseris. Vet. Com. Non quæ placuerit. Hoc enim ad Voluptatem spectat, contra Ofelli sensum.

SAT. 3.

V. 9. Multa.

Sic Ep. 8. V. 3. Hic autem de Scriptis, illic de Moribus.

V. 10. Si vacuum.

Sic Epist. 7. Lib. 1. V. 10. Quod si Bruma, &c. Ubi tamen scripta non promittit, sibi studens et jam senescens: hæc quidem non Juvenis.

V. 11. Platona.

Signantèr nominavit Platonem, ex hujus enim Alcibiade posteriore Materia et Seges Satyræ. Theod. M.

V. 92. Vitium.

i. e. Malum Stoicè. Cruq. sed in utroque sensu. quia inf. sibi nequior. V. 94. Stoicis quidem Dogmatibus omnino in contrarium et perversè utitur Stertinius, Staberî causam agens *επαγωγὴς*. Sic inf. V. 97. Clarus erit.

V. 104. Si quis emat citharas.

Ex Xenophontis Oecon. ut monet Lambin. Vide et *Απομν.* Lib. 1. in fine.

V. 132. Quid enim.

Nil mutandum cum Lambino. Hic enim το *Quid enim?* Idem valet quod *πως εν;* vel *τι εν;* usitatissimum in Dialogis (Vid. Arrian.) ubi Philosophus pro Discipulo sive Adversario respondet vel interrogat *μικρὸς*: quo modo et hic Stertinius pro Parricidâ isto.

V. 169. Antiquo Censu.

Dives antiquo censu, i. e. Mediocri non hodierno; quia Privatus illis Censu erat brevis, (Od. 15. L. 2.) Hodie vero Si quadringentis sex septem millia desint, Plebs eris (Ep. 1.) inde statim infra, V. 178. Quod satis est, &c. et Natura coercet. Sic Antiquis Moribus, Antiquâ Fide, &c.

V. 192. Consulere.

Socratico more. Vicissim.

V. 223. Circumtônuit.

Vide Lamb. et quid Torr. de Bellonæ fanaticis, et sic Stoico quidem sensu Ambitiosi, et Gloriosi, Fanatici: haud absimile quod, sup. Sat. 6. Lib. 1. V. 23. sed fulgentè, &c.

V. 287. Meneni.

In Gente Meneniâ (celebri quidem) Consulem fuisse quendam non satis sanæ mentis ait Lambinus, ex Dion. Halicar. L. 9. Cruquius tamen invenisse se ait in quibusd. M. S. Menæci. Sed ridiculè prorsus explicat. Nunquam enim Stoicus vel Pius aut Bonus

quisquam inter Antiquos Menæci factum damnavet. Longè aliter Epictetus apud Arrian. L. 3. C. 20.

V. 308. Edificas.

Confer hæc cum iis quæ infra in fine, Sat. 7, et Epist. 1. et cum Epist. 8. et Ep. 15. in fine.

V. 310. Corpore.

Vide Ep. 20. V. 24. et Epist. Augusti in Vitâ Horatii. Sed per brevitate Statuæ, tenuitatem et angustias Rei familiaris præcipuè significat (ut ait Lamb.) ad illam tamen alteram Brevitatem alludens.

V. 323. Cultum.

Non simpliciter de Vestitu sed de omni Vitâ intelligendum; quo sensu sup. Sat. 2. V. 66. Cultum enim appellant interdum Latini Vitæ colendæ Rationem. Lamb. in istum locum, ubi exempla posuit, et inter alia hunc Horatii Versum. (Horatius autem quam lautius vixerit, Genioque in Juventute præcipuè indulserit, in Vestitu tamen non adeò curiosus. Vid. Epist. 1. V. 96. et Sat. 3. L. 1. V. 31.

SAT. 4.

V. 2. Signa.

Vide Heinsum et Arriani præfationem, et locum Platonis in Thæteto a Daciero citatum. Talia sunt Philosophorum *ὑπομνηματα* (Xenophontis *ἀπομνημονεύματα*) *ἀποσημειώσεις*.

V. 94. Fontes.

Hæc cum dicit Horatius ironicè contra Epicureos, ferè innuit fontes se adire velle Socraticos, quos suis Catiis opposuit, V. 3. Hanc ergo Satyram inter posteriores pono.

SAT. 5.

Hanc Satyram inter istas pono quarum causâ Horatius dictus erat nimis acer. Sat. 1. L. 2. Vide inf. V. 20. Scriptam ergo Satyram hanc credo ante, Sat. 1. L. 2. et Sat. 4. L. 1. — Satyra hæc Νεκρίας Homericæ quasi quoddam *ἀπομνημονεύμα* est. Ubi enim definit Homericus Ulysses consulere Tiresiam, ibi incipit Horatianus. Heinsum.

V. 20. Hoc.

Ingeniosè sed minùs rectè Dacierus in hunc locum, illud hoc ad Paupertatem referens, non ad Contumeliam illam: quippe indignum (ait) Ulyssis ut ita sentiret. Horatius vero antiquiorem potiùs quàm novam et Sanctiorem Comædiam secutus, non modò hic sed ubique in hæc Satyrâ abutitur Personis Ulyssis, Penelopes, et Tiresiæ, et est in hæc Satyrâ in alios acerrimus et contumeliosus, Vid. Sup. Vers. 1.

V. 22. Dic.

De Testamentis enim nondum dixit, et Ulysses hîc quasi tardus inducitur, ignarus scil. morum istorum. et hoc etiam ad Comædiam illam licentiosem facit, et ad Contemptum Ulyssis.

SAT. 6.

V. 7.

Facturus in futuro, quasi olim tale aliquid fecisset. Vid. inf. Sat. seq. V. 110. In hanc partem peccare paululum Horatius fortè potuit, in illam non potuit, quia minimè avarus.

V. 9. Denormat.

Normam nostrates Quadram vocant. Sic Anglicè to break squares, et inf. Ep. 6. V. 35.

V. 17. Quid prius.

Scribit adhuc libenter et gaudens Horatius; ardor tamen minor est. Vid. sup. Sat. 1. V. 7.

V. 38. Signa.

Sigillum Augusti intelligit, cujus custos Mæcenas teste Dione et Xiphilino.

V. 40. Septimus.

Hoc tempore ergo Horatius circiter 34 annos natus.

V. 42. Duntaxat ad hoc.

Nec mentitur Horatius (ut vult Dacierus) nec Mæcenatem notat vel ludit (ut Vet. Com.) sed de initio Amicitiae loquitur. Quàm lentus in hæc re Mæcenas. Vide sup. Sat. 6. L. 1. V. 60.

V. 65.

an extreme. At length, it is to be hoped, that he will find his due place in the ranks of literature; and that, without being extravagantly extolled, he will continue to be read, and in

V. 65. Meique.

i. e. Amici, Familiares, (ut Vet. Com.) non servi *vernæque procaces*, qui *libatis dapibus*, Herilis mensæ reliquis pascebantur, ut ait Lamb. et Torrent. Hic tamen sibi non constat, cum illud Meique de servis intelligere videtur. Horatium quidem *convivas* servos ipsos eisdemque procaces dixisse vix credibile est: nec magis verisimile in tali Cœtu de Philosophiâ locutum fuisse; adeo ut quæri etiam posset anne graviora sint hæc quam res convivalis ferat: ut ait Torren- tius (ad Verf. 75, infra) immemor conviviorum So- craticorum et Socratici Horatii.

V. 75. Rectumne.

Planè huic inferiori opinioni favet. et sic inf. Ep. 16. V. 52, &c.—At non ita olim. Vide sup. Sat. 3. L. 1. V. 113.

V. 78. Ex re fabellas.

i. e. Ex usu, utiles, Lambinus. Sed melior Cru- quii Explicatio, viz. *Ex re natus*: hoc est *ex argumento quod controversatur a convivis . . . ut si quis Sto- icus Divitias neget censendas inter Bona, contra Peripa- teticus . . . hic confestim Cervius Apologum, &c.*

V. 91. Prærupti.

Optimè Cruquius. *Quam quæso procul abludit hæc Descriptio ab Horatianâ Villâ in superno Tusculo? ita ut hæc verba Muris Urbani delicati sunt quasi Mæcena- tis Horatium pellicientis ad Vitam Urbanam, vel potiùs Aulicam.*

SAT. 7.

V. 9. Priscus.

Vid. Ep. 15. V. 26. et sup. Sat. 3. L. 1. in initio. Priscus enim hic a Davo pro Horatio ponitur. inde Horatius mox Verf. 21. *Quorsum? Davus, Ad Te*—atque inde, V. 53. *Tu cum projectis, &c.* i. e. *Tu Priscæ.*

V. 19. Levius.

Levius quàm Priscus ille, i. e. quàm Tu, O Horati!

V. 22. Ad Te.

Ad Te scil. quia ut mutabilis et levis ille Priscus, laudas, &c.

V. 37. Ille.

i. e. *Dixerit aliquis ò diva* (Lamb.) modestè vel potiùs timidè pro Seipso. quia supra, V. 2. *Reformidat.* et sic infr. etiam magis, V. 44 et 116. neque enim Personam suam planè hic agnoscit Davus, neque Heri, cum dicit *Tu cum sis quod, ego, &c.* V. 40.—et *Tu cum projectis*, V. 53. Mox verò audacior factus, re- spondente Horatio (vel pro Horatio Davo ipso) V. 72. palam et sine ambagibus expostulat.

V. 38. Nasum.

Ut inf. V. 102. De seipso enim loquitur Davus. Sic inf. V. 100. *Cessator Davus*, uti hic *inert.*

V. 53. Tu cum projectis.

Vid. sup. ad Verf. 9 et 37. Dacierus interim planè asserit Augustum Horatio et Annuli Equestris et Augusti Clavi jus dedisse. quâ auctoritate fretus nescio. Quòd si hoc verum est, non necesse est ad Priscum recurrere (Ut sup. V. 9.) neque tantam ti- miditatem Davo tribuere (Ut sup. V. 37.) qui semel tantum personam mutat, quando dixit *dixerit ille* pro seipso. Postea magis audacter; jam statim ad V. 40. *Tu cum, &c.* ut antea, V. 22. *Ad Te inquam.* Sed cum rursus infra, V. 60. *Quo te demisit* non tam commodè de ipso Horatio explicavi potest (quia potiùs quid factum, quam quid futurum narrat Davus) ideo et rursus fortasse de Prisco illo, Horatii Personam ex- hibente, intelligendum est. Facilis et Naturalis sem- per est Poeta Noster Horatius, et in Compositione atque Ordine minimè obscurus. Vel ergo notissima fuit olim ista Fabula de Prisco; vel simile aliquid sibi evenisse aut evenire potuisse indicat Horatius jam so- brius et securus, non ut olim *Calidus Juventâ Consule Planco*, Od. 14. L. 3. Mox ergo respondet *Non sum Mæchus* (V. 72.) *Non sum*, in præsentia. Ad ista, quæ olim facta sunt, nihil respondet.

V. 72. Non sum.

Quasi dixisset *jam non amasius sum vel futurus sum mæchus*. quia supra Davus *Evâsti? Credo metues, &c.*

ειρωνικως.

VOL. IV.

V. 75. Rerum.

Stoicè. Sic Arr. L. 3. C. 20. *Παυτὰς ἰαυτὸς δαλὺς ποιήσεις, πρῶτον τῶν πραγμάτων, εἰτι δὲ αὐτὰ καὶ τῶν ἀνθρώπων τὰν ταῦτα περιποιεῖν ἢ ἀφαιρῆσθαι δυνάμεων.* Et Lib. 3. C. 24. *Τὸ γὰρ ὑπὲρ ἀνθρώπων μέλλοντα ἡττάσθαι, πολὺν προτιμὸν ὑπὸ τῶν πραγμάτων δεῖ ἡττάσθαι.* Et C. 26: *Τὰ γὰρ πρᾶγματα προτιμὸς τετῶν κυρίως ἔχουσιν.* Hic ergo per Res intelligendum est τὰ πρᾶγματα (Scil. Divitiæ, Honores, aliæque exteriora interioribus opposita) infra vero, Ep. 1. V. 19. *Τὰ γινόμενα a Providentiâ scil. vel Fortunâ.* Hic reluctandum; illic cedendum; ut Libertas nobis contingat.

V. 86. Totus teres.

Virtus enim ex Stoico Dogmate ita secum Virtu- tem trahit ut concatenati Annuli. Cruq.

V. 87. Læve morari.

Perf. Sat. 1. V. 64. *Ut per læve seversos effundat junctura ungues.* Sic sup. Sat. 5. L. 2. V. 32. Nec tamen contemnendus Dacierus, qui altiore senium petit ex Platone, quem cum cæteris Socraticis Hora- tius sæpe in animo habet.

V. 101. Veterum.

De hoc Morbo vide Ciceronem in Paradox. Stoicis. C. 5. ubi Lucullum planè innuit, callidum nimis et barbaro isti L. Mummio nimis contrarium. Vide Plutarchum in Vitâ: ubi et de Mummio et Cethego. Cicero autem, uti Docti et Viri bonè omnes, Lucullum amavit, qui etiam si his Vitiis detentus, reipublicæ, Phi- losophiæ, et huic præcipuè Socraticæ sive Stoicæ favebat.

V. 118. Opera.

Sic Custodia pro iis ipsis accipitur qui aliquid custodiunt.

SAT. 8.

V. 3. Sic.

Respondet Fundanius (Ut inf. V. 19.) More Co- mico, *Sic ut nunquam melius*, i. e. *jucundius* (propter Risus et res ridiculas) non *lautius*.

EPIST. LIB. 1.

Ep. 1. Confer cum Epist. 7. 10. et Lib. 2. Ep. 2.

V. 10. Ludicra.

Inf. Ep. 14. V. 36.—Ep. 2. L. 2. V. 143. Carmina scil. amatoria, Satyræque jocosas (quales sunt Sat. 5. 7. 9. L. 1.—et 8. L. 2.) et mordentes de quibus. Vid. Sat. 1. L. 2. V. 21 et 46, &c.

V. 11. Decens.

Τὸ καλὸν καὶ πρεπόν. Secundum Stoicòs. Jam enim ad Socraticam veram et divinam Sapientiam ab infan- tienti illâ (Sup. Od. 34. L. 1.) revertitur Horatius.

V. 16. Agilis—Civilibus.

Πρακτικὸς καὶ πολιτικὸς cum Socraticis, Stoicis, &c.— Contra Epicureorum præceptum.

V. 17. Veræ custos rigidusque.

Sic inf. *Veræ Vitæ.* Ep. 2. L. 2. V. 144. Vide et Ep. 18. V. 8.—Custos, i. e. nihil præter Virtutem in bonis ducere. Vide Cic. de fin. Bon. et Mal. et quid ibi Cato in initio Libri. Vid. inf. Ep. 6. V. 30.

V. 18. Nunc.

Quasi dixisset *pudet fateri*. Sed revera alius pudor Horatium urget, dum Mæcenati scribit, et Amico molli conversionem suam ad severiorem Philosophiam indicat, et quia olim Aristippum tantoperè laudavit. Vid. Ep. 17.

Relabor—quia olim Epicureis et Cyrenaicis re- nunciavit. Vide Od. 34. L. 1.

V. 19. Subjungere.

Vera lectio. Vide Ciceronem in Acad. Quæst. Lib. 2. 45. prope finem. “Veruntamen (inquit) video quàm suaviter Voluptas sensibus nostris blandi- atur. Labor ut assentiar Epicuro aut Aristippo. re- vocat Virtus vel potiùs reprehendit manu; pecudum illos motus esse dicit: *Hominem jungit Deo, &c.*”

Horatius noster melius. Labor (inquit) ut assentiar Socrati, Zenoni, &c. revocat Voluptas. in Aristippi et Epicuri præcepta relabor, *Virtutem veram* defero. Fortunæ non responso (Ut inf. V. 68.) sed subservio, Deo me nec jungo nec subjungo. *Majora tento* (Ep. 17. V. 24.)

of the School of the sentimental Philosophy. Of late years, he has been as much depreciated as he was heretofore applauded; and in both cases the matter has been carried to an

nasio, Libellis etiam Palæstræque operam dare; æquè segnitèr molliterque Cohortem totam Syracusarum amœnitate frui!"

V. 11. Pila.

Mollissimus Homo Mæcenæ assuetus etiam hoc modo Græcari et pilâ ludere. Sup. Sat. 5. V. 48, 49.

V. 18. Unde putas.

Unde? a Naturali appetitu, Naturam ergo sequens non Gulæ serviens suavitèr vives. Huic Unde contrarium est illud Unde infra, V. 31. nec rectè disjunct Cantabrigiensis Noster, qui alias quidem optimè Periochas distinguit.

V. 53. Distabit.

Distabat, omnes ferè M. S. sic sup. V. 2. præcepit. et inf. V. 112, &c. Ofellum novi narrantem, i. e. Narrabat hæc.

V. 55. Alio.

Hæc et sequentia usque ad V. 112. Horatius magis ex suâ quàm Ofelli personâ profert. Confer cum Sat. 2. Lib. 1. V. 24, &c.

V. 64. Hæc.

Ineptia mihi videtur Dacieri a Marcilio desumpta Applicatio Lupi et Canis ad Lupum Tiberinum (Sup. V. 31.) et Avidienum Canem (V. 56.)

V. 67. Albuti.

Non hic Avaritia Luxuriæ opponitur, sed Elegantiæ Negligentia. Optimè ergo Torrent. et sic supra Horatius (Sat. 2. Lib. 1.) post Tigellium et Fufidium oppositos ad Rufillum et Gorgonium transit.

V. 73. Sederit.

Quam facile digresseris. Vet. Com. Non quæ placuerit. Hoc enim ad Voluptatem spectat, contra Ofelli sensum.

SAT. 3.

V. 9. Multa.

Sic Ep. 8. V. 3. Hic autem de Scriptis, illic de Moribus.

V. 10. Si vacuum.

Sic Epist. 7. Lib. 1. V. 10. Quod si Bruma, &c. Ubi tamen scripta non promittit, sibi studens et jam senescens: hæc quidem non Juvenis.

V. 11. Platona.

Signantèr nominavit Platonem, ex hujus enim Alcibiadè posteriore Materia et Seges Satyræ. Theod. M.

V. 92. Vitium.

i. e. Malum Stoicè. Cruq. sed in utroque sensu. quia inf. sibi nequior. V. 94. Stoicis quidem Dogmatibus omnino in contrarium et perversè utitur Stertinius, Staberi causam agens εὐπαιδευτός. Sic inf. V. 97. Clarus erit.

V. 104. Si quis emat citharas.

Ex Xenophontis Oecon. ut monet Lambin. Vide et Απομ. Lib. 1. in fine.

V. 132. Quid enim.

Nil mutandum cum Lambino. Hic enim το Quid enim? Idem valet quod πως εν; vel τι εν; usitatissimum in Dialogis (Vid. Arrian.) ubi Philosophus pro Discipulo five Adversario respondet vel interrogat μὴ πως; quo modo et hic Stertinius pro Parricidâ isto.

V. 169. Antiquo Censu.

Dives antiquo censu, i. e. Mediocri non hodierno; quia Privatus illis Censu erat brevis, (Od. 15. L. 2.) Hodie vero Si quadringentis sex septem millia desint, Plebs eris (Ep. 1.) inde statim infra, V. 178. Quod satis est, &c. et Natura coerces. Sic Antiquis Moribus, Antiquâ Fide, &c.

V. 192. Consulere.

Socratico more. Vicissim.

V. 223. Circumtônuit.

Vide Lamb. et quid Torr. de Bellonæ fanaticis, et sic Stoico quidem sensu Ambitiosi, et Gloriosi, Fanatici: haud absimile quod, sup. Sat. 6. Lib. 1. V. 23. sed fulgente, &c.

V. 287. Meneni.

In Gente Meneniâ (celebri quidem) Consulem fuisse quendam non satis sanæ mentis ait Lambinus, ex Dion. Halicar. L. 9. Cruquius tamen invenisse se ait in quibusd. M. S. Menæci. Sed ridiculè prorsus explicat. Nunquam enim Stoicus vel Pius aut Bonus

quisquam inter Antiquos Menæci factum damnavet. Longè aliter Epictetus apud Arrian. L. 3. C. 20.

V. 308. Ædificas.

Confer hæc cum iis quæ infra in fine, Sat. 7, et Epist. 1. et cum Epist. 8. et Ep. 15. in fine.

V. 310. Corpore.

Vide Ep. 20. V. 24. et Epist. Augusti in Vita Horatii. Sed per brevitem Staturæ, tenuitatem et angustias Rei familiaris præcipuè significat (ut ait Lamb.) ad illam tamen alteram Brevitatem alludens.

V. 323. Cultum.

Non simpliciter de Vestitu sed de omni Vita intelligendum; quo sensu sup. Sat. 2. V. 66. Cultum enim appellant interdum Latini Vitæ colendæ Rationem. Lamb. in istum locum, ubi exempla posuit, et inter alia hunc Horatii Versum. (Horatius autem quam lautiùs vixerit, Genioque in Juventute præcipuè indulserit, in Vestitu tamen non adeo curiosus. Vid. Epist. 1. V. 96. et Sat. 3. L. 1. V. 31.

SAT. 4.

V. 2. Signa.

Vide Heinsum et Arriani præfationem, et locum Platonis in Thæteto a Daciero citatum. Talia sunt Philosophorum τροπικαία (Xenophontis τροπικημομεναια) Αποσημειώσεις.

V. 94. Fontes.

Hæc cum dicit Horatius ironice contra Epicureos, ferè innuit fontes se adire velle Socraticos, quos suis Catiis opposuit, V. 3. Hanc ergo Satyram inter posteriores pono.

SAT. 5.

Hanc Satyram inter istas pono quarum causâ Horatius dictus erat nimis acer. Sat. 1. L. 2. Vide inf. V. 20. Scriptam ergo Satyram hanc credo ante, Sat. 1. L. 2. et Sat. 4. L. 1. — Satyra hæc Νενύιας Homericæ quasi quoddam αποσπασματιον est. Ubi enim definit Homericus Ulysses consulere Tiresiam, ibi incipit Horatianus. Heinsum.

V. 20. Hoc.

Ingeniosè sed minùs rectè Dacierus in hunc locum, illud hoc ad Paupertatem referens, non ad Contumeliam illam: quippe indignum (ait) Ulyssis ut ita sentiret. Horatius vero antiquiorem potiùs quàm novam et Sanctiorem Comædiam secutus, non modò hic sed ubique in hac Satyrâ abutitur Personis Ulyssis, Penelopes, et Tiresiæ, et est in hac Satyrâ in alios acerrimus et contumeliosus, Vid. Sup. Vers. 1.

V. 22. Dic.

De Testamentis enim nondum dixit, et Ulysses hic quasi tardus indacitur, ignarus scil. morum istorum. et hoc etiam ad Comædiam illam licentiosem facit, et ad Contemptum Ulyssis.

SAT. 6.

V. 7.

Facturus in futuro, quasi olim tale aliquid fecisset. Vid. inf. Sat. seq. V. 110. In hanc partem peccare paelulum Horatius fortè potuit, in illam non potuit, quia minimè avarus.

V. 9. Denormat.

Normam nostrates Quadram vocant. Sic Anglicè to break squares, et inf. Ep. 6. V. 35.

V. 17. Quid prius.

Scribit adhuc libenter et gaudens Horatius; ardor tamen minor est. Vid. sup. Sat. 1. V. 7.

V. 38. Signa.

Sigillum Augusti intelligit, cujus custos Mæcenæ teste Dione et Xiphilino.

V. 40. Septimus.

Hoc tempore ergo Horatius circiter 34 annos natus.

V. 42. Duntaxat ad hoc.

Nec mentitur Horatius (ut vult Dacierus) nec Mæcenatem notat vel ludit (ut Vet. Com.) sed de initio Amicitiae loquitur. Quàm lentus in hac re Mæcenæ. Vide sup. Sat. 6. L. 1. V. 60.

V. 65.

an extreme. At length, it is to be hoped, that he will find his due place in the ranks of literature; and that, without being extravagantly extolled, he will continue to be read, and in

V. 65. Meique.

i. e. Amici, Familiares, (ut Vet. Com.) non servi *vernæque procaces*, qui *libatis dapibus*, Herilis mensæ reliquiis pascebantur, ut ait Lamb. et Torrent. Hic tamen sibi non constat, cum illud *Meique* de servis intelligere videtur. Horatium quidem *convivas* servos ipsos eisdemque procaces dixisse vix credibile est: nec magis verisimile in tali Cœtu de Philosophiâ locutum fuisse; adeo ut quæri etiam posset anne graviora sint hæc quàm res convivalis ferat: ut ait Torren- tius (ad Vers. 75, infra) immemor conviviorum So- craticorum et Socratici Horatii.

V. 75. Rectumne.

Planè huic inferiori opinioni favet. et sic inf. Ep. 16. V. 52, &c.—At non ita olim. Vide sup. Sat. 3. L. 1. V. 113.

V. 78. Ex re fabellas.

i. e. Ex usu, utiles, Lambinus. Sed melior Cru- quii Explicatio, viz. *Ex re natus*: hoc est *ex argumento quod controversatur a convivis ut si quis Sto- icus Divitias neget censendas inter Bona, contra Peripa- teticus . . . hic confestim Cervius Apologum, &c.*

V. 91. Prærupti.

Optimè Cruquius. *Quàm quæso procul abludit hæc Descriptio ab Horatianâ Villâ in superno Tusculo? ita ut hæc verba Muris Urbani delicati sunt quasi Mæcena- tis Horatium pellicientis ad Vitam Urbanam, vel potius Aulicam.*

SAT. 7.

V. 9. Priscus.

Vid. Ep. 15. V. 26. et sup. Sat. 3. L. 1. in initio. Priscus enim hic a Davo pro Horatio ponitur. inde Horatius mox Vers. 21. *Quorsum? Davus, Ad Te*—atque inde, V. 53. *Tu cum projectis, &c.* i. e. *Tu Priscæ.*

V. 19. Levius.

Levius quàm Priscus ille, i. e. quàm Tu, O Horati!

V. 22. Ad Te.

Ad Te scil. quia ut mutabilis et levis ille Priscus, laudas, &c.

V. 37. Ille.

i. e. *Dixerit aliquis ò diva* (Lamb.) modestè vel potiùs timidè pro Seipso. quia supra, V. 2. *Reformidat.* et sic infr. etiam magis, V. 44 et 116. neque enim Personam suam planè hic agnoscit Davus, neque Heri, cum dicit Tu cum sis quod, ego, &c. V. 40.—et *Tu cum projectis*, V. 53. Mox verò audacior factus, re- spondente Horatio (vel pro Horatio Davo ipso) V. 72. palam et sine ambagibus expostulat.

V. 38. Nafum.

Ut inf. V. 102. De seipso enim loquitur Davus. Sic inf. V. 100. *Cessator Davus*, uti hic *invers.*

V. 53. Tu cum projectis.

Vid. sup. ad Vers. 9 et 37. Dacierus interim planè asserit Augustum Horatio et Annuli Equestris et Augusti Clavi jus dedisse. quâ auctoritate fretus nescio. Quod si hoc verum est, non necesse est ad Priscum recurrere (Ut sup. V. 9.) neque tantam timiditatem Davo tribuere (Ut sup. V. 37.) qui semel tantum personam mutat, quando dixit *dixerit ille* pro seipso. Postea magis audaciter; jam statim ad V. 40. *Tu cum, &c.* ut antea, V. 22. *Ad Te inquam.* Sed cum rursus infra, V. 60. *Quo te demisti* non tam commodè de ipso Horatio explicavi potest (quia potius quid factum, quam quid futurum narrat Davus) ideo et rursus fortasse de Prisco illo, Horatii Personam ex- hibente, intelligendum est. Facilis et Naturalis sem- per est Poeta Noster Horatius, et in Compositione atque Ordine minimè obscurus. Vel ergo notissima fuit olim ista Fabula de Prisco; vel simile aliquid sibi evenisse aut evenire potuisse indicat Horatius jam so- brius et securus, non ut olim *Calidus Juventâ Consule Planco*, Od. 14. L. 3. Mox ergo respondet *Non sum Mæchus* (V. 72.) *Non sum*, in præsentia. Ad ista, quæ olim facta sunt, nihil respondet.

V. 72. Non sum.

Quasi dixisset *jam non amatus sum vel futurus sum mæchus*. quia supra Davus *Evâsti? Credo metues, &c.*

εὐαντιστός.

Vol. IV.

V. 75. Rerum.

Stoicè. Sic Arr. L. 3. C. 20. Πάντασθ' ἐαυτοῖς δόξης ποιήσεις, πρῶτον τῶν πραγμάτων, εἴτε δι' αὐτὰ καὶ τῶν ἀνθρώπων τῶν ταῦτα περιποιεῖν ἢ ἀφαιρεῖσθαι δυνάμενων. Et Lib. 3. C. 24. Τοῦ γὰρ ὑπ' ἀνθρώπου μελλόντα ἵπτασθαι, πολὺ προτέρων ὑπὸ τῶν πραγμάτων δεῖ ἵπτασθαι. Et C. 26. Τα γὰρ πρᾶγματα προτερὰς τετῶν κυρίως ἔχοντων. Hic ergo per *Res* intelligendum est *τα πρᾶγματα* (Scil. Divitiæ, Honores, aliæque exteriora interioribus opposita) infra vero, Ep. 1. V. 19. *Τὰ γινόμενα* a Providentiâ scil. vel Fortunâ. Hic reluctandum; illic cedendum; ut Libertas nobis contingat.

V. 86. Totus teres.

Virtus enim ex Stoico Dogmate ita secum Virtu- tem trahit ut concatenati Annuli. Cruq.

V. 87. Læve morari.

Perf. Sat. 1. V. 64. *Ut per læve seversos effundat junctura ungues.* Sic sup. Sat. 5. L. 2. V. 32. Nec tamen contemnendus Dacierus, qui altiore sensum petit ex Platone, quem cum cæteris Socraticis Hora- tius sæpe in animo habet.

V. 101. Veterum.

De hoc Morbo vide Ciceronem in Paradox. Stoicis. C. 5. ubi Lucullum planè innuit, callidum nimis et barbaro isti L. Mummio nimis contrarium. Vide Plutarchum in Vitâ: ubi et de Mummio et Cethego. Cicero autem, uti Docti et Viri bonè omnes, Lucullum amavit, qui etiam si his Vitiis detentus, reipublicæ, Phi- losophiæ, et huic præcipuè Socraticæ sive Stoicæ favebat.

V. 118. Opera.

Sic Custodia pro iis ipsis accipitur qui aliquid custodiunt.

SAT. 8.

V. 3. Sic.

Respondet Fundanius (Ut inf. V. 19.) More Co- mico, *Sic ut nunquam melius, i. e. jucundius* (propter Risus et res ridiculas) non *lautius*.

EPIST. LIB. 1.

Ep. 1. Confer cum Epist. 7. 10. et Lib. 2. Ep. 2.

V. 10. Ludicra.

Inf. Ep. 14. V. 36.—Ep. 2. L. 2. V. 143. Carmina scil. amatoria, Satyrasque jocosas (quales sunt Sat. 5. 7. 9. L. 1.—et 8. L. 2.) et mordentes de quibus. Vid. Sat. 1. L. 2. V. 21 et 46, &c.

V. 11. Decens.

Τὸ καλὸν καὶ ὀρεῖον. Secundum Stoicos. Jam enim ad Socraticam veram et divinam Sapientiam ab insa- nienti illâ (Sup. Od. 34. L. 1.) revertitur Horatius.

V. 16. Agilis—Civilibus.

Πρακτικός καὶ πολιτικός cum Socraticis, Stoicis, &c.— Contra Epicureorum præceptum.

V. 17. Veræ custos rigidusque.

Sic inf. *Veræ Viæ*. Ep. 2. L. 2. V. 144. Vide et Ep. 18. V. 8.—Custos, i. e. nihil præter Virtutem in bonis ducere. Vide Cic. de fin. Bon. et Mal. et quid ibi Cato in initio Libri. Vid. inf. Ep. 6. V. 30.

V. 18. Nunc.

Quasi dixisset *pudet fateri*. Sed revera alius pudor Horatium urget, dum Mæcenati scribit, et Amico molli conversionem suam ad severiorem Philosophiam indicat, et quia olim Aristippum tantoperè laudavit. Vid. Ep. 17.

Relabor—quia olim Epicureis et Cyrenaicis re- nunciavit. Vide Od. 34. L. 1.

V. 19. Subjungere.

Vera lectio. Vide Ciceronem in Acad. Quæst. Lib. 2. 45. prope finem. “Veruntamen (inquit) video quàm suaviter Voluptas sensibus nostris blandi- atur. Labor ut assentiar Epicuro aut Aristippo. re- vocat Virtus vel potius reprehendit manu; pecudum illos motus esse dicit: Hominem jungit Deo, &c.”

Horatius noster melius. Labor (inquit) ut assentiar Socrati, Zenoni, &c. revocat Voluptas. in Aristippi et Epicuri præcepta relabor, *Virtutem veram* defero. Fortunæ non responso (Ut inf. V. 68.) sed subservio, Deo me nec jungo nec subjungo. *Majore tento* (Ep. 17. V. 24.)

* 4 F

in some degree to be admired. This tribute, at least, is due to his "Inquiry concerning Virtue," and to his "Moralists;" and in a great measure to his "Advice to an Author."

But

V. 24.) *presentibus* (uti Aristippus ipse) *haud æquus*. *Et mihi res, non me rebus*, &c. In hac ergo Epistolâ posteriorem sententiam, in illâ 17â. priorem probat. Hic senescens, illic nondum.

Vide ipsa Aristippi Verba, Mores, Conatus, in Dialogo isto Socratico Xenophontis Απομν. L. 2. in initio. et inter alia ἀλλ' ἐγὼ τοι (ἔφη δ' Ἀριστιππος) ἔδωκε τὴν δόξαν αὐτῷ ἐμαυτὸν ταύτῃ. Quæ verba Horatius proculdubio in animo habuit, cum scripserit *subjungere*. Sic Epictetus apud Arrian.

Vulgatum est Philosophiæ præceptum το συνταττειν vel ὑποταττειν ἑαυτὸν τοῖς ὅλοις (Vide Simplicium in Cap. Ench. 78. et Arrian. L. 1. C. 12.) το συνάρροσαι τὴν αὐτὴ βέλῃσιν τοῖς γινόμενοις. Lib. 2. C. 14. Sic in Enchirid. 77. 18. Sic M. Ant. L. 4. 23. et Lib. 6. 39.—Vid. sup. Sat. 2. L. 1. V. 76. et infra Ep. 17. 24. Vide et infr. hujus Epistolæ, V. 69.—Sic et Eurip. Marco citatus L. 7. 38. Τοῖς πραγμάσι γὰρ αὐχὺ δυνάσθαι χρεὼν· hic vero potius τα γινόμενα quàm τα πράγματα. Vid. Sat. 7. L. 2. V. 75.

V. 26. *Æquè neglectum*.

Morbum fatetur, cujus remedium Philosophia; pro quâ sequens Apologia est: ut Ep. 2. L. 2. V. 41. De Morbo ergo in sequentibus agitur. Mæcenas vero ut nec Morbo sic neque Remedia fidem exhibet. sic enim in fine *Nec Medici credis nec curatoris egere*. V. 102.

V. 30. Glyconis.

Glycon vel Lycon Philosophus. Vide Diog. Laert. et Heinsii Notam.

V. 51. Sine pulvere.

Sine pulvere. Aul. Gell. L. 5. C. 6. *impulverea*, minus gloriosa. Duplicem ergo pono Interrogationem, viz. *Quis contemnat?* Et cui, quæso, *spes, cui ipsa conditio palmæ sine pulvere dulcis esse potest?* Philosophica Horatio usitata. Sic Arrian. L. 1. 29. Εμε νυν κατατρεθῆναι, &c. Sic etiam de Hercule, C. 6. et Lib. 4. C. 10. et Lib. 2. C. 11. Labores (inquit) qui pro virtute capiuntur, etiam dulces sunt: Isti pro divitiis infructuosi, miseri. Ad hos igitur confuge, ut illos devites. Sic Ep. 6. V. 30. *Fortis omiſſis Hoc age deliciis*. Fortis, i. e. Labores tolerans, amans. Φιλοπονός.

V. 52. Vilius argentum.

Editor Noster Cantabrigiensis novam hic periocham ponit, quasi verba hæc sint Jani, qui concedit Aurum reverà virtutibus vilius esse; pecuniam tamen primùm quærendam; quia post nummos Virtus comparari potest, et Laus. Sine Nummis Laus nulla. Jocosè fane et more Horatiano.

V. 69. Præfens.

Præfens Philosophus. Monitor viam monstrans, exemplo probans, ipse Vir Bonus, te melior. De quo sup. V. 48.

Aptat—Aptare idem est quod, Sup. V. 19. *Subjungere* rebus vel fortunæ.

V. 71. Judiciis.

Hoc idem est quod Inf. Ep. 2. Lib. 2. V. 154. *Monitoribus iisdem*. Hinc sequens Fabula de leone ægroto, cujus in Antrum (i. e. Aulam ditantem et corrumpentem) qui introitum suadet Animalium vel Hominum Vulgus, malè suadet et hortatur, malus est *Judex, Monitor, Medicus*. Sup. V. 25. Confer etiam cum Ep. 10. V. 10 et 34.

V. 76. Quid.

Quod Remedium? cum malum inde *non fit levius?* (Ut Ep. 2. L. 2. V. 150.) Quod consilium? cum omnes discrepant, imo Sibi-ipsis non consentiunt. Sic inf. statim, V. 81, 82.

V. 108. Pituita.

Jocatur proculdubio Horatius: non sic quasi ad Ingenium et Dogmata Epicurea rediisset, ut ingeniosè Torrentius. Neque enim tam Stoicos quam Seipsum hic more suo irridet Horatius; qui quamvis naturâ Biliosus potius quam Pituitosus dici poterit, cum tamen Pituita (ut aiunt Medici Veteres) cerebrum alit, idcirco non minus Cerebro quam *Stomacho tumultum fert*, Sat. 2. L. 2. V. 76.—et cerebroſos sicuti et tristes efficit, cum malè affecta et molesta est. Sic Persius Horatii imitator, Sat. 2. V. 57. *Somnia pi-*

tuita qui purgatissima mittant. Est etiam species Pituitæ Vitrea: et Persius de Irâ loquens, Sat. 3. V. 8. *turgescit vitrea bilis* quam noster *splendidam bilem* dixit, Sat. 3. L. 2. 141. Idem Humor vitreus, five pituitosus, five biliosus, lippitudinis etiam causa fuit Horatio. Biliosis enim siccam lippitudinem molestam scribit Galenus. In duplicem ergo Morbum Oculorum et Cerebri jocatur Horatius, qui alias sæpe et lippum se et cerebrosum vel iracundum fateatur. Sapiens vero quocunque modo ad Iras five Querelas descendens, sanus non amplius est, sensu Stoico: Et sic præcipuè sanus nisi cum Pituita molesta est. Eodem modo et hodiè abutimur Verbis et Notionibus Medicorum, cum pro Melancholici, Morosi, et Queruli Hominis affectu substituiamus vulgatum illud Anglicum *Spleen* et *Vapours*. Atque hæc, ni fallor, Pituita est illa *Molesta* jucundissimi Horatii. De Melancholico affectu in Sapiente-Stoico, Vide Arr. L. 1. C. 18. in fine—et L. 2. C. 17.—et de tertio et perfectissimo Loco. L. 3. C. 2. Τριτος εστιν ο ηδη τοῖς προκοπτησιν ἐπιβαλλων, ο περι την αυτων τῶτων ασφαλειαν, ἵνα μηδ' ἐν ὑπνοῖς λαθῇ τις ἀνεξέτατος παρελθῶσα φαντασία, μηδ' ἐν οἰώσει, μηδε μελαγχολωντος, &c. Hæc verò inter Myſteria Disciplinæ: neque intelligunt Commentatores.

EPIST. 3.

V. 29. Si patriæ volumus.

Ad Stoicam ergo non Epicuream Philosophiam hæc pertinent.

V. 32. At.

Rectius *Ac*—et sic interrogationis Nota non hic sed infra ponenda post *feros*.

V. 33. *Heu calidus sanguis, heu rerum, &c.*

Cantabrigiensis noster plurimum M. S. lectionem hanc vulgatæ anteposit. rectè equidem. Horatius enim Philosophum agit, et (uti sæpe in Sermonibus et Epistolis Gravioribus) Stoicum. Stoicis vero Perturbatio omnis ab opinione falsâ: idemque *Calidus Sanguis* (i. e. Ira) et *Inſcitia*. Sic sup. Sat. 3. L. 2. 43.

EPIST. 4.

V. 7. Dederant.

Dederunt M. Si omnes. Nondum enim pauper Tibullus, sed Juvenis et Dives; Amoribus vero indulgens, et inter Querelas Curasque Amatorias vitam degens. Sic inf. V. 12.

Fruendi—non dissipandi; neque talem rem tali nomine unquam designaret Horatius. Quem Vide sup. in Sat. 2. V. 62.—et Sat. 6. L. 2. V. 7.

V. 12. Inter spem curamque.

Hæc omnia ad Amores præcipuè, non ad infortuniam mutatumve Tibulli statum pertinent. Exprobratio sanè esset talis Commemoratio. Confer hæc cum istis ad eundem, Od. 33. L. 1. Vide etiam quæ ad Valgium, Od. 9. L. 2. et *quas Amor curas habet* (ut Epod. 2.) Vide Od. 4 et 5.—et 8. L. 2. Quas iras—

V. 16. Epicuri.

Epicureos irridens (Ut sup. Sat. 8. L. 2.) Epicureum tamen seipsum profitetur; nondum, ut videtur, reversus ad fortiorem istam Disciplinam Socraticam (de quâ Vid. sup. Ep. 1. et inf. Ep. 2. L. 2. V. 45. et Art. Poet. Vers. 309. atque alibi) quanquam illuc spectat, sup. V. 4 et 5. ideoque tanquam discedens hinc parvam Sectæ habet reverentiam. Rectius hoc.

Porcum—ineptus quidam Epicuri fautor Meibonius in Diog. Laert. ad Vitam Epicuri, *parcum* non *porcum* legit, ridiculè prorsus.

EPIST. 6.

V. 1. Nil admirari.

Nil admirari, &c. V. 9. *Qui timet*, mirabitur et cupiet. *Qui cupiet, metuet quoque* (Inf. Ep. 16. V. 65.) Neque hoc solum: in ipsâ enim admiratione timor (ait) quidam inest; sicuti et spes: eodem modo et in timore admiratio; quia *pavor* (i. e. perturbatio, ἐκπληξίς, ἐκστασις) utrique affectui communis est, et ex utriusque

But whatever becomes of Lord Shaftesbury's character as a writer, he was excellent as a man. This appears from every testimony that remains concerning him. "It must be owned,"

utriusque objectis nascitur. Ex falsis bonis, falsa gaudia, viz. Lætitia, exultatio, quæ et in malis numerantur. Hinc statim infra *Gaudeat an doleat—quid ad rem.* Paradoxon est Stoicum. Vide Ciceron. Tusc. L. 4. et Laertium in Zenone. Totaque hæc Epistola ex Stoicorum, non Epicureorum, Cyrenaiorum, (ut creditur) præceptis deprompta. Hinc illud inf. V. 16. *Ultra quam satis est, &c.* i. e. perturbatè, cum istâ admiratione et *ἐμπληξίῃ*: ad quod pertinet etiam præceptum illud seu cautio de usu *ορεξέως*; Epict. Ench. C. 7. et Arr. L. 3. C. 13. in fine. Hæc omnia Stoicè. Et sic infr. V. 34. *Si Virtus hoc Una potest dare.* In sequentibus verò perpetuâ Ironiâ utitur: *Si res sola*, V. 47.—*Si fortunatum species*, V. 49. *Si benè qui cænat*, V. 56.—Notandum est perpetuum illud *το σὺ*. Postremò Versu 65. *Si Mimnermus, &c.* Ubi rursus *Voluptates* unâque Voluptatum Præconem Poetam damnat et aspernatur; minimè verò (ut creditur) laudat, amicove suo commendat.

V. 11. Improvisa, &c.

Cic. Tusc. Quæst. L. 4. Simul objecta species cuiuspiam est quod Bonum videatur, ad id adipiscendum impellit ipsa Natura. Id cum constanter prudenterque fit, ejusmodi Appetitionem Stoici *βελήσιον* appellant.

Et Seneca, Ep. 77. Stultis Fortunæ credentibus omnis videtur nova Rerum et inopinata Facies, &c.

V. 31. Virtutem verba.

Sic enim Epicurei de Justo et Pulchro. *Οὐκ ἦν τι καὶ ἑαυτοῦ δικαιοσύνη, &c.* (Diog. Laert. Epicur.) *τοῖς μὴ φωναῖς κεναῖς ἑαυτὸς συνταραττεσθῆναι.* Sic et illud *μὴδὲν εἶναι το καλον ἢ ἀρα το ενδοξον.* Arr. L. 2. C. 22.

V. 65. Vivas.

Ironicè. Jam enim Horatius non amplius ad exemplum Mimnermi amatoria scribit. Vid. Ep. 1. 10. et Ep. 2. L. 2. 145, &c. et etiam Epist. sequentem.

EPIST. 7.

V. 3. Sanum.

Annotandum est, quòd etiam si Horatius hic de Curâ corporis solum loquitur, hæc omnia de Animo debent intelligi. Confer hanc Ep. cum primâ ad Mæcenatem, atque etiam cum 6mâ et 10mâ. Inf. et Lib. 2. 2dâ. Vide etiam Sat. 6. L. 2. V. 18. ubi simul et Animi et Corporis Sanitatem ab eadem causâ scil. a secessu ducit.

V. 12. Leget.

Quamquam tota hæc Epistola (uti sup. prima) Apologia est Horatii pro Studiis suis et Philosophiæ amore, cum tamen neque libros neque Philosophiam apertè nominat, hoc solum *leget* ad rem nauticam spectare credo, *leget littora*—Confer cum Sat. 3. L. 2. V. 9, 10, 11. De Studiis ergo intelligendum.

V. 12. Contractusque leget.

Vid. supra Annot.—At si hoc verbum *leget* de lecturâ intelligendum est (quod suadet revera similis locus, L. 1. Sat. 6. *Lecto aut scripto quod me tacitum juvet*, in priori tamen sensu *το contractus* accipiendum est, et ad vitam et secessum referendum, non ad Corpus, neque ad Animum, quo sensu Cruquius. Vide Senec. de Tranquil. C. 9. *Non potest tanta varietas et Iniquitas Casuum ita depelli, ut non multum procillare irruat magna Armamenta pendentibus.* Sequitur *Habitare contractus*. Huic enim contrarium est *Vela pandere vel explicare*. Sic idem Seneca, Ibid. C. 3. in fine.—*Utcunque Fortuna permittit ita aut explicabimus nos aut contrahemus.* Vide et ipsum Horat. Od. 10. L. 2. *Rectius vives, &c.* et Sat. 2. L. 2. V. 113. *Non latius usum.*

V. 22. Dignis paratum.

i. e. *Dignis donis dandis* (uti Cruquius) vel *Dignis viris largiri liberaliter*, ut cæteri Comment.—Ego Horatium credo alludere ad notum aliquod Poetæ vel Philosophi Dictum, quale in Cebetis Tab. de sapiente Divite cui mandatur *συνομιλῶς ἀπελθεῖν πρὸς τὴν βέλαν καὶ ἀσφαλὴν δόσιν*, non tamen ut ignoret *quid distent æra, &c.* Sapiens enim Fortunæ bona neque spernit neque odit. Merens ergo dat. Sic Tu mihi meritum tuum et laudem (i. e. Virtutem) agnoscanti. Vid. inf. V. 38 et 39.

V. 34. Hæc ego si compellor.

Si Tu (Mæcenas) nuperam hanc otii et secessus electionem, non, ut profiteor, a vero judicio et Deliciarum contemptu, sed a plenitudine, copiâ, et indolentiâ ortam credis, ideoque Me tanquam ingratum perstringis falsumque, quia pauper olim ad Aulam, repleturus me scilicet, accessi; nunc dives liberalitate tuâ factus, et laborem omnem moramque circa Amicos fugiens recedo; ostendam contrarium. En! paratus sum *donata reponere*, pauperque rursus fieri, et exemplo monstrare, me meam libertatem otiumque (Divitiis Arabum cariorem) etiam in pauperrimo Statu amplecti velle. *Tenuem me rursus macrumque* videbis; in *cumeram* vero non facile sicut antea *repentem*. Recipe ergo *Magis apta Tibi tua dona*. Te obsecro et obtestor (ut olim Philippum Vulteius) *vita me redde priori*. Confer hæc omnia cum Ep. 1. 10. et L. 2. 2.

V. 37. Verecundum.

Non temere ergo in *cumeram* *repperat* (ut sup. V. 39.) sed coactus quasi (ut inf. Vulteius, V. 60.) et dona Mæcenatis larga recusans sæpe (ut sup. Hospes) haud sponte Dives factus est.

V. 39. Latus.

Non dolens, non te incusans, vel minùs amans, imò laudans, *nec verbo parcus*. Hoc modo Libertatem meumque vivendi morem sine invidiâ vel ingratitudinis suspitione retinebo. Sic *Dignum me etiam præstabo*. V. 24.

V. 43. Tibi.

Tibi scil. Magnati, Aulico, Elegantiarum Arbitro, magis convenientia, non mihi simplici viro, *inopis et pusilli animi* (ut Sat. 4. L. 1.) otium ignobile, secessum, et studia amanti.

V. 46. Strenuus.

Fabula five Historia hæc prioris Fabulæ (Vulpeculæ scil. et Mustelæ) Epanorthosis est. Ostendit Horatius se non tam suâ culpâ quam Mæcenatis dolis in Aulicam Vitam transiisse et Libertatem perdidisse. —Confer hæc cum Fabulâ Murium S. 6. L. 2. et Cervi inf. Ep. 10.

V. 52. Demetri.

Confer hæc cum Sat. 6. Lib. 1. V. 54. Demetrius hic pro Virgilio et Vario, ut Philippus pro Mæcenate, Vulteius pro Horatio ponitur.

V. 56. Præconem.

Præconem vel Coactorem ut inf. V. 65. Talis fuit Horatii Pater. Nec longè abfuit a tali quæstu Horatius ipse postquam amisit paterna bona. Vid. sup. Sat. 6. L. 1. V. 86.—et Ep. 2. L. 2. V. 50.

V. 78. Laudare.

Si Horatius Aulam Voluptatis.

V. 85. Immoritur studiis.

Vulteius avaritiâ, Horatius Luxuriâ, Amore captus: Vulteius Rusticis Studiis, Horatius Urbanis, Aulicis Negotiis et Elegantiss, parasiticis Mensis, Poeticis Laboribus obstrictus est. Vid. Sat. 6. L. 2. —et Ep. 2. L. 2. 50, &c. — usque ad 145. Vide etiam Sat. 7. Lib. 2. 53.—et Sat. 4. L. 2. in fine.—et inf. Ep. 10. V. 10.

EPIST. 8.

V. 9. Offendar—Irascar.

Confer hæc cum Satyrâ 3. L. 2. in initio et fine. Ubi correptus a Damasippo ridiculo quidem nec verè amico, satis tamen et Veturum hunc suum, cæteraque Vitia et asperitatem erga Monitores explicat, honestè quidem et simpliciter. Sic Sat. 7. ejusdem Libri cum Davo. De *Irâ* hæc suâ et *Rabie horrendâ* (uti amplificat Damasippus ille Pseudo-Stoicus, V. 323.) Vide Ep. 20. V. 25. *irasci celerem*. et in Sat. illâ septimâ L. 2. V. 34.—et sequentia, etiam quæ in fine *ὀπακρικῶς* et quasi in scenâ. Vide etiam Sat. 4. L. 1. V. 135, 6, 7. et Sat. 3. L. 1. V. 29.

EPIST. 10.

V. 10. Liba.

Mensas scil. parasiticas et regias ut in Augusti Ep. fragmentis: De eodem tædio vitæ Aulicæ, poeticæ, assen-

owned," says Bishop Warburton, "that this Lord had many excellent qualities, both as a man and a writer. He was temperate, chaste, honest, and a lover of his country (u)." There

(u) Dedication to the Divine Legation, *ubi supra*, p. 28.

assentatoriæ, Desiderioque Libertatis et Philosophiæ, Vide Epist. 1. 7. et Lib. 2. 2.—et hanc ipsam inf. V. 33, 34, &c. et Sat. 6. L. 2. V. 80.

V. 11. Pane.

Sic Perf. Sat. 5. *Frugæ Cleantheæ*. et Max. Tyr. Diff. 12. *εγω δε ποθω προς την ευτυχίαν τροφήν λογών*, &c. Huic opponitur, in ludibrium, το πλάκονταριον, Stoicè pro luxu. Vide Arrianum.

V. 12. Vivere naturæ, &c.

i. e. Vivere feligentem quæ secundum Naturam, &c. Cic. de Fin. Bon. Lib. 3. Stoicè Summum Bonum.

EPIST. 15.

V. 26. Mænius.

Inconstantiam suam fatetur Horatius. Hic cum Mænio, sup. (Sat. 3.) cum Tigellio se confert. Hoc vitium Horatii perstringit quoque Davus sub Personâ Prisci. Sat. 7. L. 2.

V. 42. Nimirum hic ego sum.

Sic Sat. 7. L. 2. V. 23, &c. et Ep. 8. V. 12.

Talis ergo Horatius hæcenus: Posthac magis confans. Vide Ep. 7. V. 44. et Ep. 14. V. 16.

V. 45. Vos.

Non sic postea Horatius. Vide Ep. 10. V. 8.

EPIST. 16.

V. 52. Oderunt.

Sic Stoici: Epicurei verò aliter; et est quidem hæc Epistola tota Stoica. Vid. inf. V. 65.

V. 54. Sit spes fallendi.

Negabant Epicurei Spem Secreti ullam esse in Furtis: ideoque (non aliâ de Causâ) a furto abstinendum. Contra verò Stoicis spem esse: sed ad Amicitiam et Fidem non *Usum* sed *Rectum* nos trahere. (Sup. Sat. 6. L. 2.) Hic verò contra Epicureos Disputatio est, et quæ sequuntur statim (viz. *Damnum est non facinus*) omnia Stoica sunt.

EPIST. 17.

V. 24. Ferè præsentibus æquum.

Ægrè quidem se præsentibus rebus et concessis subjungentem (ut sup. Ep. 1. V. 19.) sed majore et splendidiora tentantem, ut sup. V. 20.) Vid. Sat. 2. L. 1. 76.

V. 42. Experiens.

In hac vitâ atque arte parasiticâ hic se jactat Horatius, sibi placens. Non ita posthac. Vid. inf. Ep. 18. 86 et 107.—et sup. Ep. 10. 10.—et Ep. 1. L. 1.

EPIST. 18.

V. 86. Inexpertis.

Non immeritò Horatius jam expertus hoc dicit. Scriptam ergo hanc Epistolam post præcedentem credo, ubi se jactat, V. 35 —Paululum equidem distat parasitica hæc potentis Amici cultura ab istâ infami sup. Sat. 5. L. 2. Confer hæc quæ sequuntur cum istis præceptis, præcipuè 90, &c.

V. 107. Ut mihi vivam.

Ut mihi non aliis; potentibus scil. Amicis, divitibus, Aulicis; uti olim Ego, jam Tu. *Dulcis enim inexpertis*, &c.—Sup. V. 86.—Tibi interim vitam istam parasiticam sequenti, et inexperto, ego expertus Consilium do. Talis est hæc Epistola ad Lollium. In præcedenti, V. 17. ad Scævam, nondum adeo expertus Horatius, Vitam parasiticam laudat.

EPIST. 19.

V. 10. Edixit.

Ennius certè, vel alius aliquis, de quibus supra mentio est. Eodem modo de Poetis, inf. in Arte Poet. V. 295, &c.

EP. 20.

V. 21. Majores.

De Militiâ sub Bruto loquitur. Vide Sat. 6. L. 1. V. 48.—et inf. Epist. 2. V. 50.

V. 23. Me primis, &c.

Bruto scil. postea Mæcenati et Augusto. his domi et in pace, illi in bello.

EPISTOLARUM.

LIB. 2. EP. 1.

V. 145. Fescennina, &c.

Vide et apud Græcos quid simile evenit. Ars Poet. V. 282. Confer etiam cum Aristot. Poet. C. 4.—Ubi de ortu Comædiæ agit. Obscœna nempe et rustica olim. Etiam suo tempore in quibusdam civitatibus τα φάρλικά permansere. Post illum rursus nova Comædia politior et emendatior Caput extulit. *Lex est accepta*, &c. Ars Poet. 283.—Imperfectam esse Comædiam suo tempore planè sentiebat Philosophus.—Nam quoad Tragædiam hæc habet: και πολλὰς μεταβολὰς μεταβαλὼσα ἡ τραγωδία ἐπαύσατο, ἐπεὶ εἰσχετὴν ἑαυτῆς φύσιν. Vide Liv. Lib. 7. C. 2.

V. 168. Creditur.

Τοσούτω δὲ ἐν λόγῳ δεῖ μάλλον φιλοπονεῖν περὶ αὐτῶν ὅσω ἐξ ἐλαττοτέρων βοηθημάτων ὁ λόγος ἐστὶ τῶν μετῶν. Arist. Rhetor. L. 3. C. 2.

V. 170. Plautus.

Inf. Ars Poet. V. 270. Negat Plauto in personis repræsentandis illud ἠθικὸν adesse. Heins: sic sup. V. 58. *Properare* dicitur Plautus, Terentius *Arte vincere*. Terentio quantum favet Horatius, Vide sup. Sat. 3. L. 2. V. 2, &c. nisi quoddam omnino Græca sint, et ex Menandri fonte potiùs quam e Terentio sumpta.

V. 173. Dossennus.

Alius Poeta Comicus Romanus: de quo Plinius, L. 14. C. 13.

EP. 2.

V. 20. Dixi, &c.

Justificatio.

V. 26. Luculli, &c.

Excusatio 1^{ma}. a Fortunâ mutata, Libertate adeptâ. Confer hæc cum Epist. 7. V. 29, &c. et cum Annot. —Uti hic militis sic supra Vulpeculæ sub Imagine Horatius seipsum Fortunæque suas describit. Fortiùs hic quidem, nec seipsum purgans, aut ab exemplo recedens: quippe hic Amico Solùm, illic Patrono rem exponit. Neque militis hoc exemplum ferre potuisset, ut diceret, *En! Zonam reddo et Tibi tua dona relinquo*. Nullum ibi jus relictum Mæcenati, nulla causa postulandi, expostulandive. Zonam enim primam (i. e. rem familiarem paternam) propriam habuit et nulli debitam: etiam secundam illam a Mæcenate datam, laboribus suis (inf. V. 50, &c.) ingenio studiisque non aliter quàm stipendium justum meruit. Sed hoc ne diceret Mæcenati, Modestia prohibuit: aliâ ergo imagine sibi minùs favorabili ad illum usus est, politè admodum, at non minùs liberè.

V. 45. Academi.

Ep. 4. L. 1. V. 4. Veterem veram et genuinam Academiam intelligit, unde postea ad Epicureos deflexerat, nunc tandem rediit; atque ut supra, Ep. 1. V. 11. *Quid verum atque Decens curat*, &c. *agilis et civilis* fit, V. 16. *Virtutisque veræ rigidus satelles*.

V. 51. Paupertas.

Sic Luculli militem, sup. V. 26. Nunc verò invitanti Floro vel Neroni, imo Mæcenati ipsi et Augusto recusât Noster.

V. 55. Singula.

Excusatio 2^{da} ab Impotentia.

V. 58. Denique non omnes.

Excusatio 3^{ta} a Discrepantiâ.

V. 65. Præter cætera.

Excusatio 4^{ta} ab Occupationibus.

V. 87. Frater erat.

Excusatio 5^{ta} ab Adulatione et Invidiâ Poetarum.

V. 106. Ridentur mala.

Excusatio 6^{ta} a Difficultate et Labore operis.

V. 126. Prætulerim Scriptor.

Excusationum Confirmatio, et Conclusio e superioribus

There is a passage in one of the Earl of Shaftesbury's Letters to Robert Moleworth, Esq; which is worthy of notice. "I am persuaded," says his Lordship, "to think no vices will grow

oribus in hunc modum. Poeta, si ineptus, Beatus; si sanus, miser. Ineptus vero fieri quis vult? Miser quidem nemo sequitur ergo, V. 141. Nimirum sapere est, &c.

V. 141. Sapere.

Quia prius dixerat *Quam sapere et ringi*. Sed verus scribere, negat omnino sapientis esse. Est ergo Epanorthosis istius Dicti, sup. V. 128.—Nunc vero abjectis nugis et erroribus Poetarum (qui vel infani vel miseri) ad Philosophiam et sui emendationem se convertit Horatius.—Heinsius hæc omnia turbavit, et Epistolam perfectissimam miserè in Editionibus suis laceravit, eadem fiduciâ alias contaminans. Vid. infr. in Arte Poet. ad V. 86.

V. 144. Veræ Vitæ.

i. e. *Rectè vivere et Naturæ convenienter*, ut sup. Ep. 6. V. 29. et Ep. 10. V. 12. et Ep. 16. V. 17. Hoc nimirum est illud *Verum atque decens*. Το καλον, το σπουδον, ab Epicureis irrisum.

V. 158. Proprium.

Hæc omnia Stoica, viz. Τι εφ' ἡμιν, τι εκ εφ' ἡμιν· τι ἡμετερον, τι αλλοτρου· V. inf. V. 175.

De Arte Poeticâ.

Quintilianus Epistolam hanc sic vocat. Ab aliis tamen, non ab Horatio ipso, Nomen datum credo, neque communiter receptum: ut ex M. S. apparet (Vide Cruq. et Lamb.) Est enim Epistola illa ad Augustum (1ma scil. L. 2.) de Arte Poeticâ, cujus Artis etiam præcepta tradit, in Ep. ad Florum, quæ inter hanc et illam est: adeo ut tres sint de eadem re. Et in Libris antiquis Epistola hæc (rectè ut opinor) tertia Libri 2di inscribitur, simpliciter, vel addito tantum ad *Pisones*, ut Lambinus. Cruquius epistolam hanc vocat *Co-epistolam* et *Co-hæredem*; respectu scil. superiorum duarum. Merito tamen de *Arte Poeticâ* inscribitur: quia est præcipua, neque ut credunt nonnulli imperfecta; sed omnibus modis ornata, polita, perfecta.

V. 1. Humano, &c. ad V. 37.—Capillo.—
Constitutio Συτασις.

V. 38. Sumite materiam—ad V. 41.—Ordo.—
Materia ὕλη.

V. 42. Ordinis—ad V. 45.—Auctor.
Ordo Ταξις.—

V. 45. Promissi Carminis.

Longi Epici. V. infr. V. 150, 152. et quæ ibi de Homero. et postea, V. 360. Horatius enim promittenda carmina jactandaque antequam edita sint, haud censet: quum premi paucisque saltem ostendi dum componuntur suadet, inf. V. 386. et sup. Epist. 2. V. 114. Editoque jam in opere Promissorem damnat. V. 138.

V. 46. In verbis—ad V. 100.—
Dictio Λεξις.

V. 73. Res gestæ.

Poema Epicum.—Post præcepta familiaria atque obvia, ad Historiam Poeseos et Poetarum descendit. inde ad graviora τα ἤθικα. Vide inf. V. 295.

V. 75. Versibus.

Elegiacum.

V. 79. Archilochum, &c.

Poema Iambicum.

V. 83. Musa dedit.—

Lyricum.

V. 86. Descriptas servare vices, &c.

Dramaticum, ubi statim de Moribus.—De Tragœdiâ hic præcipuè differit Horatius usque ad V. 130. Postea vero V. 153, de Comœdiâ: Vid. infr. V. 114. et Annot.—Hæc omnia turbavit Heinsius, ut sup. in Ep. 2da.—Vide infr. Annot. ad V. 309.

Descriptas Vices.—Χαρακτηρας et Mores in Dramatico. Sic Isocrates ad Dem. χαρακτηρα τοις εργοις εμε-
καλλειν· et Demosth. εἰ δε τοις ὁμιλιαῖς ὁ τῆς ψυχῆς χαρακ-
τηρ βλεπεται. Sic rursus infra de Comœdiâ, V. 155.
Ætatis cujusque, &c. *Mobilibusque decor naturis*.—
Vide et Sat. 10. V. 12. *Defendente Vicem modo Rhe-*
toris atque Poetæ. et inf. V. 193. *Officiumque virile*
defendat. *Partes defendere*, quod idem hic *Servare*
Vices. Sic Ep. 1. L. 2. V. 171. *Partes tueri*.

Vol. IV.

Operumque colores.

i. e. Actionum Affectuum humanorum—in Scenis, ubi *Res agitur* (ut inf. V. 179.) in Satyrâ *refertur* tantum. Quare sup. Sat. 2. L. 2. V. 60. *Quisquis erit Vitæ scribam color*.

V. 93. Interdum tamen.

Sententiam dicit de Comœdiâ contra illos (sup. Sat. 4. V. 45.) qui Comœliam Poema esse negaverunt. Ibidem V. 63. *alias* dicit se quæsiturum. unde apparet hanc epistolam isti Satyræ posteriorem esse. Et quia infra de Comœdiâ plura habet (Veluti V. 234.) apparet quidem Horatium inter poemata ponere.

V. 94. Tumido.

Sermone et Verbis tragicis: quod magis est quam quod supra dixit Sat. 4. V. 48, 49.—*Pater ardens* *sevit*, &c.

V. 101. Adfunt.

Mores ἠθος.

Uti hic in Dramatico, de Tragœdiâ et Comœdiâ, sic de *Moribus* communiter differit Horatius: postea vero speciatim et graviter, viz. V. 309, 10, 11, 12, &c.

V. 114. Divusne.

Vide Annot. et sup. Vers. 86. hic enim de Tragœdiâ differit; de Comœdiâ, inf. V. 153. de utraq; (scil. *quid intersit Davusne loquatur an Deus*) inf. V. 237.

V. 120. Honoratum.

Scil. a Jove, ut in Homero. II. L. 2. in initio ὡς Ἀχιλλῆα τιμῶσι, &c.—Quod Thetidi promiserat, L. 1. in fine.—Sic et rursus Jupiter, L. 15. in initio.

V. 131. Publica materies.

Haftenus de Tragœdiâ, nunc de Carmine Epico unde illam deductam vult.

V. 153. Tu quid, &c.

Post Graviora Poemata ad Comœdiam se convertit.

V. 158. Puer.

Puer hic et *Juvenis* (inf. V. 161.) et *Vir* (V. 166.) et *Senex* (V. 169.) Comœdiæ sunt χαρακτηρες et *Descriptæ Vices*, ut sup. V. 86.—Hæc enim omnia a Vers. 153 ad 178.—ad Comœdiam spectant. Hoc vidit Lambinus, cum dicit in Præfatione Horatium in hæc Epistolâ de omni Poeseos genere disputare, maximè verò de Comœdiâ et Tragœdiâ. Hoc etiam vidit Vet. Com. et Cruquius ad Terentium referentes in his locis.

V. 179. Aut agitur res.—

Haftenus de Tragœdiâ seorsim atque Comœdiâ. Nunc de utraq; simul: præcipuè verò de Tragœdiâ, et de Satyris qui in Tragœdiis exhibebantur. Vid. inf. V. 235.—Annot.

V. 193. Actoris partes.

Aristot. de Arte Poet. και τον χορον δε ενα υπολαβειν των υποκριτων· Lamb. Hinc constat legendum *Actoris* non *Auctoris*. Sic etiam Vet. Com. et Cruquius ex omnibus M. S. Et sic Heinsius: qui sequentia Aristotelis Verba ponit viz. και μοριον ειναι τα ὅλα, μη συντα-
γωνζεσθαι, &c.

V. 235. Amabo.

Ut sup. V. 25 et 26, *labero, fio*: et V. 87. *Cur ego*, &c. et inf. V. 265. Neque enim de Seipso, neque de Satyris Suis vel ejusmodi loquitur. De Seipso quàm modestè, Vide inf. V. 304, &c.

Satyrarum scriptor.—Mirum est quibusdam quid causæ fuerit Horatio, cur tam accuratè de Satyris hic præcipiat, quum non potuerit ignorare, illos jamdiu a vetustissimis quibusque Tragicis Æschylo, Sophocle, et Euripide, non adhibitos in ipsorum Tragœdiis: quod etiam Aristoteles (in Arte) videtur innuere. Itaque conjectare licet ex hac præscriptione, Satyros, ab illis prius quidem exclusos a Tragœdiis, sed tempore Horatii nudos in Scenam introductos, et in usum revocatos: ideoque dari hic præcepta de genere sermonis, gestûs, habitûs, quod illos deceat in Tragœdiâ. P. Gualt. Chab. Basil. 1615.

V. 295. Ingenium.

Transitio ab Incuriâ, Ineptiis, et furoribus Poetarum, ad Prudentiam, Sapientiam, Mores, qui in vero Poetâ requiruntur. Vid. V. 309. Annot.

* 4 G

V. 306.

(w) Letters, &c. 1. 7. "grow upon me: for in this I have been ever sincere, to make myself as good as I was able, and to live for no other end (w)." The man who could speak thus concerning himself is entitled to the best applause, the applause of the heart.] K.

V. 306. Nil scribens ipse.

Modeste, quia neque Dramaticum neque Epicum Carmen (de quibus hic præcipue) ipse scripserat: Satyrarum verò (non Satyrorum) scriptor ipse Poetam inde se vocari noluit. Vid. Sat. 4. V. 39, &c. et Sat. 6. L. 2. V. 17.

V. 309. Scribendi rectè.

De Distributione et Ordine.—Finita Historiâ Poeticâ, ubi et Poematum Species, ortus, et Poetarum mores, ingenia singulatim exposuit, jam ad veros Mores (de quibus sup. V. 86—100, &c.) Doctrinam et præcepta generalia descendit; et post Jocos, Fabulas, Ironias, rem seriò *ἠθικῶς* tractat; ita tamen ut suo more jocosè definat. Mirus ordo, sed quem Heinſius adeo non sentit, ut totum conatus sit evertere.

V. 310. Socraticæ.

Non jam amplius ergo Epicureus, sed Socraticus Horatius. Vide Ep. 1. Annot.

V. 317. Exemplar Vitæ.

Quod in *Socraticis Chartis* habet (ut sup. 310.) ubi Personæ, Characteres, Mores, nimirum quia *Dialogi* erant. Vide Arist. Poet. C. 1. *Συγκριτικὸς λόγος* —et Athenæum, L. 2.

V. 319. Locis.

Cicero in Oratore: "nec verò in Dialecticis modò sit instructus, sed habeat omnes *Philosophiæ notos et tractatos Locos*."

V. 364. Judicis.

Confer cum versu 388—425—436.—Atque inde usque ad, V. 453. Hic enim *Vas vitium ridenti Flaccus amico tangit*, et Majorem Juvenum Poetæ famam affectantem dehortatur; magnæ molis opus monstrans, artemque Criticam maximè necessariam. V. inf. V. 408.

V. 391. Silvestris.

Historia Moralis in honorem Artis, ut inf. V. 406.

V. 406. Ne fortè.

Callidè, quasi Juveni indulgens, quem tamen reprimis.

Such are the principal notes, which the author of the Characteristics partly collected, and in greater part made on the writings of Horace. From these Notes (16) we are led to form a right idea of the Poet, taken not "from his precarious and low circumstances at Court, after the forfeiture of his Estate, under the Usurpation and conquest of Octavius, and the Ministry of a Mæcenæ;" but "from his better condition and nobler employments in earlier days, under the favour and friendship of greater and better men, whilst the Roman State and Liberty subsisted;" and from the latter part of his life, when wearied with the servility of dependence, and disgusted with the degeneracy of Epicurean Philosophy, he returned to that more severe and sublime System, which he plainly appears to have thought best calculated by its generous principles for the forming of an active Citizen, an accomplished Gentleman, a virtuous Man. The Poet's renunciation of Epicurean Errors, and firm though polite language with which he again asserts his freedom, inclines us to draw a veil over those years, wherein he could be induced to sacrifice his very sentiments to the opinions and practice of his Patron; a conduct this, which however it may be justified on considerations of mere worldly interest, yet must it ever appear culpable on the Principles of that Morality, which taught him to be resigned indeed to the ways of Providence, but to disdain base compliance for the sake of exterior advantages. But the more

grave, serious, and dignified sentiments of his later writings abundantly compensate the levity of some of his earlier Odes, and the time-serving maxims inculcated in some of his earlier Satires and Epistles. And the experience of a Man so thoroughly versed in the Manners of the World cannot fail of being instructive to us; for it will teach us, as we value the integrity and peace of our Minds, never to relinquish the ways of Rectitude for the fallacious allurements of Error, however great may be the emoluments, which may reward a dereliction of virtuous principle.

What the Poet was in his earlier and latter days, that the noble Critic uniformly continued to be through much too short a life. His principles were always on the side of liberty, and consequently, independent, benevolent, magnanimous: his knowledge of Ancient Writers, particularly of the Greek, was extensive and accurate: his Taste, formed on the model of Antiquity, was of course pure and refined. All these excellencies are discoverable, not less in the above Notes than in his edited works. Nor is it to be wondered at that he was so elegant a Scholar, so exact a Critic, so generous a Philosopher, since he devoted to Study and Meditation those hours, which too many dissipate in the pursuit of trifling engagements, illiberal amusements or irrational pleasures.

I am, Dear Sir, with the greatest regard,

Your most obliged,

OXFORD,
NEW COLLEGE,
Dec. 20, 1784.

and most affectionate friend,

G. J. HUNTINGFORD.

* [Since the article of the first Earl of Shaftesbury was printed off, an ingenious publication has appeared, entitled, "Essays, Philosophical, Historical, and Literary," in which are some strictures on Mr. Walpole's Catalogue of Royal and Noble Authors. Among other remarks, the Essayist observes, that of Mr. Walpole's short account of the famous Earl of Shaftesbury, much is exceptionable. Mr. Walpole, continues he, relates, upon the authority of Bishop Burnet, a ridiculous story of Shaftesbury's pretending that Cromwell offered to make him King. "If he did," says Mr. Walpole, "it only proves that Cromwell took him for a fool." But if Cromwell took Shaftesbury for a fool, it only proves that he made a most egregious blunder.—The abilities of Lord Shaftesbury were certainly of the first class, far above the reach of Burnet's comprehension." After comparing the Bishop's inability to account for the ascendancy which our eminent Statesman acquired over the persons with whom he was connected, to the Judges of the famous Leonora de Galigai, wife of Marshal D'Ancre, who at her Trial was interrogated by what magical powers she had gained so absolute an influence over the mind of Mary of Medicis, and who nobly replied, that she used no other powers than those which a strong mind naturally possesses over a weak one, the essay writer adds as follows: "When the portrait of so great a man as Lord Shaftesbury is delineated by so wretched a dauber as Burnet, we may expect to find it what in fact it is, miserably defective in drawing, colouring, and resemblance (*)." Though we think that Burnet was not a little mistaken in his representation of the Earl of Shaftesbury's character, we do not give our approbation to so severe a censure of that worthy and learned Prelate.] K.

*** [COOPER (SAMUEL), a Miniature Painter of distinguished excellence, was born in London, in the year 1609 (a). He was bred up, together with an elder brother, named Alexander [A], under the care of John Hoskins, his uncle [B], by whom he was initiated in the art of painting. He made so great a proficiency, that he soon excelled his master, who found that his nephew's performances were more admired than his own. He, therefore, took him into partnership with him; but the superior reputation which Cooper obtained, exciting some jealousy in his uncle, he dissolved the partnership (b). Cooper then set up for himself, and met with such encouragement as his uncommon merit deserved. He painted miniature portraits of King Charles II. and his Queen, the Duke of York, the Dukes of Cleveland, and most of the Court. But two pieces of his which were the most esteemed were those of Oliver Cromwell, and of one Swingfield. The latter picture was carried by Cooper to the Court of France, where it was much admired, and where he was employed to paint several pieces larger than his usual size, and for which his widow received a pension during her life (c). He travelled into Holland, as well as France, and is said to have been many years abroad (d). In the style of painting to which he addicted himself, he was superior to any of his contemporaries in his own country, and equal to the best artists of Italy. He had studied the works of Vandyke with great attention, and copied many of them, either to improve himself by imitating his manner, or at the desire of others who rewarded him for his labour. Accordingly he was sometimes called "the Vandyke in little," as he resembled that celebrated master in the beauty and clearness of his colouring, the agreeable turn of his heads, and the spirit and relief of his portraits (e). Mr. Walpole says, that 'Samuel Cooper owed great part of his merit to the works of Vandyke, and yet may be called an original genius, as he was the first who gave the strength and freedom of oil to miniature. Oliver's works are touched and re-touched with such careful fidelity, that you cannot help perceiving they are nature in the abstract; Cooper's are so bold, that they seem perfect nature only of a less standard. Magnify the former, they are still diminutively conceived: if a glass could expand Cooper's pictures to the size of Vandyke's, they would appear to have been painted for that proportion. If his portrait of Cromwell [C] could be so enlarged, I don't know but Vandyke would appear less great by the comparison (f).'

Notwithstanding the great merit of Cooper as an artist, his pencil was generally confined to a head only; for below that part his drawing was incorrect. But for a face, and its dependencies, the free and natural air of his heads, the strength, relief, and noble spirit, the softness and tender liveliness of flesh and blood, and the looseness and gentle management of the hair, he was so unrivalled, that his works sold for very high prices, and were in great estimation in France, and also at Rome and Venice, and in almost every part of Europe. Among other excellencies, for which his pieces were admired, was the variety of tints that he introduced, and the clearness of his carnations. Mr. Oldys says, 'It has been affirmed to me, that he would steal a face upon his nail, and remember the complexion, air, and all other distinguishments, so exactly, as to present any person with their portrait, who never knew they had sat to him for it (g).'

[A] An elder brother, named Alexander.] Mr. Pilkington says of Alexander Cooper, who was also instructed in the art of painting by his uncle Hoskins; that 'although he became a good artist in limning, yet he was in no degree of competition with his brother. He followed his profession in several cities of the Low Countries, and particularly at Amsterdam; from whence he was invited to Sweden, where he had the honour of being appointed Limner to Queen Christina. He also painted landscapes in water-colours extremely well, and was accounted to have a correct manner of drawing. (1)'

[B] Under the care of John Hoskins, his uncle.] Of this artist Mr. Walpole says, 'Hoskins, though surpassed by his scholar, the younger Cooper, was a very good painter. There is great truth and nature in his heads; but the carnations are too brick, and want a degradation and variety of tints. I have a head of Serjeant Maynard by him, boldly painted and in a manly style, though not without these faults; and another good one of Lord Falkland, more descriptive of his patriot melancholy

than the common prints. It was in the collection of Dr. Mead. There is, indeed, one work of Hoskins that may be called perfect. It is a head of a man, rather young, in the gown of a master of arts, and a red fatten waistcoat. The clearness of the colouring is equal to either Oliver; the dishevelled hair touched with exquisite freedom. It is in the possession of Mr. Fanshaw, but not known whose portrait (2).'

[C] His portrait of Cromwell.] Mr. Walpole says, 'This fine head is in the possession of the Lady Frankland, widow of Sir Thomas, a descendant of Cromwell. The body is unfinished. Vertue engraved it, as he did another, in profile, in the collection of the Duke of Devonshire (4).'

land, p. 114.

(k) In his MSS.

The works of Cooper are numerous. Mr. Walpole says, 'Seven or eight are in Queen Caroline's closet at Kensington; one of them, a head of a monk, is capital, but unfinished. Lord Oxford had a head of Archbishop Sheldon; and the bust of Lord Chancellor Shaftesbury, on his monument by Rysbrack, was taken from a picture of Cooper (i).' Mr. Oldys says (k), that he painted the Duke and Duchess of Monmouth, and most of the nobility and beauties of the Court; several of the most eminent artists of his own profession; together with Sir John Denham, and other celebrated wits of that age. Among the poems of Mrs. Katharine Philips, is one addressed to Cooper on his drawing her friend Lucasia's picture in 1660, in which are the following lines:

'A pencil from an angel newly caught,
'And colours in the morning's bosom sought,
'Would make no picture, if by you not wrought.
'But done by you, it does no more admit
'Of an encomium for the highest wit,
'Than that another hand should equal it (l).'

It may not be improper to mention, that Mr. Pope's mother was sister to Cooper's wife. Mr. Walpole says, 'Lord Carleton had a portrait of Cooper in crayons, which Mrs. Pope said was not very like, and which, descending to Lord Burlington, was given by his Lordship to Kent. It was painted by one Jackson, a relation of Cooper, of whom I know nothing more, and who, I suppose, drew another head of Cooper, in crayons, in Queen Caroline's closet, said to be painted by himself; but I find no account of his essays in that way.'—'I have a drawing of Pope's father, as he lay dead in his bed, by his brother-in-law Cooper. It was Mr. Pope's (m).' This was probably a drawing of Pope's grandfather; it could not be his father, who survived Cooper many years. If it was his father, it must have been done by some other hand.] T.

Bowyer, p. 273.

[COOPER (JOHN-GILBERT), a polite writer of the present age, was born in 1723; and was descended from an ancient family in the county of Nottingham, whose fortune was injured in the last century by their attachment to the principles of monarchy. He resided at Thurgarton Priory in Nottinghamshire (a), which was granted by King Henry VIII. to William Cooper, one of his ancestors. This mansion [A] Mr. Cooper inherited from his father, who, in 1739, was High-Sheriff of the county; and transmitted it to his son, who filled the same respectable office in 1783 (b). After passing through Westminster school under Dr. John Nicoll, along with the late Lord Albemarle, Lord Buckinghamshire, Major Johnson, Mr. Geo. Ashby, and many other eminent and ingenious men, he became in 1743 a Fellow-Commoner of Trinity-College, Cambridge, and resided there two or three years; but quitted the University on his marriage with Susanna the daughter of William Wrighte, Esq; son to the

[A] This mansion.] In 1726, when S. Buck took a view of it, it belonged to William Draper, Esq.

Lord

Lord Keeper of that name, and Recorder of Leicester 1729—1763 (c). In the year 1745 he commenced Author by the publication of "The Power of Harmony," a poem in 4to; and in 1746 and 1747 he produced several Essays and Poems under the signature of *Philalethes*, in a periodical work called "The Museum," published by Mr. Doddsley. On his eldest son, who was born July 25, 1749, and died the next day, Mr. Cooper wrote an elegant epitaph, which is placed in the Chancel of St. Margaret's Church in Leicester, and shall be transcribed below [B]. In the same year, he came forward as an author, with his name, by a work which received much assistance from his friend, the Rev. John Jackson of Leicester (d), who communicated several learned notes, in which he contrived to manifest his dislike to his formidable antagonist Mr. Warburton. It was intitled, "The Life of Socrates, collected from the Memorabilia of Xenophon and the Dialogues of Plato, and illustrated farther by Aristotle, Diodorus Siculus, Cicero, Proclus, Apuleius, Maximus Tyrius, Boethius, Diogenes Laërtius, Aulus Gellius, and others, 1749," 8vo. In this work Mr. Cooper gave evident marks of superior genius; warm, impetuous, and impatient of restraint. In such a disposition, we are not to wonder if he was sometimes led to speak without due deference of preceding writers, whom, not content with confuting, he lashes and spurns like a merciless exulting victor, thoughtless of the vicissitudes of war, and regardless how soon it might be his fortune to fall under the lash of critics as severe as himself [C]. Among these was Mr. Warburton (e), who then figured high in "the first ranks of learning; a man of vigorous faculties, a mind fervid and vehement, supplied by incessant and unlimited enquiry, with wonderful extent and variety of knowledge, which had not oppressed his imagination, nor clouded his perspicacity." In a note on the "Essay on Criticism," the learned Commentator thus takes occasion to introduce our author (f): "As Ignorance, when joined with Humility, produces stupid admiration, on which account it is so commonly observed to be the mother of Devotion and blind homage; so when joined with Vanity (as it always is in bad critics) it gives birth to every iniquity of impudent abuse and slander. See an example (for want of a better) in a late worthless and now forgotten thing, called the *Life of Socrates*; where the head of the Author (as a man of wit observed on reading the book) has just made a shift to do the office of a camera obscura, and represent things in an inverted order; himself above, and Sprat, Rollin, Voltaire, and every other author of reputation, below." This severe attack produced "Curfory Remarks on Mr. Warburton's new edition of Mr. Pope's Works, in a Letter to a Friend. By John Gilbert Cooper, Esq. Author of the Life of Socrates, 1751;" in which Mr. C. appeals to the impartial reader, "whether there is the least reflection through the whole Life of Socrates, or the notes, upon Mr. W's morals, and whether he has not confined his criticism to Mr. W's practice as an author?" and declares the epithet bestowed upon him by Mr. W. to be "a downright slander [D]." (1) Gent. Mag. 1778, p. 487, where it is facetiously and properly burlesqued and ridiculed.

[C] Critics as severe as himself.] Speaking of his own style, he says, "It is such in every place, as the subject seems to require, concise though circumstantial in the historical parts, diffused and declamatory in the recapitulation, and close and unaffected in the occasional reflections." As to his freedom with other writers, "Some expressions," says he, "may appear too harsh, and others too lufory; but all weapons are not to be used alike against all adversaries: for, as the antient warlike Scythians found, in the servile war, that whips more intimidated the army of slaves, that marched amongst them, than the sword, which had so often corrected the pride of nations;

so contumely and ridicule will avail against those who are lost to good manners, candour, and good sense, when the nobler methods of humanity, reason, and learning, would prove ineffectual. The sentiments of others, who write like men, are examined with the same spirit; and where the author is obliged to oppose their opinions, he does it with a proper respect due to their characters, always distinguishing between the designing deceits of the heart, and the involuntary errors of a misled understanding. He entered on the work," he adds, "with no small application, for his own instruction and amusement; and, after being carefully revised, it is now communicated with the honest design of making others partake in the same satisfaction this enquiry has already afforded him. If this desirable end cannot be obtained, he thinks it is paying a greater respect to mankind to confess, that the failure proceeds from deficiency of abilities, and not from the want of laudable endeavours.—Whatever failings the learned may observe, the author has reason to expect, since all he advances is intended for the promotion of good-manners, morality, and true religion, that they would, with the good-nature becoming such, candidly impute them to error, insisting strongly on the merit of his design, however little he may have in the execution of it."

[D] A downright slander.] "I have undergone (2)," says he, "young as I am, too many disappointments in life, to wonder much at many things which the mob of mankind call extraordinary; otherwise I might be surprised that almost a total retirement from the world would not shelter me from the injuries of it, especially too at an age when few have had any concerns with it. I thought I might have enjoyed an unenvied obscurity in the most undisturbed peace and

(2) Anecdotes of Bowyer, ut supra.

1754, Mr. Cooper published his "Letters on Taste," 8vo; an elegant little volume, on which no small share of his reputation is founded [E]; and, in 1755, "The Tomb of Shakspeare, a Vision," 4to; a decent performance, but in which there is more of wit and application than of nature or genius. In 1756 he assisted Mr. Moore, by writing some numbers of "The World;" and attempted to rouse the indignation of his countrymen against the Hessians, at that juncture brought over to defend the nation, in a poem called "The Genius of Britain," addressed to Mr. Pitt. In 1758, he published "Epistles to the Great, from Aristippus in Retirement," 4to; and "The Call of Aristippus, Epistle IV. to Mark Akenfide, M. D." Also, "A Father's Advice to his Son," in 4to. In the Annual Register of the same year is his Translation of "An Epistle from the King of Prussia to Monsieur Voltaire." In 1759, he published "Ver Vert; or, the Nunnery Parrot; an Heroic Poem, in Four Cantos; inscribed to the Abbess of D***; translated from the French of Monsieur Gresset," 4to; reprinted in the first volume of Dilly's "Repository, 1777;" and, in 1764, "Poems on several Subjects, by the Author of the Life of Socrates;" with a prefatory Advertisement by Mr. Doddsley [F]. In this little volume were included all the separate poetical pieces which have been already mentioned, excepting "Ver Vert," which is a sprightly composition. We have only to add to this short narrative, that Mr. Cooper was an active, useful magistrate; and that he died at his father's house in May-Fair, after a long and excruciating illness arising from the stone, April 14, 1769.] N.

* * [Though Mr. Gilbert Cooper does not stand very high in the rank of English writers, his abilities and his temporary celebrity were considerable enough to entitle him to a place in the Biographia. Besides, he was of a particular school of literature; and of such schools it is the intention of this work to give as full an account as possible. The school he belonged to was that of his namesake, Anthony Ashley Cooper, third Earl of Shaftesbury. That of this Author Mr. Gilbert Cooper was a most zealous admirer and imitator, is apparent from his works in general, and is acknowledged in several particular passages. Hence, likewise, he was devoted to other writers who embraced the sentimental philosophy, and especially to Hutcheson and Akenfide. His first production, the Life of Socrates, is not now held in much estimation. The most popular of his prose works were his Letters on Taste, which have gone through four editions. To the two last editions of them are added nine Essays, on various subjects. Perhaps Mr. Cooper is not very accurate in his definition of Taste, and the justness of his criticisms may sometimes be disputed. Nevertheless, the work is an agreeable one upon the whole, and will be read with pleasure by the lovers of polite literature. The admirers of simple and elegant poetry are not a little obliged

"tranquillity, and that CALUMNY was too busy
"about the names of those who were candidates for
"fame, to find time to visit the recesses of one, whose
"contempt of every advantage of life, but what con-
"duced to quiet, should, it was hoped, protect him
"from the poisonous breath of that daughter of
"ENVY. But I was greatly mistaken, it seems, in
"my humble expectations; for I had scarcely begun
"to feel the calm comforts which the absence of
"contention yields to a thinking creature, before I
"was informed by letters from some friends in town,
"that Mr. Warburton had, with his usual humanity
"and good manners, very compendiously answered
"the *Life of Socrates* in the tail of one note, by the
"free use of those appellations he has indiscrimi-
"nately thrown out upon, not only all those who
"have ever had any controversy with him, but upon
"all others too whom he ever suspected to have the
"rashness to contradict any of his opinions. How-
"soever this would have alarmed me heretofore, as
"an author, from the pen of any other person, it had
"no effect upon me then from the writer it came
"from; and I sat down contemptuously contented,
"without so much as being solicitous to know what
"abuse he had conferred upon my writings. I say,
"abuse, for he never speaks of an opponent without
"it. But as indifferent as I was about my charac-
"ter as a writer, I cannot say I was quite so easy
"when I was afterwards told that he had attacked
"it as a man. Upon this I wrote to him, that I
"thought he had used me very ill, and should take
"a proper notice of him for it in publick; in answer
"to which he tells a friend of mine, 'That he was
"surprised I should think myself ill-used, for that he
"had never mentioned my name or writings in pub-
"lic, or in conversation, but with honour, till I had
"wrote a book wherein I had treated him through-
"the whole with a scurrility worse than *Billingsgate*,
"and that he had now taken no other revenge than the
"casual mention of the Author of the *Life of Socra-*

tes (without the mention of my name) with a slight
"joke.' I will ask any impartial reader, if there is
"the least reflection through the whole *Life of Socra-*
"*tes*, or the notes, upon Mr. W's morals? whe-
"ther I have not confined my criticism to his prac-
"tice as an author? and whether every thing therein
"advanced cannot be proved over and over again by
"citations from the *Divine Legation*, and his other
"tracts? At the same time I desire one part of the
"dispute betwixt us may be finished by an answer to
"these questions: Is not calling a guiltless man an
"impudent slanderer, calumny? and quite a differ-
"ent revenge than a slight joke? and has not Mr.
"Warburton done that in the note in question (3)?" (3) Curfory Re-
"[E] *His reputation is founded.* On the first marks, p. 3—6.
appearance of these "Letters" it was acutely ob-
served by Dr. Johnson, "that Cooper's genius seemed
"to shine more in description than in definition; that
"he had more of imagery than of specula-
"tion; that his imagination was the strongest
"talent of his mind; and that, if he had not at-
"tempted to offer any thing new on the subject of
"Taste, he was always so entertaining, spirited, and
"splendid in his diction, that the reader who is not
"instructed by him, cannot fail of being pleased and
"diverted (4)."

[F] *Advertisement by Mr. Doddsley.* "The follow-
"ing Poems having been very favourably received
"by the Public when they first appeared, at different
"times, in detached pieces, the Author has been
"prevailed upon to permit me to collect them into
"this small volume. When I requested him to give
"me a preface, he replied, 'That to those to whom
"such trifles afforded pleasure, a formal introduction
"would be unnecessary; that he wrote most of them,
"when he was very young, for his own amusement,
"and published them afterwards for my profit; and,
"as they had once answered both those ends, he was
"very little solicitous what would be the fate of them
"for the future.'" N.

(4) Literary
Mag. 1757, p.
134.

obliged to the Author for bringing them acquainted with the Song to Winifreda [G] Of Mr. Cooper's poetical writings, the most pleasing are his "Epistles to his Friends in Town, from Aristippus in Retirement." They were written in imitation of some fashionable French writers, and particularly of Gresset. From these Epistles we shall insert below two passages; the first relative to our Author's temper of mind, and the second describing the character of his own poetry [H]. His next principal poetical work is his "Power of Harmony;" in two books. This we do not greatly admire. It is evidently composed in imitation of Akenfide's Pleasures of Imagination, without rising to the same merit; and it abounds with the sentiments of Shaftesbury, not very perspicuously expressed. Mr. Cooper was not destitute of fancy; but his fancy was not always under proper regulation, and he sometimes failed in the precision of his ideas. Another fault in him is a superabundance of prosopopeias, which is one of the tricks of modern poetry. His declaration

to

[G] *For bringing them acquainted with the Song to Winifreda.*] This beautiful song, though it hath made its way into several collections, our Readers will be glad to see here inserted.

"Away, let nought to love displeasing,
My WINIFREDA, move thy fear,
Let nought delay the heav'nly blessing,
Nor squeamish pride, nor gloomy care.

What tho' no grants of royal donors,
With pompous titles grace our blood,
We'll shine in more substantial honours,
And to be noble, we'll be good.

What tho' from fortune's lavish bounty,
No mighty treasures we possess,
We'll find within our pittance plenty,
And be content without excess.

Still shall each kind returning season,
Sufficient for our wishes give,
For we will live a life of reason,
And that's the only life to live.

Our name, whilst virtue thus we tender,
Shall sweetly sound where-e'er 'tis spoke,
And all the great ones much shall wonder,
How they admire such little folk.

Thro' youth and age in love excelling,
We'll hand in hand together tread,
Sweet smiling peace shall crown our dwelling,
And babes, sweet smiling babes, our bed.

How should I love the pretty creatures,
Whilst round my knees they fondly clung,
To see 'em look their mother's features,
To hear 'em hiss their mother's tongue!

And when with envy time transported
Shall think to rob us of our joys,
You'll in your girls again be courted,
And I go wooing in my boys (5)."

(5) Letters on
Taste, p. 91, 92.
fourth edit.

[H] *From these epistles we shall insert, &c.*] His own temper of mind he thus describes:

"I've oft, MELISSA, heard you say,
"The world observes I never wear
"An aspect gloomy or severe,
"That, constitutionally gay,
"Whether dark clouds obscure the sky,
"Or PHOEBUS gilds the face of day,
"In pleasure's true philosophy
"I pass the winged years away."
In most, 'tis true, the human sense
Is subjected to smiles, or tears,
To swelling pride, or trembling fears,
"By ev'ry skyey influence."
Cameleon-like their souls agree
With all they hear and all they see,
Or, as one instrument resounds,
Another's unison of sounds,
Their mutable complexions carry
The looks of anger, hope, and joy;
Just as the scenes around 'em vary,
Pleasures delight, or pains annoy.

Vol. IV.

But I, by philosophic mood,
Let the wise call it happy folly,
Educe from ev'ry evil good,
And rapture e'en from melancholy.
When in the silent midnight grove,
Sweet PHILOMELA swells her throat
With tremulous and plaintive note,
Expressive of disast'rous love,
I with the PENSIVE PLEASURES dwell,
And in their calm sequester'd cell,
Listen with rapturous delight
To the soft songster of the night.
Here ECHO, in her mossy cave,
Symphonious to the love-lorn song,
Warbles the vocal rocks among,
Whilst gently-trickling waters lave
The oak-fring'd mountain's hoary brow,
Whose streams, united in the vale,
O'er pebbled beds loquacious flow,
Tun'd to the sad melodious tale
In murmurs querulously flow.
And, whilst immers'd in thought I lie,
From ages past and realms unseen,
There moves before the mental eye
The pleasing melancholy scene
Of nymphs and youths unfortunate,
Whose fame shall spread from shore to shore,
Preserv'd by bards from death and fate,
Till time itself shall be no more.

Thus, not by black misanthropy
Impell'd, to caves or rocks I fly;
But when, by chance or humour led,
My wand'ring feet those regions tread,
Taught by philosophy so sweet
To shun the fellowship of care,
Far from the world I go to meet
Such pleasures as inhabit there.

With rebel-will I ne'er oppose
The current of my destiny,
But, pliant as the torrent flows,
Receive my course implicitly (6)."

(6) Poems on several Subjects,
p. 19—21.

Mr. Cooper characterizes his own Poetry in the following lines.

"But should you ask me, why I choose,
Of all the laurel'd sisterhood
Th' inhabitants of PINDUS' wood,
The least considerable muse.
The vi'lets round the mountain's feet,
Whose humble gems unheeded blow,
Are to the shepherd's smell more sweet
Than lofty cedars on its brow.
Let the loud EPIC sound th' alarms
Of dreadful war, and heroes sprung
From some immortal ancestry,
Clad in impenetrable arms
By VULCAN forg'd, my lyre is strung
With softer chords, my MUSE more free
Wanders thro' PINDUS' humbler ways
In amiable simplicity:
Unstudied are her artless lays,
She asks no laurel for her brows;
Careless of censure or of praise,
She haunts where tender myrtle grows;
Fonder of happiness than fame
To the proud bay prefers the rose,
Nor barter pleasure for a name.

Y y

On

to his Editor, Mr. Doddsley, that he was very little solicitous what would be the fate of his Poems for the future, was probably the result of affectation or disgust. It is well known to the writer of this addition to his life, that he was much disgusted on a particular occasion. He was, for some time, a constant attendant, and a frequent speaker, at the Society for the Encouragement of Arts, Manufactures, and Commerce*; and it was an object of ambition with him, to be chosen a Vice-president of that most respectable and useful Society. Not being elected, his dissatisfaction was so great, that I believe he never appeared there again. Mr. Cooper was a Gentleman of an agreeable appearance, of polite address, and accomplished manners. The great room of the Society now mentioned was for several years the place where many persons chose to try, or to display, their oratorical abilities. Dr. Goldsmith, I remember, made an attempt at a speech, but was obliged to sit down in confusion. I once heard Dr. Johnson speak there, upon a subject relative to mechanics, with a propriety, perspicuity, and energy which excited general admiration.] K.

* He was for a little while one of the Chairmen of the Committee of polite Arts.

On NATURE's lap reclin'd at ease,
I listen to her heav'nly tongue,
From her derive the pow'r to please,
From her receive th' harmonious time,
And what the goddess makes my song
In unpremeditated rhyme
Mellifluous flows, whilst young DESIRE,
Cull'd from th' ELYSIAN bloom of spring,
Strews flow'rs immortal round my lyre,
And FANCY's sportive children bring,

From blossom'd grove and lily mead,
Fresh fragrant chaplets for my head.
The most, tho' softest of the NINE,
EUTERPE, muse of gaiety
Queen of heart-soft'ning melody,
Allures my ear with notes divine.
In my retreat EUTERPE plays,
Where SCIENCE, garlanded with flow'rs,
Enraptur'd listens to her lays
Beneath the shade of myrtle bow'rs (7)."

COOTE (Sir CHARLES) a brave and active Officer in the seventeenth Century, created in 1660 Earl of Mountrath, was the eldest son of Sir Charles Coote [A], who was made a Baronet on the 2d of April 1621 (a). In Jan. 1641-2 he was besieged in Castle-Coote by twelve hundred Irish, but he valiantly raised the siege within a week. Not long after, he defeated Hugh O Connor and his forces: And on the 2d of March encountered Con O Rourk and his followers, who came to plunder Roscommon; took him prisoner, and killed most of his party. Afterwards he gave a total defeat to the rebels, who had formed a Camp at Kregs, and took all their baggage and provisions. He likewise got a considerable prey from about Ballynisslow; and in Easter-week relieved Athlone with some provisions and other necessaries (b). About the beginning of the year 1644, he was one of the Agents from the Irish Protestants, who attended King Charles I. at Oxford, in order to treat of a Peace between them and the Catholics in Ireland (c). In November 1646, having received some forces from England, he broke through the army of the Irish with a party, and caused them to draw farther off from Dublin, which they kept in a manner besieged (d). In May 1647, he gave them a great defeat, in which a thousand of them were slain (e). Soon after, he had several skirmishes with them, in which some of the leading Rebels were taken prisoners (f). In October the same year, joining his forces with those of Col. Jones and Col. Monk, they took several Castles and places from the Irish; and among the rest, Port Lester, and Athboy (g). About the end of the next year, marching with the forces he had assembled in Connought, from Sligo seventy miles into

(g) Page 275.

[A] Was the eldest son of Sir Charles Coote.] This Sir Charles Coote was a man of great consideration in Ireland. Upon the breaking out of the Irish rebellion, in 1641, he had a commission for a regiment of foot, and was made Governor of Dublin (1). On the 29th of November he relieved the castle of Wicklow, beat a thousand of the Irish, with their commander, Luke Toole, and put them to a shameful flight; whereby he became so terrible to the Irish, that they seldom made any resistance where he was (2). In December, the Lords of the Pale, in Ireland, accused him of having uttered, at the council-board, some speeches, tending to a purpose and resolution of executing a general massacre upon the Irish Roman Catholics: but the Lords Justices cleared him of that imputation (3). On the 15th of the same month he pillaged and burnt the village of Clantarfe, near Dublin (4). The 10th of April, 1642, he was sent with Sir Thomas Lucas, and six troops of horse, to relieve Bir, and some other places. They were to pass a causeway which the rebels had broken, and had cast up a ditch at the end of it; but Coote made thirty of his dragoons alight, and, in person, led them on, and beat off the Irish, with the slaughter of forty rebels and their captain, and then relieved the castles of Bir, Burrous, and Knocknemease; and having sat almost forty-eight hours on horseback, and lost and spoiled a hundred horse in this expedition, they returned to the camp on the eleventh, at night, without the loss of one man. And this was the pro-

(1) *The Irish Rebellion, &c.* by Sir John Temple, edit. 1646, 4to. P. ii. p. 3.

digious passage through Mountrath-woods, which indeed is wonderful in many respects, and therefore justly gave occasion for the title of Earl of Mountrath to be entailed upon the posterity of Sir Charles Coote, who was the chief commander in this expedition (5). Some time after he accompanied the Lord Lisle in relieving the castle of Geashill, and, at the council of war, told the rest, that if they made haste they might easily pass the defiles and causeways, before the enemy could assemble to oppose them: whereto another replied, that perhaps it might be so, but when the country was alarmed how should they get back? I protest, said Sir Charles Coote, I never thought of that in my life; I always considered how to do my business, and when that was done, I got home again as well as I could, and hitherto I have not missed of forcing my way: so they relieved that place, and besides took Philipstown and Trim; which last, three thousand Irish attempting to recover the next night, Sir Charles Coote routed them with a very few forces. But in this rencounter he had the misfortune of being shot to death; whether by the enemy, or by one of his own troopers, is uncertain (6). Besides his other offices and employments, he was one of the council to the Lords Justices of Ireland (7). He left several sons, namely, Sir Charles his eldest son and heir, created Earl of Mountrath; Richard, afterwards Baron of Colloony and Earl of Belamont; Chudleigh; Thomas (8).

into the Rebels county; after a little skirmish with them, he burned great store of their corn, and brought away a great booty (b). He also took Culmore fort (i). At his return, he apprehended Sir Robert Stuart, the King's Commander in those parts, and sent him into England with an Accusation against him. Upon which occasion, so well did the Parliament approve of his conduct, that they ordered care to be taken of his forces, and sent him a letter of thanks (k). In 1649 he did not meet with the same success: for he was straitly besieged in Londonderry [B] by such of the Irish as had declared for King Charles II. and they demanded he should depart the kingdom (l). But having some relief from England, he sallied out, and scoured the county for seven miles on all sides of the city, killing many, and taking several prisoners (m). After this, he concluded a peace with Major-general Owen Row O-neal, in order to preserve the garrison of Londonderry, and the English interest in those parts: which the Parliament highly approved of, and ordered him to be supplied with provisions and amunition (n). Accordingly, being supplied with them, and reinforced with a thousand foot, and five hundred horse, he marched into the country possessed by King Charles's friends, and having cleared all round Londonderry fourteen miles together, he brought great store of provisions into that city (o), and kept the field without any considerable opposition. In December, he routed about four thousand horse and foot, that came to the relief of Carrickfergus, then closely besieged by him, and slew fourteen hundred men; whereupon Carrickfergus surrendered (p). About the beginning of the year 1650, he marched towards Belfast, where he found no opposition, and settled that country (q). Then he reduced Castle-dover (r), and advanced towards Catherlough (s). In April, he reduced many small Forts near Carrickfergus, and took Inniskilling and some other places (t), whereby he became so formidable, that the Irish army in Ulster would not engage with him, though he took great booties from them (u). In June, he gave a great defeat to the Bishop of Clogher [C], who was advancing at the head of four thousand foot and six hundred horse, to hinder the junction of Sir Charles, and Colonel Venables (w). In September, he was at the siege of Athloné: and in May 1651, was sent to attend the motions of the Irish in Connaught (x). In June, he marched thirty miles in a day and night, in order to escape the Marquis of Clanrickard who endeavoured to intercept his passage; and joining the then Deputy of Ireland, they routed the united forces of the Marquis of Clanrickard and Earl of Castlehaven, killing and taking three thousand of them. Then he went, and sat down before Galloway (y). Soon after, advancing against the remains of the Marquis of Clanrickard's Forces, they abandoned several passes, and a castle of consequence (z); and he also took Maso-castle (a). In the beginning of the year 1652, he harrassed the Barony of Burren [D], which refused to pay him contributions (b). And on the 12th of May ensuing, Galloway surrendered to him, after a long and tedious siege. Whereupon, the Marquis of Clanrickard desired to enter into a Treaty with him, for putting a period to the war in Ireland, and establishing the repose of that Nation (c). In June he reduced Sligo (d): and in July marched against a party of the Royalists in Kerry [E]; whom having beaten from their fastnesses, and secured the passes by planting some garrisons, he so distressed them that they could no longer continue in a body; therefore they, and the Marquis of Clanrickard came in and submitted; and he had leave to transport himself with three thousand men to any foreign country in friendship with England, within the space of three months (e). To enable Sir Charles to carry on the war, he was one of the Commissioners of the taxes, excise, and customs, for Ulster (f). After Ireland was reduced

[B] For he was straitly besieged in Londonderry.]

During this siege, he agreed to supply the besiegers with powder, upon their engaging to furnish him with such provisions as he wanted; which was performed on both sides (g). This shows how little Sir Charles was afraid of the besiegers. But how greatly he was, and had been, distressed, for want of pay and provisions, is evident, from a paper of requests to Lieutenant-General Cromwell, wherein it was represented, in the name of Sir Charles Coote and his forces, that they, being three regiments of horse, and three of foot, had received but eight months pay in eight years, and a peck of oatmeal a week (10).

[C] In June he gave a great defeat to the Bishop of Clogher.] This battle was fought at Skirfolas, on the 21st of June (11); and, after an hour's hot dispute, with great resolution on both sides, the Irish were wholly routed. Many of them were killed upon the place, and the execution was ten or eleven miles every way that night (12): but, afterwards, the pursuit was continued farther than ever was heard of before, namely, above thirty miles. So that it was believed, that five hundred of all this army did not escape (13). But Sir Charles writes in a letter, that there were at least, in all, three thousand killed. The Bishop being taken, much wounded (14), was hanged the next

day, by order of the President, and his head set up on one of the gates of Londonderry; of which, but the year before, he had assisted Sir Charles Coote in raising the siege (15).

[D] He harrassed the Barony of Burren.] Mr. Whitelock informs us, that this Barony hath neither wood, water, nor earth enough to hang, drown, or bury a man (16).

[E] And in July he marched against a party of the Royalists in Kerry.] They had got together a body of about five thousand men, under the conduct of the Marquis of Clanrickard and Sir Phelim O'Neal, with which they had besieged and taken the fort of Ballishannon. Whereupon Sir Charles Coote and Colonel Venables drew out what forces they could, and advanced towards them with such expedition, that they were near the place before the enemy had notice of their march; who, finding themselves surprized, retreated to the bogs, leaving a small garrison in Ballishannon; but being pursued by the Parliament's forces, who killed and wounded about three hundred of them, (in which number were thirty officers) and took from them seven or eight thousand cows, on whose milk they chiefly subsisted; twelve hundred of them came in and laid down their arms; upon which the garrison they had placed in Ballishannon surrendered upon articles (17).

to

to the obedience of the Parliament, he was one of the Court of Justice in the province of Connaught (g); of which he was made President by Act of Parliament (h). Being in England at the time of the deposing of Richard Cromwell, he went post for Ireland, to carry the news of that great alteration to his brother Henry Cromwell, and to concert with him what to do in order to maintain themselves in their posts (i). At first he seemed to aim at nothing more, than to keep his Government in Connaught, and to have his Regiment of Foot, and troop of Horse, continued to him (k) [F]. But when he found that King Charles the Second's interest was likely to prevail, he endeavoured to insinuate himself into his favour. For that purpose, he sent over to the Marquis of Ormond, then at Brussels, one Sir Arthur Forbes, a Scottish Gentleman of good affection to the King, and good interest in the Province of Ulster, where he was an Officer of Horse, 'To assure his Majesty of Sir Charles's affection and duty; and that, if his Majesty would vouchsafe to come into Ireland, he was confident the whole kingdom would declare for him: that though the present power in England had removed all the sober men from the government of the State in Ireland, under the character of Presbyterians; and had put Ludlow, Corbet, and others of the King's judges in their places; yet they were generally so odious to the army as well as to the people, that they could seize upon their persons, and the very castle of Dublin, when they should judge it convenient.' However, the King not chusing to go to Ireland, dismissed Sir Arthur Forbes with such letters and commissions as he desired: who, upon his return to Ireland, found the state of affairs much altered since his departure (l). For Sir Charles Coote, and one or two more, so influenced the whole council of Officers, that they prevailed upon them to vote, Not to receive Col. Ludlow as Commander in Chief; and, besides, made themselves masters of Athlone, Drogheda, Limerick, Dublin, and other places for the service of the King (m). Then he sent to Col. Monk, to acquaint him with the progress he had made in securing Ireland; who was so pleased with it, that he caused the cannon at Berwick to be fired in testimony of his joy, and sent back the messenger with letters of thanks for the good service, desiring him and his friends not to restore the Commissioners of the Parliament, whom they had seized, to the exercise of their authority (n). Soon after, Sir Charles Coote, and some others sent to the Parliament a charge of high-treason, against Col. Ludlow, Col. John Jones, Col. Thomlinson, and Miles Corbet (o). But the opposite party resolved to seize him, and his friends: of which having notice, he mounted on horseback, and, attended by great numbers of people, rode about the streets of Dublin, and declared for a Free Parliament (p). He likewise made himself master of Dublin-Castle, and expelled Sir Hardress Waller from the command of the army (q). To recommend himself farther to the King, he apprehended John Coke, Chief Justice of Ireland, who had been Solicitor-General at the trial of King Charles I (r). Notwithstanding all that, the Rump thought themselves so

[F] *At first he seemed to aim at nothing more than to keep his government in Connaught, and to have his regiment of foot, and troop of horse continued to him.* Mr. Ludlow informs us, (if he is altogether to be credited) that he assured him of his endeavours, to have all those things confirmed to him by the Parliament, in hopes that he would employ them in the defence and preservation of that authority under which he had done so many great services, and from which he had received so many marks of favour. This Sir Charles promised to do, and added, that he was fully convinced that his interest was wholly involved in the preservation of the Parliament, all that he enjoyed being derived from their authority; and that as he had opposed the late King in his arbitrary designs, so he would continue to act in conformity to those actions, well knowing, that if the son should happen to prevail, the English interest would be lost in Ireland, and the Irish restored to the possession of their lands, according to an agreement passed between them. And this Sir Charles promised Ludlow he would do (18).

(18) Ludlow's Memoirs, &c. vol. ii. p. 704, 705.

* * [The character of Sir Charles Coote the elder, is drawn by Dr. Leland in a very unfavourable light. "Sir Charles Coote," says that historian, "was a soldier of fortune, trained in the wars of Elizabeth, morose, insolent, and cruel, provoked, particularly, by the ravages made in his estates, which he acquired by various projects, and impatient to revenge them on the Irish, against whom he had imbibed the most illiberal and inveterate prejudices. This man was employed by the chief governors to drive some of the insurgents of Leinster from the Castle of Wicklow, which they had invested. He executed his commission; repelled the Irish to their mountains; and, in revenge of their depredations, committed such unprovoked, such ruthless, and

"indiscriminate carnage in the town, as rivalled the utmost extravagancies of the northerners. The wanton cruelty, instead of terrifying, served to exasperate the rebels, and to provoke them to severe retaliation (19)."

Sir Charles Coote the younger, the subject of the present article, seems not to have been much more in Dr. Leland's favour. "Coote," says he, "and his father, had engaged in the parliamentary service, not from principle, but interest (20)." Perhaps the full truth of this assertion may be somewhat doubtful. For as the Cootes are understood to have been zealous Presbyterians, it is highly probable that they were influenced, in part, by their real sentiments, civil and religious, and especially by their aversion to popery.

(19) History of Ireland, vol. iii. p. 145, 146.

(20) Ibid. p. 404.

It was in one of Sir Charles Coote's expeditions, that a complete and authentic copy was found of that private Treaty of the Earl Glamorgan with the confederated Irish Roman Catholics, which excited so much noise at the time, and hath since been the object of so much discussion (21). The subject has been considered by us under the article of BIRCH.

(21) Ibid. p. 267.

When Sir Charles Coote determined to exert himself in promoting the restoration of King Charles the Second, he acted with all the zeal of a new convert. After the Convention and Council of Officers at Dublin had avowed their design of restoring his Majesty, one point only remained to be discussed, which was, whether they should stipulate for a confirmation of estates to the adventurers and soldiers, or whether they should restore him without any previous condition. This matter was warmly debated, and Lord Broghill was for proceeding with secrecy and caution. But Sir Charles Coote contended for submitting all their interests implicitly to the King; and his opinion at length prevailed (22).]

K. (22) Ibid. p. 407.

ture of him, that on the 5th of January 1659-60, they approved of what had been done by him and other Officers of the Army in Ireland for the service of the Parliament; and ordered, that the Thanks of the House should be given them for their good service, to be signed by the Speaker, and sealed with the Seal of the Parliament (s). On the 19th of the same month, they appointed him one of the Commissioners for the management of the affairs of Ireland (t). But, before those Commissioners declared for King Charles, they insisted upon several particulars relating to their interest as members of that nation (u). On the 6th of September 1660, Sir Charles Coote, on account of his many and great services for the Royal Cause, was created Baron and Viscount Coote, and Earl of Mountrath in the Queen's county in Ireland: and he was also appointed one of the Lords Justices of Ireland (w). But he did not long enjoy these honours, for he died the 18th of December 1661 (x). He was succeeded in honour and estate by Charles his son, the second Earl; ancestor of Charles-Henry, the seventh Earl of Mountrath.

* * [CORAM (THOMAS), a name which claims admittance in this Temple of British Worthies (a), as the Founder of a new species of public charity, was born about the year 1668; and, taking an early attachment to naval pursuits, spent the first part of his life as master of a vessel trading to the American Colonies. While he resided in that part of the metropolis which is the common residence of sea-faring people, business often obliging him to come early into the city, and return late, he had frequent occasions of seeing young children exposed, through the indigence or cruelty of their parents. This excited his compassion so far, that he projected the Foundling Hospital; in which humane design he laboured seventeen years, and at last, by his sole application, obtained in 1739 the royal charter for it. He was highly instrumental in promoting another good design, viz. the procuring a bounty upon naval stores imported from the Colonies; and was eminently concerned in setting on foot the Colonies of Georgia and Nova Scotia. A short specimen of his manner of applying for relief to those who were in distress shall be given below (b), in a letter to Sir Hans Sloane [A]. His last charitable design, which he lived to make some progress in, but not to complete, was a scheme for uniting the Indians in North America more closely to the British interest, by an establishment for the education of Indian girls. Indeed he spent a great part of his life in serving the public, and with so total a disregard to his private interest, that, towards the latter part of it, he was himself supported by a pension of somewhat more than an hundred pounds a year, raised for him, at the solicitation of Dr. Brocklesby [B] and Sir Sampson Gideon, by the voluntary subscriptions of public-spirited persons; at the head of whom was that truly amiable and benevolent prince, Frederic, late Prince of Wales.—This singular and memorable man died, at his lodgings near Leicester Square, March 29, 1751, in his 84th year; and was interred, pursuant to his desire, in the vault under the chapel of the Foundling Hospital, where the inscription transcribed below [C] perpetuates his memory, as Hogarth's portrait [D] has preserved his honest countenance.]

(b) Sloane's MS. 4041.

[A] To Sir Hans Sloane.]

HONOURED SIR, O^r. 28, 1744.
I request your favour to this pretty girl, who has long had a sore eye, and has not yet been able to obtain any relief for it. I humbly ask you pardon for this freedom.

I am, with the greatest respect,
Honoured Sir,
Your Honour's
most obedient Servant,

THOMAS CORAM."

[B] Dr. Brocklesby.] On the Doctor's applying to the good old man, to know whether his setting on foot a subscription for his benefit would not offend him, he received this noble answer: "I have not wasted the little wealth, of which I was formerly possessed, in self-indulgence or vain expences, and am not ashamed to confess that, in this my old age, I am poor (1)." Upon the death of Coram, this pension was continued to Leveridge, a worn-out singer at the Theatres, who, at the age of ninety, had scarce any other prospect than that of a parish subsistence.

[C] The inscription transcribed below.]

"Captain THOMAS CORAM,
whose Name will never want a Monument
so long as this Hospital shall subsist, was born about
the year 1668; a Man eminent in that most eminent
Virtue, the Love of Mankind;

little attentive to his private Fortune, and refusing
many Opportunities of increasing it, his Time and
Thoughts were continually employed in endeavours
to promote the public Happiness,

tance a prospect of the sea. It is thus described in "The Scandalizade," a satire published about the year 1749:

"Lo, old Captain Coram, so round in the face,
"And a pair of good chaps plump'd up in good case,
"His amiable locks hanging grey on each side
"To his double-breast coat o'er his shoulder so wide," &c (2).

(2) Biographical
Anecdotes of
Hogarth, p. 261.

(3) *Ibid.* p. 253.

A mezzotinto from this portrait, a three-quarters length, was published by Mac Ardell.—Hogarth, so early as 1739, had introduced the good old Captain in an engraved Power of Attorney from the Trustees of the Foundling Hospital to those gentlemen who were appointed to receive subscriptions towards the building (3). In this picture are seen several children of the Hospital; the boys with mathematical instruments, the girls with spinning-wheels. Over the door of the house they come out at, are the King's Arms. A porter is bringing in a child followed by Captain Coram, whose benevolent countenance is directed towards a kneeling woman.] N.

* * [The Editor cannot dismiss this article without mentioning a few particulars relative to the Foundling Hospital. For several years after its institution, it was an eminently popular object. Numbers of affluent persons were ardent to encourage it, and the Benefactions to the Hospital flowed in, in a very great abundance. It was at length taken under the direction of Parliament, and, from 1756 to 1759, annual and liberal grants were made for its support; in consequence of which children were poured in from every part of the kingdom. This circumstance, after some time, excited a general alarm. It was suggested, that the children, being cut off from all intercourse with their fathers and mothers, would, when they grew up, be aliens in their native land; without any visible obligations, and consequently without affections. It was farther suggested, that they might look upon themselves as a kind of independent beings in society; and that if they were permitted to increase as they had lately done, no one could tell what harm might ensue to the state, when there were such numbers who could scarcely be said to be connected with the body politic. Nay, it was asked, whether they might not, in time, rise like the slaves of Rome, and throw the kingdom into confusion (4)? Sentiments of this nature were first thrown out to the world by a Mr. Massie, a political writer of that period. In a pamphlet, entitled, "A Plan for the Establishment of Charity Houses for exposed or deserted Women and Girls, and for penitent Prostitutes," and which was printed in 1758, he introduced some observations concerning the Foundling Hospital, shewing the ill consequences of its receiving a public support. Afterwards, in 1759, he made a second attack upon the Hospital, in a Tract written solely for that purpose. In this Tract, the good

(4) Monthly Review, vol. xxii. p. 210. 212.

man's zeal upon the subject led him to several extravagancies and absurdities: but his general principles, concerning the evil that might arise from bringing up large multitudes of people who were not bound to society by the common ties of private and domestic affection, had a powerful influence on the public mind. The indiscriminate admission of infants into the Hospital was put a stop to; Parliamentary support was withdrawn; and the institution was left to be maintained by the generosity of individuals. Perhaps that generosity has too much abated. The Foundling Hospital doth not seem, at present, to be a favourite child of the public; and yet such a charity, properly restricted and regulated, comes recommended by many strong and affecting considerations. Mr. Jonas Hanway, whose philanthropy we need not celebrate, entered largely into the subject, and shewed that the Foundling Hospital was in itself an establishment of great importance, and that it only required to be duly modified and directed, in order to render it of real utility.

It is natural, on this occasion, to reflect on the influence of fashion, with regard to charitable institutions. Of late years, the zeal for the support of public Hospitals appears to have declined in a considerable degree. The Royal Foundations, though in part dependent on occasional benefactions and bequests, do, indeed, stand firm. Guy's Hospital, which was founded on the liberality of a single person, requires no adventitious aid. St. Luke's is rendered equally firm, by the noble legacies that have been left it, and the funds of which it is hence possessed. But other Hospitals, which principally rest on voluntary subscriptions, have not retained their former splendour. This has been particularly the case with respect to the St. George's, Westminster, and London Hospitals. The two former have received some temporary aids from the Musical Exhibitions; and St. George's Hospital, though an immediate sufferer, will hereafter revive, in consequence of a large reversion. It is to be apprehended, that the revival of the prosperity of the Westminster and London Hospitals is more doubtful and precarious. One source of some failure in the encouragement of these and other similar establishments, may be traced, perhaps, in the burthens and distresses of the late war. Another and more obvious cause is the institution of Dispensaries, of which there are said to be twenty-one, in and near the metropolis. That they are very useful, I have no intention to deny; and they would appear still more respectable, if they never were converted to particular interested purposes. But, though I am a sincere well-wisher to them, I cannot help regretting that any of the old noble establishments should be neglected. They are an honour to this country, and it would redound to the credit, as well as to the benefit of the public, to have them maintained in their original lustre. It is to be lamented, that fashion should ever have an undue sway in so excellent a thing as Charity.] K.

CORBET (RICHARD), Bishop of Norwich, and an excellent Poet, was son of Mr. Vincent Corbet [A], and born at Ewell in Surrey, towards the latter end of the sixteenth century, in the reign of Queen Elizabeth. He had his education in Westminster School, and thence was sent to Oxford in Lent Term 1597-8, where he was admitted a Student

[A] *He was son of Mr. Vincent Corbet.* Our author's filial piety put him upon immortalizing the memory and virtues of his father in an excellent elegy, which begins thus (1):

(1) See Poems, written by the Right Rev. Dr. Richard Corbet, late Lord Bishop of Norwich, London, 1672, p. 31.

Vincent Corbet, farther known
By Pointer's name than by his own,
Here lies engaged, till the day
Of raising bones, and quick'ning clay.

That gentleman's character is beautifully drawn in the following lines:

Years he liv'd were near fourscore;
But, count his virtues, he liv'd more:
And number him by doing good,
He liv'd the age before the flood.

Again;

Simple he was, and withal
His purse not base nor prodigal;
Poorer in substance than in friends,
Future and public were his ends.
His conscience, like his diet, such
As neither took, nor left, too much.
So the made laws needful grown
To him, he needed but his own.

The elegy ends with this turn:

Read then, and mourn, whate'er thou art
That dost hope to have a part
In honest epitaphs; lest being dead,
Thy life be written, and not read.

[B] *He*

Student of Christ-Church. In 1605, he took the degree of Master of Arts, being at that time esteemed one of the most celebrated Wits of the University. Afterwards entering into Holy Orders, he became an eminent Preacher, and was much followed by persons of taste and learning. His wit and eloquence recommended him to the favour of King James I. who made him one of his Chaplains in Ordinary; and, in 1620, promoted him to the Deanery of Christ-Church; about which time he was Doctor in Divinity, Vicar of Casington near Woodstock in Oxfordshire, and Prebendary of Bedminster-Secunda in the Church of Sarum (a). He made verses, whilst Dean of Christ-Church, on a play acted before the King at Woodstock [B]. He was elected, the 30th of July 1629, Bishop of Oxford, in the room of Dr. Howson translated to the See of Durham; was consecrated the 19th of October, and installed the 3d of November following. Lastly, upon the translation of Doctor White to Ely, he was elected Bishop of Norwich, the 7th of April 1632; and received the Temporalities, the 12th of May following (b). This Prelate married Alice the daughter of Dr. Leonard Hutten, Vicar of Flower in Northamptonshire (c) [C], by whom he had a son named after his grandfather *Vincent* [D]. In his younger years, he wrote several pieces of poetry [E], without any intention of their being made public (d);

(a) Wood, Ath. Oxon. vol. i. col. 600, 601.

(b) *Id. ibid.*

(c) *Ibid.* col. 571.

(d) *Id. ubi supra*, col. 601.

and

[B] *He made verses on a play acted before the King at Woodstock.* The play was called *Technogamia*: or, *The Marriage of Arts*, and was written by Barten Holiday, the Poet. The ill success it met with in the representation, occasioned several copies of verses; among which, to use Anthony Wood's words (3), 'Corbet, Dean of Christ-Church, put in for one, who had that day preached (as it seems) before the King, with his band starched clean; for which he was reproved by the graver sort, but those who knew him well took no notice of it, for they have several times said, that he loved to the last boys play very well.'

(3) Ath. Oxon. vol. ii. col. 260.

[C] *He married Alice, the daughter of Dr. Leonard Hutten, Vicar of Flower, in Northamptonshire.* He mentions that village in his *Iter Boreale*.

Here we paid thanks, and parted, and at night
Had entertainment, all in one man's right,
At Flow're, a village, where our tenant she,
Sharp as a winter morning, fierce, yet free, &c (4).

(4) Poems, &c. p. 2.

It is not improbable, that our author's acquaintance with Dr. Hutten might take its rise from that *North-ern-Trip*, and that he might then have had the first sight of the Doctor's daughter, whom he afterwards married.

[D] *He had a son named Vincent.* Our author's Muse obeyed the dictates of paternal affection no less than of filial piety; for as he wrote an elegy on his own father, so he addressed the following verses, fraught with the best and kindest wishes, to his son.

What I shall leave thee none can tell,
But all shall say, I wish thee well.
I wish thee, *Vin*, before all wealth,
Both bodily and ghostly health:
Nor too much wealth, nor wit, come to thee;
So much of either might undo thee.
I wish thee learning, not for show,
Enough for to instruct, and know;
Not such as gentlemen require,
To prate at table, or at fire.
I wish thee all thy mother's graces,
Thy father's fortunes, and his places.
I wish thee friends, and one at court,
Not to build on, but to support;
To keep thee, not in doing many
Oppressions, but from suffering any.
I wish thee peace in all thy ways,
Nor lazy, nor contentious days;
And when thy soul and body part,
As innocent as now thou art (5).

(5) Page 35.

I conjecture, from the last line, that *Vin* was very young when his father wrote these.

[E] *He wrote several pieces of poetry.* A collection of them was published, under the title of *Poetica Stromata*, in octavo, London, 1647-8 (6). There is another edition of them in a thin *duodecimo*, London, 1672, dedicated to Sir Edmund Bacon, of Redgrave-Hall, in Suffolk, Baronet. The Editor tells his patron, that the most pious of the Clergy have made use of the innocent art of poetry, not only for their pleasant

(6) Wood *ubi supra*, vol. i. col. 601.

diversion, but their most fervent devotion. After the dedication follows an *advertisement*, in which we are told, that 'Upon reprinting these poems, diligent search was made to perfect them, which were very imperfectly printed before;' and that, 'though in this edition there be but few new poems, yet we may find many of them more perfect than before; for in some there are six, in others four, and in many two lines added out of perfecter copies, which were left out in the former impression.' Besides what has been already cited, I shall give the curious reader a farther specimen of Bishop Corbet's poetical genius, as his works are in but few hands. In his *Iter Boreale*, or *Journey Northward*, he has the following humorous description of a Serjeant.

I'th' interim comes a most officious drudge,
His face and gown draw'd out with the same budge.
His pendent pouch, which was both large and wide,
Look'd like a letters-patents by his side.
He was as awful, as he had been sent
From Moses with the eleventh commandment (7).

(7) Poems, &c. p. 3.

In the same poem we meet with a fine moral reflection upon the burial-place of King Richard III. and Cardinal Wolsey, who were both interred at Leicester.

Is not usurping Richard buried here,
That King of Hate, and therefore slave of fear;
Dragg'd from the fatal Bosworth-field, where he
Lost life, and, what he liv'd for, cruelty?
Search, find his name; but there is none: O Kings,
Remember whence your pow'r and vastness springs;
If not as Richard now, so may you be,
Who hath no tomb, but scorn and memory.
And tho' from his own store Wolsey might have
A palace*, or a college†, for his grave,
Yet here he lies interr'd, as if that all
Of him to be remembered were his fall.
Nothing but earth on earth, no pompous weight
Upon him, but a pebble or a quoit.
If thou art thus neglected, what shall we||
Hope after death, that are but shreds of thee (8)?

(*) Whitehall.
(†) Christ-church.

(||) Students of Christ-church.
(8) Page 6, 7.

The host's pointing out the disposition of the two armies in Bosworth-field affords a very humorous and entertaining picture.

Mine Host was full of ale and history,
And on the morrow when he brought us nigh
Where the two roses joined, you wou'd suppose
Chaucer ne're writ the Romant of the Rose.
Hear him: see ye yon woods? there Richard lay
With his whole army: look the other way.
And lo! where Richmond in a bed of grosse
Encamp'd himself o're night with all his force.
Upon this hill they met. Why, he could tell
The inch where Richmond stood, where Richard fell.
Besides what of his knowledge he could say,
He had authentic notice from the play:
Which I might guess by's mustering up the ghosts,
And policies, not incident to hosts:

But

40.

and he was one of those celebrated persons, who, with Ben Jonson, Sir John Harrington, Dr. Donne, Michael Drayton, and others, wrote Mock-Commendatory verses on Tom Coryate's *Crudities* (e). He concurred likewise with other Poets of the University in inviting the celebrated Ben Jonson to Oxford, where that Poet was created Master of Arts (f). There is extant in the *Musæum Ashmoleanum* (g) a Funeral Oration in Latin, by Dr. Corbet, on the death of Prince Henry, A.D. 1612. This learned and ingenious Prelate died in the year 1635, and was buried at the upper end of the Choir of the Cathedral Church of Norwich [F]. He was very hospitable, and always a generous encourager of public designs; and particularly, when St. Paul's Cathedral was repaired, in the year 1634, he not only contributed largely himself, but was very diligent in procuring contributions from others (b). I know not why Anthony Wood says, *he was consecrated Bishop of Oxford, though in some respects unworthy of such an office* (i), unless it be that he thought the character of a Poet inconsistent with that of a Bishop. It appears by our Author's

But chiefly by that one perspicuous thing,
Where he mistook a player for a King;
For when he wou'd have said, King Richard died,
And call'd a horse, a horse, he *Burbage* cry'd (9).

Our author appears to have had an excellent genius for *Panegyric*, by the following lines, which are part of an *elegy on the late Lord William Howard, Baron of Effingham, who died the 10th of December 1615*.

What did he? Acts of mercy, and refrain
Oppression in himself, and in his train?
Was his essential table full as free
As boasts and invitations used to be;
Where if his Ruffet-friend did chance to dine,
Whether his Satten-man wou'd fill him wine?—
Did he seek regular pleasures? was he known
Just husband of one wife, and she his own?
Did he give freely without pause or doubt,
And read petitions e're they were worn out?—
Did he attend the court for no man's fall?
Wore he the ruin of no hospital?
And when he did his rich apparel don,
Put he no widow, nor an orphan on?
Did he love simple virtue for the thing?
The King for no respect but for the King?
But above all, did his religion wait
Upon God's throne, or on the chair of state?
He that is guilty of no *Quære* here,
Out-lasts his epitaph, out-lives his heir.

And a few lines farther;

And therefore I am angry, when a name
Comes to upbraid the world like *Effingham*.
Nor was it modest in thee to depart
To thy eternal home, where now thou art,
E're thy reproach was ready; or to die,
E're custom had prepar'd thy calumny.
Eight days are past since thou hast paid thy debt
To Sin, and not a libel stirring yet;
Courtiers, that scoff by patent, silent sit,
And have no use of slander, or of wit:
But, which is monstrous, tho' against the tide,
The water-men have neither rail'd nor ly'd.
Of good or bad there's no distinction known,
For in thy praise the good and bad are one (10).

Nor was his talent for *Satire* less extraordinary, as appears by his verses upon Mrs. Mallet, an unbandsome gentlewoman that made love unto him.

Have I renounc'd my faith? or basely sold
Salvation, or my loyalty for gold?
Have I some foreign practice undertook,
By poison, shot, sharp knife, or sharper look,
To kill my King? Have I betray'd the state
To fire or fury, or some newer fate,
Which learned murtherers, those grand destinies,
The Jesuits, have nurs'd? If of all these
I guilty am, proceed, I am content
That *Mallet* take me for my punishment.
For never sin was of so high a rate,
But one night's Hell with her might expiate.

Again;

Whether her wit, form, talk, smile, fire, I name,
Each is a stock of tyranny and shame.

But for her breath, spectators, come not nigh,
That lays about, God bless the company.
The man in a bear's skin, bated to death,
Wou'd chuse the dogs much rather than her breath.
One kiss of her's, and eighteen words alone,
Puts down the Spanish Inquisition.

He concludes with these lines:

No Tyger's like her, she feeds upon man,
Worse than a Tygers or a Leopard can.
Let me go pray, and think upon some spell,
At once to bid the devil and her farewell (11).

(11) P. 44, 45,
46.

Our author's *Epigrammatic* turn may be seen in the following tetrastick on Henry Bolings.

If gentleness cou'd tame the fates, or wit
Deliver man, Bolings had not dy'd yet:
But one, which over us in judgment sits,
Doth say, our sins are stronger than our wits (12).

(12) Page 38.

And in those verses, *On the birth of the young Prince Charles*.

When private men get sons, they get a spoon,
Without eclipse, or any star at noon.

When Kings get sons, they get withal supplies,
And succours far beyond all subsidies.
Welcome God's loan, thou tribute to the state,
Thou money newly coin'd, thou fleet of plate;
Thrice happy child, whom God thy father sent,
To make him rich without a parliament (13).

(13) Page 108.

I shall only add here the following sensible and witty reflection in his *Elegy upon the death of Queen Anne*.

Know henceforth, that grief's vital part
Consists in nature, not in art;
And verses that are studied,
Mourn for themselves, not for the dead (14).

(14) Page 128.

These extracts may serve to give the reader a taste of an author, who is but little known at present, and whose works are not easily to be met with.

[F] *He was buried—in the Cathedral Church of Norwich.* Soon after, a large freestone, of a sandy colour, was laid over his grave, and the following inscription, engraven on a plate of brass, was fastened thereon.

Richardus Corbet Theologiæ Doctor, Ecclesiæ Cathedralis Christi Oxoniensis primum Alumnus, inde Decanus, exinde Episcopus, illinc huc translatus, et hinc in cælum, Julii 28, an. 1635.

In English.

‘ Richard Corbet, Doctor of Divinity, first student, then Dean, of Christ-Church, in Oxford, and next Bishop of that See; from thence translated hither, and from hence to Heaven, July 28, 1635.

On the said stone are the antient arms of the Corbets, of Shropshire, viz. Or, a raven passant *fab.* (15).

(15) Wood, *ubi supra*.

[G] *He*

Author's Poems, that, at some time or other of his life, he took a journey to Paris [G]. I shall subjoin some manuscript verses in honour of Bishop Corbet [H].

[G] *He took a journey to Paris.* I cannot forbear giving the reader one more sample of Bishop Corbet's wit, out of the ballad he made on that journey. It is a ridicule on the superstitious veneration of the Roman Catholics for relics, and the many forgeries practised in that respect.

Then to *St. Dennis* fast we came,
To see the sights of *Notre Dame*;
The man that shews 'em snaffles;
Where, who is apt for to believe,
May see our lady's right-arm sleeve,
And eke her old pantoffles;

Her breast, her milk, her very gown
That she did wear in *Bethlem town*,
When in the inn she lay:
Yet all the world knows that's a fable;
For so good cloaths ne're lay in stable
Upon a lock of hay.

No Carpenter cou'd by his trade
Gain so much coin as to have made
A gown of so rich stuff;
Yet they, poor fools, think for their credit
They may believe old *Joseph* did it,
'Cause he deserv'd enough.

There is one of the cross's nails,
Which who so sees his bonnet vails,
And, if he will, may kneel:
Some say 'twas false, 'twas never so;
Yet feeling it, thus much I know,
It is as true as steel.

There is a lanthorn, which the Jews,
When *Judas* led them forth, did use;
It weighs my weight downright:
But to believe it, you must think,
The Jews did put a candle in't,
And then 'twas very light (16).

(16) Poems, &c.
p. 129.

* * [CORYATE (THOMAS), a writer who possessed no inconsiderable share of learning, but with a small portion of common sense, was the son of George [A] Coryate, Rector of Odcombe, in the county of Somerset, by Gertrude his wife. His family was a very respectable one, being related to the Earl of Essex in the fourth degree, but whether on the father or mother's side we are not informed (a). He was born at Odcombe in the year 1577 (b), and received part of his education at Winchester School (c), whence he was removed to Oxford, where, in the year 1596, at the age of nineteen years, he became a Commoner of Gloucester Hall. Here he continued three years, and attained, by the help

(b) Athen. Oxon.
422.

[A] *Was the son of George Coryate.* George Coryate was born in the parish of St. Thomas, within the city of Salisbury. He received his education at Winchester School, and in the year 1562 was admitted perpetual Fellow of New College, Oxford (1). In the year 1566, on Queen Elizabeth's visiting the University, he, together with W. Reynolds, Bachelor of Arts, received her Majesty and her train at New College; on which occasion he pronounced an Oration, for which he received great praises and a handsome purse of gold (2). He afterwards took his degree in Arts, and, in June 1570, became Rector of Odcombe on the death of Thomas Reade, and sometime after Bachelor of Divinity (3). In the year 1594, he was appointed Prebendary of Warthill, in the Cathedral Church of York, and also held some other dignity, but what we are not informed (4). He died at the Parsonage-House at Odcombe, on the fourth of March 1606. It is asserted that his son, agreeably to the madness of his character, entertained a design of preserving his body from stench and putrefaction, and with that view caused it to be kept above ground until the 14th of April following, when it was buried in the Chancel of the Church of Odcombe, by his successor Gibbs Gallop, M. A. who had formerly belonged to Gloucester Hall (5). This George Coryate was a person much commended in his time for his fine fancy in Latin poetry; and for certain pieces which he had written was honourably

[H] *Some manuscript verses in honour of Bishop Corbet.* I found them in a blank leaf of his poems.

In flowing wit, if verses writ with ease,
If learning, void of pedantry, can please;
If much good humour, join'd to solid sense,
And mirth accompanied with innocence,
Can give a poet a just right to fame,
Then CORBET may immortal honour claim:
For he these virtues had, and in his lines
Poetic and heroic spirit shines;
Tho' bright, yet solid, pleasant, but not rude,
With wit and wisdom equally indu'd.
Be silent, Muse, thy praises are too faint:
Thou want'st a pow'r this prodigy to paint,
At once a poet, prelate, and a saint. J. C.

B.

* * [The extracts from Bishop Corbet's Poems, shew him to have been a man of ingenuity, wit, and humour, and that he was capable of excelling either in panegyric or satire. But there is one instance in which his satirical vein was displayed, that must be condemned. We mean his verses upon Mrs. Mallet, an unbandsome Gentlewoman that made love to him. The Lady, no doubt, was very ordinary and disagreeable; and Corbet, if he did not like her, was under no obligation to comply with her proposals of marriage. But surely her affection did not merit so cruel a return. The punishment was far beyond the crime, if there be a crime at all in an ugly woman's falling in love; for lines more severe can scarcely be met with in any satire that exists in the English language. Perhaps the manners of the age, which might be less offended than ours at a harshness of sentiment and expression, may furnish some excuse for Dr. Corbet. At present, such verses, upon such an occasion, would be deemed equally contrary to politeness and humanity.] K.

quoted by several eminent writers (6). The only pieces Mr. Wood had seen of his composition were, 1. "Poemata varia Latina," London 1611, quarto, published by his son after his death, and by him intitled "Posthuma fragmenta Poematum Georgii Coryate." 2. "Descriptio Angliæ Scotiæ et Hiiberniæ," written in Latin verse, and dedicated to Queen Elizabeth (7). It is not said whether this piece was ever printed. In the year 1763 was published, from a MS. found amongst the papers belonging to a considerable family in one of the western counties, a Latin Poem, which appears to have been written in the reign of Queen Elizabeth, intitled, "Descriptio Angliæ et Descriptio Londini," being two Poems in Latin verse, supposed to be written in the 15th century (8). This pamphlet is imagined to be part of the Poem noticed by Mr. Wood. The mention of only fifteen Colleges at Oxford, fixes the date of the verses before the year 1571. Besides this his son, George Coryate had two other children, both daughters, by his wife Gertrude (9). She outlived her husband and son many years. Her residence continued to be at Odcombe or near it until her death. Dr. Humphy Hody, a native of that place, informed Mr. Wood, that she was buried near the remains of her husband on the 3d of April 1645 (10). It appears that after her husband's death she married a second time (11).

of a great memory, to some competency in Logic, but more by far in the Greek tongue and human learning. He seems to have left Oxford without taking any degree [B]; and it is probable that thence he returned home, as we find him at Odcombe in the year 1606 (d). In that year he assembled his neighbours on Whitsunday, and with them went in cavalcade to Ewill, where he made an Oration at the Cross, to the people of the town, and about two thousand more who came from many places in the neighbourhood. His design in this proceeding, he says, was to draw a great company to Odcombe for the benefit of the Church, the whole stock of which had been expended. He also made another Oration to the same people on their coming to Odcombe (e). As his father died soon after, perhaps on that event he came up to London, where he was received into the family of Henry, Prince of Wales, who allowed him a pension (f) and kept him as a servant [C]. Until this time he lived in obscurity; but now he fell into the company of wits, who, as one of his Biographers (g) remarks, finding him little better than a fool in many respects, made him their whetstone, and so he became *notus nimis omnibus*. In the beginning of the year 1608, he commenced his travels through Europe. On the 14th of May, he embarked at Dover, and the same day arrived at Calais, where, after a short stay, he proceeded to Paris, and reached that city (h) on the twenty-second of the same month. Through the whole course of his travels, his residence at any place (excepting Venice) was confined to a few days. He remained at Paris only until the 28th of that month; but in that time visited St. Denis, and which he most desired above all other things, and oftentimes wished for before he saw the city, he enjoyed the sight and company of Isaac Casaubon, with whom he had much familiar conversation, at his house near St. German's Gate within the city. "I found him, says he, very affable and courteous and learned in his discourses, and by so much the more willing to give me entertainment by how much the more I made relation to him of his learned works (i). From Paris he proceeded to Lyons, at which place he arrived on the 3d of June. He stayed there two whole days; during which time he chanced to fall into company with a Turk (one of the train of M. de Breves, the French Ambassador at Constantinople) "a notable companion and a great scholler in his kinde; for he spake six or seven languages besides the Latin, which he spake very well: he was borne in Constantinople. I had a long discourse with him in Latin of many things, and amongst other questions I asked him whether he were ever baptized; he tolde me, no, and said he never would be. After that wee fell into speeches of Christ, whom he acknowledged for a great Prophet, but not for the Sonne of God; affirming that neither he nor any of his country-men would worship him, but the onely true God, Creator of heaven and earth: and called us Christians, Idolaters, because we worshipped images; a most memorable speech if it be properly applied to those kind of Christians which deserve that imputation of idolatry. At last I fell into some vehement argumentations with him in defence of Christ; whereupon being unwilling to answer me, he suddenly flung out of my company (k)." Coryate quitted Lyons on the 6th of June, and on the 11th ascended Mount Senis. On the 12th he arrived at Turin, where he found so great a distemperature in his body, by drinking the sweet wines of Piedmont, that it caused a grievous inflammation in his hands and face (l). His illness, however, did not prevent him from continuing his journey. He left Turin on the 13th, and two days after came to Milan, where he stayed only one day. His next stage was to the city of Lodi, at which place arriving too late, he could not obtain entrance into the town, but was obliged to repose that night in the coach he rode thither in (m). On the evening of the 20th he arrived at Padua, where he was informed of a very extraordinary custom which discharged persons in debt from the obligation of payment (n); a custom which, had it not been noticed by a less hasty and more informed traveller (o), might have been suspected for an imposition by some one who had discovered the credulity of Coryate's disposition. In this city he saw Livy's house, of which he gives a long description (p): and here also in the Church of St. Anthony he observed a monument, which "made me even lament, says he (q), being that" of a certain English Nobleman, "namely, Edward Courteney, Earle of Devonshire, who was buried there in the time of Queen Mary; he died there in his youth, and was the sonne of Henry, Earle of Devonshire, and Marquisse of Exceter, who was beheaded by Queen Mary. Truly it strooke great compassion and remorse in me to see an Englishman so ignobly buried. For his body lieth in a poore wooden coffin, placed upon another faire monument, having neither Epitaph

[B] *Without taking any degree.* His friend Lawrence Whitaker, in a note to some verses (12), says, he proceeded a Cæsarian Doctor, at the University of Royston. To what this alludes may be difficult to discover at so great a distance of time; probably some court merriment. It was at Royston, where King James frequently resided, that Coryate made an Oration (13) on presenting to him a copy of his *Crudities*. He is also styled Doctor by Anthony Washbourne, in another copy of verses (14).

[C] *And kept him as a servant.* It is not known

when, nor by whose means, he came to be noticed by Prince Henry; but as his name does not occur in either of the Lists of that Prince's Household, at the settlement of it in the years 1603 or 1610 (15), it is to be presumed he was retained only for the purpose of creating mirth. "Sweetmeats and Coryate made up the last course at all entertainments. Indeed he was the Courtiers anvil to try their wits upon, and sometimes this anvil returned the hammers as hard knocks as he received, his bluntness repaying their abuse (16)."

"nor

"nor any other thing to preserve it from oblivion, so that I could not have known it for
 "an Englishman's coffin, except an English gentleman, my kinde friend, Mr. George
 "Rooke, of whom I have before spoken, had told me of it and shewed me the same [D]." He remained at Padua three days. On leaving it he proceeded to Venice, where he arrived on the 24th. Of this place he speaks with the utmost rapture: "it yieldeth," says he, "the most glorious and heavenly shew upon the water that ever any mortal eye beheld; such a shew as did ravish me with delight and admiration (r)." Here he resided six weeks, which he declares to have been the sweetest time for so much he ever spent in his life (s) [E]. As at Lyons he entered into a dispute with a Turk on the Truth of the Christian Religion, so here he engaged in another with a Jewish Rabbin, whom he endeavoured to convert; but as the event of this controversy had nearly terminated in a very serious manner, we shall relate it in his own words. "After there had passed many vehement speeches to and fro betwixt us, it happened that some forty or fifty Jews more flocked about me, and some of them beganne very insolently to swagger with me because I durst reprehend their religion. Whereupon, fearing least they would have offered me some violence, I withdrew myself by little and little towards the bridge, at the entrance into the Ghetto, with an intent to flee from them; but by good fortune our noble Ambassador, Sir Henry Wotton, passing under the bridge in his gondola at that very time, espied me somewhat earnestly bickering with them; and so incontinently sent unto me out of his boate one of his principal gentlemen, Master Belford his Secretary, who conveyed mee safely from these unchristian miscreants, which perhaps would have given me just occasion to forswear any more comming to the Ghetto (t)." We also find him visiting a Courtezan with a design of converting her; and it must be owned he gives a very entertaining account of the manners of these people. Indeed, whatever censure any other parts of his travels are liable to, his description of Venice, and the manners and customs of the people, may be perused with much satisfaction by those who wish to be acquainted with the particular modes of living in different ages and nations; his account, though prolix, being always to be depended on for its veracity, and in this instance being calculated to afford much information. He departed from Venice the 8th of August, and passing through Padua, Vicenza, and Verona, on the 14th arrived at Brixia, where happening to be present at the dedication of a new image of the Virgin Mary, he found himself tempted to purloin a little waxen idol, in which he succeeded, and brought it away undiscovered (u). His next stage was to Bergamo, where he was constrained to repose in a stable among horses; and this vile lodging he with difficulty obtained, being obliged for it to the curtesy of an Italian Priest, who was shot the same night by a Bravo (w). Intending to go through the Grisons country into Germany, he repaired to a monastery in order to obtain some information for his conduct in his journey. He was received in a friendly manner by the Monks, who recommended him to a Dominican Friar, from whom he obtained the necessary instructions; and among others was particularly warned to avoid a certain Castle seated on the Lake of Como, which was then garrisoned by the Spaniards, who might possibly seize and imprison him being an Englishman (x). On the 18th he left Bergamo, and on the 26th arrived at Zurich, where he was introduced to Henry Bullinger, nephew of the famous preacher of both those names, who was the successor of Zuinglius, in the Ecclesiastical function at this place. He describes Bullinger as a "very vigilant preacher and painefull labourer in the Lord's Vineyard. He shewed himself," says he, "very debonaire and courteous unto me." And our traveller particularly notices that he was led through his library, which was exceedingly well furnished with divinity books; and, among other curiosities, he was shewn some MSS. of Bullinger's grandfather, and also an execrable book written by one Joannes Casa, Bishop of Beneventum in Italy, in defence of the horrid sin of sodomy (y). He stayed at Zurich but one day, after which

(s) *Ibid.* 160.(u) *Ibid.* 340.(y) *Ibid.* 391.(r) *Crudities*, 157.(t) *Ibid.* 236.(w) *Ibid.* 350.(x) *Ibid.* 351.

[D] *And shewed me the same.* It may not be improper to give some farther account of this Nobleman, who was the last Earl of Devonshire of the family of Courtney, and not more remarkable for his misfortunes than for his singular endowments of body and mind, which were supposed to have made a deep impression on the hearts of one, if not two Queens, viz. Mary and Elizabeth. He was polite, studious, and learned; an accurate master of the languages, and skilled in the Mathematics, Painting, and Music. He lived a prisoner in the Tower from the age of fourteen to twenty-one years. On Queen Mary's accession to the Throne, he was released, and she conceived an affection for him which he was no stranger to; yet seemed rather to attach himself to the Princess Elizabeth, whose youth and lively conversation had more prevailing charms than the pomp and power of her sister. This preference not only produced a total change in Mary's sentiments with regard to the Earl, but was nearly proving fatal to Elizabeth. On suspicion of being concerned with

that Princess in Wyat's Rebellion, he was imprisoned again in Fotheringay Castle, whence on his release he travelled into Italy, and died at Padua at the age of thirty years. Some say he was poisoned (17).

[E] *Sweetest time for so much he ever spent in his life.* How well satisfied he was with Venice, will appear by the following passage. "Had there been an offer made to me, before I tooke my journey to Venice, eyther that foure of the richest Mannors of Somersetshire (wherein I was borne) should be gratis bestowed upon me if I never saw Venice, or neither of them if I should see it; although certainly those Mannors would do me much more good in respect of a state of livelyhood to live in the world then the sight of Venice, yet notwithstanding I will ever say, while I live, that the sight of Venice and her resplendent beauty, antiquities, and monuments, hath by many degrees more contented my minde and satisfied my desires than those four Lordshippes could possibly have done (18)."

(18) *Crudities*, 120.

he

he continued his journey through Badon to the Baths of Hinderbove. Of these, together with the customs of the place, the properties of the waters, and the manners of the inhabitants and visitors, he gives a very accurate and entertaining account (z). On the 30th he arrived at Basil, and after remaining there one day he went to Straßbourg, and thence to Lower Baden. At Heidelberg he saw the famous vessel which held 530 hogheads of Rhenish wine, worth one thousand nine hundred and eighty-eight pounds, eight shillings (a). His next stage was to Spira. On the 10th of September he came to Wormes, having in his way thither had an encounter with a boor, occasioned by his pulling some grapes in a vineyard (b). In two days after his arrival at Wormes, we find him at Mentz, and the next day at Frankfort (c). He was at Colen on the 19th, and thence he proceeded to Flushing, where he embarked in a vessel for London. He arrived at the Custom-House there on the 3d of October, and in this manner concluded the first part of his travels, which had employed five months wanting a few days. In this short time he had seen forty-five cities (d). The length of his journey was 1975 miles, more than half of which he performed with only one pair of shoes. These memorable shoes, we are told, were only once mended, and on his return to Odcombe were hung up in the Church there (e). Having thus recited, with a degree of minuteness worthy of Thomas himself, the several stages of his journey, it will readily occur to the Reader, that had our Traveller been qualified for the task of improving his country by his observations on the laws, manners, customs, or government of the several countries through which he passed, the hasty manner in which he made his tour would totally preclude such expectations. And it may be observed in his defence that he had no view of that kind. To one who had objected that he had copied out more inscriptions and epitaphs than any judicious traveller would have done in many years, and thereby had branded him with the note of a tomb-stone traveller (e), he answers. "But because this objection shall not justly take hold upon me, that I am a tombe-stone traveller, if God shall grant me happy success in my next journey, I will so farre wade into a few matters of policie for the better satisfaction of the Reader, as I may with security of my life attain unto. Surely I do not a little wonder that the observing of inscriptions and epitaphes should be objected unto me by way of disgrace." He had just before observed, that being a private man, and no statish, matters of policy were impertinent unto him. It may, therefore, be concluded, that accuracy in those things which he professed to discuss, and veracity in relating the circumstances of his journey, are only to be sought after in his book; and so far as any commendation is due to an Author, in these points he is entitled to his reward [F]. It will give some surprize to those who have not perused the account of his journey, and to many who form their judgment on the manners of past times by what they see at present, to be informed that he was the first Englishman who made use of a fork at his meals: as the passage shews how far behind the Italians we then were in point of delicacy, and is also descriptive of the manners of the age; it will be set down at large in the note [G]. But though his Travels cannot be considered as very important to the public, they produced that which the greater number of Travellers have in view. They afforded himself much

[F] *He is entitled to his reward.* A late Author (19) appears not to have done justice to our Traveller, when, speaking of the length of William Lithgow's Travels, he says, that "here the marvellous seems to rise to the incredible," and to set him in point of veracity below Coryate, "whom it is nevertheless certain that he outwalked." It may be observed in Coryate's favour, that his minute accuracy not his want of veracity, was what subjected him to the ridicule of his contemporaries. Much more just is the judgment of Mr. Aubrey, cited by the same author (20) concerning him, "that though he was not a wise man, he wrote faithfully matter of fact." Another writer, who had sufficient opportunities of knowing him says, that if he had lived to have written his travels—"there might have been very good use of his observations; for as he was a very particular, so was he without question a very faithful relator of things he saw; ever disclaiming that bold liberty which divers travellers have, and do take by speaking and writing any thing they please of remote parts, when they cannot easily be contradicted, taking a pride in their feigned relations to overspeak things (21)."

(21) Terry's Travels, 59.

[G] *Set down at large in the note.* "Here I will mention a thing that might have been spoken of before in discourse of the first Italian towne. I observed a custome in all those Italian cities and townes through the which I passed, that is not used in any other country that I saw in my travels, neither doe I thinke that any other nation of Christendome doth use it, but only Italy. The Italian

and also most strangers that are commorant in Italy, do alwaies at their meales use a little forke when they cut their meat. For while with their knife which they hold in one hand they cut the meate out of the dish, they fasten their forke which they hold in their other hand upon the same dish, so that whatsoever he be that sitting in the company of any others at meale, should unadvisedly touch the dish of meate with his fingers from which all at the table doe cut, he will give occasion of offence unto the company, as having transgressed the lawes of good manners, insomuch that for his error he shall be at least brow beaten if not reprehended in wordes. This forme of feeding I understand is generally used in all places of Italy; their forkes being for the most part made of yron or Steele, and some of silver, but those are used only by Gentlemen. The reason of this their curiosity is, because the Italian cannot by any meanes indure to have his dish touched with fingers, seeing all men's fingers are not alike cleane. Hereupon I my selfe thought good to imitate the Italian fashion by this forked cutting of meate, not only while I was in Italy, but also in Germany, and oftentimes in England since I came home, being once quipped for that frequent using of my forke by a certain learned Gentleman, a familiar friend of mine, one Mr. Laurence Whitaker, who in his merry humour doubted not to call me at table *furcifer*, only for using a forke at feeding, but for no other cause (22)."

(22) Crudities, 90.

enter-

entertainment, indeed so much that on his return he declared, that "of all the pleasures in the world Travel is the sweetest and most delightful," and, that "such is the exuberance and superfluity of these exoticke pleasures (arising from travelling) that for my own part, I will most truly affirm I reaped more entire and sweet comfort in five months travels of those seven countries mentioned in the front of my booke, than I did all the dayes of my life before in England which containd two and thirty years (g)." On his return to England he immediately began to digest his Travels in order for publication; and that he might proceed therein without interruption he retired to his native place Odcombe, where he employed himself in that business, according to Ben Jonson, five months (b). While on his journey through Europe he had resolved to visit many of the places again which he then only imperfectly noticed, particularly Venice (i) and some parts of Switzerland (k). But he had not long been in England before he changed his design, and determined to enlarge the plan of his future Travels. Having therefore completed his book, he was desirous of having it printed at London without delay. To effect which, he applied himself, by Letter [H], to Sir Michael Hicks, desiring his intercession with the Earl of Salisbury then Lord Treasurer, to obtain a licence. His request was granted, and the next year his work made its appearance under the following affected

[H] To effect which he applied himself by Letter.] This Letter which formerly belonged to James West, Esq (23); is still extant. It is now in the possession of the writer of this article, and having never been printed may not improperly be inserted here.

(23) Birch's Life of Henry Prince of Wales.

Right Worship and generose Sir,

Though I feare I shall incurre your reprehension for presuming to write unto your worship; yet I hope the superficial acquaintance which I had with you lately at Mr. Ingrams (where it pleased you, after a very debonaire and courteous manner, to take notice of me) will in some sort dispense with my bouldnesse. I write unto you partly by way of deprecation for my error committed at that time at Mr. Ingrams table, which I beseech you to impute not to any voluntarie malapartnes of mine, but rather to the merry prompting of that joviall black-bearded Gentleman that sat next unto me, who you know is soe much given to his *παρρησία* and libertie of speech, that sometimes he will not sticke amicissimum quempiam perstringere even to glaunce with some exquisite straine of witte at the dearest freinde he hath: partly also for that I am soe bould to insinuate my selfe unto you with a suite, whereunto if it shall please you to condescend, not onely I my selfe shall be obliged unto you for it, in the strictest bonde of true observance till I suffer the fatall dissolution of my bodie and sowle, but perhaps many notable members of other commonwealths may render no small thanks unto you for the same. Therefore, without any long introductions to discover unto you the summe of the matter it is thus; having travelled about two years since in these seven famous countries France, Savoy, Italie, Rhetia, commonly called the Grisons cuntry, Helvetia, alias Swicerland, some partes of high Germanie, and the Netherlands, I was disposed to turne my microcosme (a phrase that a certaine learned Gentleman not long since used of me) into eyes, I meane to prye into all thinges of chiefest remarque that were obvious unto my eyes in every place where I travelled, in soe much that by my incessant industrie and Herculean toyle I wrote soe many observations in the foresayd countries as have filled very neere four quires of paper, having in the space of five months surveyed forty-seven cities; and this my itinerarie I have concealed soe long, that it seemed cum lineis ac blattis rixari (as eloquent Angelus Politian writeth of certaine of his bookes, in an epistle to Laurentius Medices, Duke of Florence) determining indeed rather Thetidi aut Veneris eas largiri marito, then to evulge them to the light of my cuntry before the consummation of my future travells, which I thinke will be very neere ten yeares hence, but some of my deare friendes, especially a certaine learned Gentleman, one Mr. Lawrence Whitaker, hath used such importunities of persuasions unto me, who, amongst other things, alledged that excellent proverbiall verse,

Πολλὰ μετὰ χρόνον κείνη κείνη ἀκρῶς.

that I have confidently resolved, by God's gracious permission, to imprint the observations of my past

VOL. IV.

travells, for the benefite of my travelling cuntry men, before I goe abroad againe, for which cause, determining to dedicate them to the Prince, I went lately to his Highnesse, pronounced an oration unto him before a greatesse assemblie of courtiers, and withal presented unto him my journall, who soe graciously accepted it, that he hath promised to entertaine the dedication thereof. Since which time I have laboured very much about the licencing of my booke, that it might be printed first with the late Archbyshop of Canterbury, whose sudden death hath much defeated my designement, after that with some of the High Commissioners, and the Byshop of London, of whom I can not get an approbation, seeing it is not in their power to allowe any bookes to be printed (as they affirme) but theologicall, soe that the whole scope of my suite unto your worship doth tend unto this, that you would vouchsafe to intercede for me unto my Lorde Treasurer, that it would please his Lordship to give order it might be printed in London, with some expedition: the Prince not onely approving, yea applauding it, together with all those selected flowers of gentilitie that flourish in his princely courte, but also earnestly expecting it, especially since there is not as much as one line contained in my whole journall that maketh against other state, or any forraine Prince confederate with us, or against religion or good manners, my booke containing principally the most remarkable antiquities of those cities that I have described; yea, and so many of them, that I hope you will pardon me, though I thinke that no man of other nation since the incarnation of Christ, hath observed more for the time, in the foresayd countries, which I hope you would not hold to be unlikely, if you did but knowe what intolerable paynes I tooke in my travells, both by day and night, scarce affording my selfe two howe's rest sometimes of the whole twenty-four, in the citie of Venice, by reason of my continuall writing, whereupon divers English men that lay in the same howse with me, observing my extreme watchings wherewith I did grievously exccruciat my bodie, instantly desired me to pittie my selfe and not to kill my selfe with my inordinate labours. To conclude, if it shall please your worship to gratifie me in this my earnest supplication, you will adde unto me very spurres of diligence, and give me wonderfull encouragement to observe such thinges in my future travells as I doubt not but shall be acceptable to the King and Queen themselves and all their royall children, as also to the greatest Peers and Nobles of this kingdom; in hope whereof I will commend your worship to the gracious clientele of the omnipotent Jehova.

From my chamber in Bowe-lane this 15th November, 1610.

Your Worship's moste suppliant Beadsman,

THOMAS CORYATE.

To the Right Worshipful Sir Michaell Hix's, Knight, give these with all speede.

4 B

title,

title, "Coryat's Crudities hastily gobbled up in five months Travells in France, Savoy, Italy, Rhetia commonly called the Grisons country, Helvetia alias Switzerland, some parts of High Germany, and the Netherlands, newly digested in the hungry aire of Odcombe in the county of Somerset, and now dispersed to the nourishment of the travelling Members of this Kingdome." It contains besides his Travels some posthumous Latin Poems, the productions of his deceased father, and many copies of verses by the most eminent Poets [I] of the time, who tickled the Author's vanity, at the same time that they made a jest of him. We learn that he printed at his own expence (l), and his success was in every way answerable to his expectation; for whether from the singularity of the style, or the whimsical character of our Traveller, his work at its first publication was much read, but the fame of it lasted only a short time, for about two years afterwards it appears to have been little noticed [K]. The Author had however been flattered into so high an opinion of the merit of his work, that in answer to a writer who had said he would have epitomized it if "he could have melted out of the whole lump, so much matter worth the reading as wold have filled four pages [m]," he replies, "I will boldly affirme for the better justification of my observations, and by way of opposition against the malicious censure of that hypercriticall Momus, that of the fixe hundred fiftie and foure pages, he shall find at the least five hundred worthy the reading (n)." And it was his intention to have translated both these and his future travels into Latin, for the benefit not only of his own country, but also of those he had already, or might hereafter resolve to travel through (o). A copy of his Crudities, it appears, he presented to the Bodleian Library; and being expected to visit Oxford afterwards at the Act, Sir Thomas Bodley desired the book might be sent for, and placed for the time in some such place in the Library as may seem, he adds, to have magnified the Author and the book (p). In 1611 he published "Coryat's Crambe, or his Colwort twise sodden, and now served in with other Macaronicke Dishes as the second course to his Crudities," 4to. On the 20th of Oct. 1612, after taking leave of his countrymen by an Oration spoken at the cross at Odcombe (q), he proceeded on his farther travels, in which he intended to employ ten years (r). He arrived at Zante on the 13th of January 1613, and there saw the Sepulchre of Marcus Tullius Cicero and his wife, "such an obscene and ignoble grave that I could not but condole the misfortune of that famous and incomparable Orator, from the inexhausted fountaine of whose incomparable learning, so many excellent Orators have drawn liquor of Rhetoricall invention, to the great garnishing and adorning of their polite lucubrations. For it standeth *sub dio* in the open aire without any sepulchrate or Titularie-stone that might testifie to the Reader who lieth there, which cannot but strike a kind of veneration into any man that hath any sparke of learning (s)." From Zante he proceeded to Syo, and while there made an attempt to visit the Tomb of Homer, in which he did not succeed (t). He then sailed in an English ship to the Trojan shore, on which he landed on the 22d of February (u). He here employed much pains for several hours in searching out the most notable antiquities of Troy, which one of his companions, Master Robert Rugge, observing, "to yield mee some kind of guirdon or remuneration for my paines in a merrie humour drew his sword out of the scabberd, and ascending to one of those great stones that lye in the open part of this middle gate, knighted mee, that kneeled upon another stone on my right knee, by the name of the first English Knight of Troy; and on the knighting of mee pronounced those wittie verses extempore:

Coryate no more, but now a Knight of Troy;
 Odcombe no more, but henceforth England's joy:
 Brute, Brute of our best English wits commended,
 True Trojane from Æneas' race descended:
 Rise top of wit, the honour of our nation,
 And to old Ilium make a new Oration.

[I] Many copies of verses by the most eminent Poets.] Among these we find the names of Ben Jonson, John Harrington, Dudley Digges, John Donne, Christopher Brooke, John Hoskins, Inigo Jones, Richard Corbet, John Chapman, John Owen, Thomas Farnabie, Michael Drayton, John Davis, besides many others. The verses are also in various languages, as English, Latin, French, Italian, Spanish, and even Welch and Irish. The Author was so little conscious of the design of them, that in the introduction to them he makes a formal apology for their insertion, desiring the Reader to ascribe it not to any ambitious humour in him to obtrude so many to the world in praise of his book, and assuring him that when he saw the multitude of them to increase to so great a number, he resolved to put above a thousand of them into an Index Expurgatorius, and to detain them from the press. But that Prince Henry, to whom his performance was dedicated, gave a strict and express

commandment to print all those verses which he had read to his Highness (24). The Author had the honour of presenting copies of this his work to the King, the Queen, Prince Henry, the Duke of York, afterwards Charles the First, and the Princess Elizabeth afterwards Queen of Bohemia, to each of whom he made an Oration which he afterwards made public (25).

[K] Little noticed.] In the year 1613, two years after the publication of the Crudities, an Epigramatist writes thus of it:

Wonder of Writers (for once so thou wert)
 What pitty 'tis thy fame no longer lasted,
 That such of note in travell and desert,
 Like time-les blossomes should so soon be blasted;
 For thus farre boldly may thy booke compare,
 How ill so ever, sure 'twas passing rare (26).

"Two

“ Two Turks that stood but a little way from us when he drew his naked sword, thought
 “ verily hee meant to have cut off my head for some notorious villany which I had per-
 “ petrated. Those verses I answered extempore. Also our Musketeers discharged two
 “ volleys of shot for joy of my knighthood.”

Loe heere with prostrate knee I doe embrace
 The gallant title of a Trojane Knight,
 In Priam's court, which time shall ne're deface,
 A grace unknowne to any British wight:
 This noble knighthood shall Fame's trump resound
 To Odcombe's honour, maugre Envie fell
 O're famous Albion throughout that island round,
 Till that my mournfull friends shall ring my knell.

After repeating these verses, standing upon a high stone at the entrance of the great gate, he pronounced an Oration, which if the Reader should incline to peruse we must refer him to the volume whence this account is extracted (x). On his return to the ship, observing Mount Ida at the distance of two miles, and seeing a plowman holding a plough, he with one Mr. Francis Flyer, did the like one after another, “ in order,” says he, “ that if wee live to be old men, we may say in our old age we had once holden the
 “ plough in the Trojan territorie, especially in that part we saw the citie stood (y).” With this part of his journey he declared himself so entirely satisfied, that he would not for 500l. but have seen those things which were worthy observation at Troy; and had he not seen them then, he should have taken a journey from England for the sole purpose. We next find him at Constantinople, where he resided some time; and during his abode there, received great civilities from Sir Paul Pinder, the English Ambassador, at whose house he had free access and welcome whenever he pleased, and to whom, as usual, he made an Oration. The time when he arrived at Constantinople does not appear; but on the first day of April, 1613 (z), being the day preceding Good Friday, he was there, and present at midnight at the Monastery of Franciscan Fryers, where after mass he saw a number of slaves whip themselves for an hour and a half without mercy. These wretches were hired by their masters to undergo this punishment as an atonement for sins confessed by their Lords, and were in return rewarded with their liberty (a). While he resided here he was seized with an ague which afflicted him for three days, but by the assistance of blood-letting it was entirely removed (b). He continued at Constantinople until the 21st of January in the year following (c), when he proceeded on his journey to Jerusalem. He embarked in very tempestuous weather, attended with much snow, and arrived at Gallipoli (d). On the 14th of February he went ashore at Lesbos, and on the 18th came to Syo. On the 20th, sailing by the Sanyan Coast, he discerned Patmos, and passed near Cofs, the birth-place of Hippocrates. He saw the tops of Ararat, said to be then distant ninety-four leagues, on the 23d, and the next day landed at Scanderoon (e); whence he proceeded to Aleppo, travelling thither in four days. While he continued at Aleppo, his countryman, Bart Haggat, Consul at that place, rode with him to the Valley of Salt mentioned in II. Samuel viii. 13 (f). On the 15th of March, 1613, in company with Henry Allard of Kent, he set out on his pilgrimage to Jerusalem, which place, after passing through Damascus on the 26th, he entered on the 12th of May, 1614. On Palm Sunday evening he lay in the Temple, in the Upper Gallery, and was roused out of his sleep by the turbulent cries of the Greeks who came forth from their Quire with a very clamorous noise, having eleven banners of silk and cloth of gold carried before them, each of which had three streamers, and on the top of the staff a gilded cross. A world of lamps was carried before them; men, women, and children confusedly crying Kyrie eleeson. The next day other nations joined with them displaying their banners. On the 28th he visited Jordan (g), and afterwards returned to Aleppo on foot and remained there three months longer (h); after which he departed in a caravan into Persia, passing the river Euphrates, about four days journey beyond Aleppo. Thence in two days he came to Ur, the birth-place of Abraham, and continued there four days. In four more he came to the River Tigris, which he crossed on foot, it being then no higher than the calf of his leg. He then entered Mesopotamia, and resided six days at Tauris the Metropolis, formerly called Ecbatana. In two days he came to Casbin, and thence in twenty-three days to Spahan in Parthia, the residence of the Persian King, who was then in Gurgistan, ransacking the poor Christians there with great hostility, with fire and sword. There he remained two months, when he proceeded with a caravan into the East-Indies, and in four months and odd days arrived at Lahore (i) [K]. From Lahore he had twenty days journey to Agra, and ten more to Asmere,

[K] Arrived at Lahore.] “ About the middle of the way,” says he, “ between Spahan and Lahore, just about the frontiers of Persia and India, I met Sir Robert Shirley and his Lady, travelling from the Court of the Mogul (where they had been very graciously received, and enriched with presents of great value) to the King of Persia's Court; so gallantly furnished with all necessaries for their travells, that

(4) *Ibid.* 19.

(n) Purchas, i. 599.

Asmere, where the Mogul kept his Court. In this journey, between Jerusalem and Asmere, he spent fifteen months and odd days, travelling two thousand seven hundred miles, and all the way on foot (k). He expended also in his ten months travels, between Aleppo and Asmere, but three pounds sterling, "yet says he fared reasonable well every day, victuals being so cheap in some countries where I travelled, that I oftentimes lived competently for a penny sterling a day: yet of that three pounds I was coufened of no less than ten shillings sterling by certain lewd Christians of the Armenian nation, so that indeed I spent but fifty shillings in my ten months travels (l)." At Asmere he remained twelve months and sixty days, until he had learned the Turkish, Morisco or Arabian languages, some good knowledge of the Persian and Indostan tongues, in the acquisition of which he displayed very singular talents, and obtained such a command over them as was very useful to him during the remainder of his journey (m) [L]. On the 16th of September, 1616, he departed from Asmere to Agra, where he resided six weeks longer (n). After this we find him several months with the Ambassador, Sir Thomas Roe, living at Mandoa, the Mogul's Court, many miles up the country; during which time it appears that he met with several circumstances calculated to give him chagrin [M], and began to decline both in health and spirits [N]. This became so evident, that when he was about to

(27) Letter from Asmere, p. 17.

"that it was a great comfort unto me to see them in such a flourishing estate. There did he shew me to my singular contentment, both my books neatly kept, and hath promised to shew them, especially mine Itinerarie, to the Persian King; and to interpret unto him some of the principal matters in the Turkish tongue, to the end I may have the more gracious access unto him after my return thither. For through Persia I have determined (by God's helpe) to return to Aleppo. He adds, "both he and his Lady used me with singular respect, especially his Lady, who bestowed forty shillings upon me in Persian money; and they seemed to exult for joy to see me, having promised me to bring me in good grace with the Persian King, and that they will induce him to bestow some princely benefits upon me: this, I hope, will be partly occasioned by my book, for he is such a jocund Prince that he will not be meanly delighted with divers of my facetious Hieroglyphicks, if they are truly and genuinely expounded unto him (27)."

[L] *Very useful to him during the remainder of his journey.* He became so well acquainted with the Persian language, that he obtained, without the knowledge of the English Ambassador, access to the Great Mogul, to whom he made an Oration. "After I had ended my speech, I had some short discourse with him in the Persian tongue, who amongst other things told me, that concerning my traueil to the Citie of Samarcand, he was not able to doe me any good, because there was no great amity betwixt the Tartarian Princes and himselfe, so that his commendatory Letters would doe me no good. Also he added, that the Tartars did so deadly hate all Christians, that they would certainly kill them when they came into their country. So that he earnestly dissuaded me from the iourney, if I loued my life and well fare; at last, he concluded his discourse with me, by a summe of money, that he threw downe from a window, thorow which he looked out, into a sheet tied vp by the foure corners, and hanging very neere the ground, an hundred pieces of siluer, each worth two shillings sterling, which counteruailed ten pounds of our English money: this businesse I carried so secretly by the helpe of my Persian, that neither our English Ambassadour, nor any other of my countrymen (sauiug one speciall, priuate, and intrinsicall friend) had the least inckling of it, till I had throughly accomplished my desigine: for I well knew that our Ambassadour would haue stopped and barracadoed all my proceeding therein, if he might haue had any notice thereof, as indeed hee signified unto me, after I had effected my proiect, alleaging this, forsooth, for his reason, why hee would haue hindered me, because it would redound somewhat to the dishonour of our nation, that one of our countrey should present himselfe in that beggerly and poore fashion to the King, out of an insinuating humour, to craue money of him: But I answered our Ambassadour in that stout and resolute manner, after I had ended my businesse,

"that he was contented to cease nibbling at me, neuer had I more need of money in all my life, then at that time: for in truth I had but twentie shillings sterling left in my purse, by reason of a mischance I had in one of the Turkes cities called Emert, in the countrey of Mesopotamia, where a miscreant Turke stripped me of almost all my monies, according as I wrote vnto you in a very large letter the last yeare, which I sent from the Court of this mightie Monarch, by one of my countrimen that went home by sea in an English ship, laden with the commodities of this India, which letter, I hope, came to your hands long since (28)." In the Indostan language he became so great a proficient, that a woman, a landress belonging to the Ambassador's house, who had such a freedom and liberty of speech, that she would scold, brawl, and rail, from sun-rising to sun-set, he one day undertook in her own language, and by eight of the clock in the morning so silenced her, that she had not one word more to speak (29).

[M] *Several circumstances calculated to give him chagrin.* Among others, Mr. Richard Steel, a Merchant, who in travelling to England had met our Author, informed King James of it, who replied, "Is that fool yet living?" This troubled him much, having expected that the King would have spoken more and better of him. At another time when he was ready to depart, the Ambassador gave him a Letter, and in that a bill to receive 10*l.* at Aleppo. The letter was directed to the Consul there, who was desired to receive the bearer with curtesy, as he would find him an honest poor wretch. "Our Pilgrim," says Mr. Terry, liked the gift well; but the language by which he should have received it did not at all content him; telling me, *That my Lord had even spoiled his curtesy in the carriage thereof; so that if he had been a very fool indeed, he could haue said very little less of him than he did, Honest poor Wretch!* and furthermore he then told me, that when he was formerly undertaking his voyage to Venice, a person of honour wrote thus in his behalf unto Sir Henry Wotton, then and there Ambassador: My Lord, Good wine needs no bush, neither a worthy man letters commendatory, because whithersoever he comes he is his own Epistle, &c. There (said he) was some language on my behalf; but now for my lord to write nothing of me by way of commendation but honest poor wretch, is rather to trouble me than to please me with his favour." The letter, to please him, was altered (30).

[N] *Began to decline both in health and spirits.* He began to be apprehensive that he should not live to reap the fruit of his travels. "And certainly" (says Mr. Terry) he was surprized with some such thoughts and fears, (for so he told us afterwards) when upon a time he being at Mandoa with us, and there standing in a room against a stone pillar, where the Ambassador was, and myself present with them, upon a sudden he fell into such a swoon, that we had very much ado to recover him out of it; but at last, come to himself, he told us

(28) Printed in Purchas, vol. i. 598. See Terry, 96.

(29) Terry, 70.

(30) Terry, 74.

to depart, the Ambassador desired him to stay longer, but he thankfully refused the offer, and soon afterwards set out for Surat, about three hundred miles distant, and lived to arrive there. He was then in a bad state of health and afflicted with a flux, which was increased by drinking (though moderately, being very temperate) some sack, which had been brought from England. In a few days he died, in the month of December, 1617, and was buried under a little monument, like one of those usually made in our church-yards (o). Another Traveller, in 1626, says, his grave was to be known but by two poor stones (p). His papers appear to have fallen into the hands of Sir Thomas Roe, who gave a few of them to Mr. Purchas, by whom some parts, though very imperfectly, were inserted in his Collection of Travels (q). Of our Author's character some traits are inserted below [O]. His death deprived the wits and minor writers of much entertainment which they had promised themselves on his return to England [P].

(q) Purchas, i. 597.

(o) Terry, 76.

(p) Herbert's Travels, 35.

" that some sad thoughts had immediately before
" presented themselves to his fancy; which, as he
" conceived, put him into that distemper, like *Fan-*
" *ninus* in *Martial*, *Ne moriari mori*, to prevent death
" by dying: for he told us that there were great ex-
" pectations in England of the large accounts he
" should give of his travels after his return home,
" and that he was now shortly to leave us; and he
" being at present not very well, if he should die in
" the way towards Surat, whither he was now in-
" tended to go (which place he had not as yet seen)
" he might be buried in obscurity and none of his
" friends ever know what became of him, he travel-
" ling now, as he usually did, alone (31)."

(31) Terry, 75.

[O] Some traits are inserted below. " He was,
" says Mr. Terry, of a very coveting eye, that could
" never be satisfied with seeing, as Solomon speaks,
" *Eccles. i. 8. Though he had seen very much; and I*
" *am persuaded that he took as much content in*
" *seeing, as many others in the enjoying of great*
" *and rare things. He was a man who had got the*
" *mastery of many hard languages (as before I ob-*
" *served) to the Latin and Greek he brought forth*
" *of England with him; in which, if he had obtained*
" *wisdom to husband and manage them, as he had*
" *skill to speak them, he had deserved more fame in*
" *his generation. But his knowledge and high at-*
" *tainments in several languages made him not a*
" *little ignorant of himself, he being so covetous,*
" *so ambitious of praise, that he would hear and en-*
" *dure more of it than he could in any measure*
" *deserve; being like a ship that hath too much sail*
" *and too little ballast. Yet if he had not fallen*
" *into the smart hands of the wits of those times he*
" *might have passed better (32). He carried folly*
" *(which the charitable call merriment) in his*
" *very face. The shape of his head had no promi-*
" *ing form, being like a sugar-loaf inverted with*
" *the little end before, as composed of fancy and me-*
" *mory without any common sense. Such as con-*
" *ceived him fool, as *duo*, and something else, as*
" **decem*, were utterly mistaken, for he drave on no*
" *design, caring for coin and counters alike; so con-*
" *tented with what was present, that he accounted*
" *those men guilty of superfluity who had more suits*
" *and shirts than bodies, seldom putting off either*
" *till they were ready to go away from him (33)."*

(32) Terry, 71.

[P] On his return to England. Amongst others,
John Taylor the Water Poet, appears to have been
one of our Author's persecutors. In his works are
several satirical pieces ridiculing him for his follies.
It appears that at one time our Author made a formal
complaint to the King against his antagonist, which
is recorded by the latter in these words, " Master
" Thomas Coriate (on a time) complained against
" me to King James, desiring his Majesty that he

(33) Fuller, 31.

" would cause some heavy punishment to be inflicted
" upon me for abusing him in writing, (as he said I had)
" to whom the King replied, that when the Lords
" of his Honourable Privie Councell had leisure and
" nothing else to doe, then they should heare and
" determine the differences between Master Coriate
" the scholler, and John Tayler the sculler: which
" answer of the King was very acceptable to Master
" Coriate." Whereupon I made this following pe-
" tion to the King:

To the King's most excellent Majestie.

The humble Petition of John Tailor, your Maje-
sties poore Water Poet,

Sheweth:

Most mightie Monarch of this famous ile,
(Upon the knees of my submissive minde)
I begge thou wilt be graciously inclin'd,
To reade these lines my rusticke pen compile:
Know (Royal Sir) Tom Coriate workes the wile,
Your high displeasure on my head to bring;
And well I wot, the sor, his words can file,
In hopes my fortunes head-long downe to fling.
The King, whose wisdom through the world did
ring,

Did hear the cause of two offending harlots;
So I beseech the (Great) great Britaine's King,
To do the like for two contending varlots.
A brace of knaves, your Majesty implores
To heare their suites as Solomon heard whores (34).

See also " Odcomb's Complaint, or Coryate's
Funeral Epicedium, or Death Song upon his late re-
ported drowning." " The Eighth Wonder of the
World, or Coryate's Escape from his supposed drown-
ing." " Laugh and be Fat, or a Commentary upon
the Odcombian Banket." " Master Thomas Co-
ryate, to his Friends in England, sends greeting, &c." In
" The Nipping and Snipping of Abuses," 4to.
1614, he says,

A Poet needs must be a Poet borne,
Or else his art procures his greater scorne,
For why? if art alone made men excell,
Methinks Tom Coryate should write ex'lent well:
For he was born belike in some crosse yeere,
When learning was good cheap, but wit was
deare (35).

A Copy of Verses, in the Somersetshire dialect, by
our Author, is printed in " Guidott's Collection of
Treatises concerning Bath Waters," 8vo. 1725.]

COSIN (JOHN), a learned Bishop of Durham in the seventeenth century, was the
eldest son of Giles Cosin a citizen of Norwich (a), by Elizabeth his wife, daughter of
Remington of Remington-castle, a good and ancient family (b). He was born
at Norwich November 30, 1594; and educated in the Free-School there, till he came to
be fourteen years of age. Then he was transplanted into Caius-College in Cambridge, in
1610; of which he was successively chosen Scholar, and Fellow; and where he regularly
took his degrees in Arts (c). Having distinguished himself by his learning, diligence, and
ingenuity, in the year 1616, when he was about twenty years of age, he had an offer, at
the same time, both from Dr. Lancelot Andrews then Bishop of Ely, and from Dr.

Overall Bishop of Lichfield and Coventry, of a Librarian's place. But, by his late Tutor's advice, he accepted of the latter's invitation; who liked him so well, that, on account of his knowledge and fair writing, he made him also his Secretary (*d*). At the same time he encouraged him to study Divinity, and sent him from time to time to keep his Exercises in the University (*e*). But, in 1619, he lost his excellent patron, and with him all hopes and prospect of advancement (*f*). However, Providence soon raised him a better Patron in Dr. Richard Neile then Bishop of Durham, who took him for his domestic Chaplain; and in 1624 conferred upon him the tenth Prebend in the Cathedral Church of Durham [*A*], in which he was installed on the 4th of December that same year (*g*). In the September following, he was collated to the Archdeaconry of the East-riding in the Church of York, vacant by the resignation of Marmaduke Blakeston, whose daughter he had married (*b*): and on the 20th of July 1626, he was collated by his patron Bishop Neile to the rich Rectory of Branspeth [*B*], in the Diocese of Durham (*i*). The same year, he took the degree of Bachelor in Divinity (*k*). About that time, having frequent meetings, at the Bishop of Durham's House in London, with Dr. William Laud then Bishop of Bath and Wells, Dr. Francis White soon after Bishop of Carlisle, Dr. Richard Montague, and other learned men, distinguished by their zeal for the Doctrine and Discipline of the Church of England; he began to be obnoxious to the then Puritans, who looked upon all such Divines as Popishly affected (*l*). This imputation of theirs on Mr. Cofin in particular, was sufficiently authorized, as they imagined by his 'Collection of Private Devotions,' [*C*] published in 1627; wherein many things were thought too much favourable to Popery: but how wrong this imputation was, let his whole conduct testify. In 1628 he was concerned, with other members of the Church of Durham, in a prosecution against Peter Smart Prebendary there, for a seditious Sermon preached in that Cathedral [*D*]. About the same time, he took his degree of Doctor in Divinity;

[*C*] His Collection of Private Devotions.] The title of it was, *A Collection of Private Devotions: or, The Hours of Prayer*. Dr. Smith informs us (*3*), that it was written at the command of King Charles I. who observing that his Queen's Protestant attendants were frequently reading in the *Hours of the Virgin Mary*, and other popish books of devotion, that were set, perhaps on purpose, about the royal apartments: lest they should thereby be tainted with superstition, and other false principles, he ordered a Manual of Prayers to be composed for their use, out of the holy Scriptures, and the ancient Liturgies, which was accordingly done, by Mr. Cofin. Others affirm (*4*), that it was written at the request of the Countess of Denbigh, the Duke of Buckingham's sister. This Lady being then somewhat unsettled in her religion, and warping towards Popery, these Devotions were drawn up to recommend the Church of England farther to her esteem, and preserve her in that communion. This book, though furnished with a great deal of good matter, was not altogether acceptable in the contexture; although the title-page sets forth, that it was formed upon the model of a book of *private Prayers*, authorized by Queen Elizabeth, in the year 1560 (*5*). To give the reader some part of it: 'After the Calendar, it begins with the Apostles Creed in twelve articles, the Lord's Prayer in seven petitions, the Ten Commandments, with the duties enjoined, and the sins forbidden. Then follow the precepts of charity, the seven sacraments, the three theological virtues, the three kinds of good works, the seven gifts of the Holy Ghost, the twelve fruits of the Holy Ghost, the spiritual and corporal works of mercy, the eight beatitudes, the seven deadly sins, their opposite virtues, and the four last things. And, after some explanatory prefaces and introductions, were subjoined the forms of prayer for the first, third, sixth, and ninth hours, and likewise for the *Vespers* and *Compline*,

formerly called the canonical hours. Next to these was the litany, the seven penitential psalms, prayers preparatory for receiving the Holy Eucharist, prayers to be used in time of sickness, and at the approach of death, &c.' Though this book was approved by Geo. Mountain, Bishop of London, and licensed with his own hand, yet it was somewhat surprising at first view; and some moderate persons were shocked with it, as drawing too near the superstitions of the Church of Rome: at least they suspected it as a preparation to further advances. The top of the frontispiece had the name of Jesus, in three capital letters, I. H. S. Upon these there was a cross, incircled with the sun, supported by two Angels, with two devout women praying towards it. This book was severely animadverted upon by Henry Burton, in his 'Examination of Private Devotions: or, The Hours of Prayer, &c.' and by W. Prynne, in his 'Brief Survey and Censure of Mr. Cofin's cozening Devotions.' *Ibid*. 1628.

[*D*] In 1628 he was concerned, with other members of the Church of Durham, in a prosecution against Peter Smart, &c.] This Peter Smart, who had been School-master at Durham, was collated Dec. 30, 1609, to the sixth Prebend in the Church of Durham, and removed July 6, 1614, to the fourth Prebend (*6*). He had also other preferments. Being to preach, July 7, 1628 (*7*), in the Cathedral Church of Durham, he took for his text Psalm xxxi. 7. *I hate them that hold of superstitious vanities*. From which he took occasion to make a most bitter invective against some of the Bishops, charging them with no less than Popery and Idolatry. Among other virulent expressions he had these—p. 11. 'The Whore of Babylon's bastardly brood, doting upon their mother's beauty, that painted harlot of the Church of Rome, have laboured to restore her all her robes and jewels again, especially her looking-glass the Mass, in which she may behold her bravery.—The Mass coming in, brings with it an inundation of ceremonies, crosses, and crucifixes, chalices and images, copes and candlesticks, tapers and basons, and a thousand such trinkets, which we have seen in this Church since the communion-table was turned into an altar.—p. 26. I assure you the altar is an idol, a damnable idol as it is used. I say, they are whores and whoremongers, they commit spiritual fornication who bow their bodies before that idol the altar.—&c.' For this sermon he was questioned first at Durham, afterwards in the High-Commissioned-Court at London; whence he was removed, at his own desire, to that at York, where refusing, with great scorn, to recant, he was, for his obstinacy, degraded, and by sentence at Com-

(*6*) Willis, as above, p. 266, 268.

(*7*) Dr. Nalson says, by mistake, it was 1638, p. 518. But he was suspended for his Sermon in 1631.

Divinity; and in 1634, February the 8th, was elected Master of Peter-House, in the room of Dr. Matthew Wren, newly made Bishop of Hereford. In that station, he strenuously applied himself to promote sound Religion, and useful Learning ^(m). He served the office of Vice-Chancellor for the University of Cambridge, in 1640. In the same year, King Charles I. to whom he was Chaplain, conferred upon him the Deanery of Peterborough; in which he was installed November 7, 1640 ⁽ⁿ⁾. But this dignity he did not long enjoy, or rather he did not quietly enjoy it at all: since his troubles began three days after. For on the 10th of November, a petition from Peter Smart against him was read in the House of Commons; wherein Smart complained of the Doctor's superstition, and innovations in the Church of Durham, and of his severe prosecution in the High-Commission-Court ^(o). Whereupon, on the 21st of the same month, Dr. Cofin was ordered to be sent for by the Serjeant at Arms, and a Committee appointed to prepare a charge against him ^(p). Soon after, he presented a Petition to the House, which, on the 28th following, was read, and referred to a Committee ^(q). On the 3d of December, the Serjeant had leave given him by the Commons, to take bail for Dr. Cofin; which was accordingly done, the 19th of January 1640-1, the Doctor himself being bound in two thousand pounds, and his securities in a thousand pounds a-piece, for his appearance upon summons ^(r). Three days after, namely, January the 22d, he was, by a vote of the whole House, sequestered from his ecclesiastical Benefices; being the first Clergyman that was then used in that manner ^(s). On the 15th of March ensuing, the Commons sent up one and twenty Articles of impeachment against him ^[E] to the House of Lords ^(*); to which the

mon Law, soon after dispossessed of his prebend and livings; whereupon he was supplied with 400l. a year by subscription from the Puritan party ⁽⁸⁾, which was more than all his preferments amounted to. As for Dr. Cofin, he was so far from being Mr. Smart's chief prosecutor (as he avers) that after he was questioned in the High Commission at Durham, he never meddled in the matter, save that once he wrote a letter to the Archbishop of York, and the Commissioners, in his favour ⁽⁹⁾.—Mr. Smart's character is not represented to any great advantage. One author indeed ⁽¹⁰⁾ calls him a man 'of a grave aspect, and 'reverend presence.' But another, who knew him better ⁽¹¹⁾, assures us, 'That he was an old man of 'most froward, fierce, and unpeaceable spirit, &c.' He had not preached in the Cathedral Church of Durham, though Prebendary of it for seven years, 'till he preached that seditious sermon for which he was questioned. And whilst he held and enjoyed his preferment, and his health too, he seldom preached more than once or twice a year.

^[E] *The Commons set up one and twenty articles of impeachment against him.* They were carried up by one Mr. Rouse, who introduced them with the following speech. 'My Lords, I am commanded by the 'House of Commons, to present your Lordships a declaration and impeachment against Dr. Cofin, and 'others, upon the complaint of Mr. Peter Smart; 'which Mr. Smart was a *Proto-Martyr*, or first Confessor of note in the late days of persecution. The 'whole matter is a tree, whereof the branches and 'fruit are manifest in the articles of this declaration.'—Then follow these articles against Dr. Cofin.

1. That he was the first man that caused the Communion-table in the Church of Durham to be removed and set altar-ways, in the erecting and beautifying whereof, he (being then Treasurer) expended two hundred pounds ⁽¹²⁾. 2. That he used to officiate at the west-side thereof, turning his back to the people. 3. That he used extraordinary bowing to it. 4. That he compelled others to do it, using violence to the persons of them that refused so to do: for instance, once some omitting it, he comes out of his seat, down to the seat where they sat, being gentlewomen, called them whores, and jades, and pagans, and the like unseemly words, and rent some of their clothes. 5. That he converted divers prayers, in the Book of Common Prayers, into hymns, to be sung in the choir, and played with the organ, contrary to the ancient custom of that Church. 6. That whereas it had been formerly a custom in that Church, at the end of every sermon, to sing a psalm; this custom, when Dr. Cofin came thither, was abrogated, and instead thereof, they sung an anthem in the choir, there being no psalm sung either at the minister's going up into the pulpit, or at his coming down. 7. That the first Candlemas-day at night, that he had

been in that Church, he caused three hundred wax-candles to be set up and lighted in the Church at once, in honour of our Lady, and placed threescore of them upon and about the altar. 8. That in this Church there were reliques of divers images, above which were remaining the ruins of two Seraphims, with the picture of Christ between them, erected in Queen Mary's time, in the time of Popery; all which, when Queen Elizabeth came to the Crown, were demolished by virtue of a commission by her to that intent granted, which so continued demolished from that time, 'till Dr. Cofin came to that Church, who, being Treasurer, caused the same to be repaired, and most gloriously painted. 9. That all the time he was unmarried, he wore a cope of white satin, never officiating in any other, it being reserved solely for him, no man excepting himself making use thereof, which, after marriage, he cast off, and never after wore. 10. That there was a knife belonging to the Church, kept altogether in the vestry, being put to none but holy uses, as cutting the bread in the Sacrament, and the like; Dr. Cofin refusing to cut the same with any other but that, thinking all others that were unconsecrated, polluted; but that, which he putting holiness in, never termed but the consecrated knife. 11. That in a sermon preached in that Church, he did deliver certain words in disgrace of the reformers of our Church; for instance, the words were these, 'The reformers of this Church, when they abolished 'the Mass, took away all good order, and, instead of 'a reformation, made it a deformation ⁽¹³⁾. 12. That he seldom or never, in any of his sermons, stiled the Ministers of the word and Sacraments by any other name than Priests, nor the Communion-table by any other name than Altar. 13. That by his appointment there was a cope bought, the seller being a convicted Jesuit, and afterwards employed in that Church, having upon it the picture of the invisible and incomprehensible Trinity. 14. That whereas it had been formerly a custom in that Church, at five of the clock to have morning-prayers read, winter and summer: this custom, when Dr. Cofin came thither, was abandoned; and instead thereof was used singing and playing on the organs, and some few prayers read, and this was called first-service; which being ended, the people departed out of the Church, returning at nine o'clock, and having then morning-prayers read unto them, and this was called second-service; which innovation being disliked, and complained of by Mr. Justice Hutton, was reformed. 15. That he framed a superstitious ceremony in lighting the tapers which were placed on the altars, which, for instance, was this: a company of boys that belonged to the Church, came in at the choir-door with torches in their hands lighted, bowing towards the altar at their first entrance, bowing thrice before they lighted their tapers: having done, they withdrew themselves, bowing

(13) Dr. Nalson informs us, that the Doctor's words were, 'That we must 'not think that 'when the Bishops took away the Mass, 'they took away 'all religion.' Which he made out by producing his Sermon: Nalson, *ubi supra*, p. 792.

(12) Mr. Fuller says, that it was a marble altar with Cherubins, which cost 2000l. with all the appurtenances thereof. See Fuller, *ubi supra*, p. 173.

the Doctor put in his Answer upon oath; and so fully vindicated himself⁽¹⁾, during the five days the affair was depending before the Lords, that most of them acknowledged his innocence.

(1) Both by his own self, and by the very witness that Smart and his son-in-law, produced against him.

Examen Historic. p. 286.

ing so oft as before, not once turning their back-parts towards the altar, the organs all the time going. 16. That he counselled some young Students of the University to be imitators and practisers of his superstitious ceremonies, who, to ingratiate themselves in his favour, did accordingly; and being afterwards reproved for the same, by some of their friends, confessed, that Dr. Cofin first induced them to that practice, and encouraged them therein. 17. That he used, upon communion-days, to make the sign of the cross with his finger, both upon the seats whereon they were to sit, and the cushions to kneel upon, using some words when he so did. 18. That one sabbath-day there was set up an unnecessary company of tapers and lights in the Church, which Dr. Hunt, being then Dean, fearing they might give offence, being they were then unnecessary, sent his man to pull them down, who did so; but Dr. Cofin being thereat aggrieved, came to the fellow, and there mis-called him in a most uncivil manner, and began to beat him in the public view of the congregation, to the great disturbance of the same. 19. That the Dean and Chapter of that Church, whereof Dr. Cofin was one, with many others, being invited to dinner in the town of Durham, Dr. Cofin then and there spake words derogating from the King's prerogative: the words were these, 'The King hath no more power over the Church than the boy that rubs my horse-heels.' 20. That there being many of the Canons of the said Church present at that time, amongst the rest there was one took more notice of his words than the rest, and acquainted one of his Fellow-Canons with them when he came home. This Canon being a friend to Dr. Cofin, told the Doctor that such a man exclaimed of him, and charged him with words that he should speak at such a time: the Doctor presently sends for him, and when he came into the house the Doctor desires him to follow him into an inner room, who did so; but so soon as he came in, the Doctor shuts the door, and sets both his hands upon him, calling him rogue and rascal, and many other names, insomuch that the man, fearing he would do him a mischief, cried out; Mrs. Cofin coming in, endeavoured to appease her husband, and, holding his hands, the other ran away. 21. That the Doctor did seek many unjust ways to ensnare this man, that so he might take a just occasion to put him out of his place; but none of them taking effect, he put him out by violence, having no other reason why he did so, but because he had no good voice, when he had served the place two years before Dr. Cofin came thither: for instance of which unjust ways to ensnare this man, Dr. Cofin hired a man and woman to pretend a desire of matrimony, and to offer a sum of money to this petty Canon to contract matrimony between them in a private chamber, so thereupon to take advantage of his revenge upon him. This plot being confessed by the parties, to be first laid by Dr. Cofin, and that they were his instruments (14).—Besides the several particulars mentioned in these articles, Mr. Fuller informs us, that Dr. Cofin was accused of having bought a cope with the Trinity, and God the Father in the figure of an old man; another with a crucifix, and the image of Christ, with a red beard, and a blue cap. And to have made an anthem to be sung, of the three Kings of Collen, by the names of Gasper, Balthazar, and Melchior (15).

(15) Fuller, *Ch. Hist. ubi supra*.

(16) B. xi. p. 173.

To these articles Dr. Cofin put in his answer, upon oath, before the House of Lords, as is above related. But seeing afterwards the substance of them published in Mr. Fuller's Ecclesiastical History (16), he wrote from Paris a letter to Mr. Warren, and Dr. Reeves, in his own vindication, dated April 6, 1658, wherein he declares, as he had done before the Lords, 1. That the Communion-table in the Church of Durham (which in the Bill of Complaint and Mr. Fuller's History is said to be the marble-altar, with Cherubims) was not set up by him [Dr. Cofin], but by the Dean and Chapter, (whereof Mr. Smart himself was one) many years before Mr. Cofin became Prebendary

of that Church, or ever saw the country. 2. That by the public accounts which are there registered, it did not appear to have cost above the tenth part of what is pretended, appurtenances and all (17). 3. That likewise the copes used in that Church were brought in thither long before his [Dr. Cofin's] time, and when Mr. Smart, the complainant, was Prebendary there, who also allowed his part (as he [Dr. Cofin] was ready to prove by the Act-book) of the money that they cost, for they cost but little. 4. That as he never approved the picture of the Trinity, or the image of God the Father, in the figure of an old man, or otherwise to be made or placed any where at all; so he was well assured that there were none such (nor to his knowledge or hearsay ever had been) put upon any cope that was used there. One there was that had the story of the Passion embroidered upon it, but the cope that he used to wear, when at any time he attended the Communion-service, was of plain white fatten only, without any embroidery upon it at all. 5. That what the Bill of Complaint, called the image of Christ, with a blue cap, and a golden beard, (Mr. Fuller's History says it was red, and that it was set upon one of the copes) was nothing else but the top of Bishop Hatfield's tomb (set up in the Church, under a side-arch there, two hundred years before Dr. Cofin was born) being a little portraiture, not appearing to be above ten inches long, and hardly discernible to the eye what figure it is, for it stands thirty foot from the ground. 6. That by the local statutes of that Church, (whereunto Mr. Smart was sworn, as well as Dr. Cofin) the treasurer was to give order, that provision should every year be made of a sufficient number of wax-lights for the service of the Choir, during all the winter-time; which statute he [Dr. Cofin] observed when he was chosen into that office, and had order from the Dean and Chapter, by capitular act, to do it: yet upon the Communion-table they that used to light the candles, never set more than *two fair candles, with a few small sizes* near to them, which they put there of purpose, that the people all about might have the better use of them for singing the psalms, and reading the lessons out of the Bibles: but *two hundred* was a greater number than they used all the Church over, either upon Candlemass-night, or any other.—7. That he never forbade (nor any body else that he knew) the singing of the (metre) psalms in the Church, which he used to sing daily there himself, with other company, at morning prayer. But upon fundays and holydays, in the choir, before the sermon, the Creed was sung, (and that plainly for every one to understand) as it is appointed in the Communion-book, and after the sermon, was sung a part of a psalm, or some other anthem taken out of the scripture, and first signified to the people where they might find it. 8. That so far was he from making any anthem to be sung of the three Kings of Colen, as that he made it, when he first saw it, to be torn in pieces, and he himself cut it out of the old song books belonging to the Chorister's School, with a pen-knife that lay by, at his very first coming to that College. But he was sure that no such anthem had been sung in the Choir during all his time of attendance there, nor (for ought that any of the eldest persons of the Church and town could tell, or ever heard to the contrary,) for fifty or threescore years before, or more. 9. That there was indeed an ordinary knife, provided and laid ready among other things belonging to the administration of the Communion, for the cutting of the bread, and divers other uses in the Church-vestry.—But that it was ever *consecrated*, or so called, otherwise than as Mr. Smart, and some of his followers had, for their pleasure, put that appellation upon it; he [Dr. Cofin] never heard, nor believed any body else had, that lived at Durham (18). The rest of the articles mentioned above, Mr. Smart could not prove, and Dr. Cofin gave a very satisfactory answer to them, remaining upon the Rolls of Parliament. But as Mr. Fuller did not specify them all, the Doctor did not think it necessary to repeat in this letter his answer to each

(17) By this it seems, that the sum mentioned in the original articles was 2000*l.* though in the printed ones there is only 200*l.* See above, note (12).

(18) This Letter is printed in Dr. Heylyn's *Examen Historicum*, &c. Appendix, p. 283, &c. Dr. Fuller afterwards asked Dr. Cofin's pardon for what he had said as above, relating to him. See Worthies, in Durham, p. 295.

innocence. Mr. Glover, one of Smart's own Counsel, told him openly at the Bar of the House of Lords, 'That he was ashamed of him, and could not in conscience plead for him any longer.' Whereupon the Lords dismissed the Doctor, upon his putting in bail for his appearance; but they never sent for him again (u). About the same time, upon a motion made in the House of Commons, 'that he had enticed a young Scholar to Popery,' he was committed to the Serjeant at Arms, to attend daily till the House should call him to a hearing. After fifty days imprisonment, and charges of twenty shillings a day, he came at length to a hearing; when he made it appear, That being Vice-chancellor of Cambridge, he had most severely punished that young Scholar (whom, upon examination, he had found guilty) by making him recant, and expelling him the University: and to this some of the members bore witness. However, the Doctor had no manner of reparation made him for his great trouble and expences (w). In 1642, he was concerned, with others, in sending the Plate of Cambridge University to King Charles I. then at York; for which a furious storm fell upon several members of that University, and particularly upon Dr. Cofin; who having, some time before (x), been voted unworthy to be a Head or Governor in either of the Universities, or to hold or enjoy any ecclesiastical promotion; was ejected from his Mastership by a warrant from the Earl of Manchester, dated March 13, 1642-3. So that, as he was the first that was sequestered, so was he also the very first of his University, who was turned out (y). Thus being deprived of all his preferments, and still fearing the worst that might follow, he thought fit to leave the kingdom, and to withdraw to Paris, in the year 1643. Being safely arrived to that place, he did, according to King Charles's order and direction, take under his care, and officiate as Chaplain to, such of Queen Henrietta Maria's household as were Protestants. With them, and other English exiles that were daily resorting to Paris, he formed a congregation, that assembled at first in a private house, and afterwards in the Chapel of Sir Richard Brown, Ambassador from the Court of England to that of France. Not long after, he had lodgings assigned him in the Louvre, with a small pension, on account of the relation he bore to Queen Henrietta (z). During his residence in this place, he showed, how false and groundless was the imputation that had been thrown upon him, 'of his being Popishly affected.' For, notwithstanding his great straits, he remained steady and unmoved in the profession of the Protestant Religion. He kept up the English Church-Discipline, and the form of worship appointed by the Common Prayer: he reclaimed some that were quite gone over to Popery, and confirmed several more in the Protestant Profession, who by their converse with Romanists, were become wavering, and inclinable to entertain favorable opinions of the Popish Tenets (a). He also had several Controversies and Disputes with divers Jesuits and Romish Priests; particularly once with the Prior of the English Benedictines at Paris [F]; in which he acquitted himself with so much learning and sound reasoning, that he utterly defeated the suspicions of his enemies, and much exceeded the very expectations of his friends (b). There were made him very great offers of Preferment [G], if he would have been tempted thereby, to alter his Religion; but he stood proof against them all (c). He composed, during his exile, several learned works, chiefly against the Roman Catholics, of which we shall give an account below. Though he was extremely zealous for the doctrine and discipline of the Church of England, yet he kept a friendly intercourse and correspondence with the Protestant Ministers at Charenton [H]; who, on their parts, expressed the utmost

each of them. Upon the whole, therefore, as we cannot, on the one hand, enough wonder at the weakness of Dr. Cofin, for inventing and pressing the observance of such ceremonies and insignificant things, as some of those above-mentioned: so, on the other hand, who can be sufficiently amazed at the confidence of P. Smart, in charging the Doctor with things which he could so easily disprove?

[F] *Particularly once with the Prior of the English Benedictines at Paris.* The Prior's name was — Robinson. And the controversy between him and Dr. Cofin was managed both by word and writing. The argument was, concerning the validity of the ordination of our Priests, &c. in the Church of England. And the Doctor had the better so far, that he could never get from the Prior any reply to his last answer. This conference was undertaken to fix a person of honour then wavering about that point. The sum of the conference was written by Dr. Cofin to Dr. Morley, afterwards Bishop of Winchester, in two letters, bearing date June 11, and July 11, 1645 (19).

[G] *There were made him very great offers of preferment.* One author speaks upon this point to the following purpose (20). Dr. Cofin 'being by the violence of the persecution which was raised against the episcopal party, forced to quit his native country, and seek a retreat among the Papists in France, he continued a most unshaken Protestant, and bold

'propugnator of the Reformed Religion, even to the hazard of his life; and when the necessitous condition to which he was reduced, and all the advantageous offers imaginable were made him to embrace the Roman Communion, yet were not those temptations capable of removing him from his foundation, insomuch, that despairing of ever obliging him to change his religion, the Papists were so enraged at him, as, I have heard it from his own mouth, frequently to threaten him with assassination, and that he should not escape pistol or ponyard; and in revenge, which I have heard him aver was the most sensible affliction that ever befel him in his whole life, they inveigled his only son from him to become a Papist (21).' We may add this other testimony of Dr. Cofin's attachment to the Reformed Religion. — 'Whilst he remained in France, he was the Atlas of the Protestant Religion, supporting the same with his piety and learning, confirming the wavering therein, yea, daily adding profelytes (not of the meanest rank) thereunto (22).'

[H] *He kept a friendly intercourse and correspondence with the Protestant Ministers at Charenton.* One author indeed tells us (23), that 'after getting over into France, he neither joined with the Church of French Protestants, at Charenton, nigh Paris, nor with the Papists, — but confined himself to the Church of old English Protestants therein.' But Dr.

(21) He was educated in grammar learning in a Jesuit's school, as were many others of our youths during the Civil War, which corrupted him.

utmost regard for him; and permitted him sometimes to officiate in their congregations [I], according to the rites prescribed by the book of Common-prayer (d). Thus having, during his seventeen years exile in France, behaved 'discreetly and prudently' even in the judgment of his enemies (e); he returned to his native country at the Restoration of King Charles II. and took possession again of his preferments and dignities. About the end of July 1660, he came to his Deanery at Peterborough, and was the first that read the Common-prayer in that Cathedral, after the late times of confusion (f). But here he was not suffered to rest; for the King designed, a very little while after, to make him Dean of Durham. But reflecting on his sufferings, and upon his constant attendance and services beyond the seas, he nominated him Bishop of that rich See (g). Accordingly, he was consecrated on the 2d of December 1660 in Westminster-Abbey (h). As soon as he could go down into his Diocese, he set about reforming many Abuses that had crept in there during the late Anarchy; and by his generous and hospitable temper, accompanied with a kind and courteous deportment, he gained an universal respect and esteem (i). But he chiefly distinguished himself by his very great munificence, and charity, and by a public spirit. For, considering himself principally as steward of the large revenues belonging to his See, he laid out a great share of them, in repairing or rebuilding the several edifices belonging to the Bishopric of Durham, which had either been demolished, or neglected, during the civil wars. For instance, he repaired the castle at Bishop's Auckland [K]; and that at Durham, which he enlarged with some additional buildings: and repaired the Bishop's house at Darlington, then very ruinous. He also enriched his new Chapel at Auckland, and that in the Castle of Durham, with several pieces of gilt plate, books, and other costly ornaments, to remain to his successors in the Bishopric for ever: the charge of all which buildings, repairs, ornaments, &c. amounted to no less than twenty six thousand pounds (k). He likewise built and endowed two Hospitals; the one at Durham for eight poor people, the other at Auckland for four; the annual revenue of the first being seventy pounds, and of the other thirty pounds: and near his Hospital at Durham he rebuilt the School-Houses, to the charge of three hundred pounds. He also built a Library near the Castle of Durham; the charge whereof, and pictures wherewith he adorned it, amounted to eight hundred pounds; and gave books thereto, to the value of two thousand pounds; as also an annual pension of twenty marks for ever to a Library-keeper. The College of dissolved Prebends at Auckland, purchased by Sir Arthur Haselrigg, and by him forfeited to the King, which King Charles II. gave to Bishop Cosin, in fee, he gave to his successors, Bishops of Durham for ever; the value thereof being three hundred and twenty pounds. He rebuilt the East end of the Chapel at Peterhouse in Cambridge, which cost three hundred and twenty pounds; and gave in books to the Library of that College, a thousand pounds. He founded eight Scholarships in the same University, namely five in Peter-house, of ten pounds a year, each; and three in Gonvill and Caius College of twenty nobles a-piece *per Annum*; both which, together with a provision of eight pounds yearly, to the common chest of these two Colleges respectively, amounted to two thousand five hundred pounds. He likewise made an augmentation of sixteen pounds a year to the vicarage of St. Andrews at Auckland (l). The rest of his numerous Benefactions we shall give an account of in the note [L]. In a word, this generous Bishop, during the eleven years

(i) Smith, p. 21, 22, 23. In 1661, he was one of the Commissioners at the Savoy Conference, where he yielded to some moderating concessions. See Life of R. Baxter, fol. l. i. Part ii. p. 305.

Cosin, in opposition to the former part of that assertion, declared to all the world, that he never refused to join with the Protestants there, or any where else, in all things wherein they joined with the Church of England (24). And that he was constant in the same opinion, appears by a letter of his, dated from Paris, Feb. 7, 1650, to one Mr. Cordel, then at Blois, who seemed shy to communicate with the Protestants there, upon the scruple of their in orderly ordination: in which letter he has this passage,—'To speak my mind freely to you, I would not wish any of ours absolutely to refuse communicating in theyre Church, or determine it to be unlawful, for fear of a greater scandal that may thereupon arise, than we can tell how to answer or excuse—(25).'

[I] And permitted him sometimes to officiate in their congregations.] Where he baptized, married, and had even some persons ordained Priests and Deacons by English Bishops, according to the several forms in the book of Common Prayer. With their consent likewise he did, in the year 1645, 'solemnly, in his priestly habit, with his surplice, and with the office of burial used in the Church of England, inter, at Charenton, the body of Sir William Carnaby, Knt. not without the troublesome contradiction and contention of the Romish Curate of that parish (26).'

[K] He repaired the castle at Bishop's Auckland.] This (the chief country-seat of the Bishops of Durham,) was, upon the seizure of the Bishop's land,

bestowed upon Sir Arthur Haselrigg; who designing to make it his principal seat, and not liking the old-fashioned building, resolved to erect a new and beautiful fabric, all of one pile, according to the most elegant fashion of those times. To fit himself therefore with materials for this his new house, he pulled down a most magnificent and large chapel, built by Anthony Bek, Bishop of Durham, in the time of King Edward I. with the stone whereof, and an addition of what was deficient, he erected his new fabrick in a large court, on the east-side of the castle. But Bishop Cosin, soon after his consecration, taking notice that the greatest part of the materials, used in that building, were taken from the above-mentioned consecrated chapel, he not only refused to make use of it for his habitation, though it was commodiously contrived, and nobly built, but took it wholly down, and with the stone thereof built another beautiful chapel on the north side of that great court; and, under the middle isle thereof, caused a convenient vault to be made for his own sepulture (27).

[L] The rest of his numerous benefactions, &c.] They were as follows. He gave to the Cathedral at Durham a fair carved Lectern, and Litany-desk, with a large scalloped silver patten, gilt, for the use of the communicants there, which cost forty-five pounds.—Upon the new-building of the Bishop's Court, Exchequer, and Chancery, and towards the erecting of two Sessions-houses at Durham, he gave a thousand pounds.

(27) Dugdale, *ubi supra*, p. 82.

years he fate in the See of Durham, is said to have spent above two thousand pounds a year, in pious and charitable uses (m). For the two last years of his life he enjoyed but a very indifferent state of Health, being very much afflicted with the stone. At length the roaring pains of that distemper, as he used to call them, together with a pectoral Dropsy, put an end to his most valuable life (n), at his house in Pall-Mall, Westminster, on the 15th of January 1671-2, when he was seventy-seven years, one month, and sixteen days old (o). In his Will, dated December 11, 1671, he made a large and open declaration of his Faith [M]. About the year 1625, he married Frances daughter of Marmaduke Blakeston, M. A. (p) by whom he had a son, whom he disinherited on account of his embracing Popery [N]; and four daughters, one married to Sir Gilbert Gerard, Bart. another to Sir ——— Burton, Bart. and the youngest to Dr. Denys Granville, brother to the Earl of Bath, and afterwards Dean of Durham (q). As for the Bishop's body, it was for some time deposited in a vault in London; and in April, 1672, conveyed to Bishop's Auckland in the diocese of Durham; where on the 29th of that month, it was buried in the Chapel belonging to the Palace, under a tomb of black marble, with an inscription [O] prepared by the Bishop in his life-time (r). We shall give an account of his works in the note [P]. As to his personal qualifications; the Bishop was tall and

pounds. — Moreover, he gave towards the redemption of Christian captives, at Algiers, *five hundred pounds*. — Towards the relief of the distressed loyal party in England, *eight hundred pounds*. — For repairing the banks in Howdenshire, *a hundred marks*. — Towards the repair of St. Paul's Cathedral, in London, *fifty pounds*. By his Will he bequeathed to the poor of his hospitals at Durham and Auckland, to be distributed at his funeral, *six pounds*. — To the poor people of the country, coming to his funeral, *twenty pounds*. — To poor prisoners detained for debt, in the goals of Durham, York, Peterborough, Cambridge, and Norwich, *fifty pounds*. — To the poor people within the precincts of the Cathedral at Norwich, and within the parish of St. Andrew's there, in which he was born and educated in his minority, *twenty pounds*. — To the poor of Durham, Auckland, Darlington, Stockton, Gateshead, and Branspeth, (all in the Bishoprick of Durham) *thirty pounds*. — To the poor in the parishes of Chester in the Street, Houghton le Spring, North-Allerton, Creike, and Howden, (all lordships belonging to the Bishops of Durham) *forty pounds*. — Towards the re-building of St. Paul's Cathedral, in London, when it should be raised five yards from the ground, *a hundred pounds*. — To the Cathedral of Norwich, whereof the one half to be bestowed on a marble-tablet, with an inscription, in memory of Dr. John Overall, some-time Bishop there, (whose Chaplain he had been) the rest for providing some useful ornaments for the Altar, *forty pounds*. — Towards the re-edifying of the north and south-sides of the College-chapel at Peterhouse, in Cambridge, suitable to the east and west ends, already by him perfected, *two hundred pounds*. — Towards the new building of a Chapel at Emanuel-College, in Cambridge, *fifty pounds*. — To the children of Mr. John Heyward, late Prebendary of Litchfield, as a testimony of his gratitude to their deceased father, who, in his Lordship's younger years, placed him with his uncle, Bishop Overall, *twenty pounds a-piece*. — To the Dean and Chapter of Peterborough, to be employed for the use of the poor in that town, *a hundred pounds*. — To the poor of Durham, Branspeth, and Bishop's Auckland, to be distributed as his two daughters (the Lady Gerard, and the Lady Burton) should think best, *a hundred pounds*. — To some of his domestick servants he gave *a hundred marks*, to some *fifty pounds*, and to the rest half a year's wages, over and above their last quarter's pay (28).

(28) Dugdale, ubi supra, p. 83, 84, 85; and Smith, p. 25, 26, 27.

[M] In his Will — he made a large and open declaration of his Faith. Wherein, after repeating the substance of the Apostles and Nicene Creeds, he condemns and rejects whatsoever heresies or schisms, the ancient catholic and universal Church of Christ, with an unanimous consent, had rejected and condemned; together with all the modern fautors of the same heresies; sectaries, and phanatics, who, being carried on with an evil spirit, do falsely give out, they are inspired of God. As the Anabaptists, new Independents, and Presbyterians of our country, a kind of men hurried away with the spirit of malice, disobedience, and sedition. — Moreover, (adds he) I do profess, with holy asseveration, and from my very heart, that I am now, and ever have been from my youth, al-

together free and averse from the corruptions and impertinent new-fangled, or papistical, superstitions and doctrines, — long since introduced, contrary to the Holy Scripture, and the rules and customs of the ancient Fathers. But in what part of the world soever any Churches are extant, bearing the name of Christ, and professing the true Catholic Faith and Religion, worshipping and calling upon God the Father, the Son, and the Holy Ghost, with one heart and voice, if I be now hindered actually to join with them, either by distance of countries, or variance amongst men, or by any hindrance whatsoever; yet always in my mind and affection I join and unite with them: which I desire to be chiefly understood of Protestants, and the best Reformed Churches, &c. This part of his Will was written in Latin, and the latter part, containing his benefactions, in English (29).

[N] He had a son, whom he disinherited on account of his embracing Popery. See above, note [G] of this article. He was prevailed upon, not only to embrace Popery, but also to take Religious Orders in the Church of Rome; and though Dr. Cosin used all the ways imaginable, and even the authority of the French King, which, by his interest, he had procured, to regain him out of their power, and from their persuasion, yet all proved ineffectual. Whereupon he disinherited him, allowing him only an annuity of one hundred pounds (30). He pretended to turn again, but relapsed before the Bishop's decease.

(30) Nalson, as above, p. 519; and Smith, p. 13, 26.

[O] With an inscription. Which runs thus.

In non morituram memoriam.
JOHANNIS COSIN
Episcopi Dunelmensis,
Qui hoc Sacellum construxit,
Ornavit, & Deo consecravit
Ann. M, DC, LXV.
In Festo S. Petri.
Obiit xv die Mensis Januarii
Anno Domini, MDCLXXI.
Et hic sepultus est, expectans
Felicem corporis sui Resurrectionem,
Ac vitam in coelis æternam.
Requiescat in pace.

Round a marble-stone on the floor, are also these words engraved.

Beati mortui
Qui moriuntur in Domino,
Requiescunt enim
A laboribus suis (31).

(31) Smith, ubi supra, p. 28; and J. le Neve's Monumenta Anglicana, from 1650 to 1679, p. 171.

i. e. To the never-dying memory of John Cosin, Bishop of Durham, who built and adorned this Chapel, and consecrated it to God in 1665, June 29. He died the 15th day of January, in the year of our Lord 1671, and is buried here, waiting for the happy resurrection of his body, and eternal life in heaven. Let him rest in peace. Blessed are the dead which die in the Lord, for they rest from their labours.

[P] We shall give an account of his works, &c.] erect,

erect, and had a grave and comely presence. He had a sound understanding, well improved with all kinds of useful learning. And, as for his hospitality, generosity, and charity,

Besides his *Collection of Private Devotions*, mentioned above, he published, 'A Scholastical History of the Canon of the Holy Scripture: or, The certain and indubitable Books thereof, as they are received in the Church of England.' London, 1657, 4to. reprinted in 1672. This history is deduced from the time of the Jewish Church, to the year 1546, that is, the time when the Council of Trent corrupted, and made unwarrantable additions to, the ancient Canon of the Holy Scriptures. Consequently it was directed against the Papists, and was written by the author during his exile at Paris. He dedicated it to Dr. M. Wren, Bishop of Ely, then a prisoner in the Tower.

(32) Bafire, p. 66; and Smith, p. 17.

(33) And printed in *Bibliotheca Literaria*, &c. Lond. 1723, 4to. No. v. p. 33; &c.

Dr. P. Gunning had the care of the edition (32). — Since the Bishop's decease the following books and tracts of his have been published. I. 'A Letter to Dr. Collins, concerning the Sabbath,' dated from Peterhouse, Jan. 24, 1635 (33). In which, speaking first of the morality of the sabbath, he affirms, that the keeping of that particular day was not moral, neither by nature binding all men, nor by precept binding any other men but the Jews, nor them farther than Christ's time. But then, adds he, whether one day of seven, at least, do not still remain immutably to be kept by Us Christians, that have God's will and example before, and by virtue of the rules of reason and religion, is the question? And for this he decides in the affirmative. Then he proves, that the keeping of our Sunday is immutable, as being grounded upon divine institution, and Apostolical Tradition, which he confirms by several instances. Next he shews, that the Schoolmen were the first who began to dispute, or deny, this day to be of Apostolical Institution, on purpose to set up the Pope's power, to whom, they said, it belongeth, either to change or abrogate the day. Towards the end, he lays down these three positions against the Puritans: 1. 'The observation of the Sunday in every week is not commanded us by the fourth commandment, as they say it is. 2. Nor is our Sunday to be observed according to the rule of the fourth commandment, as they say it is. 3. Nor hath it the qualities and conditions of the Sabbath annex to it, as they say it hath.' II. There is published, A Letter from our author to Mr. Cordel, dated Paris, Feb. 7, 1650. See above note [H]. It is printed at the end of a pamphlet, intitled, 'The Judgment of the Church of England, in the case of Lay-baptism, and of Dissenters baptism (34).' III. *Regni Angliæ Religio Catholica, prisca, casta, desecrata: omnibus Christianis Monarchis, Principibus, Ordinibus, ostensa. Anno MDCLII. i. e.* A Short Scheme of the ancient and pure doctrine and discipline of the Church of England (35). Written at the request of Sir Edward Hyde, afterwards Earl of Clarendon (36). IV. *Historia Transubstantiationis Papalis. Cui præmittitur, atque opponitur, tum S. Scripturæ, tum Veterum Patrum, & Reformatarum Ecclesiarum Doctrina Catholica, de Sacris Symbolis, & præsentia Christi in Sacramento Eucharistiæ. i. e.* The History of Popish Transubstantiation, &c. written by the author at Paris, for the use of some of his countrymen, who were frequently attacked upon that point by the Papists. It was published by Dr. Durrell, at London, 1675, 8vo. and translated into English in 1676, by Luke de Beaulieu, 8vo (37). There is a *Second Part* still in manuscript (38). V. 'The differences in the chief points of religion, between the Roman Catholics and us of the Church of England; together with the agreements which we, for our parts, profess, and are ready to embrace, if they, for theirs, were as ready to accord with us in the same. Written to the Countess of Peterborough (39).' VI. 'Notes on the Book of Common-Prayer.' Published by Dr. William Nicholls, at the end of his Comment on the Book of Common-Prayer, Lond. 1710, fol. VII. 'Account of a Conference in Paris, between Cyril, Archbishop of Trapezond, and Dr. John Cosin.' Printed in the same book. — The following pieces were also written by Bishop Cosin, but never printed, 1. 'An Answer to a Popish Pamphlet, pretending,

that St. Cyprian was a Papist. 2. An Answer to four queries of a Roman Catholic, about the Protestant Religion.' 3. 'An Answer to a paper delivered by a Popish Bishop to the Lord Inchequin.' 4. 'Annales Ecclesiastici, imperfect.' 5. 'An Answer to Father Robinson's Papers, concerning the validity of the Ordinations of the Church of England.' See above, note [F]. 6. 'Historia Conciliorum, imperfect.' 7. 'Against the forsakers of the Church of England, and their seducers in this time of her trial.' 8. 'Chronologia Sacra, imperfect.' 9. 'A Treatise concerning the abuse of auricular confession in the Church of Rome (40).' By all which learned works, as one observes (41); and his abilities, quick apprehension, solid judgment, variety of reading, &c. manifested therein; he hath perpetuated his name to posterity, and sufficiently confuted, at the same time, the calumnies industriously spread against him, of his being a Papist, or Popishly inclined (42); which brought on him a severe persecution, followed with the plunder of all his goods, the sequestration of his whole estate, and a seventeen years exile. M.

(42) Therefore, as Dr. Smith observes, *Erubescant jam Schismaticorum filii de parentum avorumque convitiis, mendaciis, & calumniis, in Cosinum*, p. 18.

While the integrity, the learning, and, above all, the munificence of this eminent Prelate entitle his name to respect, it must, at the same time, be acknowledged, that he was of a superstitious turn of mind. Of this sufficient proofs may be collected from the preceding article, though written with a very favourable pen. The story related in note [K], says a valuable correspondent, "is an instance of the weakness and vain scrupulousness of the Bishop. I shall grant, that it is unlawful to convert a Church or Chapel to secular use. But the present case is different. The Chapel had been destroyed, the materials separated, and part of them applied to the building of another fabric. This was, in the sense of the law, a sort of specification; and all that could have been demanded of Sir Arthur Haselrigg, and all that could be expected of the Bishop of Durham, was, that a Chapel, not inferior to the one destroyed, should be rebuilt. The Bishop did otherwise: he built a Chapel indeed, but he also destroyed a house. This last, I am confident, he had no authority to do; and his heirs would have been obliged to compound with his successor for the waste committed wantonly and foolishly. It may also here be observed, that Dr. Smith says, this Chapel had been destroyed by gunpowder during the civil war; so that it is probable that Haselrigg only employed the stones of the ruined Chapel, and did not destroy the Chapel."

In the third volume of the Clarendon State Papers, lately published, we find a letter, written, in 1658, to the Lord Chancellor Hyde, by Dr. Cosin, which affords a farther proof that, notwithstanding his superstition and his fondness for the pomp of external worship, he was steadily attached to the Protestant Religion. In this letter, speaking of the Queen Dowager Henrietta and Lord Jermyn, he says, "they hold it for a mortal sin to give one penny towards the maintenance of such heretics as Dr. Cosin is." Again, "The Dukes of Richmond hath been sick in her chamber a whole month together, and I have gone daily hence fifteen days to attend her there. She promiseth to be firm in Religion, for which purpose, I with the King would now and then put a line in his Majesty's letters to her; for she is and will be more affected with what his Majesty writes to her, than what all the Doctors of the world can say besides (43)."

(43) State Papers collected by Edward Earl of Clarendon, vol. iii. p. 418.

Some few of Dr. Cosin's letters are extant, among Dr. Birch's Collections, in the British Museum. One of these letters, which contains several curious particulars concerning Antonio de Dominis, Archbishop of Spalato, and Bishop Overall, will have due notice taken of it hereafter (44).

(44) Birch's Life of Tillotson, p. 170.

From Mr. Granger we learn, that the Bishop's "Scholastical History of the Canon of the holy Scripture" is a book still in esteem (45).

(45) Biographical History of England, vol. iii. p. 234.

It

(s) See Bafire, p. 37—103.

This 1000 l. was for keeping a garrison at Berwick, against the Scots.

charity, they were so very conspicuous and extensive, that he is justly reckoned to have been one of the most munificent, if not the most munificent, of all the Bishops of Durham (s). Among many other services he did to his See, one was, the obtaining a release (in compensation of the loss that See suffered by taking away the Court of Wards and Liveries,) of the annuity, or pension, of one thousand pounds (t), charged upon that Bishopric, ever since Queen Elizabeth's day (u).

(t) Or, eight hundred and four-score pounds. Bafire, p. 56.

It is justly observed, by the authors of the new universal, historical, and literary Dictionary, that, though Dr. Cosin was not, in his impeachment, convicted of any thing Papistical, he was found active in inventing and pressing vain and insignificant ceremonies, and that in this respect he answered to the character of Laud, being one of the Divines of his School (49).

(49) New Dictionary, vol. iv. p. 141.

Since the preceding part of this note was sent to the press, we have seen Mr. Hutchinson's "History and Antiquities of the County Palatine of Durham;" in which there is a full account of a contest between Bishop Cosin and the people of his palatinate, concerning their right to representatives in Parliament. In Cromwell's time they had been admitted to that privilege; and it was a privilege which they were not willing to relinquish. Accordingly, the Grand Jury, at the general Quarter Sessions of the Peace, held at Durham, on the third day of October, 1666, presented a petition to the Court, in the names and on the behalf of the Freeholders of the said county, setting forth, "That they do not enjoy the privilege of sending Members to Parliament, as all other counties of the kingdom do;" and expressing their hope, that the "Justices will take the same into their serious consideration, and nominate and send up to London, with all convenient speed, such persons as they shall think fit, for the effectual prosecution of this great concernment of the country, that they may

petition the Parliament to grant this just and reasonable request, that they may have Knights and Burgesses to represent them in Parliament, like all other counties in the kingdom." This petition being read, the Bishop entered his protest against it, in which he was joined by Dr. Sudbury, Dean of Durham, Dr. Bafire, Thomas Cradocke, Samuel Davison, and William Blakiston, Esquires, five of the Justices then present in Court. But Sir Nicolas Cole, Bart. Henry Lambton, John Tempest, Anthony Byerley, Ralph Davison, Cuthbert Carr, Lodwicke Hall, Robert Clavering, Ralph Carr, John Morland, and Christopher Sanderfon, Esquires, eleven Justices then also present in Court, did approve of the said petition, and give their assent to the same. After this, the Freeholders published the reasons on which they grounded their request that there might be Knights and Burgesses for the County Palatine of Durham. These reasons our Prelate answered at large, and contended earnestly for the accustomed rights and privileges of his Bishopric. His opposition was successful during his own life. But two years after his decease, and one year before Bishop Crew was translated from Oxford to Durham, the Gentlemen of the county renewed their efforts, and obtained an Act, in 1673, by which the county and city were enabled to send four representatives; two for the county, and two for the city (50).]

(50) Hutchinson's History and Antiquities of the County Palatine of Durham, vol. i. p. 539—548.

* * [COSTARD (GEORGE), A Clergyman of the Church of England, and Author of several learned works, was born about the year 1710 (a). He was educated at Wadham College, Oxford, of which he was admitted a member in 1726, if not earlier; and on the 28th of June, 1733, he took the degree of Master of Arts (b). He also became a Tutor, and Fellow of his College; and, indeed, seems to have spent a great part of his life there, though the Fellows of Wadham College hold their fellowships only for a limited number of years. The same year in which he took the degree of Master of Arts, he published, in 8vo, 'Critical Observations on some Psalms.' The first ecclesiastical situation in which he was placed, was that of Curate of Islip in Oxfordshire (c). Part of a letter written by him to Mr. John Catlain, containing an account of a fiery meteor seen by him in the air, on the 14th of July, 1745, was read at the Royal Society on the 7th of November in that year, and published in the Philosophical Transactions, No. 477. The following year he published, at London, in 8vo, 'A Letter to Martin Folkes, Esq; President of the Royal Society, concerning the rise and progress of Astronomy amongst the Ancients.' In this very learned letter he endeavoured to prove, that the Greeks derived but a very small portion of their astronomical knowledge from the Egyptians or Babylonians [A]. He says, that 'though the Egyptians and Babylonians may be allowed, by their observations of the heavens, to have laid the foundation of astronomy; yet, that, as long as it continued amongst them, it consisted of *observations* only, and nothing more; and that in this state it lay, even amongst the Greeks, for some time [B]; till geometry being im-

(a) Nichols's Anecdotes of Bowyer, p. 627.
(b) *Ibid.*

(c) *Ibid.*

[A] Derived but a very small portion of their astronomical knowledge from the Egyptians or Babylonians.] Mr. Costard admits, that the Chaldeans were diligent observers of the heavens, and that they carefully marked every phenomenon that could come to their knowledge. But he is of opinion, that the observations on eclipses, spoken of as made by the Chaldeans, were nothing more than mere registers of what had been observed. 'That the theory of the moon's motions was at all known so early as this, or that the Chaldeans were ever capable of calculating and predicting an eclipse, is more,' he says, 'than can be made appear from any good authority now extant (1).'

(1) Letter to Martin Folkes, Esq. p. 22.

(2) *Ibid.* p. 50.

The Babylonians, he remarks, confessed, that their knowledge of the heavens was brought to them from the Egyptians (2); and he says, that 'the *Pole*, the *Gnomon*, and the *Division of the day into twelve*

'parts,' were the only things that the Greeks 'confessedly learnt of the Babylonians (3).'

(3) *Ibid.* p. 52.

[B] In this state it lay, even amongst the Greeks, for some time.] He says, that it is from the time of Thales that we may properly date all that truly deserves the name of astronomy (4). Thales, he remarks, was the first Greek that went to Egypt for improvement; and his scholar and successor was Anaximander. In tracing the progress of astronomy amongst the Greeks, Mr. Costard proceeds to observe, that, 'in Pythagoras's time, the Greeks had begun to compare the distances of the planets, the sun, and moon, with each other. But, when the distance of the sun from the earth was made only three times, or, at most, six times the distance of the moon from it, it is plain that this part of astronomy was but in its very childhood. It is, farther, a convincing proof, that they had not as yet any tables

(4) *Ibid.* p. 88, 89.

proved by them, and them alone, into a science, and applied to the heavens, they became the true and proper authors of every thing deserving the name of astronomy (d).^(d)

In 1747, Mr. Costard published, in 8vo, 'Some Observations tending to illustrate the Book of Job [C]; and in particular the words, *I know that my Redeemer liveth, &c.*'

(d) Letter to Martin Folkes Esq; p. 156.

To

(5) *Ibid.* p. 122. 'tables for calculating the motions of the moon, or the diameters of the earth's shadow in lunar eclipses, or determining the parallaxes in solar ones; without which tables, in the judgment of the best astronomers, neither the times nor quantities of eclipses can be investigated (5).'

(6) *Ibid.* p. 123. 'That the system, called the Pythagorean, grew up amongst the disciples of that philosopher is highly probable; but that he himself delivered it to them, in the form we now have it, seems to be by no means fact (6).—What time the planets began to be observed, is not known; but that they were all discovered at the same time, is hardly probable. They were at first, no doubt, considered only as fixed stars; by degrees they were found to have a motion of their own; and, at last, their periods came to be taken notice of and settled. But this, we are assured by Seneca, was not so early as the time of Democritus, that is, about 500 years before Christ. Those of the planets Jupiter and Mars seem, if conjecture may be allowed, to have been the first that were so. The stations and retrogressions indeed of Jupiter and Mars would extremely perplex their theories; but as their motions are soon discernible, and they come in opposition to the sun, they seem more likely to have been observed than Saturn; whose retrogressions, though not so large as those of the other two, yet the slowness of whose motion, and the weakness of his light, would all contribute to make him less distinguished from the fixed stars about him. The planet Venus was known to Homer by the name of *Hesperus*; but Pythagoras, if Laertius and Pliny may be credited, or else Parmenides, was the first that said, *Phosphorus* and *Hesperus* were the same, i. e. I suppose, discovered the circular motion of that planet. When Mercury began to be considered, as having a regular motion of his own, is uncertain; but it is probable not till afterwards, as he is so seldom seen, his greatest elongation being only about 22° 46'.

(7) *Ibid.* p. 126 —134. 'From this time, however, it is probable, their motions began to be observed, and geometry to be applied to the purposes of astronomy: a thing, as far as appears, unattempted by the Egyptians and Babylonians: and yet without this it could never be reduced to a science. About the time we are now speaking of, lived Cleostratus, who, according to Pliny, formed the signs of the *Zodiac*; unless he means only the constellations *Aries* and *Sagittary*, concerning which, he says, he composed a treatise. He formed the *Kids* likewise, according to Hyginus; the constellation *Heniochus* being probably formed before. By such easy gradations did that people proceed, and from such small beginnings; till, in the time of Eudoxus, or the year before Christ 363, there might be read in the heavens the antient history of their most illustrious families during the poetical ages. This philosopher was an astronomer, physician, and lawgiver. He learned geometry of Archytas, and was recommended by Agesilaus to Nectanebo, King of Egypt, and by him to the priests; with whom he staid a year and four months, and wrote his *On Asteris*, according to Laertius. For there it was that he learned, that the sun finished his course in 365 days and 6 hours; a thing which, it seems, was hitherto unknown to the Greeks. He wrote, amongst other things, a treatise on the constellations, which is lost, all but a few fragments that are preserved by Hipparchus on Aratus, whose sphere, according to him, is the very same with that of Eudoxus (7).'

'About the year of Rome 542, or 211 before Christ, flourished the great Archimedes; who, besides that he was an excellent mathematician, was, in the proper sense of the word, as good an astronomer. That he observed the *solstice*, is certain from Hipparchus; and Macrobius tells us, that he assigned the distance of the moon from the earth, Mercury from the moon, Venus from Mercury,

'the sun from Venus, Mars from the sun, Jupiter from Mars, and Saturn from him, in Stadia; as likewise the distance from the orbit of Saturn to the fixed stars.'

'About the 150th olympiad, or 175 years before Christ, flourished Hipparchus, who observed the autumnal equinox, A. V. C. 592, according to Ptolemy; and the vernal equinox, A. V. C. 626; so that he seems to have continued his observations for 34 years together. Geometry having now been taken in to the assistance of astronomy, and the Pythagoreans having invented the 32d proposition of the first book of Euclid, this philosopher was enabled in a more correct manner to attempt the *Parallax* of the sun; and a noble attempt indeed it was. But, though it discovers a vast comprehension of thought, and the uncommon skill of the contriver, yet it supposes too great an accuracy of observation ever to be admitted into practice (8).'

(8) *Ibid.* p. 144 145, 146.

—'He first began to make a *catalogue* of the *fixed stars*, a thing highly celebrated by Pliny, as a task for a God; and discovered the *precession* of the *Equinox*, as Ptolemy informs us. He is said to have calculated eclipses, both of the sun and the moon, for 600 years to come.—And this brings us down to the year 140 after Christ, when Ptolemy observed the *Equinox*, and composed his excellent work; a work that conveys very extraordinary conceptions of its author; but at the same time hardly permits us to imagine, that the Egyptians, his countrymen, or the Babylonians, ever knew the true system, as the world has been since obliged with it by Copernicus. Different parts of it, indeed, lie scattered in the different writings of the Pythagorean philosophers, and others; but that it was never reduced to one consistent form, and admitted as the genuine one, seems apparent from Ptolemy's embracing a worse. If others were acquainted with what is now called the Pythagorean system, it is certain it was lost, or obscured by the superior authority of Ptolemy's. It was this that was publicly taught, and privately explained and commented on. It was translated at last into the Arabic language, and by that people studied and admired. The knowledge of the *Almagest* was by them looked upon as the *ne plus ultra* of science; and though many of them were very diligent and accurate observers, yet not one of them pretended to call in question its principles, or to prefer any other system before it. In Europe, indeed, during this interval, astronomy was in a manner unknown, or entirely lost. What little there was confined itself almost wholly to the Moors in Spain. At last, about the year 1230 after Christ, at the command of the Emperor Frederick, Ptolemy's *Almagest* was translated out of Arabic into Latin.

'From this time astronomy may date its second birth, being gradually improved, by the concurrent labours of 500 years, to the perfection it is now arrived at. For, about the year 1250, flourished the famous Alphonsus, King of Castile, celebrated for his Astronomical Tables. He was succeeded, about the year 1507, by the incomparable Copernicus, the author of the system now admitted for the true one, as being most agreeable to the laws of gravitation, and the best observations. Amongst these last, the principal place is due to those of Tycho Brahe; as by the help of which the ingenious Kepler was enabled to lay down the true laws of motion that obtain among the heavenly bodies. No sooner was that discovery made, than this science took very hasty strides towards perfection, by the unwearied diligence and sagacity of many able astronomers and mathematicians, particularly our own countrymen, Ward, Flamsteed, Halley, and, above all, Sir Isaac Newton (9).'

(9) *Ibid.* p. 147 —155.

[C] *Observations tending to illustrate the book of Job.* Mr. Costard observes of this book, that it is 'an exalted and regular piece of Eastern poetry, and of the

To which was annexed, 'The third chapter of Habakkuk, paraphrastically translated into English verse.' The same year a curious letter written by him to the Rev. Dr. Shaw, principal of St. Edmund Hall, relative to the Chinese chronology and astronomy, was read at the Royal Society, and published in the Philosophical Transactions, No. 483. In this letter he took notice, that it had been the affectation of some nations, and particularly of the Babylonians and Egyptians, to carry up their histories to so immoderate a height, as plainly to shew those accounts to be fictitious, and without foundation. This also was the case with the Chinese; and Mr. Costard urged a variety of arguments to prove, that the mathematical and astronomical knowledge of the Chinese was inconsiderable, and that little dependance was to be placed on the pretended antiquity of their history (e). The following year he published, at Oxford, in 8vo, 'A farther Account of the Rise and Progress of Astronomy among the Antients, in three Letters to Martin Folkes, Esq.' Of these letters the first treats of the astronomy of the Chaldeans; the second is an elaborate inquiry concerning the *constellations* spoken of in the book of Job [D]; and the fourth is on the Mythological astronomy of the antients. In these letters, he has displayed a considerable extent both of oriental and of Grecian literature.

(e) Vid. Abridgment of the Philos. Transactions, vol. x. p. 1231, &c.

His next publication, which appeared in 1750, in 8vo. was 'Two Dissertations: I. Containing an Inquiry into the meaning of the Word *Kesitab*, mentioned in Job, ch. xlii. ver. 11. In which is endeavoured to be proved, that though it most probably there stands for the name of a coin, yet that there is no reason for supposing it stamped [E] with

the dramatic kind. The persons speaking are Eliphaz, Bildad, and Zophar; who regularly take their turns in the debate, which is upon a question no less important than how—"to vindicate the ways of God to men." What methods are pursued by them, in order to this, doth not at present fall under my design to observe. 'Tis apparent, however, that their several answers to Job's pleas may be looked on as three distinct acts. These replications and rejoinders continue to the 32d chapter, where Elihu begins the share he takes in the conference. This brings us to the 38th chapter, which concludes the fourth act, when the Deity appears, and closeth the scene in the fifth. I will not say, that this is the first Tragedy that we know of as extant in the world, or that any Eastern productions of this nature laid the foundation of the Greek stage. It may not be improper to observe, however, that two rules laid down by a very great master of the art of poetry are exactly maintained. It is not, as was said,

— *quinto productior actu;*

nor is God introduced, till it becomes

— *dignus vindice nodus.*

The narration at the beginning and end may be looked on as the Prologue and Epilogue; and the part assigned Job's wife seems intended for a short and refined satire on those that, without proper accomplishments or abilities, impertinently interpose their judgments in points of the highest importance, and which it is impossible they should understand. But if this is a proper representation of the case, will it not be a farther proof of the lateness of the composition? Poetry, no doubt, such as it was, must have been of very antient original. But then it seems to have been confined for a long time to songs, short hymns, panegyrics, and the like; rather taught and treasured up in the memory, like those of the Druids, than committed to writing. Regular poems must have been owing to leisure, education, and the establishment of schools and academies (10). He was of opinion, that the book of Job was not older than the time of the Jewish captivity at Babylon.

(10) Nichols, *ubi supra*.

[D] Inquiry concerning the *constellations* spoken of in the book of Job.] In this letter, among other things which he endeavours to prove, one is, that the authors of the septuagint version did not understand the original, in those passages in which the *constellations* are mentioned. He thinks it probable, that those whom Ptolemy employed to translate the Hebrew writings knew nothing of astronomy, or the original names by which the *constellations* were first called by the old Chaldean or Egyptian observers; and

that this led them to 'apply, with uncertainty and confusion, the fabulous names given them by the Greeks, and which in their time had universally taken place of the other (11).'

[E] No reason for supposing it stamped.] In the first of these Dissertations, Mr. Costard observes, that whoever would prove the book of Job to be older than Moses from the *Kesitab* being mentioned in it, must take upon them to prove, 'that it was a coin out of use in Job's country ever since the time of that lawgiver; and must likewise assert, that the writer, in order to give his poem the air of antiquity, could not introduce the mention of such a coin, though laid aside, he knew, many hundreds of years before he was born (12).' He also takes notice, that Buxtorf says, the piece of money called the *Kesitab* was so named, 'because it had the figure of a Lamb stamped upon it, and his authority hath been implicitly followed by many of the moderns without examination. But if *Kesitab* never signifies a Lamb, as Bochart very rightly observes, then that could not be the reason of the appellation, whatever else was (13).' Upon the whole, Mr. Costard was of opinion, 'that the word *Kesitab* most probably signifies a coin of some sort or other, yet that it neither appears to have been stamped, nor can be proved to have been a Jewish one; that it is more reasonable to think it was a piece of Canaanite money; that it had, therefore, no connection with the law of Moses; nor consequently was set aside by it (14).'

(11) Farther Account of the Rise and Progress of Astronomy, p. 44, 45.

(12) Two Dissertations, p. 1, 2.

(13) *Ibid.* p. 17, 18.

(14) *Ibid.* p. 36.

Mr. Costard remarks, that 'who was the original author of stamped money is uncertain. But it is probable, it came into use among different people, at different times, according as they improved in arts and sciences, trade, and commerce. In Italy, if we believe Macrobius, the first coiner of money was Janus. But as his age is uncertain, as well as upon what authority Macrobius, a later writer, asserts this, or before him Athenæus, nothing farther can be said upon the subject. That silver was very scarce among the Romans, in much later times, seems evident; since we are told, that their money, before Numa, consisted only of bits of leather. This Prince is said to have introduced into that state brass money, which, however, was not stamped, but delivered out by weight. Servius Tullus, according to Pliny, was the first among them that stamped this brass coin, which he did, it seems, with the figure of an animal, an ox or a sheep. This, according to Pliny, was the only coin they had till A. U. C. 485, in the Consulship of Q. Fabius, and five years before the first Punic war. That war broke out in the year before Christ 261, and Fabius was Consul in the year before Christ 265. And it was sixty-two years later still before they had any gold money, or the year before Christ 203. What impressions they used upon these coins is

‘with any figure at all; and, therefore, not with that of a lamb in particular. II. On the signification of the word *Hermes*; in which is explained the origin of the custom, among the Greeks, of erecting stones called *Hermæ*; together with some other particulars, relating to the mythology of that people.’ These dissertations were inscribed to his friend Dr. Hunt, then Professor of the Hebrew and Arabic languages in the University of Oxford. At the conclusion of them, Mr. Costard says, ‘The study of the oriental languages seems to be gaining ground in Europe every day; and provided the Greek and Latin are equally cultivated, we may arrive in a few years at a greater knowledge of the ancient world, than may be expected, or can be imagined. But without this foundation, I may venture to pronounce, from the little experience I have had, that all will be darkness and perplexity. It is beginning at the wrong end, which can never be attended with success in any thing. It may not, perhaps, be improper to add, before I have done, that for such researches as these I have here been speaking of, few places, if any, in Europe, are so well adapted as the University of Oxford (f).’

(f) Nichols, *ut supra*, p. 628.

In 1752, he published, in 8vo, at Oxford, ‘Dissertationes II. Critico-Sacræ, quarum prima explicatur Ezek. xiii. 18. Altera vero, 2 Reg. x. 22.’ The same year a translation was published of the latter of these dissertations, under the following title: ‘A Dissertation on 2 Kings x. 22, translated from the Latin of Rabbi C——d, with a dedication, preface, and postscript, critical and explanatory, by the translator.’ In the preface and dedication to this publication, it is attempted to place Mr. Costard in a very ludicrous light (g).

(g) *Id. ibid.*

On the 25th of January, in the year following, a letter written by Mr. Costard to Dr. Bevis, concerning the year of the eclipse foretold by Thales, was read at the Royal Society, and was afterwards published in the Philosophical Transactions (h); as was also another letter written by him to the same gentleman, concerning an eclipse mentioned by Xenophon (i).

(h) Vol. xlviii. part i. p. 17.

(i) *Ibid.* p. 155.

At the close of the same year, another letter written by Mr. Costard, and addressed to the Earl of Macclesfield, concerning the age of Homer and Hesiod, was likewise read at the Royal Society, and afterwards published in the Philosophical Transactions for the year 1754 (k). In this letter Mr. Costard states the ages of Homer and Hesiod much lower than the ordinary computations. He endeavours to make it appear, from astronomical arguments, that Homer and Hesiod both probably lived about the year before Christ 580; which is three centuries later than the computation of Sir Isaac Newton, and more than four later than that of Petavius. In 1755, he wrote a letter to Dr. Birch,

(l) Birch's MSS.

No. 444c—580.

which is preserved in the British Museum (l), respecting the meaning of the phrase *Sphæra Barbarica* [F]. Some time after this, he undertook to publish a second edition of Dr. Hyde's *Historia Religionis veterum Persarum, eorumque Magorum*; and which was accordingly printed, under his inspection, and with his corrections, at the Clarendon Press at Oxford in 4to. in 1760. Mr. Costard's extensive learning having now recommended him to the notice of Lord Chancellor Northington, he obtained, by the favour of that nobleman, in June, 1764, the Vicarage of Twickenham, in Middlesex (m); in which situation he continued till his death. The same year he published, in 4to, ‘The Use of Astronomy in History and Chronology, exemplified in an Inquiry into the Fall of the Stone into the Ægospotamos, said to be foretold by Anaxagoras. In which is attempted to be shewn, that Anaxagoras did not foretell the fall of that stone, but the solar eclipse in the first year of the Peloponnesian war. That what he saw was a comet, at the time of the battle of Salamis: and that this battle was probably fought the year before Christ 478; or two years later than it is commonly fixed by chronologers.’

(m) New and Gen. Biog. Dict. 8vo. vol. iv. p. 142. edit. 1784.

In

uncertain; but the learned now seem to be agreed, that the practice of striking heads upon them, in the manner that is now seen on those called *Consular*, did not begin till about the times of Marius and Sylla, or the year before Christ 107.

How soon the Greeks became acquainted with the art of striking money, is yet more uncertain. But probably not till either commerce began to flourish among them, or they had occasion to pay large armies abroad. If this last was the case, that was not till the time of Darius Hystaspes, or about the year before Christ 520.—The oldest Greek coin extant, according to F. Hardouin, in his *Chronology of the Old Testament*, is one of Amyntas, the sixth in his order of Macedonian Kings. But this learned Jesuit afterwards published a gold one of Cyrene, which the authors of the notes in the *Science des Medailles* take to be as old as the time of Cyrus.

The first people that coined gold and silver money, according to Herodotus, were the Lydians. But what impress they used, or whether indeed any at all, he hath not told us. Nor can we know at present, as none of their coin that we can be certain of, is preserved in any of the cabinets of

Europe. The Medes their neighbours, we know, struck theirs with the effigies of their Prince shooting, and kneeling with one knee on the ground. These were called *Darics*, from the Prince that probably first coined them. Xenophon useth that name for a coin extant in Cyrus's time, and Suidas says, they were so called, not from Darius Hystaspes, but one elder than him. Perhaps Darius, the son of that Ahasuerus, who was King of the Medes at the taking of Babylon by Cyrus. That the first stamping of money, with an effigy in Asia, is to be placed somewhere about this time, is not improbable. But that silver unstamped was in use long before, is certain. At the time of the Jews captivity by Nebuchadnezzar, or the year before Christ 616, according to my computation, Jeremiah purchased his cousin's land for *seven shekel and ten sheph, or silverlings* (15).

(15) *Ibid.* p. 3—12.

[F] The meaning of the phrase *Sphæra Barbarica*. Mr. Costard says, that the most obvious and natural meaning of the words *Sphæra Barbarica*, which are used by Julius Firmicus in his *Astronomicon*, by Scaliger in his *Notes on Manilius*, and by other writers, seems to be constellations as delineated, or described, by other nations besides the Greeks, together

In 1767, he published, in one volume, 4to, 'The History of Astronomy, with its application to Geography, History, and Chronology; occasionally exemplified by the globes.' This work was chiefly intended for the use of students, and contains a full and distinct view of the several improvements made in geography and astronomy. Mr. Costard has shewn, 'by a gradual deduction, at what time, and by whom, the principal discoveries have been made in geography and astronomy, how each discovery has paved the way to what followed, and by what easy steps, through the revolution of so many ages, these very useful sciences have advanced towards their present state of perfection (n).' The following year he published, in 4to, 'Astronomical and Philological Conjectures on a Passage in Homer [G]:' but these conjectures appear to be fanciful and ill-grounded. About this time a correspondence took place, between the learned Jacob Bryant, Esq; and Mr. Costard, concerning the land of Goshen [H], which has been lately published by Mr. Nichols, in his 'Miscellaneous Tracts by Mr. Bowyer (o).' We do not find that from this period

(n) Monthly Review, vol. xxxviii, p. 324.

(o) 4to. 1785.

gether with the names by which they distinguished them.' But, he adds, that the phrase may mean what Berosus and his Chaldeans taught concerning persons born when such or such a particular constellation rose, or what events might be expected to attend them throughout their life-time after (16).'

(16) Birch's MSS. No. 4440—530.

[G] *Conjectures on a passage in Homer.* The passage in question is that in which Thetis tells Achilles, that she cannot speak to Jupiter in his behalf, because he is gone to an Ethiopian feast, from which he will not return till the end of twelve days. In order to explain this, Mr. Costard, contrary to the general sense of antiquity, endeavours to prove, that Jupiter means the sun, and that a day signifies a month (17).

(17) Monthly Review, vol. xxxix. p. 402, 403.

[H] *Concerning the land of Goshen.* Mr. Costard endeavoured to prove, that Goshen was 'the Delta of the Greeks in general, at least that part of it which was habitable in the time of Joseph (18).'

(18) Nichols's Miscellaneous Tracts by Mr. Bowyer, p. 681.

—'The particular spot inhabited by the Israelites,' he says, 'was called the Land of Rameses (Gen. xlvii. 11.) from a city of that name which, probably, was the capitol of that district. And it was from that city that the Israelites began their march (Exod. xii. 37.)' He adds, 'Wherever Goshen is to be placed, it could not be at a very great distance from the Red Sea, and the nearer the better; for the Israelites crossed it in the night of the third day from their setting out from Rameses. And Rameses is expressly said, Gen. xlvii. 6. to be in or belong to that district. For though Goshen, from the name, seems as if it lay between the branches of the Nile, yet the territory might extend without it to the East, where I conjecture Rameses

(19) *Ibid.* p. 686.

was situated (19).' He thought that Rahab, Goshen, and Delta, meant the same country and district; and that Zoan, Goshen, Rahab, and Delta, were only different names given at different times to one and the same country. Mr. Bryant differed from Mr. Costard upon this subject. 'There is reason to think, says he, that not a part only, but the whole of Delta was habitable in the time of Joseph: for the Caphtorim had made their migration to Philistia before the days of Abraham; and their original establishment is supposed by most learned men to have been about Pelusium and Sethron; and if the sea coasts were inhabited, we may readily admit that the higher lands were so likewise, for they must have been first occupied. Both this settlement in Egypt, and migration from it, are mentioned by the prophets. *Have I not brought up Israel out of the land of Egypt, or Misraim, and the Philistines from Caphtor?* Amos ix. 7. *The Lord will spoil the Philistines, the remnant of the country, or rather of the isle, of Caphtor.* Jer. xlvii. 4. The Caphtorim, we find, are put into opposition to the Misraim; the former inhabited one of the island provinces near the sea, the latter were in possession of the other parts of Delta. The region of the former being unwholesome and inconvenient for its marshy and barren soil, probably induced them to quit it very early; for before the time of Abraham's sojournment in Canaan, they had driven the Avim from their settlements in that country, and seized them to their own use. Gen. xx. xxii. 33, 34. See Bochart, I. 293. But waving this, and allowing to Delta what extent you please, yet Goshen and Delta can never be esteemed synonymous, and the same, without perplexing the Mosaic account, and making it in

many places inconsistent with itself. The wonders exhibited in Egypt are said to have been displayed in Rahab and in Zoan. Pharaoh confessedly resided in those parts; and they must necessarily have been occupied by many of the Misraim, and the Naphtuhim, as the upper regions of Egypt were possessed by the sons of Pathros. Let us then, as Goshen and Delta are to be esteemed synonymous, use them in that manner, putting one for the other, as shall seem best to us, and attend the consequence. In the plague of flies, the cities and houses of the Misraim were to be full of them, and also the ground on which they stood was to be covered: but, says the Lord, *I will sever in that day the land of Goshen, in which my people dwell, that no swarms of flies shall be there.* Exod. viii. 21, 22. The land of Goshen was to be severed: it is plain, therefore, that it was a detached province. If, instead of Goshen, you put Rahab or Delta, every circumstance will be contradictory. The land will, without any limitation, be said to be affected, and at the same time not to be affected, with this curse from heaven. Again, Ch. ix. ver. 24, 25, 26, we read of the plague of hail, where fire was mingled with the hail. It is said to have been grievous over all the land of Egypt; there was none like it in all the land of Egypt or Misraim since it became a nation; and the hail smote throughout all the land of Egypt, or Misraim, &c. only in the land of Goshen there was no hail. If then the land of Goshen was Rahab and Delta, there could be no hail in Delta and Rahab, nor in Zoan; for they are by you supposed to be the same, yet they were the places of all others which were most afflicted by it. As then the Scripture plainly says, that in the land of Goshen, where the children of Israel dwelt, none of these plagues were felt; it is manifest, that the land of Goshen was a particular and separate district; and never could comprehend all Rahab or Delta, of whatever dimensions they may be supposed to have consisted (20).'

(20) *Ibid.* p. 689, 690.

After some farther arguments in support of his opinion, which appear to be conclusive, Mr. Bryant adds, that the Land of Goshen was a particular district 'at the very point of Delta, above Heliopolis, and called the Arabian Nome by the Greeks; but originally termed Cusha and Cushan, and by the Misraim Gushan. Its situation may be exactly defined, as it lay at the extreme point of Delta, nearly between Babylon and the Pyramids, which latter were a small matter above; which Cusha was in process of time called by different nations Casa, Kaifa, Geesha: and it is demonstrable from its situation, that the modern Geeza is the very place; for it lies exactly in the same direction between the Hill of Arabia, where stood Babylon and the Pyramids before-mentioned (21).' Mr. Costard had partly supported his opinion by etymological arguments; but Mr. Bryant says, 'I know nothing more fallacious than etymological proofs: and I have made it a rule, never to admit them singly and unsupported; on the contrary, to make etymology dependent upon history, and not to render history blindly subservient to etymology (22).'

(21) *Ibid.* p. 691.

(22) *Ibid.* p. 693.

But though Mr. Bryant differed from Mr. Costard upon this subject, he professed a due esteem of his parts and learning, and acknowledged, that in what he had written relative to it, he had displayed much curious erudition (23).]

(23) *Id. ibid.*

our author printed any work for some years; but in 1778, he published, in 8vo, "A Letter to Nathaniel Brassey Halhead, Esq; containing some Remarks on his Preface to the Code of Gentoo Laws." This appears to have been the last of his publications: it contains some criticisms, which were intended to invalidate the opinion, which Mr. Halhead had conceived, concerning the great antiquity of the Gentoo laws, and some arguments against a notion which had been adopted by several writers, drawn from the observation of natural phænomena, that the world is far more antient, than it is represented to be by the Hebrew chronology. Mr. Costard died on the 10th of January, 1782 (p). (p) Nichols, *ut supra*, p. 629. He was a man of uncommon learning, and eminently skilled in Grecian and Oriental literature. But he dealt too much in conjectures; and appears to have been possessed of more erudition than judgment. His private character was amiable; and he was much respected in the neighbourhood in which he lived, for his humanity and benevolence. From some passages in his writings, he appears to have been strongly attached to the interests of public freedom. He had a great veneration for the antient Greeks; of whom he says, that 'Tis to the happy genius of that once glorious people, and that people alone, 'that we owe all that can properly be styled astronomy (q).' And in another place, he says of the Greeks, that 'their public spirit and love of liberty claim both our admiration and imitation. How far the sciences suffer, where oppression, superstition, and arbitrary power prevail, that once glorious nation affords at this day too melancholy a proof (r).' (q) Letter to Martin Folkes, Esq. p. 22. (r) *Ibid.* p. 157. Mr. Costard's library, oriental manuscripts, and philosophical instruments, were sold by auction by Mr. Samuel Paterson, in March, 1782 (s).] (s) Nichols, *ut supra*. T.

COTES (ROGER), a celebrated Mathematician and Plumian Professor of Astronomy and Experimental Philosophy in the University of Cambridge in the eighteenth Century. He was the son of the Reverend Mr. Robert Cotes, Rector of Burbage in Leicestershire, which was also the place of his nativity (a) [A]. He was born there July the 10th, 1682, and received his first education at Leicester school, where, when he was between eleven and twelve years of age, he shewed a strong inclination to the mathematics, which being observed by his uncle the Reverend Mr. John Smith, father to the worthy Dr. Robert Smith, his successor as Plumian Professor in the University of Cambridge, he gave him all imaginable encouragement, and prevailed upon his father, to send him for some time to his house in Lincolnshire, that he might assist him in those studies, where he laid the solid foundation (b) of that deep and extensive knowledge in those sciences, for which he was afterwards so deservedly famous. He removed thence to London, and was sent to St. Paul's school, where under the care of Dr. Thomas Gale, and Mr. John Postlethwait, successive Masters, he made a great progress in classical learning, and yet found so much leisure as to keep up a constant correspondence with his uncle, not only in Mathematics, but also in Metaphysics, Philosophy, and Divinity (c). His next remove was to Cambridge, where, April 6th, 1699, at the age of seventeen, he was admitted Pensioner of Trinity-College in that University, and at Michaelmas 1705 was chosen Fellow of his College (d). He was at the same time Tutor to Anthony Earl of Harold, and the Lord Henry de Grey sons to the then Marquis, afterwards Duke of Kent, to which most noble family Mr. Cotes had the honour to be related (e). In January following he was appointed Professor of Astronomy, and Experimental Philosophy, upon the foundation made by Thomas Plume, Doctor in Divinity, Archdeacon of Rochester, being the first that enjoyed that office, to which he was chosen for his great learning and eminent abilities (f). He took the degree of Master of Arts in 1706, and in 1713 he entered into Holy Orders. The same year, at the desire of Dr. Richard Bentley, he published at Cambridge the second edition of Sir Isaac Newton's Mathematical Principles of Natural Philosophy, with all the improvements which the author had made to that time, to which he prefixed a most excellent preface (g). This added greatly to the high reputation he had already acquired for his profound knowledge in the abstrusest parts of the mathematics, amongst the greatest men of the age. He wrote also a description of the great Meteor, that was seen on the 6th of March 1715-6, which was published in the Philosophical Transactions (h) [B]. These

[A] Which was also the place of his nativity.] The little town of Burbage, or rather Burbach, lying in Sparkenhoe-hundred, in Leicestershire, and at the distance of about six miles from Leicester; is remarkable for its once having had an Earl for its Rector (1). This noble and reverend person was Anthony de Grey, the eighth Earl of Kent, who was Minister there at the time that ancient title descended to him, in 1639, and to his honour be it remembered, that he did not think himself obliged to alter his manner of living in the least. He kept a very hospitable house before, and was always glad of the company of his brethren, in which course he continued, excusing his attendance in parliament, on account of his age and infirmities, which, however, he would not suffer to excuse him from the

(1) Knight's Life of Dean Colet, p. 429, 430.

duties of his function, preaching constantly as long as it was possible for him to be carried up into the pulpit (2). He was great grandfather to the late Henry, Earl, Marquis, and at length Duke of Kent, to whom, as descended from a daughter of Major Farmer, in the same county, our author, Mr. Cotes was, nearly related.

(2) Fuller's Worthies, in Durham, p. 299.

[B] Which was published in the Philosophical Transactions.] This curious account is contained in a letter to Robert Danyne, D. D. Rector of Spofforth, in Yorkshire; which though it went out of his hands in his life-time, and might be very probably transmitted to the Royal Society before his death, yet it was in some respect a posthumous work, since it did not appear 'till after our author's decease. There are two things in

These were the only fruits of his learned and laborious studies, that appeared in his lifetime; but he left behind him several admirable and judicious Tracts, part of which, after his decease, his learned kinsman and worthy successor in his professorship, Dr. Robert Smith, gave to the public, which were received with universal approbation [C]. He died,

(3) Philosophical Transactions, vol. xxxii. No. 365. p. 66.

in it very remarkable, the first is the clearness and conciseness with which the facts are described, the other the plainness and perspicuity of the manner in which he accounts for them; the reader will not be displeased to have a taste of both (3). 'It was, says he, after seven before I had notice of this uncommon sight. At first I saw only two or three of the triangular streams towards the north and north-west: These were not of long duration, but were succeeded by others, which appeared, and vanished again by turns, arising from, and ascending up to places in the Heavens of very different altitudes above the Horizon. From the time I began to view them, they continued to ascend more and more copiously, being propagated still farther and farther from the north towards the west and east, and directed always to the heads of *Gemini*, 'till at length when they seemed almost to meet at the point of convergence, they began to ascend up towards it from the southern parts also, and all round it; in so much that at a quarter after seven we had a perfect canopy of rays over us: the bottom of this canopy did no where reach down to the horizon; for near the north, where it descended the most, its altitude was about ten or fifteen degrees, and near the south where it descended the least, its altitude was about forty degrees. It remained in this state about two minutes, during which time we saw several colours, some fainter and more permanent, others brighter, but quickly vanishing. Thus in the west I observed the rays to be tinged for some considerable time, with an obscure and heavy red; and in one of the brightest streams, at another time there suddenly broke out a very vivid red, which was instantly and gradually succeeded by the other prismatic colours; all vanishing in about a second of time. These colours affected the sense so strongly, that I thought them to be more intense than those of the brightest rainbow I had ever seen. A small time before the appearance lost its perfection, we were surprized to observe a shaking and trembling of the streams, chiefly in their upper parts; during which their convergence was confounded, and the whole Heaven seemed to be in a convulsion. At the same time I could perceive waves of light towards the north, which moved upwards, and in their motion crossed the streams lying parallel to the horizon. These waves were different from those broad ones, which you mention, and which I also took notice of: Their breadth seemed to be about a degree, their length about ninety degrees, and I can compare them to nothing better, than to those slender waves upon the surface of stagnant waters, which are made by casting in a small stone.—An irregular gust of wind blowing upon and shaking the columns, was I suppose the cause of that trembling which appeared in the triangular streams; and the cause also which destroyed that fine appearance of the canopy. The slender circular waves seen at the same time, might also be explained from the same cause. I need not detain you any longer by endeavouring to make out some other particulars of this unusual appearance: I fear I have been already too tedious. However, I will not omit to mention a very easy contrivance by which the thing may be tolerably well represented to view. Take a hoop and round about it fasten several straight sticks parallel to each other, but all inclined to the plane of the hoop; hold this plane parallel to the horizon, and in that posture move it with sticks over a candle, the shadows of the sticks upon the ceiling of your room, will converge to a point not directly over the candle (as they would have done had the sticks been perpendicular to the plane of the hoop) but to the point in which a line drawn from the candle parallel to the sticks, shall intersect the plane of the ceiling.'

[C] Were received with universal approbation.] The title of this work at large runs thus. *HARMONIA MENSURARUM, sive Analysis & Synthesis per rationum angu-*

lorum mensuras promotæ: accedunt alia Opuscula Mathematica: per Rogerum Cotesium. Edidit et auxit Robertus Smith, Collegii S. Trinitatis apud Cantabrigienses socius, Astronomiæ & Experimentalis Philosophiæ post Cotesium professor. Cantabrigiæ 1722, 4to. That is *The Harmony of Measures: or Analysis and Synthesis advanced by the measures of Ratio's and Angles. To which are added other Mathematical pieces by Roger Cotes. Published and augmented by Robert Smith, Fellow of Trinity College in Cambridge, and successor to the said R. Cotes, as Professor of Astronomy and Experimental Philosophy.* This work is dedicated by the learned editor to Dr. Richard Mead. He next proceeds to give us, in a very elegant and affectionate Preface, a copious account of the performance itself, the pieces annexed to it, and of such other of the author's works as are yet unpublished. He tells us how much this work was admired by the judicious Professor *Saunderson*, and how dear the author of it was to the late learned Dr. Bentley, to whom he gives the highest, that is the justest, commendations. This book consists of three parts. In the first, called *Logometria*, the author's chief design is to shew how that sort of problems, which are usually reduced to the quadrature of the Hyperbola and Ellipsis, may be reduced to the measures of Ratio's and Angles, and afterwards be solved more readily by the canon of Logarithms, Sines, and Tangents. He defines the measures of Ratio's to be quantities of any kind, whose magnitudes are analogous to the magnitudes of the Ratio's to be measured. In this sense any canon of Logarithms is a system of numeral measures of the Ratio's of the absolute numbers to an Unit: The parts of the asymptote of the Logistic line intercepted between its ordinates, are a system of linear measures of the Ratio's of those ordinates: The areas of an hyperbola, intercepted between its ordinates to the asymptote, are a system of plane measures of the Ratio's of those ordinates: And since there may be infinite systems of measures, according as various kinds of quantities are made use of; such as number, time, velocity, and the like; or according as the measures of any one system may be all increased or diminished in any given proportion; in such variety, much confusion may possibly arise, as to the kind and absolute magnitudes of particular measures, which happen to fall under consideration. Our author very happily removes this difficulty, by shewing, that the nature of the subject points out the measure of a certain immutable Ratio, for a modulus in all systems whereby to determine the kind and absolute magnitudes of all other measures in each system. The first proposition is to find the measures of any proposed Ratio. This he considers in a way so simple and general, as naturally leads to the notion and definition of a modulus; namely, that it is an invariable quantity in each system, which bears the same proportion to the increment of the measure of any proposed Ratio, as the increasing term of the Ratio bears to its own increment. He then shews that the measure of any given Ratio is as the modulus of the system from whence it is taken, and that the modulus in every system is always equal to the measure of a certain determinate and immutable Ratio, which he therefore calls the Ratio modularis. He shews that this Ratio is expressed by these numbers 2,7182818, &c. to 1, or by one, to 0,3678794, &c. so that in Briggs's canon, the Logarithm of this Ratio is the modulus of that system: In the Logistic line, the given subtangent is the modulus of that system. In the hyperbola, the given parallelogram contained by an ordinate to the asymptote, and the absciss from the center, is the modulus of that system, and in other systems the modulus is generally some remarkable quantity. In the second proposition, he gives a concise uncommon method, for calculating Briggs's canon of Logarithms, together, with rules for finding intermediate Logarithms, and numbers, even beyond the limits of the canon. In the third proposition, he constructs any system of measures by a canon

died, to the regret of the University in general, and more especially of such as were addicted to mathematical studies, in the prime of his life, in the thirty-third year of his age, June the

non of Logarithms, not only when the measure of some one Ratio is given, but also without that datum, by seeking the modulus of the system by the rule above-mentioned. In the 4th 5th and 6th propositions, he squares the hyperbola, describes the logistic line, and equiangular spiral, by a canon of Logarithms; and shews some curious uses of these propositions in their scholia. Take an easy example of the logometrical method in the common problem for finding the density of the atmosphere. Supposing gravity uniform, every one knows that if altitudes are taken in any arithmetical progression, the densities of the air in those altitudes will be in a geometrical progression, that is, the altitudes are the measures of the Ratio's of the densities below, and in those altitudes; and so the difference of any two altitudes is the measure of the Ratio of the densities in these altitudes. Now to determine the absolute or real magnitude of these measures, the author shews *à priori*, that the modulus of the system is the altitude of the atmosphere, when reduced every where to the same density as below. The modulus therefore is given (as bearing the same proportion to the altitude of the mercury in the barometer, as the specific gravity of mercury does to the specific gravity of air) and consequently the whole system is given. For since in all systems the measures of the same Ratio's are analogous among themselves, the Logarithm of the Ratio of the air's density in any two altitudes, will be to the modulus of the canon (that is to the Logarithm of the Ratio modularis defined above) as the difference of those altitudes is to the aforesaid given altitude of the homogeneous atmosphere. He concludes the Logometria with a general scholium, containing great variety of elegant constructions, both logometrical and trigonometrical, such as give the length of curves, either geometrical or mechanical, their areas and centers of gravity, the solids generated from them, and the surfaces of these solids, together with several curious problems in Natural Philosophy, concerning the attraction of bodies, the density and resistance of fluids, and the trajectories of planets. Several of these problems have two cases, one constructed by the measure of a Ratio, and the other by the measure of an angle. The great affinity and beautiful harmony of the measures in these cases have given occasion to the title of the book. The measures of angles are defined to be quantities of any kind, whose magnitudes are analogous to the magnitudes of the angles. Such may be the arcs or sectors of any circle, or any other quantities of time, velocity, or resistance, analogous to the magnitudes of the angles. Every system of these measures has likewise its modulus, homogeneous to the measures in that system, and may be computed by the trigonometrical canon of sines and tangents, just as the measures of Ratio's by the canon of Logarithms; for the given modulus in each system, bears the same proportion to the measure of any given angle, as the Radius of a circle bears to an arc, which subtends that angle, or the same as this constant number of degrees 57,29577 95130 bears to the number of degrees in the said angle. Upon the whole our author expresses himself thus. 'From these examples it will lie wholly in the power of able Geometricians to form a judgment of our method, which if they shall approve, they may carry it still farther, and thereby considerably extend its uses. A vast field lies open, in which they may exert their abilities; but especially if they add to Logometrics, the assistances that may be derived from trigonometry; for that there is a wonderful affinity and connection between these, I shall plainly make appear. I can hardly believe that any principles can be devised more general than these; as mathematics contain scarcely any thing else within its compass, than the theory of angles and ratio's. Neither will any one desire a more commodious method, who considers the facility in these matters, derived to us from those extensive tables, as well of the logarithms of whole numbers, as of signs and tangents, which were the valuable effects of our predecessors laudable industry. To

this end I have added some theorems both logometrical and trigonometrical, &c.' The reason which induced the author to assert his principles to be so general, will appear farther by an instance or two. In the problem already mentioned, he measures the ratio of the air's densities in any altitudes, by the altitudes themselves, making use of the altitude of an uniform atmosphere for the modulus. So likewise when he considers the velocities acquired, and the spaces described, in given times, by a body projected upwards or downwards, in a resisting medium with any given velocity; he shews that the times of descent added to a given time, are the measures of ratio's to a given modulus of time; whose terms are the sum and difference of the ultimate velocity and the present velocities that are acquired, that the times of ascent taken from a given time are the measures of angles to a given modulus of time, whose radius is to their tangents in the ratio of the ultimate velocity to the present velocities; and lastly, that the spaces described in descent or ascent, are the measures of ratio's to a given modulus of space, whose terms are the absolute accelerating and retarding forces arising from gravity and resistance taken together at the beginning and end of those spaces. This general account may suffice to illustrate what I am going to say, that since the magnitudes of ratio's, as well as their terms, may be expounded by quantities of any kind, the mathematician is at liberty, upon all occasions, to chuse those which are fittest for his purpose, and such are they without doubt that are put into his hand by the conditions of the problem. He may indeed represent these quantities by an hyperbola, or any other logometrical system, were not his purpose answered with greater simplicity by the very system itself which occurs in each particular problem. And the same may be said for the systems of angular measures, instead of recurring upon all occasions to elliptical or circular areas. As to the convenience of calculating from our author's constructions; he shews that the measures of any ratio's or angles are always computed in the same uniform way, by taking from the tables the logarithm of the ratio, or the number of degrees in the angle, and then by finding a fourth proportional to three given quantities, for that will be the measure required. The simplest hyperbolic area may indeed be squared by the same operation taught in the author's fourth proposition, but the simplest elliptic area requires somewhat more: Those that are more complex in both kinds, which generally happens, require an additional trouble to reduce them to the simplest: to square them by infinite series is still more operose, and does not answer the end of Geometry. Upon the whole therefore it may deserve to be considered; for what purpose should problems be always constructed by conic areas, unless it be to please or assist the imagination. The design of theoretical Geometry differs from problematical: the former consists in the discovery and contemplation of the properties and relations of figures, for the sake of naked truth, but the design of the latter is to do something proposed, and is best executed by the least apparatus of the former. The Logometria was first published by the author himself, in the Philosophical Transactions. But his logometrical and trigonometrical theorems above-mentioned were not published till after his decease. These theorems make the second part of the book, and are calculated to give the fluents of fluxions reduced to 18 forms by measures of ratio's and angles, in such a manner that any person may perfectly comprehend their construction and use, though altogether unacquainted with curvilinear figures as expressed by equations. And this circumstance also renders the speedy application of them to the analysis and construction of problems extremely easy. Of this kind the author has given a great many choice examples both in abstract and physical problems, which make up the third and last part of the book. The editor has published the author's own solution of a very difficult problem in fluxions by measures of ratio's and angles, and upon this foundation has constructed new tables of logometrical and trigo-

the 5th, 1716, and was buried in the Chapel of Trinity-College Cambridge, his memory being honoured with an inscription by the elegant pen of the most learned Dr. Bentley, Master of that College, his constant friend and patron (i).

(i) See this inscription at the end of Dr. Smith's Preface to the *Harmonia Mensurarum*.

trigonometrical theorems for the fluents of fluxions, reduced to ninety-four forms, part rational and part irrational. He has likewise added several notes upon the chief difficulties in the book, together with a method of composing synthetical demonstrations of logometrical and trigonometrical constructions, illustrated by various examples.

The first treatise in the miscellaneous works is concerning the estimation of errors in mixed Mathematics. It consists of twenty-eight theorems, to determine the proportion among the least contemporary variations of the sides and angles of plane and spherical triangles, while any two of them remain invariable. An example will shew their great use in astronomy. The time of the day or night is frequently to be determined by the altitude of some star. Let it then be proposed to find the error that may arise in the time from any given error, in taking the altitude. By applying the 22d theorem to the triangle formed by the complement of the star's altitude and declination, and by the complement of the pole's elevation, the author shews that the variation of the angle at the pole, and consequently the error in time, will be as the error in the altitude directly, as the sine complement of the pole's inversely, and as the sine of the stars azimuth from the meridian inversely. Consequently if the error in the altitude be given, under a given elevation of the pole; the error in time will be reciprocally as the sine of the azimuth contained by the meridian, and the vertical which the star is in. This error therefore will be the same, whatever be the altitude of the star, in the same vertical, and will be least when the vertical is at right angles to the meridian. But will be absolutely the least in the same circumstance if the observer be under the equator. In which case, if the error in the altitude be one minute, the error in the time will be four seconds. If the observer recedes from the equator towards either pole, the error will be increased in the proportion of the radius to the sine complement of the latitude: So that in the latitude of 45 degrees it will be 5 $\frac{1}{2}$ seconds, and in the latitudes of 50 and 55 it will be 6 $\frac{1}{2}$ and 6 $\frac{3}{4}$ seconds respectively. If the star be in any other vertical oblique to the meridian, the error will still be increased in the proportion of the radius to the sine of that oblique angle. Lastly, if the error in the altitude be either bigger or less than one minute, the error in time will be bigger or less in the same proportion. Much after the same manner may the limits of errors be computed in other cases which arise from the inaccuracy of observations, and hence the most convenient opportunities for observing are also determined. The second treatise is concerning the differential method. The author having written it before he had seen Sir Isaac Newton's treatise upon that subject, has handled it after a manner somewhat different. The name of the third treatise is CANONOTECTHICA: or concerning the construction of Tables by differences. It consists of ten propositions, mostly admirably contrived for expeditious computation of intermediate terms in any given series. The last proposition, which contains a general solution of the whole design, is this. 'Some of the equidistant terms being given of any series, the intervals of which are divided into any number of equal parts, let it be proposed to find the intermediate terms.' The book concludes with three small tracts concerning the Descent of Bodies, the motion of Pendulums in the Cycloid, and the motion of Projectiles, delivered in a very natural and easy manner. These tracts, as the editor informs us, were all composed by Mr. Cotes,

when he was very young. He wrote also a Compendium of Arithmetic, of the Resolutions of Equations, of Dioptricks, and of the nature of curves; all which pieces the learned editor declared his intention of publishing. Besides these which were in Latin, he composed a course of Lectures in English, which were published by Dr. Smith in 1737; since which time there has been a second edition; the title of which we shall give at large for the reader's satisfaction.

HYDROSTATICAL and PNEUMATICAL LECTURES, by Roger Cotes, M. A. late Professor of Astronomy and Experimental Philosophy at Cambridge, the second Edition by Robert Smith, D. D. Master of Trinity College Cambridge 1747, 8vo. The first edition was printed as is before observed in 1737, and both are inscribed to his Royal Highness William Duke of Cumberland. C.

** [When Dr. Plume founded a new Professorship for Astronomy and Experimental Philosophy, in the University of Cambridge, Mr. Whiston was one of the Electors. Besides Mr. Cotes, there was another candidate, who had been a Scholar of Dr. Harris's. As Mr. Whiston was the only Professor of Mathematics who was directly concerned in the choice, the rest of the electors naturally paid a great regard to his judgment. At the time of election, Mr. Whiston said, that he pretended himself to be not much inferior to the other Candidate's Master, Dr. Harris; but he confessed that he was but a child to Mr. Cotes (4). The votes were unanimous for Mr. Cotes; and it should be remembered, that he was then only in the twenty-fourth year of his age.

(4) Whiston's Memoirs of his own Life and Writings, p. 116.

In 1707, Mr. Whiston and Mr. Cotes united together in giving a course of Philosophical Experiments at Cambridge. Among other parts of the undertaking, certain hydrostatic and pneumatic Lectures were composed. They were in number twenty-four, of which twelve were written by Mr. Cotes, and twelve by Mr. Whiston. But Mr. Whiston esteemed his own Lectures to be so far inferior to those of Mr. Cotes, that he could never prevail upon himself to revise and improve them for publication (5).

(5) Ibid. p. 113, 119.

The early death of Mr. Cotes is always spoken of with regret by every mathematician, and every philosopher; since, if his life had been continued, he would undoubtedly have proved one of the greatest men which this country has produced.

We cannot refuse ourselves the pleasure of inserting Dr. Bentley's elegant inscription to the memory of Mr. Cotes.

Sherley of Stanton in the County of Leicester, Esq. Where this worthy person laid the foundation of that great knowledge of Antiquities he afterwards acquired, or what School he was educated in, is unknown. However, when he was fit for the University, he was admitted into Trinity-College in Cambridge (b), where he took the degree of Bachelor of Arts in 1575 (*). From thence he went and lived some time in the country with his Father. But finding that he wanted in that retired condition several opportunities of improvement, which he could have in a more public place, he came to London; and having soon made himself known, was admitted into a Society of Antiquaries (c), which was composed of several very learned and eminent persons [C]. Here, following the natural bent of his genius, he prosecuted the study of Antiquities with the utmost alacrity, and with uncommon success: and, improving the favourable circumstances that were presented to him [D], he began in the eighteenth year of his age (d) to gather together ancient Records, Charters, and other Manuscripts; and left at his death the choicest Collection of this kind that ever was seen in any Age or Nation. In 1599, or 1600 (e), he accompanied Mr. Camden to Carlisle, who acknowledges to have received from his singular courtesy great light in those obscure and intricate matters which he treats of in his Britannia: and, probably, then it was that Mr. Cotton brought from the Picts-Wall, several Roman Monuments still to be seen at Connington (f). In the same year 1600 he wrote a *Brief Abstract of the Question of Precedencie between England and Spaine* (g), which was occasioned by Queen Elizabeth's desiring the thoughts of the Society of Antiquaries on that point, upon her sending Sir Henry Nevill Ambassador to Boulogne to treat of a peace with Archduke Albert (h). Having, in Queen Elizabeth's reign, rendered himself eminent for merit and learning, and being highly in favour with the Lord Henry Howard, afterwards Earl of Northampton; he was, at the accession of King James I. to the throne of England, created a Knight (i). During this whole reign he was very much courted, admired, and esteemed by the greatest men in the nation, and consulted, as an Oracle, by the Privy-Counsellors, and the rest of the Ministers, upon every difficult point relating to our Constitution: As, namely, about the Union of England and Scotland—the Dignity and precedence of the Knights of the Bath—the Laws of England before the Conquest—about embasing the Coin—the taxes granted from time to time to our Kings, &c. (k). In 1608, he was appointed one of the Commissioners to enquire into the State of the Navy, which had lain neglected ever since the death of Queen Elizabeth (l); and drew up a Memorial of their Proceedings, to be presented to the King (m). In 1609 he wrote 'a Discourse of the lawfulness of Combats to be performed in the presence of the King, or the Constable and Marshal of England (n): and, 'An answer to such Motives as were offered by certain Military men to Prince Henry, to incite him to affect arms more than peace.' Composed at the command of that Prince (†). For, several persons that were about him, knowing his enterprising genius, were endeavouring to stir up in him an

England, even long before the time of King Edward III. They took their surname from Cotton in the County Palatine of Chester; and from William de Cotton, who lived in that county, are derived all the eminent families of that name in England. From this William was descended, in the fourth degree, William who married Agnes daughter and heir of Walter de Redware in the county of Stafford. His son was John, who, 12 Henry IV. married Isabella daughter and heir of William Falconer of Thurcaston in the county of Leicester. They had Richard who married Elizabeth, sister and coheir of Sir Hugh Venables, Knt. Their SECOND son was William, who, in the reign of Henry VI. married Mary daughter and heir of Robert Wefenham, Esq. This William being slain at the battle of St. Alban's May 23, 1455, left his only son and heir Thomas great-great-grand-father of Sir Robert Cotton. Mary just now mentioned, was grand-daughter of Agnes daughter and coheir of John Brus (or Bruce) of Connington and Exton, Esq; and by her was the Connington Estate brought into the Cotton family. This John Brus was lineally descended from Bernard second son of Robert Brus Lord of Annandale in Scotland, and Isabella daughter and coheir of David the second Earl of Huntingdon. From this Robert and Isabella was the Royal Family of Scotland descended; and by this means the Cotton-Family came to be related to the Kings of Scotland and England. On which account King James was wont to call Sir Robert Cotton *Cousin*; and Sir Robert used frequently to write his own name *Robert Cotton Bruce* (2).

[C] *A Society of Antiquaries, &c.* The first rise of this Society was 1590, when several ingenious Lovers of Antiquities agreed to meet every Friday in Term-time, at Derby-House, where the Herald's Office is now kept. Two Questions were proposed at every

meeting, which were to be handled at the next. But many of the chief Supporters of it either dying, or removing from London, it was discontinued for about twenty years. At last in 1614, it was revived by Sir James Ley Attorney of the Court of Wards, afterwards Earl of Marlborough, Sir Robert Cotton, Sir John Davis his Majesty's Attorney for Ireland, Sir Richard St. George Norroy, William Hackwell the Queen's Solicitor, Mr. Camden, Sir Henry Spelman: To whom may be added such of the old Foundation as were still living, viz. Arthur Agard, Lancelot Andrews, Henry Bouchier, Richard Broughton, Richard Carew, William Dethick, Sir John Doderidge, ——— Doyley, William Fleetwood, Abrah. Hartwell, Michael Heneage, Joseph Holland, Thomas Lake, Francis Leigh, ——— Oldworth, William Patten, John Stow, Thomas Talbot, Francis Thynne, James Whitlock, &c. They met at the same place as the former.—The first Society petitioned Queen Elizabeth, to be incorporated into a Society, or Academy, for the study of Antiquities and English History: but for fear That should be prejudicial to our two Universities, their Petition was rejected; as it was also in the next reign. At last the suspicious Court of King James I. taking umbrage at their Meetings, they dissolved themselves of their own accord (3). What Subjects they handled, the curious Reader may see in Sir Robert Cotton's Life, by Dr. T. Smith, prefixed to his Catalogue of the Cottonian Library, p. ix. (See article AGARD (ARTHUR)).

[D] *And, improving the favourable circumstances that were presented to him, &c.* For there were many such MSS. dispersed about, which had been taken out of the Libraries belonging to the Monasteries, that were then but newly dissolved.

(3) Vita D. Rob. Cottoni, ubi supra, p. 7, 8, 9. Sir H. Spelman's Preface to Law-Terms.

incli-

inclination to military affairs; which was not at all agreeable to the King his father's peaceable and timorous temper. But, what mostly employed Sir Robert's thoughts were the Collections he was ordered to make relating to the Revenue of the Crown, and the 'Manner and Means how the Kings of England have from time to time supported, and repaired their estates (6).' For King James having prodigally exhausted his Treasury, new Projects (as they were then called) were to be contrived to fill it up again. Accordingly, our ancient Histories and Records were searched, to find out means and methods to repair the King's Revenue, and to discover the Courses used by our Kings in raising Money (p). But of all the methods set down by Sir Robert and others, none proved so agreeable to the King, as the creating a new order of Knights, called *Baronets* [E]. Sir Robert Cotton, who had done great service in that affair (q), was chosen to be one, being the twenty-ninth Baronet that was created. He was, soon after, employed by the same King, to write *Animadversions upon Buchanan's and Thuanus's Accounts of the Behaviour and Actions of Mary Queen of Scots*, and to give a different turn to them from what had been done by those two famous Historians (r). What he drew up on that subject is supposed to be interwoven in Camden's *Annals of Queen Elizabeth*, or else printed at the end of Camden's *Epistles*. In 1616 the same King, who was always a favourer of the Papists, and never cared to put the laws against them in execution, finding the Nation uneasy on account of their swarming in the Kingdom, ordered Sir Robert to examine, Whether, by the laws of the land, they ought to be put to death, or imprisoned? which Sir Robert performed with great learning (s), and wrote upon that occasion, 'Twenty-four Arguments, whether it be more expedient to suppress Popish practices against the due allegiance of his Majesty, by the strict executions touching Jesuits and Seminary Priests? or, to restrain them to close prisons, during life, if no reformation follows (*).' Probably then, likewise, he composed 'Considerations for the repressing of the encrease of Preefts, Jesuits, and Recufants, without drawing of blood (t).' He was also employed by the House of Commons, when the match between Prince Charles and the Infanta of Spain was in agitation, to show, by a short examination of the treaties between England and the House of Austria, the Unfaithfulness and Insincerity of the latter, and to prove, that in all their Transactions they aimed at nothing but universal Monarchy (u). In 1621, at the request of the Lord Montague of Boughton, he compiled 'A Relation to prove, That the Kings of England have been pleased to consult with their Peeres in the Great Councell and Commons in Parliament, of Marriage, Peace and War [F].' He wrote likewise a Vindication of our Ecclesiastical Constitution, against the Innovations that were attempted to be brought in by the Puritans; in 'An Answer to certain Arguments raised from supposed Antiquity, and urged by some members of the lower House of Parliament, to prove that ecclesiastical lawes ought to be enacted by Temporal men (w).' Being a Member of the first Parliament of King Charles I. he joined in the Complaints of the Grievances which the Nation was then said to groan under. But, however, he was always for mild remedies; and intended the King's Honour and Safety, and the Nation's Advantage [G], as appeared by the honest Advice he gave in 1627. For, being called before the King and Council, to deliver his Opinion, in point of History and Law, upon the juncture of affairs then, he declared (x), 'That those English Princes, who had most opposed [the growing Power of the House of Austria,] had always the affections and hearts of their People: That this was the business of the present reign, and the desire of the English Nation: That to carry on this design the King must have Money; and no way to get money with speed, assurance, and satisfaction but by grant of Parliament: No way to dispose a Parliament to suitable Grants but by removing all Jealousies, especially those relating to Religion and Liberties: And nothing more plausible than for the Duke of Buckingham to be the first adviser of calling such a Parliament (y).' He was also consulted about the Imprisonment of those Gentlemen, who had refused to contribute to the Loan (z); and about a Project then set on foot, to enhance the value of the Coin, in order to raise money for the King, when he could not obtain any from his Parliaments. This Project Sir Robert opposed to the utmost of his power; and showed in a Speech before the Privy-Council, Sept. 2, 1626, what a Dishonour such an Alteration would be to his Majesty, and how great a Loss and Prejudice to the Sub-

[E] Of all the methods — none proved so agreeable to the King, as the creating a new order of Knights, called *Baronets*.] By which he could easily raise a hundred thousand pounds; as each Baronet was to pay, at three payments, as much as would maintain for the space of three years, thirty foot Soldiers, to serve in the Province of Ulster in Ireland, at 8d. a day, which amounted to 1095 l. This Title was not unknown in our Records, for 13 Edward III. it was granted to William de la Pole, and his heirs; and mention is made of it in an Agreement between King Richard II. and several Earls, Barons, and Baronets, &c. (4).

[F] A relation to prove, &c.] This was printed

at London in 1651: and 1672 among Cottoni Posthuma, and in 1679, under the Title of 'The Antiquity and Dignity of Parliaments,' fol. but it is extremely full of faults. There are good and exact Copies of it extant in manuscript.

[G] Intended the King's honour and safety, and the Nation's advantage.] A certain writer observes, 'That he was no great friend to the Prerogative (5),' that is, he was not inclined to come into all the violent Measures of the Court. The Speech he delivered in the lower House of Parliament assembled at Oxford, is printed in Cottoni posthuma (*).

ject (a). He wrote Books upon several other subjects, that remain in manuscript; namely, (b) Of Scutage—Of Enclosures, and converting arable Land into pasture—The Antiquity, authority, and office of the High-Steward and Marshall of England—The antiquity, etymology, and privileges of Castles—and of Towns—Of the measures of Land—The Antiquity of Coats of Arms—Curious Collections—about military affairs—and Trade—Collections out of the Rolls of Parliament, different from those printed under his name [H]. He likewise made collections for the History and Antiquities of Huntingdonshire: and had formed this noble Design, To write an Account of the state of Christianity in these Islands, from the first reception of it here, to the Reformation. The first part of this design was executed by the learned Archbishop Usher, in his book, *De Britannicarum Ecclesiarum primordiis*, composed probably at the request of Sir Robert Cotton; who left eight Volumes of Collections for the continuation of that work (c). J. Speed's History of England owes most of its value, and its ornaments, to Sir Robert Cotton. For he put in order some of the author's indigested materials, adding many curious observations of his own: As his fine Collection of Seals, Medals, &c. and furnished it with those Coins and Seals wherewith it is adorned (d): and Mr. Camden acknowledges (e), to have received those Coins that are in his *Britannia*, out of the Collection of the famous Sir Robert Cotton; who, it seems, intended to have written an account and explanation of them; but was unhappily hindered. To Richard Knolles, author of the Turkish History, he communicated authentic Letters of the Masters of the Knights of Rhodes; and the Dispatches of Edward Barton, Ambassador from Queen Elizabeth to the Porte: To Sir Walter Raleigh, Books and Materials for the second Volume of his History, never published: And the same to Lord Verulam, for his History of Henry VII (f). The famous J. Selden was greatly indebted, for his learning and reputation, to the books and instructions of Sir Robert Cotton, as he thankfully acknowledges in more places than one (g). In short, this great and worthy man was the generous Patron of all lovers of Antiquities, and his House and Library were always open to ingenious and inquisitive persons. Incredible is the service that hath been done to Learning, especially to the History of these three Kingdoms, by his securing, as he did, his valuable Library for the use and service of posterity [I]. Witness the Works of Sir Henry Spelman, Sir William Dugdale, the Decem

Scrip-

[H] *Collections out of the Rolls of Parliament, &c.* In 1657 William Prynne, Esq; published, *An exact Abridgment of the Records of the Tower of London, from the Reign of King Edward II. unto King Richard III. of all the Parliaments holden in each King's reign, and the several Acts in every Parliament, &c.* collected by Sir Robert Cotton, Kt. and Bart. Lond. fol. 1657, (reprinted again 1679). — which the said Mr. Prynne did revise, rectify in sundry mistakes, and supply with a Preface, marginal Notes, several omissions, and exact Tables. Tho', after all, it was not done by Sir Robert Cotton, but by Mr. Bowyer, Keeper of the Tower Records in the latter end of Queen Elizabeth's reign and beginning of King James the first's, as Mr. Tyrrel asserts in the Preface to his 3d vol. of the Hist. of England (p. ix.) — The other works of Sir Robert Cotton, not already mentioned, are as follows, I. 'A relation of the Proceedings against Ambassadors who have miscarried themselves, and exceeded their Commission.' II. 'That the Sovereign's person is required in the Great Councils, or Assemblies of the State, as well at the consultations as at the conclusions.' III. 'The argument made by the command of the House of Commons (out of the Acts of Parliament, and authority of Law expounding the same) at a conference with the Lords, concerning the Liberty of the person of every Freeman.' IV. 'A brief Discourse concerning the power of the Peeres and Commons of Parliament in point of Judicature.' These four are printed in *Cottoni posthuma*. V. 'A short view of the long Life and Raigne of Henry the third, King of England: Written in 1614, and presented to King James I.' Printed 1627, 4to. and reprinted in *Cottoni posthuma*. VI. 'Money raised by the King without Parliament from the Conquest untill this day, either by Imposition or free Gift, taken out of Records, or ancient Registers' Printed in the *Royal Treasury of England, or General History of Taxes*, by Capt. J. Stevens, 8vo. There is also published under his name, 'A Narrative of Count Gondamor's Transactions during his Embassy in England, London 1659, 4to.' In the Epistle Dedicatory, the Publisher, John Rowland, says — 'It bears in the frontispiece the name of that ever-famous Antiquary, Sir Robert Cotton, who was

' never wont to treasure up any thing but what was rare; nor can I certainly say, whether it were penn'd by Himself or not. I insist the more upon him, because it was my chance to be one whom he vouchsafed to take by the hand a little before his death, I being sent to him by my Lord Privie-Seal, to acquaint him that by my Lord's mediation, the King was reconciled to him: but his Answer was, That his heart was broken, and that it was now too late: whereby it appears, that Princes are sometimes abused, and misinformed, to the ruin of the best men.' — We find, moreover, that he wrote the following things — 'An Abstract or memorial of such courses as have been used in military affairs both at land and sea, under 35 heads (5). — Extracts about Commerce, imperfect (6). — Short Memoranda from 1548 to 1553 (7). — Extracts about the Rights of the Crown and the Parliament (8). — Historical passages taken out of Letters from the year 1551 to 1573 (9). — And the Notes and Collections for the reign of King Henry VIII. in Speed's Chronicle (10).

[I] He secured his Library for the use and service of posterity. For he ordered in his will, That it should not be sold, but pass to his Family, &c. As it was this valuable and curious Library that has rendered Sir Robert Cotton most famous, and is likely to perpetuate his name, it will be proper to give a larger Account of it. It consists wholly of Manuscripts; many of which being in loose skins, small Tracts, or very thin Volumes, when they were purchased, Sir Robert caused several of them to be bound up in one Cover. They relate chiefly to the History and Antiquities of Great-Britain and Ireland, tho' the ingenious Collector refused nothing that was curious or valuable in any point of Learning. He lived indeed at a time when he had great opportunities of making such a fine Collection: when there were many valuable Books yet remaining in private hands, which had been taken from the Monasteries at their Dissolution, and from our Universities and Colleges at their Visitations: when several learned Antiquaries, such as Josceline, Noel, Allen, Lambarde, Bowyer, Elsing, Camden, &c. died, who had made it their chief business to scrape up the scattered Remains of our Monastical Libraries; and, either by legacy or purchase, he became master of all that

that he thought valuable in their studies (11). This Library was placed by Sir Robert Cotton in his own House at Westminster, near the House of Commons, and was very much augmented and enlarged by his son and grand-son, Sir Thomas and Sir John Cotton. In the reign of King William (12), an Act of Parliament was made for the better securing and preserving that Library in the name and Family of the Cottons, for the benefit of the public; that it might not be sold, or otherwise disposed, and embezzled. Sir John, great-grand-son of Sir Robert Cotton, having sold Cotton-House to the late Queen Anne, to be a repository for the Royals as well as the Cottonian Library, an Act was made (13) for the better securing of her Majesty's purchase of that House; and both House and Library were settled and vested in Trustees: After which the Books were removed into a more convenient Room, the former being very damp; and Cotton-house was set apart for the use of the King's Library-keeper, who had there the Royal and Cottonian Libraries under his care. Some years after, the Cottonian Library was removed into a house near Westminster-Abby, purchased by the Crown of the Lord Ashburnham; where a Fire happening October 23, 1731, one hundred and eleven Books were lost, burnt, or entirely defaced, and 99 rendered imperfect (14): And it was thereupon removed to the new Dormitory, and afterwards to the old Dormitory belonging to Westminster-School.

* [The most extraordinary and interesting circumstance in Sir Robert Cotton's Life had not come to the knowledge of our learned Predecessor. Indeed, it was not generally known till the year 1767, when the following papers, taken from original manuscripts, were published in the Gentleman's Magazine.

" Letter from Dr. Samuel Harsnett, Archbishop of York, to Sir Henry Vane, Ambassador at the Hague, dated London, Nov. 6, 1629.

" On Saturday in the evening there were sent Mr. Vice-chamberlain and others to seal up Sir Robert Cotton's Library, and to bring himself before the Lords of his Majesty's Council. There were found in his custody a pestilent tractate, which he had fostered as his child, and had sent it abroad into divers hands; containing a project how a Prince may make himself an absolute tyrant. This pernicious advice he had communicated by copies to divers Lords, who, upon his confession, are questioned and restrained; my Lord of Somerset sent it to the Bishop of London; the Lord Clare to the Bishop of Winchester; and the Lord Bedford I know not well to whom. Cotton himself is in custody. God send him well out!

" I am, &c."

" The Same, to the Same, dated Nov. 9.

" Yesterday his Majesty was pleased to sit in Council with all the Board, and commanded that devillish project found upon Sir Robert Cotton to be read over unto us. For my own part, I never heard a more pernicious diabolical device, to breed suspicious, seditious humours amongst the people. His Majesty was pleased to declare his royal pleasure touching the Lords and others restrained for communicating that project; which was, to proceed in a fair, moderate, mild, legal course with them, by a bill of information preferred into the Star-chamber, whereunto they might make their answer by the help of the most learned Council they could procure. And though his Majesty had it in his power most justly and truly to restrain them till the cause was adjudged, yet, out of his princely clemency, he commanded the board to call them, and to signify unto them to attend their cause in the Star-chamber. They were personally called in before the Lords (the King being gone) and acquainted by the keeper with his Majesty's

VOL. IV.

" gracious favour. Two never spoke a word, expressing thankfulness for his Majesty's so princely goodness; two expressed much thankfulness, which were my Lord of Bedford, and Sir Robert Cotton. St. John and James are still in prison; and farther than unto these the paper reacheth not in direct travel, save to Selden, who is also contained in the bill of information. I fear the nature of that contagion did spread farther; but as yet no more appeareth. I am of opinion it will fall heavy on the parties delinquent.

" I am, Sir, &c."

" Sir Symonds D'Ewes's account of this affair, in his manuscript Life, written by himself, and still preserved among the Harleian MSS. will give farther light to this very interesting fact.

" Amongst other books," says he, " which Mr. Richard James lent out, one Mr. St. John, of Lincoln's-Inn, a young studious gentleman, borrowed of him, for money, a dangerous pamphlet that was in a written hand, by which a course was laid down, how the Kings of England might oppress the liberties of their subjects, and for ever enslave them and their posterities. Mr. St. John shewed the book to the Earl of Bedford, or a copy of it; and so it passed from hand to hand, in the year 1629, till at last it was lent to Sir Robert Cotton himself, who set a young fellow he then kept in his house to transcribe it; which plainly proves, that Sir Robert knew not himself that the written tract itself had originally come out of his own library. This untrusty fellow, imitating, it seems, the said James, took one copy secretly for himself, when he wrote another for Sir Robert; and out of his own transcript sold away several copies, till at last one of them came into Wentworth's hands, of the North, now Lord Deputy of Ireland. He acquainted the Lords, and others of the Privy-Council, with it. They sent for the said young fellow, and examining him where he had the written book, he confessed Sir Robert Cotton delivered it to him. Whereupon, in the beginning of November, in the same year 1629, Sir Robert was examined, and so were divers others, one after the other, as it had been delivered from hand to hand, till at last Mr. St. John himself was apprehended, and, being conceived to be the author of the book, was committed close prisoner to the Tower. Being in danger to have been questioned for his life about it, upon examination upon oath, he made a clear, full, and punctual declaration, that he had received the same MS. pamphlet of that wretched mercenary fellow James, who by this means proved the wretched instrument of shortening the life of Sir Robert Cotton: for he was presently thereupon sued in the Star-chamber, his Library locked up from his use, and two or more of the Guards set to watch his house continually. When I went several times to visit and comfort him, in the year 1630, he would tell me, 'they had broken his heart, that had locked up his Library from him.' I easily guessed the reason, because his honour and esteem were much impaired by this fatal accident; and his house, that was formerly frequented by great and honourable personages, as by learned men of all sorts, remained now upon the matter desolate and empty. I understood, from himself and others, that Dr. Neile and Dr. Laud, two Prelates that had been stigmatized in the first Session of Parliament, in 1628, were his fore enemies. He was so outworn, within a few months, with anguish and grief, as his face, which had been formerly ruddy and well coloured (such as the picture I have of him shews) was wholly changed into a grim blackish paleness, near to the resemblance and hue of a dead visage. I heard it certainly affirmed that the young fellow whom Sir Robert kept in his house, and had employed to transcribe the said written tractate, was his bastard; which shews God's admirable justice,

4 H

"to cause the spurious issue of his fatal lust to prove the instrument of his final ruin. I, at one time, advised him to look into himself, and seriously consider, why God had sent this chastisement upon him; which, it is possible, he did; for I heard from Mr. Richard Holdsworth, a great and learned divine, that was with him in his last sickness, a little before he died, that he was exceeding penitent, and was much confirmed in the faithful expectation of a better life (15)."

Those of our Readers who are not already acquainted with this transaction, will be surprized that such men as Sir Robert Cotton, the Earl of Bedford, and Mr. Selden, who were known to be always well affected to the liberties of the subject, should be charged either with having written or disseminated a Tract, the intention of which was to shew how a Prince might make himself an absolute tyrant. In fact, the accusation was totally groundless. It was indeed asserted, in the Attorney General's information against Sir Robert Cotton, "that the discourse or project was framed and contrived within five or six months past here in England;" but the truth of the case was, that it had been drawn up in the year 1613, by Sir Robert Dudley, commonly called Earl of Warwick and Duke of Northumberland (16). Of this Sir Henry Foulis gave evidence upon oath, in the course of the prosecution; in consequence of which, Sir Robert Cotton and the rest of the Gentlemen were released. The Tract in question, which was the cause of so much trouble to Sir Robert, was entitled, "A proposition for his Majesty's service, to bridle the impertinency of Parliaments;" and the design of the author, who lived in exile at Florence, was to ingratiate himself with King James the first, and by that means to prepare the way for his return to his own country.

It hath been said, that Sir Robert Cotton had his Library restored to him, soon after his release from confinement (17). But there is ground for believing that this was not the case; for in a Letter which mentions his death in 1631, it is asserted, that before he died, he requested Sir Henry Spelman to signify to the Lord Privy Seal, and the rest of the Lords of the Council, that their so long detaining his books from him, without rendering any reason for the same, had been the cause of his mortal malady. Upon this message, the Lord Privy Seal went to Sir Robert, to comfort him from the King, when it was too late. The Earl of Dorset, likewise, within half an hour after Sir Robert's death, came to his Son, Sir Thomas Cotton, to condole with him on that occasion; and to assure him from his Majesty, that to him would be continued the love which the King had for his father. It is added in the Letter, that Sir Robert had entailed, as far as law could do it, his Library of books upon his son, who made no doubt of obtaining the same. "But, says the writer, for all these Court Holy-waters, I, for my part, for a while suspend my belief." Hence it appears, that the Government was not only in possession of Sir Robert Cotton's Library at the time of his decease, but that it was then thought doubtful whether it would be restored to his posterity. Another instance is related in which he came under the persecution of the Crown. In the Paper Office, is a warrant for his commitment, so early as the year 1615. He was suspected of holding a correspondence with the Spanish Ambassador, that was prejudicial to the affairs of Government, and on this occasion his Library was shut up. It is probable, however, that it was speedily restored, as there can be no doubt but that the suspicion entertained of him was wholly groundless (18). Thus to be twice unjustly imprisoned, twice to have his Library taken from him, and the last time with such circumstances as shortened his life, was the treatment which a man who had deserved so well of his country met with, from the arbitrary Princes of the House of Stuart.

That the young fellow whom Sir Robert Cotton kept in his House was his bastard, might possibly be the calumny of the day. As to Mr. Richard James, who likewise makes so considerable a figure in the

preceding narration, he was born at Newport, in the Isle of Wight, and admitted a Scholar of Corpus Christi College, Oxford, on the 23d of Sept. 1608, being then about sixteen years of age. On the 30th of September, 1615, he became Probationer Fellow of his College. Having entered into Holy Orders, he preached frequently, and arrived to the degree of Bachelor in Divinity. Upon what occasion we know not, he travelled abroad, and was in Russia, in 1619, a tour to which country was very uncommon in those days. He was esteemed to be well versed in most parts of learning, and was noted, among his acquaintance, as a good Grecian and Poet, an excellent Critic, Antiquary, and Divine. Beside all this, he was admirably skilled in the Saxon and Gothic languages. As for his preaching, it was not approved of by any of the University excepting by some of the graver sort. Of three Sermons, delivered by him before the Academics, one of them, concerning the observation of Lent, was without a text, according to the most ancient manner; another was against it, and a third beside it; "shewing himself thereby, says Anthony Wood, a humorous person." Selden was much beholden to him for the drudgery he did for him when he composed his *Marmora Arundeliana*, and acknowledges him, in the Preface to that Book, to be *Vir multijugæ Studiiq; indefatigabilis*. Mr. James's diligence and trouble were very great in ordering, disposing, and settling Sir Robert Cotton's Library. Nothing was wanting to him, and to the encouragement of his studies, but a sinecure or a Prebend; if he had obtained either of which, the labours of Hercules would have seemed to be a trifle. Several Latin and English Sermons were published by him; and he was the Author of *Poemata quædam in Mort. clariss. Viri Roberti Cottoni et Thomæ Alleni*. With these Poems he printed Sir Thomas More's Epistle to the University of Oxford, for the embracing of the Greek Tongue. He translated, also, into English, the Octavius of Minutius Felix. Mr. James died of a Quartan Fever, at the house of Sir Thomas Cotton, in Westminster, in the beginning of December, 1638; and, on the seventh of the same month, was buried in St. Margaret's Church. He left behind him several manuscripts of his own composition, and others collected by him from various authors, all of which are written with his own hand. These are now deposited in the Bodleian Library. Among the rest of the manuscripts of Mr. James's composition, are a Russian Dictionary, with the English to it; Observations made in his Travels through some parts of Wales, Scotland, on Shetland, Greenland, &c. and Observations on the Country, Manners, and Customs of Russia, or Rusland (19). Sir Symonds D'Ewes has given a very unfavourable character of Mr. James; having described him as an atheistical profane Scholar, but otherwise witty and moderately learned. "He had so screwed himself," adds Sir Symonds, "into the good opinion of Sir Robert Cotton, that whereas at first he only permitted him the use of some of his books; at last, some two or three years before his death, he bestowed the custody of his whole Library on him. And he being a needy sharking companion, and very expensive, like old Sir Ralph Starkie when he lived, let out, or lent out, Sir Robert Cotton's most precious manuscripts for money, to any that would be his customers; which," says Sir Symonds, "I once made known to Sir Robert Cotton, before the said James's face (20)." With regard to the charge brought against Mr. James, of his being an atheistical profane Scholar, I may observe, that it does not comport with Wood's account of him, who expressly asserts that he was a severe Calvinist. As to the other part of the accusation, it is undoubtedly a strong circumstance in Mr. James's favour, that he continued to be trusted, protected, and supported, by the Cotton Family to the end of his days. This learned and laborious man fell a victim to intense study, and too abstemious and mortified a course of living (21).

The chief of them in the British Dominions, were, Henry Earl of Northampton, Thomas Earl of Arundel, Archbishop Usher, Henry Earl of Bath, Edward Earl of Manchester,

(22) Parliamentary History, vol. vi. p. 367—372.

To return to Sir Robert Cotton; it is greatly to his honour, that he was not, like some eminent men of that age, so devoted to the prerogative of the Crown, as to be unfriendly to the rights and liberties of the subject. At the same time, when he spoke in favour of a redress of grievances, he did it with distinguished prudence and temper. Of this he exhibited a proof in the speech which was made by him in the Parliament of 1625 (22). The advice which he gave to the Lords of the Council, when, in consequence of the distracted state of public affairs, and the national discontents, he was summoned to deliver his opinion concerning the proper methods to be pursued for the general welfare, reflects so much credit on his integrity and wisdom, that I shall make no apology for preserving it in this place.

“ My Lords,

“ As soon as the House of Austria had incorporated itself into the House of Spain, and, by their new discoveries, gotten to themselves the wealth of the Indies; they began to affect, and have ever since pursued, a fifth Monarchy.

“ The Emperor Charles would first have laid the foundation thereof in Italy, by surprizing Rome: but from this he was hindered by the force and respect of religion, Henry VIII. being made *Caput Fœderis* against him.

“ He then attempted it in High-Germany, practising by faction and force, to reduce those petty States to his absolute power. In this Henry VIII. again prevented him, by tying the Lutheran Princes under his confederacy and assistance.

“ His son, Philip II. pursued the same ambition in the Nether-Germany, by reduction whereof he intended to make his way further into the other. This the late Queen of England interrupted, by siding with the afflicted people on the one part, and making herself head of the Protestant league with the Princes on the other side; drawing in, as a secret of State, the countenance of France, to give the more reputation and assistance to them, and security to herself.

“ Spain seeing his hopes thus fruitless by these Unions and Sleights, began first to break, if he might, the amity of France and England: but finding the common danger to be so fast a tie, he raiseth up a party in that kingdom of his own, by the which the French King was so distressed, that, had not the English Council and assistance relieved him, Spain had there removed that next and greatest obstacle of his ambition.

“ His Council now tells him, from these examples, that the way to his great work is impassable, so long as England lies a lett in his Way; and adviseth him that the removal of that obstacle be the first of his intents. This drew on those often secret practices against the person of the late Queen, and his open fury, in the year 1588, against the body of the State; for which she, following the advice of a free Council, would never after admit of peace; winning thereby the hearts of a loving people, who ever found hands and money for all occasions at home; and by keeping sacredly her alliances abroad, secured her confederates, all her time, in freedom from fear of Spanish slavery; and ended her old and happy days in great glory.

“ Spain then, by the wisdom and power of that great Lady, despoiled so of his means to hurt, though not of his desire, makes up, with her peaceful successor of happy memory, the golden league; that (disarming us at home by opinion of security, and giving them a power in our Council by believing their friendship and pretended marriage) gave them way to cherish amongst us a party of their own; and bereft of power abroad, to lead in jealousy, and sow a division between us and our confederates; by which, we see, they have swallowed up the fortune of our Master's brother, with the rest of the Imperial States, distressed the King of Denmark by that quarrel, diverted Sweden's assistance by the wars with the Pole, and

moving of him now with the offers of the Danish crown; and now, whether from that plot, or our fatality, it hath cast such a bone between France and us, as hath gotten themselves, by our quarrel of religion, a fast confederate, and us a dangerous enemy: So that now we are left no other assurance against their malice and ambition, but the Netherlands; where the tie of mutual safety is weakened by daily discontents, bred and fed between us from some ill-affected to both our securities: so that, from the doubtfulness of friendship, as we now stand, we may rather expect, through our own domestic faction, if they grow too furious, they will sooner follow the example of Rome in her growing; (that held it equally safe, honourable, and more easy, *dare regem*, than *subjugare Provinciam*) considering the power they have in their hands, than give any friendly assistance to serve the present condition of our State. You may see therefore in what terms we stand abroad; and, I fear, at home, in no better.

“ There must be, to withstand a foreign invasion, a proportion both of sea and land-forces; for to give an enemy an easy passage, and a port to relieve him in, is no less than to hazard all at one stake. And it is to be considered, that no march by land can be of that speed to make head against the landing of an enemy, nor no such prevention as to be master of the sea. To this point of necessary defence there can be no less than 240,000*l*.

“ For the land-forces; if it were for an offensive war, the men of less livelihood were the best spared, and were used formerly to make such war, *purgamento Reipublicæ*, if we made no further purchase by it: but, for safety of a Common-Wealth, the wisdom of all times did never intrust the public cause to any other than such as had a portion in the public adventure. And this we saw in the year 1588, when the care of the Queen and Council did make the body of that large army no other than of Trained-bands, which, with the auxiliaries of the whole realm, amounted to no less than 34,000 men. Neither were any of those drawn out of their countries, and proper habitations, before the end of May, that they might be no long aggrivance to the public; such discontents being ever to us a more fatal enemy than any foreign force.

“ The careful distribution and direction of the sea and land-forces, being more fitting for a Council of war, than a private man to advise of, I pass over; yet shall ever be willing and ready, when I shall be called, humbly to offer up such observations, as I have formerly gathered by the like occasions of this realm.

“ There are two things requisite to make up this preparation, money and affections; for they cannot properly be severed. It was well and wisely said by that great and grave Counsellor, Lord Burleigh, in the like case, to the late Queen, *Win their hearts, and you may have their hands and purses*. And I find of late, that diffidence having been a defect in the one, it hath unhappily produced the same in the other.

“ In gathering of money for this present need, there are required three things, speed, assurance, and satisfaction: and the way to gather, as others in the like cases have done, must be by that path, which hath been formerly called *Via Regia*, being more secure and speedy; for, by unknown and untrod ways, it is both rough and tedious, and seldom succeedeth well. The last way, although it took place as it were by supply at first, and received no general denial; yet, since, it hath drawn many to consider with themselves and others of the consequence; and is now conceived a pressure on their liberties, and against law. I much fear, if now again it be offered, either in the same face, or by Privy-seal, that it will be refused wholly. Neither find I that the restraint of those recusants hath produced any other effect, than a stiff resolution in them and others to forbear. Besides, though it went at first with some assurance, yet, when we consider the commissions, and other forms incident to such like services; as also how long it

fter, Henry Lord Boughton, James Montague Bishop of Winchester, Sir John Dodderidge, Sir John Davis, David Powell, Hugh Holland, Arthur Agard Deputy Chamberlain

it hung in hand; and how many delays there were, we may easily see that such a sum, granted by Parliament, is far sooner and more easily gathered.

"If any will make the urgency of times an inevitable necessity for enforcing the levy, whether, in general, by excise or imposition; or, in particular, upon some select persons, which is the custom of some countries; and so conclude it, for the public State, *suprema Lege*, he must look for this to be told him: that if necessity must conclude always for gathering money in the most speedy way, (which cannot be fitter than by Parliament) the consequence may be, that the humours of the heedless multitude, who are full of jealousy and distrust, and so unlike to comply to any unusual course of levy, will not submit but by force; which if used, the effect is fearful, and hath been fatal to the State: whereas that by Parliament resteth principally on the regal person, who may, with ease and safety, mould them to fit his desire, by a gracious yielding to their just petitions.

"If a Parliament then be the most speedy, assured, and safe way, it is fit to conceive what is the best way to act and work it to the present need.

"First, if the time of the usual summons, reputed to be 40 days, be too large for the present necessity, it may be shortened, since it is against no positive law; so that care be had that there may be one county day, after the Sheriff hath received the writ, before the time of sitting.

"If then the sum to be levied be once agreed on, then, for the advance of time, there may be, in the body of the grant, an assignment made to the Knights of every county respectively; who, under such assurance, may safely give security proportionable to the receipts, to such as shall, in present, advance to the public service any sums of money.

"The last and weightiest consideration (if a Parliament be thought fit) is, how to remove or compose the differences between the King and subject in their mutual demands. What I have learned amongst the better sort of the multitude, I will freely declare, that your Lordships may be the more enabled to remove those distrusts, that either concern religion, public safety of the King and State, or the just liberties of the Common-Wealth.

"For religion, a matter that lies nearest to their conscience, they are led by this ground of jealousy to think some practise against it.

"First, for that the Spanish match, which was broken by the grateful industry of my Lord of Buckingham, out of his religious care, as he there declares, that the articles there demanded might lead in some such sufferance as might endanger the quiet, if not the state of the Reformed Religion here: yet there have (when he was a principal actor in the conditions with France) as hard, if not worse, (to the preservation of our religion) passed than those with Spain: and the suspicion is strengthened by the strict observance of this agreement, in that point, there concluded.

"It is no less an argument of doubt to them of his affections; in that his mother and others, and many of his servants of near employment about him, are so affected.

"They talk much of his advancing men papistically devoted; some placed in the camp, of nearest service and chief command; and that the Recusants have gotten, these late years, by his power, more courage and assurance than before. If, to clear these doubts, (which perhaps are worse in fancy than in truth) he took a good course, it might much advance the public service, against those squeamish humours that have more violent passion than settled judgment, and are not the least of the opposite number in the Common-Wealth.

"The next is, the late misfortunes and losses of men, munition, and honour in our late Undertakings abroad; which the more temperate spirits impute to want of counsel, and the more sublime wits to practice.

"They begin with the *Palatinate*, and by the fault of the loss there, or the improved credit of Gondomar;

distrusting him for the staying of supplies to Sir Horace Vere, when Colonel Cecil was cast on that employment; by which the King of Spain became master of the late King's childrens inheritance.

"And when Count Mansfield had a royal supply of forces, to assist the Princes of our part, for the recovery thereof, either plot or error defeated the enterprize from us, to Spain's great advantage.

"That Sir Robert Mansel's expedition to Algier's should purchase only the security and guard of the Spanish coasts: to spend so many hundred thousand pounds in the Cadiz voyage, against the advice of Parliaments, only to warn the King of Spain to be in a readiness, and so to weaken ourselves, is taken for a sign of ill-affection in him amongst the multitude.

"The spending of so much munition, victuals, and money, in the Lord Willoughby's journey, is conceived an unthrifty error in the director of it; to disarm ourselves in fruitless voyages; nay, to some over-curious, seems a plot of danger, to turn the quarrel of Spain, our antient enemy, that the Parliament petitioned and gave supply to support, upon our ally of France; and soon after, a new and happy tie gave much talk, that we were not so doubtful of Spain as many wish; since it was held, not long ago, a fundamental rule of their security and ours, by the old Lord Burleigh, that nothing can prevent an universal Spanish monarchy, but a fastness of those two Princes whose amity gave countenance and courage to the Netherlands and German Princes, to make head against his ambition. And we see, by this disunion, a fearful defeat hath happened to Denmark and that party, to the great advantage of the Austrian family.

"And thus far of the waste of public treasure in fruitless expeditions: an important cause to hinder any new supply in Parliament. Another fear that may disturb the smooth and speedy passage of the King's desires in Parliament, is the late waste of the King's livelihood; whereby is like, as in former times, to arise this jealousy and fear, that when he hath not of his own to support his ordinary charge, (for which the lands of the Crown were settled unalterably, and called *sacrum Patrimonium Principis*) that then he must of necessity rest upon those assistances of the people, which ever were collected and consigned, only, for the Common-Wealth. From hence it is like there will be no great labour or stiffness to induce his Majesty to an act of resumption; since such desires of the State have found an easy way in the will of all the Princes from Henry III. to the last. But that which is like to pass deeper into their disputes and care, is the late pressures they suppose to have been done upon the public liberty and freedom of the subject; in commanding their goods without assent of Parliament; confining their persons without special cause declared; and that made good against them by the judges lately; and pretending a writ to command their attendance in a foreign war: all which they are likely to enforce, as repugnant to many positive laws and customary immunities of this Common-Wealth.

"And these dangerous distrusts are not a little improved by this un-exampled course, as they conceive, of retaining an inland army in winter season; when former times of greatest fear, as that of 1588, produced no such; and makes them, in their distracted fears, to conjecture, idly, it was raised wholly to subject their fortunes to the will of power, more than of law; and so make good some further breaches upon their liberties and freedoms at home, rather than defend us from any force abroad.

"How far such jealousies, if they meet with an unusual disorder of lawless soldiers, or an apt distemper of the loose and giddy multitude, may easily turn them away, upon any occasion in the State that they can side withal, to a glorious pretence of religion and public safety; when their true intent will be only rapine of the rich, and ruin of all, is worthy your provident and preventing care!

"I have thus far delivered, with that freedom you pleased to admit, such difficulties as I have taken

up

COTTON (Sir ROBERT). COTTON (CHARLES). 305

lain of the Exchequer, Roger Doddefworth, Richard Carew, William Burton, Sir James Ware, &c. And in foreign parts, Janus Gruterus, Francis Sweertius, Andrew Duchefne, John Bourdelot, Peter Puteanus, Nicholas Fabricius Peireskius, &c. (b). Sir Robert Cotton having lived respected and esteemed both at home and abroad, died of a fever, in his house at Westminster, May 6, 1631, aged sixty years, three months, and fifteen days; and was buried in the south Chancel of Connington-Church. He married Elizabeth, one of the daughters and co-heirs of William Brocas of Thedingworth in the county of Leicester, Esq; by whom he left one only son, Sir Thomas Cotton, Bart.

(b) Vita R. Cottoni, ut supra, p. xxvi, xxvii.

up amongst the multitude, as may arrest, if not remove, impediments to any speedy supply in Parliament at this time: how to facilitate which may better become the care of your Lordships judgments, than my ignorance. Onely I could wish, that, to remove away a personal distaste of my Lord of Buckingham amongst the people, he might be pleased, if there be a necessity of Parliament, to appear a first adviser thereunto; and what satisfaction it shall please his Majesty, of grace, to give at such time to his people, (which I wish to be grounded by precedent of his best and most fortunate progenitors, and which, I conceive, will largely satisfy the desires and hopes of all) if it may appear in some sort to be drawn down from him to the people, by the zealous care and industry that my Lord of Buckingham hath of the public unity and content; by which there is no doubt that he may remain, not only secure from any further quarrel with them, but merit an happy memory amongst them of a zealous patriot: for to expiate the passion of the people, at such a time, with sacrifice of any of his Majesty's servants, I have ever found it (as in Edward II. Richard II. and Henry VI.) no less fatal to the Master, than the Minister in the End (23)."

(23) Ibid. p. 330—338.

The consequence of this advice was, that the King and Council were induced to believe that the calling of a Parliament was the best method which could be adopted for promoting the general good of the nation.

In the collection of curious discourses written by eminent Antiquaries, are printed nine short Dissertations, by Sir Robert Cotton, on various subjects relative to English Antiquities.

It is scarcely necessary to inform our Readers, that in 1753 the Cottonian Library was removed to the British Museum, and now constitutes a most useful and important part of that noble repository. The merit of Sir Robert Cotton, in forming his collection, is well represented in the Preface to the Harleian Catalogue. "Bodley's great contemporary, Sir Robert Cotton, had been equally diligent in collect-

ing ancient Manuscripts. The study of Antiquities, particularly those of this kingdom, had engaged his attention, though he always shewed a high regard for every part of philological learning, in all which he was extremely conversant. He had observed with regret, that the history, laws, and constitution of Britain, were in general very insufficiently understood; and being fully convinced, that the preservation of such monuments of antiquity, and other documents, as were conducive to render the knowledge of them, and their deductions from their primary state, more accurate and universal, would necessarily redound to the advantage of the public, he had, in an expensive and indefatigable labour of upwards of forty years, accumulated those numerous and inestimable treasures which compose the Cottonian Library, and now remain an indisputable testimony of his benevolent disposition towards his native country. But, happily, these Patrons of Literature lived in an age peculiarly favourable to the completion of their respective purposes, and more especially to those of the latter. The late general dissolution of religious houses had dispersed an infinite number of curious manuscripts. Many of these were secured by the nobility and gentry; but no inconsiderable number falling into the hands of peasants, mechanics, and other persons ignorant of their importance, and totally inattentive to their preservation, were easily to be purchased. From this source Sir Robert Cotton had supplied his Library with a multitude of rare Manuscripts; and to them Mr. Camden, Mr. Lambard, Dr. Dee, and Sir Christopher Hatton had kindly contributed their Stores (24)."

That the name of Sir Robert Cotton must always be mentioned with honour; and that his memory cannot fail of exciting the warmest sentiments of gratitude, while the smallest regard for learning subsists among us, is the testimony of Dr. Samuel Johnson (25).]

K. (25) Ibid. p. 148.

* * [COTTON (CHARLES), an ingenious Writer, and eminent for his talents in Burlesque Poetry, was the son of Charles Cotton, Esq; of Beresford [A], in Staffordshire, and was born on the 28th of April, 1630 (a). He was educated at the University of Cambridge [B]; and Mr. Granger says, that 'he was esteemed one of the ornaments of that University (b).' He is said afterwards to have travelled into France, and other foreign countries (c). But the place of his residence, during the greater part of his life,

(b) Biog. Hist. of England, vol. iv. p. 50. 2d. edit. (c) Biog. Dram.

[A] Son of Charles Cotton, Esq; of Beresford.] Of this Gentleman, who was the son of Sir George Cotton, Knt. the following character is given by Lord Clarendon: 'Charles Cotton was a Gentleman born to a competent fortune, and so qualified in his person, and education, that for many years he continued the greatest ornament of the town, in the esteem of those who had been best bred. His natural parts were very great, his wit flowing in all the parts of conversation; the superstructure of learning not raised to a considerable height; but having passed some years in Cambridge, and then in France, and conversing always with learned men, his expressions were ever proper and significant, and gave great lustre to his discourse upon any argument; so that he was thought by those who were not intimate with him, to have been much better acquainted with books than he was. He had all those qualities which in youth raise men to the reputation of being fine Gentlemen; such a pleasantness and gaiety of humour, such a sweetness and gentleness of nature, and such a civility and delightfulness in conversation, that no man in the court, or out of

it, appeared a more accomplished person; all these extraordinary qualifications being supported by as extraordinary a clearness of courage, and fearlessness of spirit, of which he gave too often manifestation. Some unhappy suits in law, and waste of his fortune in those suits, made some impression upon his mind; which being improved by domestic afflictions, and those indulgencies to himself, which naturally attend those afflictions, rendered his age less revered than his youth had been; and gave his best friends cause to have wished, that he had not lived so long (1)."

[B] Educated at the University of Cambridge.] Sir John Hawkins says, that 'he had for his Tutor Mr. Ralph Rawson, once a Fellow of Brazen-nose College, Oxford, but who had been ejected from his Fellowship by the Parliament visitors, in 1648. This person he has gratefully celebrated in a translation of an Ode of Johannes Secundus (2). The same writer also observes, that at 'the University he improved his knowledge of the Greek and Roman Classics, and became a perfect master of the French and Italian languages (3)."

(3) Ibid.

was at the family seat at Beresford. In 1656, he married Isabella, daughter of Sir Thomas Hutchinson, Knt. of Owthorp, in the county of Nottingham (d). This Lady was a distant relation; and at the time of his marriage he was twenty-six years of age. He had not engaged in any profession, and was wholly dependent upon his father. But by the death of his father, about two years after, he became possessed of the family estate; though this was probably much encumbered. In 1663, he published "the Moral Philosophy of the Stoics," translated from the French of Mons. de Vaix, President of the Parliament of Provence (e). He is said to have made this translation in compliance to the will of his father [C]. In the year 1665, he translated from the French the Horace of Corneille. The plot of the original piece is taken from the story of the Horatii and Curiatii. It is said by the author of the *Biographia Dramatica* (f) to be a very good translation of this Tragedy; but it was not at first intended for publication, being only written for the amusement of his sister. It was, however, printed at London, in 4to. in 1671, and dedicated to his sister, Mrs. Stanhope Hutchinson, the Lady for whose use it was originally written. The year before, he had published, in folio, and dedicated to Archbishop Sheldon, a translation of the "History of the Life of the Duke d'Espernon (g)." It was at this period of his life, when his affairs seem to have been much embarrassed, and he had received a Captain's commission in the army, that he went over into Ireland; and he has recorded some of his adventures in a Burlesque Poem, in three Cantos, called a "Voyage to Ireland [D]." In 1674, he published "the Fair one of Tunis," a Novel, translated from the French; and also a translation of "the Commentaries of Blaise de Montluc, Marshal of France." The following year he published, in 8vo. "the Planter's Manual, being Instructions for cultivating all sorts of fruit-trees (h)." In 1678, he published at London, in 8vo, his most celebrated performance, under the following title: "Scarronides, or Virgil Travestie; a Mock Poem, on the first and fourth Books of Virgil's *Æneis*, in English Burlesque." This has passed through many editions. The eighth was published in 1700, and the fifteenth in 1771. It has been remarked, that though the title of this piece seems to imply, that "his poem was in imitation of Scarron, who has translated eight books of Virgil in the same manner, yet they, who will compare both these pieces, will possibly find, that he has not only exceeded the French, but all those who have made any attempts in that kind of poetry, the incomparable author of *Hudibras* excepted (i)." There is, undoubtedly, a great degree of humour in the *Virgil Travestie* of Cotton; but it must at the same time be confessed, that there is too much indelicacy and indecency. He likewise published, in 12mo, "Burlesque upon Burlesque; or the Scoffer scoffed; being some of Lucian's Dialogues newly put into English Fustian." These dialogues have been much read, the eighth edition having been printed in 1771. In point of merit, they may be ranked with his *Virgil Travestie*; they have the same humour, and the same licentiousness.

At what time Mr. Cotton lost his first wife, we meet with no account; but it appears that his second marriage was with the Countess Dowager of Ardglass, who possessed a jointure of fifteen hundred pounds a year, and who survived him (k). One of his favourite recreations was angling [E], which occasioned a very intimate friendship between him and Mr. Isaac Walton, whom he called his father. His house, as he informs us himself, was situated "upon the margin of one of the finest rivers (l) for trouts and grayling in England (m)." Here he also built a little fishing-house dedicated to anglers, over the door of which the initial letters of his own name, and Isaac Walton's, were placed together in a cypher. This edifice is still standing, and has been lately thus described. "It is of stone, and the room on the inside a cube of about fifteen feet: it is paved with black and white marble. In the middle is a square black marble table, supported by two stone feet. The room is wainscotted, with curious mouldings that divide the panels up to the ceiling: in the larger panels are represented in painting some of the most pleasant of the adjacent scenes, with persons fishing; and in the smaller, the various sorts of tackle and implements used in angling. In the farther corner, on the left, is a fire-place, with a chimney; and on the right, a large beaufet, with folding-doors, whereon are the portraits of Mr. Cotton, with a boy-servant, and Walton, in the dress of the time: under-

(m) Complete Angler, P. iii. p. 7.

(4) Ibid. p. 6.

(5) Ibid. p. 9.

[C] In compliance to the will of his father.] Sir John Hawkins says, that "his father, being a man of bright parts, gave him themes and authors whereon to exercise his judgment and learning, even to the time of his entering into the state of matrimony; the first fruit of which exercises was, as it seems, his Elegy on the gallant Lord Derby (4)." [D] A Burlesque Poem, &c. called "a Voyage to Ireland." In this poem he relates, with singular pleasantry, that at Chester, coming out of church, he was taken notice of by the Mayor of the city for his rich garb, and particularly a gold belt that he then wore, and by him invited home to supper, and very hospitably entertained (5).

[E] One of his favourite recreations was angling.] In one of his poems are the following lines:

"O my beloved nymph! fair Dove,
"Princess of rivers, how I love
"Upon thy flow'ry banks to lie,
"And view thy silver stream,
"When gilded by a summer's beam!
"And in it all thy wanton fry
"Playing at liberty,
"And with my angle upon them,
"The All of Treachery
"I ever learn'd, to practise and to try (6)."

"neath

neath is a cupboard, on the door whereof the figures of a trout, and also of a grayling, are well pourtrayed (n). When four editions had been published of Walton's Complete Angler, Mr. Cotton wrote "Instructions how to angle for a Trout or Grayling, in a clear stream." These have ever since been published as a second part of Walton's book [F], and have been observed to be "a judicious Supplement" to that work (o).

(o) Hawkins, *ut supra*.

(p) *Ibid.*

In 1681, Mr. Cotton published a poem, called, "the Wonders of the Peak;" which is a performance of little merit; but in 1685, he published, in three volumes, 8vo, an excellent translation of Montaigne's Essays [G], which has since passed through several editions. He is supposed to have died in the year 1687, in the parish of St. James's, Westminster. He appears to have died insolvent, as Elizabeth Bludworth, his principal creditor, administered to his effects, his widow and children having previously renounced the administration (p). After his death, in 1689, a collection of his "Poems on several occasions" was published in one volume, octavo. This collection consists of translations, imitations of Horace, songs [H], sonnets, and epigrams, some humorous and sarcastic pieces, and a few of a more serious nature [I]. A volume in 12mo. has been several times printed (q), entitled, "the Genuine Poetical Works of Charles Cotton, Esq;" but this does not contain half the poetical productions of Mr. Cotton; it including only his Virgil Travestie, his Burlesque of Lucian, and the Wonders of the Peak; and not comprehending any of the poems in the collection published in 1689. Besides the pieces already mentioned, he translated "Memoirs of the Sieur De Pontis," which were published by his son, Mr. Beresford Cotton, in 1694 (r).

(q) The sixth edit. was published in 1771.

(r) Hawkins, *ut supra*.

He was a man of considerable abilities, and appears to have been an elegant scholar, and much distinguished by his polite and engaging manners. But many of his productions are too licentious in their tendency, and the imprudence of his conduct brought him into a variety of difficulties. Mr. Granger says, that 'he was sociable, hospitable, and generous; but as he was far from being an oeconomist, he, in the latter part of his life, was much

[F] Published a second part of Walton's book.] Sir John Hawkins observes, that 'the second part of the Complete Angler is apparently an imitation of the first. It is a course of dialogues between the author, shadowed under the name of Piscator, and a traveller, the very person distinguished in the first part by the name of Venator, and whom Walton of a hunter has made an angler; in which, besides the instructions there given, and the beautiful scenery of a wild and romantic country therein displayed, the urbanity, courtesy, and hospitality of a well-bred country Gentleman, are represented to great advantage (7).'

(7) Life, *ut supra*, p. 10.

[G] An excellent translation of Montaigne's Essays.] This is so good a translation, that it has been thought to be fully equal to the original, and some have even supposed it to be superior (8). He dedicated it to George Saville, Marquis of Halifax; and that Nobleman expressed his esteem for the translator, and admiration of the performance, in the following letter:

(8) Life, *ut supra*, p. 12.

SIR,
'I have too long delayed my thanks to you for giving me such an obliging evidence of your remembrance: that alone would have been a welcome present, but when joined with the book in the world, I am the best entertained with, it raiseth a strong desire in me to be better known, where I am sure to be so much pleased. I have till now thought wit could not be translated, and do still retain so much of that opinion, that I believe it impossible, except by one whose genius cometh up to that of the author. You have so kept the original strength of his thought, that it almost tempts a man to believe the transmigration of souls; and that he being used to hills is come into the moorlands to reward us here in England, for doing him more right than his country will afford him. He hath by your means mended his first edition: to transplant and make him ours, is not only a valuable acquisition to us, but a just censure of the critical impertinence of those French scribblers, who have taken pains to make little cavils and exceptions, to lessen the reputation of this great man, whom nature hath made too big to confine himself to the exactness of a studied stile. He let his mind have its full flight, and sheweth, by a generous kind of negligence, that he did not write for praise, but to give to the world a true picture of himself and of mankind. He scorned affected periods, or to please the mista-

ken reader with an empty chime of words. He hath no affectation to set himself out, and dependeth wholly upon the natural force of what is his own, and the excellent application of what he borroweth.

'You see, Sir, that I have kindness enough for Monsieur de Montaigne to be your rival, but nobody can now pretend to be in equal competition with you. I do willingly yield, which is no small matter for a man to do to a more prosperous lover; and if you will repay this piece of justice with another, pray believe, that he, who can translate such an author without doing him wrong, must not only make me glad, but proud of being his

'Most humble servant,

HALIFAX (9).'

(9) Lives of the Poets, vol. iii. p. 303, 304.

[H] Songs.] Among his bacchanalian Songs, is one that is well known, and of which the following is the first stanza:

'Come let's mind our drinking,
'Away with this thinking;
'It ne'er, that I heard of, did any one good;
'Prevents not disaster,
'But brings it on faster,
'Mischance is by mirth and by courage
'withstood (10).'

(10) Poems, p. 74.

[I] A few of a more serious nature.] From one of these, called *the Retirement*, written in irregular stanzas, and addressed to Mr. Isaac Walton, we shall select the following lines:

'O solitude, the soul's best friend,

'And all his Maker's Wonders to intend;
'With thee I here converse at will,
'And would be glad to do so still;
'For it is thou alone that keep'st the soul awake.

'How calm and quiet a delight
'It is alone
'To read, and meditate, and write,
'By none offended, nor offending none;
'To walk, ride, sit, or sleep at one's own ease,
'And pleasing a man's self, none other to dis-

(11) *Ibid.* p. 135.

'involved

‘involved in debt, and perpetually harrassed with duns [K], attornies, and bailiffs (s).’ It is said, that a report is current in the neighbourhood in which he lived, that by some far-castic lines in his *Virgil Travestie*, wherein he had made mention of a singular ruff, worn by a grandmother, or, as some say, an aunt of his, who lived in the Peak, he so exceedingly offended the old Lady, that she revoked a clause in her will, whereby she had bequeathed to him an estate of four or five hundred pounds a year (t): but this story seems not to be well-grounded [L]. He had several children by his first Lady, but none by his second. His son, Beresford Cotton, had a company given him in a regiment of foot, raised by the Earl of Derby, for the Service of King William; and one of his daughters was married to Dr. George Stanhope, Dean of Canterbury (u).’]

(u) Hawkins, *ut supra*.

[K] *Involved in debt, and perpetually harrassed with duns, &c.* In the second Canto of his *Voyage to Ireland in Burlesque*, are the following lines, as a part of the account which he gave of himself to the Mayor of Chester:

‘I answer’d, my country was fam’d Staffordshire;
‘That in deeds, bills, and bonds, I was ever writ
‘squire;
‘That of land, I had both sorts, some good, and
‘some evil,
‘But that a great part on’t was pawn’d to the
‘Devil (12).’

(12) *Ibid.* p. 186.

In his *Epistle to Sir Clifford Clifton*, speaking of himself, are also the following lines:

‘He always wants money, which makes him
‘want ease,
‘And he’s always besieged, tho’ himself of the peace,

‘By an army of duns, who batter with scandals,
‘And are foemen more fierce than the Goths or
‘the Vandals (13).’

(13) *Ibid.* p. 329.

[L] *This story seems not to be well grounded.* The lines referred to must be the following:

‘And then there is a fair great ruff,
‘Made of a pure and costly stuff,
‘To wear about her highness’ neck,
‘Like Mrs. Cockaney’s in the Peak (14).’

(14) *Virgil Travestie*, p. 53. edit. 1700.

But we do not find that he had either aunt, or grandmother, whose name was Cockaney. In the collection of his Poems, published after his death, we meet with an Epitaph on “his dear aunt, Mrs. Anne Stanhope,” whom he speaks of as the best of kindred, and of friends, and the best of women (15).]

COVEL (JOHN), a very learned Divine, in the seventeenth, and beginning of the eighteenth Century, was born at Horningshearth in Suffolk, in the Year 1638 (a) being the son of William Covell of that place (b). He was educated in Grammar-learning at St. Edmund’s Bury, under Mr. Stephens; and on the 31st of March 1654, in the sixteenth year of his age, admitted into Christ’s College in Cambridge, of which he was afterwards chosen Fellow (c). In the year 1657, he took the degree of Bachelor of Arts, and that of Master in 1661 (d). Afterwards entering into Holy Orders, he had the advantage of going, in 1670, as Chaplain to Sir Daniel Harvey (e), Ambassador from King Charles II. to the Ottoman Porte; where he served, in that quality, both him, and his successor, Sir John Finch, for the space of seven years (f). Some time after his return to England he was created Doctor in Divinity, namely in 1679 (g); and the same year was chosen Lady Margaret’s Preacher in the University of Cambridge (h). On the 5th of March 1680, he had institution to the Sine-cure-Rectory of Littlebury in Essex, to which he was presented by Dr. Gunning Bishop of Ely (i); and, on the 9th of November 1687, he was installed into the Chancellorship of York, conferred upon him by the King, during the vacancy of that See (k). On the 7th of July 1688 he was elected Master of Christ’s College (l), in which station he behaved as a good and prudent Governor. He was also Rector of Kegworth in Leicestershire (m). In the year 1708, he served the office of Vice-chancellor in the University of Cambridge (n). At length, after having led a kind of itinerant life, [as he himself informs us (o),] at York, in Holland, and elsewhere; he arrived at his long Journey’s end, on the 19th of December 1722, in the 85th year of his age; and was buried in the Chapel of Christ’s College, where there is an Epitaph to his memory [A]. He gave a Benefaction of Three pounds a year to the poor of the parish of Littlebury above-mentioned (p). Having, during his seven years residence at Constantinople, had an opportunity of informing himself well of the ancient and present state of the Greek Church, and collected several curious observations and notices relating thereto; he digested them, during the remainder of his Life, into a curious and useful Book, published not long before his decease. It is intituled, ‘Some Account of the present Greek Church, with Reflections on their present Doctrine and Discipline; particularly in the Eucharist, and the rest of their seven pretended Sacraments, compared with Jac. Goar’s Notes upon the

(a) This appears from his age at the time of his death, as mentioned below.

[A] *Where there is an Epitaph to his memory* As follows.

Hic Sepultas habes, beatam Resurrectionem expectantis, Reliquias venerabilis & eruditissimi Viri Johannis Covell, S. T. P. nuper hujus Collegij Custodis sive Magistri, nec non Eccles. Cathedr. Eborac. Cancellarij.

Obiit Dec. XIX. A. D. MDCCXXII.
Ætat. LXXXV.

i. e. Here lye buried, in hopes of a blessed Resurrection, the remains of that venerable and most learned man John Covell, D.D. late Master of this College, and Chancellor of the Cathedral Church of York.

He died December 19, 1722, in the 85th Year of his Age.

Greek

'Greek Ritual, or ΕΥΧΟΛΟΓΙΟΝ.' Cambridge MDCCXXII. fol. [B]. As for the Author's

[B] *Some account of the present Greek Church, &c.*

The chief occasion of that work, was the great Controversy which for several years was hotly debated in the last Century, by two of the most eminent Divines of France, Monsieur *Arnauld* Doctor of the Sorbonne, on the side of the Papists; and Mons. *Claude* Minister of Charenton, in behalf of the Protestants. The former, not being content to say, That the Church in all ages believed Transubstantiation, did also positively affirm, That all the Eastern Churches do at this very day believe it, in the same sense as it was defined by the Council of Trent. Mr. *Claude*, in his answer to him, brought most authentic proofs of the contrary. Whereupon *Arnauld* set all the Missionaries of the East on work to procure Testimonies for him: Which, by bribes and other indirect means, they obtained in such numbers, that there was, soon after, a large Quarto in French printed at Paris, full of the names of Patriarchs, Bishops, and Doctors of those Churches, who all approved the Roman Doctrine (1). But Mons. *Claude* having had most certain Information, by means of a French Gentleman at Colchis, that some of those Testimonies were mere Fictions; and others quite otherwise than they were told; he sent some Queries into the East, and desired the English Clergymen residing there, to enquire of the Greeks, and other Eastern Christians of the best note, who had no correspondence with the Romanists, nor were Emisseries of the Court of Rome, or retainers to them: 'Whether Transubstantiation (*μετεμοίωσις*) i. e. the real and natural change of the whole substance of the Bread into the same numerical substance as the body of Christ which is in heaven, be an article of Faith amongst them, and the contrary be accounted heretical and impious,' &c. (2). This set therefore Dr. *Covel* upon examining thoroughly into that point. But, after all, he declares, that the Greeks, and Easterlings, are so far from being learned and well versed in that Controversy, that he never met with one amongst them, who ever pretended fully to understand, much less ever offered to clear that matter. 'I have, says he, here and there met with an Easterling brought up in the College de propaganda fide at Rome, or elsewhere in Italy, who would sometimes venture at a Solution to some difficulties about transubstantiation; but it was ever done only by some scraps of the common evasions and jargon of the Schools, and never with any satisfactory or solid reason. But from a native Greek, or Easterling, who was never out of his country, (though he was there a man of some dignity) I never could meet with any tolerable reasoning or answer towards the clearing of the point. Many of my acquaintance would avoid any set discourse about these matters. Some few who had picked up any scattered notions in the East, or elsewhere, from the Romish emisseries, would offer them very imperfectly, and as ill apply them. But as for the bulk of their Clergy (the far greatest part of their Prelates and topping Ministers) I do positively assert, that they are in general profoundly ignorant in these points; and not one of a thousand amongst the ordinary Priests knows any thing of the matter. They have no books to read, but their Hours of Prayer, and common Church-Offices, which are very numerous; and in Country-Churches you will rarely find any of these, except their common Euchologium, their ordinary Prayers and Liturgies: and these, like parrots, they commonly mumble and hurry over by heart, and use them very imperfectly with strange variety and confusion (3). Afterwards he observes, 'That we need not wonder at the want of Learning among the Greeks, and other Easterlings, since they have no Academies or Schools for instructing Students in any points of Philosophy, Divinity, Mathematics, or any other part of the polite Literature of Europe (4). Upon the whole therefore, we may easily judge, how incompetent Judges such ignorant persons are in that and other religious matters; and how little their testimonies are to be depended upon. Nor can it be really believed, that their Subscriptions contained in them the real Faith or Sentiments of the

whole Eastern Church, or the positive, firm, and clear belief of every particular Subscriber (5).

In order to trace this point to its fountain and original Head, and to place it in a true light, our Author wrote the *Account of the present Greek Church*, now before us. He divides the whole into two Books, whereof the First contains five chapters, and the Second but two. In the 1st Chapter, 'he gives his private thoughts concerning the Christian Communion in general;' And shews, how solemn, but withal how simple and plain, the celebration of the Eucharist was in the Primitive Church. In the 2d Chapter, he explains, 'How the familiar and primitive way, of breaking bread, and drinking wine together like brethren, joined with plain and known Forms of Prayer and Thanksgiving, in a devout remembrance of Christ, hath been loaded and clogged with amusing Rites and empty Ceremonies.' And here he represents in figures the chief Ceremonies used by the Greeks at the administration of the Eucharist; and gives an English translation of their form of celebrating it, from St. Chrysostome's Liturgy, printed in their Euchologium, or Prayer-Book. The 3d Chapter contains 'some Notes upon that Liturgy, which is attributed to St. Chrysostome.' In the 4th he gives his conjecture, 'How the plain and familiar way of the first administration of the Eucharist came to be turned into the present Greeks practice of consecrating, and partaking of, only a few little bits and mites of bread, [*μερίδες* or portions] and of giving to the Laity only a little Spoonful of wine.' The 5th Chapter contains 'some Observations concerning the first rise of that new doctrine of Transubstantiation, and the endeavours used to propagate it over the whole Christian world.' Under which he shews, That it was not introduced into the Greek Church, till after the taking of Constantinople by the Turks; that is, till after the Year of Christ 1453.——The 1st Chapter of the Second book treats of 'the Greeks seven Mysteries or Sacraments:' namely, 1. Confirmation; 2. Priesthood; 3. Orders; 4. Matrimony; 5. Penance; 6. Auricular Confession; and 7. Extreme Unction. The 2d and last Chapter, is, 'Concerning Images, and the worship of Saints.'——The author intermixes throughout curious accounts of the Jewish and Mahometan customs and Ceremonies. He tells us for instance, that 'all over Turkey where he happened to travel, the common bread is not much unlike our thicker sort of Pancakes, being very soft, and seldom above a day old; so as you may wind it round your finger. This flat loaf, or rather cake, is round, and about the breadth of one of our plates, and about an inch thick at most. When we eat at an ordinary man's house, (be it Turk, Greek, Armenian, Jew, &c.) the master, or chief of the family, or some friend by his appointment, takes as many of these loaves, or cakes, as he thinks sufficient for the present company, and with his hands breaks, or rather pulls them into pieces of moderate bigness, and strews them all upon the table, or whatever else they eat upon.'——'Moreover, the common food in Turkey, be it boiled or roasted, is never cooked in whole joints, but in small morsels; so that there is no use of knives at the table, but every one takes a bit of the bread, and dipping it in the dish, he takes up with it a morsel of meat between his thumb and his two fore fingers, and so puts all into his mouth together. If these morsels be boiled (as they often are with their *Churbaw*, or Potage) they first eat the potage with a wooden spoon, or sop it up with bits of the bread, and then take up the more solid morsels remaining, and eat them (6). The conclusion of the whole work is written with such an excellent Spirit, that we cannot forbear laying it before the Reader—'I have sincerely and impartially, and I hope candidly, set down only my own private thoughts, and I would not willingly be judged an absolute slave to any party, but as I really am, a compassionate lover of every good Christian who heartily desires to serve our God in Spirit and in truth. I must verily think with myself that those great Churches, which perfectly differ from us, have in

(*) Adultery.

COVERDALE (MILES), Bishop of Exeter in the reign of Edward VI. and author of several Tracts [A], was born in Yorkshire, in the reign of Henry VII. [B], and, being educated in the Romish religion, became an Augustin Monk. Afterwards, embracing the Reformation, he entered into Holy Orders (a) [C]. He assisted William Tindal in the English Version of the Bible, published in 1537, and afterwards revised and corrected the edition of it in a larger volume, with notes, in 1540 (b). On the 14th of Aug. (c) 1551, he succeeded Dr. John Harman in the See of Exeter, being promoted *propter singularem sacrarum literarum doctrinam, moresque probatissimos* (d), i. e. 'on account of his extraordinary knowledge in Divinity, and his unblemished character (e).' The Patent for conferring this bishoprick on him, though a married man, is dated August 14, 1551, at Westminster (f). Upon the change of religion in Queen Mary's reign, Bishop Coverdale was ejected from his See, and thrown into prison; out of which he was released at the earnest request of the King of Denmark, and, as a very great favour, permitted to go into banishment. Soon after Queen Elizabeth's accession to the throne, he returned from his exile, but refused to be restored to his bishoprick. He died, in a good old age, at London, and lies buried in the Church of St. Bartholomew-Exchange (g) [D].

[A] He was author of several Tracts.] He wrote I. *The Christian Rule or state of all the worlde from the highest to the lowest: and how every man shoulde lyve to please god in his callinge.* II. *The Christen state of Matrymonye, wherein husbandes and wyfes maye lerne to keepe house together with loue. The Originall of holy wedloke: whan, where, how, and of whom it was instituted and ordeyned: what it is: how it ought to proceede: what be the occasions, frute, and commodities thereof: contrarywyse how shamefull and horrible a thinge whoredome and adoutry * is: how one ought also to chose hym a mete and convenient spouse to keepe and increace the mutual loue, trouthe and dewtye of wedloke: and how married folkes shoulde bring up theyer chyldren in the feare of god.* III. *A Christen Exhortation to customable Swearers. What a ryghte and lawfull othe is: whan, and before whome it ought to be.* IV. *The maner of sayenge grace, or geyng thanks to god, after the doctrine of holy scripture.* IV. *The old Fayth: an evident probacion out of the holy scripture, that the Christen Faith (which is the ryghte, true, olde, and undoubted fayth) hath endured sens the beginnyng of the worlde. Herein hast thou also a short summe of the whole Byble, and a probacion, that al vertuous men have pleased god, and ever saved throughe the Christen fayth. These four pieces are printed together in a small duodecimo, and a black letter, an. 1547.* V. *A saythfull and true Pronostication upon the year M.CCCC. xlix. and perpetually after to the worldes ende, gathered out of the prophecies and scriptures of god, by the experience and practise of his workes, very comfortable for all Christen hertes; divided into seven chapters.* VI. *A Spirituall Almanacke, wherein every Christen man and woman may see what they ought daylye to do, or leaue undone. Not after the doctrine of the Papistes, not after the lernynge of Ptolomy, or other beythen Astronomers, but out of the very true and wholsome doctrine of god our almighty heavenly father, shewed unto us in his worde by his prophetes, apostles, but specyally by his dere sonne Jesus Christ: and is to be kept not onely this newe yeare, but continually unto the daye of the lorde's comyng agayne. These two were printed in a thin duodecimo, and a black letter, at London by Richard Kele, 'dwellynge at the longe shoppe in the Poultrey' under saynt Myldreds church, cum privilegio ad imprimendum solum.' Bale ascribes some other pieces to our author; particularly, *A Consutation of John Standish*, a tract on the Lord's Supper, *A Concordance to the New Testament*, *A Christian Catechism*; and some*

translations from Bullinger, Luther, Osiander, Johannes Campensis, and Erasmus (1).

[B] Born in the reign of Henry VII.] This I infer from his dying an old man in the reign of Queen Elizabeth. For, supposing him to have died about the seventieth year of his age, and not many years (as is most probable) after Queen Elizabeth's accession in 1558, the year of his birth will fall somewhere between 1490 and 1500. But Henry VII. began his reign in 1485, and died in 1509.

[C] Went into holy Orders.] Bale tells us (2), he was one of the first, who, upon the revival of the Church of England, together with Dr. Robert Barnes, taught the purity of the Gospel, and dedicated himself wholly to the service of the reformed religion. *Ex primis unus erat, qui renascente Anglorum ecclesia, cum Roberto Barnso, sue professionis doctore, Christum pure docuit. Alii partim, hic se totum dedit ad propagandam evangelii regni Dei Gloriam.*

[D] Lyes buried in the Church of St. Bartholomew-Exchange.] Upon his Grave-stone is the following Inscription (3):

Hic tandem requiemque ferens finemque laborum
Offa Coverdali mortua tumbus habet:
Exoniæ qui præsul erat dignissimus olim,
Insignis vitæ vir probitate suæ.
Octoginta annos grandævus vixit et unum,
Indignum passus sæpius exilium.
Sic tandem variis jactatus casibus iste
Excipitur gremio, terra benigna, tuo.

I have been obliged to make some alterations in this Epitaph, which seems to have been faultily transcribed in my author: for in the third line he has put *Oxonie* for *Exoniæ*; in the sixth, *indigni* for *indignum*; in the seventh, *jactabam* for *jactatus*, and *ista* for *iste*; and in the last line *exceptitur* for *excipitur*, and *suo* for *tuo*. B.

* [The following farther particulars relative to Bishop Coverdale, have obligingly been communicated by Mr. Brooke, Somerset Herald, from a manuscript in his possession.

"He (Coverdale) was Almoner to Queen Catherine Parr, the last wife of King Henry the Eighth, a Lady who much favoured the reformed religion; and as such, officiated at her funeral in September 1548, in the Chapel at Sundeley-Castle in Gloucestershire, the seat of her third husband, Thomas, Lord

(2) *Ibid.*

(3) Maitland's *History of London*, p. 377.

" Lord Seymour of Sudley; and took that opportunity of declaring his sentiments on religion in the sermon he preached, which, my author says, was very good and godlie, and in one place thereof he took occasion to declare unto the people howe that there shulde none there thinke, seye nor spread abroad, that the offeringe which was there don, was don anye thing to proffytt the deade, but for the poore onely; and also the lights which were caried and stode abowte the corps, were for the honnour of the parson, and for none other entente nor purpose; and so wente thorowghe with his Sermonde, and made a godlye Prayer, &c."

Our Predecessor ought to have mentioned the reason of Dr. Coverdale's refusing to be restored to his Bishopric, which was his attachment to the principles of the Puritans. He had assisted at the consecration of Queen Elizabeth's first Archbishop of Canterbury; but, because he could not comply with the ceremonies and habits, he was neglected, and for a time had no preferment of any kind. However,

when he was become both old and poor, Grindal, Bishop of London, gave him the small living of St. Magnus, at the Bridge foot. Here he preached quietly about two years; but not coming up to the terms of conformity then required, he was obliged to relinquish his parish a little before his death. He was very much admired by the Puritans, who flocked to him in great numbers, while he officiated at St. Magnus's Church, which he did without the habits. When he was deprived of his living, his followers were obliged to send to his house on Saturdays, to know where they might hear him the next day. At this the Government took umbrage; so that the good old man was under the necessity of telling his friends, that he durst not inform them any more of his preaching, for fear of offending his superiors (4).

Dr. Richardson, in his noble edition of Godwin de Præfulibus Angliæ, says that Coverdale died on the 20th of May, 1565 (5); but Mr. Neal asserts, that his death happened on the 20th of May, 1567, when he was eighty one years of age (6).]

** [COURAYER (PETER FRANCIS), a learned Divine of the Church of Rome, who was long resident in England, was born at Vernon, in Normandy, in the year 1681 (a). Being brought up and educated for the Church, he became Canon regular and Librarian of the Abbey of St. Genevieve. This must have been a situation extremely favourable to the prosecution of his studies, as the Library of which he had the care is a very considerable one [A]. Among other theological inquiries, he engaged in one, which was productive of very important consequences respecting his future life. Having been employed in reading Abbé Renaudot's *Memoire sur la Validité des Ordinations des Anglois*, inserted in Abbé Gould's *La véritable Croyance de l'Eglise Catholique*, he was induced to enter into a farther examination of that subject (b). Accordingly he drew up a memoir upon it, for his own satisfaction only, but which grew insensibly into a treatise; and at the instance of some friends to whom it was communicated, he was at length prevailed with to consent to its publication [B]. He, therefore, made the usual application for permission to print it; and obtained the approbation of Mons. Arnaudin [C], the Royal Licenser of the Press. Some persons, however, afterwards found means to prevail on the Chancellor to refuse to affix the Seal to the approbation of the Licenser. Terms were proposed to Father Courayer, to which he could not accede, and he gave up all thoughts of publishing (c). Some of his friends, however, being in possession of a copy, resolved to print it; and this obliged him to acquiesce in the publication. When he first wrote his Treatise, all his materials were taken from printed authorities, and he had no acquaintance or correspondence in England. But sundry difficulties, which occurred to him in the course of

(a) Nichols's Anecdotes of Bowyer, p. 84.

(b) Observations in a Journey to Paris, by Way of Flanders, in 1776, vol. ii. p. 154.

(c) *Ibid*, p. 156, 157.

[A] *The Library of which he had the care is a very considerable one.* It is represented as large and curious; and a late traveller, speaking of the building, says, 'This Library is a grand room in the form of a cross, about three hundred feet in length and breadth, with a dome finely painted in the center. Toward the end of one of the arms of the cross, a door opens into a range of apartments, which are furnished with antiquities and natural curiosities. The collection of minerals and fossils is very considerable (1).'

(1) Observations in a Journey to Paris by Way of Flanders, in 1776, vol. ii. p. 19.

[B] *Prevailed with to consent to its publication.* In the Preface to his *Dissertation on the Validity of the English Ordinations*, he says, 'If the writings of the English, in favour of their Ministry, were better known, I should not have troubled the public with a book, which it would have then but little need of; yet I hope that I shall be indulged in some measure in favour of a question so important, and so little examined among us, as this I now propose to treat of. The thing in question is no less, than to know if the Church of England formerly so illustrious, and even now also so recommendable for the brightness of her Prelates, and the erudition of her Clergy, be without a succession, without an hierarchy, without a ministry. A great many of our divines maintain this, and the English divines deny it (2).'

(2) P. 334.

[C] *Obtained the approbation of Mons. Arnaudin.* It is published in the second volume of the *Relation Historique et Apologetique des Sentimens et de la Conduite du P. le Courayer*; and the following is a translation of it. 'I have read, by order of my Lord Chancellor, a Manuscript which has for its title *Dissertation sur la Validité des Ordinations des Anglois et sur la Succession des Eveques de l'Eglise Anglicane*. This

Dissertation, of which the matter is as curious as it is interesting, is written with regularity and with precision. The arguments, made use of by the learned author, are so persuasive, and so convincing, that they may justly be considered as amounting to full demonstration. Such is the force of these arguments, that I am persuaded the Abbé Renaudot would himself have been convinced by them, if death had not taken him from us. That great man, who was so conversant in every branch of literature, always did himself the honour to be overcome by the truth, and that he would have found in this performance. I have subscribed it so much the more willingly, because the opinion which is maintained in it, respecting the ordination of the Bishops of England, is the same with that of the illustrious Mons. Bossuet, Bishop of Meaux, whose just taste in good theology, profound science, and extensive erudition, are known throughout the whole Christian world. There is nothing in this Dissertation contrary to the faith of the Church; and I am even convinced, that the doctrine contained in this learned and solid work, may greatly contribute to promote a re-union between the Church of England and the Church of Rome, which would be a most happy event. It would be a just subject of extreme joy to see re-entered into its bosom a Church, which hath been the mother of so many considerable saints, and which yet possesses so many learned Bishops, and so great a number of fine geniusses, who cultivate polite literature and the sciences with diligence and with success.

Paris, Oct. 1, 1721.

D'ARNAUDIN.

his

his inquiries, suggested to him the propriety of writing to England, in order to obtain clearer information on some points; and knowing that a correspondence had been carried on between Dr. Wake, then Archbishop of Canterbury, and Dr. Dupin, on the project of re-uniting the Churches of England and France, he took the liberty, although entirely unknown to that prelate, to desire his information respecting some particulars. The Archbishop answered his inquiries with great readiness, candour [D], and politeness; and many letters passed between them on this occasion. His application to the Archbishop appears to have been made upon the very first apprehension of any difficulty respecting his publication: for his Grace's first letter to him was dated September 16, 1721. Father Courayer's book was at length published in 1723, in two volumes, small 8vo, under the following title: "Dissertation sur la Validité des Ordinations des Anglois, et sur la Succession des Evêques de l'Eglise Anglicane: avec les preuves justificatives des faits avancés dans cet ouvrage." It was printed at Nancy [E], though it was stated in the title to have been printed at Brussels. It was afterwards translated into English, by the Rev. Mr. Daniel Williams, and published at London, in one volume, 8vo. under the following title: "A Defence of the Validity of the English Ordinations [F], and of the Succession of the Bishops in the Church of England: together with proofs justifying the facts advanced in this treatise." Father Courayer's work was immediately attacked by several Popish writers, particularly by Father Le Quien, and Father Hardouin. But in 1726, he published, in four volumes, 12mo. "Défense de la Dissertation sur la Validité des Ordinations des Anglois, contre les différentes Réponses qui y ont été faites. Avec les Preuves justificatives des faits avancés dans cet Ouvrage. Par l'Auteur de la Dissertation." An English translation of this also was afterwards published at London, in two volumes, 8vo. under the following title: "A Defence of the Dissertation on the Validity of the English Ordinations, against the several Answers made to it [G], with proper Vouchers for the Facts advanced in that Work."

But

[D] *The Archbishop answered his Inquiries with great readiness, candour, &c.* Father Courayer thus expressed himself concerning the manner in which Archbishop Wake answered his Inquiries: 'I owe especially to my Lord Archbishop of Canterbury this honourable testimony, that he has spared no pains, nor no applications, in order to procure for me the means of elucidating these facts; and that which is infinitely more estimable, of having manifested in his own researches so great a love of truth, and shewn himself so destitute of all prejudices in favour of his own party, that I cannot too much applaud his impartiality, his knowledge, and his humanity (3).'

(3) Observations, &c. *ubi supra*, p. 159.

[E] *Was printed at Nancy.* Of this we are informed by himself. He says, *Quoi qu'imprimée à Nancy sur l'approbation du Sieur D'Arnaud et la permission tacite du magistrat, le libraire crut devoir déguiser le lieu de l'impression, et la fit paroître sous le nom de Bruxelles* (4).

(4) Relation historique et apologetique, tom. i. p. 9.

[F] *A Defence of the Validity of the English Ordinations* In the Preface to the Translation of this Work, Mr. Williams says, 'What the Reader is here to expect is, a just and rational vindication of our Church, from the ridiculous story of a ludicrous consecration of our Bishops in Queen Elizabeth's time, at the Nag's-Head in Cheapside: a calumny, first invented to support a weak cause, and continued by persons as weak and injudicious as the first inventors of it. The succession of our Bishops in general is demonstrated, and the validity of our ordinal is also vindicated, with a great deal of learning, as well as judgment. The powers of a national Church are asserted; and it is fully proved, that in the alterations made by our Church, she did not act in the business of ordinations inconsistently with those powers (5).'

(5) Pref. p. 9.

In a letter to Mr. Williams, Father Courayer expressed his acknowledgments to that Gentleman for the fidelity of his translation of his work; and he added, 'If my work be relished in England, I doubt not, but that I shall be partly indebted for it to the goodness of your translation. In making me speak your language, you procure me the approbation of a knowing and a learned nation; and you in a manner naturalize me among a people esteemed by all the learned men in Europe. This is an obligation which I shall be scarcely able sufficiently to acknowledge, and which I can only repay by a desire so see an end put to the schism and division. I wish the seeds of peace and re-union, which I have

sown in this treatise, may in time grow up to the advantage of your Church, and the joy of ours. The return of the Church of England to Catholic unity, would quickly draw after it that of all the Protestant Churches, who seem to be more sensible than ever, of the deficiency of their Government, and the excesses of their first reformers (6).'

It appears, however, that when Father Courayer wrote the above letter, he had seen only some sheets of the translation in manuscript; and he afterwards complained, that in the impression the manuscript was castrated; though this is stated to have been contrary to the intention of the Translator (7).

Of the method in which Father Courayer executed his work, some idea may be formed from the following extract from his Preface: 'In order to treat this subject more methodically, I shall first set forth the changes that happened in the Church of England, with regard to the succession of their Bishops, and their ordination. I shall afterwards prove, that notwithstanding the changes introduced by Edward the VIth. in the Ordinal, there was nothing essential omitted in Parker's consecration, who is the source and origin of the English Ministry, as it subsists at this day. I shall in the chapters that follow prove the truth of Barlow's consecration, upon which that of Parker depends: and I shall endeavour to refute all the arguments brought against it. In fine, in discussing some general difficulties proposed against the validity of the new ordinations, I shall lay down principles and maxims which may serve, not only to establish the English ordinations, but also to examine other facts that might happen of the same kind. I shall moreover carefully examine, what authority a national Church can challenge, in what concerns the administration of Sacraments: and I hope to make it very evident, that the Church of England has not exceeded the bounds of her power in those alterations she thought fit to make in her rites (8).'

(6) Letter from Father Courayer to Mr. Williams, prefixed to the second edition of the Defence of the English Ordinations, p. 18, 20.

(7) Pref. to the Defence of the Dissertation on the Validity of the English Ordinations, p. 14.

(8) P. 6, 7.

In another part of this Preface, Courayer likewise makes an observation respecting the Church of England, which the generality of Protestants will hardly consider as a compliment to it, though the good Father certainly intended it for such. 'Of all the Churches which have broken the unity,' says he, 'the Church of England has kept nearest to us. She has retained most of our customs and ceremonies (9).'

(9) Ibid. p. 4.

[G] *A Defence of the Dissertation on the Validity of the English Ordinations, &c.* Besides what he had said

But Father Courayer was not only attacked by those writers who published books against him. He was likewise censured both by the mandates and by the assemblies of several Bishops, and particularly by Cardinal de Noailles, Archbishop of Paris [H], and the

said in general in defence of the English ordinations, Father Courayer had given great offence to many zealous Catholics by what he had said respecting Transubstantiation, and the sentiments of the Clergy of the Church of England concerning the doctrine of the real presence. It was maintained by Courayer's opponents, that the English Clergy did not acknowledge the Eucharist to be a Sacrifice, as the Catholics did; that the offering of sacrifice was the chief function of the Christian priesthood; that the ritual of King Edward VI. made no mention of the sacrifice, nor of the power given to the Priest to offer it; and that, of consequence, all ordinations made conformably to that ritual were null and void. Father Courayer, on the contrary, contended, that particular churches were in possession of a right to draw up their own form for the administration of the Sacraments; and though this form should not agree with others, except only as to the substance, yet no body ought, for that reason, to conclude either this or that form to be invalid. He affirmed, that this was an avowed and established principle of the Gallican Church. 'It is a known maxim in France,' said he, 'and a fundamental principle of our laws and liberties, that every Church is mistress of her own discipline, and even that the authority of a general Council cannot oblige her to give them up; and that notwithstanding such decrees, she ought to maintain her own usages. It is upon this principle that we have ever opposed, in France, the reception of the decrees of the Council of Trent upon the subject of discipline, though as to the matter of doctrine, this Council is received as a general council (10).' It followed, he said, 'that the Church of England, as well as any other, might compose her own prayers, regulate her own liturgy, and direct the manner of the administration of her own Sacraments according to her own mind; and, in a word, make what changes she thought fit, provided they were compatible with the essential parts of the institutions, which are common to all Churches, and practised in all ages (11).' He maintained farther, that the omission of the form, in the English ordinal, relative to the "power to sacrifice," could not prejudice the English priesthood, 'because they made no difficulty to own the sacrifice in the same sense with most of the antient Fathers, and of our most judicious controversial writers; that is to say, a *Representative and Commemorative Sacrifice*, which is not different from that of the cross, and which bears the name, because it is the image and memorial of it, and because the same victim is offered (12).' He also affirmed, that "Jesus Christ became present by the consecration of the English, as really as by that of the Catholics (13)." In this last position there are many, who have but little faith in priestly claims, who will very readily concur in sentiment with the learned Father.

Courayer likewise endeavoured to prove, that it was never required, that the forms of Sacraments should distinctly express their principal function or chief effect; that the antient forms of sacerdotal ordination frequently omit mentioning the sacrifice; that nothing essential was omitted in the ritual of King Edward the Sixth; that though Jesus Christ be really present under the symbols of the Eucharist, the Fathers and Divines draw the idea of the sacrifice in the Eucharist, not from that presence, but from the representation and remembrance of his death; and that even though the presence be supposed necessary, that which the English Church admits would be sufficient for a Spiritual Sacrifice, as is that of the Catholic Church; that the story of Archbishop Parker being ordained at a Tavern is fabulous in all its circumstances; that there was no want of consecrated Bishops at that time for the consecration of Parker; that there is as much certainty of his being ordained at Lambeth as there can be of any historical fact; Vol. IV.

and that there has been no interruption in the succession of the Bishops of the Church of England, nor of their ordination.

[H] *Particularly by Cardinal de Noailles, Archbishop of Paris.* In a mandate issued by the Cardinal, and dated at Paris, Aug. 18, 1727, his eminence observes, that sickness having prevented him from examining Father Courayer's books himself, he had enjoined several able Theologians to peruse them with all possible attention; and upon their report it was found, that 'in many places they contained doctrine, or expressions, contrary to what the Church taught, as to the sacrifice of the mass, the real presence, the priesthood, the form of the Sacraments, and the notions they instil as to the rites and ceremonies of the Church, its authority, the Pope's supremacy, and other important points.' The Cardinal adds, 'We do not pronounce upon the ground of the question about the validity of the ordinations of the English, and the succession of their Bishops, which is the Author's scope in his works; but we will only tell him, that a Catholic Theologian ought to speak with more respect of the common practice of the Church, to propose to her with modesty his doubts and reflections, to wait her decision with a submissive disposition, and not to prescribe laws to her in a presumptuous manner, nor to call ignorance and prejudice whatever is contrary to his opinion.'

'We are willing to believe, as he has assured us, that he proposed to himself no other view, than to facilitate the re-union of the English to the Catholic Church and its head; but his desire to favour those whom he had a mind to reclaim, ought not to carry him so far as to justify errors, expressions, and abuses, which every Catholic ought to reject, and the Church will never approve.'

'What would we not do for bringing back to the faith of their ancestors, and to the Catholic unity, a people so considerable, and a nation formerly so submissive to the Holy See, that has brought forth so many great men, and Holy Bishops, and for whose salvation we could wish, in the sense of St. Paul, to become an *anathema*? But God forbid, that for so great a good we should suffer the sentiments of the Church to be disguised, or errors, which she condemns, to be approved (*).'

The Cardinal added farther, that having heard the report, and the advice of the Theologians, appointed by him to examine Father Courayer's books, 'after a mature consideration, and the invocation of God's holy name, we condemn the said writings, as containing a doctrine false, erroneous, scandalous, injurious to the Church and the Holy See, favouring schism and heresy, and even contrary in many points to the Catholic Doctrine.' And he prohibited, 'under the known penalties, all the people of his diocese from reading the said books.'

The French Court having also referred Courayer's books to the examination of several Bishops and Divines, they declared, that he had 'advanced a great many propositions equally contrary to the points of the doctrine, in relation to several essential articles of religion and discipline, as well as to the authority of the Church and the Pope's supremacy, which had induced them to condemn them as respectively false, rash, captious, ill-sounding, scandalous, injurious to the Church and the Holy See, favouring schism and heresy, erroneous, already condemned by the holy Council of Trent, and heretical.' This censure having been presented to the French King, an Arret of the Council of State was issued three days after, by which it was declared, that Father Courayer's books should be suppressed; and it was required, that 'all persons, who had the same books, should deliver them to the Register-Office of the Lieutenant-General of the Police, upon severe penalties (+).'

the Bishop of Marseilles (d). During the time that he underwent this species of persecution, he retired from Paris into the country, but was recalled by his superior to reside at the Priory of Hennemonte, four leagues from Paris. Here he received a diploma for the degree (*) of Doctor in Divinity from the University of Oxford, which was dated Aug. 28, 1727; and from hence he returned his thanks to the University, in an elegant Latin letter, dated Dec. 1, the same year; both of which he afterwards printed (e). But though his book had procured this honourable testimonial of his merit from an English University [I], the animosity which it had excited against him in France did not abate. The enemies of Father Courayer were not satisfied with publishing censures, and issuing episcopal mandates against him, but proceeded to measures for compelling him to recant what he had written, and to sign such submissions as were inconsistent with the dictates of his conscience. In this critical state of things, he resolved to quit his native country, and to seek an asylum in England. He was the more inclined to embrace this resolution, in consequence of the warm and friendly invitations which he had received from Archbishop Wake, who had conceived a great regard for him. After having spent four months very disagreeably at Hennemonte, he obtained leave to remove to Senlis; but, instead of going thither, he took the road to Calais in the common stage-coach, and from thence got safely over to Dover. "I arrived peaceably," says he, "in England, without any other inconveniencies, than those which are naturally attendant on a long journey in winter, and which were somewhat encreased by my being detained three days at Calais by contrary winds (f)." This stay at Calais, he observes, would have been a very unfavourable circumstance for him, if any suspicion had been formed of his design to quit France; but he had conducted the measures for his departure with so much secrecy and prudence, that his enemies were wholly ignorant of his intentions; and had, therefore, taken no steps to prevent his securing a retreat in England. He arrived in London on the 24th of January, 1728 (g).

(h) *Id. ibid.*

He was well received in England: the Marquis of Blandford made him a present of fifty pounds (h); and he obtained a pension of one hundred pounds a year from the Court. In 1729, he published, at Amsterdam, in two volumes, 12mo, "*Relation Historique et Apologetique des Sentimens et de la Conduite du P. le Courayer, Chanoine Regulier de Ste. Geneviève: avec les Preuves Justificatives des Faits avancez dans l'Ouvrage [K].*" In this work he entered into a farther justification of his sentiments and of his conduct,

(e) In the second vol. of his *Relation Historique et Apologetique*, &c.

The enemies of Father Courayer having given out that he had been converted by Cardinal de Noailles, and that he had, in consequence, made a recantation of his errors, he wrote a letter to his eminence upon that subject before he quitted France, in which he says, "I ought, my Lord, for my own sake, and for the sake of the public, to disown a pretended submission, more disgraceful to me than all the imaginary heresies, which they seek out in my writings without finding them." In the same letter, speaking of his determination to leave his native country, Father Courayer says, "By adherence to the Catholic Church in a foreign land, I will convince all Europe, that nothing but the reason of a just defence, and the necessity of freeing myself from an unjust vexation, could force me to take a step so contrary to my inclinations. Being always ready to resume my former condition, as soon as I have a reasonable assurance, that there is no longer any design of undoing me, and that I shall be at full liberty to go about my justification, I shall be the first in longing for a State which I leave with the greatest uneasiness. I shall carry every where a love of unity, a fondness for my profession, and a respect for those very persons who condemn me unjustly."

"Being free enough to own the abuses that prevail in the Church, and not to submit to that multitude of opinions with which our Creed is enlarged, by a continual creation of new articles of faith, I shall never depart from a due submission to those Catholic truths which have been transmitted to us by our fathers, and to the usages consecrated by the practice of the Church. But I shall neither be so superstitious as to place a vain confidence in them, nor so fond of our observances and ceremonies, as to believe that a Church cannot change them, without renouncing religion, and the glorious title of Church of Jesus Christ."

"It is with such dispositions, my Lord, that I leave France, and that a foreign kingdom shall see the spectacle of a man calumniated and persecuted, for being so bold as to assert the falsity of a romance, transformed into a history by our prejudices; and

because, notwithstanding his adherence to the Catholic doctrines, he cannot submit to the unintelligible jargon of our schools (*)."

Though this letter was written by Father Courayer before he quitted France, it was probably not delivered to the Cardinal till after he had left the kingdom.

[I] *Honourable testimonial of his merit from an English University.*] Voltaire was of opinion, that the English nation paid no regard to the subject of Father Courayer's book. Speaking of one of his opponents, Father Le Quien, he says, "He was a Dominican, and a man of great learning. He applied himself greatly to the study of the Eastern Churches, and that of England. He in particular wrote against Courayer upon the validity of the ordinations of the English Bishops. But the English pay no more regard to these disputes than the Turks do to dissertations upon the Greek Church (14)." With respect to a great part of the English nation, Voltaire was certainly right. They regarded the subject of the controversy as a matter of not the least consequence. But that there were many of the English Clergy, as well as others, who considered Father Courayer as having rendered an essential service to the Church of England by his publication, is manifest from the degree that was conferred on him by the University of Oxford, the pension that was granted him, and the favourable reception that he met with in England. The number of those who would think highly of the importance of the subject of Courayer's book, are, however, probably much lessened, since the time that his work first made its appearance.

[K] *Relation Historique et Apologetique des sentimens, &c.*] In this work Father Courayer makes some general observations relative to his religious sentiments: "Born," says he, "a Christian and a Catholic, I have always endeavoured to instruct myself in religion, with the same zeal and the same freedom, that I should have believed myself under an obligation to do, if I had taken a part in any other affair which I had conceived to be of the utmost import-

(*) *Ibid.* p. 42, 48, 49.

conduct, and shewed the necessity that he was under of quitting France, from the virulence and power of his enemies. In 1733, he was at Oxford, and was present in the Theatre at the Public Act that year, and made a speech there upon the occasion, which was afterwards printed both in Latin and English⁽ⁱ⁾. In 1736, he published at London, in two volumes, folio, a Translation, in French, of Father Paul's History of the Council of Trent; with notes critical, historical, and theological. He dedicated this work to Queen Caroline, and speaks of it as having been undertaken by her command; and he expresses, in the strongest terms, his gratitude to her Majesty for her patronage, and for the liberality which she had manifested towards him [L]. A list of subscribers is prefixed, in which are found the names of the Prince of Wales, the Duke of Cumberland, the Prince and Princess of Orange, the Princesses Amelia and Caroline, the Archbishop of Canterbury, the Lord Chancellor, Lord Hardwicke, then Chief Justice of the King's Bench, Sir Robert Walpole, and many of the nobility, and other persons of distinction. By the sale of this work he is said to have gained fifteen hundred pounds; and the Queen also raised his pension to two hundred pounds *per Annum* (k). He gave sixteen hundred pounds to Lord Feverham, for an annuity of one hundred pounds *per Annum*, which he enjoyed forty years (l). By these means he came into very easy circumstances, which were rendered still more so by the reception which his agreeable and instructive conversation procured him, among persons of rank and fortune, with many of whom it was his custom to live for several months at a time. He wrote some other works in French, besides those that have been mentioned (m); and, in particular, he translated into that language Sleidan's History of the Reformation. His exile from his own country was probably no diminution of his happiness upon the whole; for he appears to have passed his time in England very agreeably, and he lived to an uncommon age. Even in his latter years, he was distinguished for the cheerfulness of his temper, and the sprightliness of his conversation. He died in Downing-street, Westminster, after two days illness, on the 17th of October, 1776, at the age of ninety-five. Agreeably to his own desire, he was buried in the Cloister of Westminster-Abbey, by Dr. Bell, Chaplain to the Princess Amelia (n). In his Will, which was dated Feb. 3, 1774, he declared, "That he died a Member of the Catholic Church, but without approving of many of the opinions and superstitions which have been introduced into the Romish Church, and taught in their schools and seminaries, and which they have insisted on as articles of faith, though to him they appeared to be not only not founded in truth, but also to be highly improbable (o)." It is said, that soon after he came to England, he went to a Priest, of the Romish Church, for confession, and acquainted him who he was. The Priest would not

importance. Convinced of the existence of a God, to whom we are indebted for our being, and who merits on that account our adoration and our gratitude; and persuaded that we are created for another life; I have never regarded but with horror that indifference, with which the greater part of mankind live respecting a point, the decision of which is of so much consequence to our tranquility. From the worship of God, and the hope of another life, it was easy to pass to the approbation of Christianity, which more than any other religion hath illustrated these truths, and furnished us with the means of employing them for our sanctification. The more I have studied the Gospel, the more worthy it has appeared to me of approbation, and the more worthy of being adhered to. Nothing is so pure as the worship that it proposes, nothing so exact as the rules that it prescribes, nothing so holy as the life that it enjoins, nothing so noble as the recompense that it leads us to hope for, nothing is so proper to render men and societies happy; since that in subduing the passions to reason and to religion, it takes away even the source of our miseries in taking away that of our disorders. It supposes all natural truths, and destroys none. It reforms all vices, and conducts us to the practice of all virtues. It re-establishes in the minds of men those ideas of justice, of charity, of temperance, of modesty, and of piety, which the author of nature had formed in us, and which sin had destroyed. Nothing is so true as that which is said by St. Paul, that Jesus Christ hath made all things new, and, by a kind of second creation, hath rendered us again capable of righteousness and true holiness. The Gospel is a new mission, in which religion is no more confined within the limits of a people or of a province; and in which all men, having the same Creator, are recalled, without distinction, to the same laws, and to the same hopes. It is a new

worship, in which we are taught, that there is no other which is agreeable to him, but that which is in spirit and in truth. It is a new morality, which does not confine itself to the repressing those outward actions which are sinful; but which teaches us to dry up the source of evil actions, in condemning even evil thoughts and desires. It operates upon us by new hopes, and new fears; and it is no more the expectation of temporal good, or the fear of temporal evil, by which we are excited to practice virtue, and to avoid vice. Whatever is confined to the present life only appears unworthy of us: and man, better instructed in the grandeur of his origin, and of his end, cherishes no thoughts but those which relate to eternity, for which he perceives that his soul was destined (15).

[L] *His gratitude to her Majesty for her patronage, and for the liberality, &c.* He says in this dedication, "Exiled into your Majesty's dominions by those enemies which the love of truth alone procured me, and the defence of a Church which you have ever honoured with your esteem and protection, your goodness has been my asylum in disgrace, sustained me under my afflictions, relieved my necessities, and supplied all my wants; oft-times preventing and exceeding my occasions; while, to crown the grandeur of your beneficence, you have scarcely suffered me to thank you for those favours, which you deemed inconsiderable, though the weight of them overwhelmed me. Delighted with the consciousness of well-doing, more than with all the eulogies that naturally attend your benevolence, you refuse to admit even the justest acknowledgments; and to save those you succour, as far as possible, the publishing their misfortunes, by the recital of your grace and clemency, you seek only the divine satisfaction of solacing the unhappy, without bartering your liberality for applause (16)."

venture

(p) Observations, &c. ubi supra, p. 35.

venture to take his confession, because he was excommunicated; but advised him to consult his superior of St. Genevieve. Whether he made any such application, or what was the result, we are not informed: but it is certain, that, when in London, he made it his practice to go to mass; and, when in the country at Ealing, he constantly attended the service of the parish Church, declaring, at all times, that he had great satisfaction in the prayers of the Church of England (p). In discoursing on religious subjects he was reserved and cautious, avoiding controversy as much as possible. He left 500*l.* to the parish of St. Martin, and gave, in his life-time, his books to the library there, which was founded by Archbishop Tenison, and of which they make even at this day a considerable part. He bequeathed 200*l.* to the parish of St. Margaret, Westminster, and a handsome sum of money to the poor of Vernon, in Normandy; and, after many legacies to his friends in England [M], the remainder to two nephews of his name at Vernon (q). During his life-time, he was occasionally generous to some of his relations in France; and in England, was very liberal to the poor [N]. He had two sisters who were nuns; and lately had a brother living at Paris, in the profession of the law, to whom he gave a handsome gold snuff-box, which had been presented to him by Queen Caroline (r).

(q) Nichols, ut supra.

(r) Observations, &c. ubi supra, p. 32, 33.

In 1787 was published, in 8*vo.* by the Rev. William Bell, D.D. Prebendary of Westminster, "Declaration de mes derniers sentimens sur les differens dogmes de la Religion. Par feu Pierre François le Courayer, Docteur en Theologie, &c." An English translation of this has been since published. The original manuscript, which was given by Father Courayer to the Princess Amelia, who had a great esteem for him, was written in 1767, which was about nine years before his death. The Princess Amelia left this manuscript by Will to Dr. Bell; who published it, as being of opinion, that the last sentiments of a writer of Dr. Courayer's reputation, and whose situation was so peculiar, were calculated to excite the attention of the learned, and of those who were zealously attached to the interests of religion: and, indeed, it appears to have been the wish of the Author himself that it should be published, though not till after his death. The whole of this piece of Father Courayer's is too long to be here inserted; but we shall make some extracts from it, that our readers may be enabled to form the more accurate judgment of his theological opinions.

His *Declaration* begins in the following manner: "On the point of appearing before God, both to fulfil the duty of sincerity, and to furnish all, into whose hands this writing may fall, with a testimony which every person living owes to truth; urged moreover by my conscience, to declare my thoughts on the doctrines of Christianity, and the differences which divide Christian societies; I proceed to do it with that simplicity which becomes integrity, and from which the near approach of death will not suffer me to deviate."

It is observable, that Dr. Courayer's sentiments, respecting the doctrine of the Trinity, were not conformable to those which are generally reputed orthodox. "I believe," says he, "not only that there is a God; but, moreover, that there is but one. I detest the error of two principles, maintained by so many antient heretics; and while I ascribe to God the glory of all good, I believe that I can only have recourse to the will of man, for the discovery of the original of moral evil."—"The doctrine of the Unity of God, so true, and so evident, has served for a pretext to many, to try to inspire an aversion to Christianity, as if it affected this truth by the doctrines of the Trinity and the Incarna-

[M] *After many legacies to his friends in England.* He seemed solicitous to bequeath something to all by whom he had at any time been benefited; and, among others, he left legacies even to his washerwoman, and his barber. This appears from his will, as preserved in the Prerogative Office, Doctor's Commons. There are several codicils to his will; and the Gentleman first appointed his executor, John Palairer, Esq; died before himself.

[N] *In England, was very liberal to the poor.* In an "Account of Dr. Courayer," prefixed to the English translation of his "Declaration of his last sentiments on the different doctrines of Religion," it is observed, that, by degrees, "he got into very affluent circumstances, and was in the receipt of very much more money yearly, than his frugal mode of living required. He did not, however, hoard up the overplus of his annual income, or suffer his studious savings to accumulate. His dress, though always remarkably neat, was not costly, not even when he appeared in the habit of a layman, and wore a sword, which he sometimes did, it is said, very awkwardly. He kept no house, he was in no one article of living expensive, and the indigent partook very freely in his good fortune. Poor prisoners were favourite objects of his charitable disposition, and shared very liberally in

his bounty. From the first payment of his pension, it was certainly his custom, and the writer is well assured, that it was not unusual for him, to pay from fifty to eighty pounds a year, at a time, for their benefit. It is well known, and well attested, that he was wont to restrict his expenditure on himself, to a very moderate weekly sum; and all that he could possibly save out of his own allotment, with the remainder of his income, never forgetting his charities, he religiously appropriated, to supply the necessities, and to add to the comforts, of two nun-sisters, and an elder brother, whom he left behind him in France (17)."

(17) Account of Dr. Courayer, p. 29, 30, 31.

In the same account, some particulars are mentioned of his reception when he first arrived in England. "On his landing at Greenwich, Lord Viscount Percival, afterwards Earl of Egmont, sent his coach with six horses to convey him to his house, which he desired the Doctor to consider, and to use, as his own; after dinner his Lordship made him a handsome present. Next day, Dr. Wake, then Archbishop of Canterbury, had him to dine at his Palace at Lambeth, and made him a like present. Bishop Hare, Bishop Sherlock, and several other prelates, treated him with similar generosity (18)."

(18) *Ibid.* p. 24.

"tion.

“ tion. The writings of some of the Fathers, and the wretched philosophy of the schools,
 “ may, in fact, have given ground to some people to draw such a consequence : but there is
 “ nothing in the gospel which does not tend, on the contrary, to confirm us more and
 “ more in the knowledge and worship of One God ; and nothing is less opposite to this
 “ truth, than the doctrines which are thought to destroy it effectually.”

“ Of all the modes of explaining the doctrine of the Trinity, I know of none more
 “ contrary to the true doctrine of Christianity, than that which supposes in the Deity the
 “ existence of three distinct natures, or substances, whether collateral, or subordinate.
 “ This is, according to my apprehension, to re-establish Polytheism, under the pretence of
 “ explaining a mystery. The Unity of God is the foundation of the gospel ; and every
 “ thing that may in any way affect this truth is dangerous. As Jesus Christ and his
 “ apostles have laboured, on the one hand, to reclaim the Gentiles from the belief and
 “ from the worship of many Gods, and have supposed, on the other hand, that the Jews
 “ thought soundly in the article of the Deity, in which they never distinguished different
 “ substances ; it seems to me a departure from the simplicity of the gospel, and a volun-
 “ tary inclination to corrupt the idea of a clear truth, by singular explications, which it
 “ becomes necessary to abuse at least, in order to combat.

“ I believe, therefore, that there is but only one God ; that his Spirit is not a substance
 “ distinct from him ; and that Jesus Christ, to whom divinity was very intimately united,
 “ is his Son in virtue of that union. This is all the Trinity that I find in the Gospel ;
 “ and I cannot conceive that any other Trinity can accord with the Unity of God. I
 “ know that many ancient writers have had recourse to the multiplications of substances,
 “ to give us an idea of this mystery ; and others have imagined other systems, more philo-
 “ sophical than evangelical, that have less served to clear up this matter than to obscure it.
 “ But I distinguish these systems from that of the Gospel : and, in as much as I find this
 “ last worthy of respect, it therefore appears to me little essential to adopt notions which
 “ often have much obscurity, and sometimes are even involved in contradiction.

“ The Incarnation has nothing any more contrary to the doctrine of the Unity of God,
 “ than the Trinity. Accordingly, it is extremely remarkable, that neither Jesus Christ
 “ nor his apostles have ever represented to us these mysteries as including incomprehen-
 “ sible things, and which it was impossible to reconcile to reason. God, willing to draw
 “ men from their errors, and to purify them from their sins, filled Jesus Christ with his
 “ wisdom, invested him with his power, communicated to him his authority, and gave him
 “ his Spirit (t), not by measure, as to the prophets, but united himself so intimately with him,
 “ that Jesus Christ appeared in the form of God (u) ; that he was made Lord and Christ (v) ;
 “ Prince and Saviour (w) ; that he was filled with wisdom and with grace (x) ; that all the fullness
 “ of the Godhead resided corporeally in him (y) ; and that he received the glory, the honour,
 “ the virtue, the strength, and the blessing, of his Father (z) ; who, by the participation
 “ which he gave him of his power and authority, made him enter, at the same time, into
 “ a participation of his glory, in such a manner, that he who honours the Son honours
 “ the Father who sent him (a). Thus God, referring always every thing to himself, and
 “ not terminating in Jesus Christ, who is no otherwise regarded than as the organ and the
 “ instrument of the mercy of his Father, is always God *alone*, who is the object of our
 “ adorations ; and there is nothing that shocks us in conceiving, that he can communicate
 “ himself to a man as fully, and as intimately, as he judges it necessary for his own glory,
 “ and for the salvation of mankind (b).”

“ When one has once acknowledged the truth and the holiness of the Gospel, all this
 “ doctrine concerning the person of Jesus Christ appears to me so simple, that I cannot
 “ conceive how it was possible to corrupt it by so many explications, which are good for
 “ nothing, but to make Christianity appear less reasonable, and full of contradictions. In
 “ consequence of a continual desire to find new mysteries, an infinitude of imaginations
 “ have been consecrated ; and it is still more lamentable, that these imaginations are be-
 “ come a part of religion, by the authority of some, and by the acquiescence of others ;
 “ so that a man passes for an unbeliever, or an irreligious person, if he does not subscribe
 “ to the predominant system, and if he happens to have too much understanding to submit
 “ to received prejudices, or too much fortitude to be overawed by violence.

“ It is not so much the person of Jesus Christ, as his doctrine, that is the object of
 “ the Christian religion ; and though we ought to honour the Son as we honour the
 “ Father, because he had his mission, and was clothed with his authority, it is, however,
 “ to God *only* that Jesus Christ reclaims our attention ; and he assumes no other conse-
 “ quence to recommend himself to the Jews, than as having been sanctified by his Father,
 “ to come and announce his doctrine, and to instruct us in truths unknown to the Gentiles,
 “ and very much altered by the Jews.”

Dr. Courayer also makes some observations relative to the apocryphal books, and to
 inspiration ; and he disapproves of the decision of the Council of Trent, concerning the
 apocryphal writings. “ It is,” says he, “ incumbent upon us, to endeavour to discriminate
 “ the true Scriptures, from those which are falsely given as genuine. Now we have no
 “ other rule for this discrimination, but tradition. If it be uniform, and come to us from
 Vol. IV.

(t) Joel iii. 34.

(w) Acts v. 31.

(a) Jo. v. 23.

(b) French Orig.
p. 1—7. Eng.
Transl. p. 9—20.

(u) Phil. ii. 6.

(v) Acts ii. 36.

(x) Luke ii. 40.

(y) Coloss. ii. 9.

(z) Apoc. v. 12.

“ the fountain-head, there would be irreligion and temerity in rejecting it; but if it be
 “ divided, there is little reason in a disposition to obtrude books, as divine, upon an autho-
 “ rity which, in every other case, would not be sufficient to warrant our receiving as certain,
 “ facts, concerning which there was similar diversity. The Council of Trent ought not,
 “ therefore, to have run the hazard of declaring the deuterocanonical or apocryphal
 “ books, of the same authority as the canonical, since there was not for them the same
 “ concurrence, or the same uniformity of testimonies. For this Council had not received
 “ new light concerning these *apocryphal* writings; and since the Jews, who transmitted
 “ them to us, on transmitting them, had apprized us of the discrimination to be made; it
 “ was sinning against all the canons of criticism, to give to these books an authority which
 “ was not granted to them by those from whom we had them, and from whom only we
 “ have received our intelligence.

“ With regard to those *books* which a constant tradition has transmitted to us, from
 “ hand to hand, as containing truly ‘ The word of God,’ it is our duty to respect, and
 “ receive them, as the rule of our faith, and of our manners, because we ought to regard
 “ the Doctrines and the Precepts which are contained in them, as coming from the in-
 “ spiration of God himself; for it is properly to these two points only, that the inspiration
 “ extends. There is no need of inspiration, to report what is seen or heard, or even what
 “ is taken from records and from authentic monuments, on which all public faith is found-
 “ ed; and it would be just as unreasonable to refuse our assent to such information, as it
 “ would be to reject what we learn from revelation. The most incredulous have no more
 “ doubt about the existence of Alexander and Cæsar, than Christians have concerning
 “ that of Jesus Christ; although it is not supposed that there was any inspiration in the
 “ historians who have given us the history of these two conquerors. Inspiration adds
 “ nothing to the certainty of facts, and does not appear any way necessary to establish
 “ them. I even fear whether the having recourse to it in order to procure credit, has
 “ not been a motive that has forced the incredulous upon their attempts to shew, with a
 “ view of discrediting the contents of Scripture, that we have had recourse to inspiration,
 “ only because all other evidence is wanting to give credibility to what is recorded there.
 “ Farther, to suppose inspiration for things to which it is not requisite, is to admit of mira-
 “ cles without necessity, and thus to multiply difficulties, and to furnish objections to unbe-
 “ lievers, who reject even necessary miracles. The prophets were certainly inspired,
 “ because they could not have predicted future things but by inspiration. The Evange-
 “ lical Doctrine must likewise have been inspired, because the Apostles have received it
 “ from Jesus Christ, who had it from his Father himself. But St. John, without having
 “ recourse to inspiration, gives us as true the facts which he reports to us, only because he
 “ saw and heard them. ‘ That which we have seen and heard, declare we unto you, &c. (b).’
 “ and St. Luke does not exact belief to the things which he relates, but because he had
 “ taken them from the mouths of those who had seen all from the beginning, ‘ Even as
 “ they delivered them unto us, which from the beginning were eye-witnesses and ministers
 “ of the word (c).’ If they had believed that inspiration had been necessary to conciliate
 “ belief to the facts which they recorded, they would not have hesitated to tell us, that
 “ they had derived their information and knowledge from God himself. But as they
 “ appeal to no other vouchers for their truth besides their own testimony, and that of those
 “ who had followed and heard Jesus Christ from the beginning, it is evident, that they
 “ did not extend inspiration to those kinds of facts, and that they reserved it for the
 “ Doctrine (d).”

(c) Luke i. 2.

(d) Eng. Transf.
p. 43—49.

(b) 1st Epist. of
John, chap. i,
ver. 3.

Father Courayer considered episcopal government as appointed by Christ himself; and
 he thought that the decisions of the Church, or of general Councils, should be submitted
 to in matters of discipline. But he did not admit the infallibility of the Church in points
 of doctrine. “ We cannot wander,” says he, “ by submitting to faith when it is found-
 “ ed on the word of God, which is infallible. But the infallibility that is ascribed to the
 “ Church, is not established on a foundation so solid as that on which it is acknowledged
 “ that Scripture rests. Inasmuch as the Church in her decisions conforms herself to the
 “ word of God, and to apostolic doctrines, she can only pretend to her infallibility, not
 “ in virtue of her judgment, but in consequence of this conformity. But if the decisions
 “ of the Church go beyond this rule, they cannot have the same certainty, because they
 “ are no longer regulated by the same authority, which only can assure them of the same
 “ infallibility. Although in the Christian society there be no authority superior to her
 “ own to reform her judgments, this is not a reason for believing her to be absolutely
 “ infallible, since a superior tribunal has nothing in respect of fallibility to distinguish it
 “ from inferior tribunals, but the impossibility of having its decisions superseded, because
 “ there is not any *paramount* authority that has the right to reform them, whatever need
 “ they may stand in of reformation. It is, therefore, rather an indefectibility than an in-
 “ fallibility that ought to be recognized in the church, where, although errors may some-
 “ times insinuate themselves, it is sufficient that she preserves always the fundamental
 “ truths, which are the essence of Christianity, and the practice of the duties of morality,
 “ to assure the salvation of those who persevere in being her members.

“ The

" The Pope is still less infallible than the Church. There is nothing that distinguishes him from other bishops but the pre-eminence of his see, and a more extensive jurisdiction, which has nothing in common with infallibility. It is in him an abusive pretension, to affect absolutely to subject to himself all the particular churches, and to believe that he can, at his pleasure, prescribe to them other doctrines than those which were taught by Jesus Christ and the apostles, and to impose upon them arbitrary laws, so far as in cases of their non-observance of them, to assume an authority to himself of cutting them off, without any ceremony, from the communion of the rest of the Church. He may, in truth, refuse to communicate with those whom he believes to be in error, or to want the submission due to lawful rules. But this suspension of communion does not exclude them from the body of the Church itself; and, if it be he who separates from them without reason, then it is he who is guilty of the schism, and not they; for, though he be the head of the Christian Churches, we are not obliged to obey him, but so far as he abides by truth and righteousness, and does not, for things indifferent, break the bonds of unity and peace (e)."

(e) *Ibid.* p. 54
—58.

Of *Baptism*, Father Courayer expresses himself in the following manner: " By Baptism," says he, " we engage ourselves to a profession of following the doctrine of Jesus Christ, and God is engaged on his part, to hold us justified from our sins, provided that, faithful to the engagement we have contracted with him, we regulate afterwards our conduct by the laws which he has prescribed to us, and which all tend to render us happy, by the right regulation of our passions, and the practice of virtue. To believe, that, without observing these conditions, Baptism, or any other external observance can sanctify us, is to be a Jew under the name of a Christian; and by changing the ceremony, we have not made our condition more advantageous, nor our hopes more solid, or less presumptuous. That efficacy which Christian divines ascribe to their observances, in preference to those of the Mosaic law, is without foundation; if we suppose that it is in their nature, and independent of our own internal dispositions, which ought to accompany the practice. Neither the one, nor the other, have any virtue, but what they derive from the institution, and always in a dependency on the dispositions of those who embrace the practice. Under this view, all is equal, and if there be any difference, it is not in the nature of the observances that we are to look for it, but in the favour of Jesus Christ, who manifests himself more abundantly under the Gospel, than under the Law. The Baptism of Infants is of great antiquity in the Church. It is even, perhaps, the antiquity of this practice, that gave rise to the idea of original sin, taken in the sense of the Theologians, for a guilt that drags all mankind who die without baptism, to damnation. This belief once established, has contributed indirectly to make the Baptism of Infants be judged necessary to their salvation; for if they had been considered as entirely pure and innocent, why, as Tertullian says, should we be so anxious to apply baptism for the remission of their sins? *Ut quid festinat innocens ætas ad remissionem peccatorum.* I do not see, however, that Jesus Christ, or his apostles, have prescribed for them this baptism, which he seems only to have established to reclaim adults to repentance, and to the reception of the Gospel, and in order to purify them thereby, from the sins of which they had been guilty before. I do not in fact find any thing in Scripture, that obliges us to extend to infants the necessity of Baptism. It does not even appear, after the practice was introduced, that it was judged as it is now, of this necessity, since it was very common then, to defer the reception of this sacrament to an advanced age, and even till death. By speaking in this manner, it is not my intention, to censure a practice so ancient, and so general, as that of baptising infants; but I would not for all this, consider it as an error in those, who believe Baptism to be necessary to Adults only: for though I believe, as St. Paul teaches, that it was 'by the first man that sin entered into the world, and death by sin (f),' I can hardly conceive, that by this sin we must understand a personal guilt in every infant, in consequence of which, before he can use his will and his liberty, he deserves to be punished as a voluntary criminal, so as to be rendered not only subject to miseries and infirmities, but moreover liable to eternal damnation."

(f) Rom. v. 12.

Dr. Courayer afterwards states his sentiments respecting the *Eucharist*, *Confession*, *Images*, and *Relicks*: " Every part of the Christian doctrine," says he, " has had its alterations, and that part of it which respects the Eucharist has undergone as many at least as what relates to other observances. Jesus Christ, in giving us bread and wine as the memorials of his passion and death, has declared to us that he gave us his body, and his blood. On this subject it has been imagined, not only that Jesus Christ was *in reality* corporeally present in the Eucharist, with all his physical properties, but moreover, that the substance of the bread and wine was annihilated, and remained only in appearances, and this is what was called *Transubstantiation*. Had they been contented with saying, that this change was such to the eyes of faith, which see nothing in the Eucharist after consecration, but the body and blood of Jesus Christ, and without supposing any real and physical change of substance, there would have been nothing in this contrary to reason, or which needed to have occasioned the least dispute. But in matters of faith

" there

“ there was a constant inclination to the marvellous; and often even the marvellous, was
 “ not to the taste of the multitude, but in so far as it shocked common ideas, and the
 “ ordinary light of reason. Accordingly this opinion did not spring up, but in the ages
 “ of ignorance and of darkness. Till then they were contented to believe, that in receiv-
 “ ing the Eucharist, they received the body and the blood of Jesus Christ, but without
 “ determining in what manner they received it; or rather, persuaded that grace does not
 “ destroy nature, they received the bread and wine, not doubting, but that in receiving
 “ them, they received Jesus Christ himself, because he communicated himself under these
 “ symbols, in a manner ineffable, and perfectly spiritual, with so much the more efficacy,
 “ as by the institution of Jesus Christ the said symbols are a lively representation of his
 “ passion and death, by which he merited for us the expiation of our sins and salvation.
 “ We receive therefore Jesus Christ in the Eucharist, but with the bread and wine; and
 “ if we admit another *Transubstantiation* than that which is made in the eyes of faith, we
 “ admit an absurd opinion, which it is impossible to maintain without contradicting the
 “ most evident maxims of reason, the constant impressions of our senses, and the princi-
 “ ples of our natural light.

“ The sacrifice of Jesus Christ is so great a benefit, that we cannot too much preserve
 “ the memory of it. It was to perpetuate its remembrance that he instituted the Eucharist,
 “ in which we recollect his death, and offer ourselves to God. This is the sense of all
 “ Christian liturgies, ancient and modern, Catholic and Heretical. Nothing therefore is
 “ worse founded, than extravagant declamations against the Mass; since, with some variation
 “ only in the prayers and ceremonies, there is still the same object in the Romish service,
 “ as in all other liturgies. Whether we believe that Jesus Christ is corporeally present in
 “ the Eucharist, or, as others maintain, that this presence is only spiritual, this does not
 “ add any thing to, or take any thing from the idea of sacrifice, an idea which ought not to
 “ be separated from the remembrance and offering of the death of Jesus Christ, in the
 “ celebration of the Eucharist. And as this sacrifice can only be representative and com-
 “ memorative of that of the cross, all objections made against the Mass, fall to the ground
 “ of themselves, because they go to attack in it, a real sacrifice, which subsists only in the
 “ imaginations of those who combat it, or in the false explications of those who defend it.

“ Communion under both kinds never ought to have excited disputes in the
 “ Church. I see no more difficulty in this matter than in the difference of administering
 “ Baptism by immersion, or by sprinkling. But I know not by what misfortune it happens
 “ so often, that the smallest disputes excite the greatest troubles, as we may judge from
 “ the ancient contest about the day of Easter. The most rational way of thinking on the
 “ dispute in question is, that as, on the one part, an usage occasioned by some inconve-
 “ niences ought not to have been erected into a law, against the terms of the institution;
 “ and, on the other, as Christians believe that Jesus Christ is only spiritually received in
 “ the Eucharist, it seems that it ought to have been *left* indifferent, to receive him either
 “ under one kind, or under both the two kinds, forasmuch as a spiritual presence is abso-
 “ lutely indivisible, and it is impossible to receive Jesus Christ, in receiving either the bread,
 “ or the wine, without receiving him entirely. It appears to me, that on this point, as
 “ on many others, we ought to leave to each Church the liberty of regulating its usages,
 “ as it thinks proper. But the best are those who depart least from the words of the
 “ institution, and the views of the institutor.

“ *Confession* is an useful practice, and of great antiquity in the Church; but the man-
 “ ner in which it is practised at this day, in the Romish Church, is an usage much more
 “ modern. Formerly people made confessions of great crimes, and especially of those
 “ which were of a public nature. There are proofs of this in the writings of the fathers,
 “ and in the penitential canons, which regulated the times of penitence ordained for each
 “ of these *flagrant* crimes. But we see nothing in the ancientest monuments of these con-
 “ fessions so often reiterated, of the smallest faults, nor of the laws made for the ordination
 “ of confession at certain times. Nor is it clear besides, whether this sort of confession
 “ was instituted by Jesus Christ, or whether it was only prescribed by the Church. It
 “ appears much more probable, on the contrary, that the kind of confession practised at
 “ this day, can only have been of the institution last mentioned, since we find no example
 “ of it in primitive times.

“ The article of *Images* has excited great divisions in the Church. Some, for honour-
 “ ing them have been taxed with idolatry, and those who have destroyed them have been
 “ accused of irreligion. This is carrying things too far, both on the one side, and on the
 “ other. Images have nothing bad in themselves; it cannot, however, be denied, but
 “ that they have occasioned great abuse, and great superstitions. It is not, therefore, so
 “ much on a religious, as on a prudential account, that we ought to be cautious in regu-
 “ lating our conduct with respect to them. If abuse and superstition are inseparable from
 “ the use of them, piety and religion oblige us to suppress them. If we can, on the con-
 “ trary, separate the use of them from superstitious worship, we may preserve them with
 “ utility, for the instruction of the people, and the ornament of Churches. This was the
 “ temperate step which the Churches of France took formerly, and almost all those of the

“ West

“ West, to the tenth century; and they had then no conception, that by so doing, they did
 “ any thing contrary to the second precept of the decalogue. This, even now, might be
 “ considered as the most reasonable way, especially if it were only confined to historical
 “ paintings, and went to the exclusion of the Images or the statues of particular saints.
 “ But if the fear of abuse prevails over the mind, I see not why we should impute it
 “ as a crime to those, who, influenced by an apprehension so religious and so well found-
 “ ed, actually suppress what they consider as an occasion of so much abuse, and a source of
 “ superstition.”

“ What I have said of Images, may likewise be applied to *Relicks*. The honour that
 “ has been paid to them in the Greek and Latin Churches, is almost as ancient as the
 “ Church itself. There has been a great deal of indecency, and a kind of fury, in the
 “ manner in which protestants treated them at the beginning of the Reformation. They
 “ might have reason for censuring, as they did, the excess to which superstition had been
 “ carried on this point, either by giving false relics for true ones, or by rendering undue
 “ worship to such as were not suspected of falsehood. The evil was extreme, and too much
 “ of the remains of it are still preserved, not to make us feel, that their reproaches on this
 “ head were too just and well founded. But still they might have carried themselves with
 “ more moderation in the reform of these abuses; and there was a middle way that might
 “ have been taken, between the superstition of the one party, and the violence of the other.
 “ Religion forbids us not, but on the contrary excites us, to honour the ashes of those
 “ whom their sanctity has rendered respectable to us; and even the honour that we render
 “ to their memory, is a powerful motive to excite us to imitate their virtues. But to enter-
 “ tain an imagination, that there is any virtue, or any efficacy, inherent in their ashes, or
 “ their tombs, which can work the miracles that God may sometimes grant to the faith of
 “ those who solicit their succours, and supplicate Him to hear the prayers, which there is
 “ some reason to believe the saints offer up to him for us, is to place efficacy and virtue
 “ where there is none. To found a confidence upon this, is to entertain a vain and un-
 “ reasonable confidence, and to confound the honour due to their virtue with the confi-
 “ dence that we ought to put in God only, and which ought not to be participated with any
 “ of his creatures (g).”

(g) Eng. Transf.
 p. 71—90.

The practice of praying in an unknown tongue is afterwards censured by Father Courayer; and he also condemns persecution on account of religion as irrational, indefensible, and repugnant to the spirit of Christianity. He concludes his Declaration in the following manner: “ Moderate sentiments in religion are seldom adapted to the taste of
 “ different parties; and, instead of serving to conciliate differences, they commonly pro-
 “ duce no other effect, but that of drawing down censures upon those by whom they are
 “ advanced. But as, in making this Declaration, I proposed to myself no other appro-
 “ bation, but that of God, and of my own conscience, it is sufficient for me, that I have
 “ delivered, with sincerity, that which appears to me the most conformable to truth, and
 “ best calculated for the promotion of peace. If I am deceived, it has not been my own
 “ fault; and I hope that God, in his mercy, will pardon my involuntary errors, and will
 “ grant to me in another life, that light and knowledge which have been refused me
 “ in this.”

In the South Cloister of Westminster-Abbey, directly over the effigies of Abbot Vitalis, is a monument erected to the memory of Father Courayer, on which is an inscription, written by Mr. Kynaston, Fellow of Brazen Nose College. But it being put up too hastily to obtain the author's last revival, the following is a more accurate copy of it than that upon the monument, being corrected by Mr. Kynaston himself:

H. S. E.

Annis morumque integritate juxta reverendus

PETRUS FRANCISCUS COURAYER,

Cœnobii de *Sanctâ Genovevâ* dicti

Apud Urbem *Lutetiam Parisiorum*

Regularis olim Canonicus.

(b) Nichols's
 Anecdotes of
 Bowyer, p. 543.

To what has been already said respecting Dr. Courayer's Works, it may not be improper here to add, that he wrote *Traite de Poem Epique*; and that his French Translation of Father Paul's History of the Council of Trent was printed at London in 1736, in two volumes, folio; and at Amsterdam, the same year, in two volumes, quarto; and that his Translation of Sleidan's History of the Reformation, to which he added copious notes, was printed in three volumes, quarto, in 1767 (i).

(i) Account of
 Dr. Courayer,
 prefixed to the
 English Trans-
 lation of his De-
 claration of his
 last Sentiments,
 &c. p. 75, 76.

From the fourth volume of Bishop Atterbury's Epistolary Correspondence, which has fallen into our hands since this article was printed, we learn that the Bishop was exposed to some trouble on account of Father Courayer's escape from France, which he was supposed to have facilitated. The French King and Cardinal Fleury sent him a message on the subject by the Lieutenant de Police. "I did not mince the matter to the Magistrate," says the Bishop, "nor am I at all ashamed of what has happened, or concerned for it. I owned my friendship for Pere Courayer; told them frankly a great deal more than they knew of that matter, as far as I was concerned; and thought there was no reason to wonder at, or blame my conduct. I convinced them of that point, and I believe there is an end of it. I shewed the Lieutenant the picture of Pere Courayer hanging up in my room; told him I had visited him in his retreat at Hanment, while he was in disgrace there; and that he came to take his leave of me the night before he left Paris; and that in all this I thought I had done nothing that misbecame me." The Lieutenant, who behaved with great politeness, was perfectly satisfied with our Prelate's explanation; but this was not the case with the Cardinal, who was persuaded that Father Courayer's escape was entirely owing to Atterbury, and displayed much resentment on that account. The picture of Courayer, in the Bishop's possession, was left by him to the University of Oxford (k).]

 Epistolary Corre-
 spondence, vol.
 iv. p. 102-104,
 133.

* * [COURTEN, a name certainly used, with a variety of spelling, for more than two hundred years, to discriminate a family of English extraction [A], which after being settled, upwards of a century, in the Netherlands, returned into England, intermarried with its gentry and nobility, and gave birth to several men, well entitled to notice in the *Biographia Britannica*. The last of the name, having been an ornament, and a benefactor to this kingdom, in a way, and to an extent not commonly known, is a proper subject for a separate article. Others of his ancestors were likewise memorable, for contributing considerably to the increase and enlargement of our national wealth and dominion, by carrying, at a very early period, the trade, navigation, and colonies of this country, into parts of the East and West Indies then little known. It is fit, therefore, in the first place, that some account should be given of them, in a work appropriated to the celebration of our countrymen in whatever way meritorious, and intended to rescue from oblivion the memories of all such eminent persons as have at any time lived, or resided occasionally in Britain.

Every thing relative to the Courtens in their state of emigration, before their return to the land of their nativity, is in a great measure foreign from the plan and purpose of this work. The only memoirs of the family which can be recorded here with propriety, lie within a narrow compass, clear of the suspicions adherent to late researches into remote antiquity. They go no farther back than to the great-grandfather, who, by persecution,

[A] *English extraction.* The pedigree of this family, the name of which is most commonly spelt *Courten*, though sometimes *Courtin*, and *Courteens*, &c. is preserved in the British Museum (1). It begins on the paternal line from a Roger de Curtis, said there to have been a native of Devonshire. He passed, it seems, from the service of a Duchess of Gloster, into that of an Earl of Brabant, married at Hainault, and fixed at Menin, where he died in 1423. But as this paper is not easily legible, and is moreover in the Dutch or Flemish language, with which the present writer is totally unacquainted, the curious are referred for more particular and more certain information to the original, which contains a circumstantial account of the genealogy of the family, and

gives its coat of arms as follows. A Talbot passant, quartered with a chevron between three swans; no colours depicted; crest, on a wreath, a demy Talbot issuant.

There is, in the same repository, a Talbot passant, on the silver-top of a walking-stick made of a curious piece of vine, the arms most probably of William Courten, Esq; the subject of the subsequent article, whose property it certainly was, and from whom it passed, with his rich museum, to Sir Hans Sloane in 1702.

 3515.

was repelled from Flanders into the kingdom from which he sprang, where he and his immediate descendants, by their indefatigable industry, and great skill in mercantile business, suddenly rose to an unusual height of opulence and splendour. After flourishing here for almost a century, this family, by means of a viper of its own generation, by a variety of accidents unforeseen or unforeseeable, but chiefly by the depredations and villainy of a jealous nation of mere merchants, experienced a sad reverse of fortune, and being blasted to the root, its male-line and discriminating surname became extinct in 1702. The rise and downfall of this house being equally remarkable, the following account of its complicated story, given here with all the conciseness consistent with perspicuity, was studiously collected from scattered papers and broken memorials in the British Museum, where curiosity may satisfy itself, and probably discover collateral evidence, and additional information, omitted or unobserved by the present writer.

Olivares Duke of Alva, being appointed by Philip II. Governor of the Seventeen Provinces, endeavoured, with execrable policy, to establish over all the Netherlands, an irreligious and horrible Court of Judicature, on the model of the Spanish Inquisition. By consequence, in 1567, great numbers of industrious, thriving and worthy people, were imprisoned by the rigorous orders of this petty tyrant, and treated with great injustice and cruelty. WILLIAM COURTEN, son of a Taylor at Menin, was one of many who experienced this oppression; but had the good fortune to effectuate his escape from prison. In the year following, 1568, he arrived safe at London, with his wife Margaret Casiere, a daughter named Margaret, her husband, son of a *macklaer* (*) at Antwerp of the name of Boudean, and as much property as they could hastily collect under such disadvantages.

(*) The Flemish name for brick-layer, or potter.

Soon after their arrival, they took a house in Ab-Church-Lane, where they lived all together, following for some time the business of making what were commonly called *French Hoods*, much used in those days and long after, which they vended in wholesale, to the shop-keepers who sold them by retail. Encouraged by great success in this employment, they soon removed to a larger house in Pudding-Lane, or Love-Lane, in the parish of St. Mary Hill, where they entered on a partnership trade, in silks, fine linen, and such articles as they had dealt in before, when in Flanders.

Michael Boudean, the daughter Margaret's husband, died first, leaving behind him, unfortunately for the family, a son, and only child, named Peter, after an uncle certainly not much older than himself. The widow married John Moncy a Merchant in London, who instantly became an inmate with the family, which was moreover increased by the parents themselves, with two sons, William, born in 1572, and Peter, born in 1581. The young men, being instructed in reading, writing, and arithmetic, were early initiated in business, and soon after sent abroad as factors for the family; William to Haerlem, Peter to Cologne, and Peter Boudean the grand-child, to Middleburgh. The writer of this article is not at present sufficiently instructed, to date with precision the times at which William Courten and Margaret Casiere died. Most probably their deaths happened about the end of Queen Elizabeth's, or in the beginning of King James's reign; but it is said expressly, and it seems undeniable, that they left their descendants not only in easy, but even in affluent circumstances.

At the following æra of this little history, it does not appear with certainty, whether the old people were actually dead, or had only declined all farther active, responsible concern in business: but most certainly in 1606 William and Peter Courtens entered into partnership with John Moncy, their sister Margaret's second husband, to trade in silks and fine linen. Two parts, or the moiety of the joint-stock, belonged to William Courten; and to each of the others, Peter Courten and John Moncy, a fourth share. As for Peter Boudean, the son of Margaret Courten by her first husband, he seems to have been employed to negotiate for the partnership at Middleburgh, on some stipulated or discretionary salary; for it does not appear that he had any certain or determinate share in the trade, which was carried on prosperously till 1631, with a return, it is said, *communibus annis*, of 150,000*l.* During the course of this co-partnership, there is nothing upon record unfavourable to the character of John Moncy. The characters too of William and Peter Courtens appear unexceptionable, fair, and illustrious. They prospered, it seems, remarkably in all their undertakings, for twenty years and more, in the course of which time they were both dignified with the honours of knighthood [B].

The elder brother, Sir William Courten, besides his capital concern in the original partnership above-mentioned, traded very extensively on his own bottom, to Guinea, Portugal, Spain, and the West Indies. He married first a Dutch-woman of the name of Cromling, the daughter of Mr. Peter Cromling, an opulent Merchant in Haerlem, who was, though both deaf and dumb, book-keeper to her father. By this marriage he got, it is said, 60,000*l.* of which he was enjoined to lay out 50,000*l.* in the purchase of lands in England, to be settled upon his son by this Lady, of whom she was delivered in

[B] Dignified with the honours of knighthood.] Sir 31, 1622; and Sir Peter was knighted at Whitehall, (3) Claudius, William Courten was knighted at Greenwich, May Feb. 22, 1623 (3). c. iii.

London, and whose name was Peter. This son, who was all the offspring from this marriage, King James I. made one of the first rank of his Baronets [C]. "He was afterwards married to Lord Stanhope's daughter, but died without issue, leaving the estate in lands to his father Sir William, who settled that estate, and 3000*l.* more, *per annum*, upon his only son and heir, by a second wife, the daughter of Mr. Moses Tryon (*)." *Vox Veritatis*, &c. p. 50.

Sir Peter, the uncle to Peter just mentioned, and brother to Sir William Courten, kept the books of the family partnership, and died unmarried in 1630, at Middleburgh. It is affirmed, that he was worth at his death 100,000*l.* and that he left his nephew Peter Boudean, the son of his sister by her first husband, his sole heir and executor, who seems at this time to have taken the name of Courten which he annexed to his own. This crafty man took immediate possession, not only of his uncle Sir Peter's property, which could not have been ascertained without balancing the accounts of the co-partnership, but seized likewise the shipping and goods that belonged unquestionably to his other uncle, Sir William, and Mr. Moncy, amounting, as it is stated, to 100,000*l.* more [D]; nor could he, to the very end of his life, which lasted above thirty years longer, be brought, by argument or law, to settle the accounts of the company.

Sir William Courten, after the death of his Dutch Lady, married a second wife, of the name of Tryon, by whom he had one son, named William, and three daughters, whose names and marriages are but just mentioned here, the curious being referred for farther information about them, to the memoirs of the family in the British Museum. Hester the eldest was married to Sir Edward Littleton; Mary the second was wedded to the Earl of Kent [E]; Anna the youngest to Essex Devereux, Esq; of Leight-Court, in the county of Worcester, and after his death, to Richard Knightly, Esq; of Fawseley, in Northamptonshire. She was born in 1614, as we learn from the certificate below [F], and lived to a great age, as appears from an official paper transcribed into the following article.

Sir William seems to have been possessed of a comprehensive mind, an enterprising spirit, abundance of wealth, and credit sufficient to enable him to launch out into any promising branch of trade and merchandize whatsoever. It is stated, with apparent fairness, that he actually lent to King James I. and his son, Charles I. at different times, of his own money, or from the company-trade, 27,000*l.* and in another partnership, wherein he was likewise concerned with Sir Paul Pyndar [G], their joint claims on the Crown amounted,

[C] *One of the first rank of his Baronets.* The following entry in SALMON, most probably refers to Peter Courten, *jun.* for the description does not seem to point to the uncle, who generally lived, and died in Holland, where he was naturalized. If May was mentioned by mistake for February, the date of the year would then correspond to that of the uncle's knighthood, by writing it thus, Feb. — 1622-3; but still there would be an error in the day of the month. "May 18, 1622, Peter Courtene of Aldington, alias Aunton, Esq; was [by James I.] created a Bart. Wigorn, extinct."

[D] *£.100,000 more.* Sir Peter Courten, *sen.* at the time of his death, stood indebted to the company, by the balance of the books kept in London, for money due to the general stock, 129,426*l.* os. 10*d.* which remained in the hands of his nephew Peter Boudean.

[E] *Earl of Kent.* Henry Grey, the eleventh Earl of Kent of that family, and eldest son to Anthony Grey the famous Rector of Burbach in Leicestershire (4). He was born Nov. 24, 1643; and by his first wife, the daughter of Sir William Courten, had issue Henry, Lord Grey, who was buried in Westminster Abbey, June 29, 1644, near his mother, who was buried there March 20, 1643. This Earl's second Lady was Amabella, daughter of Sir Anthony Ben, Recorder of London. He died in 1651; and his Countess survived till 1698.

[F] *Certificate below.* "Baptized in the Dutch Church, London, Anna Filia Guiliame Courten, anno 1614, the 17 of January. Testes Moses Tryon and Margaretha de Moncy, which stood in the place of Lucretia Pelicorne the widow of Mr. Gualterus del Prato." [Signed] Philipp. op de Beech. "Minister of the Dutch Church in London (5)." The original certificate passed on a blank leaf.

[G] *Sir Paul Pyndar.* "He was born at Wellingborough in the county of Northampton, where he was at school till sixteen. He was then put apprentice to Mr. Parvish an Italian Merchant, who sent him, at eighteen, as his Factor to Venice, where,

and in parts adjacent, he resided for fifteen years, or thereabouts, trading upon his own account, and on commissions both from his old master, and divers others of the most trading kingdoms, by which he got a very plentiful estate. At his return to England, where he traded five years longer, the Turkey Company, knowing him well skilled in the Italian and Turkish languages, and having received many kind offices from him in his transactions abroad, applied to King James I. in 1611, to send him as Ambassador to the Grand Signior at Constantinople, which employment, after much solicitation, he embraced to the great satisfaction of the King, and the Turkey Company, in whose service he continued nine years, during which time he much improved the Levant trade, and manufactures of England, which had been greatly injured by the arts of the French and Dutch. Three years after his return in 1623, King James having knighted him, offered as a reward of his services, to make him his Lieutenant of the Tower; but this honour Sir Paul humbly refused, and the rather, in regard his Majesty desired to purchase Sir Paul's Diamond-Jewel of 30,000*l.* value, upon credit. Sir Paul brought home this Diamond-Jewel from Turkey, and lent it to King James to wear at divers times on days of great solemnity, on opening parliaments, and when audiences were given to foreign Ambassadors. It was afterwards sold to King Charles I (6)."

There is most probably a particular account of this Diamond-Jewel, in the MS. which the Honourable H. Walpole purchased at the sale of Thoresby's Museum, promised to the public with some other curious papers. This MS. it is said, contained among other things, an account of the monies received upon the pawning of the King's, and his Grace the Duke of Buckingham's Jewels, &c. Thirty-one pages being wanting at the beginning relating to the plate and jewels, in the "Catalogue of King Charles the first's goods, &c. with the several prices at which they were valued and sold," discovered lately in Moorfields, &c. it is not likely that there will be any mention of this Diamond-Jewel there. It is said on the autho-

(4) History of Burbach, by Nichols, p. 278. Collins's Peerage, vol. i. p. 514.

(6) Ibid. 3515.f. & Vox Veritatis, &c. p. 51.

amounted, it seems, to 200,000*l.* for no objection appears to have been made to this statement. We are told that one way or other Sir William employed, and with a constancy

(7) Anecdotes of Painting in England, &c. vol. ii. p. 112, and 114, 8vo. 1782.

authority of the *Catalogue*, that the total of the contracts amounted to 118,080*l.* 10*s.* 2*d.* (7).

This *Diamond-Jewel* of Sir Paul Pyndar seems, by the general account of it given above, to have surpassed in value the celebrated diamond brought afterwards into this country by Governor Thomas Pitt, of which the curious reader may see a circumstantial account in the late edition of the *TAFELER* with notes, Vol. V. Additional notes, p. 385, & seqq.

"On Sir Paul's refusal of the Lieutenancy of the Tower, by the over-persuasion of Sir William Cockayne and Sir Arthur Ingram, this Knight was brought to accept of being one of the Farmers of the Customs; to advance monies for supply of the late King's necessary occasions, and to furnish the Crown with Jewels, to his infinite loss and prejudice. Nevertheless, he manifested his loyalty to that degree, towards the preservation of the Royal Family, that he sent several considerable sums of money, in gold, to the late King Charles at Oxford, by Madam Jane Whorewood, in the years 1643 and 1644, for transportation of the Queen and her children.

"In 1639, his cashiers and accomptants, William Toomes and Richard Lane, by the orders of their master, cast up Sir Paul Pyndar's estate, which consisted in ready money, allome, and good debts upon tallies, and obligations from Noblemen, and others at Court, amounting in all to the sum of 215,600*l.* sterling; a great part of which was employed in the sole manufacture of allome, for which allome-farm, Sir Paul Pyndar paid annually 12,000*l.* sterling to the crown, for twenty eight years successively."—"This farm was within the Manor of Mulgrave belonging to the Earl of that title; and it is said, that all the soil of the land, on which the allome-works were erected, with all the mines and rocks employed, were not before worth 40*l.* per annum (*).

(*) "Brief narrative, &c. p. 11.

"This branch of the public revenue has been lately extinguished under the notion of a monopoly; and thus, a staple commodity, of the growth and manufacture of England, has suffered great injury for want of a due regulation in trade. Sir P. Pyndar was obliged, by the grant from the King, to furnish London, and all parts of England, with allome at twenty pounds per ton, and to transport the overplus, which he did in great quantities, into Holland, France, Hamburgh, and other parts, to the advantage and benefit of the King, and his kingdom.

"This manufacture of allome, was first brought out of Italy, in those parts, under the Pope's temporal jurisdiction, and set on work by an Italian, a friend of Sir P. Pyndar's in King James's time; who much encouraged the making thereof, and set up the first pans, coppers, and materials in Yorkshire, at the charge of the crown. Before that time, all allome was imported into England, from the Pope's territories, at the rate of sixty pounds sterling per ton, under the name of *roach allome*, which raised a very considerable yearly revenue to his holiness (†).

(†) *Vox Veritatis*, &c. 4to. 1683, p. 51, &c.

In a record in the British Museum, the estimate of Sir P. Pyndar's estate, at the very time here specified, viz. in the year 1639, is not rated so high as it is stated above. Exclusively indeed of desperate and bad debts, it is only fixed at 236,000*l.* or to speak in the modern cant phrase, at two plums and 36,000*l.* more; and it is affirmed [*ibidem*] that two thirds of the sum total were embarked with the King.

There is in the same repository, and if the writer does not mis-remember, in the same volume, a printed abstract of the last will of Sir P. Pyndar, dated June 24, 1646, to which the curious are referred for farther information (‡).

(‡) MSS. Sloan. 3545, f.

"There remains nothing visible at this time, [viz. 1683] says Mr. Browne in the continuation of his account, to the family of Sir P. Pyndar, out of all his great acquisitions, but his memory en-

VOL. IV.

graven in a modest stile, upon a stone of black marble, over his grave in St. Buttolph's church, without Bishop's-gate, London, in those sorrowful days when he died. The epitaph is as follows:

"Sir Paul Pyndar, Ambassador to the Turkish Emperour, anno 1611, and resident there nine years, faithful in negotiations, foreign and domestic, eminent for piety, charity, loyalty and prudence. An inhabitant twenty-six years in this parish. A bountiful benefactor, deceased the 22d of Aug. aged 84 years.

"William Toomes, who was appointed executor, administered and made probat of Sir Paul Pyndar's last Will and Testament, wherein, amongst other legacies, he bequeathed 7,000*l.* to the Hospitals in London and Southwark. The said Toomes exhibited an inventory, but could not get in the estate, most part thereof being upon tallies, and many of the Noblemen being insolvent, he discharged the workmen a remainder of 10,000*l.* expended by Sir P. Pyndar in his life-time, upon the porch of St. Paul's Church, on the south side. But Mr. Toomes finding such a vast estate so entangled, and his expectations so frustrated, had not a spirit to bear his afflictions, therefore laid violent hands on himself in the year 1655, and was found a *felo de se*."

On the death of Toomes, it seems, "Sir William Powell took out Letters of Administration, with the Will of Sir Paul Pyndar annexed; and during his time, it is said, he employed in Holland, the writer of the tract here quoted, a Mr. Browne, Gent. to look after the interest of Sir Paul Pyndar's estate and his administrator, depending in the Netherlands, on suits in Courts there for the recovery of damages, by the destruction, seizure, and appropriation of the two ships, *Bona Esperanza*, and *Henry Bona Adventura*, the first taken in the freights of Malacca, the second near the island Mauritius by men of war belonging to the East-India Company of the Netherlands, under a pretence that they traded with the *Portugalls* their enemies.

"This Browne was moreover employed by Sir William Powell to get in some debts due to the estate and heirs of Sir Paul Pyndar, upon the allome account, from Jonas Abeel; but, he says, he returned into England *re infecta* in the year 1661. In the same year, or much about the same time, Mr. Browne says, he importuned Mr. Carew, who had Sir Edward Littleton's interest in the two ships above-mentioned, and a very considerable debt of his own, incumbent on Sir P. Pyndar's estate, to satisfy Sir William Powell, and so take upon himself the sole administration of Sir Paul Pyndar's goods and testament.

"By the advice of Mr. Browne, it is said, that after some enquiries, and encouragements at White Hall, from his friends that he had then there, on the conclusion of the Treaty between the King and the States-general, in the year 1662, Mr. Carew sold his land in Worcester to Mr. Thomas Foley for 3800*l.* whereby he satisfied and paid Sir William Powell and others, and so took upon himself the administration of Sir Paul Pyndar's estate."

It is added here, "And this being the truth of the case see help me God (§)."

Sir Paul Pyndar, on his return from Turkey, expended 2000*l.* in repairing the entry, porches, and front of St. Paul's Cathedral, enriching them with marble sculpture, and the figures of the Apostles. Afterwards being appointed by King James, for his skill in commerce, one of the farmers of the Custom-House, he laid out 17,000*l.* on the repairs of the side aisle of the said Church, and at different times supplied Charles I. with money to the amount of 12,000*l.*

(§) *Vox Veritatis*, &c. ut supra, p. 52, and p. 53.

stancy for many years, between four and five thousand seamen; that he built above twenty ships of burthen; was a great insurer, and besides that, a very considerable goldsmith, or banker, for so a banker was then called. It appears likewise, that he was very deeply engaged in a Herring Fishery, which was carried on at one time, with great spirit, and at great expence; but soon after, much to his cost, it came to nothing, in consequence of the supervening dissensions, confusion, and misery that in a soon-succeeding period, extended over all the British dominions.

Before the time alluded to in the preceding paragraph, about the year 1624, two of Sir William Courten's ships, in their return from Fernambuc, happened to discover an uninhabited island, now of considerable importance to Great Britain, to which Sir William first gave the name of Barbadoes. The writer follows here the account given in a capital French work, entitled, *Hist. Gen. des Voyages*, tom. xv. p. 595. *A Paris*, 1759. 19 tom. 4to. The discovery of this island is represented by the French compiler, as merely accidental; but in several papers in the British Museum, and particularly in the MS. there, mentioned below [H], it is said expressly, that the discovery was the result of a deliberate well-laid scheme, formed on hints from Sir William's correspondents in Zealand, and concerted, no doubt, between him and his brother Sir Peter, probably the intelligencer, for he lived and died in Holland. But be this as it may, Sir William Courten was certainly the first who took possession of this island, the first who gave it the name of Barbadoes which it still retains, and the first who began to settle it, (according to the MS. mentioned above, and quoted below,) in 1625.

On the 25th of Feb. 1627, Sir William Courten obtained the King's Letters Patent, for the colonization of this island, sheltering himself, for whatever reasons, under the Earl of Pembroke: for the deed grants, "The Government of Barbadoes to the Earl of Pembroke, in trust for Sir William Courten, with power to settle a Colony there, according to the laws of England, &c." On the faith of this grant, afterwards superseded by the influence of James, then Earl of Carlisle, though its validity was acknowledged by the first, and generally indeed by all the Lawyers, Sir William sent two ships, with men, arms, ammunition, &c. which soon stored the island with inhabitants, English, Indians, &c. to the number of one thousand, eight hundred and fifty, when one Captain Powel received from Sir William, a commission to remain in the island as Governor, in behalf of Sir William, and the Earl of Pembroke (a). After Sir William had expended 40,000*l.* on this business (*), and been in peaceable possession of the island about three years, James, Earl of Carlisle, claiming on grants said to be prior, though dated July 2, 1627, and April 7, 1628; affirming too, that he was Lord of all the Caribbee islands, lying between 10 and 20 degrees of latitude, under the name of Carliola, gave his commission to Colonel Royden, Henry Hawley, and others, to act in his behalf. The Commissioners of Lord Carlisle arrived at Barbadoes with two ships, in 1629, and having invited the Governor Captain Powel on board, they kept him prisoner, and proceeded to invade and plunder the island. They carried off the factors and servants of Sir William Courten and the Earl of Pembroke, and established the Earl of Carlisle's authority in Barbadoes, which continued there under several Governours, till 1646, when the government of it was vested by lease and contract, in Lord Willoughby of Parham.

Sir William Courten, it is said, had likewise sustained a considerable loss several years before this blow in the West Indies, by the seizure of his merchandize, after the cruel massacre of his factors at Amboyna, in the East Indies. But after all the losses above-mentioned, he was still possessed, in the year 1633, of lands in various parts of this kingdom, to the value, it is affirmed, of 6,500*l. per annum*, besides personal estate rated at 128,000*l.* and very extensive credit. Such were his circumstances; we are told, when he opened a trade to China, and as if he had grown young again, embarked still more deeply, in mercantile expeditions to the East Indies, where he established sundry new forts and factories. In the course of this new trade he lost unfortunately two of his ships richly laden, the Dragon and the Katharine, which were never heard of more; and he himself did not long survive

The Communion plate at Wellingborough, consisting of a pair of silver flaggons, a chalice and cover, gilt, weighing two hundred and fifty-seven ounces, was given 1634 by Sir Paul Pyndar, Knt. In the parish register is recorded a thankful acknowledgment of this benefaction under the hands of the Vicar, Churchwardens, and principal inhabitants. On every piece of plate is this inscription, *The gift of Sir Paul Pyndar, Knt. to the Town Church of Wellingborough, 1674.* On the sides of the flaggons, and on the bottom and cover of the chalice, are engraved his arms. In 1640 he gave the first bell (8).

Thomas Pyndar, Esq; son to the famous Merchant Sir Paul, had for a short time possession of Nerquis-house in Flintshire, by marriage with Miss Wynne, heiress of the place. Their son Paul was created a Baronet about 1666, and dying single the estate devolved by maternal right to Paul Williams, Esq; of Pont y

Gwyddel. On the death of Edward Williams, Esq; 1737, it fell to his sister, now relict of Robert Hyde, Esq; who enjoys it in great hospitality (9).

[H] *The MS. mentioned below.* It (10) is a MS. history of Barbadoes, well written and not ill-penned, by some person who does not seem to have been connected, or acquainted with the Courten-family. The substance of what is mentioned in it relative to this article being given above, nothing more remains to be said of the MS. than that it contains a clear and circumstantial account of the condition, government, productions, and importance of the island at the time it was written, probably a century ago; and that it states Barbadoes, it may be not very exactly, as situated between 13 and 14 degrees of latitude, distant from England about 3430 miles, thirty miles in length, fourteen in breadth, and twenty-five leagues in circumference (11).

this

this loss, which involved him in great debt; for he died in the end of May, or beginning of June 1636, in the sixty-fourth year of his age, and was buried in the Church or Church-yard of St. Andrew Hubbard, the ground of both which was, after the fire in 1666, disposed of by the city for public uses, and partly laid into the street, the parish being annexed to St. Mary-Hill. There is an abstract of Sir William Courten's Will in the British Museum (b), dated May 22, 1636, from which some extracts are given in a note below [I].

(b) Ibid. 3515.

He left all his manors, Wingham Barton in Kent excepted, to his son William and his heirs, and him he appointed his executor and residuary legatee. Among many other charitable legacies, some of which are mentioned below, he bequeathed sixty-four gowns, to sixty-four poor men, according to the number of the years of his life. A Latin paper in the British Museum (c) seems to have been intended for his Epitaph, though it censures as folly, the over-ardent spirit of mercantile adventure, for which both Sir William and his son were very remarkable. It is endorsed "May 1636" in the hand-writing of William Courten, Esq; the subject of the following article, and may contain perhaps the genuine opinion and sentiments of the endorser, expressed in his own words at some early period of his life. His care in preserving it, induces at least a suspicion, that it was not very different from his own way of thinking concerning the conduct both of his father and grandfather. This may be mere conjecture: the curious reader may see below a faithful transcript of the paper [K].

(c) MSS. Sloan. 3515.

The accounts of the original partnership, in which a very considerable part of Sir William Courten's estate consisted, remained unsettled at his death; though on the decease of his brother, Sir Peter, their brother-in-law, John Moncy, repaired to Middleburgh, to settle with Peter Boudean-Courten. Before this settlement could be accomplished, Mr. Moncy died at Boudean's house, where he made his Will, as was pretended, leaving Sir William Courten and Peter Boudean-Courten his joint executors.

The validity of this Will was litigated for many years by an Esther White, *alias de Wyer*, who claimed as heiress at law to Mr. John Moncy, and obtained letters of administration to his estate. After a tedious legal process at Middleburgh, and the Hague, this gentlewoman obtained a sentence in 1657, to compel Peter Boudean to produce the books, papers, &c. but the validity of Moncy's will was still left in question, and it does not now appear, in what manner this law-suit terminated.

William Courten, Esq; the son of Sir William, was very early initiated, and very extensively concerned in commercial business. He married Lady Katharine Egerton, tenth

[I] *Extracts are given in a note below.* It appears from the abstract above-mentioned, that Sir William Courten's manor of Wingham Barton in Kent, had been settled before the date of his will, on his daughter Mary and her heirs; and *for her better preferment*, [it seems she was not then married] he left her 2000*l.* To his daughter Anne Devereux, wife of Essex Devereux, Esq; 1000*l.* to his daughter Dame Hester Littleton, wife of Sir Edward Littleton 4000*l.* and to each of her children living at his decease 100*l.* To his sons-in-law Littleton and Devereux, each a diamond ring sealed up, and their names on the boxes. To his daughter-in-law Lady Katharine Courten, a jewel of diamonds sealed up with his seal at arms, and her name thereon. To his nephew Peter Boudean, and to his wife, a ring and a jewel. To Mr. James Pergeus, a ring. To Mr. James Casiere, Merchant, and to his sister Mrs. Andrews, to each of them 50*l.* Ditto to Mr. Casteel, Merchant. Ditto *Flemish* to Mr. Joos. Ditto to John De Batts. To Mr. James Tryon, 100 merks. To Mary Casiere daughter to Mr. John Casiere, 20*l.* To his Book-keeper and Accomptant David Goubard, 100*l.* and 50*l.* *per annum* so long as he continued in the service of his son William Courten. To his servant Samuel Bonnel, on the same condition, 50*l.* *per ann.* To Mr. John Moone, 10*l.* To seventeen men-servants and five women-servants of himself, and to all his son's servants, different small sums. To the reparation of St. Paul's, over and above what he had given before for that use, 500 merks. To Christ's Church Hospital and St. Thomas's ditto, 100*l.* a-piece. To the Ministers of St. Gabriel Fan-Church, Mr. Palmer, and Mr. Saxby, 20*l.* each; and to the poor of the said parish, 30*l.* To the poor of the Dutch Congregations in London, 50*l.* and to the young Students maintained abroad, at Universities, by the said Congregations, 20*l.* To the poor of St. Mary-Hill, 15*l.* To the Minister of St. Andrew-Hubbard, 5*l.* and to the poor of the parish, 10*l.* To Monf. Marmot, preacher to the French Congregation

in London, 20*l.* and to the poor of that Congregation, 20*l.* To the poor of the Dutch and French Congregations in Norwich, Colchester, Sandwich, Canterbury, Maidstone, and Yarmouth, 10*l.* each. To the poor of the several parishes of Laxton, and Kneefal, *in com.* Nottingham, of St. Nicholas at Wade in the isle of Thanet, and of Westham in Essex, 10*l.* each. To John, Earl of Bridgewater, a ring, &c. &c. It is said in a note at the close of the abstract, that the rings and jewels, Sir William having the diamonds ready by him in his house [*inter alia*] at the time of his death, amounted in value to 7500*l.*

May, 1636.

GULIELMUS COURTEN, *verè liberali mercaturæ deditus, et in contrahendis averse periculi assiduus; post summæ amplificatam diuturno fortunæ afflatu, rem familiarem; post opes insignitas equestris ordinis honore; post liberos utriusque sexus illustrissimis comitum familiis per conjugia innexos; in præcipiti horum omnium perdendi ac contaminandi discrimine, excessit vitâ 27 Maij, 1636. Filio non multo post cedente foro; distractis tot villis, agrisque paternis ære alieno absumptis in classem Indicam privatam; immerfis opibus, depressâ et absorptâ oceano classe, non sine errore patris, filijque. Illius, quod spes longas inchoare non dubitasset, moriendi præ ætate jam ferè certus; quodque annis gravis levem illam lubricamque Deam tentare denuò voluisset; quasi illam filicerniorum, bustorum, cinerumque curam gereret, quam tot procantur venusti juvenes, et quibus auscultare, solennius multo est æquisque. Nec filius, ephorive, suâ vacabant culpâ; quod fugientem illam persequi studuerint, et in ordinem cogere. Fortunam fortunæ copijs aggressi sunt, non immerito offensam horum omnium temeritati, qui totius ex alto in parium, ex partu in agros et possessiones opimas deducti, salum rursus solo retrogradi protulerint; quasi priora beneficia repudiarent, nisi plura suggererentur; vel nulla satis magna esset pecunia, qua impotentis senis, juvenisve vota, non adimplerentur.*

daughter

stancy for many years, between four and five thousand seamen; that he built above twenty ships of burthen; was a great insurer, and besides that, a very considerable goldsmith, or banker, for so a banker was then called. It appears likewise, that he was very deeply engaged in a Herring Fishery, which was carried on at one time, with great spirit, and at great expence; but soon after, much to his cost, it came to nothing, in consequence of the supervening dissentions, confusion, and misery that in a soon-succeeding period, extended over all the British dominions.

Before the time alluded to in the preceding paragraph, about the year 1624, two of Sir William Courten's ships, in their return from Fernambuc, happened to discover an uninhabited island, now of considerable importance to Great Britain, to which Sir William first gave the name of Barbadoes. The writer follows here the account given in a capital French work, entitled, *Hist. Gen. des Voyages*, tom. xv. p. 595. *A Paris*, 1759. 19 tom. 4to. The discovery of this island is represented by the French compiler, as merely accidental; but in several papers in the British Museum, and particularly in the MS. there, mentioned below [H], it is said expressly, that the discovery was the result of a deliberate well-laid scheme, formed on hints from Sir William's correspondents in Zealand, and concerted, no doubt, between him and his brother Sir Peter, probably the intelligencer, for he lived and died in Holland. But be this as it may, Sir William Courten was certainly the first who took possession of this island; the first who gave it the name of Barbadoes which it still retains, and the first who began to settle it, (according to the MS. mentioned above, and quoted below,) in 1625.

On the 25th of Feb. 1627, Sir William Courten obtained the King's Letters Patent, for the colonization of this island, sheltering himself, for whatever reasons, under the Earl of Pembroke: for the deed grants, "The Government of Barbadoes to the Earl of Pembroke, in trust for Sir William Courten, with power to settle a Colony there, according to the laws of England, &c." On the faith of this grant, afterwards superseded by the influence of James, then Earl of Carlisle, though its validity was acknowledged by the first, and generally indeed by all the Lawyers, Sir William sent two ships, with men, arms, ammunition, &c. which soon stored the island with inhabitants, English, Indians, &c. to the number of one thousand, eight hundred and fifty, when one Captain Powel received from Sir William, a commission to remain in the island as Governor, in behalf of Sir William, and the Earl of Pembroke (a). After Sir William had expended 40,000*l.* on this business (*), and been in peaceable possession of the island about three years, James, Earl of Carlisle, claiming on grants said to be prior, though dated July 2, 1627, and April 7, 1628; affirming too, that he was Lord of all the Caribbee islands, lying between 10 and 20 degrees of latitude, under the name of Carlola, gave his commission to Colonel Royden, Henry Hawley, and others, to act in his behalf. The Commissioners of Lord Carlisle arrived at Barbadoes with two ships, in 1629, and having invited the Governor Captain Powel on board, they kept him prisoner, and proceeded to invade and plunder the island. They carried off the factors and servants of Sir William Courten and the Earl of Pembroke, and established the Earl of Carlisle's authority in Barbadoes, which continued there under several Governours, till 1646, when the government of it was vested by lease and contract, in Lord Willoughby of Parham.

Sir William Courten, it is said, had likewise sustained a considerable loss several years before this blow in the West Indies, by the seizure of his merchandize, after the cruel massacre of his factors at Amboyna, in the East Indies. But after all the losses above-mentioned, he was still possessed, in the year 1633, of lands in various parts of this kingdom, to the value, it is affirmed, of 6,500*l. per annum*, besides personal estate rated at 128,000*l.* and very extensive credit. Such were his circumstances; we are told, when he opened a trade to China, and as if he had grown young again, embarked still more deeply, in mercantile expeditions to the East Indies, where he established sundry new forts and factories. In the course of this new trade he lost unfortunately two of his ships richly laden, the Dragon and the Katharine, which were never heard of more; and he himself did not long survive

The Communion plate at Wellingborough, consisting of a pair of silver flaggons, a chalice and cover, gilt, weighing two hundred and fifty-seven ounces, was given 1634 by Sir Paul Pyndar, Knt. In the parish register is recorded a thankful acknowledgment of this benefaction under the hands of the Vicar, Churchwardens, and principal inhabitants. On every piece of plate is this inscription, *The gift of Sir Paul Pyndar, Knt. to the Town Church of Wellingborough, 1674.* On the sides of the flaggons, and on the bottom and cover of the chalice, are engraved his arms. In 1640 he gave the first bell (8).

Thomas Pyndar, Esq; son to the famous Merchant Sir Paul, had for a short time possession of Nerquis-house in Flintshire, by marriage with Miss Wynne, heiress of the place. Their son Paul was created a Baronet about 1666, and dying single the estate devolved by maternal right to Paul Williams, Esq; of Pont y

Gwyddel. On the death of Edward Williams, Esq; 1737, it fell to his sister, now relict of Robert Hyde, Esq; who enjoys it in great hospitality (9).

[H] *The MS. mentioned below.* It (10) is a MS. history of Barbadoes, well written and not ill-penned, by some person who does not seem to have been connected, or acquainted with the Courten-family. The substance of what is mentioned in it relative to this article being given above, nothing more remains to be said of the MS. than that it contains a clear and circumstantial account of the condition, government, productions, and importance of the island at the time it was written, probably a century ago; and that it states Barbadoes, it may be not very exactly, as situated between 13 and 14 degrees of latitude, distant from England about 3430 miles, thirty miles in length, fourteen in breadth, and twenty-five leagues in circumference (11).

this loss, which involved him in great debt; for he died in the end of May, or beginning of June 1636, in the sixty-fourth year of his age, and was buried in the Church or Church-yard of St. Andrew Hubbard, the ground of both which was, after the fire in 1666, disposed of by the city for public uses, and partly laid into the street, the parish being annexed to St. Mary-Hill. There is an abstract of Sir William Courten's Will in the British Museum (b), dated May 22, 1636, from which some extracts are given in a note below [I].

(b) *Ibid.* 3515. He left all his manors, Wingham Barton in Kent excepted, to his son William and his heirs, and him he appointed his executor and residuary legatee. Among many other charitable legacies, some of which are mentioned below, he bequeathed sixty-four gowns, to sixty-four poor men, according to the number of the years of his life. A Latin paper in the British Museum (c) seems to have been intended for his Epitaph, though it censures as folly, the over-ardent spirit of mercantile adventure, for which both Sir William and his son were very remarkable. It is endorsed "May 1636" in the hand-writing of William Courten, Esq; the subject of the following article, and may contain perhaps the genuine opinion and sentiments of the endorser, expressed in his own words at some early period of his life. His care in preserving it, induces at least a suspicion, that it was not very different from his own way of thinking concerning the conduct both of his father and grandfather. This may be mere conjecture: the curious reader may see below a faithful transcript of the paper [K].

May, 1636.

GULIELMUS COURTEN, verè liberali mercaturæ deditus, et in contrahendis averſi periculi affiduus; poſt ſummæ ampliatam diuturno fortunæ afflatu, rem familiarem; poſt opes inſignitas equeſtris ordinis honore; poſt liberos utriusque ſexus illuſtriſſimis comitum familiis per conjugia innexos; in præcipiti horum omnium perdendi ac contaminandi discrimine, exceſſit vitâ 27 Maij, 1636. Filio non multo poſt cedente foro, diſtractis tot villis, agrisque paternis ære alieno abſumptis in claſſem Indicam privatam; immerſis opibus, depreſſâ et abſorptâ oceano claſſe, non ſine errore patris, filijque. Illius, quod ſpes longas inchoare non dubitaſſet, moriendi præ ætate jam ſermè certus; quodque annis gravis levem illam lubricamque Deam tentare denudè voluiſſet; quaſi illam ſilicerniorum, buſtorum, cinerumque curam gereret, quam tot procantur venuſti juvenes, et quibus auſcultare, ſolennius multo eſt æqui-uſque. Nec filius, ephorive, ſuâ vacabant culpâ; quod fugientem illam perſequi ſtuderint, et in ordinem cogere. Fortunam fortunæ copijs agreſſi ſunt, non immerito offenſam horum omnium temeritati, qui totius ex alto in partum, ex partu in agros et poſſeſſiones opimas deduſti, ſalum rursus ſolo retrogradi protulerint; quaſi priora beneficia repudiarent, niſi plura ſuggerentur; vel nulli ſatis magna eſſet pecunia, qua impotentis ſenis, juveniſve vota, non adimplerentur.

daughter

stancy for many years, between four and five thousand seamen; that he built above twenty ships of burthen; was a great insurer, and besides that, a very considerable goldsmith, or banker, for so a banker was then called. It appears likewise, that he was very deeply engaged in a Herring Fishery, which was carried on at one time, with great spirit, and at great expence; but soon after, much to his cost, it came to nothing, in consequence of the supervening dissensions, confusion, and misery that in a soon-succeeding period, extended over all the British dominions.

Before the time alluded to in the preceding paragraph, about the year 1624, two of Sir William Courten's ships, in their return from Fernambuc, happened to discover an uninhabited island, now of considerable importance to Great Britain, to which Sir William first gave the name of Barbadoes. The writer follows here the account given in a capital French work, entitled, *Hist. Gen. des Voyages, tom. xv. p. 595. A Paris, 1759. 19 tom. 4to.* The discovery of this island is represented by the French compiler, as merely accidental; but in several papers in the British Museum, and particularly in the MS. there, mentioned below [H], it is said expressly, that the discovery was the result of a deliberate well-laid scheme, formed on hints from Sir William's correspondents in Zealand, and concerted, no doubt, between him and his brother Sir Peter, probably the intelligencer, for he lived and died in Holland. But be this as it may, Sir William Courten was certainly the first who took possession of this island, the first who gave it the name of Barbadoes which it still retains, and the first who began to settle it, (according to the MS. mentioned above, and quoted below,) in 1625.

On the 25th of Feb. 1627, Sir William Courten obtained the King's Letters Patent, for the colonization of this island, sheltering himself, for whatever reasons, under the Earl of Pembroke: for the deed grants, "The Government of Barbadoes to the Earl of Pembroke, in trust for Sir William Courten, with power to settle a Colony there, according to the laws of England, &c." On the faith of this grant, afterwards superseded by the influence of James, then Earl of Carlisle, though its validity was acknowledged by the first, and generally indeed by all the Lawyers, Sir William sent two ships, with men, arms, ammunition, &c. which soon stored the island with inhabitants, English, Indians, &c. to the number of one thousand, eight hundred and fifty, when one Captain Powel received from Sir William, a commission to remain in the island as Governor, in behalf of Sir William, and the Earl of Pembroke (a). After Sir William had expended 40,000*l.* on this business (*), and been in peaceable possession of the island about three years, James, Earl of Carlisle, claiming on grants said to be prior, though dated July 2, 1627, and April 7, 1628; affirming too, that he was Lord of all the Caribbee islands, lying between 10 and 20 degrees of latitude, under the name of Carliola, gave his commission to Colonel Royden, Henry Hawley, and others, to act in his behalf. The Commissioners of Lord Carlisle arrived at Barbadoes with two ships, in 1629, and having invited the Governor Captain Powel on board, they kept him prisoner, and proceeded to invade and plunder the island. They carried off the factors and servants of Sir William Courten and the Earl of Pembroke, and established the Earl of Carlisle's authority in Barbadoes, which continued there under several Governours, till 1646, when the government of it was vested by lease and contract, in Lord Willoughby of Parham.

Sir William Courten, it is said, had likewise sustained a considerable loss several years before this blow in the West Indies, by the seizure of his merchandize, after the cruel massacre of his factors at Amboyna, in the East Indies. But after all the losses above-mentioned, he was still possessed, in the year 1633, of lands in various parts of this kingdom, to the value, it is affirmed, of 6,500*l. per annum*, besides personal estate rated at 128,000*l.* and very extensive credit. Such were his circumstances, we are told, when he opened a trade to China, and as if he had grown young again, embarked still more deeply, in mercantile expeditions to the East Indies, where he established sundry new forts and factories. In the course of this new trade he lost unfortunately two of his ships richly laden, the Dragon and the Katharine, which were never heard of more; and he himself did not long survive

The Communion plate at Wellingborough, consisting of a pair of silver flaggons, a chalice and cover, gilt, weighing two hundred and fifty-seven ounces, was given 1634 by Sir Paul Pyndar, Knt. In the parish register is recorded a thankful acknowledgment of this benefaction under the hands of the Vicar, Churchwardens, and principal inhabitants. On every piece of plate is this inscription, *The gift of Sir Paul Pyndar, Knt. to the Town Church of Wellingborough, 1674.* On the sides of the flaggons, and on the bottom and cover of the chalice, are engraved his arms. In 1640 he gave the first bell (8).

Thomas Pyndar, Esq; son to the famous Merchant Sir Paul, had for a short time possession of Nerquis-house in Flintshire, by marriage with Miss Wynne, heiress of the place. Their son Paul was created a Baronet about 1666, and dying single the estate devolved by maternal right to Paul Williams, Esq; of Pont y

Gwyddel. On the death of Edward Williams, Esq; 1737, it fell to his sister, now relict of Robert Hyde, Esq; who enjoys it in great hospitality (9).

[H] *The MS. mentioned below.* It (10) is a MS. history of Barbadoes, well written and not ill-penned, by some person who does not seem to have been connected, or acquainted with the Courten-family. The substance of what is mentioned in it relative to this article being given above, nothing more remains to be said of the MS. than that it contains a clear and circumstantial account of the condition, government, productions, and importance of the island at the time it was written, probably a century ago; and that it states Barbadoes, it may be not very exactly, as situated between 13 and 14 degrees of latitude, distant from England about 3430 miles, thirty miles in length, fourteen in breadth, and twenty-five leagues in circumference (11).

this loss, which involved him in great debt; for he died in the end of May, or beginning of June 1636, in the sixty-fourth year of his age, and was buried in the Church or Church-yard of St. Andrew Hubbard, the ground of both which was, after the fire in 1666, disposed of by the city for public uses, and partly laid into the street, the parish being annexed to St. Mary-Hill. There is an abstract of Sir William Courten's Will in the British Museum (*b*), dated May 22, 1636, from which some extracts are given in a note below [*I*].

(*b*) *Ibid.* 3515. He left all his manors, Wingham Barton in Kent excepted, to his son William and his heirs, and him he appointed his executor and residuary legatee. Among many other charitable legacies, some of which are mentioned below, he bequeathed sixty-four gowns, to sixty-four poor men, according to the number of the years of his life. A Latin paper in the British Museum (*c*) seems to have been intended for his Epitaph, though it censures as folly, the over-ardent spirit of mercantile adventure, for which both Sir William and his son were very remarkable. It is endorsed "May 1636" in the hand-writing of William Courten, Esq; the subject of the following article, and may contain perhaps the genuine opinion and sentiments of the endorser, expressed in his own words at some early period of his life. His care in preserving it, induces at least a suspicion, that it was not very different from his own way of thinking concerning the conduct both of his father and grandfather. This may be mere conjecture: the curious reader may see below a faithful transcript of the paper [*K*].

(*c*) MSS. Sloan.
3515.

The accounts of the original partnership, in which a very considerable part of Sir William Courten's estate consisted, remained unsettled at his death; though on the decease of his brother, Sir Peter, their brother-in-law, John Moncy, repaired to Middleburgh, to settle with Peter Boudean-Courten. Before this settlement could be accomplished, Mr. Moncy died at Boudean's house, where he made his Will, as was pretended, leaving Sir William Courten and Peter Boudean-Courten his joint executors.

The validity of this Will was litigated for many years by an Esther White, *alias de Wyer*, who claimed as heiress at law to Mr. John Moncy, and obtained letters of administration to his estate. After a tedious legal process at Middleburgh, and the Hague, this gentlewoman obtained a sentence in 1657, to compel Peter Boudean to produce the books, papers, &c. but the validity of Moncy's will was still left in question, and it does not now appear, in what manner this law-suit terminated.

William Courten, Esq; the son of Sir William, was very early initiated, and very extensively concerned in commercial business. He married Lady Katharine Egerton, tenth

[*I*] *Extracts are given in a note below.* It appears from the abstract above-mentioned, that Sir William Courten's manor of Wingham Barton in Kent, had been settled before the date of his will, on his daughter Mary and her heirs; and for her better preferment, [it seems she was not then married] he left her 2000*l.* To his daughter Anne Devereux, wife of Essex Devereux, Esq; 1000*l.* to his daughter Dame Hester Littleton, wife of Sir Edward Littleton 4000*l.* and to each of her children living at his decease 100*l.* To his sons-in-law Littleton and Devereux, each a diamond ring sealed up, and their names on the boxes. To his daughter-in-law Lady Katharine Courten, a jewel of diamonds sealed up with his seal at arms, and her name thereon. To his nephew Peter Boudean, and to his wife, a ring and a jewel. To Mr. James Pergehs, a ring. To Mr. James Casiere, Merchant, and to his sister Mrs. Andrews, to each of them 50*l.* Ditto to Mr. Casteel, Merchant. Ditto *Flemish* to Mr. Joos. Ditto to John De Batts. To Mr. James Tryon, 100 merks. To Mary Casiere daughter to Mr. John Casiere, 20*l.* To his Book-keeper and Accomptant David Goubard, 100*l.* and 50*l.* per annum so long as he continued in the service of his son William Courten. To his servant Samuel Bonnel, on the same condition, 50*l.* per ann. To Mr. John Moone, 10*l.* To seventeen men-servants and five women-servants of himself, and to all his son's servants, different small sums. To the reparation of St. Paul's, over and above what he had given before for that use, 500 merks. To Christ's Church Hospital and St. Thomas's ditto, 100*l.* a-piece. Illius, quod spes longas inchoare non dubitasset, moriendi præ ætate jam fermè certus; quodque annis gravis levem illam lubricamque Deam tentare denuò voluisset; quasi illam silicerniorum, bustorum, cinerumque curam gereret, quam tot procantur venusti juvenes, et quibus auscultare, solennius multo est æquiusque. Nec filius, ephorive, suâ vacabant culpâ; quod fugientem illam persequi studuerint, et in ordinem cogere. Fortunam fortunæ copijs aggressi sunt, non immerito offensam horum omnium temeritati, qui totius ex alto in partum, ex partu in agros et possessiones opimas deducti, salum rursus solo retrogradi protulerint; quasi priora beneficia repudiarent, nisi plura suggererentur; vel nulla satis magna esset pecunia, qua impotentis senis, juvenisve vota, non adimplerentur.

daughter

daughter of John, first Earl of Bridgewater, by whom he had issue, one son, named William, and one daughter, called Katharine, and afterwards by her marriage Mrs. Yongs. With the assistance, it seems, and additional credit of his father-in-law the Earl of Bridgewater, William Courten, in 1641, equipped two ships, at great expence, the Bona Esperanza, and the Henry Bonadventure, which he sent to the East Indies, to prosecute the trade, and support the establishment for trade, which his father, Sir William, had settled there. This was his decisive effort, and circumstanced as he then was, a very hazardous and desperate adventure, in which he was unfortunate; for his ships, on their voyage, were way-laid, seized, and plundered by the Dutch, who in this iniquitous way ruined the son, after having attempted, in like manner, to ruin his father about twenty years before, by the butchery of his agents, and the seizure of his property at Amboyna.

That crafty people saw and seized the instant of a storm bursting just then on Britain, to accomplish a darling point of their mercenary policy, and succeeded but too well in stopping for a time the trade of this nation to China, Persia, and the East Indies. Moreover, to fill up the measure of their iniquity and of their infamy, when, nearly thirty years after, the un-recompenced sufferers of, and by this much-injured family, protested their wrongs, and in a legal manner reclaimed the property of which they had been robbed and pilfered, soliciting the support of their magistrates in the course of law; the States permitted their thieves and robbers to plead openly in arrest of Judgment, a general article in the Treaty of Breda, that consigns to oblivion, all national offences, injuries, losses and damages, &c. antecedent to its ratification in 1667, as a happy release from all obligations on Dutchmen to act honestly with Englishmen. The States went farther, adopted this strange construction of the article, in contradiction to the common sense of words, and positively interdicted all their Courts of Judicature from doing justice to the English plaintiffs, or giving verdicts contrary to this scandalous interpretation of an article in a Treaty, where the subjects of complaint were never considered, or even mentioned (d). On this shallow pretext, did the High and Mighty States of Holland, regardless of the general faith of nations, screen and justify their subjects in flagrant crimes, and prohibit their restitution of private property invaded by fraud and violence, on a principle subversive of the commerce by which they subsist, and utterly destructive of all civil society.

(d) This is affirmed on the authority of a printed tract of above 134 pages in folio, entitled, "Fraud and Oppression detected and arraigned," a fragment of which is bound up in MSS. Sloan. 3515. fol.

Here ended the grandeur and opulence of a family of intelligent, enterprising, and wealthy Merchants, who rose and stood unrivalled by individuals, but were, with all their means and skill, unable to withstand the persistent opposition of a whole mercantile nation, accustomed to determine its right by its power, to whose ignoble jealousy and sinister arts, they fell at last a shameful sacrifice. The Dragon and the Katharine of Sir William Courten were most probably intercepted, and privately destroyed by the same left-handed wisdom which audaciously seized the Bona Speranza and Henry Bonadventure of his son, and thereby gave the finishing blow to the trade of the Courten family; for by this last disaster, their forts and factories in the East Indies were totally ruined, and the damage they immediately sustained, exclusive of consequential losses, is estimated in several memorials at more than 200,000*l.* the Bona Speranza being rated at 75,000*l.* the Henry Bonadventure at 150,000*l.* and the insurance upon them at 7,000*l.* more.

The Earl of Bridgewater, who had been the principal collateral security for his son-in-law, when called upon, absolutely refused to fulfil the obligations he had come under on this occasion. His Lordship said and swore, "that he would not fry in hell for his own debts, for the discharge of which he had set apart some lands; but that he would pay none of William Courten's debts, in whose estate he said he had been deceived." Nevertheless both this Earl, and his son after him, if the writer does not mis-remember, were put to great trouble and expence on this account.

That part of the estate of the Courten-family which now probably was his all, William Courten could neither realize, nor ascertain. Overpowered, therefore, with his father Sir William's debts, and his own, and burthened with large sums at interest, he became insolvent in 1643, when he absented himself from the administration of his paternal estate, and withdrew into Italy, leaving the many and great claims upon him unsatisfied, and the accounts of the original family-partnership still unsettled. He lived abroad entirely, for the last twelve years of his life, and died at Florence in 1655 intestate, or at least, it was afterwards thought prudent to say so.

It seems there was no statute of bankruptcy taken out against him on his retirement from England, and the estates of the family continued, for years at least, unsequestered. His wife, Lady Katharine, who remained here with her children three full years after her husband went abroad, appears to have been entrusted with the sole management of his affairs, and in the administration of the estates of the family.

In 1646, this Lady employed John Moone, and David Gubard, both remembered in Sir William Courten's Will, as her Agents or Attornies, to settle every thing with Peter Boudean, who persisted dishonestly in evading the settlement, and having, by whatever means, got possession of some of Sir William Courten's books and papers, absolutely refused to re-deliver them, availing himself of the disorder and iniquity of the times.

It may be, that in some instances Lady Katharine's interest was neglected, perhaps betrayed, by the people she employed; but with all the integrity and activity in her service imaginable, it is not likely that her agents could have succeeded effectually, in bringing one so watchful and so artful as Boudean was, to settle, and close the accounts of the partnership. Nevertheless, it is not improbable that Boudean, to protract time and shuffle off the final settlement, might send Lady Katharine occasional remittances, for the support of her husband abroad, and the supply of her own and her children's necessities. If this was not done, at any rate she might, with whatever disadvantage, take up monies on exchange, and give obligations for the repayment of them on the co-partnership. It is certainly said, that Sir William Courten did this, the accounts not having been liquidated for fourteen years before his death. It is said, that "the great bulk of Sir William Courten's lordships and lands, excepting those in the counties of Worcester and Gloucester, were sold outright by William Courten his son and heir, to William Purpoint, Esq; Mr. Daniel Harvey, the Earl of Kent, and others (e)."

(e) *Vox Veritatis*, &c. 4to. 1683. By Tho. Browne, Gent. p. 39.

It does not appear, from any thing this writer has seen, in what year Lady Katharine died; nor is he authorized to say, that she continued till her death in the sole management of her husband's affairs, and the administration of the remaining estates of his family. Certainly, in 1660, King Charles II. granted Letters-Patent of Administration to all the estates of Sir William Courten and his son, in favour of one George Carew, Esq; whilst William, the son of William Courten, Esq; was still a minor, wanting then three years of being of age, and residing at that time beyond sea.

It may be proper to close here this article with some account of Carew, who, in a way apparently not very reputable, probably enriched himself from the wrecks of a very opulent family. A certificate signed Arlington, if printed from a genuine original, proves that Geo. Carew was one of the Gentlemen of his Majesty's Most Honourable Privy-Chamber. He was likewise a Member of the Society of Gray's-Inn, as appears from a printed copy of a certificate of the reader and benchers, dated 1674-5, in the 27th of Charles II. and signed Thomas Holt Lector, Robert Raworth, John Otway, and Francis Luttrell. Thomas Browne, who says he was concerned for Mr. George Carew twenty years and upwards in the affairs between him, as an Assignee of Sir William Courten's estates, and afterwards Administrator of his goods, says, that Carew "was in his juvenile years bred some time in the city of London; that in 1652, he was admitted of Gray's-Inn, where he was a great Student in the common law of England for seven years together after his admittance."

(f) *Vox Veritatis*, &c. ut *supra*, p. 39.

(f) Another certificate likewise printed, and ascribed to somebody whose name is forgotten, but who is styled Steward to Mr. Carew, attests, that George Carew's estates in Suffolk, Essex, London, Dorsetshire and Surrey, amounted to 530*l.* *per annum*. In the papers relative to the Courten-family in the British Museum, this person is commonly called George Carew of Gray's-Inn, and sometimes George Carew of Richmond, Esq.

(g) *Ibid.* p. 18, 19. and p. 4. and Dedication.

"In 1659, George Carew bought nine cottages at Richmond, *alias* West-Sheene, in Surrey, which he demolished as being receptacles for poor inhabitants burthensome to the parish; and in the room of them built three fair brick-houses, with coach houses, barns, stables and out-buildings, whereby, it is said, he increased the King's revenue in hearth-money, and the rents and profits of James, Duke of York, at an expence to himself of 8000*l.* sterling and upwards." This estate fell, it is said, to Sir James Butler in 1682 (g). Carew had likewise eight houses in the parish of St. Andrew in Holbourn, of about the value of 1400*l.* which he mortgaged, with his Richmond estate, and another he had in Worcestershire, to take in several assignments on the ships destroyed by the Dutch, from Sir William Powell and Sir Peter Vanlore, to unite all interests, as it is said, but in fact, it seems, to accomplish the scheme in which he succeeded, viz. to get Letters of Administration, to the estates and goods, both of Sir William Courten, and of Sir Paul Pyndar, whose administrator Sir William Powell then was; though it is said in the Dedication of the Tract here referred to, "that Providence had cast this administration on Carew, in right of his wife, and other his relations." This was done in, or soon after the year 1665; for in the month of May, in that year, he obtained *Letters of Redress* on the East India Company of the Netherlands, for the sum of 151,612*l.* with costs and charges, to continue effectual in law, till full satisfaction was made for all losses, &c. or a composition took place between the Grantees and the Company above-mentioned.

From two papers transcribed into the article immediately following this, it is evident, that there was a Mr. Carew, who was a very considerable debtor to William Courten the last man of that name and family, and at one time his Agent and Solicitor. It is not clear to the compiler of this article, that this George Carew, Esq; was either a real creditor, or a rightful agent for the creditors of this family; but it appears, that he bought up debts and claims on the estates, and that, under a pretext of having an interest himself in right of his wife, and a zealous concern for the interests of other creditors, he actually worked himself into their business, and obtained at last, as has been said, Letters of Administration to the estates of the Courten family in the year 1660, and likewise in 1665 or 1666, to the estates, &c. of Sir Paul Pyndar.

In 1661, George Carew, Esq; went to work on the strength of his Letters of Administration to the goods of Sir William Courten, and commenced a legal process in Holland, against Peter Boudean-Courten, who died, it seems, rich, as may be seen below [L], in or about the year 1662, leaving his sons and daughters responsible for the still undecided claims on the partnership of the Courtens and Moncy, from their joint stock of which their father had so unjustly kept possession, and from the real and personal estates which he had left to a great amount among his children. The legal processes were now renewed, and claims of justice re-instituted in sundry Courts of Holland, in the name of George Carew, Esq; administrator to the estates of Sir William Courten, &c. against John and Peter Boudeans and the other sons and daughters of Peter Boudean deceased. They seem to have inherited the disposition and craft with the wealth of their father; for one James Bovey, who had been servant and book-keeper to Mr. Moncy, being on the death of his master employed by William Courten, Esq; and afterwards vested with letters of procuration from George Carew, Esq; was arrested on a great feigned action, and confined in prison for several years, to prevent his prosecution of the suit, and to retard the course of justice. Its decisions in that country, to judge of them by this suit against the Boudeans, seem to have been sufficiently deliberate; for whether it was owing to the *law's delay*, or to the influence and ingenuity of the defendants, it certainly was still in litigation in the year 1674, and this writer is yet to learn in what way, or at what time it terminated. Since this was written, and after part of the article was printed, much new information has been obtained from a curious and scarce Tract, obligingly communicated by Isaac Reed, Esq. It is entitled "*Vox Veritatis*, or a brief abstract of the case between George Carew, Esq; Administrator of the goods and chattels of Sir William Courten, and Sir P. Pyndar, Knts. deceased, &c. and the East-India Company of the Neitherlands, with other inhabitants of Amsterdam and Middleburgh, &c. by Thomas Browne, Gent. dedicated to his much honoured friends, the creditors and legatees of Sir William Courten, Sir P. Pyndar, and William Courten, Esq; deceased." 60 pages, &c. 4to. 1683.

(b) *Vox Veritatis*, &c.

In this pamphlet, it is said (b), that George Carew, in or about the year 1672, with a letter in his custody from King Charles II. to his Ambassadors and Plenipotentiaries in Holland, the Duke of Buckingham and Lord Arlington, with a Passport likewise from the States Commissioners at Hampton Court, was actually apprehended with his two servants, as spies and enemies to Holland, and committed close prisoners to the Geuangen Port, without access, where they continued for the space of two and twenty months. It is added, (i) that G. Carew "was condemned to die, by way of retortion for Advocate Sasse, prisoner then in the Tower of London, but the executions of both were suspended until farther order, soe that at the end of the war, they were released upon equal terms."

(i) *Ibid. ut supra.*

It appears from this new source of information, that the litigation was not yet terminated at the date of its publication in 1683; and that in the preceding year, 1682, G. Carew, being determined not to surrender the Letters of Reprisals which he had obtained in 1665, had, in contempt of the High Court of Chancery, which had declared them null and void, and issued its orders to apprehend him, fled into France, and taken up his residence at Paris, where, says the writer, "he now resolves to eat his bread, until the people of England are come to their right wits and senses again(k)." A paragraph of a French letter, from a French Lawyer, *François Perenott*, written at this period, and dated *A Paris ce 16 Dec. 1682*, being very curious, is given for the reader's amusement, in a note below [M].

(k) *Vox Veritatis*, &c. p. 37.

The

[L] *Who died, it seems, rich, as may be seen below.* Peter Boudean-Courten left, among his daughters at his death, according to the phraseology of the Netherlands, "nine ton of gold," that is, as explained in the paper that contains the information, 90,000l. sterling.

[M] *Given for the reader's amusement in a note below.*

"MONSIEUR,

"J'ay reçu la votre avec copie du proces de Scire facias, au nom du Roy, & la reponse à icelle tous deux en Latin, & l'ordre de la Chancellerie ensuivie dattée le 26 de May, 1682, & aye auprès de moy la copie des Lettres Patentes pour Reprises faillies contre les Hollandois, pour 151,612 livres sterlins, traduité en Francois. J'ay consulte cette affaire avec les premieres Conseillers du Parlement de Paris, lesquels sont d'avis qu'il est contre la justice naturelle & la constitution du Gouvernement d'Angleterre, que la même Cour de Judicature d'où les Lettres Patentes sont issies, les pourroit abroger & anuller, sans premierement faire satisfaction aux personnes injuriées ou endomagées, & ils tiennent pour

"fort deshonorable à aucun Prince, ou sujets, de chercher relief contre leur propres actes, lesquels sont en leur propre pouvoir d'accomplir; LE ROY de FRANCE, vendroit son lit de dessous soy, plutôt que de courir le deshonneur & reproche d'une telle action, si respectant contre tous Princes Soverains, &c (12)."

(12) *Vox Veritatis* &c. p. 37, and 38.

The King's Attorney, Solicitor, and Counsel pleaded in the Court of Chancery, that the Letters of Reprisals granted to Sir Edmund Turner, G. Carew, &c. in May 1665, were disannulled by an express article in the Treaty of Breda in 1667. The Chancellors, Hide and Finch, afterwards Earl of Nottingham, acquiesced in this opinion; and it was accordingly decreed in the Court of Chancery that the Letters were void, that they ought to be resigned, and the record of them erased. This order of the Court was made absolute Feb. 27, 1682, when tip-staves and messengers being sent from day to day to apprehend Carew, as it is said, dead or alive, his personal liberty became insecure, and he fled the kingdom.

Carew's pleas against the disannulment or surrender of the Letters of Reprisals granted to him and others in 1665 were specious and strong. He pleaded, that his name was only used in trust; that he never

per-

The legal demands of the Courten-family on Holland and Zealand were very serious things, and seem to have required, and indeed to have justified, mature consideration. Its

personally acted in execution of the powers given by the letters, &c. and that neither the letters themselves, nor any of the *exemplifications*, or *duplicates*, [for commissions had been frequently given to Captains of ships, upon them] were actually in his custody, although he mentioned the names of the persons in whose possession they were. He refused however to sign an instrument of surrender drawn up by the King's Attorney, which Turner, another grantee, readily signed, and by signing released himself from all farther trouble and prosecution. He pleaded, that he had sold or mortgaged all his estates to purchase assignments on the two East India ships, the seizure of which was to have been indemnified by these Letters of Reprisals; that the letters had not by any means indemnified him and other sufferers, for whom he likewise acted in trust; that therefore he could not without ruining himself, and being moreover guilty of great injustice to other claimants, his constituents, as administrator of the goods of Sir W. Courten, and Sir P. Pyndar, acquiesce in the order of the Court, or relinquish or surrender, by signing the instrument of the King's Attorney, the Letters of Reprisals, the sole security then left for him, and other sufferers for whom he acted, without some adequate satisfaction. He pleaded an express clause in the Letters of Reprisals, which says, that they were to remain in full force, "Notwithstanding it may so happen, the present differences between us and the States-General, depending upon General Reprisals, may be agreed and composed, and that in the *interim*, a peace and good correspondence may be renewed between us and the said States-General (13)." Sovereign Princes, said Carew or his Counsel, make their stipulations as they please concerning their own interests, relating to dominion or royalty, either at sea or land; but as to matters of property, and in cases of *meum & tuum*, wherein their subjects were concerned, and them only, they were, as the King was, in the article of the Treaty of Breda pleaded by his Attorney, &c. circumscribed within the limits of the laws of God and man: but the King having granted his *fiat*, and the Chancellor his *recepti* to the grant of 1665, for reparation and satisfaction according to law, the King had put it beyond his power to avoid it without payment in the way agreed on, or in some other effectual way; and that the King's Ministers and the Dutch laboured equally in vain to gain a point which could not possibly be gained, without restitution, or adequate satisfaction.

Carew added other reasons against the decree of the Court, some of which are curious and memorable. He urged, that the certificates, depositions, and authentic acts of public notaries, obtained at great expence from the East-Indies, &c. on which Dr. Exton grounded his report of damages at 151,612*l.* had all been consumed by the fire of London in 1666; consequently if he signed the instrument of resignation and surrender proposed by the King's Attorney, &c. there would remain nothing on record in behalf of the creditors of Sir W. Courten, &c. there would be even a record against them. He contended that the spoils and depredations for which satisfaction was claimed, were upon record under the broad seal of England; that the debt and damages of the creditors of Sir W. Courten and Sir P. Pyndar were all liquidated and ascertained under the Broad Seal of England annexed to the Letters of Reprisals. The names too of the officers and seamen in the ship *Bona Esperanza* killed and destroyed in their own defence, in the time of alliance between England and Holland; the wages also of the officers and seamen in both the ships *Bona Esperanza* and *Henry Bona Adventura*, were in like manner upon record under the Broad Seal of England. Finally, Carew insisted that this sole remedy for all their relief, in lieu of which nothing was offered, was, so long as the Letters of Reprisals were not abrogated, or surrendered, valid on record, in several duplicates and exemplifications, besides the original Patent itself upon record under

the Great Seal of England, the greatest security in the kingdom, against which there was no averment. It followed, that he considered his Letters of Reprisals as his all, and that in spite of the Court he proposed to keep them, and to act upon them as he found occasion in justice to himself, and, as was added for the grace of the matter, in justice to the numberless and much aggrieved creditors of Sir W. Courten and Sir P. Pyndar.

It is easy to see, that Carew's obstinacy militated against himself, that all his pleadings were overborne, and all his arts vain, opposed to the Court of Chancery, in a suit prompted and supported by the crown, though it was actually in proof before that Court upon the deposition of Sir George Downing, his Majesty's Envoy Extraordinary to the States, whom his Majesty had enjoined to get satisfaction for the injuries done to the Courten-family by the seizure of their ships, that John de Witt, in Oct. 1664, had actually offered 200,000 guilders, and whatever more could be got, on the caution of Pergens and P. Boudean, but that the offer had been rejected by Carew, for himself and the creditors, &c. as an inadequate satisfaction. New differences arising just at that time, between the King of England and the States, this affair was dropped; and probably in the hurry of the treaty at Breda, concluded just after the plague, the fire, and the exploit of the Dutch at Chatham, where they burnt several of the King's ships, and whence they carried off the Royal Charles, of which they made a Coffee-house at Helver-Slucce; this private interest was either totally over-looked, or politically abandoned. However this was, the crown, it seems, acceded to the Dutch interpretation of that Treaty, and having generally released, and re-delivered the prizes taken by commissioners acting on the Letters of Reprisals to Hamburgers, Lubeckers, Danzieckers, Swedes, and various very questionable claimants, even before the ratification of this treaty; after it was ratified, the captains of ships, and seamen, who accepted of commissions from Carew and other grantees, nominated in the Letters of Reprisals, for proceeding on the powers with which they were undoubtedly vested, were several times apprehended, and once tried as felons and pyrates, but acquitted. In short, the Letters, &c. meant for their relief, instead of being a benefit to the grantees and creditors of Sir William Courten and Sir P. Pyndar, who had, it seems, an assignation of the two ships, for divers sums of money lent to Sir W. C. and his son, on yielding the surplus to Sir Edward Lyttleton, proved eventually an aggravation of their loss, and an additional injury (14).

The author of the publication, from which the substance of this note is extracted, a solicitor for Carew, and, at the date of its printing, employed more than twenty years in the affair of which he relates the case, states a fact relative to the Letters of Reprisals granted to Carew, &c. *anno* 1665, in the following words (15): "Complaints being made to the Councill-Table, that ships of the King's allies were brought in by force of the Letters Patent, for reprisals, upon suspicion as enemies, and that it was prejudicial to the Lord High Admiral's interest, and the King's fleet for want of seamen; proclamation issued forth *de bene esse*, to suspend the execution of the said Letters, &c. until further orders, and Mr. Carew was committed by the Councill-Table to the prison of the Fleet, Aug. 20, 1666, old stile, for the seamen pretended misdemeanours. Afterwards, on the same day of the month, and hour of the day, *anno* 1672, John de Witt, [to whom Browne imputes Carew's imprisonment, &c.] and Cornelis his brother were murdered at the Hague by the rabble, as a judgment upon them for treachery and ingratitude."

The present writer enters not into the *treachery*, *ingratitude*, or consequential judgment roundly asserted

(13) *Vox Veritatis*, &c. p. 58.

(14) *Ibid.* *pass.*

(15) *Ibid.* p. 6.

Its single claim on Peter Boudean and his family amounted of itself to 122,000*l.* which, great as it is, was not yet one half, if even a third, of the claims of this family in various Courts of that country. Indeed, the sums said to have been owing to the Courtens, one way or other, here, or beyond sea, are in their aggregate enormous, and so uncommon, as almost to exceed all belief, considered merely as the net gains of fair trade, never suspected of fraud, nor ever supported by force[N]. The writer just gives them as he found them, for

ferted by the author of the foregoing paragraph; but he takes the opportunity of recording here, a curious fact relative to the assassination of these brothers, not commonly known, and never printed, which he learnt very early in life, from a well-informed person of unquestionable veracity and extensive knowledge in history.

After the Prince of Orange became King of England, a Dutchman one day solicited hard for an audience, and in order to obtain it, requested that it might be signified to his Majesty, that the name of the man who begged to speak to him was *Tallo*. The delivery of this importunate suitor's message, procured him instantaneous admission, and it became certainly known at Court, that this fellow was the ring-leader of the mob that tore the brothers to pieces. For this piece of service he had, it seems, an annual pension for life from the Prince of Orange; and his application to the King, in which, it was said, he succeeded, was for its arrears and continuance.

This digression cannot be much lengthened by the following addition. On this tragic event, the pensionary's mother, and a younger surviving son, fled into this kingdom. The son, perhaps only Englishing his Dutch discrimination, took the name of White, and began near Fulham, where they fixed their habitation, a manufactory, the first in its kind here, of pottery-ware, and stone-bottles, vulgarly called *grey-beards*, which is still carried on, in the same place, by the lineal descendants of the family, at this day. The mother, it is said, lived recluse, in fullen solitary dignity, generally inaccessible, unless to the King who visited her sometimes, and people of the first fashion. She died in that retirement, where the writer's informer says, he saw an admirable picture of Oliver Cromwell, for which, he was told, that repeated offers of extraordinary prices had been repeatedly refused.

It is high time to conclude this long note, occasioned by an accidental sight of *Vox Veritatis*, &c. too late for incorporation with the article, by observing that the author of the tract so entitled, mentions four books published by Carew, of the first of which only, the present writer has seen a fragment. To them all the reader is referred, if he can find them, for farther information in these matters, if he wishes to know more concerning them.

1. Fraud and oppression detected and arraigned.
2. An hue and cry after the goods and chattels of Sir William Courten, and Sir Paul Pyndar.
3. *Hinc illæ lachrimæ.*
4. *Lex Talionis*, or the law of *Marque* or Reprisals.

[N] *Never suspected of fraud, nor ever supported by force*; Sir W. Courten, and his fellow-adventurers in the East Indies, did not send servants to trade there, with tinsel and trinkets in one hand, and a musket in the other. To push or protect their trade, they had not the aid of soldiers maintained at the public charge, or any legal permission to employ such armed auxiliaries *ad libitum*, even at their own expence. The Letters-Patent which permitted them to make trading voyages to the East Indies, China, Japan, &c. and to make settlements there for future commerce, restrained them from all acts of violence and coercive measures, and made them only more responsible for their behaviour. Their Patent, indeed, though obtained by interest, and attended with expence, was more for ostentation than use; chiefly for the grace of

their undertakings, and at best but in the nature of a testimonial, if happily it could be made intelligible, to say, that the grantees were not, as many traders then were, mere pirates and free-booters.

Nevertheless, with this support only, in appearance sufficiently ample for all the honest purposes of commercial dealing, we are told, that Sir William Courten, in an amicable manner, and at great expence, established factories and store-houses, at Carwar, Cocheen, Maccao and other places on the coast of India; and that he entered at the same time, into a correspondence and agreement with the Viceroy and Governours in those parts, for a *continual trade*.

After the death of Sir William, and the retirement of his son, Lady Katharine Courten, parted with the books and papers of instructions for this well-planned trade, to Maurice Thompson, of London, Merchant, who knew their value; "for he, and others, upon a private account, set forth several ships for trading-voyages to the East Indies, upon the same foundations laid by Sir William; and made returns of ten for one upon those trading voyages, as the said Thompson himself confessed before credible witnesses, still living," in 1679 (15).

Upon this same foundation, originally laid by Sir W. Courten at his own proper cost and charges, it is said, that the first East-India Company erected themselves; and that persevering in their pursuit of the trade which he established, they were soon afterwards confirmed in it by a Charter from O. Cromwell, strengthened after that by Charles II. and since repeatedly renewed with powers and privileges more and more ample.

As the trade of Sir William Courten and his son, was not supported by force, so neither was it ever suspected of fraud or unfairness. This is evident from a fact recorded in the *Vox Veritatis*, &c.

Mr. Browne concludes that tract, with expressing hope, "that the eyes and ears of the Officers and Ministers of State, and justice, would at length be opened for the preservation of his Majesty's honour, and the honour and reputation of the Crown and kingdom, by complying with the humble addresses and proposals of their creditors, for perpetuating the memory of Sir W. Courten, and of Sir P. Pyndar, by erecting their statues in marble, under the piazzas of the Royal Exchange; that of Sir William Courten, at the end of the Barbadoes-walk on the one side; and that of Sir P. Pyndar, at the end of the Turkey-walk on the other side, &c. (16)."

The request and proposals of these public-spirited creditors are equally honourable to the memories of themselves, and those of Sir W. Courten and Sir P. Pyndar. They found, no doubt, good reason to make this patriotic petition, and they had the greatest reason to have expected, that it would have been readily granted. Their petition, it seems, was still depending in 1683; but the King, to whom it was preferred, had more wit than gratitude, was no slave to justice, and never generous. Neither he, nor his favourite companions and Counsellors were very likely to make much account of claims of this nature; and accordingly, he never acceded to their honourable request. The very extraordinary favours which this Prince's father and grandfather had been accustomed to receive from both the Knights, whose memories were thus proposed to have been perpetuated, were probably recollected by their royal heir with reluctance. Certainly he seems not to have been unwilling, that the residue of their wealth should be alienated from its rightful inheritors, and that all remembrance of them in this country should perish for ever.

(15) "A brief narrative and deduction of the several remarkable cases of Sir W. Courten and Sir P. Pyndar, &c. under four principal heads, viz. 1. The discovery and plantation of Barbadoes. 2. Expeditions to East India, China, and Japan. 3. Denial of justice on civil actions depending in Holland and Zealand. 4. Loans and supplies for the service of the crown, upon the collection of fines and compositions out of the Popish recusants estate, &c. Recollected out of the original writings and Records, &c." Lond. 1679. f. p. 3 and 4. N.B. This narrative, which contains twelve pages, besides the title and epistle, was presented to Parliament some time in April that year, 1679, which broke up May 27, and never met till Oct. 1680, when it seems a long printed remonstrance on the same subjects was laid before them, of which, it appears from a quotation, that there was an *Epitome* printed, consisting at least of 21 pages, in 1681. The names of G. Carew, and James Boeve, with ten more, are subscribed to the prefatory epistle of the narrative above-mentioned, dated March, 1678-9. (16) *Vox Veritatis*, &c. 4to. ed. fin. May 29, 1683.

When

for they are stated below with accuracy and fidelity [O], from the statement of a paper which the curious reader may see in the British Museum (1).

(1) MSS. Sloane 3515.

Having

When Mr. Browne expressed himself in the words above-quoted, surely he *believed against hope*, and would soon find, that he had erred in disregarding the admonition which says, "Put not your trust in Princes." This Prince unquestionably knew, full well, that if he had granted the request of their creditors in favour of two such signal benefactors to his family, it would then have become notorious, that he ought to have done a great deal more; but by absolutely doing nothing, and appearing rather inimical than friendly to their descendants, he foresaw, that it might be imagined, he either did not know, or was not sensible, of his having inherited any obligations from their fore-fathers.

Mr. Browne's argument for the erection of marble statues to Sir William Courten and Sir Paul Pyndar, was certainly the worst that he could have made use of in that reign; namely, to furnish Merchants in future times, with extraordinary examples of loyalty, and extraordinary incitements to practise it; meaning by *loyalty*, not a religious reverence for our laws, but a blind devotion to our King.

Now, certainly the examples of Sir W. Courten and Sir Paul Pyndar, properly considered, and to the full extent of their histories, operate very differently, and hold forth very poor encouragement for the sort of loyalty, which Mr. B. perhaps, only in the course of his pleading, recommends. Nevertheless, it seems that the language of Englishmen, has in process of time, become entirely conformable to Browne's unconstitutional idea of loyalty: for, whatever it may have been owing to, there is no unequivocal example to be found of the word *loyalty*, in its primitive and most obvious sense, in the grand Dictionary, that professes to give the true meanings of all our words, and to fix, at least up to its date, the standard of our vernacular language (17).

[O] They are stated below with accuracy, &c.]

Debts incumbent on the Crown	- -	148,216
Claims for damages at Barbadoes	- -	65,000
Ditto on the East-India Company of the Netherlands	- -	151,612
Debts outstanding on civil actions in Holland and Zealand	- -	134,000

£. 498,828

Observations.

The date of the paper from which this list of the principal claims of the Courten-family is transcribed, cannot at present be fixed, some pages being wanting at the beginning, and a leaf or leaves at the end; but it is evident from other papers apparently antecedent, that some of the loans to King James I. and his son, King Charles I. were liquidated; for it is mentioned, more than once, that the debts, said here to be *incumbent on the Crown*, amounted at one time to 200,000*l.* &c. The following entries are taken from the same paper here referred to, and may be, as the transcriber conjectures, particulars of the last gross article in the preceding account, viz. "Debts outstanding on civil actions in Holland and Zealand." But as he does not know what might be the precise value of a guilder at that time, and as the claims on the actions for legacies by Sir Peter Courten and Mr. Moncy are not distinctly specified, he does not pretend to determine, whether the aggregate of the entries given below, do, or do not, correspond with the amount of the gross article, of which they are supposed to be the particulars. The decision of this point is left to people better skilled in this kind of lore, and is of very little consequence in a work of this nature.

Action against the Boudean-family	-	122,000
For monies received in trust for William Courten, Esq; by Jacob Pergens	-	5,500
For money lent by Sir William Courten to Jacob Pergens	- -	3,000
On an attachment in the Bank for 12,000 guilders of D. Goubard	- -	

VOL. IV.

Actions for legacies by Sir Peter Courten and Mr. Moncy, to Sir William Courten, &c. prosecuted by G. Carew, James Bovey, and William Courten, Esq; - - - probably the son of William Courten, Esq; and the subject of the subsequent article.

N. B. The claim of damages on the East-India Company of the Netherlands, was ascertained upon oath in our High Court of Admiralty, and was fixed at the sum of 151,612*l.* by the express decree of Dr. Exton, then Judge of that Court.

May 19, 1665, the King granted Letters of *Marque* or Reprisals to Sir Edmund Turnor and G. Carew, for the forcible recovery of these damages with costs, to continue effectual in law, until the sum of 151,612*l.* with all charges, was received, or a composition between the parties took place. But according to Browne's account, entitled, perhaps not with unexceptionable propriety, *Vox Veritatis*, these Letters, &c. originally intended for the benefit of the sufferers, had not, in 1683, been productive of any reparation, but proved indeed a stone, instead of bread, and for fish, a serpent. It does not appear at what time Carew [who seems to have got into the agency for the aggrieved creditors of Sir W. Courten and Sir P. Pyndar, rather to serve his own ends, than to have been their chosen and faithful constituent] relinquished these worse than useless Letters, &c. or whether he ever surrendered them. The latter end of this intermeddling man is at present involved in obscurity. Indeed, but that some account of him seemed necessary to explain the intricate history of this article, he might as well have passed unheeded into utter oblivion.

The claims of damages at Barbadoes, in consequence of the forcible entries of the Earl of Carlisle's agents, stated here at 65,000*l.* were not, it seems, prosecuted by any legal contention with that Lord, or his heirs, but only by importunate applications to the Crown, grounded on Sir William's having incurred the loss above-mentioned, in discovering, planting, and fortifying Barbadoes, on the faith of the King's Letters Patents under the Broad Seal of the kingdom. It was proposed that, on an exact survey, a quit rent, at so much an acre, should be granted in compensation for Sir W. Courten's right of prior occupancy, and his expenditures in 1626, 1627, and 1628; or that in lieu of such a quit-rent, four and an half *per cent.* on the growth of the island, should be appropriated, one moiety for the benefit of the Knight's grand-child, and heirs, for ever; the other moiety to belong to his creditors, apparently too, for ever, no mention being made of the expiration of their title, on the liquidation of their claims. Whether the overture was fair, or insidious, it seems to have been unsuccessful: at least, in 1683, it does not appear that any thing was granted from the crown, on the idea of indemnification upon this score, either to the grand-child, or creditors of Sir William Courten, or to George Carew, who on no very promising speculation, by his own confession, seems to have stripped himself of decent raiment to get arrayed in wealth, by the shameful purchase of cheap claims, amplified, with interest, on a reduced family, and an impoverished estate (18).

As to the out-standing claims on civil actions, in the Netherlands, stated in this account at 134,000*l.* it seems, that even in 1683, justice was still positively denied to Englishmen, who had suits for recovery of debts depending at law, in any of the Courts of Holland and Zealand. The Dutch pretended, in spite of sense and reason, that they were universally discharged from all claims whatsoever of Englishmen, by an express article in the Treaty of Breda. For any thing that appears at present to the contrary, their Magistrates persevered to the last

Having now paid that tribute which seemed to be deservedly due in a work of this nature, to several of our countrymen, who, in the age in which they lived, were conspicuously eminent and very meritorious in the mercantile line; it still remains to give some account of the last of their name, a man of a contemplative cast, much esteemed and beloved in private life, in habits of intimacy and friendship with scholars in the first ranks of literature in his time, who was himself well versed in sundry branches of science, particularly in Natural History, and who appears to have been the principal collector of the coins and natural curiosities now in the British Museum, as the reader will find from the perusal of the following article.] C. N.

[**COURTEN (WILLIAM), was the last in the male line of the family, to whose merits it was meant to do justice in the preceding article; the writer of which, wished to have given here a better account of this Gentleman, than he now finds it possible to give.

The following well-authenticated memorials, however imperfect, may still be better than a chasm in this alphabetical place for his name, in the Biographia Britannica. They are given, however, with diffidence *pro re natâ*, and not under the notion of any thing entitled, to be considered as a regular life of William Courten, Esq. Many papers written by him, or relative to him, in the British Museum, have been consulted and considered: but after the pains that have been taken, after all that may be found in that rich repository, probably, there may still be a want of sufficient materials for a chronological and satisfactory narrative of this Gentleman's life.

It was but lately, that the present writer became certain of what he had long suspected, though it was not known or attended to before, that the subject of this article soon after he became of age, dropt his family name, and assumed another, which he afterwards retained, as is now well known, to the end of his life.

The certainty of this discovery, which this writer had hinted before, in another work, led him to new sources of information in abundance; from which much was expected, and but little procured. Every book, letter, or scrap of paper, that could be found in the Museum, under this new name, or in the same, or any very similar hand-writing, on the strictest search of the obliging officers in that establishment, has been carefully examined, and entries were made of every thing thought worthy of notice in them, in provision for something of this kind.

If new information can fill up the outlines here given, or supply deficiencies, or correct any mistake, the subsequent life of Sir Hans Sloane will furnish an occasion, which may be taken, to make this account less imperfect: for almost every thing relative to the person spoken of here, may be introduced there, with equal pertinence and propriety.

WILLIAM COURTEN, the fourth and last of his family who had both these names, was born in the parish of Fan-Church, in London, March 28, 1642, and baptized on the 31st of the same month, as appears by an extract from the register of christenings in that parish given below [P].

He had probably no knowledge, or remembrance of his father, who, as has been said, the next year after his son was born, in 1643, became insolvent, and quitted this kingdom, to which, it does not appear that he ever returned. When he died at Florence, in 1655, the subject of this article was about thirteen years of age, and it is most likely, that his mother did not survive her husband above four or five years; for as no mention is made of Lady Katharine in 1660, when Mr. Carew obtained Letters of Administration to the estates of the Courten family, it is probable she was then dead. In a petition to Parliament, a rough draught of which is in the British Museum, undated indeed, but certainly presented by William Courten very soon after he came of age, there is a like ground for the same supposition, no mention being made of his mother; for it is only said there, that

in this curious and commodious explication of the article, and boldly avowed an evil principle, in justification of an immoral practice. Charles II. unquestionably acquiesced in this Dutch interpretation of the Treaty, and with memorable forgetfulness of the superabundant obligations of his family to Sir William Courten and Sir Paul Pyndar, urged his Lawyers, &c. to counter-act and disannul the Letters of Reprials, which shame and justice had wrested from him, in behalf of the heirs of two *signal* LOYALISTS, whose subsequent fate and family-history deserve to be thus minutely recorded, for the instruction of their rich successors in future times.

[P] *An extract from the register of christenings in that parish given below.* What follows, is a faithful transcript of a paper in the hand-writing of William Courten, Esq; junior, the subject of this article, excepting only the certificate signed, THO. WEBSTER.

Memorandum concerning my age, and when Carew took Letters of Administration to Sir William Courten.

The 28th of March was my birth-day, and I was baptized March 31, 1642.

1642	1694	1642	1668	31 March.
1694	1642	20	1642	31 March.
8	52		26	

" I read, on the 17th of Jan. 1662, in the Register-book of christenings and burials of the parish of Fan-church, London, now in the custody of Richard Powell, Clerk of the said parish, among others William Courteen, the son of Mr. William Courteen, was baptized March 31, 1642.

" [Signed] THO. WEBSTER."

he

he the petitioner, and his only sister, had been left for *many years*, destitute of a *livelihood*. If Lady Katharine had been then living, as she had most probably a jointure competent to her birth and rank, which her husband's creditors could not affect, her children could hardly have been "destitute of a livelihood for many years." The paper mentioned below [Q], though not a proof, favours the presumption, that Lady Katharine was dead at the time of its date.

Attempts have been made in vain, to investigate his education, and discover the instructors of his early age in literature, and morals. No name of any of them has been found; but the after-character of their pupil, both as a scholar, and as a gentleman, which prompted the curiosity about them, is a creditable testimony to their abilities and integrity. We are told in a paper, written by Sir Hans Sloane, that William Courten, *junior*, from his earliest years, "did not regard the pomp or vanities of the world, but gave himself up to the contemplation of the works of God, whose infinite power, wisdom, and providence, he saw and admired, in the creation and preservation of all things." Revolted it seems, from his childhood, at the complicated misfortunes of his immediate ancestors, this last male of the family, contracted probably an irreconcilable dislike to mercantile business, in which they had embarked so extensively, and by which his grandfather certainly had, at one time in his life, amassed and realized an immense fortune, as evidently appears from what has been related in the foregoing article.

It is said on the same respectable testimony, and in the same paper above-mentioned, that "William Courten was well-educated in this kingdom, *before* he travelled." The word in Italics used by Sir H. Sloane, justifies the supposition, that William Courten had little knowledge or remembrance of his father, who sold outright before he left this kingdom, "the great bulk of Sir William Courten's lands, those in Worcester and Gloucestershires excepted [R], to William Purpoint, Esq; Daniel Harvey, the Earl of Kent, and others (m)."

(m) *Vox Veritatis*, &c. ut supra, p. 39.

It is not said at what time this Gentleman's father sold *the great bulk of Sir William Courten's lands*. If he sold them before his retirement from England, he doubtless, made some provision, for the support of his wife, Lady Katharine, and their children, whom he left behind him. G. Carew, though "one of the assignees of Mr. Courten's lordships, &c." could not have sold outright the estates of the Courten family in Worcester and Gloucestershires, till after he became administrator in 1660, when this last male-heir was about eighteen years of age. It is therefore credible, that till that age at least, there were abundant means for his most liberal education, in the jointure of his mother, in what was entailed on himself, and the still unsequestered estates of the family.

Even the wrecks of a fortune once so ample, must have been very considerable, and more than sufficient for the properest education, and decent maintenance of William Courten and his sister. She it seems could very well live in those days, on no more income as appears, than 30*l. per annum*. That this moderate annual sum was her principal support, we are led to believe from a slight attention to two papers which we have seen. If he and his sister had even been more reduced in point of income, than we can well suppose, they still had infallible resources in the number, rank, and riches of their relations. Their grandfather, the Earl of Bridgewater, two uncles, with eleven aunts on the side of their mother, and three aunts on their father's side, were people of fortune and distinction; many of them married into honourable and wealthy families, and all of them apparently in affluent or

[Q] *The paper mentioned below.* A formal agreement of Lady Dame Knightly, daughter of Sir W. Courten, so far as it concerns her, to the suit of William Courten her nephew, to get Carew's Letters of Administration cancelled, consenting that her nephew prosecute the suit to get the said Letters repealed. Dated June 25, 1663, and signed,

ANN KNIGHTLY (19).

[R] *Those in Worcester and Gloucestershires excepted.* It seems that the Courten-estates in these two counties, came into the hands of "Assignees of Mr. Courten's lordships and lands," but when, or by whom these assignees were appointed does not appear. T. Browne says, that G. Carew was one of the assignees of Mr. Courten's lordships, &c. in Worcester and Gloucestershires, and he gives the following, it may be imperfect, account of them. "Pyrton, Aunton, Evesham, Severnstock, Upperwell and Lowerwell, formerly granted for counter-security to Sir Edward Littleton, against debts for which that Knight stood obliged; but pre-engaged for great sums of money to Gyles Carter, Esq; Mr. Daniel Harvey, Mr. John Rushout, Merchants, and others." G. Carew sold the reversions and

equities of redemption of Pyrton and Severnstock, to Thomas, Lord Coventry, for 8700*l.* of Evesham, to Mr. William Rudge, Merchant, for 7500*l.* of Aunton, to Thomas Foley, Esq; for 3800*l.* He sold Upperwell and other lands in the mortgage, to Sir James Rushout for 300*l.* He sold Lowerwell to Sir Robert Atkinson, for 1600*l.* "The monies were disposed of according to several Deeds of Trust. William Courten, the grand-child and heir, joined in the fines and conveyances to Lord Coventry, Mr. Rudge, and Mr. Foley; but Sir Robert Atkyns, and Sir James Rushout, refusing to comply with the said heir, hold their estates under the first assignees (20)."

The various purchases made by Sir William Courten in Worcestershire, may be seen in Dr. Nash's History of that county (21); who mistakes in supposing the Courtens to be strangers to this kingdom, though they were so in that county. Of Sir William in particular, Dr. Nash observes, from Habington's MSS. "Our Knight was so famed for his modesty, bounty, and charity, to his tenants and neighbours, as is scarce to be met with in those new men who purchase Gentlemen out of their ancient habitations and manors."

easy

(19) MSS. Sloane. 3515.

(20) *Vox Veritatis*, &c. *Ibid.*

(21) Vol. i. p. 411, 452. vol. ii. p. 76, 257, 286.

easy circumstances. It might therefore have been reasonably concluded, that William Courten was well educated, even if it had not been ascertained on the foregoing testimony.

After a previous good education in this country, forwarded probably with peculiar care, and earlier certainly than is now usual, William Courten began his travels, or was sent, whilst yet a minor, to prosecute his studies abroad. The genius of a naturalist, which he discovered, it seems, from his infancy, led him to cultivate it at Montpellier, distinguished then, as Upsal since, for its Botanical Garden, its peculiar attention to Natural History, and the abilities and celebrity of masters in various branches of this science.

Here he met, as might probably be expected, with students of a congenial taste, and persons then and afterwards eminent in various walks of literature, with several of whom he appears to have lived in great familiarity, and to have cultivated long correspondence. *Joseph Pitton de TOURNEFORT*, the celebrated French Botanist, was of this number. William Courten, who was the senior by several years, had, no doubt, made a very considerable proficiency in Botany, before his acquaintance with this illustrious foreigner commenced; but it must have been much improved by the intimacy that appears to have subsisted between them.

It was at Montpellier probably, but many years after his primary settlement there, that William Courten contracted his first acquaintance with Sir Hans Sloane, a zealous naturalist, who spared no pains or expence in the acquisition and promotion of knowledge in Natural History, and who was yet more honourably distinguished, by his skill in his own profession, his general patronage of scholars, his public spirit, and extensive philanthropy. Sir Hans Sloane unquestionably spent a considerable time at Montpellier, it may be, both to improve his knowledge, and to establish his health; and here too it is said, he got his degree of M.D. But at what place, or at what time soever their acquaintance began, being forwarded by a similarity of studies, in which William Courten had unquestionably the preheminance, it ripened into a friendship, that, as will appear in the sequel, continued, without interruption, to the end of his life. He was at Montpellier, and still a minor, when the administration of the estates of his father and grandfather was legally vested in G. Carew, Esq; of whom so much has been said in the preceding article. Even at this period, in 1660, when the remaining mortgages and lands of the Courten-family were fore-closed, or sold outright, certainly William Courten and his sister were not stript of every thing, so as to be left entirely dependent on the generosity of their many honourable and opulent relations, for the mere necessaries, or even the common comforts of life.

William Courten had a manor or manors entailed upon him, which it was thought most prudent to sell and convert into personal estate. His sister Katharine had, no doubt, some patrimony, of which the creditors, or their officious administrator, could not deprive her. The *deeds of trust* before mentioned, intimate some settlements on the heirs of the family; and, moreover, it is not very likely, that William Courten would have joined, as has been said, in the fines and conveyances to Lord Coventry, Mr. Rudge and Mr. Foley, idly, and for nothing.

Whatever, therefore, the forms of law, and the common phraseology in an application to the Throne might require to be said, yet what we read in a petition presented to the King, by William Courten in 1663, probably was not true, and certainly is not credible, *viz.* that he, the petitioner, and his sister, had actually been *for many years destitute of a livelihood*.

Immediately on the expiration of his minority, William Courten, it seems, left Montpellier for some time, being obliged to repair to London, by the exigency of his own and his sister's affairs, in order to push their final settlement, and to secure to himself and her, the best provisions for the future, that could be collected from the wide-spread ruins of their family.

With a turn of mind that biassed him strongly to a contemplative life, unexperienced in the ways of the world, torn from darling studies, and under the influence of the indolent habits of a mere scholar, this youth was ill-qualified to be a principal agent for himself and his sister in a business so perplexed, so laborious and so unpromising. There is little room for wonder, or for censure, if in such a labyrinth William Courten did not always see clearly, or keep constantly the right way.

We have, however, an honourable testimony for his integrity and Christian character, in the hand-writing of Sir Hans Sloane, unquestionably a competent and a creditable witness. But, possibly, with the best dispositions and principles imaginable, circumstanced as he was, this young Gentleman might be led to concur in measures, of which, from our ignorance of particulars, or an inattention to them, we may now doubt about the rectitude, or the propriety.

It is indeed evident, that he acted but a subordinate part, for which only he was qualified, and that he relied entirely on the guidance of his counsellors and relations, who seem to have exerted themselves in his service throughout, with zeal, friendship, and ability; and to have effectually protected him and his sister, from being essentially injured by G. Carew, Esq.

Soon after his arrival in England, in concert with his friends, William Courten, Esq; began his litigations in behalf of himself and his sister. The first object he aimed at, was to

to set aside the letters that, in his absence and minority, Carew had *surreptitiously* obtained; and to get himself legally invested with the administration of the estates and effects of his ancestors. He contended that G. Carew was an officious intruder, under false pretences of being a sufferer, and an agent for other sufferers by the losses of his father and grandfather; and urged that this man's intermeddling with the wrecks of their fortunes had been equally to the prejudice of the rightful heirs, and to the detriment of the legal creditors of the family. He claimed therefore for himself, as his natural right, the administration of the Courten-estates; and his aunt Lady Knightly, who seems to have been then the only surviving child of Sir William, from whom the estates descended, concurred with her nephew, as has been said, in this claim.

G. Carew, who was both a courtier and a lawyer, seems to have exerted his utmost address and professional skill to stop, or frustrate these proceedings. He expressly owns, in one of his papers, that he had indeed paid *indefinite* sums of money to William Courten Esq; *after he came of age*, though he says, at the same time, that he did not pay the monies because William Courten had a right to them, but solely to prevent and terminate debates. The causes here assigned for the payments to William Courten, Esq; *after he came of age*, are very questionable; for Carew does not appear a man likely to have parted with money on such principles, merely *to prevent or terminate debates*. Whatever sums he paid with the views he pretends, were all totally lost to him; for they did not then answer the purposes which they were the most promising means to have accomplished.

Mr. Courten still persisted in his favourite study of Natural History [S]; but he persevered notwithstanding, in the various processes instituted in behalf of himself and his sister. He preferred and prosecuted his application and petitions for redress of their grievances; probably to the Court of Chancery, certainly to the Prerogative Court, to the Committee of Parliament, and to the Throne itself.

In the British Museum, there is the rough draught of an undated petition of William Courten to the honourable Committee of Parliament, for redress of grievances in foreign trade. In this unfinished instrument, the injuries done to his ancestors are stated in strong terms, at 200,000*l.* with an account of particulars proved, it is said, upon oath, in the Court of Admiralty. These injuries, and the consequential claims they gave rise to, have been treated of *satis superque*, in the preceding article. It is therefore sufficient here, to mention only one circumstance relative to the affair of Barbadoes, omitted in the foregoing account. It is this, that from the time this violent injury was done to Sir W. Courten by the Earl of Carlisle, for thirteen successive years, there was no Parliament to apply to for redress: during the Protectorate, the feeble remonstrances of the Courten-family, so obnoxious to the powers then in being, were disregarded; and when its solicitors had good ground for better hopes, their solicitations were still rejected by the superior influence of those who were in possession of the lawless plunder they reclaimed.

Along with the instrument above-mentioned, there is in the same place, the petition of W. Courten, Esq; to the King, dated in 1663; in which the petitioner complains, as has been said, of G. Carew; claims the administration of the Courten-estates for himself; states the debts due to him for money lent to his Majesty's father, and the reparations and claims due to his family in every way, *ut supra*. W. Courten concludes with an earnest request, that the consideration of his petition, *in toto*, might be referred to his Majesty's Attorney-General.

It appears from other papers in the same repository, that his Majesty did actually deign to refer this petition to his Attorney-General, then Sir Jeffery Palmer, who, after consulting with Sir William Mericke, at that time Judge of the Prerogative-Court, and answering two questions stated by Sir William Mericke in writing, gave in his report, warranting the revocation of the Letters granted to G. Carew, and the grant of the administration to W. Courten, Esq. The curious may see the questions and answers alluded to in the British Museum, and the report itself, which is an original paper, and has the autograph signature of J. PALMER.

There is, *ibidem*, a letter signed Richard Dowdewell, dated Sept. 11, 1663, and directed "To his honourable friend William Courten, Esq; at Fawsley-Lodge, to be left at the Post-House in Daintrye, to be conveyed." This letter mentions some proposals of Mr. Carew, from the consideration of which, [says the letter-writer, R. D.] "I infer that the Squire has lost his wits, and as for his honesty, if ever he had any, it has quitted him long ago."

Sir Jeffery Palmer's Reports seems to have restored the Squire to his wits, and to have produced more reasonable proposals, which, for want of better, were probably accepted;

[S] *Study of Natural History.*] There are many MSS. of William Courten, Esq; preserved in the British Museum, apparently written about this time. One or two of his common place-books have the name of William Courten upon them, written by himself, and with the date 1663: they contain, as most of his papers do, evidences of his having been an inquisitive, able Naturalist, and well-skilled in coins and antiquities.

They abound with observations on animals, vegetables and minerals, and with hints and directions for the preservation of natural productions, generally very curious, frequently, as this writer believes, original, but sometimes, and not seldom noted from his reading, and it may be from oral information, for his own particular use.

for it does not appear, either that W. Courten, Esq; took out Letters of Administration, as he now might have done; or that the Letters of Administration, which had been granted to Mr. Carew, were ever actually revoked.

It seems, indeed, that about this time, or not very long after, some compromise took place between William Courten, Esq; and G. Carew; but it is evident from a letter in the British Museum, that all matters were not entirely adjusted between them, or even likely to be finally settled in August 1684. The terms and stipulations of their partial and temporary agreement, this writer has not been able to collect with circumstantial certainty, from any thing he has yet seen; he suspects the conditions were industriously kept as private as possible, and supposes there were prudential and valid reasons for this concealment. The circumstances that incline him to think so, will presently disclose themselves; nor is there any thing in them, or indeed in any thing clearly visible, in the conduct or conclusion of his negotiations with Carew, so far as we know of them at present, to warrant our thinking unfavourably of Mr. Courten's character.

A rough draught of an undated bond is preserved in the British Museum, from which it appears, that Mr. Courten gave up all claim to the administration of the estates of his father and grandfather, in favour of G. Carew of Gray's-Inn, for valuable considerations not specified. If Carew moreover indemnified Mr. Courten against all molestation and lawsuits from the creditors of his ancestors, on the score of his descent, it was manifestly prudent in both parties to conceal as much as they could, their agreement, and all its conditions. Nevertheless it is said expressly, that Mr. Courten was sued, summoned into Chancery, and even arrested, by some or other of the creditors of his father and grandfather. We are likewise told that in all these cases, he pleaded that he was not the executor of his father or grandfather, nor the administrator of their estates and effects, from which he said he now claimed nothing. He added, moreover, that whatever he had received from the wrecks of their fortunes, was *ex dono et gratia*, and not *ex jure*; and declared openly, that he did not demand any thing *ex additione hereditatis*, as heir to his father or grandfather. He even relinquished his family name of COURTEN, assumed that of WILLIAM CHARLETON [T], and publicly announced his intention of quitting England, and living in a strange land.

There being no dates to direct the regular entry of the last-mentioned circumstances, it may be, they are not introduced here in the order they happened. It is a matter of little consequence, as the irregularity, if there be any, can only relate to the later part of a period of about seven years, from 1663 to 1670, which seems to include the whole duration of William Courten's residence in England, after his first return from Montpellier. It appears, from a preceding note, that he lived with his aunt, Lady Knightly, at Fawley-Lodge, in Northamptonshire, for the most part of the time (p), and that he was *beyond*

(q) Letter signed P.S. dated 1684. Note [D].

sea about Jan. 1670(q). Some time or other, more or less advanced in the course of the seven years specified, certainly William Courten, Esq; formed his plan of life, dropt his litigation with Carew, got things in a train for final settlement, and secured the best means he could stipulate for his own and his sister's future livelihood.

Now with whatever prudence or privacy the arrangement was settled, out-standing creditors must know, that the grandson of the family could legally enter on the administration of the estates of his ancestors, and conclude, from his deferring to administer, that he had compounded with Carew, the former administrator, and received something very considerable to induce him to relinquish his rightful claims, and all his own, and his sister's inheritance. Any knowledge, or even suspicion of this kind, was sufficient to bring on, towards the close of the septennial period above-mentioned, the law-suits and vexations that obliged Mr. Courten to make the preceding declarations, and compelled him finally, for peace-sake, to quit the kingdom, to change his name to CHARLETON, and to live abroad as he did for many years (*).

(*) About 14, or 16.

Floyd's prosecution grounded ultimately, as it seems, on a family debt to a Dutchman, of the name of Vanlore, or Vanlere, pursued Mr. Courten, it is said, to *the Land's-End*, about Jan. 1670, continued to go on against him after he was *beyond sea*, and was still likely to put him to more trouble and expence fourteen years after, i. e. in the year 1684, as appears from the letter of his cousin P. S. of that date (r).

(r) Note [D]. *ut supra*.

[T] WILLIAM CHARLETON.] "*M. Guillaume Courten, fut plus connu posterieurement, sous le nom de Charleton, qu'il prit apres avoir perdu un tres beau domaine appartenant à sa famille* (22)." His will is made in his family name of William Courten, but his death is announced in the *Post Angel* for March 1702, 4to. p. 137, in the following words. "March 27, 1702, William Charleton, Esq; of the Middle Temple, eminently known for his fine collection of curiosities, viz. medals, shells, &c. died at the Gravel Pits at Kensington, and has left the foregoing said curiosities to Dr. Sloan." There is likewise an entry of his death, under the name of William

Charleton, on March 17, 1702, in Le Neve's MS. obituary (23). This information was given as a probable conjecture, in a late edition of the *TATLER* with notes, Vol. VI. p. 477. It is now beyond a doubt, and to the proofs of it, already given, unquestionable evidences of his having long borne the name of William Charleton, will occur in the sequel of this article. It is sufficient to know, with certainty, that William Courten actually took this other name, of Charleton; but it is unnecessary here to ascertain, with nicer precision, the occasion, or the time of his taking it.

(22) MSS. Birch. 4241, 410.

(23) Harl. MSS. 3625.

The most dry and unpleasant part of this article the writer would willingly close here; but that it seems necessary to say something farther on this head, to obviate a very serious objection to Mr. Courten's moral character, for which, it does not clearly appear, that there is any real foundation. It is stated by B. S. a writer in the Gentleman's Magazine, who maintains in brief, that every farthing that William Courten, Esq; recovered from Carew, or from the wrecks of the Courten-estates, ought to have been distributed among the creditors of the family;—that Mr. Courten had no right to whatever monies he derived from his inheritance; and that his application of it to his own, or his sister's support, was *ipso facto* an impeachment of his integrity.

The objection deserves consideration the rather, as it is not grounded on a point of law; but on a principle of rectitude, which, like Bayes's simile in the *Rehearsal*, might do very well, if it were but well applied. It seems necessary, therefore, to state the following circumstances, with a view to vindicate Mr. Courten's character from this odious aspersions; and to guard it from injurious misconceptions in future.

In the course of this narrative, it has been said, in the words wherein the relater found his information, that Sir William Courten died *involved in great debt*,—and that his son, overpowered with his father's debts and his own, and with large sums at interest, &c. withdrew from the Administration, and left this kingdom *insolvent*. Merchants, properly so called, and many others of respectable professions, when very extensively concerned in trade, may, however, be *involved in great debt*, *insolvent*, even *bankrupts* [U], and yet be in a condition to pay twenty shillings in the pound; and to make, after all, decent and ample provision for their families.

There was no bankruptcy in the Courten-family; yet from a peculiarity of circumstances, which it is not requisite to mention, this appears to have been eminently the case of Sir William Courten's affairs, when he died *very deeply in debt*; and of his son's too, at the very time of his *insolvency*, but much more at the period we are now come to, twenty, or it may be more years after his death.

The accounts of the family, both on the debtor and creditor side, are unquestionably incomplete, and by no means before us in such an accurate state, as that we can speak or reason upon them with arithmetical exactness; but still we know enough of them otherwise to support the following apparently conclusive arguments.

G. Carew had certainly all the knowledge that we want of the affairs of the Courten-family; he had been long employed in them both at home and abroad; he had balanced, no doubt, the debtor and creditor sides of their accounts; and as he was a man of equal perspicacity and industry, certainly in a business wherein he embarked so deeply, it may well be supposed that he knew perfectly what he was doing. Surely he was no fool, and would not have taken the trouble, or paid the price he did for the administration of the Courten-estates, but with, I say not a probable; but a certain prospect of very ample recompensation. Now if this administration was an object well worthy of all the trouble and cost that G. Carew expended upon it, there can be no doubt but that it would have been equally advantageous, and more beneficial to Mr. Courten. It seems therefore highly reasonable to conclude, not only on the face of the general accounts, but more especially from the drift of Carew's conduct, and his unremitted perseverance in the pursuit, that the debts due to the Courten-family greatly exceeded the debts payable by it, and to a very large amount.

To the partial statement of 498,828*l.* on the creditor-side, well ascertained, and in very many particulars upon oath, which by no means included the whole of what was due to the family, it seems difficult, indeed impossible, to find debts equally well authenticated, of half the sum, to oppose upon the debtor-side. If justice then had been done, [and we go on principles of rectitude] if the debts on both sides had been liquidated, *in toto*, or by composition, the vast overplus must assuredly have been the whole and sole property of William Courten Esq; and his sister. He and she, therefore, were creditors, in appearance the principal creditors on the estates of the Courten-family.

Besides, the debts of the many creditors of this family in Holland and Zealand were settled, it seems, and paid by the Treaty of Breda; for if by this treaty, no debts antecedent to it were afterwards to be paid to British subjects over all the dominions of the States, certainly no antecedent debts need be paid to Dutchmen in any of all the territories of Britain.

It is, indeed, obvious to remark, that on this principle, the Courten-family cleared with Vanlore, and their relatives of the Cromling-family, and thereby gained something considerable, though they still lost vastly more. But this loss, Mr. Courten and his sister were well-entitled to have made up to them, by the community which enjoyed the blessings of this treaty, and which, doubtless, owed full reparation to the individual sufferers, at whose great

[U] *Even bankrupts.* This has not uncommonly happened even in more recent times; and may be exemplified in the case of Mr. Knapton, the famous bookseller, who, with the utmost integrity, and with a surplus of many thousand pounds, submitted to

become a bankrupt, as the readiest mode of collecting his out-standing debts, in order to pay the demands of all his creditors, and to retire on an affluent independence.

expence the beneficial treaty had been obtained. And if the King and his Council on this occasion had driven a hard bargain for the public, still the public must abide by the loss, and no reason could be assigned why two innocent orphans, against whom nothing was alledged, or pretended, should be plundered of their property, and left to starve, by the act of the Sovereign, or of his negociators, who, by assuming a power of giving what was not theirs to give, recognized the right of the proprietors to come upon them for damages and reparation.

William Courten, Esq; claimed, moreover, as his right, the administration of his father's and grandfather's estates; and a great Crown-lawyer honestly admitted the right, and vouched for the legality of his claim, in direct contravention to a prior royal grant.

Sir Jeffery Palmer's determination put the administration in Mr. Courten's power, but left it at his option; nor was he by any means obliged to administer, contrary to the dictates of prudence, the advice of his friends, or his own inclination. Had Mr. Courten actually engaged in the administration, there is no ground to doubt, but that, if justice had been done to him, he would have done ample justice to the creditors, and would have had in the end, an abundant provision for himself and his sister.

Circumstanced as Mr. Courten was, he probably acted in the best, as well as in the most cautious manner possible. The estates on which he was to enter, might have been injured irreparably, by the preceding administrator he was about to supersede. He might have been over-awed by the apprehended embarrassments, and threatened opposition of this artful man. He might have thought it more difficult and more expensive, than it was in reality, to get equal justice done to himself, and to do equal justice to the creditors; and have been more apprehensive of the final issue than he had good cause to be. He might commiserate the condition of the creditors, and despise and detest the character of the man whom the king had appointed administrator, and agent for them.

Nevertheless, if terrified at the prospect of an office so troublesome and so perilous, or smitten with the love of a studious and quiet life, he chose rather to give up greater but more precarious advantages, for a lesser but more certain provision; and if his sister likewise consented to the composition, what indeed was to hinder him from compounding with Carew, for all his own and her claims. Whatever right he, or his sister had, or might be supposed to have in reversion, with her previous consent, he was certainly free to transfer. He might do, as some creditors had done before him, as others probably did after him. In treating with Carew, who was the legal administrator, if he himself declined to become so, he had to deal with a man, who parted, it seems, with a decent livelihood, to make himself rich in this disreputable way, and who was likelier to give him less than an equivalent, than more than enough.

If, because "he was faint," or constrained by dire necessity, he sold his own and her birth-right for a mess of pottage, Was he not to eat it? Was the poor pittance he got, after all, not his own? Might he not honestly retire with it wherever he pleased? Sharing it, as they could agree, with his sister, which he appears to have done to the end of her life. Surely, all things considered, there is more call here for sympathy, than for censure; for commiseration, than for reproach.

In a word, the present writer, after a revival, cannot see that there is any thing in the *long account* that B. S. refers to, in the *longer account* given here, or in any account he has ever seen, that really militates against Mr. Courten's integrity in the way surmised, or that invalidates the ample and repeated testimony under the hand of Sir Hans Sloane, corroborated beyond all suspicion, and much to Mr. Courten's honour, as will appear in the sequel, by the cordial friendship of John Locke, one of the greatest and best of men, eminent alike as a philosopher, and as a christian.

Indeed, to this writer, the composition with Carew, for what he could get, and his easy relinquishment of the administration to a man of the world, whose keenness and conduct argue its value, appear to be strong and unsuspicious evidences of Mr. Courten's integrity.

Having thus, with difficulty, in the course of several of the best years of his life, collected, from the remains of his fore-fathers opulence, some future provision for himself and his sister, and it may be, an ample sufficiency for all the wants of a scholar, whose humble walk he chose, Mr. Courten entirely withdrew from active life, in which he apparently engaged with reluctance, and indeed, from necessity. Contented with the little he got, he retired to indulge his contemplative disposition, and declined the very probable prospects of bettering his circumstances, which his extensive and honourable connections held forth, if he would have taken to any learned profession or lucrative employment.

In the British Museum, over a door in the second shell-room, there is a fine portrait of William Courten Esq; drawn, seemingly, before his leaving England for the second time, about the close of 1669, and certainly by some eminent painter. It was probably at this period of his life, that "he travelled [as Sir Hans Sloane informs us] over most parts of Europe, studying the languages, observing the customs and manners of its inhabitants, and purchasing every where, whatever he could get curious in nature or art."

Of the course, or duration of his travels, the present writer can give no particular information. It may be reasonably judged, that after a peregrination of three or four years, at most, he settled in his former place of abode, at Montpellier, where he certainly resided for the greatest part of the time that he lived abroad. Sir Hans Sloane says, expressly, that he was absent from England, at different times no doubt, twenty-five years in all; and though the particular years are not stated, it would not be very difficult, if it was of any importance, to ascertain them.

Mr. Courten seems all along to have paid great and general attention to polite literature. His papers and place-books, many of which are preserved in the British Museum, discover various, judicious, and extensive reading; and his own frequent remarks shew, that he thought as well as read.

About this time he seems to have been much engaged in the study of coins, both ancient and modern. In this entertaining and useful, but expensive branch of knowledge, he certainly made great proficiency, and attained at last extraordinary skill.

It appears from one of his pocket-books, referred to in the margin (s), that in 1669, he began to collect coins, in both kinds, and in all metals, at considerable expence. There is no doubt but that his collection in this way became ultimately ample, well-selected, and very valuable; but there is now no possibility of ascertaining its extent, its merit, or its value; for it certainly appears, that he not only exchanged his duplicates, as all collectors do, but that he very frequently sold, as well as bought, and bought for others, as well as for himself. From several of his priced catalogues in the British Museum, latterly very accurate, and entirely in the manner of a master in the science, the present writer is inclined to think, that very many, perhaps most of the coins in that repository, might be traced to their original purchaser and prices. The whole catalogue of coins gathered in Spain, and purchased by Sir Hans Sloane (t), those presented by John Lee Esq; and all donations of this kind posterior to the death of Mr. Courten, are obviously out of the question. It ought likewise to be mentioned here, as it is upon good authority, that the original coins purchased by the public, told several hundreds above a thousand, short of Sir Hans Sloane's inventory delivered to Parliament.

(s) MSS. Sloane
3988.
Plut. xxxi. c.

(t) MSS. Sloane
2824.

Certainly Mr. Courten, on his return to England, about fourteen years after the time we are now speaking of, was looked up to here, and apparently with justice, as a person of superior skill in medallic science, wherein no man, who is not a good scholar, can ever arrive at any great degree of eminence. This very desirable literary accomplishment, at times perhaps, may have been over-rated by some of the few who have been too lavish of their time, ingenuity, and expence, in the acquisition. It has oftner been undervalued, like the grapes in the fable, and treated by the illiterate, with a Gothic ridicule, manifesting a kindred disposition and an absurd vanity, similar to that which Diogenes manifested, in trampling with insolence, on the cloak of Plato.

It is now well known, that the best and most elegant writers of antiquity, cannot be read with just understanding and true taste, without good maps. Genuine coins are serviceable in the same, and in very many other respects. As they might be so very advantageously employed in the course of our early instruction in classical literature, the means of that part of our education are manifestly defective, where a good cabinet of coins, or the best books that represent and explain them are wanting, or not brought into common use. Unquestionably, after all that can be said to depreciate this kind of knowledge, it must still be held in considerable estimation, and very deservedly, by all who are desirous to know with certainty, the history, chronology, geography, arts, manners, customs, and notions, both civil and religious, of ancient times, which these compendious and indubitable monuments do, in so many pleasing and useful ways, contribute to illustrate, to rectify, and to establish in truth, or verisimilitude.

Mr. Courten's superior skill in this science, a hand-maid to so many other arts and sciences, is well ascertained, by his catalogues of his own coins, by his many papers, and his epistolary correspondence on subjects of this nature, with Sir John Evelyn, the honourable Heneage Finch, and others, but especially with Lord Colrane, his own *elevée* in this science, and a pupil that evidently appears by his proficiency to have done great honour to his master.

The present writer having derived, from a little cabinet of his own, purchased at more expence perhaps than was suitable to his circumstances, a great alleviation of uneasiness, and much elegant enjoyment, distrusts his own judgment in this case, and forbears rather reluctantly, giving any of all the many curious extracts that might have been given from these letters, for fear of being carried farther on a favourite subject, than might be acceptable to the generality of readers. The perusal of the originals in the British Museum, is easily accessible to the curious in this way, who may there freely gratify their curiosity. In the notes taken for this writer's private use, the references have been too often omitted, and he has neglected to mark, particularly, every thing of this kind that has been examined; but some, and perhaps the principal references, are given in the margin (u) to direct the search, and facilitate the enquiries of such as think justly, and as they ought to think, of this kind of knowledge.

(u) MSS. Sloane.

Plut. 3988,
1828, &c.

It was most probably abroad, and about the year 1675, that Mr. Courten's acquaintance and friendship with the celebrated Mr. John Locke began; for in the summer of that year the bad state of Locke's health, and an apprehended consumption, induced him to repair to Montpellier, then as famous for the cure of diseases of the lungs, as Antycira was of old for those of the brains. For many years past, people have discontinued to resort to Montpellier, when afflicted with pulmonary and consumptive complaints, its air having been long judged peculiarly improper for them; though it is now said to be much mended, by draining a morass, or planting, or destroying a wood. Bishop Atterbury, who was there in the summer 1729, represents it as so uncomfortable, that he was forced to take shelter from the sultry heats, at Vigan in the Cevennes, ten leagues distant.

The unpublished letters of Mr. Locke, to Mr. Courten, &c. given below [X], about ten years after this time, prove the intimacy and dearness that subsisted between them, and which,

[X] Unpublished letters of Mr. Locke, to Mr. Courten, &c. given below.]

Dear Sir, Amst. 12 Aug. —87.

I cannot but take kindly, from Dr. Goodall, any service that he has done you: and he cannot oblige me more than by putting it to my account, which is with great justice done, since there is no thing that more nearly concerns me than your health. When I write to him, I shall acknowledge it, and also recommend it to him as an interest *for* properly mine, that he may assure himself, that if he administers any thing to the recovery of your health, he truly takes care of mine. I have not had time, since the receipt of your letter yesterday, *for* to inform myself as to answer all the particulars of his, *for* as I desire; for which I must beg you to excuse me to him, with the return of my thanks, till I shall be in a condition to do it by an answer to what he demands. In the mean time, pray do me the favour to inform me him, that I remember a friend of mine, one Mr. Charleton, had, by the use of tobacco in snuff, contracted at Montpellier, a continual head-ach; which, upon the forbearing of snuff, left him again: whether this at all concerne your present case, I beseech you consider; and if fashion has prevailed upon you to do yourself harme, to quit it again. I with the more importunity presse this, because I remember, it was with great instance and violence I extorted that pleasure from you, which perhaps forgetfulness has suffered you to return to again. I have already spoke to a friend of mine, to get for you any rarities that he can light on in the East-India fleet, which is now here every day expected. I, the last week, put into the hands of Mr. Smith, a bookseller, *living* at the Prince's Arms in Paul's Church-yard, twenty-six draughts of the inhabitants of several remote parts of the world, especially the East-Indies, they are marked thus, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 24, 25, 26, 27, 28, 29, 30; and the names of them writ on the backside with my hand; those, whose names are not writ, if you know them not, I will get explained here; the Brasilian Canibals [of which there are one or two] are easily known; but since there was not the name of the particular nation from which they were taken, I would not add them myself. For the excellency of the drawing I will not answer, they being *done* by my boy, who hath faithfully enough represented the originals they were copied from, *for* that one may see the habits and complexion of the people, which was the main end they were designed for, and therefore you must excuse them if they be not excellent pieces of painting. I also put into the hands of the said Mr. Smith, a little box, with the seeds and husks of *Fœniculum Sinense*. The husks have a very fine *aromatical* taste, and are used by the Muscovites, to be mixed with their The, as I have been told, which is not, I imagin, the most *sotish* thing they are guilty of. If you think the seeds will grow, and then find to spare, I would be glad you would send two or three of them in my name, to Jacob Bobart, the gardener of the Physick-garden in Oxford, who may endeavour to raise plants from them. He is a very honest fellow, and will not be unwilling to furnish you with any curiosities of that *kinds*. Moreri, I find,

by your *for* often mentioning it, lies heavy upon your hands, not that you are weary of the book; but are impatient till I have it. I tell you truly, if I had a better friend, to whose care to commit it till I return, I should presently ease you of it; but if you cannot be easy in your conscience, till you find it wholly in my possession, I must intreat you yet to have patience till I *betinke* myself how to dispose of it commodiously. You are one of those scrupulous friends that cannot be at rest till you have more than quitted scores, (for so your exact putting them to account, gives me reason to speak) with the kindness of your friends. In this respect, Dr. Guinellon and you are well met; and I, who am of a more loose and careless temper, am pleased to see, that this nice humor has a little perplexed one, or both of you, for I see the Doctor is in pain that he cannot find *Gorlaeus* and the other books you desired. I most earnestly wish your health, and am,

Dear Sir,

Your most humble,
and most obedient servant,

J. LOCKE (24).

(24) MSS.
Sloan. 3962. f.

I was told you promised to enquire of Serjeant Maynard for the *beerbe* which cures the leprosy; give me leave to *aske* whether you have *don* it. It is not fit so useful a thing should be lost.

Directed. "For Mr. William Charleton, to be left with Mr. William Garret, *Merchand* in Lime-street, London."

Dear Sir,

26 Aug. —87.

I lately gave you the trouble of a letter, to let you know, that I had sent you, by Mr. Smith a Bookseller, at the Feathers, in Paul's Church-yard, 26 draughts of the habits of several *forain* [especially Asiatick] people; and also a little box, of the seeds of *Fœniculum Sinense*. What other commands I have from you, in your's of 26 of July, I shall take all the care I can to give you satisfaction in. I herewith send you a letter, and a little manuscript, to Lord Pembroke, which I beg the favour of you to deliver to his own hands, and to send me what answer his Lordship shall please to honour me with. If his Lordship be at Wilton, I beg the favour of you to send the whole packet away by the next post, to Dr. David Thomas at Salisbury, with the letter here inclosed to him. If I make you not an apology for this trouble, 'tis because I know, with what pleasure and *readiness* you oblige your friends, which lays on me the greater obligation to be, as I am,

Dear Sir,

Your most affectionate and
Most humble servant,

J. LOCKE (25).

(25) MSS.
Sloan. 3962.

Directed. "For Mr. William Charleton, to be left at Mr. William Garret's, a *Merchand* in Lime-street, London."

Endorsed in Mr. Courten's hand-writing,

"Copy of mine of the 26 July, in answer to Mr. Locke's of 10th of June."

Dear

which no doubt continued to the end of Mr. Courten's life, for Locke, though his senior about eight years, was the survivor. It appears that Mr. Courten was one of the select friends among whom Locke practised physick, of which he had taken a Bachelor's degree at Oxford. That Locke practised a little, and was exceedingly well qualified for the employment, appears from many circumstances mentioned in his article; and particularly from the following testimony of the celebrated Dr. Sydenham. "You know how much my method has been approved by a person who examined it to the bottom, and who is our common friend: I mean Mr. John Locke, who, if we consider his genius, and penetrating and exact judgment, or the strictness of his morals, has scarce any superior, and few equals now living (x)." That Mr. Courten attended particularly to Locke's prescription, and derived benefit from it, is evident from his answer, and from the following entries in a Saunders's Almanac for 1698, in which there is a MS. Diary, not by Dr. Walter Charleton, as it is entitled in the Museum, and the Catalogue of MSS. but relative solely to Mr. William Courten, being his own hand-writing; which is sufficiently distinguishable, and moreover vouched as his, by the information itself. "July 27, 1698, being distressed with my head-ach and giddiness, I left off entirely taking tobacco in snuff, having only taken it but four times a day, for several days before, and never after 7 at night." Aug. 20, 1698. "Must shew my things, [meaning his Museum] but seldom, never two days consecutively for the future (y)."

(x) Biog. Brit.
Art. LOCKE,
1st. edit. p. 2995.
Note [H].

(y) MSS. Sloane,
4956.

Certainly Mr. Courten cultivated medicinal science with pleasure, avidity, and considerable success: the curious may see the most satisfactory proofs of this at the British Museum, both in the coins he collected, and in the accounts he has given of them. It appears likewise, from very many of his papers in the same repository, that as a general scholar he was far from being contemptible, and that he was not unskilled in making experiments. Some of these papers the curious may easily find in Mr. Ayscough's Catalogue of MSS. but to others of them, not less worthy of notice, as they are loose and unentered, no express references can be given. The only paper of Mr. Courten, which the present writer has ever seen in print, is a translation from an original in Latin, published ten years after the death of its author, in the Philosophical Transactions, at large, Vol. xxvii. page 485, for the months of July, August, and September. The title, and some account of it, the reader may see below [Y].

Mr.

Dear Sir,

July 26, 1687.

"Inclosed, I send you the long expected letter from our worthy friend, Dr. Goodall, for whose extraordinary kindness and civility to me, on your account, I intreat the return of your thanks. It is now near three months, that I have been sorely afflicted with violent and constant pains in my head, accompanied with great giddynesse, insomuch that I was not able to read your letters on the back of a book, placed on a shelf of an ordinary height, without being ready to fall. In this condition the able and compassionate Dr. found me; and after he had taken a very exact account of the circumstances of it, he prescribed me several things in order to my cure; amongst others, a sort of lozenges, by which I found benefit, though he would receive none, it not being in my power to fix one single fee on him, telling me, that perceiving I was so intimate a friend of yours, I should have his advice gratis. I thank God I am somewhat better than I have been, but I fear that I shall scarcely ever be freed from this unhappy distemper. Pray let me know in your next, when I shall send the Moreri's Dictionary, and the other books you formerly mentioned, &c."

The letter concludes with an order for some insects, birds, and animals, from a catalogue of objects of Natural History, apparently on sale about this time at Amsterdam.

Endorsed by Mr. Courten, in his own hand.

"Copy of mine of the 28th Aug. in answer to Mr. Locke's of the 12th and 26th ditto."

Dear Sir,

Aug. 28, 1687.

"I have received both yours of the 12th and 26th instant; and, according to your order, my Lord not being in town, I have sent the let. and MS. into the country. Mr. Smith the Bookseller is not yet arrived; when he comes, I shall enquire of him for the favours you designed me, and send to Mr. Bobart some seeds of the *Feniculum Sinense*. He was recommended to me not long since, by a very good friend, and I gave him a sight of the collection of plants I made at Montpellier, and of the fine extotic ones you were pleased to send me, several of which he had never seen before. I told

Dr. Goodall what you had written relating to his letter; he presents you his service. I am endeavouring to follow your kind and good advice, and have so far prevailed on myself, as to forbear taking tobacco in powder, using, instead of it, cut tobacco: when you are pleased to write, I should be glad to have your opinion about it. I have some few things by me, that if your friend is not already furnished with, I shall take care to send, by the first opportunity: [then follows a list of them too long to insert.]

"When Sir Henry Hobart was in town, he promised to enquire of his father-in-law concerning the herb you mentioned, but I heard not since from him. When he comes again, I shall wait upon him, and put him in mind of it. My humble service to Dr. Guenellon, &c."

It appears from another letter in the same volume of MSS. that Mr. Courten succeeded in propagating the seeds of the *Feniculum Sinense*, and sent some of them to James Bobart, as Locke requested. There is, *ibidem*, a letter from this gardener, to Mr. Courten, accompanied with some African seeds; among which, he recommends, particularly, one under the name of *Cucumis Africanus echinatus*.

[Y] The title, and some account of it, the reader may see below.]

II. Experiments and observations of the effects of several sorts of poisons upon animals, &c. made at Montpellier, in the years 1678, and 1679, by the late William Courten, Esq; communicated by Dr. Hans Sloane, R. S. Secr. Translated from the Latin MS.

Two ounces of the juice of Dutch Nightshade [*Solanum Batavicum*] did a dog no manifest injury; the same dose of the juice of hemlock [*Cicuta*] did not hurt him; nor did he appear to be hurt by a pretty large root of wolfs-bane [*Aconitum Pardalianches*] bruised with the leaves and flowers of the same plant mixed with flesh. Two drachms of white hellebore [*Helleborus albus*] disordered the same dog very much, but he recovered, and afterwards swallowed five roots of meadow-saffron [*Colchicum Ephe-merum*] fresh dug, with which he was violently tormented, but did not die. Two drachms of opium stupified, but did not kill him. He was afterwards caused to be bit three or four times on the belly by

Mr. Courten was evidently a pretty general student, and not ill-versed in most parts of polite literature; but whatever branch, or branches of knowledge, might, more or less, engage his attention occasionally, it manifestly appears, that his *forte*, his principal and favourite study, was always that of Natural History; a most engaging and extensive science, that ministers very copiously to the wants and the pleasures of human life, and furnishes us throughout all the works of nature, with the most delightful demonstrations of the wonderful power, wisdom, and goodness of its all-perfect author.

It has been said, on the respectable testimony of Sir Hans Sloane, that Mr. Courten, "from his earliest years disregarding the pomp and vanities of the world, gave himself up to the contemplation of the works of God, &c." Many papers, in Mr. Courten's hand-writing, appear in aid of the Baronet's testimony; and it seems very certain, that the writer of them prosecuted this inexhaustible science, in all its branches, *con amore*, and with success, to the remotest period of his life, which extended beyond the age of three-score years.

The Catalogues of Mr. Courten's plants, at Montpellier, &c. referred to in the margin (x), afford abundant proofs of his skill in Botany, and may serve, with the assistances of various accidental notices contained in his papers *passim*, to give a tolerable idea of the state, at that time, of the Botanical Garden at Montpellier, then celebrated as the best of the kind in Europe. His friendship with Dr. Sherwood, which lasted to the end of his life, seems to have been grafted, originally, on their common attachment to Botany [Z].

(x) MSS. Sloane 3962. Plut. f.

Mr.

an enraged viper, and would probably have died, if he had not been cupped, scarified, and relieved with *Theriaca*, and volatile spirit of hartshorn, mixed in broth. He was at last killed by another dog. By fifteen grains of the dried root of monks-hood, [*Napellus*] powdered and mixed with flesh and broth, a dog was variously distressed, and miserably tormented for an hour, but recovered by degrees. A little dog, by a drachm of the root of monks-hood [*Napellus*] laboured under the same grievous symptoms, more violently and longer; but he likewise recovered: but an ounce of the leaves, flowers, and seed of the *Napellus*, when green, bruised, and given to a dog, scarce disordered him any more than if he had eaten so much grass.

The stomach and small guts of another dog, killed by the *nux vomica*, were found very red and inflamed by the corrosiveness of the medicine.

A strong lusty dog was, by a warm injection of an ounce of *vinum emeticum*, distressed with a variety of lamentable complaints, circumstantially narrated in the paper, and died convulsed in a few hours, though twice revived with warm broth through a funnel.

A drachm and a half of *sal armoniac*, dissolved in an ounce and a half of water, injected warm into the jugular vein of a dog, convulsed and killed him presently. A whelp, bit in the lower lip by a blind worm [*Cæcilia*] so that the blood appeared in the wound, died the same day. An injection of a drachm of *Salt of Tartar*, dissolved in an ounce of warm water, convulsed and killed a dog almost immediately. A warm injection of an ounce of urine, made by a man fasting, produced no convulsion or other ill symptoms. A gentle decoction of two drachms of white hellebore, well powdered, in spring water, and evaporated to nine drachms and a half, strongly pressed out and injected turbid into the jugular vein of a dog, instantaneously produced convulsive motions, and on its entrance into the heart, killed him as suddenly as if he had been shot dead with a bullet; and he hung flaccid, like a fleece, in the hands of the person who held him.

A whelp stung in the tongue, &c. a pigeon stung likewise by a scorpion, the sting being often forced into the wounds, and the bladder, supposed to contain the venom, being pressed, remained unhurt; so also did a rat, included and stung often by scorpions, in a large glass. The provoked rat attacked the scorpions and gnawed off, and devoured part of them, with the precaution of keeping his eyes shut meanwhile. Several animals were killed by injections of spirit of salt, of spirit of wine, and opium; but an injection of two drachms of sugar, dissolved in an ounce of water, did a dog no harm; and an injection of a drachm and a half of common salt made him only very thirsty, and drink greedily. An injection of half an ounce of warm oil of olives into the crural vein of a little dog, deprived him presently of all external

sense, and killed him in three hours; and the injection of an ounce of the same oil, into the jugular vein of another dog, suffocated him in the same moment.

An injection of ten drachms of highly rectified spirit of wine, into the crural vein of a dog, killed him quietly, and as it were with pleasure, in a very little time. An injection of five ounces of strong white wine, into the crural vein of a dog, made him very drunk; but the drunkenness abated and he recovered.

An injection of three drachms of rectified spirit of wine, into the crural vein of a small dog, made him apoplectic; in a little time he recovered from his apoplexy, but was giddy, and reeled, and drunken; but in four hours he eat bread, and was next day out of danger.

A dog died terribly convulsed from an injection of an ounce of a strong decoction of tobacco; but a similar injection of ten drops of distilled oil of sage, mixed with half a drachm of sugar, did a dog no harm. A drachm of purified white vitriol, injected into the crural vein, killed a dog immediately. Another recovered, with much difficulty, from an injection of fifteen grains of salt of urine; so also did another, from a warm injection of a decoction of senna, in water, to the quantity of two drachms. A mole, stung in the side by a scorpion, died immediately, convulsed; and on dissection, the experimenter discovered that the *intestinum cæcum* is wanting in moles. Next follows, an account of the effects of tying nerves, arteries, &c. in dogs, for which, the curious reader is referred to the paper itself.

[Z] On their common attachment to Botany.]

Extract from a copy of a letter of William Courten, Esq; to Dr. Sherwood, dated Middle Temple, May 11, 1691 (26).

(26) MSS. Sloane 3961. f.

Sir,

"I am ashamed to mention the date of the letter I received from you; but having so favourable an opportunity of writing by Mr. Harison, I could not but own the receipt of it, and assure you, that though I have not had the civility of returning an answer till now, yet I did several times wait upon our friend, in relation to what you desired, and acquainted him, that whatever *kindness* he should express towards you, I should esteem it as done to myself; and he was pleased to say, that he should espouse your concern as if it was his own, &c. &c. My most humble service to Sir Arthur Rawdon, and when you write to Dr. Tournefort, be pleased to give him my service. I *wish* you at our club the other night for an hour or two, to have had a sight of a curious book of plants of the Cape of Good Hope in miniature, presented by the States, to the Bishop of London. There were to the number of forty, and as our chief Botanists said, most of them not described. May you have a pleasant

Mr. Courten's intimacies, correspondencies, and friendships with Doctor, afterwards Sir Hans Sloane, with Doctor, afterwards Sir Tancred Robinson, Physician in Ordinary to George I. with Doctor Martin Lister, with Mr. L. Pluckenett, with Mr. Edward Llwyd, &c. &c. were certainly founded on congenial taste, and argue no contemptible degrees of proficiency in the various branches of Natural History.

Though Mr. Courten was very greatly Sir Hans Sloane's superior in the knowledge of the science here spoken of, as appears from many and various evidences in the British Museum, nevertheless their intimacy seems to have grown from their common affection for Natural History; and their friendship seems to have been cemented and cherished to the last by their persevering ardour as naturalists, and the mutual assistances they lent to each other in similar pursuits. The extracts from Sir Hans Sloane's own letters given below [AA], seem to confirm what has been said; the harshest part of which, the writer well knows, cannot be contested by the ablest officer in the Natural History department of the British Museum.

We can now only guess at the nature of Sir Hans Sloane's great obligations to Mr. Courten; but it seems, by Sir Hans's own account of them, that they were very great in whatever way, fourteen years at least, before the date of Mr. Courten's last will, by which this very worthy Physician was so much more obliged, as shall be shewn in the sequel. In 1687, at his departure from this country for Jamaica, in quality of Physician to the Duke of Albemarle, who went there as Governour, Sir Hans Sloane, under a grateful sense of peculiar obligations to Mr. Courten, purposed, it seems, to collect *natural things* principally for him, and to enrich a collection which his benefactor had been making from his earliest years, and for which, it is not unreasonable to suppose, that there was no inconsiderable foundation in his family before he was born.

However this was, Mr. Courten, about three or four years before the date of Doctor Sloane's first letter, that is, about 1684 [BB], had returned to his native country, where he

'fant season in your intended progresse, and the satisfaction of meeting with whatever may be rare in the parts you visit, &c.'

N.B. Mr. Courten in his last will, left Dr. Sherwood five pounds to buy him a ring.

[AA] The extracts from Sir Hans Sloane's own letters given below.]

Extract of a letter signed H. Sloane, dated from Portsmouth, Sept. 10, 1687, and directed to William Charleton, Esq; at his Chambers over Mr. North's, in Brick Court, Temple.

'I thank God I am come hither very safe. I hope before this you are likewise come safe from Dover with your friends, &c.'—'I hope, for my sake, you will abstain as much from *excesse* in wine, as your too good and complaisant humour will suffer you. You cannot do me a greater favour than to be careful of your own health.' [Then follow particular advices, directions, and prescriptions relative to his health, earnestly recommended to Mr. Courten's observation.] 'I am extremely obliged to you beyond any in the world, and upon all occasions, and in all places, I shall endeavour some manner of requital. I design to send you what I meet with that is curious from the several islands we land at, which will be most of our plantations. Remember me to all friends, not forgetting Mrs. Wood. I am in all sincerity,

'Dear Sir,

'Your most obedient,
'most obliged, and
'most humble Servant,
'HANS SLOANE.'

N.B. Dr. Sloane was at this time on his way to Jamaica, in the character of Physician to his Excellency the Duke of Albemarle.

Extract of a letter signed Hans Sloane, dated Barbadoes, Nov. 28, 1687, and directed to William Charleton, Esq; to be left at Mr. William Cockram's, Merchant, in London.

'Dear Sir,

'I would have wrote to you from the Madeira, but there were no English ships there bound homewards. This is the first one I meet, and I am

VOL. IV.

'heartily sorry, I being new-landed here, cannot now send with this any natural things; for what I had at Madeira cannot be come at, which are plants, and what is here, I have not as yet gathered; but you may assure yourself, that what these parts of the West Indies afford, is all your own, the best way I can send them. You may be sure the taste I have already is delightful to me, for this is indeed a new world in all things. I wished heartily for you to day, if you could have been back in your Chambers at night. I find this place very warm; my greatest work is sweating and drinking water, which I find does well, and better than other small liquors of this place. From Jamaica you shall hear and receive from me at large. My humble service to Dr. Lister, to Dr. Robinson, to whom I design to write very soon, and to Mrs. Wood.

'Your very affectionate, &c.'

There is, *ibidem*, a letter, signed Hans Sloane, dated Newhall, July 11, 1690, directed to W. Charleton, Esq; at his Chambers over Mr. North's, Essex-Court, Middle-Temple, full of affection, and particular directions about Mr. Courten's health.

In a letter dated likewise from Newhall, Sept. 12, 1690, and directed as above, Dr. Sloane recommends three Ladies, who came to town with the Duchess of Newcastle, to see Mr. Courten's *fine curiosities*; informs him that Dr. Mullens died at Barbadoes, of a spotted fever in three days; and acquaints him with his own intention of being in town in ten days at farthest.

There is, *ibidem*, a letter directed to the Worshipful William Charleton, Esq; above Mr. North's Chambers, in the Temple, dated Oxford Sept. 25, 1691, signed Edward Llwyd, advertising him of the robbery of the Ashmolean Collection, with a curious account of the particulars, for which the reader is referred to the British Museum (27).

[BB] About 1684.] In a printed paper in the British Museum, and likewise in the *Vox Veritatis*, *ut supra*, it is said, that "William Courten, Esq; lived in France in 1683, on a small estate in money, not having a foot of land in England of all his father's or grandfather's large possessions (28)."

From a letter written by his cousin Posthumus Salwey, dated August 8, 1684, from Throckmorton, it seems that Mr. Courten was then living at his Chambers in the Temple. Probably he made a short visit to his friends in England, in 1681-2,

(27) MSS.

Sloan. *ut supra*.

(28) *Ibid.* 3515.

he opened, as the Doctor himself informs us, "A Museum extremely well furnished with every thing curious either in nature, or for illustrating history, and ancient times." It filled, it seems, ten rooms in the Middle Temple, where, says Dr. Sloane, "Mr. Courten shewed it *very freely*, and with great civility, to the advancement of the glory of God, the honour and renown of the country, and the no small promotion of knowledge and useful arts."

Dr. Sloane's own collection, or *closet*, as is called, at the time here spoken of, that is, in 1687, and long after, was, probably, inconsiderable, certainly never comparable to Mr. Courten's Museum, which it had always, from his earliest youth, been the chief business of this intelligent Naturalist's life to form, and to render every day less imperfect.

It has been said, that in the formation and disposition of it, Mr. Courten did not overlook any thing that was rare or curious in art, and that he enriched it very skilfully with coins and medals ancient and modern, antiquities [CC], seals, pictures, drawings, prints, vases, &c. for the "illustration of History and ancient times;" but certainly his chief attention was, to bring together the principal and most curious objects of the vegetable, animal, and mineral kingdoms, which he collected through the whole course of his life, with great judgment and at great expence.

It appears from his Catalogues and MSS. in the British Museum, that this able collector was well acquainted with the best methods of preserving, and the most scientific modes of classifying them then known, to the improvement of which, he seems to have been, himself, no contemptible contributor. It is equally evident, and deserves to be recorded to Mr. Courten's honour, and for the imitation of such as engage in similar studies and pursuits, that though he did not overlook their classification and arrangement, his principal attention was bestowed on the wise contrivance and beneficent design discoverable in the objects he collected, on their admirable economy, and on the most judicious and ingenious applications of them to the many various purposes of use and ornament in human life.

It is highly proper, indeed absolutely necessary, that the multifarious objects of Natural History should be well ascertained, and distinguished with nicety in all their varieties. The science, and lovers of it, are unquestionably indebted to the able Naturalists, who have spent their time, and exercised their ingenuity, in devising commodious methods of arrangement, and inventing systems for identifying the things about which it is conversant, with accuracy, and less danger of fallacy or mistake.

If students in this way could but agree universally to adopt any one of the methods or systems of classification, the worst of them all, much more the best, brought into general use, and constantly adhered to, would doubtless facilitate very greatly the study, and banish entirely that immense superfluity of synonymous terms, and ever-growing jargon, that is at present, the embarrassinent and reproach of their favourite science.

All who are, or would wish to be thought Naturalists, certainly ought to consider, that the best possible mode of classification, the Linnæan system not excepted, is after all, only an introduction to Natural History; and the Naturalist who goes no farther, hardly deserves that name: he embraces a cloud for a goddess, quits a substance for a shadow, substitutes the means in place of the end of the science, brings the study of it into disreputation and contempt, and prosecutes the knowledge of Natural History as if he conceived it to be only a mere vocabulary. The ingenious and indefatigable Linnæus, who spent his life in fabricating the curious system of classification now in vogue, intended it certainly for the advancement of Natural History, as a basis for the service of knowledge and the benefit of mankind. But surely some of his admirers seem to have overlooked his views, and taken the scaffold for the building; or if the writer is mistaken in this opinion, there can be no harm in expressing a wish, that the lovers of Natural History, would in the prosecution of the science, think of the true ends of knowledge, and endeavour to promote their own instruction, and the advancement of others, and not pursue it from mere curiosity, or only for the arrangement of objects, but chiefly with a view to their application to the occasions and uses of life, all along conducting and perfecting the study in the spirit of benevolence.

Perhaps it may be of more use, some time or other, than is commonly apprehended, to define, with precision, the class, order, genus, species, sex, family, and habitation of a plant, for example, if possible with all its varieties; but why, in the mean while, should the plant itself remain, I say not useless [for certainly nothing in nature is so], but unuseful, and no attention be paid after ascertaining and arranging it, to discover, by experiment, its virtue as a

or, as we may reasonably infer from the conclusion of another letter from his cousin Richard Salwey, dated London, June 30, 1681.

N. B. In a marginal note on the preceding article, p. 323, the word *maclær* is misinterpreted. In the Flemish language, this word variously spelt, *maka-lær*, or *maclær*, &c. signifies a broker, a factor, an agent, a man that deals in trade on commission, &c.

[CC] *Antiquities, &c.* Old, ancient, and antique, heighten the signification of one another. A fashion is *old* when it ceases to be followed; it is *ancient* when the use of it is entirely laid aside; and it is *antique*, or *antiquated*, when it has been a long time *ancient*. *Oldness* refers to age, *ancientness* refers to families, and *ANTIQUITIES* to things that have existed in times far remote from our own.

dye,

dye, its benefit as a food, cloathing, or physic to man, or its serviceableness in whatever way to him, or to any of all the multitude of animals subservient to his use, or ministerial to his pleasure. But even during this æra of apparently mere classification, Natural History may in reality have been advanced, or advancing, and therefore, with these hints only, certainly well intended, the present writer passes, very willingly, from a theme so unpleasant, with a sincere wish, and in great hopes, that it may become every day less and less necessary for any person to resume it.

Mr. Courten prosecuted the study of Natural History in the most useful way, and to its full extent; and he collected, disposed, and communicated the various objects of it, with solicitude, judgment, and liberality. Some instances of this the reader may collect from what has been said, to which I shall only add the following. Among his apparently earliest MSS. in the British Museum, there is a methodical treatise on the *asbestos*, and of the best methods of applying it to various useful purposes, in Latin, certainly in the hand-writing of Mr. Courten; but whether it is altogether original, or only transcribed with observations and remarks, from the papers of Dr. Lister, Dr. Plot, &c. published about that time, on the same subject, the present writer not having seen them all, cannot pretend to determine.

When Mr. Courten could only be about the age of fourteen, his name appears in the list of benefactors to "TRADESCANT'S Ark"[DD]; for the "*Museum Tradescantianum*" was published in 1656, 12mo. and contains an account of the plants, shrubs, and trees in the extensive Botanical Garden of this family, as well as a Catalogue of their Museum properly so called. When this early collection, after remaining for some time in the possession of Elias Ashmole, Esq; who augmented it very considerably, became, by that learned and worthy Gentleman's bounty, a kind of public property, by being deposited at Oxford, where it might best answer the ends of judicious enquirers through all succeeding ages, Mr. Courten continued to be a generous contributor to it, and in a variety of ways, as appears from the authentic testimonial given below [EE].

Mr. Courten's own Museum remains to this day, and may be still seen *very freely*, and probably much in the state he left it, though improved, as may well be supposed, and now arranged for the most part, to greater advantage, according to the Linnæan system. Of his curious collection, it is now impossible to ascertain the exact Catalogues, or the precise value. None of all the present catalogues that this writer has seen, though differently written, appear to be in Mr. Courten's hand-writing, nor are they made in his way, or indeed in any very accurate or scientific manner. Swelled with short and unscholar-like histories and accounts of their contents, they amount, it is said, in all, to thirty-eight volumes *in folio*, and eight volumes *in quarto*; but the present writer has not seen the whole number of them, nor even examined what he saw very particularly.

[DD] "TRADESCANT'S Ark." One of the earliest Museums formed in this country, in a scientific way, by very intelligent collectors, and with liberal and public-spirited views, was so called from the name of the Flemish family who formed it. The curious are referred, for farther information about it, to the "*Museum Tradescantianum*" mentioned in the text, 179 pages, exclusively of the long list of benefactors, which is not very scarce, or very dear, except on account of the two fine prints of the original collectors, by Hollar, prefixed, which, during the late and present humour of preserving the heads of eminent men, have raised it, without any consideration of the curious publication itself, to the price of one guinea. The two John Tradescants, father and son, whom these two prints represent, certainly well deserve to be better known, for their early and eminent services to Botany in particular, and to Natural History in general, which they laboured expensively, and not unsuccessfully, to promote in this country. The reader is referred for the fullest account that has hitherto been given of them, to the additional notes in the first volume of the last edition of the TATLER, with biographical, historical, and critical annotations, p. 435, & seqq. To this first Catalogue that the present writer has ever seen of a Museum, printed probably by John Mayler, next succeeds, so far as he knows, in 1664, and in 12mo. likewise, "A catalogue of the many natural rarities, with great industry, cost, and thirty years travel into foreign parts, collected by Robert Hubert, alias Forges, Gent. and sworn servant to his Majesty, and daily to be seen at the place called the Music House, at the Mitre, near the West end of St. Paul's Church-Yard." Of this Collector, and his place of abode, the curious may see a more particular account in the edition of the TATLER, *ut supra*, N^o. 221, Vol. VI. p. 33, Note.

Sir J. Hawkins affirms, on the authority of Mr. Oldys, that HUBERT'S *Museum* came at last into the possession of Sir Hans Sloane, most probably with Mr. Courten's superior collection, of which it might be some part. Of the following very rare book, or of the collection it announces, the present writer knows nothing but the title given on the authority in the margin (29). "*Catalogus Musei instructissimi. By the industrious labour of Johannes Jacobus Swammerdam, Apothecary, at Lambeth,*" 1679, 8vo. 143 pages. About the same time Mr. John Coniers, an ingenious and intelligent Apothecary, who lived in Shoe-Lane, and in whose hand-writing there are sundry and very curious original MSS. in the British Museum, formed with much assiduity, with unquestionable skill, and at great expence, another collection of Natural History, but chiefly of Antiquities; and in 1691, he made a proposal to the public, of opening it for general inspection. Such as are curious to know more of this, are referred for a farther account of it to "The Athenian Mercury," Vol. IV. N^o. 16. Nov. 21, 1691. Printed for John Dunton, at the Raven in the Poultry, *in folio*. See also TATLER with Notes, &c. Vol. VI. p. 336, and *Adv.*

[EE] *The authentic testimonial given below.* It is endorsed, not in the hand-writing of Mr. Courten, but by some other writer, "A copy of the register of your benefaction at Oxford."

"*Gulielmus Charleton à Medio Templo, London, Armiger, rerum naturalium rariorum, domi forisque, ubique gentium explorator sagacissimus: hujus Musei instructissimi quasi consummationem intentaret; eidem e penu suo CUMULATISSIMO, Zyganam piscem integram, varias tum Coralliorum, tum Conchyliorum species, numismata item non-nulla (plurium pignora) piè sacravit (30).*"

From

(29) Harl. MSS. Bagf. 5979.

(30) Brit. Mus. Bibl. Sloan. MSS. 3961. Plat.

From what has been said, however, the reader may possibly be inclined to believe, with the writer of this article, that Mr. Courten's collection was choice and valuable; nor is it very unreasonable to suppose, that it might nearly amount to the full price that was afterwards given to the heirs of his generous and bountiful executor for the Museum, augmented no doubt, in very many respects, but diminished, as has been mentioned, in one respect at least, on which certainly, its value greatly depended, and on which it was chiefly estimated.

(a) It was estimated altogether, the library included, at 30,000*l.*

It remained for about half a century after the death of Mr. Courten, in the possession of his executor and residuary legatee, who certainly added very much to it, and was then purchased in 1753, for the use of the public, without so much as the mention of the name of its first, and most scientific collector and proprietor, so far as appears in the whole course of the transaction, for 20,000*l.* though the coins and precious stones alone, were said to be of that value (a). It is now preserved with the Cottonian, Edwardian, and other public Libraries, the Harleian and other MSS. a liberal royal donation of books and pamphlets, the curious collections of Sir William Hamilton, from Herculaneum and Italy, of Sir Joseph Banks and Dr. Solander, from the Islands in the South Seas, and a very considerable and accumulating treasure of other occasional donations of printed books, MSS. coins, and various objects for the illustration of ancient times, and Natural History, at the national expence, in the British Museum.

There is a memorable clause in the preamble to the Act of Parliament for the purchase of this Museum, which the reader may not be displeased to find here, as it is not foreign to the purpose of this article: "Whereas all Arts and Sciences have a connection with each other, and discoveries in Natural Philosophy and other branches of speculative knowledge [for the advancement and improvement whereof, this Museum was intended] do, and may, in many instances, give help and success to the most useful experiments and inventions; therefore, to the end that the said Museum may be preserved and maintained, not only for the inspection and entertainment of the learned and the curious, but for the general use and benefit of the publick: May it please your Majesty to enact, and be it enacted, That out of all or any of the monies to be raised by virtue of this Act, the full and clear sum of twenty thousand pounds, lawful money of Great Britain, shall be paid to the executors of Sir Hans Sloane, &c."

This very just sentiment, if not borrowed from Cicero, we find in his fine oration for Archias the Poet; and he has expressed it with the accuracy of a Philosopher, and the curious felicity of a man of genius. '*Omnes artes—habent quoddam commune vinculum, & quasi cognatione quadam inter se continentur.*'

This judicious consideration anticipates and obviates, in a satisfactory manner, the frivolous objections to a public provision of this nature, which generally originate in illiberality and narrowness of mind, and ought to keep wit from over-running judgment in estimating inconsiderately, the comparative value of the various branches of science. To form such estimates justly, requires an impartiality, a greater compass of knowledge, and more patient deliberation than is commonly possessed. *Non omnia possumus omnes*; and even scholars eminently distinguished in various branches of literature, are apt to err, and to be too precipitate, and too peremptory in this respect. There is a proneness to over-rate what we have acquired, to under-value what we have not attained, and to dislike and despise what we have neglected, which ought to be guarded against, as it often discourages study, betrays ignorance, and suggests objections that recoil to the reproach of the objectors.

The purchase in question generously offered at less than half its value, if it had been rejected, would have been still more disgraceful to this nation, than the loss of Vossius's fine library, supposed to have been the best private library then in the world, concerning which the present writer takes this opportunity, to give a little information below [FF], omitted, or unobserved by the biographer of ISAAC VOSSIUS, in the first edition of this work.

The acquisition of Mr. Courten's collection, augmented, as has been said, in books and various respects by his worthy executor, and through his liberality offered, at a price so inadequate to its real value, the establishment and support of it for public use, is very honourable to this nation, and appears to be an act of true wisdom and sound policy.

(31) See Biog. Brit. Art. VOSSIUS, (Isaac).

[FF] A little information below, &c.] "The library of Vossius, in which were a great many Greek MSS. besides five hundred printed books as scarce as any MS. was offered to our University at Oxford, but unhappily lost through mismanagement. The most ancient of his MSS. Vossius had begged of Christina, Queen of Sweden (31), and these he had from time to time transcribed by the hands of one Faulkner, a Scotchman, which he sold to the King of France, and for some years together, made little less than one hundred

"pounds per annum (32)."

This fine library, the joint collection of Isaac Vossius and of his father John Gerard Vossius a more judicious scholar, was suffered to be purchased, and carried out of this kingdom by the University of Leyden, to the great shame and reproach of England. Gabriel Naudeus, who published in Latin, in 1644, "Instructions concerning erecting a Library," never saw, it seems, this curious library of Vossius, though he says he had often importuned Professor Perizonius to procure him that pleasure (33).

In

In all ages it has been an object of political attention, and ought to be so for ever in every civilized and wise nation, to promote useful learning, to cherish liberal arts, and facilitate the study by supplying the students of them, with suitable assistances of books, MSS. enticing materials, and every fitting encouragement. The kings of this world do really imitate the King of kings, and are truly his vicegerents on earth, when they are thus his ministers for good to their people, and bless them by opening fountains of useful instruction, elegant enjoyment, or innocent amusement. By the erection of Libraries and Museums in their dominions, they build permanent temples to their own glory, and secure to themselves a sort of honourable immortality, by furnishing the means, and patronising the instruments of it.

Public libraries seem, indeed, to be as necessary as public walks; for "reading is to the mind what exercise is to the body; as by the one health is preserved, strengthened, and invigorated; by the other Virtue, which is the health of the mind, is kept alive, cherished and confirmed(*)." In an age when the expence of living is so increased and increasing, that buying books is the first article of expence retrenched, that large libraries are got beyond the reach of most scholars, and even museums in miniature are become imprudent because over-costly pursuits for individuals, the convenience and felicity of this public provision for mental improvement, and intellectual gratifications, are likely to become more and more sensibly felt, and to be more generally resorted to by people of different ranks in life, for filling up with pleasure and profit the accidental intervals of leisure, in ways that may contribute to their delight in retirement, their ornament in company, and their ability in business. It would be lamentable indeed, and a subject of equal concern and reproach, if in a kingdom where no encouragement is withheld from less laudable schemes of pastime and frivolous amusement, an establishment in favour of more manly, more rational, more elegant, and more useful employment should be objected to on the score of expence, or fail for want of support.

Besides what might be urged in recommendation of a Museum well furnished with coins, &c. &c. arranged with propriety for the illustration of history and ancient times, a judicious and well-assorted collection of animal, vegetable, and mineral objects, may truly and devoutly be considered as A *Sanctuary of God*, filled with numberless pleasing and instructive evidences of HIS adorable goodness, wisdom and power, properly furnished and ordered for free and general inspection, to attract rational notice and serious examination, to excite, enliven, and confirm in the minds and hearts of all beholders, the most pious and salutary impressions of the Creator, Preserver, and Governor of all. In this view it is unquestionably well worthy of national attention and expence, as being evidently a great good mean of adding many to the number, and much to the degrees of our purest enjoyments, of making good subjects, by making good men, and of extending the boundaries of science in every way imaginable. The pious, the considerate, the curious, the idle, and the gay, as they resort to it promiscuously, may be benefited there, in an almost infinite variety of ways; and people of genius, by lucky and random-strokes of ingenuity, may draw luminous sparks from one thing and another, sufficient to point out ways and means of applying them happily to purposes of use, conveniency, and ornament, and thereby to discover new methods of lessening the evils, of alleviating the labours, and of multiplying or enlivening the pleasures of human life.

As it is the professed intention of this work to promote knowledge, and the love of it, as well as to celebrate merit in *every way*, there needs no apology for this, or any similar digression, in the course of this article. The present writer, well aware of the nature and scantiness of any information that can now be given, or obtained, of Mr. Courten, would not have undertaken so barren a subject, but chiefly in consideration of this scientific man's pursuits, and of his Museum, now the property of the public, which furnished collateral matter for a proper article in this work, and a fair occasion of enlarging on parts of knowledge that have at times been ignorantly undervalued, and even invidiously treated, with a degree of absurd rudeness and indignity, tending alike, in his opinion, to the diminution of the innocent and elegant amusements of life, and to the general prejudice of useful science.

It seems difficult to account for the twenty-five years, which Sir Hans Sloane says Mr. Courten spent abroad, without supposing that he revisited Montpellier, and lived beyond sea for a year or two, after his return to England in or about 1684. The last fourteen or fifteen years of his life he passed in chambers at the Temple, promoting the knowledge of Natural History, and exhibiting his collection *gratis*, in an instructive manner, of which the reader may form some idea from what has been said. Latterly the declining state of his health obliged him to practise more abstemiousness than was agreeable to his convivial turn; and for several years he was under the necessity of abstaining almost entirely from wine and all spirituous liquors, in which, from a companionable disposition, and in compliance with a fashion then much more prevalent than at present, it seems that he indulged at times, rather too freely. He died at Kensington Gravel-Pits, on the 26th of March, 1702, aged sixty-three, and was buried in the church-yard of that parish. The inscription on his monument there, which shall be given at the conclusion of this article,

cle, was composed by Sir Hans Sloane, who inherited by his will the bulk of his fortune. There is, moreover, in the British Museum, a paper written by this Baronet, which contains the following honourable testimony to Mr. Courten's character: "He was a man of the greatest integrity and benevolence, remarkably modest and inoffensive, and a sincere believer in Christianity."

The following passage in the life of Sir Hans Sloane, in the first edition of this work, gave rise to this and the preceding article. It is certainly injurious to the memory of Mr. Courten, and contains an insinuation or suggestion to the prejudice of his character, probably not intentional, which nothing, either in Sir Hans Sloane's last will, or in the *Eloge* quoted by the biographer, can justify. It is therefore necessary to take some notice of it here, to enable the future writer, or reviewer of Dr. Sloane's life, to state it more unexceptionably, and in greater consistency with accuracy and truth (b).

"Our Author's [Sir Hans Sloane's] thirst for Natural Knowledge, seems to have been born with him, so that his cabinet of rarities may be said to have commenced with his being. He was continually enriching and enlarging it; and the fame, which in a course of years it had acquired, brought every thing that was curious in art or nature, to be first offered to him for purchase. But these acquisitions increased it but slowly, in comparison of the augmentation it received in 1701, by the death of William Courten, Esq; a Gentleman who had employed all his time, and the greatest part of his fortune, in collecting rarities, and who bequeathed his whole collection to Dr. Sloane, on condition that he should pay certain legacies and debts with which he had charged it (c). Our Author [Sir Hans Sloane] accepted the condition and performed the will of the Donor punctually: on which account, there are some who do not scruple to say, he purchased Mr. Courten's curiosities at a dear rate (d)."

(b) BIOG. BRIT.

ART. SLOANE.
[SIR HANS.]

(c) Sir Hans
Sloane's last will.

(d) *Ib.* *ELOGE.*

The article from which the preceding passage is quoted, was written, as the signature indicates, by Dr. Philip Nicholls, who seems to have known what he has not said, though most probably true, that Dr. Sloane's *Cabinet of Curiosities*, notwithstanding its commencement with his being, and all its enrichments, and all its enlargements, was still comparatively inconsiderable, before the augmentation, as it is called, received in 1701 [he should have said in 1702] by the death of Mr. Courten. It appears most probable from Dr. Sloane's own testimony, that he collected principally, not long before this time, for Mr. Courten's museum, possibly with the hopes, and in the prospect of benefit from the survivorship, for he was eighteen years younger than his friend. It does not appear that the Doctor's own cabinet of curiosities had acquired the same advantageous to it, as his biographer mentions, before 1702. That year, which was the first of its junction with Mr. Courten's Museum, was most probably the commencement of the æra of its celebrity.

It is left, and recommended to the future writer or reviewer of Dr. Sloane's life, to examine the last will and the *elogé* quoted by Dr. Nicholls, *ut supra*, the consideration of which does not properly belong to this article; though it seems necessary to observe here, that whereas Dr. Sloane's biographer, in the fore-cited passage, would lead his reader to believe, that Mr. Courten died poor, and in debt, for the payment of which, his creditors were beholden to an exertion of Dr. Sloane's generosity and friendship for the deceased, the real fact was certainly otherwise. Mr. Courten died rich, and contributed very considerably to the enrichment of Dr. Sloane, in appointing him, by his last will, his executor, with a legacy of 200*l.* for his trouble, and the benefit of being his residuary legatee. This appears to have been the truth of the case; and though the present writer has not seen Sir Hans Sloane's will, or his *elogé*, he is nevertheless confident that there can be nothing in them to disprove it. The following short account of an attested copy of Mr. Courten's will, extracted from the Registry of the Prerogative Court of Canterbury, is amply sufficient to prove all this, and to shew that Dr. Sloane, instead of purchasing Mr. Courten's Museum at a dear rate, acquired, at this Gentleman's death, a very considerable accession to his fortune, though it is now impossible to ascertain the value of it with precision. The authentic paper from which the account is given, this writer will deposit in the British Museum, to throw some light on the story of its original collector, and to be preserved with the other vouchers for the truth of what has been advanced in the historical part of this and the preceding articles.

Mr. Courten's last will is dated March 10, 1701-2: of the three codicils annexed to it, the first is dated March 20, 1701-2; the second is dated March 22, 1701-2; and the last bears the date of March 23, 1701-2, only three days before Mr. Courten's death; and the probate is dated April 4, 1702, in which Dr. Sloane is expressly prohibited, for whatever reason, from intermeddling with the goods, &c. of the Honourable Elizabeth, Countess Dowager of Exeter lately deceased, or with the estates of Mr. Courten's father, or grandfather.

1. *Imprimis.* "Mr. Courten appoints his after-named executor to sell and dispose of what goods of any sort, or other personal estate he should leave behind him, to the best advantage, in order to pay the debts and bequests mentioned in the sequel of his will, except such particular things as he disposes of otherwise by his will."

2. "Mr.

2. " Mr. Courten states the whole amount of his debts, which he orders to be paid with all convenient speed, at the exact sum of two hundred and forty-eight pounds, six shillings and eight-pence sterling, and no more."

3. Mr. Courten mentions a number of little legacies in small sums of money, some of which he revokes, augments, and alters variously, in the codicils annexed to his will. The sum total of them shall be given in the sequel, and the reader, if curious, is referred for farther particulars, to the will itself in the British Museum, to the signature, sealing, and publication of which, Bernard Lintott the bookseller, subscribes his name as one of the three witnesses (e).

(e) The names of the other two witnesses are Thomas Bever and John Morgan.

4. The following are the express words of Mr. Courten's will relative to Dr. Sloane: " The residue of my estate, above what will pay my debts and other legacies, I give to my executor; and I do hereby appoint Doctor Hans Sloane, of the parish of St. Giles in the Fields, to be the sole executor of this my last will and testament."

5. The first codicil, dated *ut supra*, discovers that Mr. Courten was entitled, after the death of his aunt, Lady Knightley, to two mortgages, of which there is no mention made in his preceding will. The first mortgage, dated July 7, 1685, for the sum of 1000*l.* the second, dated Nov. 29, in the year preceding Mr. Courten's death, for 400*l.* Both these mortgages were secured to his aunt Dame Ann Knightley, who was to have the interest of both the aforesaid sums during her life, the precise date of which, at the time when this codicil was added, the reader may ascertain by looking back to an attested certificate of her baptism given in the foregoing article.

6. The following bequest to Dr. Sloane is given in the express words of the testator: " I do hereby will and devise to my executor two hundred pounds, in consideration of his great trouble."

7. In the same first codicil of the 20th of March 170 $\frac{1}{2}$, Mr. Courten alters, in sundry respects, his former will, augments generally the sums of his legacies, and increases the number of his legatees, by the addition of Mr. John Gibbes of Mellington, Dr. Paul of Montpellier, and Dr. Sherwood. The signature, &c. of this codicil is attested by three different witnesses (*).

(*) Theodore Rivett, John Cumberland, and George Scott.

8. What has been called the second codicil, dated two days after the first, is only a memorandum annexed to the first codicil, and relative solely to Dr. Sloane; it is conceived in the following terms, and given here entire.

" Memorandum, That it is my intention and meaning, that the several sums or legacies given by this codicil" [*meaning the preceding codicil, dated March 20,*] "to my will, should be paid by my executor therein named, so soon as the two sums of one thousand pounds and four hundred pounds mentioned in this codicil, wherein I have interest, shall be paid my executor, and no sooner. Dated the two and twentieth day of March, 170 $\frac{1}{2}$. William Courten. Signed, sealed, and published by the testator, in the presence of us who subscribed the same in his presence. *John Cumberland, Thomas Smith, John Chandler.*"

9. The third codicil relates likewise solely to Dr. Sloane, and is therefore given entire, and *verbatim*, from the authenticated copy, *ut supra*.

" Whereas I William Courten, of the Middle Temple, London, Esq; have made my last will and testament in writing, and have constituted and appointed Hans Sloane, Doctor in Physick, sole executor thereof, and have made a codicil thereto. Now I, the said William Courten, do hereby give and bequeath unto the said Hans Sloane, his executors and administrators, to his and their own use and benefit, all the rest and residue of my personal and testamentary estate whatsoever, after the payment of my debts, legacies and funeral expences, and I desire this may be added as a further codicil to my said will. In witness whereof I have hereunto set my hand and seal this three and twentieth day of March, *anno Domini* 1701, William Courten. Signed, sealed, published, and delivered in the presence of us, *John Cumberland, Thomas Smith, John Chandler.*"

Mr. Courten's bequests and debts, taken all together, amounted to no more than 2,020*l.* 6*s.* 8*d.* sterling. To pay this sum, his executor had in money secured on two mortgages to Dame Ann Knightley, and payable at the death of that Lady then aged eighty-eight [GG], fourteen hundred pounds; and a legacy to himself

[GG] *Aged eighty-eight.* This Lady did not out-live her nephew a full year, for she died on the fifth of Feb. 1702-3; the following account of her, extracted from a recent publication, contains some curious information, and comes very seasonably to explain and confirm many parts of this article.

Ann, daughter of Sir William Courten, Knt. widow of Essex Devereux, Esq; married for her second husband Richard Knightly, Esq; of Fausley in Northamptonshire. Charles II. before his coronation, created Richard Knightley a Knight of the Bath, but Sir Richard did not long enjoy this honour, for he

died June 29, 1661, and was buried in Fausley Church. Sir Richard's first wife was a daughter of the celebrated *John Hampden* the patriot, by whom he had one son, Richard Knightley, who died unmarried at Paris aged 26; and one daughter, Elizabeth, who died when a child. By his second wife Ann, daughter of Sir William Courten, Sir Richard had issue, 1. A son, named *Essex Knightley*, who was his heir, and married Sarah, daughter of T. Foley, Esq; by whom he had a daughter named Sarah. He died in 1670 about the age of 22, and left this daughter Sarah, a rich heiress, though she did not inherit

self of 200*l.* more. Dr. Sloane therefore being *sole* executor and residuary legatee, might, or might not sell, just as he pleased, and not chusing to part with any thing, he judged it most prudent to secure to himself entirely Mr. Courten's Museum, &c. by paying the expences of his friend's funeral, and a sum of 420*l.* 6*s.* 8*d.*

Now in point of time, thirty years before this, it has been said in the course of the narrative, and it may be seen from the Collector's own account of only a very few particulars then purchased, that this price was not even one-half of the sum, which Mr. Courten had then expended in three years only, and during the very worst state of his affairs, when he had the smallest, indeed no certain income, and was involved in the greatest expence and solicitude (f).

(f) *Ut supra.*
MSS. Sloan.
3988.
Plut. xxxi. c.

It ought likewise to be observed, that Mr. Courten, as appears from the MS. referred to, had not then even begun to collect coins, &c. His Museum at that time was in its very infancy; the part of it, probably not inconsiderable in such an opulent mercantile family; which it is not unreasonable to suppose came to him as an heirloom, augmented no doubt by the contributions of his friends, and his own preceding unappretiated collections, was not included in the estimate here spoken of; and for more than thirty successive years; it is said, that "he employed all his time, and the greatest part of his fortune," in enriching and enlarging it.

These things being considered, it may be fairly concluded, that the author of the *elogé*, wrote not like an historian, but as a declaimer, and absolutely at random, if he has said any thing to induce Dr. Nicholls, or any body to think, that Sir Hans Sloane purchased Mr. Courten's Museum "at a dear rate."

Certainly it came to Dr. Sloane, as it did afterwards in its augmented state to the public, very much under its original and real value. Sir Hans bears an honourable testimony to the singular modesty of his friend; and considering the benevolent cast of this scientific Gentleman's character, it is not improbable, that it was Mr. Courten's desire, as well as Dr. Sloane's interest, that the Museum should be kept entire, that it should devolve at a great under-value to his friend and executor, and even that it might ultimately be settled according to its final destination, as the property of the public, at a price very much reduced.

It detracts nothing, certainly it is not meant to detract any thing, from the merit and patriotism of the great improver, and immediate donor of the Museum, to think that his bounty might originate in the generosity, and grow out of the public kindness, and national friendship of its first Collector. It does not indeed clearly appear that this was actually the case, from any direct proof now visible, or hitherto seen; but unquestionably Mr. Courten on his death-bed intimated desires, and recommended things to his executor, not mentioned in the written will, which his worthy friend nevertheless observed as a will, and performed religiously.

The following epitaph contains one proof of this, which shall be given, with a reference to its proper place in the inscription, as the conclusion of this article.

*Juxta hic, sub marmoreo tumulo,
Jacet Gulielmus COURTEN, cui Gulielmus pater, Gulielmus avus (g),
Mater Catherina, Johannis Comitissæ de Bridgewater filia,
Paternum vel ad Indos præclarum nomen.
Qui tantis haudquaquam degener parentibus,
Summa cum laude vitæ decurrit tramitem.
Gazarum per Europam indagator sedulus,
Quas, hinc illinc sibi partas, negavit nemini,
Sed cupientibus exposuit humanissime,
Non avaræ mentis pabulum, sed ingenii.
Si quid naturæ, si quid artis nobile opus,
Id quovis pretio suum esse voluit,
Ut Musis lucidum conderet Sacrarium.
Ast Morti hæc non sunt curæ!
Hic Musarum cultor tam eximius,
Hic tam insignis viator,
Obiit, quievit, 7 Kl. Apr. A. D. 1702.
Vixit annos 62, menses 11, dies 28.*

(g) *Gulielmusque pater.*

inherit the estate of Fausley, which went to his uncle Devereux Knightley, who died in 1681, and left it to a son of the name. Sarah the widow of Essex Knightley, married for her second husband, John Hampden, Esq; grandson to the patriot HAMPDEN. Sir Richard Knightley had likewise two daughters by Mr. Courten's aunt, 1. Elizabeth, who was married to Sir Edward Seabright, Bart. and 2. Jane,

married to Sir Thomas Delves, Bart. In the book from which this intelligence is given, it is said, that Lady Knightley, after being twice married, in the fortieth and second year of her widowhood, died at the age of eighty-eight, but certainly she had completed her eighty-ninth year, for she was baptized Jan. 17, 1614, as appears from the register of her baptism given in the preceding article (35).

Pompa,

*Pompa, quam vivus fugit, ne mortuo fieret,
Testamento cavit [HH].
Sed hoc quaecunque Monumentum,
Et quam potuit immortalitatem
Bene merenti, mærens dedit.
Hans Sloane, M. D.*

[HH] *Testamento cavit.* It seems probable, that Sir Hans had mentioned his intention of erecting a monument to Mr. Courten's memory, in Westminster-Abbey; and that Mr. Courten, disliking the proposal, had expressly requested of his friend not to do it; for it is very certain there is no mention made of this in Mr. Courten's written will.

From what has been said, it appears that Mr. Courten must have had no inconsiderable fortune, to enable him to live like a Gentleman, and to leave behind him besides his Museum, a sum in money, of 1,400*l.* There were two papers, containing accurate

statements of Mr. Courten's *accounts* for two years, transcribed for publication, which went nigh to ascertain with precision, both his annual income, and his sister's livelihood. But as it is judged improper to swell this account by inserting them, the reader can only be referred to the originals in the British Museum, MSS. Sloan. 3962: and to the same repository and MS. the curious must go, it seems, for a sight of the letters signed, P. SALWEY, and other vouchers intended to have formed the note [D] so often referred to, but nevertheless omitted in this article.]

C. N.

COURTNEY (WILLIAM), Archbishop of Canterbury in the reign of King Richard II. was the fourth son of Hugh Courtney, Earl of Devonshire, by Margaret, daughter of Humphrey Bohun Earl of Hereford and Essex, by his wife Elizabeth, daughter of King Edward I (a). and was born in the year 1341 (b). He had his education at Oxford, where he applied himself to the study of the Civil and Canon Law. Afterwards, entering into Holy Orders, he obtained three Prebends in three Cathedral Churches, viz. those of Bath, Exeter, and York (c). The nobility of his birth, and his eminent learning, recommending him to public notice, in the reign of Edward III. he was promoted, in 1369, to the See of Hereford (d), and thence translated to the See of London, September the 12th 1375, being then in the 34th year of his age (e). In a Synod, held at London in 1376, Bishop Courtney distinguished himself by his opposition to the King's demand of a subsidy [A]; and presently after he fell under the displeasure of the High Court of Chancery, for publishing a Bull of Pope Gregory II. without the King's consent [B]. The next year, in obedience to the Pope's mandate, he cited Wickliff to appear before his tribunal in St. Paul's Church: but that heresiarch being accompanied by John of Gaunt Duke of Lancaster, and other nobles, who secretly favoured his opinions [C], the Bishop

(a) *Parker's Life of King Ed. III.* Cambr. 1683, p. 904.

(d) *Id. ib.* & Godwin, *De Præsul. Angl. inter Episc.* Heref. an. 1369.

(b) This appears from his age at the time of his promotion to the See of London.

(e) *Registr. Sudbury.*

[A] *He opposed the King's demand of a subsidy.* He laid before the Synod a written account of some injuries offered to him, and William Wickham Bishop of Winchester, and conjured the clergy not to grant the subsidy required, till satisfaction was made for them. The Synod hereupon being divided, the King could not obtain a subsidy, till he had given hopes of redress; which however he thought no more of after the breaking up of the Synod (1).

[B] *He published a Bull of Pope Gregory II. without the King's consent.* The Affair was this: Pope Gregory II. had lately excommunicated the Florentines, and had dispatched his Bulls every where, ordering their effects to be seized. The Bishop of London, without consulting the King, published the Pope's Bull at Paul's Cross, and gave the populace licence to plunder the houses of such Florentines as were in the City. The Lord Mayor hereupon, restraining the violence of the people, clapped a seal on the doors of the Florentines, and conducted them to the King, who took them into his protection. Afterwards, by order of the King, the Bishop of Exeter, Lord High Chancellor, summoned the Bishop of London into the Court of Chancery, to answer for having dared to publish the Pope's Bull, without consent of the King and Council, and contrary to the laws of the land. Courtney pleaded the Pope's authority and command. But the Chancellor gave sentence, that he should either forfeit his temporalities, or revoke his words with his own mouth. With some difficulty the Bishop of London obtained, that he might re-call them by one of his officers; and accordingly an Official mounted Paul's Cross, and addressed the people in these words: *My Lord said nothing about the Interdict: it is strange you should misunderstand, who hear so many sermons from this place* (2).

[C] *The Duke of Lancaster, and other Nobles, secretly favoured Wickliff's opinions.* This appeared openly by their behaviour upon this occasion. The Duke of Lancaster, the Lord Marshal Percy, and others, countenanced Wickliff by their presence in the

Bishop of London's Court. There was a vast concourse of people about St. Paul's Church, so that the Lord Percy could not pass through the crowd without difficulty. Courtney was alarmed at Wickliff's appearance in so extraordinary a manner: upon which there ensued the following dialogue between the Bishop and the two Lords above-mentioned; which I shall set down in Fox's language (*).

Bishop Courtney. Lord Percy, if I had known before hand what masteries you wou'd have kept, I wou'd have stopt you out from coming hither.

Duke of Lancaster. He shall keep such masteries here, tho' you say nay.

Lord Percy. Wickliff, sit down, for you have many things to answer to, and therefore have need of a soft seat.

Bishop Courtney. It is unreasonable that one cited before his Ordinary should sit down during his answer; he shall stand.

Duke of Lancaster. The Lord Percy's motion for Wickliff is but reasonable. And as for you my Lord Bishop, who are grown so proud and arrogant, I will bring down the pride, not of you only, but of all the prelacy in England. Thou bearest thyself so; brag upon thy parents, which shall not be able to help thee; they shall have enough to do to help themselves.

Bishop Courtney. My confidence is not in my parents, nor in any man else, but only in God in whom I trust, by whose assistance I will be bold to speak the truth.

Duke of Lancaster. Rather than take these words at the Bishop's hands, I'll pluck him by the hair of the head out of the church.

These last words, though spoken softly by the Duke to one next him, were over-heard by the Londoners, who, being enraged to see their Bishop thus used, would have torn the Duke to pieces, had not Courtney interposed, and checked their fury. However they could not be restrained from marching directly to the Duke of Lancaster's Palace in the Savoy,

Bishop proceeded no farther than to enjoin him and his followers silence (f). In 1378, it is pretended, that Courtney was made a Cardinal [D]. In 1381, he was appointed Lord High Chancellor of England (g). The same year, he was translated to the See of Canterbury (b), in the room of Simon Sudbury [E]; and on the 6th of May 1382, he received the Pall from the hands of the Bishop of London in the Archiepiscopal Palace at Croydon. This year also he performed the ceremony of crowning Queen Anne, consort of King Richard II. at Westminster (i). Soon after his inauguration, he restrained, by ecclesiastical censures, the bailiffs, and other officers, of the See of Canterbury, from taking cognizance of adultery and the like crimes [F]. About the same time, he held a Synod at London, in which several of Wickliff's tenets were condemned as heretical and erroneous [G]. In 1383, he held a synod at Oxford, in which a subsidy was granted to the King [H]. The same year, in pursuance of the Pope's Bull directed to him for that purpose, he issued

which they plundered, and were preparing to set fire to it; when the Bishop, leaving his dinner, hastened to the Savoy, and, by his presence and intreaties, quieted the tumult, and saved the Duke's house (3). And here we cannot but take notice of the generous and Christian temper of the Bishop of London, in appearing thus heartily in behalf of the Duke of Lancaster, after he had been so lately outraged by him. Nor is the zeal of the Londoners, and their affection for their Bishop shewn on this occasion, less remarkable.

[D] *It is pretended, that he was created a Cardinal.* This is Bishop Godwin's opinion, which he founds upon the historian Thomas Walsingham, who writes, that the Bishop of London was one of those, whom Urban VI. promoted to the Cardinalate in 1378. Ciaconius also and Onuphrius affirm, that a Bishop of London was, about that time, created a Cardinal; but his name, they tell us, was Adam. Now it is not to be doubted, that one Adam Eston, an Englishman, was honoured with the red hat; but Bale (*), and other authors, tell us, it was by Gregory II. If therefore a Bishop of London was made a Cardinal by Urban VI. in 1378, it must be Courtney (4). You see Bishop Godwin's argument: upon which M. Aubery (5) makes the following remark. 'Godwin, a modern author, will have it, that Adam Eston was one of the creatures of Pope Gregory II. Urban's predecessor, and as one absurdity is usually followed by another; this writer, by his own authority, creates a new Cardinal, whom he calls William Courtney Bishop of London, because Thomas Walsingham writes, that the Bishop of London was one of those, whom Urban VI. promoted to the Cardinalate in 1378. It must certainly be acknowledged, that Godwin does not deal fairly in this matter; since, for fear of being obliged to recognize Adam Eston for Bishop of London, he has set down but half his epitaph (†), and has purposely omitted the other part, by which the reader might have been informed, that our Cardinal was actually Bishop of London. It must however be observed, that S. Contelorio writes, that William Courtney, being nominated to the Cardinalate in 1378, would never consent to his promotion. But the English writers will not agree, that there were two Bishops of London created Cardinals successively by the same Pope Urban VI. So that, probably, either Adam Eston was not Bishop of London, which I cannot assent to, since his epitaph, reported by creditable authors, proves the contrary; or William Courtney was not created a Cardinal.' I shall only observe here, that neither is Cardinal Eston acknowledged for Bishop of London by our own writers, nor Bishop Courtney for a Cardinal by foreigners.

[E] *He succeeded Simon Sudbury in the See of Canterbury.* He was elected by the Monks of Canterbury, July the 30th, 1380 (6), and confirmed by the Pope's Bull of September the 9th, 1381, which was published January the 9th, 1382 (7). Having received the Temporalities, and done homage to the King, he repaired to Lambeth; and on the 12th, a Monk of Canterbury came thither, being sent by the Prior and Convent with the archiepiscopal cross: which he delivered to the Archbishop, sitting in his chapel, with these words: 'Reverend father, I am the messenger of the supreme King, who intreats, commands, and enjoins, that you take upon you the government of his Church, and that you love and protect it: In token of which

message, I deliver into your hand the banner of the supreme King.' *Pater Reverende, nuncius sum summi regis, qui te rogat, mandat, & precipit ut ecclesiam suam regendam suscipias, eamque diligas & protegas: In cujus signum nuncii, summi regis vexillum tibi trado ferendum* (8). The Archbishop, not having yet received the Pall, was doubtful whether the Cross might be carried, as usual, before him, and whether he had a right to crown the new Queen. But these scruples were easily removed by the Monks of Canterbury, who brought precedents for both. Nevertheless, the Archbishop, though, upon the authority of the Monks, he suffered the Cross to be carried before him, yet cautiously entered a Protest, that he did not do it in contempt of the Court of Rome. *Archiepiscopus autem, accepta a monacho cruce, dubitationem ipse hanc iniecit: An Crucem ante se perferri liceat, antequam a Papa pallium acceperit. Ex eaque questione alia dubitatio nata est. Regis Bohemie soror regi Anglie Richardo Secundo nuptura in Angliam hoc tempore venit. Has regias nuptias Cantuariensis Archiepiscopus iure, ut diximus, metropolitico celebrare, & reginam coronare debuit. De quo non minus ante acceptum pallium, quam de cruce gerenda, dubitavit. Qui tam perplexus dubitationis scrupulus non a Jurisconsultis & Causidicis, sed a Monachis Cantuariensibus, qui actus crebros & frequentes rerum similiter sine pallio gestarum proferebant, & Cantuariensis Ecclesie consuetudinem allegabant, facile sublatus est. Et tamen archiepiscopus, etsi ex monachorum assertione, gesta ante se cruce, iniecit, Protestationem cautè interposuit: Non se id in Romanæ Curie contemptum facere* (9).

[F] *He restrained the officers of the See of Canterbury from taking cognizance of adultery, and the like crimes.* He extended his censures to others, who were guilty of the like offence: for, about two years after, we are told (10), he excommunicated one Richard Ismonger, a Kentish-man, for pretending to punish crimes, cognizable only in the ecclesiastical courts, by meer lay authority. Who, or in what office, this person was, we are not told: but, it seems, he could not obtain absolution, but by submitting to be beaten with a cudgel, naked, three successive market-days, in the open market-place of West-Malling; to have the same punishment repeated in the market-places of Maidstone and Canterbury; and, at the latter place, to enter naked into the Cathedral Church, and offer a wax taper of five pounds weight at the shrine of Thomas Becket.

[G] *He held a synod, in which Wickliff's tenets were condemned as heretical and erroneous.* A more particular account of this synod will be found in the article WICKLIFF. Robert Rigge, Chancellor of the University of Oxford, and Thomas Brightwell, Doctor in Divinity, being suspected of favouring Wickliff's doctrines, appeared before this synod, and were obliged to disclaim those tenets, and subscribe to the contrary. Nicholas Hereford and Philip Repindon, Doctors in Divinity, and John Asheton, Master of Arts, were accused in the same synod of heresy, and, refusing to purge themselves, were excommunicated. The King, in support of this ecclesiastical severity, directed his letters to the Archbishop and his suffragans, empowering them to seize and imprison all persons suspected of the aforesaid heresy (11).

[H] *A synod at Oxford, in which a subsidy was granted to the King.* It was held in St. Fridiswide's monastery. Archbishop Courtney officiated at divine service.

(A) Spelman's
Councils, vol. ii.
p. 636.

issued his mandate to the Bishop of London for celebrating the festival of St. Anne, mother of the blessed Virgin (*k*). In 1384, he had a contest with the Earl of Arundel, some of whose servants had robbed one of his fish-ponds [*I*]. In 1386, the King, by the advice of his Parliament, put the administration of the government into the hands of eleven Commissioners [*K*], of whom Archbishop Courtney was the first (*l*). In 1387, he held a synod at London, in which a tenth was granted to the King (*m*). The same year, it being moved in a Parliament, held at London on occasion of the dissension between the King and his nobles, to inflict capital punishment on some of the ringleaders, and it being prohibited by the Canons for Bishops to be present and vote in cases of blood, the Archbishop and his suffragans withdrew from the House of Lords (*n*), having first entered a Protest in relation to their Peerage [*L*]. In 1399, he held a synod in St. Mary's Church in Cambridge, in which a tenth was granted to the King [*M*], on condition that he should pass over into France with an army before the first of October following (*o*). This year, Archbishop Courtney set out upon his metropolitical visitation, in which he was at first strongly opposed by the Bishops of Exeter and Salisbury [*N*]: but those prelates being

service, and the sermon was preached by the Chancellor Dr. Rigge. After the affair of the subsidy was over, the Bishops proceeded to enquire after persons suspected of heresy: upon which occasion, Nicholas Hereford, Philip Repindon, and John Asheton, excommunicated in the last synod, recanted their opinions, and were absolved. And, to secure the University from latitude in opinion, all the Graduates were obliged to swear a renunciation of Wickliff's tenets condemned at London (12).

[*I*] *The Earl of Arundel's servants had robbed one of the Archbishop's fish-ponds.* It was at his manor of South-Malling in the Diocese of Chichester. The Earl's servants had dragged the pond, and cleared it of all the fish. The Archbishop, in a great rage, ordered the Bishop of Chichester to excommunicate the robbers, whom he styled sacrilegious persons, and violaters of the Church of Canterbury. The Earl hereupon applied to the King, desiring his Majesty to take cognizance of the affair, that he might not incur the sentence of excommunication. The King complying with the Earl's request, the Archbishop wrote to the Bishop of Chichester, to revoke the excommunication. And thus the affair dropped. *Archiepiscopus, qui in Wickliffianos ante vehementissimus erat, jam in Arundeliam comitem magnam controversiam instituit. Hujus servuli piscinam in archiepiscopi manerio de Southmalling Cicestrensis diocesis sublati piscibus evacuaverunt. Quo facto archiepiscopus in magnam actus sevitiā Cicestrensis Episcopo mandavit, ut piscine sue prædones, quos sacrilegos & Cantuariensis ecclesie violatores nominavit, excommunicatione feriret. Comes autem Regem adiit, petiitque, ut de ea controversia, ne excommunicationem incurrat, in sua præsentia transigatur. Atque Archiepiscopus, postquam Rex hujus controversie cognitionem suscepisset, ad Cicestrensem Episcopum scripsit, ut latas excommunicationes revocaret (13).*

(13) M. Parker,
ib. p. 400, 401.

[*K*] *The King put the administration of the Government into the hands of eleven Commissioners.* Namely, William Archbishop of Canterbury, Alexander Archbishop of York, Edmund Duke of York, Thomas Duke of Gloucester, William Bishop of Winchester, Thomas Bishop of Exeter, Nicholas Abbot of Waltham, Richard Earl of Arundel, John Lord Cobham, Richard Le Scroop, and John Devereux. This committee was authorized to receive the public revenues, to inspect the King's household and Courts, in short to direct the government, and make what reformations in the kingdom they thought fit. But their commission expired at the end of one year (14). Henry de Knyghton adds three more commissioners to the foregoing, viz. the Bishop of Ely Chancellor, the Bishop of Hereford Treasurer, and John de Waltham Privy-Seal, making the whole number fourteen (15).

[*L*] *The Bishops entered a protest in relation to their Peerage.* The purport of it is to set forth, that the Lords Spiritual, by virtue of their Baronies, and as Peers of the Realm, had a right to sit, vote, and give judgment with the rest of the Peers, in all cases and matters transacted in Parliament. But since Impeachments of High Treason, and Tryals for Life, were coming on, and they were forbidden by the Canons of the Church to concern themselves in matters of that nature, they protested, that, for this only reason they were obliged to withdraw. And thus having guarded the en-

tireness of their Peerage, they concluded with declaring, that nothing done in their absence upon this occasion should be hereafter questioned or opposed by any of their body. This instrument, at the instance and petition of the Archbishop and his suffragans, was read in full Parliament, and entered upon the Parliament Rolls, by the King's command, with the assent of the Lords Temporal and the Commons (16).

[*M*] *A tenth was granted to the King.* Speed has particularly dilated upon the circumstances of this grant, which we shall represent in that historian's own words. 'The Laitie, at the Parliament now holden at London, had yielded to ayde the King with a Fifteenth, upon condition that the Clergie should succour him with a Tenth and an Halfe: against which unjust proportion William de Courtney, Archbishop of Canterbury, most stiffly opposed, alledging, that the Church ought to be free, nor in any wise to be taxed by the Laitie, and that himself would rather die then endure that the Church of England (the liberties whereof had by so many free Parliaments, in all times, and not only in the raigne of this king, bene confirmed) should be made a bond-maide. This answer so offended the Commons, that the Knights of the Shires, and some Peers of the land, with extreme fury besought, That Temporalities might be taken away from ecclesiastical persons, saying, that it was an Almesdeed, and an Act of Charitie, so to do, thereby to humble them. Neither did they doubt, but that their petition, which they had exhibited to the King, would take effect. Hereupon they designed among themselves, out of which Abbey, which should receive such a certaine summe, and out of which, another. I myself (saith a (*) Monk of St. Albans) heard one of those Knights confidently sweare, that he would have a yearly pension of a thousand Markes out of the Temporalities belonging to that Abbey. But the King, having heard both parts, commanded the Petitioners to silence, and the Petition to be razed out, saying, He would maintaine the English Church in the qualitie of the same state or better, in which himselfe had known it to be, when hee came to the crowne. The Archbishop hereupon, having consulted with the Clergie, came to the King, and declared, that he and the Clergie had with one consent willingly provided to supply his Majesties occasions with a Tenth. This Grant the King tooke so contentedly, as he openly affirmed he was better pleased with this free contribution of one Tenth for the present, than if he had gotten foure by compulsion (17).' We have much the same account, but more briefly delivered by the author of the *Antiquities*, &c. (18) in the following words: *In superiori autem Parlamento, cum Laici Subsidium sub hac conditione regi concessissent, si Clerus Decimam concederet; Archiepiscopus cum suis Suffraganeis valde iniquum et pessimi exempli asserabant, Cleri in regem donationes, quæ spontaneæ gratitæque esse debent, à Laicis tam strictis modis et conditionibus alligari: proinde se de quacunque cleri concessione in Synodo non acturos, nisi illa laicorum conditione deleta. Itaque Rex, qui eo die interfuit, expungi laicorum conditionem jussit; quod mox publice in Parlamento factum est.*

being at last reduced to terms of submission, he proceeded in his visitation without farther opposition: only, at the intercession of the Abbot of St. Alban's, he refrained from visiting certain Monasteries at Oxford (p). The same year, the King directed his Royal Mandate to the Archbishop, not to countenance or contribute any thing towards a subsidy for the Pope [O]. In a Parliament held at Winchester 1392, Archbishop Courtney, being probably suspected of abetting the papal encroachments upon the Church and State, delivered in an answer to certain Articles exhibited by the Commons in relation to those encroachments [P]. The same year, he visited the diocese of Lincoln, in which, by his vigilance

communication, to acknowledge the Archbishop's jurisdiction. Courtney issued a mandate in opposition thereto, requiring their submission to his authority. The Bishop appealed to the Pope, and fixed up his Appeal upon the gates of his Cathedral. The Archbishop notwithstanding proceeded in his Visitation, and cited the Bishop to appear before him, and answer to certain articles exhibited against him. The Citation was dispatched by one of the Archbishop's Officers named Peter Hill; who being met by some of the Bishop of Exeter's servants in the town of Topsham, they, discovering his business, not only beat him most unmercifully, but obliged the poor fellow to chew, and swallow down the *Instrument*, which was of parchment, wax and all. The King, being informed of this violence, sent an order to the Earl of Devonshire, and others, to apprehend the Bishop's servants, and bring them before the Archbishop; which being done, Courtney enjoined them the following penance. They were to walk in procession before the Cross, in their shirts only, and carrying lighted tapers in their hands; to pay a certain stipend to a Priest for saying daily Mass at the tomb of the Earl of Devonshire; and lastly to pay twenty shillings each towards repairing the walls of the city of Exeter. The Bishop in the mean time prosecuted his appeal in the Court of Rome; but finding the Archbishop's credit prevail there, and that the King likewise espoused his cause, he thought it the most prudent course to withdraw his appeal, and to acknowledge both his own offence and the Archbishop's jurisdiction (19). The Bishop of Salisbury (+), when it came to his turn to be visited, made no less resistance, but proceeded, as he thought, with more prudence and caution, than the Bishop of Exeter had done. For being of opinion, that the Archbishop's visitatorial power was founded solely upon the authority of Pope Urban, who was now dead, he found means to procure from Pope Boniface, his successor, an exemption of himself and his diocese from metropolitical visitation in virtue of Pope Urban's authority. With this privilege he waited on the Archbishop at Croydon, but met with an unexpected reception from that Prelate, who declared he would visit the diocese of Salisbury, notwithstanding any papal exemption, and commanded the Bishop to be ready to receive him on a certain day in his Cathedral Church. The Bishop, depending on his privilege, took no notice of this order, and, the Archbishop beginning his visitation, appealed to the Pope. The Archbishop immediately excommunicated him, and commenced a prosecution at Law against him, for endeavouring to withdraw himself from the subjection he owed to the See of Canterbury. The Bishop of Salisbury, terrified by this severity, and the recent example of his brother of Exeter, renounced his appeal, acknowledged the Archbishop's jurisdiction, and, through the intercession of the Earl of Salisbury, and others, obtained Absolution and Reconciliation (20).

(20) *Ibid.*

[O] *The King commanded him not to countenance, or contribute any thing towards a subsidy for the Pope.* The writ sets forth, 'that the Archbishop could not be ignorant, that the King was bound by oath to maintain the rights and customs of the kingdom, to govern impartially by the Laws, to secure the property of the subject, and to prevent impositions being charged or levied upon the people without the common consent of the kingdom.' The King suggests farther, 'that the Commons, lately assembled in Parliament at Westminster, had addressed him for a remedy against the Impositions upon the Clergy, at that time exacted by the Court of Rome; and had petitioned him, that if any person should bring in

'any Papal Bulls for levying such impositions, or should actually collect or levy such impositions, he should be adjudged, and suffer, as a traitor to him and his kingdom.' His Highness adds, 'that he had granted, with the consent of the same Parliament, that nothing should be levied or paid, that might tend to the burthen or damage of the subject and kingdom: That notwithstanding this legal provision, he was informed of a new Papal Imposition upon the Clergy, which by his (*the Archbishop*) authority, or that of his Suffragans by his order, was to be levied without the common advice and assent of the kingdom; which he (*the King*) could not suffer consistently with his oath.' And therefore in the close he commands the Archbishop, 'upon his allegiance, and under the highest forfeitures, to revoke his orders for the levying this tax, and to return what had been already paid,' enjoining him 'not to pay, or contribute any thing to this subsidy, under the penalties aforesaid.' *Witness the King at Westminster, the 10th day of October* (21). Writs of the same purport and date were directed to the Archbishop of York, to all the Bishops of both Provinces, to the Guardians of the Spiritualities, and to the several Collectors of this Tax. A like Writ was directed to the Pope's Nuntio, commanding him to desist from exacting this subsidy, *sub forisfactura vite et membrorum*, under forfeiture of life and limb. This imposition was the payment of a Tenth laid upon the Clergy by the Pope, as appears by the title of the record, *Decimis Papæ non solvendis*.

(21) *Rot. Claus.*
13 Ric. II. P. i.
M. 17. *De Decimis Papæ non solvendis.*

[P] *He delivered in an answer to certain Articles exhibited by the Commons, &c.* The tenor of it was as follows. 'To our Dread Sovereign Lord the King in this present Parliament, his humble Chaplain, William Archbishop of Canterbury, gives in his Answer to the Petition brought into the Parliament by the Commons of the Realm, in which Petition are contained certain Articles: That is to say, First, *Whereas our Sovereign Lord the King, and all his Liege Subjects, ought of right, and had been always accustomed to sue in the King's Court, to recover their presentations to churches, to maintain their titles to prebendaries, and other benefices of Holy Church, to which they have a right to present: The cognizance of which plea belongs solely to the Court of our Sovereign Lord the King by virtue of his antient prerogative, maintained and practised in the reigns of all his predecessors Kings of England; and when judgment is given in his Highness's said court upon any such plea, the Archbishops, bishops, and other spiritual persons, who have the right of giving Institution to such benefices within their jurisdiction, are bound to execute such judgments, and used always to make execution of them at the King's command (since no lay person can make any such execution), and are also bound to make execution of many other commands of our Lord the King: Of which right the Crown of England has been all along peaceably possessed: Notwithstanding, of late, divers processes have been made by the Holy Father the Pope, and Excommunications published against several English Bishops, for making such executions, and acting in pursuance to the King's commands in the cases above-mentioned; and such censures of his Holiness are inflicted in open dishonour of the Crown, and subversion of the Prerogative Royal, of the King's Laws, and his whole Realm, unless prevented by proper remedies.*' To this article, the Archbishop, premising his Protestation, that it was not his intention to affirm, that our holy father the Pope has no authority to excommunicate a Bishop, pursuant to the Laws of Holy Church, declares

(9) Knyghton,
ubi supra, col.
2736, 2737.

vigilance and activity, he gave a considerable check to the growth of Wickliff's doctrines (9). In 1395, he obtained from the Pope a grant of four-pence in the pound on all ecclesiastical benefices; in which he was opposed by the Bishop of Lincoln, who would not suffer it to be collected in his diocese, and appealed to the Pope (r). But, before the matter could be decided, Archbishop Courtney died, July the 31st 1396, at Maidstone in Kent, and was buried in the Cathedral Church of Canterbury [2], under a monument of alabaster, on the South side, near the tomb of Thomas Becket, and at the feet of the Black Prince; the King, who was then going to marry the King of France's daughter, being present, with several of his nobles, at the funeral solemnity (s). This Prelate founded a College of Secular Priests at Maidstone. He left a thousand marks for the repair of the Cathedral Church of Canterbury; also to the same Church a silver-gilt image of the Trinity, with six Apostles standing round it weighing 160 pounds; some books [R], and some ecclesiastical vestments (t). He obtained from King Richard a

grant

clares and answers, that if any executions of processes are made, or shall be made, by any person; if any censures of excommunication shall be published and served upon any English Bishops, or any other of the King's subjects, for their having made execution of any such commands, he maintains such censures to be prejudicial to the King's prerogative, as is set forth in the Commons Petition: And that so far forth he is resolved to stand with our Lord the King, and support his Crown, in the matters above-mentioned, to the utmost of his power. And whereas it is alledged in the Petition, *That complaint has been made, that the said Holy Father the Pope had designed to translate some English Prelates to Sees out of the Realm, and some from one Bishoprick to another, without the knowledge and consent of our Lord the King, and without the assent of the Prelates so translated (which Prelates are very serviceable and necessary to our Lord the King, and his whole Realm); which translations if they should be suffered, the statutes of the Realm would be defeated, and made in a great measure insignificant, and the said Lieges of his Highness's Council would be removed out of his kingdoms, without their assent, and against their inclination, and the treasure of the said Realm would be exported: By which means the country would become destitute both of wealth and counsel, to the utter destruction of the said Realm: And thus the Crown of England, which has always been so free and independent, as not to have any earthly sovereign, but to be immediately subject to God in all things touching the Prerogatives and Royalty of the said Crown, would be made subject to the Pope, and the Laws and Statutes of the Realm defeated and set aside by him at pleasure, to the utter destruction of the Sovereignty of our Lord the King, his Crown and Royalty, and his whole kingdom, which God forbid.* The said Archbishop, first protesting, that 'tis not his intention to affirm, that our Holy Father aforesaid cannot make translations of Prelates according to the Laws of Holy Church, answers and declares, that if any English Prelates, who by their capacity and qualifications were very serviceable and necessary to our Lord the King, and his Realm, should be translated to any Sees in foreign dominions, or the sage Lieges of his Council were forced out of the kingdom against their will, and that by this means the wealth and treasure of the kingdom should be exported; that such translations are prejudicial to the King and his Crown, and that if any such thing should happen, he resolves to adhere loyally to the King, and endeavour, as he is bound by his allegiance, to support his Highness in this, and all other instances, in which the rights of his Crown were concerned. He concluded with praying, that this Declaration might be entered in the *Parliament Rolls*; which was granted (22). This Declaration of Archbishop Courtney's seems to have led the way to the famous *Statute of Præmunire* passed in this Parliament; and it is evident from hence, that this Prelate was no vassal to the Court of Rome, nor asserted the Pope's Supremacy so far as to weaken his allegiance, or to make him an ill subject.

[2] He was buried in the Cathedral Church of Canterbury. It appears by a codicil annexed to his will, extant in the *Archives* of the Church of Canterbury, that, upon his death-bed, not thinking himself

worthy to lie in his own Metropolitan, or in any other Cathedral or Collegiate Church, he chose, and desired, to be buried in the Church-yard of Maidstone-College, in the place designed for his Esquire John Butler. *Languens in extremis in interiori camera Manerii de Maydenston, voluit & ordinavit, quod quia non reputavit se dignum, ut dixit, in sua Metropolitana, aut aliqua Cathedrali aut Collegiata Ecclesia sepeliri, voluit & elegit sepulturam suam in Cæmeterio Ecclesiæ Collegiatae de Maydenston, in loco designato Johanni Botelere Armigero suo* (23). But most certain it is, Dart tells us (24), that, notwithstanding this humble thought of his, in his lowness of spirits, King Richard, being at Canterbury, when he was to be buried, overruled his Will, and ordered him to be interred in that Cathedral.

[R] — *some books.* These were: St. Augustin's *Milleloquium*, A *Dictionary* in three volumes, and *Doctor de Lira* in two volumes. His nephew Richard Courtney was to have the use of them during his life, and his executors to return them after his death, under a penalty of three hundred pounds; for which they gave a bond. My author calls them, *sex libros preciosos*, six valuable books (25).

B.

* [Our learned Predecessor has touched the character of Archbishop Courtney with a very gentle hand. Wickliff, without any qualifying or softening word, is called an heresiarch, which is usually a term of reproach; and the Archbishop's conduct towards that eminent reformer is not related in the language of disapprobation. It is only recorded, that several of Wickliff's tenets were condemned as heretical and erroneous; and that a considerable check was given to the growth of his doctrines, by the vigilance and activity of Courtney. Such lenity of expression was scarcely becoming a Protestant Divine. In fact, Bishop Courtney was attached to the See of Rome beyond the duty of a subject, and he was, at the same time, a bitter persecutor. There is sufficient evidence of the former from many circumstances mentioned in his article, and especially from his behaviour in regard to the Florentines. His publishing the Pope's Bull at Paul's Cross, without consulting the King, and his giving the populace licence to plunder the houses of the Florentines who had been excommunicated by that Bull, were acts of great disloyalty and insolence. His character as a persecutor would have been equally apparent, if his treatment of Wickliff had been properly related. This character he uniformly maintained, both when Bishop of London and Archbishop of Canterbury, as may be seen in the life of Wickliff, written by Mr. Gilpin, to whom the world is so much indebted for several Biographical pieces, and other very elegant publications. One circumstance, which displays the strength and firmness of Courtney's mind in the exercise of his religious bigotry, deserves to be noticed. When the Archbishop, on a certain day, with a number of Bishops and Divines, had assembled to condemn the tenets of Wickliff, just as they were going to enter upon business, a violent earthquake shook the monastery. Upon this, the terrified Bishops threw down their papers, and crying out, that the business was displeasing to God, came to a hasty resolution to proceed no farther. "The Archbishop alone," says

grant of four fairs at Canterbury yearly, viz. on Innocents-Day, Whitfun-Eve, the Eve of Becket's translation, and Michaelmas-Eve; each to continue nine days, and to be kept within the site of the Priory (u).

(u) Dart, ubi supra.

Mr. Gilpin, "remained unmoved. With equal spirit and address he chid their superstitious fears, and told them, that if the earthquake portended any thing, it portended the downfall of Heresy; that as noxious vapours are lodged in the bowels of the earth, and are expelled by these violent concussions, so by their strenuous endeavours, the kingdom should be purified from the pestilential taint of heresy, which had infected it in every part. This speech, together with the news, that the earthquake was general through the city, as it was afterwards indeed found to have been through the island, dispelled their fears. Wickliff would often merrily speak of this accident; and would call this assembly the Council of the Herydene;

"Herydene being the old English word for earthquake (26)."

In the Parliamentary History, some notice is taken of the speech which, as Chancellor of England, Courtney made at the opening of the Parliament in 1382. The words which he took for his theme were *Rex convenire fecit consilium*, and it is said that he made a notable oration upon it in English. He applied his text to the good and virtuous government of the kingdom during his reign. No reign, the Archbishop affirmed, could long endure if vice ruled in it, to remedy which evil the Parliament was called, the laws then in being not having been found effectual to that purpose (27).]

** [COWARD (WILLIAM), a Medical and Metaphysical Writer, (of whom we are able to give only an imperfect account, but who is, nevertheless, entitled to some degree of notice in this work,) was the son of Mr. William Coward of the city of Winchester, where he was born in the year 1656, or 1657. His mother was the daughter of Mr. George Lamphire, an Apothecary in that city, and the sister of Dr. John Lamphire, an eminent Physician at Oxford, Camden's Professor of History, and Principal of Hart Hall (a). It is not certain where young Coward received his grammatical education; but it is natural to suppose that it was in his native place, at Wykeham's School, which hath long sustained a great and deserved reputation, and produced many learned men. At the age of eighteen, or in his eighteenth year, he was removed to Oxford, and, in the month of May, 1674, became a Commoner of Hart Hall, the inducement to which might probably be, that his uncle was at the head of that seminary. However, he did not long continue there; for in the year following, he was admitted a Scholar of Wadham College. On the 27th of June, 1677, he took the degree of Bachelor of Arts; and in January, 1679-80, he was chosen Probationer Fellow of Merton College, which may reasonably be considered as a testimony of his having obtained some reputation for his literary improvements (b). In 1681, was published Mr. Dryden's *Abfalom and Achitophel*, a production on the celebrity of which we need not expatiate. At Oxford it could not fail to be greatly admired for its poetical merit; beside which, it might be the better received on account of its containing a severe satire on the Duke of Monmouth and the Earl of Shaftesbury; two men who were certainly no favourites with that loyal University. Accordingly, the admiration of the poem produced two Latin Versions of it, both of which were written and printed at Oxford; one by Mr. Francis Atterbury, (afterwards the celebrated Bishop of Rochester) who was assisted in it by Mr. Francis Hickman, a Student of Christ-Church; and the other by Mr. Coward. These translations were published in 4to. in 1682. Whatever proof Mr. Coward's Version of the *Abfalom and Achitophel* might afford of his progress in Classical Literature, he was not very fortunate in this his first publication. It was compared with Mr. Atterbury's production, not a little to its disadvantage. According to Anthony Wood, he was schooled for it in the College; it was not well received in the University; and Atterbury's Poem was extolled as greatly superior. To conceal, in some degree, Mr. Coward's mortification, a friend of his, in a public paper, advertized the translation, as written by a Walter Curle, of Hertford, Gentleman (c). On the 13th of December, 1683, Mr. Coward was admitted to the degree of Master of Arts. Having determined to apply himself to the practice of Medicine, he prosecuted his studies in that line; in consequence of which, he took the degree of Bachelor of Physic, on the 23d of June, 1685, and of Doctor, on the 2d of July, 1687 (d). After his quitting Oxford, he exercised his profession at Northampton, from which place he removed to London, in 1693, or 1694, and settled in Lombard Street. In 1695, he published a tract, in 8vo. entitled, "*De Fermento volatili Nutritio Conjectura Rationis, qua ostenditur Spiritum volatilem oleosum, è Sanguine suffusum, esse verum ac genuinum Concoctionis ac Nutritionis Instrumentum* (e)." For this work he had an honourable approbation from the President and Censors of the College of Physicians (f).

It was not to Medical studies only that Dr. Coward confined his attention. Besides being fond of polite learning, he entered deeply into metaphysical speculations, especially with regard to the nature of the soul, and the natural immortality of man. The result of his enquiries was the publication, in 1702, under the fictitious name of Estibius Psycalthes, of a book, the title of which was, "*Second Thoughts concerning human Soul, demonstrating the Notion of human Soul, as believed to be a spiritual, immortal Substance united to a human Body, to be a plain heathenish Invention, and not consonant to the Principles of Philosophy, Reason, or Religion; but the ground only of many absurd* and

“and superstitious Opinions, abominable to the reformed Churches, and derogatory in general to true Christianity.” This work was dedicated by the Doctor to the Clergy of the Church of England, and he professes, at his setting out, “that the main stress of arguments, either to confound or support his opinion, must be drawn from those only credentials of true and orthodox Divinity, the lively oracles of God, the Holy Scriptures.” In another part, in answer to the Question, *Doth Man die like a Brute Beast?* He says, “Yes, in respect of their end in this life; both their deaths consist in a privation of life (g).” “But then,” he adds, “Man has this prerogative or pre-eminence above a brute, that he will be raised to life again, and be made partaker of eternal happiness in the world to come.” Notwithstanding these, “and as many other proofs,” (says a most competent judge) “of a firm and serious attachment to the authority of the Christian Scriptures, as it is in any man’s power to give under his hand,” Dr. Coward has commonly made one in the list with those who have been reputed to be the most rancorous and determined adversaries of Christianity (h). Swift hath ranked him with Toland, Tindal, and Gildon (i); and passages to the like purpose are not unfrequent among controversial writers, especially during the former part of the present century. However sincere and zealous Dr. Coward might be in his belief of the gospel, his denial of the immateriality and natural immortality of the soul, and of a separate state of existence between the time of death and the general resurrection, was so contrary to the opinions then almost universally received, that it is not very surprizing that he should hastily be considered as an enemy to revelation. It might be expected that he would immediately meet with opponents; and accordingly he was attacked by various writers, of different complexions and abilities; among whom were Dr. Nichols, Mr. John Broughton, and Mr. John Turner. Dr. Nichols took up the argument in his “Conference with a Theist.” Mr. Broughton wrote a treatise, entitled “Psychologia, or, An Account of the Nature of the rational Soul, in two Parts;” and Mr. Turner published “A Vindication of the separate Existence of the soul from a late Author’s Second Thoughts.” Both these pieces appeared in 1703. Mr. Turner’s publication was answered by Dr. Coward, in a pamphlet called “Farther Thoughts upon second Thoughts.” In Mr. Turner the Doctor acknowledged that he had a rational and candid adversary. This doth not appear to have been the case with regard to Mr. Broughton; who, therefore, was treated by Dr. Coward with a suitable degree of severity, in “An Epistolary reply to Mr. Broughton’s Psychologia,” which reply was not separately printed, but annexed to a work of the Doctor’s, published in the beginning of the year 1704, and entitled “The grand Essay; or, A Vindication of Reason and Religion against Imposthures of Philosophy.” In this last production, the idea of the human Soul’s being an immaterial substance, was again vigorously attacked. From the “Epistolary Reply” we shall insert two or three passages below, which while they serve to display Dr. Coward’s peculiar sentiments, and his mode of writing, will tend to throw some light on his Christian character [A]. A late Author (k), in speaking of Mr. Broughton’s

(g) For this he quotes Eccles. iii. 19.

(i) Supplement to Swift’s Works, vol. i. p. 237, 238.

(h) Historical Review, p. 174, 175.

(k) The Rev. T. Broughton, M. A.

[A] We shall insert two or three passages below.] “Good Sir,” says Dr. Coward, (addressing himself to Mr. Broughton) “do but consider without passion, how you have answered that argument, drawn from eternal life being the gift of God; ergo the philosopher ought not to give us an unwarrantable immortality. This is the substance of *Estibius*’s argument. Ans. 1. It is a superlative gift to have an immortal soul, p. 208. 2. We know it from scripture revelation. 3. Life denotes happiness in scripture; so by a new and full assurance, it is by scripture become a new gift. 4. The forfeited title to this happiness, was by the gospel restored to mankind. —What is all this to the purpose? If I say, immortality to man is a superlative gift revealed from scripture only, and this immortality consists in an happiness of life after death, which Adam forfeited and Christ restored, is not this as good divinity as yours? Nay, I am sure, yours has not that probability of truth, as mine has, because your first proposition is precarious and groundless, unless you make it appear, that God gave man an immortal soul at creation; and mine has the whole religion of the gospel to justify it. Sir, but one question more. Is immortal life a gift to an immortal being? Yes, say you, happiness super-added to immortal life, is a gift; and that is meant by immortal life in the scripture. Then pray do you interpret scripture, if your head can do it right, and tell us, that Christ promised his believer only happiness super-added to our immortal life in the next world, for he knew that we had an immortal life before. Can you, with any face, give such a gloss to the scriptures? Is not

“the whole intent and purport of the gospel to tell us, that though we had forfeited eternal life by Adam’s transgression, yet by Christ we should be restored to that again, who else would have died eternally? Doth he not first promise life to a dead lump of earth, rotted in the grave after several thousand years, by which we are put in a state of being capable of happiness? And after this promise of life, then if you do well, you shall have happiness super-added to it, as a new gift. Away with your trifling with a text. Is life a gift to a dead carcase or no? If it be, it is a gift of God, and no being else can possibly give it. If it be not the gift of God, then the scripture is vain, and the promise of none effect. For as to happiness or misery attending that life, it is subsequent to it, and depends upon yourself for the most part, to perform the conditions of obedience God has set before you.” “Epistolary Reply, p. 233.” After this, the Doctor proceeds as follows: “Another argument like the former, is in relation to the curse denounced against Adam, *In the day thou eat’st thereof* (viz. the forbidden fruit) *thou shalt die*. What sinned? saith *Estibius*. Soul as well as body, and therefore both were liable to death. But say you, by way of a nice question, *What is to be understood by, thou?* p. 279. Ans. The whole Man, or Person of Man. Then, say I, whole Man died. —No, whole Man may be as well understood for a part, as a part for the whole.—This is rare philosophy indeed! Whole Man died, therefore one-half of him survived,” *Epist. Rep.* p. 239. Again. “As to those arguments, *Estibius* urges from the nature and end of a resurrection and general judgment, “I be-

Psychologia, describes it as a learned and solid answer to the "Second Thoughts;" but the great Mr. Locke entertained a very different opinion of the merit of the work. For in a letter to Mr. Collins, he says, "The other book you mentioned, I have seen, and am so well satisfied by his fifth section, what a doughty Squire he is like to prove in the rest, that I think not to trouble myself to look farther into him. He has there argued very weakly against his adversary, but very strongly against himself (1)."

(1) Historical View, p. 176. 181, 182. 305. Note.

So obnoxious were Dr. Coward's positions, that it was not deemed sufficient to attempt the answering of them by the force alone of reason and argument. A more concise and effectual method of confuting them was sought for, by an appeal to human authority. On Friday, the 10th of March, 1703-4, a complaint was made to the House of Commons of the "Second Thoughts," and the "Grand Essay;" which books were brought up to the Table, and some parts of them read. The consequence of this was, an order, "That a Committee be appointed to examine the said Books, and collect thereout such parts thereof as are offensive; and to examine who is the author, printer, and publisher thereof." At the same time, the matter was referred to Sir Dudley Cullum, Colonel Stringer, Mr. Bromley, Sir Christopher Musgrave, Mr. Lownds, Mr. Topham, Mr. Smith, Sir Matthew Dudley, Mr. Colcher, Mr. Annesley, Mr. How, Mr. Sambrooke, Sir William Whitlock, Mr. Fagg, Mr. Moncton, Sir John Holland, Mr. Boyle, Mr. St. John, Mr. Chancellor of the Exchequer, Mr. Moor, Mr. Sharp, Mr. Freeman, Mr. Crawford, Mr. Harley, and Sir Jervas Elwes; who were directed to meet that afternoon, and had power given them to send for persons, papers, and records. Whether all or any of these Gentlemen (Mr. St. John, afterwards the famous Lord Bolingbroke, excepted) were acute and able Divines, doth not stand upon Record. If they were, it is probable that no subsequent House of Commons could boast of having produced a superior, or an equal number of skilful Theologues; and we assume some merit to ourselves, for rescuing them from the oblivion in which they have hitherto slept in this respect, and bringing them forward to public notice. But perhaps, after all, they might in part be indebted to the Chaplain of the House, or to still higher ecclesiastics, for their complete knowledge of the malignity of Dr. Coward's principles. Be this as it may, on the 17th of March, Sir David Cullum reported from the Committee, that they had examined the books, and had collected out of them several passages which they conceived to be offensive; and that they found, that Dr. Coward was the author of them; that Mr. David Edwards was the printer of the one, and Mr. W. Pierfon of the other; and that both the books were published by Mr. Bassett. Sir David Cullum having read the report in his place [B], and the same being read again, after

"I believe you foresaw them unanswerable, and therefore was forced to recur to an intermediate state.—This dream has indeed relieved you one way, but then it presses you very hard on the confines of Purgatory. For what end are souls reserved in that state? If wicked, and in torments, then it cannot be less than a Purgatory. If righteous, and in happiness, though but initial, as you term it, then you answer not well, for the justice of God, who has, by such his assignment, attested them to be so far innocent, as to be in a state of certain salvation, and certain happiness, and yet he still detains them from a perfect consummation and bliss, so many thousand years before a general resurrection. If any man had for that time *no being at all*, as *Estibius* avers it, it is no injustice to a non-existent man, because he is not capable of having injustice done him in a state of non-existence. Again, the scriptures every where, by the particle, *then*, relating to a fixed day of a general judgment, seem plainly to testify God's ordination on my side. But for God to give our souls existence in an intermediate state, who knew that they will have a certain happiness full and complete in all degrees, yet to detain them from it so long, without shewing any ordination of his from scripture to justify the truth of your opinion; by your good leave, I think, seems a grand reflection and derogation to infinite justice; for which opinion you deserve Lustration or Purgatory at least." *Epist. Reply*, p. 241. The advices which Dr. Coward gives to Mr. Broughton are worthy of being attended to by Controversialists in general. One word or two of advice to you, and I have done. 1. Whenever you write again, get a man of solid judgment and reading to supervise your papers before they come hastily into the world, that your expressions *may always be sense*, if they bear little or no weight in argumentation. 2. Take such a man's judgment in examining the reasons

"you propose as demonstrative, and especially where you attempt to reduce the adversary to own absurdities, and to ridicule him. 3. Never use calumny for argument, by calling a man *atheist*, *heretic*, *irreligious*, &c. either by inuendo or express words. For it becomes such as are of your station, and of your function, to treat men with candour and mildness of temper (whatever latitude a layman may take) more particularly. This is a breach of good-manners, and give me leave to tell you, that when you presume to call one *atheist* or *heretic*, who is known constantly to frequent the Sacrament often in the year, and seldom fails public devotion in the week days, in the Church of England, you, or any one else, do very ill to brand such an one with *atheism*, or *irreligion*, or as a broacher of heretical opinions." p. 246 (1).

(1) An Historical View of the Controversy concerning an intermediate State, p. 302—305. note.

[B] Read the report in his place.] The report was as follows:

In the "second thoughts concerning human soul, &c."

P. 84. "Now the notion of an immaterial, immortal, substantial Being in Man, or Soul, was one of those principles I had by education so imbibed; and having thought fit more strictly to enquire into the reasons or foundation of this belief, I find it to be only an opinion derived down to posterity, as it were, by trust."

P. 85. "But these grounds of the framing an immaterial, immortal soul in a man, I look upon to be idle and fabulous, and conceive it rather to be the consent and doctrine of the philosophers in general preaching, that virtue was to be rewarded, and vice punished; and when they usually saw good men die untimely deaths, and unrewarded too, being ignorant of a resurrection, taught their scholars, that men's souls, after death, remained alive to receive the same; i. e. good men rewards, and ill men punishments."

P. 88. "Now after the piety of the primitive

"Christ-

after it had been delivered in at the Clerk's Table, the House proceeded to the examination of the evidence, with regard to the writing, printing, and vending of the two books. Sufficient proof having been produced with respect to the writer of them, Dr. Coward was called in. Being examined accordingly, he acknowledged that he was the author of the books; and declared, that he never intended any thing against Religion; that there was nothing contained in them, contrary either to Morality or Religion; and that if there were

"Christians began, by secular interest, to be perverted, and the ambition of crafty prelates grew so high, as to require to be supported in grandeur and state, then it became convenient to propagate this doctrine to the height."

P. 144. "Thus, upon the whole, we find how weak and insufficient the arguments of philosophy are, to defend the opinion of an immaterial soul, united to the body; what idle and trifling distinctions they are forced to make to defend it; what shifts and evasions they frame to support their notion, insomuch that a man may say, there is no plea to ground a belief on the philosophers arguments, which pretend to establish two distinct substances, spiritual and material, in man, but only to those who are resolved not to be informed, and will know no better."

P. 176. "If we allow this conjunction of body and soul to be the union of an immortal immaterial spirit to a mortal material body, where is then the mystery of the hypostatic union? The union of the soul and body no man yet ever allowed to be a mystery of religion; therefore, either both must be reputed so, or neither."

P. 206. "1. That human soul will cease when the body dies (i. e. life and soul are the same thing in Scripture) and consequently the common notion of a spiritual immortal substance, united to, or in man, is erroneous."

"That, by the common course of Providence, man's immortality begins not until after the resurrection."

"As to the first proposition, thus I argue: If it appear by the whole current of scripture, that life is properly the soul of man; and no text gives us a sufficient ground to call it an immaterial substance; then the soul of man will cease to be, when the body dies. But it appears by the whole current of Scripture, &c. ergo, the soul of man will cease to be, when the body dies; and, consequently, the notion of a spiritual immortal substance, united to, or in, man, is erroneous."

P. 222. "Thessalon. Cap. IV. Ver. 13, 14.—Who will be changed in a moment, in the twinkling of an eye, at the last trump: for this corruptible must put on incorruption, and this mortal put on immortality, before it can be pronounced, that death is swallowed up of victory, 1 Cor. xv. ver. 51, &c. Where it is very observable, that the Apostle, in all the whole course of his writing, says, 'we,' not 'our bodies;' who cannot be called 'we:' As, 'we shall not all sleep;' 'we shall be raised incorruptible;' and, 'we shall be changed;' which could not be true, were our soul, our better part, an incorruptible immortal being already; for that has no change at all, but retains its first immortal nature."

P. 278. Obj. 14. "Then shall the dust return to the earth as it was, and the spirit to God that gave it: therefore, herein is a plain distinction of soul and body; and that when we die, our souls will certainly return to God:"

Answer: "This is the great *Goliab* argument, generally brought to knock down all opposers; though it argues not for an immaterial spiritual substance, but is rather, and ought to be, explained as a confirmation of my opinion."

P. 280. "Thus far, I think, I have sufficiently answered all objections brought from the Old Testament: and though there occur many of the same nature in the Apocrypha, and, indeed, more seemingly apposite to my opinion, yet I shall here pass them by until the Apocrypha be proved canonical: and so proceed to objections extorted from the New Testament."

"First, The first I meet with, that seems significant, is this: 'Fear not them that kill the body,

but are not able to kill the soul; but rather fear him which is able to destroy both body and soul in hell." Matth. x. 28. Therefore there is a being in man distinct from his body, capable of being cast into a place of torment; whereas the body only lies in the power of man, and not the soul, to be destroyed."

P. 283, 284. "Answer: If by this text was meant a spiritual, substantial, immortal soul, no doubt but that our Saviour knew it, and so did his Disciples, to whom he then preached this doctrine; therefore, for our Saviour to instruct them in a doctrine, viz. The impossibility of man's power to kill an immortal spirit, which they must know before, if true, would favour more of trifling, than of giving real instructions in Christianity; for it might easily be returned, that all the world knows an immortal spirit cannot be killed, so that such instructions are vain and useless."

P. 285, 286. Luke xxiii. 43. "This day (says our Saviour to the thief on the cross) thou shalt be with me in Paradise. Therefore his soul must be there with our Saviour, or else our Saviour's words could not be admitted for truth; for, he sure, the thief's body was buried, and laid in the ground, as others were."

Answer. "This objection, though oft brought, I cannot see of what force it is, unless it be, to tell us, that our Saviour spake to the soul of the thief, when he said, 'Thou shalt be with me in Paradise.' 'Thou soul of the thief, for owning me, shall this day be with me in bliss: but O thief! thy body shall go to corruption, as other bodies do.' Now what a speech must such men make for our Saviour, that gave such an interpretation of this text, let the learned judge."

In "The grand Essay, &c."

P. 185. "Theol. How could man come by this immaterial substance, but at the first creation? And it's plain there, by express words, that he was made no more than a living creature."

"Philos. You had as good throw your cap into the air. All the Heathen Philosophers preached up man to be made of a soul, called immaterial substance and body; and if you throw all the Old and New Testament at that doctrine, you'll never confound it, or convince its believers to the contrary."

P. 186, 187. "Theol. Don't a man die if he lose his life?"

"Philos. No; he doth die in his body but not in his soul; for that lives as well, if not better, than it did in the body."

"Theol. Not one word of this, or like it, do I find in the Bible. This is as much as to say, a man doth die, and he doth not die. Pray what is meant by dying in his body?"

"Philos. His material body dies."

"Theol. As far as I find it never lived, for it was the soul lived all the while; and how can any thing die which never lived?"

"Philos. It's no matter how; it is so: The soul, or immaterial substance, gave the body life; and now it is separated the body is dead."

"Theol. What chapter and verse, for your immaterial living substance, in the Bible?"

"Philos. I told you you were always for Scripture. It's so by Philosophy, that's enough: and so if a man is said to sleep in death, he is as fully awake in his soul, the next minute of separation, as ever he was in his life in this world."

"Theol. A pretty way of sleeping indeed! You Philosophers make us believe any thing. I'll be stigmatized (for a fool)(2) all my life-time, if you can bring the like case where so many absurdities, without any warrant from Scripture, or common reason, are believed."

(2) These words are supplied from the original Report.

any thing therein against Religion or Morality, he was heartily sorry, and ready to recant the same. The House then resolved, "That the said Books do contain therein divers "Doctrines and Positions, contrary to the Doctrine of the Church of England, and "tending to the Subversion of the Christian Religion;" and ordered, that they should be burnt, next day, by the Common Hangman, in New Palace Yard, Westminster^(m), which order was carried into execution. One effect of this procedure was, that Dr. Coward's works were more generally read; for in the same year he gave to the world a new edition of his "Second Thoughts;" which was followed by a Treatise, entitled, "The just Scrutiny; or, a serious Enquiry into the modern notions of the Soul (*).

(m) Journals of the House of Commons, vol. xiv. p. 373. 379, 380.

(*) British Museum.

After this, the Doctor returned to the studies belonging to his profession, and, in 1706, published a Tract, entitled "Ophthalmiatria," which he dedicated to his patron, Manuel Sorrel, Esq. In this Dedication, Mr. Sorrel is complimented as a man of learning and judgment, in whose approbation of his works our author declares himself satisfied and happy, and enabled to despise the idle and profane mob of Sciolists, whom certain *pious agents of sedition* had encouraged to calumniate him. Dr. Coward, in the first chapter of his Ophthalmiatria, the title of which is, "De Oculo, ejusque Partibus," speaking of the manner wherein vision is performed and accounted for, diverts himself with the notion of an immaterial substance residing in the pineal gland, by the help of which, he tells us, the Philosophers of the day accounted for every phænomenon relating to sensation. Having exposed this hypothesis as empty and unphilosophical, so far as relates to vision, he adds, that he hath said enough on the subject elsewhere, and exhorts the learned of all countries, to examine, thoroughly and candidly, what absurd and ridiculous, and almost blasphemous opinions, follow from this doctrine of an *immaterial substance*. He hints, at the same time, that his domestic adversaries, not being able to confute him by reasoning, had endeavoured to silence him by fire and faggot⁽ⁿ⁾. Hence it is apparent that the burning of Dr. Coward's books had not had the least effect in abating his zeal for his peculiar sentiments, and that he retained a strong sense of the harsh treatment he had received. From a letter of our author to Dr. Hans Sloane, dated May 28, 1706, which is preserved in the British Museum, and has lately been published in the Gentleman's Magazine, it appears that he was in the habits of intimacy with this eminent Physician and Naturalist. Dr. Sloane carried his friendship so far as to take upon himself the supervisal of the Ophthalmiatria. He wished Dr. Coward to alter what related to his private opinion concerning the Soul, and to add something in commendation of the tender consciences of Physicians in point of Religion. The former our author declared could not be done; and with regard to the latter, he thought that if he advanced any thing on that head, it would be interpreted rather as a piece of a ridicule, than a serious apology for his conduct. As the letter to Dr. Sloane is dated from the Green Bell over against the Castle Tavern, (near Holborn in Fetter Lane) there is reason to believe that Dr. Coward had quitted London, and was now only a visitant in town, for the purpose of his publication^(o). Indeed, the fact is ascertained from the lists of the College of Physicians, which are preserved in the British Museum. In the Catalogue for 1706, Dr. William Coward, who stands under the head of Candidates, is then, for the first time, mentioned as residing in the country. The persecution he had met with, and the unpopularity arising from his works, might be inducements with him to leave the metropolis. It doth not appear, for twelve years, to what part of the kingdom he had retired^(p).

(n) Historical View, p. 180, 181.

(o) Gent. Mag. for Feb. 1787, p. 100.

(p) Lists of the College of Physicians, in the British Museum.

From this period we hear no more of Dr. Coward as a Medical or Metaphysical writer. Even when he had been the most engaged in abstruse and scientific enquiries, he had not omitted the study of polite Literature; for we are told that, in 1705, he published "The Lives of Abraham, Isaac, and Jacob, an Heroic Poem^(q)." Of this work, as we have not been able to meet with it, we can give no account. It doth not seem to have had even the fate of Sir Richard Blackmore's productions, to be spoken of and abused for a time, and then to be neglected. As far as we are capable of judging, it was little noticed at first; and it has now sunk into total oblivion. The subject of the Poem indicates our Author's regard for the Scriptures, and affords a farther proof how unjustly he has been represented as an enemy to Revelation. Concerning another poetical performance by Dr. Coward, and the last of his writings that has come to our knowledge, we are able to give more accurate intelligence. It was published in 1709, and is entitled, "Licentia Poetica discussed; or the true Test of Poetry: without which it is difficult to judge of, "or compose a correct English Poem. To which are added Critical Observations on the "principal Ancient and Modern Poets, viz. Homer, Horace, Virgil, Milton, Cowley, "Dryden, &c. as frequently liable to just censure." This work, which is divided into two books, is dedicated to the Duke of Shrewsbury, and introduced by a long and learned preface. Prefixed are three copies of commendatory verses, signed A. Hill, J. Gay, and Sam. Barklay. The two former, Aaron Hill and John Gay, were then young Poets, who afterwards, as is well known, rose to a considerable degree of reputation. Coward is celebrated by them as a great bard, a title to which he had certainly no claim, though his "Licentia," considered as a didactic poem, and as such poems were then generally written, is not contemptible. It is not so correct as Lord Roscommon's Essay on translated verse;

(q) Mag. ubi supra.

verse; But it is little, if at all, inferior to the Duke of Buckingham's Essay on Poetry, which was so much extolled in its day. The rules laid down by Dr. Coward for poetical composition are often minute, but usually, though not universally, founded on good sense and a just taste. He doth not approve of blank verse, and had not felt the harmony and variety of Milton's numbers. Triplets, double rhimes, and Alexandrines are condemned by him; the last of which, however, he admits on some great occasion. The notes, which are large and numerous, display no small extent of reading; and to the whole is added, by way of appendix, "A Political Essay," from which it appears that our author was a very zealous whig (r).

(r) *Licentia Poetica* discussed. *Passim*.

In the List of the College of Physicians for 1718, Dr. Coward begins to be mentioned as residing at Ipswich. From this place he wrote, in 1722, a letter to his old Friend, Sir Hans Sloane, the occasion of which is somewhat curious. He had learned, from the news-papers, that the Duchess Dowager of Marlborough proposed to give five hundred guineas to any person who should present her with an epitaph, suitable to the late Duke her husband's character, "Now," says he, "I have one by me which gives him his just character, without flattery or ostentation, and which I verily believe may be acceptable to any learned man." He adds, "that he hears it was to be approved by Dr. Hare, Dr. Friend of Westminster School, and Dr. Bland of Eton School;" and, if this be true, he begs that Sir Hans would give him leave to send it for his approbation and recommendation (s). From the omission of Dr. Coward's name in the Catalogue of the College of Physicians, printed in 1725, it is evident that he was then dead. Though his medical works are now in no reputation, and his other writings are but little attended to, it is, nevertheless, certain that he was a man of considerable abilities and literature; and we have esteemed it a duty incumbent upon us to rescue his name from the injustice which hath been done it with respect to religion. However erroneous his peculiar sentiments may have been, there is no reason to doubt of the sincerity of his belief in the Gospel, and of his zeal for its honour. The truth of Christianity and the doctrine of eternal life stand upon their own firm ground, independently of all speculations concerning the materiality or immateriality of the soul, and its separate state of existence. Divines of the first eminence, whose faith in revelation is unquestionable, and who have been among its ablest advocates, have concurred in opinion with Dr. Coward; and that such men should, on this account, have ever been ranked with unbelievers, can only have proceeded from the most contemptible ignorance and bigotry.

(s) *Gent. Mag. ubi supra*. From the British Museum.

We cannot dismiss this article without taking notice of a mistake which was committed by the late Dr. Caleb Fleming; who, in the year 1758, published a treatise, entitled, "A Survey of the Search after Souls," imagining that he was writing against Dr. Coward. But the "Search after Souls" was the production of Henry Layton, Esq; a Gentleman of an ancient family, and a handsome estate, at Rawden, in the county of York. Mr. Layton was educated at Oxford, and, studying afterwards at Gray's Inn, was called to the bar; but never applied himself to the practice of the law. His knowledge of it, however, enabled him to do good offices among his neighbours, without fee or reward (t).]

COWELL (JOHN), a learned Civilian in the latter end of the sixteenth, and beginning of the seventeenth century, was born at Earnsborough in the parish of Swimbridge in Devonshire (a), and educated at Eton-School, where he so distinguished himself by his good parts and agreeable industry, that he was elected a Scholar of King's College Cambridge (b), in the year 1570 [A]. Here he applied himself closely to his studies, and by his learning and unblameable course of life, grew up to so much reputation and interest in the University, that he was elected Fellow of that House: and after he had taken the two degrees in Arts, he had the honour to be chosen one of the Proctors for the year 1585 (c). He particularly turned his thoughts to the study of the Civil-Law, by the advice of that active Prelate Richard Bancroft Bishop of London (d), who had judgment to find the genius of our Author, and knew the great necessity the Church was in, to have men of abilities and integrity in that profession. He was regularly admitted to the Degree of Doctor of Laws in his own University (e); and in 1600 was incorporated into the same degree at Oxford (f). His Reputation was now so well established, that he was made the King's Professor of Civil Law in the University of Cambridge; and about the same time, Master of Trinity-Hall; which two stations had as much Honour and Profit, as could possibly be bestowed, in that place, on a man of his Profession (g). In 1603 and 1604 he executed the office of Vice-chancellor of Cambridge (h). His chief patron Bishop Bancroft being advanced to the See of Canterbury in December 1604, and projecting many things which he thought would be for the interest and honour of Church and State, employed several men in their proper professions; imagining that to be the most effectual

way to promote the public service (i). Among the rest, he solicited Dr. Cowell [B] to show himself an antiquary, and a useful man, by giving the interpretation of such words and terms, as created most difficulty to the Students of our Ecclesiastical, Civil, and Common Laws. This laborious task the Doctor performed with so much application and diligence, that his work was finished in about three years time, and published under the title of THE INTERPRETER [C]. By this book the Archbishop was so well satisfied with the author's parts, industry, and courage, that upon the death of Sir Edward Stanhope, Vicar General to the Archbishop of Canterbury, which happened on the 16th of March 1608, his Grace conferred that honourable place on Dr. Cowell, who had practised before as an Advocate in the Arches (k). In this station, he carried himself with that fairness and integrity, that equity and honour, as raised him no enemies and lost him no friends. If he was afterwards invidious as a writer, he was still blameless as a judge: For, when the warmest objections were made against some expressions in his book, there was not any fault found with his administration of justice (l). For some time, his book passed uncensured; but at last great offence was taken at it; because, as was pretended, the author had spoken with too much liberty, and in too sharp expressions, of the Common Law, and some eminent professors of it, particularly Littleton. Moreover, he had recited Hottoman's reflections on his treatise of Tenures, and by reciting them was thought to make them his own. This especially fired Sir Edward Coke, then Chief Justice of the Common Pleas, who was more particularly concerned for the honour of Littleton, whom he had commented upon; and valued himself as the Chief Advocate of his Profession. Another thing seems to have put Dr. Cowell out of favour with this Judge: namely, within two years after the publication of the Interpreter, Archbishop Bancroft, sensible that the jurisdiction of the Spiritual Courts was perpetually obstructed by the grant of Prohibitions from Westminster-Hall, employed Dr. Cowell to draw up Reasons and Exceptions against the too frequent grants of Prohibitions; which were delivered to King James I. in time of Parliament, under the title of *Articuli Cleri*, or the Clergy's Articles. These Articles the King ordered to be argued by the Judges, and their Arguments are printed by Coke in his XIIth Report, who had the chief hand in them; and was now more and more incensed against Dr. Cowell, whom he took for a professed enemy to the Westminster-Courts, and therefore directly or obliquely reflects upon him in several pages of his works [D]. But paper-reproofs not being satisfactory, Sir Edward Coke, who was of some authority with the King, and had good interest in the House of Commons, represented Dr. Cowell as an enemy to both (*). He knew that nothing would so much excite the jealousy of the King, who was very fond of Power, as to touch upon the point of Prerogative, and therefore he suggested, that Dr. Cowell 'had disputed too nicely upon the 'mysteries of this our monarchy, yea in some points very derogatory to the supreme power 'of this Crown (m);' and had asserted, 'That the King's prerogative is in some cases 'limited (n).' The author, by touching upon so tender a point, was in great danger of being ruined; but, in all probability, was saved through the Archbishop's interest. His adversaries hereupon turned the tables, and resolved to make him a betrayer of the Rights and Liberties of the People, thinking this accusation would do more with the Parliament, than the other had done with the King. The Complaint against him in the House of Commons was carried on by men of parts and interest, and it came to this issue, that the author was committed to custody, and his book publicly burnt (o). Moreover the Commons complained of him to the Lords, as equally struck at, who resolved to censure his

[B] Among the rest, he solicited Dr. Cowell — to give the interpretation of the difficult words in our Laws.] This the Doctor hints at, in his Dedication of *The Interpreter* to the Archbishop, in these words. — Yet the remembrance of those your honourable 'Provocations, whereby at my coming to your Grace 'from the University, you first put me upon these 'Studies, at the last by a kind of necessity enforced me 'to this attempt; because I could not see how well to 'avoid it, but by adventuring the hateful Note of 'Unthankfulness.'

[C] THE INTERPRETER.] The whole title of it was as follows, 'The Interpreter, or Book 'containing the signification of Words: wherein is set 'forth the true meaning of all, or the most part of 'such Words and Terms, as are mentioned in the 'Law-writers, or Statutes of this Victorious and re- 'nowned Kingdom, requiring any Exposition or In- 'terpretation. A work not only Profitable, but 'Necessary for such as desire thoroughly to be in- 'structed in the Knowledge of our Laws, Statutes, or 'other Antiquities. Collected by John Cowell Doctor, 'and the King's Majesties Professor of the Civil Law 'in the University of Cambridge. *In legum obscuritate 'captio.*' At Cambridge, Printed by John Legate,

Anno 1607, 4to. It was re-printed in 1609, and several times since, particularly in 1638, for which Archbishop Laud was reflected upon, and it was made an Article against him at his trial, as if the impression of that book had been done by his authority, or at least with his connivance, in order to countenance the King's arbitrary measures (2). In 1677, and 1684 it was published, with large Additions, by Tho. Manley of the Middle-Temple, Esq; and again in 1708 with very considerable improvements by another hand. In all these later Editions, those passages that were dubious or offensive have been corrected or omitted.

[D] Sir Edward Coke reflects upon him in several pages of his Works.] Being the grand Oracle of the Common Law, as Dr. Cowell was of the Civil, emulation produced so great an ill-will between these two great men; especially because the Doctor, who was well skilled in both Laws, practised frequently at Westminster-hall as well as at Doctors Commons; that Sir Edward took all occasions to affront him, and used to call him in derision Doctor *Cow-beel*. It is to be observed, that at that time the contest ran very high between the Civilians and Common-Lawyers, the latter of which were discountenanced by the Court (*).

Errors and Boldness [E]; but upon the interposition of the King, who declared that the man had mistaken the fundamental points and constitutions of Parliament, and promised to condemn the Doctrines of the book as absurd, together with the author of them, they proceeded no farther (p). However, the King published a Proclamation (q) on the 25th of March 1610 [F], wherein 'he not only prohibited the buying, uttering, or reading of the said book, but also straitly commanded all and singular persons whatsoever, who had or should have any of them in their hands or custody, that upon pain of his high displeasure and the consequence thereof, they deliver the same, presently upon the publication thereof, to the Lord Mayor of London, if they or any of them were dwelling in or near that city; or otherwise to the Sheriff of the county where they should reside; and, in the two Universities, to the Chancellor or Vice-chancellor there, to the intent that further order might be given for the utter suppressing thereof [G].' When Dr. Cowell had thus felt the displeasure of the King, and the indignation of the people, he took his leave of the press, and retired to his College and his private studies, where he lived inoffensively and in good repute; but not averse however to serve the public, either with his advice, or any other way. It was his misfortune to be afflicted with the stone, for which being cut, that operation proved fatal to him; for he died of it on the eleventh of October, 1611; and was buried in the Chapel of Trinity-Hall under the Altar (r), where there is an inscription to his memory [H]. He wrote other things besides *the Interpreter* above-mentioned [I]. He was a considerable benefactor to the College of which he had

(p) Which is inserted in Preface to the Interpreter, edit. 1708.

(r) Preface, as above.

[E] *To censure his Errors and Boldness.* The Errors charged upon him, were, That he had asserted, 1. 'That the King was *solutus à legibus*, and not bound by his Coronation-oath. 2. That it was not *ex necessitate*, that the King should call a Parliament to make Laws, but might do that by his absolute Power; for *voluntas Regis* with him was *Lex populi*. 3. That it was a favour to admit the consent of his subjects in giving of subsidies. 4. That he draws his Arguments from the Imperial Laws of the Roman Emperors, which are of no force in England (3). The Author of the Preface to the Edition of the Interpreter in 1708, observes, That these positions are so gross and intolerable, that no Englishman would defend or excuse them. But he says, that having run over most part of the first edition in 1607, 4to. he finds no such abominable assertions in words at length, though there be many things too unadvisedly expressed which a wise author would have omitted, and a wise Government might have despised. But when a suspected book is brought to the torture, it often confesseth all, and more than it knows.

[F] *The King published a Proclamation on the 25th of March 1610.* The beginning of this Proclamation is pretty remarkable, being as follows. 'This latter age and times of the World wherein we are fallen, is so much given to verbal profession, as well of religion, as of all commendable moral virtues, but wanting the actions and deeds agreeable to so specious a profession, as it hath bred such an unsatiable curiosity in many mens spirits, and such an itching in the Tongues and Pens of most men, as nothing is left unsearched to the bottom both in talking and writing. For from the very highest Mysteries in the God-head and the most inscrutable counsels in the Trinity; to the very lowest pit of hell, and the confused actions of the devils there, there is nothing now unsearched into by the curiosity of men's brains. Men not being contented with the knowledge of so much of the will of God as it hath pleased him to reveal, but they will needs sit with him in his most private closet, and become privy of his most inscrutable counsels: and therefore it is no wonder, that men in these our days do not spare to wade in all the deepest mysteries that belong to the persons and state of Kings and Princes, that are Gods upon Earth: since we see (as we have already said) that they spare not God himself.'—

[G] *That further order might be given for the suppressing thereof.* The reasons alledged in the Proclamation for suppressing that book, are, That the author had fallen into many mistakes; namely— 'In some things disputing so nicely upon the mysteries of this our Monarchy, that it may receive doubtful interpretations; yea in some points very derogatory to the supream power of this Crown: In other cases mistaking the true state of the Parliament of this Kingdom and the fundamental constitutions and principles thereof: And in some other points speaking un-reverently of the Common Law of England, and the works of some of the most famous and ancient Judges therein: it being a thing utterly unlawful to any subject, to speak or write against that Law under which he liveth.'—This whole Proclamation is manifestly in the stile of that pedantic Monarch, who then sat upon the throne.

[H] *Where there is an inscription to his memory.* And which runs thus; *Johannes Cowell, L.L.D. Custos hujus Collegii, Juris Civilis in hac Academia Cantab. Professor Regius, Vicarius Generalis Cantuariensis Provinciae sub Domino Richardo Bancroft, Archiepiscopo Cantuariensi, hic expectat Resurrectionem. Obiit undecimo die mensis Oct. Ann. Dom. 1611. i. e. John Cowell L.L.D. Master of this College, the King's Professor of Civil Law in this University of Cambridge, and Vicar General of the Province of Canterbury, under Richard Bancroft Lord Archbishop of Canterbury, waits here for the Resurrection. He died the eleventh day of October, in the year of our Lord 1611 (4).*

[I] *He wrote other things besides the Interpreter.* In 1605, he published *Institutiones juris Anglicani ad methodum & seriem institutionum Imperialium compositae & digestae. Cantab. 8vo. i. e. Institutes of the Laws of England in the same method as Justinian's Institutes (5).* He also composed 'A Tract *De Regulis Juris* [of the Rules of the Law] wherein his intent was, by collating the cases of both Laws to shew, that they both be raised of one Foundation, and differ more in Language and Terms than in substance, and therefore were they reduced to one method (as they easily might) to be attained (in a manner) with all one pains.' But it doth not appear that this last was ever published (6). M.

On the 27th of February, 1609-10, the Commons sent a message to the Lords, to acquaint them, 'That they had taken notice of a book lately published by one Dr. Cowell, which they conceive does contain matters of scandal and offence towards the High Court of Parliament, and is otherways of dangerous consequence and example: That being desirous there should be a joint examination of the offensive contents of the said Book, and some course taken for the punishment of the person who published the same; they therefore desire their Lordships to appoint a conference for that purpose.' To this message the Lords returned a very civil answer, declaring, 'That they were willing to join with them in any cause proper to maintain the honour of that High Court, and to cherish a mutual correspondence between both Houses, which together make the body of the Parliament, whereof his Majesty is the head.' Accordingly, a time and place were appointed for a conference, which having been held, the Report of it was made to the Peers on the third of March, when

(4) Pref. ubi supra.

(5) Wood, Fasti, vol. i. col. 160.

(6) See Pref. to the Reader, in the beginning of The Interpreter.

had been Fellow, to the Hall of which he was Master, and to the University of which he had been Governor.

the Lord Privy Seal (Henry Howard Earl of Northampton) informed them, 'That the Attorney General, in delivering the sense of the Lower House, did very modestly and discreetly lay open the offence taken against the party, and the dangerous consequence of the Book.' Afterwards, the Bishop of London (Dr. George Abbot) read the particular exceptions which the Commons had made to Dr. Cowell's work. These were, 1. On the word *Subsidy*; 2. On the word *King*; 3. On the word *Parliament*; 4. On the word *Prerogative*. On all these words Dr. Cowell had enlarged himself in so unadvised a manner, that the Commons regarded his assertions as very offensive, and likely to be productive of pernicious effects. When this report was made, the Lords, having taken a little time to consider of it, thought proper to send a message to the other House, to desire another conference concerning the Book; and in the mean while ordered their Clerk to search for Precedents with respect to the mode of proceeding in matters of this nature. The next day, the Lord Treasurer informed the Peers, that his Majesty had taken notice of the busi-

ness, and had lately perused the places in the book to which exceptions were taken; that he had called Cowell before him, and heard his answers; and that having duly considered of the errors committed by the Author, he was graciously pleased to deliver his Judgment and Resolution to the Lords, to be by them communicated to the Committee of the Commons. What the Resolution was doth not appear; for here the affair ended, so far as it stands upon the Journals of the House. The King's interference was undoubtedly intended to screen Dr. Cowell from the effects of Parliamentary Censure and Resentment. It is said that James the First had declared his approbation of the Doctor's Book; and that he had let fall some expressions at his Table, in Derogation of the Common Law of England, and highly extolling the Civil Law, as far preferable to the other. As the King had given sufficient indications of his love of arbitrary Government, it was wise in Parliament to seize every becoming opportunity of suppressing such a disposition in him, and of testifying their aversion to principles which were hostile to the freedom of the constitution (7).]

(7) Parliamentary Hist. vol. 5. p. 221—225. 2d. edit. K.

COWLEY (ABRAHAM), one of our best Poets of the XVIIth century, was born at London (in Fleet-street, near the end of Chancery-lane, in the parish of St. Dunstan in the West) in the year 1618, and fifteenth of King James I. His father, who was a Grocer, dying before the birth of this his son, his mother, by the interest of her friends, procured him to be admitted a King's Scholar in Westminster-school (a). His first, and early, inclination to Poetry was occasioned by accidentally reading Spenser's *Fairy Queen* [A], a Poem fitter for the examination of men, than the consideration of a child: but in him it met with a fancy the strength of which was not to be judged by the number of his years (b). In the sixteenth year of his age, being still at Westminster-school, he published a collection of Verses, under the title of *Poetical Blossoms* [B], in which there were many things that might well become the vigour and force of a manly wit [C]. It is remarkable of Mr. Cowley, what he himself tells us (c), that he had this defect in his memory, that

(b) Sprat's Account of the Life and Writings of Mr. Abraham Cowley, prefixed to his Works, edit. Lond. 1721, 12mo. p. 3. (c) In his Essay on himself. See his Works, vol. ii. p. 718.

(a) Wood, Fasti Oxon. vol. ii. col. 120.

[A] His first, and early, inclination to Poetry was occasioned by accidentally reading Spenser's *Fairy Queen*.] This we learn from our Poet himself. 'I believe,

(1) In his Essay on himself. See Mr. Cowley's Works, Lond. 1721, 12mo. vol. ii. p. 719.

' says he (1), I can tell the particular little chance ' that filled my head first with such chimes of verses, ' as have never since left ringing there: for I remem- ' ber when I began to read, and take some pleasure in ' it, there was wont to lye in my mother's parlour (I ' know not by what accident, for she herself never in ' her life read any book but of devotion) but there was ' wont to lye Spenser's Works: this I happened to fall ' upon, and was infinitely delighted with the stories of ' the knights, and giants, and monsters, and brave ' houses, which I found every where (though my ' understanding had little to do with all this) and by ' degrees with the tinkling of the rhyme, and dance ' of the numbers; so that I think I had read him all ' over before I was twelve years old, and was thus ' made a Poet as immediately as a child is made an ' eunuch.'

(2) Wood, Fasti Oxon. vol. ii. col. 120. (3) Account of the Life and Writings of Mr. Abraham Cowley, prefixed to his Works, p. 4.

[B] He published a collection of verses under the title of *Poetical Blossoms*.] They were published at London in 1633 (2), and consequently in Mr. Cowley's fifteenth year; so that Dr. Sprat is mistaken in saying (3) this book came out in the thirteenth year of his age. It contains among other pieces, *Antonius and Melida*, and *The tragical history of Pyramus and Thisbe*. The first is dedicated to Dr. Williams Bishop of Lincoln, and the other to his master Mr. Lambert Osbaldeston. Before both is his picture, and his age set over it, viz. 13, but erroneous. There are prefixed some recommendatory verses by some of his school-fellows; and at the end are two *Elegies*, one on Dudley Lord Carleton, and the other on his kinsman Richard Clerk of Lincoln's-Inn; and *A Dream of Elysium* (4).

(4) Wood, *ibid*.

(5) In his Essay on himself, *ubi supra*, p. 718.

[C] — In which there were many things that might well become the vigour and force of a manly wit.] Mr. Cowley himself has given us (5) a specimen in the latter end of an Ode, written when he was but thirteen years of age. The beginning of it, says he, is boyish, but

of this part which I here set down, if a very little were corrected, I should hardly now be much ashamed.

IX.

This only grant me, that my means may lye,
Too low for envy, for contempt too high.
Some honour I would have
Not from great deeds, but good alone:
The unknown are better than ill known.
Rumour can ope' the grave:
Acquaintance I wou'd have, but when't depends
Not on the number, but the choice of friends.

X.

Books shou'd, not business, entertain the light,
And sleep, as undisturb'd as death, the night:
My house a cottage, more.
Than palace, and shou'd fitting be
For all my use, no luxury:
My garden painted o'er
With nature's hand, not art's; and pleasures yield,
Horace might envy in his Sabine field.

XI.

Thus wou'd I double my life's fading space,
For he that runs it well, twice runs his race.
And in this true delight,
These unbought sports, that happy state,
I wou'd not fear, nor wish my fate;
But boldly say each night,
To-morrow let my sun his beams display,
Or in clouds hide them, I have liv'd to day.

You may see by it, adds Mr. Cowley, I was even then acquainted with the Poets, for the conclusion is taken out of Horace; and perhaps it was the immature and immoderate love of them, which stamp'd first, or rather engraved, the characters in me: they were like letters cut in the bark of a young tree, which with the tree still grow proportionably.

his

his teachers could never bring him to retain the ordinary rules of grammar; the want of which however he abundantly supplied by an intimate acquaintance with the books themselves, whence those rules had been drawn. With these extraordinary hopes, he was removed to Trinity-college in Cambridge, being elected a Scholar of that House in 1636 (d). Here the continuance and progress of his wit gained him the love and esteem of the most eminent Members of that Society. His exercises of all kinds were highly applauded, with this peculiar praise, that they were fit, not only for the obscurity of an academical life, but to have appeared on the true theatre of the world. And here it was that he wrote, or at least laid the designs of most of those masculine works, which he afterwards finished. In 1638, he published his *Love's Riddle* [D], a pastoral comedy, and a Latin comedy intitled *Naufragium Jocularis* [E], or the *Merry Shipwreck*. The first occasion of his entering into business, was, an *Elegy* he wrote *On the death of Mr. William Harvey* [F]; which brought him acquainted with Mr. John Harvey, the brother of his deceased friend, from whom he received many offices of kindness through the whole course of his life (e). In 1643, being then Master of Arts, he was, among many others, ejected from his College and the University; whereupon, retiring to Oxford, he settled in St. John's College, and, that same year, under the name of a Scholar of Oxford, published a Satire (f), intitled *The Puritan and the Papist* [G]. His affection to the Royal Cause engaged him in the service of the King, and he was present in several of his Majesty's journeys and expeditions. By this means he gained an acquaintance and familiarity with the great men of the Court and the Gown, and particularly had the entire friendship of my Lord Falkland, one of the Principal Secretaries of State. During the heat of the Civil War, he was settled in the family of the Earl of St. Alban's [H], and accompanied the Queen-Mother, when she was obliged to retire into France. He was absent from his native country about ten years [I]; which were wholly spent either in bearing a share in the distresses of the Royal Family, or in labouring their affairs. To this purpose he took several dangerous journeys into Jersey, Scotland, Flanders, Holland, and elsewhere; and was the principal instrument in maintaining a constant correspondence between the King and his Royal Consort, whose letters he cyphered and decyphered with his own hand (g). His Poems intitled *The Mistress*, were published at London in 1647, and his comedy called *The Guardian*, afterwards altered and published under the title of *Cutter of Coleman-street* [K], in 1650 (h). In 1656 (i), it

(i) Id. ibid.

[D] *His Love's Riddle.* It was written at the time of his being a King's Scholar in Westminster-School, and dedicated by a Copy of Verses to Sir Kenelm Digby, to whom he thus apologizes for it:

Take it as early fruits, which rare appear,
Though not half ripe, but worst of all the year;
And if it please your taste, my muse will say,
The birch, which crown'd her then, is grown a bay.

(6) Account of Langbain pretends (6), it was first printed with his *Poetical Blossoms*, in 4to, London, 1633, and afterwards printed with the second volume of his works in folio 1681.

[E] *His Latin Comedy, intitled Naufragium Jocularis.* It was acted before the University of Cambridge by the members of Trinity-College, February the second, and printed the same year at London, in octavo (7).

(7) Id. ib. p. 86; and Wood, ubi supra, col. 121.
(8) See the *Elegy* among Mr. Cowley's *Miscellanies* in vol. i. p. 20.

[F] *His Elegy on the death of Mr. William Harvey.* There appears to have been the strictest and most intimate friendship between Mr. Cowley and that Gentleman (8):

He was my friend, the truest friend on earth;
A strong and mighty influence joyn'd our birth;
Nor did we envy the most sounding name
By friendship given of old to fame.

Their conversation was chiefly employ'd in the improvement of their minds:

Say, for you saw us, ye immortal lights,
How oft unwearied have we spent the nights,
'Till the Ledaean stars so fam'd for Love
Wonder'd at us from above?

We spent them not in toys, in lusts, or wine;
But search of deep philosophy,
Wit, Eloquence, and Poetry,
Arts which I lov'd, for they, my friend, were thine.

Mr. Cowley tells us, he communicated his poems, as fast as he wrote them, to Mr. Harvey, for his approbation:

To him my muse made haste with ev'ry strain,
Whilst it was new, and warm yet from the brain:
He lov'd my worthless Rhimes, and like a friend
Wou'd find out something to commend.

[G] *He publish'd a Satire, intitled The Puritan and the Papist.* It was printed in one sheet and a half in quarto, and re-published at London in 1682, in quarto, in a book intitled, *Wit and Loyalty revived in a Collection of some smart Satires in verse and prose on the late times*. The writer of the Preface to this book complains, that this Satire of Mr. Cowley's was not published by the Editor of his first Collection of Poems, for which he assigns two presumptive reasons. He wonders likewise, that the Poem called *Brutus*, and that upon the Bishop of Lincoln's *Enlargement from the Tower*, which he imagines not to have been written by Mr. Cowley (*), had met with such good fortune as to have a place there (9).

[H] *He was settled in the family of the Earl of St. Alban's.* Dr. Sprat tells us (10), Mr. Cowley was obliged for this settlement to Mr. John Harvey, brother of his deceased friend Mr. William Harvey (11). But Anthony Wood tells us (12), that when Mr. Cowley came to Paris, he fell into the acquaintance of Dr. Stephen Goffe, a brother of the Oratory, by whose means he was placed and preferred in that noble family.

[I] *He was absent from his native country about ten years.* I assign this space of time for Mr. Cowley's absence upon the authority of Mr. Wood, who assures us (13), he left Oxford a little before the surrender of that city to the Parliament; which being in the year 1646, and Mr. Cowley returning in 1656, he could not be absent a longer term; though the author of his *Life* pretends he was twelve years abroad.

[K] *His Comedy called The Guardian, afterwards altered and published under the title of Cutter of Coleman-street.* The *Guardian* was acted before Prince Charles at Trinity College in Cambridge, March the 12th, 1641, and printed at London, in 4to. in 1650 (14). Mr. Cowley, in the *Preface* to his *Poems* (15), complaining of the publication of some things of his without his consent or knowledge, and those so mangled

it was thought proper by those, on whom Mr. Cowley depended, that he should come over into England, and, under pretence of privacy and retirement, should give notice of the posture of affairs in this nation (k). Upon his return, he published a new edition of all his Poems, consisting of four parts; viz. I. *Miscellanies* [L]: II. *The Mistress, or Several Copies of Love-Verses* [M]: III. *Pindarique Odes, written in imitation of the Style and manner of Pindar* [N]: IV. *Dauidis, a sacred Poem of the troubles of David, in four books.*

(16) It is printed together with the Epilogue, among his *Miscellanies*.

and imperfect, that he could neither with honour acknowledge, nor with honesty quite disavow them; adds: 'Of which fort was a Comedy called *The Guardian*, made and acted before the Prince, in his passage through Cambridge towards York, at the beginning of the late unhappy war; or rather neither made nor acted, but rough-drawn only and repeated: for the haste was so great, that it could neither be revised or perfected by the author, nor learned without book by the Actors, nor set forth in any measure tolerably by the Officers of the College.' This Mr. Cowley thought fit to acquaint the Prince with in the Prologue address'd to him (16), which concludes with these lines:

Accept our hasty zeal; a thing that's play'd
E'er 'tis a Play, and acted e'er 'tis made.
Our ignorance, but our duty too we show;
I would all ignorant people wou'd do so!
At other times expect our wit and art:
This comedy is acted by the heart.

And in the Epilogue:

But pow'r your grace can above nature give:
It can give pow'r to make abortives live:
In which if our bold wishes shou'd be crost,
'Tis but the life of one poor week 't has lost:
Though it shou'd fall beneath your mortal scorn,
Scarce cou'd it dye more quickly than 'twas born.

(17) Preface, ubi
supra, p. 44.

'After the representation, says our author (17) (which I confess, was somewhat of the latest), I began to look it over, and changed it very much, striking out some whole parts, as that of the *Poet* and the *Soldier*: but I have lost the copy, and dare not think it deserves the pains to write it again, which makes me omit it in this publication, though there be some things in it, which I am not ashamed of, taking the excuse of my age, and small experience in human conversation, when I made it. But, as it is, it is only the hasty first-fitting of a picture, and therefore like to resemble me accordingly.' This Comedy, Langbaine tells us (18), notwithstanding Mr. Cowley's modest opinion of it, was acted, not only at Cambridge, but several times afterwards privately, during the prohibition of the Stage, and, after the King's return, publicly at Dublin, and always with applause. It was this, probably, which put the author upon revising it; after which he permitted it to appear publicly upon the Stage, under a new title, as indeed it was in a manner a new Play, calling it *Cutter of Coleman Street*. Under this name, it was acted at his Royal Highness's theatre, and printed at London in 1663, in 4to. It met with some opposition at first from some, who envied the author's unshaken loyalty: but afterwards it was acted with universal applause, and was generally esteemed an excellent Comedy.

(18) Ubi supra,
p. 81.

(†) Ibid. p. 51.

[L] *His Miscellanies*.] 'Some of these, says our author (†), were made when I was very young, which it is perhaps superfluous to tell the reader. I know not by what chance I have kept copies of them; for they are but a very few in comparison with those I have lost, and I think have no extraordinary virtue in them, to deserve more care in preservation, than was bestowed upon their brethren; for which I am so little concerned, that I am ashamed of the arrogance of the word, when I said *I had lost them*.' This Collection consists of *Odes, Elegies, &c.* with some imitations of *Horace* and *Martial*; together with eleven *Anticreontiques*, or paraphractical imitations of *Anacreon*.

(19) Ibid.

[M] *His Mistress, or several Copies of Love-verses*.] Let us first hear what our Poet himself says of this part of his compositions. 'Poets, says he (19),

'are scarcely thought free-men of their company, without paying some duties, and obliging themselves to be true to love. Sooner or later they must all pass through that trial, like some Mahometan Monks, that are bound by their order, once at least in their life, to make a pilgrimage to Mecca.

'In furias ignemque ruunt, amor omnibus idem.

'But we must not always make a judgment of their manners from their writings of this kind, as the Romanists uncharitably do of Beza for a few lascivious Sonnets composed by him in his youth. It is not in this sense that Poésie is said to be a kind of painting: it is not the picture of the poet, but of things and persons imagined by him. He may be in his practice and disposition a philosopher, and yet sometimes speak with the softness of an amorous Sappho.

'Feret et rubus asper amomum.

'He professes too much the use of fable (though without the malice of deceiving) to have his testimony taken even against himself. Neither would I here be misunderstood, as if I affected so much gravity, as to be ashamed to be thought really in love. On the contrary, I cannot have a good opinion of any man who is not at least capable of being so. But I speak it to excuse some expressions (if such there be) which may happen to offend the severity of supercilious readers: for much excess is to be allowed in love, and even more in poetry, so we avoid the two unpardonable vices in both, which are, obscenity and profaneness, of which, I am sure, if my words be ever guilty, they have ill represented my thoughts and intentions.' What opinion Dr. Sprat had of Mr. Cowley's *Mistress* appears by the following passage (20). (20) See Life, &c. p. 15, 16. *If there needed any excuse to be made that his Love-verses take up so great a share in his works, it may be alledged, that they were composed when he was very young. But it is a vain thing to make any kind of apology for that sort of writings. If devout or virtuous men will superciliously forbid the minds of the young, to adorn those subjects about which they are most conversant, they would put them out of all capacity of performing graver matters, when they come to them. For the exercises of all mens wits must be always proper for their age, and never too much above it: and by practice and use in lighter arguments they grow up at last to excel in the most weighty. I am not therefore ashamed to commend Mr. Cowley's Mistress. I only except one or two expressions, which I wish I could have prevailed with those that had the right of the other edition, to have left out. But of all the rest I dare boldly pronounce, that never yet so much was written on a subject so delicate, that can less offend the severest rules of morality. The whole passion of Love is intimately described, with all its mighty train of hopes, and joys, and disquiets. Besides this amorous tenderness, I know not how in every copy there is something of more useful knowledge very naturally and gracefully insinuated, and every where there may be something found, to inform the minds of wise men, as well as to move the hearts of young men or women.*

[N] *His Pindarique Odes, written in imitation of the style and manner of Pindar*.] The occasion of Mr. Cowley's falling on the Pindaric way of writing, Dr. Sprat tells us (21), was, his accidentally meeting with Pindar's works, in a place where he had no other books to direct him. Having then considered at leisure the height of his invention, and the majesty of his style, he tried immediately to imitate it in English. And he performed it (says my author) without the danger that Horace presaged to the man who should dare

(21) Ibid. p. 16.

books [O]. Soon after his return, he was seized on, through a mistake, the search being intended

dare to attempt it. Dr. Sprat then vindicates the style and manner of Mr. Cowley's *Pindariques*. 'If any, says he, are displeased at the boldness of his metaphors, and length of his digressions, they contend not against Mr. Cowley, but Pindar himself, who was so much revered by all antiquity, that the place of his birth was preserved as sacred, when his native city was twice destroyed by the fury of two conquerors. If the irregularity of the numbers disgust them, they may observe, that this very thing makes that kind of poetry fit for all manner of subjects; for the pleasant, the grave, the amorous, the heroic, the philosophical, the moral, the divine. Besides this they will find, that the frequent alteration of the rhythm and feet affects the mind with a more various delight, while it is soon apt to be tired by the settled pace of one constant measure. But that, for which I think this inequality of numbers is chiefly to be preferred, is, its nearer affinity with prose; from which all other kinds of English verse are so far distant, that it is very seldom found, that the same man excels in both ways. But now this loose and unconfined measure has all the grace and harmony of the most confined. And withal it is so large and free, that the practice of it will only exalt, not corrupt, our prose: which is certainly the most useful kind of writing of all others; for it is the style of all business and conversation.' Mr. Cowley himself, speaking of his Pindaric Odes (22), tells us, he is in great doubt whether they will be understood by most readers, nay, even by very many, who are well enough acquainted with the common roads and ordinary tracks of poetry. *They either are, says he, or at least were meant to be, of that kind of style, which Dion Halicarnassus calls μεγαλοφώνη καὶ ῥῆμα περὶ δυνάμειος, and which he attributes to Alcæus. The digressions are many and sudden, and sometimes long, according to the fashion of all Lyriques, and of Pindar above all men living. The figures are unusual and bold, even to temerity, and such as I durst not have to do withal in any other kind of poetry. The numbers are various and irregular, and sometimes (especially some of the long ones) seem harsh and uncouth, if the just measures and cadencies be not observed in the pronunciation. So that almost all their sweetness and numerosity (which is to be found, if I mistake not, in the roughest, if rightly repeated) lies in a manner wholly at the mercy of the reader. Mr. Cowley adds: 'I have briefly described the nature of these verses, in the Ode intitled *The Resurrection*: and though the liberty of them may incline a man to believe them easy to be composed, yet the undertaker will find it otherwise:*

Ut sibi quivis
Speret idem, fudet multum, frustra que labore
Ausus idem.

The verses our author refers to are these:

Stop, stop, my muse, allay thy vigorous heat
Kindled at a hint so great.
Hold thy Pindarique Pegasus closely in,
Which does to rage begin,
And this steep hill wou'd gallop up with violent
course.
'Tis an unruly and a hard-mouth'd horse
Fierce and unbroken yet,
Impatient of the spur or bit:
Now prances stately, and anon flies o'er the place,
Disdains the servile law of any settled pace,
Conscious and proud of his own natural force:
'Twill no unskilful touch endure,
But flings writer and reader too that sits not sure.

Two of our greatest poets, at the same time that they allow Mr. Cowley to have been a very successful Imitator of Pindar, yet find fault with his numbers. Mr. Dryden, having told us (23), that our author brought Pindaric verse as near perfection as was possible in so short a time, adds: 'But if I may be allowed to speak my mind modestly, and without injury to his sacred

ashes, somewhat of the purity of English, somewhat of more equal thoughts, somewhat of sweetness in the numbers, in one word, somewhat of a finer turn and more Lyrical verse is yet wanting.' And Mr. Congreve, having excepted against the irregularity of the measure of the English Pindaric Odes, yet observes (24), that the beauty of Mr. Cowley's verses are an atonement for the irregularity of his Stanzas; and that though he did not imitate Pindar in the strictness of his numbers, he has very often happily copied him in the force of his figures, and sublimity of his style and sentiments.

[O] His Davideis, a sacred Poem of the troubles of David in four books.] Our poet tells us himself (25), he design'd to have written this poem in twelve books, not for the sake of the twelve tribes, but after the pattern of Virgil, and to have closed it with that most poetical and admirable Elegy of David's on the death of Saul and Jonathan. 'This, says he, was the whole design, in which there are many noble and fertile arguments behind; as, The barbarous Cruelty of Saul to the Priests at Nob, the several flights and escapes of David, with the manner of his living in the wilderness, the Funeral of Samuel, the Love of Abigail, the sacking of Ziklag, the loss and recovery of David's wives from the Amalekites, the witch of Endor, the war with the Philistines, and the Battle of Gilboa; all which I meant to interweave upon several occasions, with most of the illustrious stories of the Old Testament, and to embellish with the most remarkable Antiquities of the Jews, and of other nations before or at that age. But I have had neither leisure hitherto, nor have appetite at present to finish the work, or so much as to revise that part, which is done, with that care, which I resolved to bestow upon it, and which the dignity of the matter deserves.' After displaying the great excellence and dignity of his subject, Mr. Cowley complains very pathetically of the great prostitution of poetry to mean and unworthy purposes, and recommends the choice of divine subjects in terms, which, surely, merit the serious consideration of every son of Apollo. 'It is not without grief and indignation, says he, that I behold that divine Science employing all her inextinguishable riches of wit and eloquence, either in wicked and beggarly flattery of great persons, or the unmanly idolizing of foolish women, or the wretched affectation of scurril laughter, or at best on the confused antiquated dreams of senseless fables and metamorphoses. Amongst all holy and consecrated things, which the devil ever stole and alienated from the service of the Deity, as, altars, temples, sacrifices, prayers, and the like, there is none that he so universally and so long usurped, as Poetry. It is time to recover it out of the tyrant's hands, and to restore it to the kingdom of God, who is the father of it. There wants, methinks, but the conversion of that, and the Jews, for the accomplishment of the kingdom of Christ.—I do not wonder that the old poets made some rich crops out of these grounds (*); the heart of the soil was was not then wrought out with continual tillage. But what can we expect now, who come a gleanings, not after the first reapers, but after the very beggars? Besides, though those mad stories of the Gods and Heroes seem in themselves so ridiculous, yet they were then the whole body (or rather chaos) of the Theology of those times. They were believed by all, but a few Philosophers; and perhaps some Atheists, and served to good purpose among the vulgar (as pitiful things as they are) in strengthening the authority of Law with the terrors of conscience, and expectation of certain rewards and unavoidable punishments. There was no other religion, and therefore that was better than none at all. But to us, who have no need of them, to us who deride their folly, and are wearied with their impertinences, they ought to appear no better arguments for verse, than those of their worthy successors the Knights-errant. What can we imagine more proper for the ornaments of wit and learning in the story of

tended after another gentleman of considerable note in the King's party. The Usurpers would fain have brought over Mr. Cowley to their interest, but, all their attempts proving fruitless, he was committed to a severe restraint, and with some difficulty at last obtained his liberty, upon the hard terms of a thousand pounds bail, which burthen Dr. Scarborough very honourably took upon himself. Under these bonds he continued till the general redemption; when, taking the opportunity of the confusions that followed upon Cromwell's death, he ventured back into France, and there remained in the same station as before, 'till near the time of the King's return (1). This account is a sufficient vindication (1) *Ibid.* of Mr. Cowley's unshaken loyalty, which some endeavoured to call in question [P]. During his stay in England, he wrote his *Two Books of Plants*, published first in 1662; to which he afterwards added *four books* more; and all six, together with his other Latin Poems, were printed at London in 1678 [2]. It appears by Mr. Wood's *Fasti Oxonienses* that

* Deucalion, than in that of Noah? Why will not
* the actions of Sampson afford as plentiful matter as
* the labours of Hercules? Why is not Jephthah's
* daughter as good a woman as Iphigenia? and the
* friendship of David and Jonathan more worthy
* celebration, than that of Theseus and Pirithous? Does
* not the passage of Moses and the Israelites into the
* Holy Land, yield incomparably more poetical variety,
* than the voyages of Ulysses or Aeneas? Are the
* obsolete thread-bare tales of Thebes and Troy, half so
* stored with great, heroical, and supernatural actions
* (since verse will needs find, or make such) as the wars
* of Joshua, of the Judges, of David, and divers
* others? Can all the Transformations of the gods
* give such copious hints to flourish and expatiate on
* as the true miracles of Christ, or of his Prophets and
* Apostles? Why do I instance in these few particu-
* lars? All the Books of the Bible are either already
* most admirable and exalted pieces of Poësie, or are
* the best materials in the world for it.' Mr. Cow-

(26) *Life, &c.*
p. 18.

ley's Davideis was written, says Dr. Sprat (26), in
so young an age, that, if we shall reflect on the vastness
of the argument and his manner of handling it, he may
seem like one of the miracles, that he there adorns, like a
boy attempting Goliath.—This perhaps may be the reason,
that in some places there is more youthfulness and redun-
dant of fancy, than his ripper judgment would have al-
lowed—But for the main of it, I will affirm, that it is a
better instance and beginning of a Divine Poem, than
ever I yet saw in any language. The contrivance is
perfectly antient, which is certainly the true form of
heroic poetry, and such as was never yet out-done by any
new devices of modern wits. The subject was truly di-
vine, even according to God's own heart. The matter
of his invention, all the treasures of knowledge and his-
tories of the Bible. The model of it comprehended all the
learning of the East. The characters lofty and various:
the numbers firm and powerful: the digressions beautiful
and proportionable: the design, to submit mortal wit to
heavenly truths. In all there is an admirable mixture
of human virtues and passions, with religious raptures.

(27) *Ibid.* p. 19.

The truth is, adds the Lifewriter (27), methinks,
in other matters his wit excelled most other mens;
but in his Moral and Divine works it out-did itself.
And no doubt it proceeded from this cause, that,
in the lighter kinds of poetry, he chiefly represent-
ed the humours and affections of others; but in
these he sat to himself, and drew the figure of his
own mind. We have the *First Book* of the *Davideis*
translated out of English into very elegant Latin
verse by Mr. Cowley himself.

(28) *Ibid.* p. 8.

[P] Mr. Cowley's loyalty was called in question.]
This, Dr. Sprat tells us (28), was occasioned by a few
lines in the preface to one of his books. 'The ob-
jection, says he, I must not pass by in silence, be-
cause it was the only part of his life that was liable
to misinterpretation, even by the confession of those
that envied his fame. In this case perhaps it were
enough to alledge for him to men of moderate minds,
that what he there said was published before a book
of poetry, and so ought rather to be esteemed as a
problem of his fancy and invention, than as a real
image of his judgment. But his defence in this
matter may be laid on a surer foundation. This is
the true reason to be given of his delivering that
opinion. Upon his coming over, he found the state
of the royal party very desperate. He perceived
the strength of their enemies so united, that, 'till it

* should begin to break within itself, all endeavours
* against it were like to prove unsuccessful. On the
* other side, he beheld their zeal for his Majesty's
* cause to be still so active, that it often hurried them
* into inevitable ruin. He saw this with much grief;
* and though he approved their constancy as much as
* any man living, yet he found their unseasonable
* shewing it did only disable themselves, and give
* their adversaries great advantages of riches and
* strength by their defeats. He therefore believed
* that it would be a meritorious service to the king,
* if any man, who was known to have followed his
* interest, could insinuate into the usurpers minds
* that men of his principles were now willing to be
* quiet, and could persuade the poor oppressed Roy-
* alists to conceal their affections for better occasions.
* And as for his own particular, he was a close prisoner
* when he wrote that against which the exception is
* made; so that he saw it was impossible for him to
* pursue the ends for which he came hither, if he did
* not make some kind of declaration of his peaceable
* intentions. This was then his opinion; and the
* success of the thing seems to prove that it was not
* very ill grounded. For certainly it was one of the
* greatest helps to the King's affairs, about the latter
* end of that tyranny, that many of his best friends
* dissembled their counsels, and acted the same designs,
* under the disguises and names of other parties.*
This Sir, adds the Life-writer, addressing himself to
Mr. Martin Clifford, you can testify to have been the
innocent occasion of these words, on which so much cla-
mour was raised. Yet seeing his good intentions were
so ill interpreted, he told me, the last time that ever I
saw him, that he would have them omitted in the next
impression, of which his friend Mr. Cook is a witness.
However, if we should take them in the worst sense of
which they are capable, yet methinks, for his main-
taining one false tenet in the political philosophy, he
made a sufficient atonement by a continual service of
twenty years, by the perpetual loyalty of his discourse,
and by many of his other writings, wherein he has largely
defended and adorned the royal cause. And, to speak
of him not as our friend, but according to the common laws
of humanity, certainly that life must needs be very un-
blameable, which had been tried in business of the
highest consequence, and practised in the hazardous se-
crets of Courts and Cabinets; and yet there can nothing
disgraceful be produced against it, but only the error of
one paragraph, and a single metaphor.

[2] His *Books of Plants*, and his other Latin Po-
ems, &c.] The occasion of his choosing the subject
of his six books of *Plants*, Dr. Spratt tells us (29), was
this. When he returned into England, he was ad-
vised to dissemble the main intention of his coming
over, under the disguise of applying himself to some
settled profession: and that of Physic was thought most
proper. To this purpose, after many anatomical
dissections, he proceeded to the consideration of Sim-
ples; and having furnished himself with books of
that nature, he retired into a fruitful part of Kent,
where every field and wood might shew him the real
figures of those Plants of which he read. Thus he
speedily mastered that part of the Art of Medicine.
But then, as one of the Antients did before him in
the study of the Law, instead of employing his skill for
practice and profit, he presently digested it into that
form which we behold. The *two first* books treat of
Herbs, in a style resembling the Elegies of Ovid and
Tibullus,

(29) *Ibid.* p. 22.

(m) Vol. ii. col.
120.

(m), that our Poet was created Doctor of Physic at Oxford [R], December 2, 1657. After the King's restoration, Mr. Cowley, being then past the fortieth year of his age, the greatest part of which had been spent in a various and tempestuous condition, resolved to pass the remainder of his life in a studious retirement [S]. At first he was but slenderly provided for such a retreat, by reason of his travels, and the distresses of his party, which had put him quite out of the road of gain. But, upon the settlement of the peace of the nation, he obtained a plentiful estate through the favour of his principal patrons the Duke of Buckingham and the Earl of St. Albans. Thus furnished for his retreat, he spent the last seven or eight years of his life in his beloved obscurity [T], and possessed that solitude, which from his very childhood he had most passionately desired (n). He chose for the seats of his declining life, two or three villages on the banks of the Thames (o); particularly Chertsey, where he had a lease of a farm held of the Queen (p). This great Poet died [U] at a house called

(n) Life, &c. p. 10, 11, 12.

(p) Ubi supra

Tibullus, in the sweetness and freedom of the verse, but excelling them in the strength of the fancy and vigour of the sense. The *third* and *fourth* discourse of *Flowers*, in all the variety of Catullus and Horace's numbers: for the last of which authors he had a peculiar reverence, and imitated him, not only in the numerous and stately pace of his Odes and Epodes, but in the familiar easiness of his Epistles and Discourses. The *two last* speak of *Trees*, in the way of Virgil's Georgicks. Of these the *sixth* book is wholly dedicated to the honour of his country. For, making the British Oak to preside in the Assembly of the Forest Trees, upon that occasion he enlarges on the history of our late troubles, the King's affliction and return, and the beginning of the Dutch War; and manages all in a style, that (to say all in a word) is equal to the greatness and valour of the English nation. Of Mr. Cowley's *Latin Poetry* in general the Life-writer gives this character (30), that in them 'he has expressed to admiration all the numbers of verse, and figures of poesy, that are scattered up and down amongst the antients;' and that 'there is hardly to be found in them any good fashion of speech, or colour of measure, but he has comprehended it, and given instances of it, according as his several arguments required either a majestic spirit, or a passionate, or a pleasant. This (*he observes*) is the more extraordinary, in that it was never yet performed by any single poet of the antient Romans themselves.'

(30) Life, &c.
p. 19.

[R] He was created Doctor of Physic at Oxford.] Anthony Wood pretends (31), Mr. Cowley had this degree conferred upon him by virtue of a *Mandamus* from the then government. 'Afterwards (says he) complying with the men then in power (which was much taken notice of by the Royal party) he obtained an order to be created Doctor of Physic.' Allowing this state of the fact to be true, though the Life-writer says not a word of it, Mr. Cowley's compliance with the men then in power could only be seemingly such, for the better carrying on the design of his coming over under the pretence of studying Physic.

(31) Ubi supra.

[S] He resolved to pass the remainder of his life in a studious retirement.] Anthony Wood (32) ascribes this resolution to disappointment, in not finding that preferment conferred upon him, which he expected, while others for their money carried away most places.

(32) Ibid.

But Dr. Sprat (33) represents his retirement as the effect of choice, not of discontent. 'He now thought, says that author, he had sacrificed enough of his life to curiosity and experience. He had enjoyed many excellent occasions of observation. He had been present in many great revolutions, which in that tumultuous time disturbed the peace of all our neighbour states, as well as our own. He had nearly beheld all the splendor of the highest part of mankind. He had lived in the presence of princes, and familiarly conversed with greatness in all its degrees, which was necessary for one that would condemn it aright: for to scorn the pomp of the world before a man knows it, does commonly proceed rather from ill manners than a true magnanimity. He was now weary of the vexations and formalities of an active condition. He had been perplexed with a long compliance to foreign manners. He was satiated with the arts of Court; which sort of life, though his virtue had made innocent to him, yet nothing could make it quiet. These were the reasons that moved

(33) Life, &c.
p. 10.

him to forego all public employments, and to follow the violent inclination of his own mind, which, in the greatest throng of his former business, had still called upon him, and represented to him the true delights of solitary studies, of temperate pleasures, and of a moderate revenue, below the malice and flatteries of fortune.'

[T] His beloved obscurity.] Mr. Cowley's Works, especially his *Essays in prose and verse*, abound with the praises of solitude and retirement. His three first Essays are on the subjects of *Liberty*, *Solitude*, and *Obscurity*; and most of the translations are of such passages of the Classic authors as relate to the pleasures of a country life: particularly, Virgil's *O fortunatos nimium*, &c. Horace's *Beatus ille qui procul*, &c. The same author's *Country Mouse*; Claudian's *Old Man of Verona*; and Martial's *Vitam quæ faciunt beatorem*, &c. To these are subjoined the following epitaph, by the author, on himself, while living.

Epitaphium Vivi Auctoris.

Hic, O Viator, sub Lare parvulo
Culeius hic est conditus, hic jacet
Defunctus humani laboris
Sorte, supervacuæque vita;
Non indecora pauperie nitens
Et non inerti nobilis otio,
Vanoque dilectis popello
Divitiis animosus hostis.
Possis ut illum dicere mortuum,
En terra jam nunc quantula sufficit!
Exempta sit curis, viator,
Terra sit illa levis, precare.
Hic sparge flores, sparge breves rosas,
Nam vita gaudet mortua floribus;
Herbisque odoratis corona
Vatis adhuc cinerem calentem.

[U] He died.] His solitude, from the very beginning, had never agreed so well with the constitution of his body, as of his mind. The chief cause of it was, that, out of haste to be gone away from the tumult and noise of the city, he had not prepared so healthful a situation in the country, as he might have done, if he had made his choice more at leisure. Of this he soon began to find the inconvenience at *Barn-elms*, where he was afflicted with a dangerous and lingering fever. After that he scarcely ever recovered his former health, though his mind was restored to its perfect vigour. Shortly after his removal to *Chertsey*, he fell into another consuming disease. Having languished under this for some months, he seemed to be pretty well cured of its ill symptoms. But, in the heat of the summer, by staying too long amongst his labourers in the meadows, he was taken with a violent defluxion, and stoppage in his breast and throat. This he at first neglected as an ordinary cold, and refused to send for his usual physicians, till it was past all remedies; and so, in the end, after a fortnight's sickness, it proved mortal to him (34). 'Who can here forbear exclaiming on the weak hopes, and frail condition of human nature? For as long as Mr. Cowley was pursuing the course of ambition, in an active life, which he scarce esteemed his true life, he never wanted a constant health and strength of body. But as soon as ever he had found an opportunity of beginning indeed to live, and to enjoy himself

called The Porch-house, towards the West end of the town of Chertsey in Surrey, July 28, 1667, in the forty-ninth year of his age. His body, accompanied by a great number of persons of the most eminent quality, was interred, the third of August following, in Westminster-Abbey, near the ashes of Chaucer and Spenser, the two most famous English Poets of former times (q). King Charles II. was pleased to bestow upon him the best epitaph, when, upon the news of his death, his Majesty declared, that *Mr. Cowley had not left a better man behind him in England* (r). A monument was erected to his memory, in May 1675, by George Duke of Buckingham, with a Latin inscription written by his friend Dr. Thomas Sprat [W], author of the *Account of Mr. Cowley's Life and Writings*, prefixed to his *Works*, and afterwards Bishop of Rochester. Besides Mr. Cowley's *Works*, already mentioned, we have by the same hand, *A Proposition for the Advancement of Experimental Philosophy* [X]; *A Discourse by way of Vision concerning the government of Oliver Cromwell* [Y]; and *Several Discourses by way of Essays in prose and verse* [Z]. Mr. Cowley had designed also a *Discourse concerning Style* [AA], and a *Review of the principles of the primitive Christian Church* [BB], but was prevented by death (s). A spurious piece, (s) *Ib.* p. 30, 31. entitled

32.

himself in security, his contentment was first broken by sickness, and at last his death was occasioned by his very delight in the country and the fields, which he had long fancied above all other pleasures (35). [W] An inscription on his monument, written by his friend Dr. Thomas Sprat.] It is this:

Abrahamus Couleius, Anglorum Pindarus, Flaccus, Maro, Deliciae, Decus, Desiderium, ævi sui, hic juxta situs est.

Aurea dum volitant late tua scripta per orbem,
Et fama æternum vivis, divine Poeta,
Hic placida jaceas requie: custodiat urnam
Cana Fides, vigilantque perenni lampade Musæ.
Sit sacer iste locus, nec quis temerarius ausit
Sacilega turbare manu venerabile bustum.
Intacti maneant, maneant per sæcula, dulcis
Couleii cineres, serventque immobile saxum.

Sic vovit, votumque suum apud posteros sacratum esse voluit, qui viro incomparabili posuit sepulchrale marmor, Georgius Dux Buckinghamiæ.

Excessit e vita anno ætatis suæ 49, et honorifica pompa elatus ex ædibus Buckinghamianis, viris illustribus omnium ordinum exequias celebrantibus, sepultus est die 3 M. Augusti, Anno Domini 1667.

(36) Works, &c.
vol. ii. p. 577.

[X] A Proposition for the advancement of Experimental Philosophy.] It is by a College, consisting of Professors, Scholars, Chaplains, and other officers. Their business, to use Mr. Cowley's own words (36), should be, to study the improvement and advantage of all other professions, from that of the highest General, even to the lowest artisan—to employ their whole time, wit, learning, and industry, to these four, the most useful that can be imagined, and to no other ends: First, to weigh, examine, and prove, all things of nature delivered to us by former ages; to detect, explode, and strike a censure through all false monies, with which the world has been paid and cheated so long, and, as I may say, to set the mark of the college upon all true coins, that they may pass hereafter without any farther trial: Secondly, to recover the lost inventions, and, as it were, drowned lands of the antients: Thirdly, to improve all arts, which we now have; and lastly, to discover others, which we yet have not.

[Y] A Discourse by way of Vision concerning the government of Oliver Cromwell.] Our author, having been a spectator of Cromwell's funeral procession (which, to his thinking, somewhat represented the life of him for whom it was made: much noise, much tumult, much expence, much magnificence, much vain-glory; briefly a great show, and yet, after all this, but an ill sight,) tells us, he was rocked asleep by the different motions and agitations of his mind, and at last fell into this vision. He finds himself on the top of a famous hill in the island of Mona, whence he had a prospect of Great Britain and Ireland. After some melancholy reflections, and a poetical complaint of the present unhappy condition of these kingdoms, he is interrupted by a strange and terrible apparition of the figure of a man, rising out of the earth, taller than any

giant. This phantom, which is there described at length, calls himself the North-West Principality, and Protector of the Common-wealth of England, Scotland, and Ireland, and undertakes the defence of Cromwell's character and government, against the severe censures and keen invectives of the author, who represents both in the blackest and most detestable colours. At last, the Evil Angel's fury being raised, the author is in great danger, but is preserved by the descent of a good angel, the poetical description of which concludes the vision.

[Z] Several Discourses, by way of Essays, in prose and verse.] These, which are upon some of the gravest subjects that concern the contentment of a virtuous mind, he intended, Dr. Sprat tells us (37), as a real character of his own thoughts upon the point of his retiring (38). Accordingly, it is observable, that, in the prose of them, there is little curiosity of ornament; but they are written in a lower and humbler style than the rest, and, as an unfeigned image of the soul should be drawn, without flattery. He designed to have added many others to them, and to have dedicated them all to the Earl of St. Alban's, as a testimony of his entire respects to him, and a kind of apology for having left human affairs in the strength of his age, while he might still have been serviceable to his country.

[AA] He designed A Discourse concerning Style.] In this he had designed to give an account of the proper sorts of writing, that were fit for all manner of arguments; to compare the perfections and imperfections of the authors of antiquity with those of the moderns; and to accommodate the whole to the particular use of the English Genius and Language (39). This subject, adds Dr. Sprat, he was very fit to perform, it being most proper for him to be the judge, who had been the best practiser. But he scarce lived to draw the first lines of it. All the footsteps that I can find remaining of it, are only some indigested characters of antient and modern authors. And now for the future, I almost despair ever to see it well accomplished.

[BB]—and a Review of the principles of the primitive Christian Church.] Though Mr. Cowley was in his practice exactly obedient to the usages and precepts of the Church of England, nor was inclined to any uncertainty and doubt, as abhorring all contention in indifferent things, and much more in sacred; yet, beholding the divisions of Christendom, and observing how many controversies had been introduced by zeal and ignorance, and continued by faction; he had therefore an earnest intention, for the establishing his own mind in the faith he professed, to look back to the original principles of the primitive Church; believing that every true Christian had no better means to settle his spirit, than that which was proposed to Æneas and his followers, to be the end of their wanderings, *Antiquam exquirite matrem*. This examination he purposed should reach to our Saviour's and the Apostles lives, and their immediate successors, for four or five Centuries, till interest and policy prevailed over Devotion. He hoped to have absolutely compassed it in three or four years, and, when

intituled *The Iron Age*, was published under Mr. Cowley's name [CC], during his absence; and, in Mr. Dryden's *Miscellany Poems* (t), we find *A Poem on the Civil War*, said to be written by our author [DD], but not extant in any edition of his works. Dr. Sprat mentions, as very excellent in their kind, Mr. Cowley's *Letters to his private friends* [EE], none of which were published (u). That author gives us a most advantageous character of Mr. Cowley, both as a man [FF], and as a Poet [GG]. Mr. Addison has celebrated his

when that was done, there to have fixed for ever, without any shaking or alteration in his judgment (40). 'Indeed, adds Dr. Sprat, it was a great damage to our Church, that he lived not to perform it. For very much of the primitive light might have been expected from a mind that was endued with the primitive meekness and innocence. And besides, such a work, coming from one that was no Divine, might have been very useful for an age, wherein it is one of the principal cavils against religion, that it is only a matter of interest, and only supported for the gain of a particular profession.'

[CC] *A spurious piece*, intituled *The Iron age*, was published under Mr. Cowley's name.] He speaks of it himself (41), with some asperity and concern. 'I wondered, says he, how one, who could be so foolish to write such ill verses, should yet be so wise to set them forth as another man's rather than his own; though perhaps he might have made a better choice, and not fathered the bastard upon such a person, whose stock of reputation is, I fear, little enough for maintenance of his own numerous legitimate off-spring of that kind. It would have been much less injurious, if it had pleased the author to put forth some of my writings under his own name, rather than his own under mine. He had been in that a more pardonable Plagiary, and had done less wrong by robbery, than he does by such a bounty: for no body can be justified by the imputation even of another's merit: our own coarse cloaths are like to become us better than those of another man, though never so rich. But these, to say the truth, were so beggarly, that I myself was ashamed to wear them. It was in vain for me, that I avoided censure by the concealment of my own writings, if my reputation could be thus executed in effigy; and impossible it is for any good name to be safe, if the malice of witches have the power to consume and destroy it in an image of their own making. This indeed was so ill made, and so unlike, that I hope the charm took no effect.'

[DD] *A Poem on the Civil War*, said to be written by our author.] It was printed, first, at London, in quarto, in 1679 (42). The publisher tells us (43), that, meeting accidentally with this poem in manuscript, and being informed that it was a piece of the incomparable Mr. Abraham Cowley's, he thought it unjust to hide such a treasure from the world. 'I remembered, says he, that our author, in the Preface to his Works, makes mention of some poems, written by him on the late Civil Wars, of which the following is unquestionably a part. In his most imperfect and unfinished pieces you will discover the hand of so great a master. And (whatever his own modesty might have advised to the contrary) there is not one careless stroke of his, but what should be kept sacred to all posterity. He could write nothing that was not worth the preserving, being habitually a poet, and always inspired. In this piece the judicious reader will find the turn of verse to be his; the same copious and lively imagery of fancy, the same warmth of passion, and delicacy of wit, that sparkles in all his writings. And certainly no labour of a Genius so rich in itself, and so cultivated with learning and manners, can prove an unwelcome present to the World.' The passage of Mr. Cowley's Preface, here pointed at, is this. 'I have cast away all such pieces as I wrote during the time of the late troubles, with any relation to the differences that caused them; as among others, *Three Books of the Civil War* itself, reaching as far as the first Battle of Newbury, where the succeeding misfortunes of the party stopped the work.'

[EE] *His Letters to his private friends*.] Let us hear Dr. Sprat. 'In these he always expressed the native tenderness and innocent gaiety of his mind.'

VOL. IV.

'I think, Sir (*), you and I have the greatest collection of this sort. But I know you agree with me, that nothing of this nature should be published: and herein you have always consented to approve the modest judgment of our countrymen, above the practice of some of our neighbours, and chiefly of the French. I make no manner of question, but the English, at this time, are infinitely improved this way, above the skill of former ages, nay of all the countries round about us, that pretend to greater eloquence. Yet they have been always judiciously sparing in printing such composures, while some other witty nations have tired all their presses, and readers, with them. The truth is, the letters that pass between particular friends, if they are written as they ought to be, can scarce ever be fit to see the light. They should not consist of fulsome compliments, or tedious politicks, or elaborate elegancies, or general fancies: but they should have a native clearness and shortness, a domestic plainness, and a peculiar kind of familiarity; which can only affect the humour of those for whom they were intended. The very same passages which make writings of this nature delightful among friends, will lose all manner of taste, when they come to be read by those that are indifferent. In such letters the souls of men should appear undressed: and in that negligent habit they may be fit to be seen by one or two in a chamber, but not to go abroad into the streets' (44).

(*) Addressing himself to Mr. Clifford.

[FF] *His character, as a man*.] He had a perfect natural goodness, which neither the uncertainties of his condition, nor the largeness of his wit could pervert. Nothing vain or fantastical, nothing flattering or insolent, appeared in his humour. Nor was there any thing affected or singular in his habit, or person, or gesture. He understood the forms of good breeding enough to practise them, without burthening himself or others. He never had any emulation for fame, or contention for profit, with any man. His modesty and humility were so great, that, if he had not had many other equal virtues, they might have been thought dissimulation. His conversation was such, as was rather admired by his familiar friends, than by strangers at first sight. In his speech, neither the pleasantness excluded gravity, nor was the sobriety of it inconsistent with delight. He governed his passions with great moderation. Whatever he disliked in others, he only corrected it by the silent reproof of a better practice. His wit was so tempered, that no man had ever reason to wish it had been less. He never willingly recited any of his writings; and none but his intimate friends ever discovered he was a great poet by his discourse. His learning was large and profound, and sat exceeding close and handsome upon him: it was not embossed on his mind, but enamelled. He never guided his life by the whispers, or opinions of the world. He was a passionate lover of liberty, and freedom from restraint both in actions and words. But what honesty others receive from the direction of laws, he had by native inclination. He performed all his natural and civil duties with admirable tenderness. His friendships were inviolable: his thoughts never above nor below his condition. In a word, he was accomplished with all manner of abilities, for the greatest business, if he would but have thought so himself (45).

(44) Life, &c. p. 23, 24.

[GG] —as a Poet.] In all the several shapes of his style, there is very much of the likeness and impression of the same mind; the same unaffected modesty, and natural freedom, and easy vigour and chearful passions, and innocent mirth, which appeared in all his manners. If he was not wonderfully curious in the choice and elegance of his words, on the other side he had no manner of affectation in them, but took them as he found them made to his hands. If his verses in

(45) Ibid. p. 26, 37, 38.

his praises with a mixture of blame [HH]. Sir John Denham has given us a fine copy of verses on his death and burial among the antient Poets [II]; and Mr. Pope has

some places seem not as soft and flowing, as some would have them, it was his choice, not his fault. Where the matter required it, he was as gentle as any man; but where higher virtues were chiefly to be regarded, an exact numerosity was not then his main care. He had a perfect mastery in both the languages in which he wrote, and excelled both in prose and verse. Though his fancy flowed with great speed, he never runs his reader, nor his argument, out of breath, but always leaves off in such a manner, that it appears it was in his power to have said more. His invention is powerful, but seems all to arise out of the nature of the subject, and to be just fitted for the thing of which he speaks. The variety of arguments that he has managed is so large, that there is scarcely any particular of the passions of men, or works of nature and providence, which he has passed by undescribed: yet to all these matters, so wide asunder, he still proportions a due figure of speech, and a proper measure of wit (46). Whether Mr. Cowley's works have been always viewed in the same favourable light, will be seen in the following remark.

(46) *Ibid.* p. 13, 14, 15.

[HH] Mr. Addison celebrates his praises with a mixture of blame.] It is in his *Account of the greatest English Poets*, addressed to Mr. Henry Sacheverell, April 3, 1694 (47). The Lines are these.

(47) See Mr. Addison's Works, edit. 12mo. 1726, vol. i. p. 35.

Great Cowley then, a mighty Genius, wrote,
O'errun with wit, and lavish of his thought:
His turns too closely on the reader press;
He more had pleas'd us, had he pleas'd us less.
One glittering thought no sooner strikes our eyes
With silent wonder, but new wonders rise;
As in the milky way a shining white
O'erflows the heav'ns with one continued light;
That not a single star can shew his rays,
Whilst jointly all promote the common blaze.
Pardon, great poet, that I dare to name
Th' unnumber'd beauties of thy verse with blame.
Thy fault is only wit in its excess;
But wit like thine in any shape will please.
What Muse but thine can equal hints inspire,
And fit the deep-mouth'd Pindar to thy lyre?
Pindar, whom others in a labour'd strain,
And forc'd expressions, imitate in vain.
Well-pleas'd in thee he soars with new delight,
And plays in more unbounded verse, and takes a nobler flight.

Blest man! whose spotless life and charming lays
Employ'd the tuneful prelate in thy praise.
Blest man! who now shall be for ever known
In Sprat's successful labours and thy own.

In one of the notes on this author's translations from Ovid's *Metamorphoses* (48), we have the following account of the nature of mixed wit, of which OVID, he tells us, among the antients, was the greatest admirer, as our COWLEY was among the moderns. 'Mr. Locke, in his *Essay of Human Understanding*, has given us the best account of wit in short that can any where be met with. Wit, says he, lies in the assemblage of Ideas, and putting those together with quickness and variety, wherein can be found any resemblance or congruity, thereby to make up pleasant pictures and agreeable visions in the fancy. Thus does true wit, as this incomparable author observes, consist in the likeness of Ideas, and is more or less wit, as this likeness is more surprizing and unexpected. But as true wit is nothing else but a similitude in Ideas, so is false wit the similitude in words, whether it lies in the likeness of letters only, as in anagram and acrostic; or of syllables, as in Doggrel rhimes; or whole words, as Puns, Echo's and the like. Besides these two kinds of false and true wit, there is another of a middle nature, that has something of both in it: when in two Ideas, that have some resemblance with each other, and are both expressed by the same word, we make use of the ambiguity of the word, to speak that of one Idea included under it, which is proper to the other. Thus, for example,

(48) *Ib.* p. 248.

most languages have hit on the word which properly signifies Fire, to express Love by, (and therefore we may be sure there is some resemblance in the Ideas mankind have of them;) from hence the witty poets of all languages, when they have once called Love a Fire, consider it no longer as the passion, but speak of it under the notion of a real fire, and, as the turn of wit requires, make the same word in the same sentence stand for either of the ideas that is annexed to it. When Ovid's Apollo falls in love, he burns with a new flame; when the Sea-nymphs languish with this passion, they kindle in the water: the Greek Epigrammatist fell in love with one that flung a snow-ball at him, and therefore takes occasion to admire how fire could be thus concealed in snow. In short whenever the poet feels any thing in his love that resembles something in fire, he carries on this agreement into a kind of allegory: but if, as in the preceding instances, he finds any circumstances in his love contrary to the nature of fire, he calls his love a fire, and by joining this circumstance to it, surprises his reader with a seeming contradiction.'

Mr. Addison tells us elsewhere (49), that this sort of wit abounds in Cowley, more than in any other author that ever wrote; and he gives us some examples of it, all borrowed from our Poet's *Mistress*. He remarks, that 'Cowley, observing the cold regard of his mistress's eyes, and at the same time their power of producing love, in him, considers them as burning-glasses made of ice; and finding himself able to live in the greatest extremities of love concludes the torrid zone to be habitable. When his mistress has read his letter written in juice of lemon, by holding it to the fire, he desires her, to read it over a second time by love's flames. When she weeps, he wishes it were inward heat that distilled those drops from the limbeck. When she is absent, he is beyond eighty, that is, thirty degrees nearer the pole, than when she is with him. His ambitious love is a fire, that naturally mounts upwards; his happy love is the beams of heaven, and his unhappy love flames of hell. When it does not let him sleep, it is a flame, that sends up no smoke; when it is opposed by counsel and advice, it is a fire, that rages the more by the wind's blowing upon it. Upon the dying of a tree, in which he had cut his loves, he observes, that his written flames had burnt up and withered the tree. When he resolves to give over his passion, he tells us, that one burnt like him for ever dreads the fire. His heart is an *Ætna*, that instead of Vulcan's shop incloses Cupid's forge in it. His endeavouring to drown his love in wine, is throwing oil upon the fire. He would insinuate to his mistress, that the fire of love, like that of the sun (which produces so many living creatures) should not only warm, but beget. Love, in another place, cooks pleasure at his fire. Sometimes the poet's heart is frozen in every breast, and sometimes scorched in every eye. Sometimes he is drowned in tears, and burnt in love, like a ship set on fire in the middle of the sea.' The reader may observe, concludes Mr. Addison, in every one of these instances, that the poet mixes the qualities of fire with those of love; and in the same sentence speaking of it both as a passion and as a real fire, surprises the reader with these seeming resemblances or contradictions, that make up all the wit in this kind of writing. He acknowledges, however, that the poet, out of whom he had taken these examples of mixed wit, had as much true wit as any author that ever wrote, and indeed all other talents of an extraordinary genius.

(49) *Spectator*, vol. i. No. 62.

[II] Sir John Denham's verses on Mr. Cowley's death and burial among the antient poets.] They contain the following Elegy on our bard (50).

(50) Denham's Poems, p. 90.

Old mother wit, and nature gave
Shakespeare and Fletcher all they have;
In Spenser and in Jonson, Art
Of flower nature got the start.

But

has paid the tribute of verse to his memory, in his *Windsor-Forest* [KK].

But both in him so equal are,
None knows which bears the happiest share.
To him no author was unknown,
Yet what he wrote was all his own:
He melted not the antient gold,
Nor, with *Ben Jonson*, did make bold
To plunder all the Roman stores
Of Poets and of Orators.
Horace's wit, and *Virgil's* state
He did not steal, but emulate;
And when he wou'd like them appear,
Their garb, but not their cloaths, did wear.
He not from *Rome* alone, but *Greece*,
Like *Jason*, brought the Golden Fleece.
On a stiff gale (as *Flaccus* sings)
The *Theban* Swan extends his wings,
When thro' th' ætherial clouds he flies:
To the same pitch our Swan doth rise;
Old *Pindar's* flights by him new reach'd,
When on that gale his wings are stretch'd.

[KK] Mr. Pope has paid the tribute of verse to his memory, in his *Windsor-Forest*.] The lines are these (51):

Here his first lays majestic Denham sung;
There the last numbers flow'd from Cowley's tongue (ll).
O early lost! what tears the river shed,
When the sad pomp along his banks was led!
His drooping swans on ev'ry note expire,
And on his willows hung each Muse's lyre.
Since fate relentless stopp'd their heav'nly voice,
No more the forests ring, or groves rejoice.
Who now shall charm the shades, where Cowley strung
His living harp, and lofty Denham sung?

B.

.* [From the numerous lives which have been written of Cowley, there are very few facts to be collected that are not recorded in the preceding article. Almost the whole of what has been done by Dr. Johnson in this respect, is his having given, from the strength and sagacity of his mind, a new aspect to some of the occurrences which he relates. But before we enter into these circumstances, it will be proper to correct a mistake into which the Doctor has fallen by having recourse only to Bishop Sprat. Following that author, he hath asserted, that a volume of Cowley's Poems was not only written but printed in his thirteenth year. But it has been shewn by Wood, and the writers of the Great General Dictionary, as well as by our predecessor, in Note [B], that this was not the case.

Dr. Johnson hath treated with ridicule the account of Sprat, concerning Cowley's defect of memory at Westminster School being so great, that his teachers never could bring it to retain the ordinary rules of Grammar. "This is an instance," says the Doctor, "of the natural desire of man to propagate a wonder." "It is surely very difficult to tell any thing as it was heard, when Sprat could not refrain from amplifying a commodious incident, though the book to which he prefixed his narrative contained its confutation. A memory admitting some things, and rejecting others, an intellectual digestion that concocted the pulp of learning, but refused the husks, had the appearance of an instinctive elegance, of a particular provision made by nature for literary politeness. But in the Author's own honest relation, the marvel vanishes. He was, he says, such an enemy to all constraint, that his master could never prevail on him to learn the rules without book. He does not tell that he could not learn the rules, but that, being able to perform his exercises without them, and being an enemy to constraint, he spared himself the labour (52)."

Dr. Johnson unites with Sprat in vindicating Mr. Cowley from Anthony Wood's charge, of his having complied with the men in power, when he returned to England in 1656. The Doctor observes that even in Wood's representation not much wrong can be discovered. "How far Cowley complied with the

"men in power, is to be enquired before he can be blamed. It is not said that he told them any secrets, or assisted them by intelligence, or any other act. If he only promised to be quiet; that they in whose hands he was might free him from confinement, he did what no law of society prohibits (53)."

(53) *Ibid.* p. 17,

When Cowley's "Cutter of Coleman-Street" was first represented on the stage, it was treated with great severity; and was afterwards censured as a satire on the King's party. Dryden and Sprat were present at the exhibition; and upon their informing Cowley how little favour had been shewn him, he received the news of his ill success, not with so much firmness as might have been expected from so great a man.

"For the rejection of this play, says Dr. Johnson, it is difficult now to find the reason: it certainly has, in a very great degree, the power of fixing attention and exciting merriment. From the charge of disaffection he exculpates himself in his preface, by observing how unlikely it is that, having followed the Royal Family through all their distresses, "he should chuse the time of their restoration to begin a quarrel with them." It appears, however, from the Theatrical Register of Downes the prompter, to have been popularly considered as a satire on the royalists. That he might shorten this tedious suspense, he published his pretensions and his discontent, in an Ode called "The Complaint;" in which he styles himself the melancholy Cowley. This met with the usual fortune of complaints, and seems to have excited more contempt than pity. These unlucky incidents are brought, maliciously enough, together in some stanzas, written about that time, on the choice of a laureat; a mode of satire, by which, since it was first introduced by Suckling, perhaps every generation of poets has been teased.

"Savoy-missing Cowley came into the court,
Making apologies for his bad play;
Every one gave him so good a report,
That Apollo gave heed to all he could say:
Nor would he have had, 'tis thought, a rebuke,
Unless he had done some notable folly;
Writ verses unjustly in praise of Sam Tuke,
Or printed his pitiful Melancholy (54)."

(54) *Ibid.* p. 19,
20.

In the sixth Number of the Rambler, Dr. Johnson hath made some admirable reflections on Mr. Cowley's vehement desire of retirement. How unfortunately his retreat from the world succeeded, will be evident from the following letter, which has been preserved by Peck.

"To Dr. Thomas Sprat.

"Chertsey, 21 May, 1665.

"The first night that I came hither I caught so great a cold, with a defluxion of rheum, as made me keep my chamber ten days. And, two after, had such a bruise on my ribs with a fall, that I am yet unable to move or turn myself in my bed. This is my personal fortune here to begin with. And besides, I can get no money from my tenants, and have my meadows eaten up every night by cattle put in by my neighbours. What this signifies, or may come to in time, God knows; if it be ominous, it can end in nothing less than hanging. Another misfortune has been, and stranger than all the rest, that you have broke your word with me, and failed to come, even though you told Mr. Bois that you would. This is what they call *Monstri simile*. I do hope to recover my late hurt so farre within five or six days (though it be uncertain yet whether I shall ever recover it) as to walk about again. And then, methinks, you and I and the Dean might be very merry upon St. Anne's Hill. You might very conveniently come hither the way of Hampton Town, lying there one night. I write this in pain, and can say no more: *Verbum sapienti* (55)."

(55) *Ibid.* p. 22,
23.

If

(51) Pope's Works, 12mo. edit 1736, vol. i. p. 78.

(ll) Mr. Cowley died at Chertsey on the borders of the forest.

(52) Johnson's Lives of the most eminent English Poets, vol. i. p. 3, 4.

If Mr. Cowley thought that the Swains of Surrey had the innocence of those of Sydney's Arcadia, he was soon undeceived by the perverseness and debauchery of his own workmen, with whom, as we learn from Dr. Warton, it is said that he was some times so far provoked, as even to be betrayed into an oath. "His income was about three hundred pounds a year. Towards the latter part of his life, he shewed an aversion to the company of women, and would often leave the room if any happened to enter whilst he was present; but still he retained a sincere affection for Leonora." The ingenious and learned writer to whom we are indebted for these circumstances, has given us a new account of the cause of Mr. Cowley's death. It was occasioned, he says, by a singular accident. "He paid a visit on foot with his friend Sprat to a Gentleman in the neighbourhood of Chertsey, which they prolonged till midnight. On their return home they mistook their way, and were obliged to pass the whole night exposed under a hedge, where Cowley caught a severe cold, attended with a fever, that terminated in his death (56)." Dr. Warton hath not favoured the public with the authority on which this anecdote is grounded. This, however, would have been desirable; as the story is so very different from the account given by Dr. Sprat himself of the cause of Mr. Cowley's decease, and which is inserted in note [U].

(56) Essay on the Writings and Genius of Pope, vol. ii. p. 108—110. 1st. edit.

Sprat's inscription on the monument of his friend has not escaped criticism. An anonymous writer, in an Essay on Epitaphs, published in the Gentleman's Magazine, has expressed himself in the following terms. "All allusions to the heathen mythology are absurd, and all regard for the senseless remains of a dead man impertinent and superstitious. One of the first distinctions of the primitive Christians, was their neglect of bestowing garlands on the dead, in which they are very rationally defended by their apologist in Minutius Felix. *We lavish no flowers nor odours on the dead, says he, because they have no sense of fragrance or of beauty.* We profess to reverence the dead not for their sake but for our own. It is, therefore, always with indignation or contempt that I read the Epitaph on Cowley, a man whose learning and poetry were his lowest merits.—To pray that the ashes of a friend may lie undisturbed, and that the divinities that favoured him in this life, may watch for ever round him, to preserve his tomb from violation, and drive sacrilege away, is only rational in him who believes the soul interested in the repose of the body, and the powers which he invokes for its protection able to preserve it. To censure such expressions as contrary to religion, or as remains of Heathen superstition, would be too great a degree of severity. I condemn them only as uninteresting and unaffecting, as too ludicrous for reverence or grief, for Christianity and a temple (57)."

(57) Gentleman's Magazine, vol. x. p. 594. The whole Essay deserves to be read.

(58) Johnson, *ubi supra*, p. 24.

The moral character of Mr. Cowley appears, from every account of it, to have been very excellent. "He is represented by Dr. Sprat," says Dr. Johnson, "as the most amiable of mankind; and this posthumous praise may be safely credited, as it has never been contradicted by envy or by faction (58)."

Mr. Cowley's disposition of mind is well displayed in the following lines of the late Mr. Robert Lloyd.

"Nor, Cowley, be thy Muse forgot! which strays
In wit's ambiguous flowery maze;
With many a pointed turn, and studied art:
Tho' affectation blot thy rhyme,
Thy mind was lofty and sublime,
And manly honour dignified thy heart:
Though fond of wit, yet firm to Virtue's plan,
The Poet's trifles ne'er disgrac'd the Man.

"Well might thy morals sweet engage
Th' attention of the mitred sage,
Smit with the plain simplicity of truth.
For not ambition's giddy strife,
The gilded toys of public life,
Which snare the gay unstable youth,

"Could lure thee from the sober charms,
Which lapt thee in retirement's arms;
Whence thou, untainted with the pride of state,
Could'st smile with pity on the bustling great (59)."

(59) Lloyd's Poetical Works, vol. i. p. 152, 153.

Though Mr. Cowley's character is, in general, so well known, yet it is highly probable that we should have seen much more of the peculiar turn of his mind, if a number of his private letters had been given to the world. Dr. Sprat's opinion, expressed at large in note [EE], that *nothing of this nature should be published*, is remarkable; and the more so, as it is totally contrary to the sentiments of the present Age. Mr. Maſon and Mr. Knox have very justly declared their disapprobation of Dr. Sprat's notions and conduct in this respect (60). Indeed, the letters of eminent men are often instructive, interesting, and entertaining; in which case the publication of them is a benefit to the community. But to retail every epistle, and every scrap of a deceased author, however trifling and insignificant, can only be the result of a tasteless avidity, and only gratify a childish curiosity. We might enlarge upon the subject; but perhaps it may come more properly before us in the course of our future lucubrations.

(60) Maſon's Memoirs of his Life and Writings of Gray, p. 4, 2d. edit. Knox's Essays, vol. ii. p. 365.

While so little can be added with regard to the facts of Mr. Cowley's life, much hath been written concerning his genius and literary merit. Dryden's opinion of him, delivered at a period when he was still often spoken of with indiscriminate praise, is too sensible to be omitted. The name of Cowley is not, indeed, mentioned by Dryden; but there can be no doubt to whom he refers. "One of our late great Poets," says he, "is sunk in his reputation, because he could never forgive any conceit which came in his way; but swept, like a drag-net, great and small. There was plenty enough, but the dishes were ill sorted; whole pyramids of sweet-meats, for boys and women; but little of solid meat for men. All this proceeded not from any want of knowledge, but of judgment; neither did he want that in discerning the beauties and faults of other Poets; but only indulged himself in the luxury of writing; and perhaps knew it was a fault, but hoped the reader would not find it. For this reason, though he must always be thought a great Poet, he is no longer esteemed a good writer: and for ten impressions, which his works have had in so many successive years, yet at present a hundred books are scarcely purchased once a twelvemonth: for, as my last Lord Rochester said, though somewhat profanely, *not being of God, he could not stand* (61)."

(61) Johnson's Poets, vol. xv. p. 26, 27. This passage was pointed out to us by a learned Correspondent.

Later authors in general have estimated Cowley with more critical exactness than was commonly done in and a little after his own time; and some of them have detracted too much from his merit. Of this number we may reckon Mr. Hume. "Cowley," says this ingenious historian, "is an author extremely corrupted by the bad taste of his age; but had he lived in the purest times of Greece and Rome, he must always have been a very indifferent Poet. He had no ear for harmony; and his verses are only known to be such by the rhyme, which terminates them. In his rugged untuneable numbers are conveyed sentiments the most strained and violent; long spun allegories, distant allusions, and forced conceits. Great ingenuity, however, and force of thought, sometimes break out amidst these unnatural conceptions: a few Anacreontics surprise us by their ease and gaiety: his prose writings please, by the honesty and goodness which they express; and even by their spleen and melancholy. This author was much more praised and admired during his life-time, and celebrated after his death, than the great Milton (62)." We are far from agreeing with Mr. Hume in his assertion, that if Cowley had lived in the purest times of Greece and Rome, he must always have been a very indifferent Poet. Such an assertion could only proceed from a want of candour or of judgment: for surely Cowley's genius would have enabled him to rise to no small degree of poetical excellence, had he not been misled by the false taste of the age.

(62) History of England, vol. vii. p. 354.

Another

Another author, almost as severe upon our Poet as Mr. Hume, is Mr. Knox.

"It was the lot, says this ingenious Essayist, of Cowley to be handed down to posterity by a writer who was famous in his day for eloquence. Dr. Sprat probably undertook the office of a biographer, with a design to display his talents in a species of oratory which the Roman rhetoricians called the demonstrative. He discharged it well as an artist, but failed as an accurate historian. By placing Cowley in the first rank of poets, he has in effect degraded him from the subaltern station which he had else preserved unmo-
lest. Dr. Sprat owed much of his own fame to the Poet who had compared his style to the gentle and majestic current of the Thames; and returned the compliment, perhaps from other motives than those of gratitude; for the higher Cowley was exalted, the greater honour was reflected on those whom he had commended. Of this celebrated Bishop of Rochester, Lord Orrery has said, few men have gained a greater character for elegance and correctness, and few men have deserved it less. And of the Poet whom he praised, the great Dryden has with diffidence remarked, that somewhat of the purity of English, somewhat of more equal thoughts, somewhat of sweetness in the numbers; in one word, somewhat of a finer turn and more lyrical verse, is yet wanting.

"Whatever are his defects, no poet has been more liberally praised. Lord Clarendon has said, he made a flight above all men; Addison, in his account of the English Poets, that he improved upon the Theban bard; the Duke of Buckingham upon his Tombstone, that he was the English Pindar, the Horace, the Virgil, the Delight, the Glory, of his Times. And with respect to the harshness of his numbers, the eloquent Sprat tells us, that if his verses in some places seem not as soft and flowing as one would have them, it was his choice, and not his fault.

"Such is the applause lavished on a writer who is now seldom read. That he could ever be esteemed as a pindaric poet, is a curious literary phenomenon. He totally mistook his own genius, when he thought of imitating Pindar. He totally mistook the genius of Pindar, when he thought his own incoherent sentiments and numbers bore the least resemblance to the wild, yet regular sublimity of the Theban. He neglected even those forms, the strophe, antistrophe, and epode, which even imitative dulness can copy. Sublime imagery, vehement pathos, poetic fire, which constitute the essence of the Pindaric Ode, are incompatible with witty conceits, accurate antitheses, and vulgar expression. All these imply the coolness of deliberate composition, or the meanness of a little mind; both of them most repugnant to the truly Pindaric Ode, in which all is rapturous and noble. Wit of any kind would be improperly displayed in such composition; but to increase the absurdity, the wit of Cowley is often false.

"If the end of poetry is to please, harmony of verse is essential to poetry, for, without it, poetry cannot please. It is not possible, that any whose ear has been attuned to the melody of good composition, should read a single ode of Cowley without being shocked with discord. There is often nothing left but the jingle at the end to distinguish poems renowned for their sublimity, from affected prose. Such poetry may justly incur the ridiculous title of Prose run mad.

"Yet is there sometimes interwoven a purple patch, as Horace calls it; a fine expression, a truly poetical thought, an harmonious couplet; but it occurs not often enough to repay the reader for the toilsome task of wading through a tedious assemblage of disproportioned and discordant stanzas. Of such consist his Pindarics; which, though they procured him the greatest share of his reputation, deserved it least. Many of his other poems, if we consider the rude state of versification, and the bad taste of the times, have great merit; and had he made Tibullus his model, instead of Pindar, his claim to the first rank of poets had not been called in question. The tenderness of love, and the soft language of complaint, were adapted to his genius. But he chose to tread in the footsteps of Alcæus, as he says himself, who, according to the Halicarnassian, combined the μεγαλοφύης καὶ ἡδύς, or adopted the grand, as well as the sweet.

Vol. IV.

"That he had a taste for Latin poetry, and wrote in it with elegance, the well-known Epitaph on himself, upon his retirement, and an admirable imitation of Horace, are full proofs. But, surely, his rhetorical biographer makes use of the figure hyperbole, when he affirms that Cowley has excelled the Romans themselves. He was inferior to many a writer of less fame in the *Musæ Anglicanæ*. But still he had great merit; and I must confess I have read his Latin verses with more pleasure, than any of his English can afford (63)."

To Cowley's compositions in prose Mr. Knox hath paid a very honourable testimony. He says that in this department he is an elegant, a pleasing, a judicious writer; and that it is much to be lamented that he did not devote a greater part of his time to a kind of writing which appeared natural to him, and in which he excelled (64).

Dr. Joseph Warton observes, that it is no caricature of Cowley, to represent him as being possessed of a strained affectation of striving to be witty upon all occasions. "It is painful," adds this excellent critic, "to censure a writer of so amiable a mind, such integrity of manners, and such a sweetness of temper. His fancy was brilliant, strong, and sprightly; but his taste false and unclassical, even though he had much learning. In his Latin compositions, his six books on plants, where the subject might have led him to a contrary practice, he imitates Martial, rather than Virgil, and has given us more epigrams than descriptions (65)." This opinion concerning Cowley's Latin Poetry, is not consonant to that of Dr. Johnson. "If the Latin performances," says the Doctor, "of Cowley and Milton be compared, for May I hold to be superior to both, the advantage seems to lie on the side of Cowley. Milton is generally content to express the thoughts of the ancients in their language; Cowley, without much loss of purity or elegance, accommodates the diction of Rome to his own conceptions (66)." In one respect, Dr. Warton pays a tribute to the ability of Cowley in Latin composition. "I do not remember, says he, to have seen it observed, that Cowley had a most happy talent of imitating the easy manner of Horace's epistolary writings: I must, therefore, insert a specimen of this his excellence.

"Ergo iterum versus? dices. O Vane! quid ergo
"Morbum ejurasti toties, tibi qui insidet altis,
"Non evellendus, vi vel ratione, medullis?
"Numne poetarum (merito dices) ut amantum
"Derisum ridere deum perjuriam censes?
"Parcius hæc sodes, neve inclementibus urge
"Infelicem hominem dictis; nam fata trahunt me
"Magna reluctantem, et velut equum in vincula
"minacem.
"Helleborum sumpsi fateor, pulchreque videbar
"Purgatus morbi; sed luna potentior herbis
"Insanire iterum jubet, et sibi vendicat a-
"grum (67)."

Dr. Beattie has characterized Cowley in the following terms. "I know not whether any nation ever produced a more singular genius than Cowley. He abounds in tender thoughts, beautiful lines, and emphatical expressions. His wit is inexhaustible, and his learning extensive; but his taste is generally barbarous, and seems to have been formed upon such models as Donne, Martial, and the worst parts of Ovid: nor is it possible to read his longer poems with pleasure, while we retain any relish for the simplicity of ancient composition. If this author's ideas had been fewer, his conceits would have been less frequent; so that in one respect learning may be said to have hurt his genius. Yet it does not appear that Greek and Latin did him any harm; for his imitations of Anacreon are almost the only parts of him that are now remembered or read. His Davideis, and his translations of Pindar, are destitute of harmony, simplicity, and every other classical grace. Had his inclinations led him to a frequent perusal of the most elegant authors of antiquity, his poems would certainly have been the better for it (68)." Dr. Beattie, in his last remark, is undoubtedly mistaken.

Essays, p. 742.

It is evident from Mr. Cowley's writings, that no man could be more conversant with the most elegant authors of antiquity; but, notwithstanding this, he was led astray by the false taste of the age in which he flourished.

The fate of Cowley's Pindaric Odes is a curious circumstance in our literary history. We have seen, in the preceding quotations, how much they are now condemned; and Dr. Warton's censure of them may be added, who says, that they cannot be perused with common patience by a lover of antiquity (69). And yet, for nearly a century, they were received with almost boundless admiration; and they were as foolishly imitated as they were extravagantly praised. For a long time, the world was over-run with irregular compositions, under the name of Pindaric Odes. "This lax and lawless versification," says Dr. Johnson, "so much concealed the deficiencies of the barren, and flattered the laziness of the idle, that it immediately overspread our books of poetry; all the boys and girls caught the pleasing fashion, and they that could do nothing else could write like Pindar. The rights of antiquity were invaded, and disorder tried to break into the Latin. A Poem on the Sheldonian Theatre, in which all kinds of verse are shaken together, is unhappily inserted in the *Musæ Anglicanæ* (70)." Dr. Watts is an eminent instance of the seduction produced by Cowley's example; for the poetical works of that ingenious and pious Divine abound with irregular Odes. Congreve had the good sense to see and to represent how contrary such Odes are to the whole mode of composition which was made use of by Pindar; but his observations, though approved of by the learned and the judicious, did not meet with all the attention they deserved. It was reserved for Mr. Gilbert West entirely to dispel the delusion, and to set the matter in so clear a light as to produce a general reformation. Since that time, some Odes have appeared, in the true spirit, as well as in the form of Pindar; and since that time, other Odes have been published, which, while they have marched on in the regular order of Strophe, Antistrophe, and Epode, have not been eminently Pindaric.

So many of Cowley's productions being now esteemed scarcely worthy of a perusal, while others of them are distinguished by their beauty, Dr. Hurd (the present Bishop of Worcester) thought proper to make a selection of them, which he published, in 1772, under the title of "Select Works of Mr. Abraham Cowley; in two Volumes: with a Preface and Notes by the Editor." The preface is as follows:

"It would be using most writers of name very ill, to treat them with that freedom, which I have presumed to take with Mr. Cowley. But every thing he wrote, is either so good or so bad, that, in all reason, a separation should be made; lest the latter, which, unhappily, is the greater part, should, in the end, stifle and overlay the former.

"The reason of this striking difference in the compositions of the same man, whose genius and learning are unquestionable, is, That he generally followed the taste of his time, which was the worst imaginable; and rarely his own, which was naturally excellent: as may be seen in the few pieces of his poetry, here selected from the rest; and especially, in his prose works, which (except the notes on his *Pindaric Odes*, and *Davidis*) are given entire, and have no common merit.

"But the talents, by which he is distinguished, as a polite writer, are the least of his praise. There is something in him, which pleases above his wit, and in spite of it. It is that moral air, and tender sensibility of mind, which every one perceives and loves in reading Mr. Cowley. And this character of his genius, though it be expressed, indeed, in his other writings, comes out especially, and takes our attention most, in some of his *smaller poems and essays*; which, therefore, it seemed to be for the Author's credit, and the convenience of his Readers, to draw near to each other, and place together in one view. I have said — *for the convenience of his Readers*: for, though all are capable of being entertained, perhaps instructed, by the image of a good mind, when set before them, yet few will be at the pains to seek that instruction or entertainment for themselves, through

the scattered works of so unequal and voluminous a Writer.

"To do justice to the memory of Mr. Cowley, in these two respects, I mean, in his capacity both of a polite and moral Writer, is the sole end of this publication. Every man of taste and virtue will read it with pleasure. There are, indeed, many lines dispersed through his other poems, which deserve praise. But, on the whole, it is enough if this small collection go down to posterity: in that case, neither they, nor the Author, will have any great loss, though the rest be forgotten (71)."

In the account of this publication, which was given in the *Monthly Review*, Dr. Hurd's conduct was strongly objected to, and various reasons were urged against taking such liberties with eminent writers. What the Critic has advanced with regard to Cowley in particular, is so ingenious, and throws so much light on some of his now neglected beauties, that it deserves to be transcribed.

"All that can be said in favour of the liberties Dr. Hurd has taken with Mr. Cowley's works, is, that he has, in general, shewn a proper judgment in his selection, and that he does not by any means hold forth this publication as a precedent for others of the like nature. The opening of his preface declares against it.

"When Mr. Pope asks,

"Who now reads Cowley?"—

He assigns such reasons as occur to him, why he is still read, viz. his moral, and the language of his heart.

"Who now reads Cowley? if he pleases yet,
His moral pleases, not his pointed wit.
Forgot his Epic, nay Pindaric art,
Yet still, we love the language of his heart."

"Dr. Hurd likewise, following Mr. Pope in his idea, ascribes Mr. Cowley's power of pleasing to that moral air, and tender sensibility of mind, which are discoverable in his writings; and both the poet and the critic are right so far, that Mr. Cowley's writings do bear those agreeable characteristics. But the real cause why they still please is what Mr. Pope could not judge of, because he was a stranger to it. It is enthusiasm; the genuine spirit of enthusiasm that breathes through all those pages, where the poet is not professedly in chace of wit.

"In that fine poem to the memory of Mr. William Harvey there are strong traits of it. On perusing this poem we could not but wonder that his Editor, who is likewise his Annotator, should take no notice of that striking passage in the thirteenth stanza, which has such a peculiar felicity in the idea, that nothing in the poet's whole writings could be more worthy of his observation:

"So strong a wit did nature to him frame,
As all things, but his judgment, overcame;
His judgment, like the heav'nly moon, did show,
Temp'ring that mighty sea below."

There cannot be any thing, either in ancient or in modern poetry, superior to the image conveyed in the two last lines. It is equally just, simple, and sublime. The unruly ebullitions of wit are most happily represented by a tumultuous sea; and judgment is no less beautifully depicted by a serene moon that seems to temper its inquietude. But though this distinguished passage has been honoured with no stricture by the Annotator, he has let fall an observation, at the end of the poem, which might easily have been dispensed with. Cowley says of his departed friend,

"Thou dost with holy pity see
Our dull and earthly poesy,
Where grief and misery can be join'd with verse."

The Critic says, the Poet here meant 'to insinuate the preposterous levity and vanity of earthly poets, who can afford to be witty even on their own miseries.' Now, with his good leave, the Poet certainly never meant to insinuate the impropriety of a thing for

(69) Warton,
ubi supra, p. 106.

(70) Johnson,
ubi supra, p. 73.

(71) Select
Works, Preface,
p. v—viii.

for which no man was more notorious than himself. All he intended was, to lament the comparative inferiority of the earthly poetry, which was made the vehicle of sorrow, while the heavenly poetry must be employed only on themes of happiness.—Does the Critic mean, by poets being witty on their own miseries, that there is an absurdity in the idea of elegiac poetry? That, we presume, he can hardly intend; for nothing can be more obvious than that there is a species of poetry, as well as of music, adapted to the expression both of melancholy and of misery. Indeed, if the learned Editor had in view only those elegiac poets who are distinguished for

“ —Flowery grief and impotence of pain,

his censure is not unjust, otherwise it is certain that there are many circumstances and subjects where, without any impropriety,

“ — Grief and misery may be join'd with verse.

“ Dr. Hurd has thought proper to preserve Mr. Cowley's imitation of Martial's *Si Tecum mihi*, &c. which, the first six lines excepted, is so much inferior to the original. Indeed, the latter part of it is both idle and absurd. Cowley complains to his friend, in imitation of the Roman poet, that, for want of a proper allotment of their time, and employing it, among other objects, with

“ A gentle Mistress and a gentle Muse,
They saw good funs, of which they were to give
A strict account, set and march thick away.

The Poet was led into this absurdity of being called to a *strict account*, for want of employing his time with a *gentle Mistress*, most probably, by Martial's *imputantur*, which he had construed *charged to his account*, instead of *reckoned in the tale of life*. His Editor would have done well to have saved him the discredit of it.

“ But with respect to what Dr. Hurd has admitted, we have much less reason to be dissatisfied than for what he has rejected. Every thing in that collection of poems, which we have under the denomination of *the Mistress*, is thrown out of this edition. It is true, that in those poems are many exceptionable, many loose and nugatory pieces, which could not possibly do honour to Cowley, in the idea of any age; but then there are many beautiful parts which might have been selected, many marks of tenderness, ingenuity, and enthusiasm that might have been preserved, independently of the title, and the licentious idea of *the Mistress*. The severity of the Editor's virtue appears, in this matter, to have prevailed over his judgment. For he has published some poems, among the rest, *the Praise of Pindar*, &c. which ought to have given place to many extracts from *the Mistress*.

“ Wherefore should posterity, by any arbitrary decision, be contented to lose (what the Editor says would be no loss) the native enthusiasm and poetical beauties of

THE WISH.

I.

“ Well then, I now do plainly see
This busy world and I shall ne'er agree;
The very honey of all earthly joy
Does, of all meats, the soonest cloy.
And they, methinks, deserve my pity
Who for it can endure the stings
The crowd, and buz, and murmurings,
Of this great hive, the city.

II.

“ Ah! yet, ere I descend the grave,
May I a small house, and large garden have!
And a few friends, and many books, both true,
Both wise, and both delightful too.
And since love ne'er will from me flee,
A Mistress moderately fair
And good as guardian angels are,
Only belov'd and loving me!

III.

“ Oh! Fountains, when in you shall I
Myself eas'd of unpeaceful thoughts, espy?
O fields! O woods! when, when shall I be made
The happy tenant of your shade?
Here's the spring-head of pleasure's flood,
Where all the riches lie that she
Hath mark'd and stamp'd for good.

IV.

“ Pride and ambition here
Only in far-fetch'd metaphors appear;
Here nought but winds can hurtful murmurs scatter,
And nought but Echo flatter.
The gods, when they descended, hither
From heaven did always chuse their way;
And therefore we may boldly say,
That 'tis the way too thither.

V.

“ How happy here should I
And one dear she live, and embracing die?
She, who is all the world, and can exclude
In desarts solitude!
“ And should we suffer nothing by losing such a
poem as

THE DESPAIR.

I.

“ Beneath this gloomy shade,
By Nature only for my sorrows made,
I'll spend this voice in cries,
In tears I'll waste these eyes
By love so vainly fed!
“ *Ah wretched youth!* said I,
“ *Ah wretched youth!* twice did I sadly cry:
“ *Ah wretched youth!* the fields and floods reply.

II.

“ When thoughts of love I entertain,
I meet no words but *never*, and *in vain*.
Never, alas! that dreadful name
Which fewels the internal flame.
Never, my time to come must waste;
In vain, torments the present and the past.
In vain! In vain! said I,
In vain, In vain, twice did I sadly cry;
In vain, In vain, the fields and floods reply.

III.

“ No more shall fields, or floods do so;
For I to shades more dark and silent go:
All this world's noise appears to me
A dull, ill acted comedy:
No comfort to my wounded sight,
In the sun's busy and impertinent light.
Then down I laid my head,
Down on cold earth, and for awhile was dead,
And my freed soul to a strange *somewhere* fled.

IV.

“ Ah, foolish soul! said I,
When back to its cage again I saw it fly;
Fool to resume her broken chain
And row her galley here again.
Fool, to that body to return,
Where it condemn'd, and destin'd is to burn!

“ There is in the two last stanzas something so strongly picturesque and expressive of the subject, something so morally mournful, that it could not possibly escape the celebrated Richardson, who has given them a place in his *Clarissa*.

“ Should the harmony, the delicious sweetness of the following stanza in *THE CHANGE* be for ever forgot?

“ Love in her sunny eyes does basking play;
Love walks the pleasant mazes of her hair;
Love does on both her lips for ever stray,
And sows and reaps a thousand kisses there.

" Something of the same beautiful image, in Mrs. Greville's ode to Indifference, where she says that her heart

" ——— like the needle true,
Turns at the touch of joy, or woe,
But, turning, trembles too——

we find in that poem in Cowley's *Mistress*, called, *Resolved to be beloved*,

" The needle trembles so, and turns about,
Till it the northern pole find out.

" The late very ingenious Mr. Gray, too, has frequently borrowed from Cowley, and it is not in vain he has read this line in *The Mistress*,

" Words that weep, and tears that speak.

He has almost copied it in one of his odes.—Will it bear a question, whether treasures such as these, from which the best and greatest poets have so freely drawn, should be consigned to oblivion? If men of their taste could be pleased with, and copy their beauties, what should we think of that criticism which would pronounce "the total loss of them to be no loss to the world?"

" And is "*The Heart fled again*" likewise to be lost, because it is found in the *Mistress*?

I.

" False, foolish heart, didst thou not say,
That thou wouldst never leave me more?
Behold, again 'tis fled away!
Fled as far from me as before!
I strove to bring it back again,
I cried and hallooed after it in vain.

II.

" Even so the gentle Tyrian dame,
When neither grief, nor love prevail,
Saw the dear object of her flame,
Th' ingrateful Trojan hoist his sail:
Aloud she call'd to him to stay,
The wind bore him, and her lost words away.

III.

" The doleful Ariadne so,
On the wide shore forsaken stood:
False Theseus, whither dost thou go?
Afar false Theseus cut the flood.
But Bacchus came to her relief;
Bacchus himself's too weak to ease my grief.

IV.

" Ah senseless heart, to take no rest,
But travel thus eternally:
Thus to be scorched in every breast!
And froze in every eye!

" The Editor has preserved very few verses equal to the many beautiful lines in this little poem. But when he who reads Cowley's *Mistress*, finds that, in this edition, the poems *for Hope* and *against Hope*, are omitted, he will conclude all further objections to its reception unnecessary, and recollect at the same time, not without some concern, what poor Cowley himself says of that *Mistress*,

" Then shall thy name through all my verse be spread,
Thick as the flowers in meadows lie,
And when, in future times, they shall be read,
(As SURE I THINK THEY WILL NOT DIE)
If any CRITIC doubt that they be mine—

Cætera desiderantur (72)."

(72) Monthly
Review, vol.
xlviii, p. 13—18.

Another writer, in the *Gentleman's Magazine*, who has drawn a "Literary Portrait of Dr. Hurd," has likewise disapproved of the Bishop's selection from Cowley. "Sure I am, too," says this Critic, "that his Lordship's "Select Works of Cowley" have "prevented us from acknowledging the superiority

of his judgment upon that author. Though he has cleared the works from many false thoughts, ill-placed wit, and great puerilities, yet surely he has deprived us of many flights of true poetry, and of some peculiar marks which distinguish him (Cowley) from every other Poet (73)."

(73) *Gentleman's Magazine*,
vol. 46, p. 115.

On this occasion, the Bishop was not without a zealous and able advocate. A writer, in the same publication, made the following remarks upon the "Literary Portrait." "If the Painter of the Literary Portrait, in your Magazine for March, had really entertained a regard for the critic and the scholar, he would never have censured an edition so critical and so scholar-like as that of Cowley by Dr. Hurd. That edition evinces in no small degree the critical acumen of the Editor, and is in every respect such a selection as a judicious admirer of Cowley would wish to be given to the world. I hesitate not to affirm, that there is no composition of Cowley's, The Cutter of Coleman-street excepted, sufferable as a whole, which is not preserved in this edition. How, then, does the Editor's judgment stand impeached? and where are the marks of its inferiority to be found? That there are many lines in the entire Cowley, written in the true spirit of poetry, which have no place in this selection, I am so far from denying, that it was with pleasure I committed them to my Common Place Book; and nothing but the want of your approbation, Mr. Urban, shall prevent my transferring them to your miscellany. But, in every work, it is indispensably necessary to regard the Writer's end; and had it been any part of his Lordship's to detach splendid passages, the remark, that "he has deprived us of many flights of true poetry," would have been well founded: as it was not, it appears wanton and insidious, and will therefore fall to the ground. But wantonness of censure is not the only fault in this literary portrait. The author, unfortunate alike in censure and in praise, gives Hurd credit for what he never once attempted to perform. That he has detected many false thoughts, much ill-placed wit, and many puerilities, I am ready to acknowledge: but that he has cleared them of these deformities I am constrained to deny. In justice, therefore, to his Lordship, the more discriminating traits in whose literary character your correspondent seems either destitute of genius to pencil or taste to espy, you will allot a portion of your approved collection to this free-will offering from Elidurus (74)."

(74) *Ibid.* p. 267.

Mr. Knox's sentiments are in unison with these remarks. "A Critic, says he, whose genius and judgment keep pace with each other, and who illuminates every subject on which he treats, has allotted Cowley his just species of praise, and has given the world, in a judicious selection of his works, all that they possessed of real value (75)."

(75) Knox's
Essay, vol. ii. p.
366.

Though the concluding assertion of this passage is not sufficiently guarded, we cannot but express our general agreement with the two preceding writers, in their approbation of Bishop Hurd's selection. That selection is all that, for our own part, we ever wish to read again of Cowley. Nevertheless, it may not be amiss for young persons to peruse, once at least, the whole of his poems, that they may judge for themselves, and be sensible of the occasional beauties that are dispersed amidst his most defective compositions.

But of all the criticisms on Cowley, those of Dr. Johnson are entitled to the principal regard. His life of this celebrated Poet is written with particular attention, and is only exceeded in importance by the articles of Milton, Dryden, and Pope. The Doctor's account of the metaphysical Poets is uncommonly ingenious and curious; and what he has advanced upon the subject in general we shall lay before our readers. "Cowley, says he, like other poets who have written with narrow views, and instead of tracing intellectual pleasure to its natural sources in the mind of man, paid their court to temporary prejudices, has been at one time too much praised, and too much neglected at another. Wit, like all other things subject by their nature to the choice of man, has its changes and fashions, and at different times takes different forms. About the beginning of the seventeenth century appeared a race

of

of writers that may be termed the metaphysical poets; of whom, in a criticism on the works of Cowley, the last of the race, it is not improper to give some account.

"The metaphysical poets were men of learning, and to shew their learning was their whole endeavour; but, unluckily resolving to shew it in rhyme, instead of writing poetry, they only wrote verses, and very often such verses as stood the trial of the finger better than of the ear; for the modulation was so imperfect, that they were only found to be verses by counting the syllables. If the father of criticism has rightly denominated poetry *τέχνη μιμητική*, an imitative art, these writers will, without great wrong, lose their right to the name of poets; for they cannot be said to have imitated any thing; they neither copied nature nor life; neither painted the forms of matter, nor represented the operations of intellect. Those however who deny them to be poets, allow them to be wits. Dryden confesses of himself and his contemporaries, that they fall below Donne in wit, but maintains that they surpass him in poetry. If Wit be well described by Pope, as being "that which has been often thought, but was never before so well expressed," they certainly never attained, nor ever sought it; for they endeavoured to be singular in their thoughts, and were careless of their diction. But Pope's account of wit is undoubtedly erroneous: he depresses it below its natural dignity, and reduces it from strength of thought to happiness of language. If by a more noble and more adequate conception that be considered as Wit, which is at once natural and new, that which, though not obvious, is, upon its first production, acknowledged to be just; if it be that, which he that never found it, wonders how he missed; to wit of this kind the metaphysical poets have seldom risen. Their thoughts are often new, but seldom natural; they are not obvious, but neither are they just; and the reader, far from wondering that he missed them, wonders more frequently by what perverseness of industry they were ever found. But Wit, abstracted from its effects upon the hearer, may be more rigorously and philosophically considered as a kind of *discordia concors*; a combination of dissimilar images, or discovery of occult resemblances in things apparently unlike. Of wit, thus defined, they have more than enough. The most heterogeneous ideas are yoked by violence together; nature and art are ransacked for illustrations, comparisons, and allusions; their learning instructs, and their subtilty surprises; but the reader commonly thinks his improvement dearly bought, and though he sometimes admires is seldom pleased. From this account of their compositions it will be readily inferred, that they were not successful in representing or moving the affections. As they were wholly employed on something unexpected and surprising, they had no regard to that uniformity of sentiment which enables us to conceive and to excite the pains and the pleasure of other minds: they never enquired what, on any occasion, they should have said or done; but wrote rather as beholders than partakers of human nature; as Beings looking upon good and evil, impassive and at leisure; as Epicurean deities making remarks on the actions of men, and the vicissitudes of life, without interest and without emotion. Their courtship was void of fondness, and their lamentation of sorrow. Their wish was only to say what they hoped had been never said before. Nor was the sublime more within their reach than the pathetic; for they never attempted that comprehension and expanse of thought which at once fills the whole mind, and of which the first effect is sudden astonishment, and the second rational admiration. Sublimity is produced by aggregation, and littleness by dispersion. Great thoughts are always general, and consist in positions not limited by exceptions, and in descriptions not descending to minuteness. It is with great propriety that Subtlety, which in its original import means exility of particles, is taken in its metaphorical meaning for nicety of distinction. Those writers who lay on the watch for novelty could have little hope of greatness; for great things cannot have escaped former observation. Their attempts were always analytick; they broke every image into fragments; and could no more represent, by their slender

Vol. IV.

conceits and laboured particularities, the prospects of nature, or the scenes of life, than he, who dissects a sun-beam with a prism, can exhibit the wide effulgence of a summer noon. What they wanted however of the sublime, they endeavoured to supply by hyperbole; their amplification had no limits; they left not only reason but fancy behind them; and produced combinations of confused magnificence, that not only could not be credited, but could not be imagined. Yet great labour, directed by great abilities, is never wholly lost: if they frequently threw away their wit upon false conceits, they likewise sometimes struck out unexpected truth: if their conceits were far-fetched, they were often worth the carriage. To write on their plan, it was at least necessary to read and think. No man could be born a metaphysical poet, nor assume the dignity of a writer, by descriptions copied from descriptions, by imitations borrowed from imitations, by traditional imagery, and hereditary similes, by readiness of rhyme, and volubility of syllables. In perusing the works of this race of authors, the mind is exercised either by recollection or inquiry; either something already learned is to be retrieved, or something new is to be examined. If their greatness seldom elevates, their acuteness often surprises; if the imagination is not always gratified, at least the powers of reflection and comparison are employed; and in the mass of materials which ingenious absurdity has thrown together, genuine wit and useful knowledge may be sometimes found, buried perhaps in grossness of expression, but useful to those who know their value; and such as, when they are expanded to perspicuity, and polished to elegance, may give lustre to works which have more propriety, though less copiousness of sentiment. This kind of writing, which was, I believe, borrowed from Marino and his followers, had been recommended by the example of Donne, a man of very extensive and various knowledge, and by Jonson, whose manner resembled that of Donne more in the ruggedness of his lines than in the cast of his sentiments. When their reputation was high, they had undoubtedly more imitators, than time has left behind. Their immediate successors, of whom any remembrance can be said to remain, were Suckling, Waller, Denham, Cowley, Cleveland, and Milton. Denham and Waller sought another way to fame, by improving the harmony of our numbers. Milton tried the metaphysical stile only in his lines upon Hobson the Carrier. Cowley adopted it, and excelled his predecessors, having as much sentiment, and more musick. Suckling neither improved versification, nor abounded in conceits. The fashionable stile remained chiefly with Cowley; Suckling could not reach it, and Milton disdained it (76)."

These critical remarks Dr. Johnson has admirably illustrated by a variety of examples (77); after which he proceeds to examine particularly the works of Cowley, who was almost the last of the metaphysical race of poets, and undoubtedly the best. As it would extend this article too far to follow our great Biographer minutely through his several observations, we must content ourselves with adverting to a few passages, which occur in the course of his criticism.

Of Cowley's Miscellanies Dr. Johnson says, that such an assemblage of diversified excellence no other Poet has hitherto afforded. Speaking of the "Chronicle," the Doctor asserts that it is a composition unrivalled and alone. "Such gaiety of fancy, such facility of expression, such varied similitude, such a succession of images, and such a dance of words, it is in vain to expect except from Cowley. His strength always appears in his agility; his volatility is not the flutter of a light, but the bound of an elastic mind. His levity never leaves his learning behind it; the Moralist, the Politician, and the Critic mingle their influence even in this airy frolic of genius. To such a performance Suckling could have brought the gaiety but not the knowledge; Dryden could have supplied the knowledge, but not the gaiety."

"The Verses to Davenant," says Dr. Johnson, "which are vigorously begun, and happily concluded, contain some hints of criticism very justly conceived and happily expressed. Cowley's critical

5 E

"abilities

(76) Lives of the Poets, vol. i. p. 25—32.
(77) Ibid. p. 32—53.

"abilities, have not been sufficiently observed: the few decisions and remarks which his prefaces and his notes on the Davideis supply, were at that time accessions to English literature, and shew such skill as raises our wish for more examples."

Of the "Anacreontiques" Dr. Johnson observes, that "these little pieces will be found more finished in their kind than any other of Cowley's works. The diction shews nothing of the mould of time, and the sentiments are at no great distance from our present habitudes of thought. Real mirth must be always natural, and nature is uniform. Men have been wise in very different modes; but they always laughed the same way.—The Anacreontiques, therefore, of Cowley give now all the pleasure which they ever gave. If he was formed by nature for one kind of writing more than for another, his power seems to have been greatest in the familiar and the festive."

Concerning Cowley's "Mistress," the Doctor remarks, that she has "no power of seduction; she plays round the head, but comes not at the heart. Her beauty and absence, her kindness and cruelty, her disdain and inconstancy, produce no correspondence of emotion. His poetical account of the virtues of plants, and colours of flowers, is not perused with more sluggish frigidity. The compositions are such as might have been written for penance by a hermit; or for hire by a philosophical rhymist who had only heard of the other sex; for they turn the mind only on the writer, whom, without thinking on a woman but as the subject for his task, we sometimes esteem as learned, and sometimes despise as trifling, always admire as ingenious, and always condemn as unnatural."

After a particular examination of the Pindarique Odes, Doctor Johnson comes to the following conclusion. "The Pindarique Odes have so long enjoyed the highest degree of poetical reputation, that I am not willing to dismiss them with unabated censure; and surely, though the mode of composition be erroneous, yet many parts deserve at least that admiration which is due to great comprehension of knowledge, and great fertility of fancy. The thoughts are often new, and often striking; but the greatness of one part is disgraced by the littleness of another; and total negligence of language gives the noblest conceptions the appearance of a fabric august in the plan, but mean in the materials. Yet surely those verses are not without a just claim to praise, of which it may be said with truth, that no man but Cowley could have written them."

The silence and neglect with which the Davideis has been treated, our biographical Critic shews to have arisen partly from the choice of the subject, and partly from the performance of the work. After making several very judicious observations upon it in both these respects, not greatly to its honour, he says: "In the perusal of the Davideis, as of all Cowley's works, we find wit and learning unprofitably squandered. Attention has no relief; the affections are never moved; we are sometimes surprised, but never delighted; and find much to admire, but little to approve. Still, however, it is the work of Cowley; of a mind capacious by nature, and replenished by study."

In taking a general review of Cowley's Poetry, Dr. Johnson displays his usual sagacity. "It will be found, says the Doctor, that he wrote with abundant fertility, but negligent or unskilful selection; with much thought, but with little imagery; that he is never pathetic, and rarely sublime, but always either ingenious or learned, either acute or profound."

Cowley's prose is distinguished by a high encomium. "After so much criticism on his Poems, the Essays which accompany them must not be forgotten. What is said by Sprat of his conversation, that no man could draw from it any suspicion of his excellence in poetry, may be applied to these compositions. No author ever kept his verse and his prose at a greater distance from each other. His thoughts are natural, and his style has a smooth and placid equability, which has never yet obtained its due commendation. Nothing is far-sought, or hard-laboured; but all is easy without feebleness, and familiar without grossness."

We shall finish this long addition to the article of our learned predecessor, with Dr. Johnson's concluding paragraph in respect to Cowley. "It may be affirmed, without any encomiastic fervour, that he brought to his poetic labours a mind replete with learning, and that his passages are embellished with all the ornaments which books could supply; that he was the first who imparted to English numbers the enthusiasm of the greater ode, and the gaiety of the less; that he was qualified for sprightly sallies, and for lofty flights; that he was among those who freed translation from servility, and, instead of following his author at a distance, walked by his side; and that if he left versification yet improvable, he left likewise from time to time such specimens of excellence as enabled succeeding poets to improve it (78)."

* * [COWPER (WILLIAM), Earl Cowper, Lord High Chancellor of Great-Britain, was descended from an antient family [A], and son to Sir William Cowper, Baronet [B], who was Member of Parliament for the town of Hertford, in the reigns of Charles

[A] *Descended from an antient family.* "He was descended from John Cowper of Strode, in the county of Suffex, who lived in the time of Edward IV. William, one of his ancestors, was first a Baronet of Nova Scotia, and afterwards created a Baronet of England by King Charles I. He was the first of the family that was possessed of Hertford-Castle, where he ended his days in peace, after he had been imprisoned in Ely-House in Holborn, for his loyalty to King Charles I (1)." This Gentleman was great grandfather to Earl Cowper.

[B] *Son to Sir William Cowper, Bart.* This Gentleman "was chosen one of the Members for Hertford, in the two last Parliaments called by Charles II. and was one, who, with the Earls of Shaftesbury and Huntingdon, with other Lords, presented reasons to the Grand Jury of Middlesex, June 16, 1680, for the indictment of James, Duke of York, for not coming to Church. He also served in Parliament for the town of Hertford, in the first year of King William and Queen Mary, and in two other Parliaments in the reign of King William (2)." He married Sarah, daughter to Sir Samuel Holled, of London, by whom he had two

sons, William, the subject of this article, and Spencer Cowper, Esq; who, "on the accession of George I. to the Throne, was appointed Attorney-General to the Prince of Wales, and on July 12, 1717, constituted Chief Justice of Chester. In 1727, he was made Attorney-General of the Duchy of Lancaster; and on October 14 following, called to the degree of Serjeant at Law, and afterwards made one of the Judges of the Court of Common Pleas. He first married Pennington, daughter of John Goodere, Esq; secondly Theodora, widow of John Stepney, Esq; and departed this life at his Chambers in Lincoln's Inn, on December 10, 1728, leaving issue, by his first wife, three sons, 1. William Cowper, Esq; Clerk of the House of Lords, who died at his house in the Old Palace Yard, Westminster, in Feb. 1739-40;—2. The Rev. Mr. John Cowper, Rector of Great Berkhamstead in Hertfordshire, and one of the Chaplains in Ordinary to his Majesty; and 3. Ashley Cowper, Esq; Counsellor at Law, and Clerk of the House of Lords (3)."

Spencer Cowper, Esq; brother to the Chancellor, who has been just mentioned in this note, was permitted, by the particular favour of the King, to hold

(3) *Ibid.*

(2) Collins's Peerage of England, vol. iv. p. 352. edit. 1779.

Charles II. and William III. He is supposed to have been born in the Castle of Hertford, of which his family had been a considerable time in possession; but of the place, or time of his birth, or where he was educated, we have not been able to obtain any certain information [C]. It appears, however, that being brought up to the study of the law, he made so great a proficiency in it, that, soon after he was called to the Bar, he was chosen Recorder of Colchester (a). His eloquence, and skill in his profession, rendered him very conspicuous in it; and in the reign of King William, he was appointed one of his Majesty's Council learned in the law (b). In 1695, he was chosen one of the representatives in Parliament for the town of Hertford [D]; his father, at the same time, being elected the other Member for that borough (c). The following year, he appeared as Council for the Crown on the trials of Sir William Perkins (d), Brigadier Rookwood (e), Major Lowick (f) and Charles Cranburne (g), who were convicted of high treason, for being concerned in the plot to assassinate King William. The same year, he was also Council for the Crown on the trial of Captain Thomas Vaughan, for high treason on the high seas (h); and he likewise supported, in Parliament, the Bill of Attainder against Sir John Fenwick (i) [E]. In 1704, he made a Speech in the House of Commons, in the famous case of Ashby and White, in which he maintained, that an action did lie at common law, for an elector, who had been denied his vote for Members of Parliament (k). His practice and reputation continued greatly to increase; on the accession of Queen Anne he was again appointed one of the Counsel to the Crown; and on the 11th of October, 1705, he was constituted Lord Keeper of the Great Seal of England [F] (l). Bishop Burnet, speaking of this promotion, expresses himself in the following terms: 'The seals being sent for, they were given to Cowper, a Gentleman of a good family, of excellent parts, and of an engaging deportment, very eminent in his profession; and who had for many years been considered, as the man who spoke the best of any in the House of Commons. He was a very acceptable man to the Whig party. They had been much disgusted with the Lord-Treasurer, for the coldness he expressed, as if he would have maintained a neutrality between the two parties; though the one supported him, while the other designed to ruin him. But this step went a great way towards the reconciling the Whigs to him (m).' A few days after Mr. Cowper's promotion, Queen Anne addressed both Houses of Parliament in a Speech, which was well received, and which was said to be written by the new Lord-keeper (n) [G].

hold to the end of his life the office of one of the Judges of the Court of Common Pleas, together with the office of Chief Justice of Chester. Before his promotion to either of these offices, he had been tried for murder at Hertford Assizes, but was acquitted. Vid. State Trials, Vol. v. p. 232. Mr. William Cowper, afterwards the Chancellor, attended this trial as a witness in behalf of his brother, as did also his Lady.

[C] *We have not been able to obtain any certain information.* We travelled to Hertford, merely with a view of procuring some information about Lord Chancellor Cowper, his birth, &c. and were surprised to find, that not the least memorial had been preserved of him, by a family which owes to him so much of its splendour, in Hertingfordbury Church, near Hertford, in which he was interred. In that Church is a splendid mausoleum for the family, in which is a very fine monument to the memory of the second Earl Cowper, the Chancellor's son, and a smaller one in memory of Judge Cowper, the Chancellor's brother; but not the least inscription in memory of the Chancellor himself, who was by much the most distinguished person of the family.

We examined also the parish Registers of the two Churches at Hertford, but could find no entry of the Chancellor's birth. In the Church-yard of Hertingfordbury is a monument to the memory of his mother, Sarah, Lady Cowper, who died in 1719, aged seventy-six. The monument was erected by her two sons, the Chancellor and the Judge.

[D] *Chosen one of the Representatives in Parliament for the town of Hertford.* It has been observed, that on the very first day he sat in the House of Commons, he had occasion to speak three times, and came off with universal applause (4).

[E] *The Bill of Attainder against Sir John Fenwick.* There seems little reason to doubt, but that Sir John Fenwick was really guilty of the treasonable practices with which he was charged; but as there was not legal evidence sufficient for his conviction, the proceedings against him, in a legal and constitutional point of view, appear to have been extremely indefensible. Mr. Cowper, however, was led, like many others, by his zeal for the Revolution, to support the establish-

ment which then took place, in a manner not perfectly consistent with the principles which gave rise to that great event.

[F] *Constituted Lord Keeper of the Great Seal of England.* He succeeded Sir Nathan Wright, of whose removal the Duchess of Marlborough expresses herself in the following terms: 'I prevailed with her Majesty to take the Great Seal from Sir Nathan Wright, a man despised by all parties, of no use to the Crown, and whose weak and wretched conduct in the Court of Chancery, had almost brought his very office into contempt. His removal, however, was a great loss to the Church, for which he had ever been a warm stickler. And this loss was the more sensibly felt, as his successor, my Lord Cowper, was not only of the Whig party, but of such abilities and integrity, as brought a new credit to it in the nation (5).'

Dr. Smollett, speaking of Cowper's promotion, says, he was 'a Lawyer of good extraction, superior talents, engaging manners, and eminence in his profession. He was staunch to Whig principles, and for many years had been considered as one of their best Speakers in the House of Commons (6).'

Mr. Cunningham, in his "History of Great Britain," says, 'Mr. Cowper, a man highly renowned for his masterly eloquence and skill in the law, and who was naturally inclined to readiness, justice, and moderation, was first made Lord-keeper of the Great Seal, and afterwards Lord Cowper, and Lord High Chancellor of the kingdom (7).'

[G] *Said to be written by the new Lord-Keeper.* Mr. Macpherson says, 'The Queen addressed to the two Houses a Speech, penned by Cowper, the new Lord-Keeper, which, though suitable to the times, shewed that the measures of the Court were no longer guided by Tory principles. She urged, with earnestness, the necessity of prosecuting the war, to restore the balance of power, which, she said, the possession of Spain by the House of Bourbon had

The following year, Commissioners having been appointed for England and Scotland, to treat concerning an Union of the two kingdoms [H], they met, for the first time, at the Cockpit, Whitehall, on the 16th of April; when the Lord-Keeper Cowper, who had been appointed one of the Commissioners for England, made a Speech to the Lords Commissioners for Scotland, in which he observed to their Lordships, that the Parliament of England were actuated by the strongest desire to attain that Union, which had been so long thought necessary, by all that wished well to the prosperity of both nations; and that the English Commissioners now met those for Scotland, with hearts fully resolved to use their utmost endeavours to remove all difficulties in the treaty, and to prevent all misunderstandings; to have the general and joint good of both kingdoms solely in their view, and not the separate interest of either; and determined to act as if they were already united in interest, and had nothing left to consider, but what settlements and provisions were most likely to conduce to the common safety and happiness of the whole island of Great Britain (o). He attended a variety of other meetings in the management of this important business; and on the 23d of July waited upon the Queen, at St. James's, with the articles agreed upon between the Commissioners of both kingdoms, as the terms or conditions upon which the intended Union was to take place. He was accompanied by the other Commissioners; and, in their names, made a Speech to her Majesty on the occasion (p). Another Speech was afterwards made, by the Lord Chancellor of Scotland, in behalf of the Commissioners for that kingdom, who attended at the same time: and the Articles of Union, agreed upon by the Commissioners, with some few alterations, were afterwards ratified by the Parliaments both of England and Scotland.

(o) Defoe's Hist. of the Union, p. 115. edit. 1786.

(p) Ibid. p. 194, 195.

Before that event had taken place, an extraordinary manœuvre of the Tories in Parliament, had thrown the Whigs, at least such of them as were in power, into some degree of embarrassment. A motion was made by the Tory party in the House of Peers, that an address should be presented to the Queen, requesting her Majesty to invite the Princess Sophia, as presumptive Heir to the Crown, to come and reside in England. The Tories knew, that if the ministry supported this measure, they would give great offence to the Queen; and if they opposed it, they would probably be suspected of being enemies to the Protestant succession. The motion was, however, opposed by the Whigs; and rejected by a great majority. But two Bills were afterwards brought in, and passed, which were deemed a great security to the Protestant succession. By the first, a Regency was appointed [I] on the event of the Queen's death; and the second was a Bill for the naturalization of the Princess Sophia, and the issue of her body, being Protestants (q). When these Bills had received the Royal Assent, the Earl of Halifax was sent with them to the Court of Hanover; and he also carried with him letters from the leaders of the Whig party, and in particular one from the Lord-Keeper to the Elector [K], expressive of the sincerity of his attachment to the Protestant succession (r).

' had destroyed. She demanded the necessary supplies, for supporting the operations of the allies, as well as for exerting the force of her own kingdoms. She informed them of the act passed in Scotland, for treating concerning a Union; and she concluded, with taking an obvious part with the Whigs, by declaring that the Church was in no danger; a circumstance urged with vehemence by the Tories, to arm the prejudices of the populace to favour their own designs. This Speech was so suitable to the sentiments of the prevailing party, and the subject in general so popular, that an address of thanks was voted by the commons, without either debate, or one dissenting voice (7).'

[H] Commissioners—to treat concerning an Union of the two kingdoms.] It has been asserted of the Lord-Keeper Cowper, that 'his prudence and dexterity shone in the management of the famous Treaty of Union between England and Scotland; the whole weight of which arduous affair he sustained almost alone, on the part of the English Commissioners (8).'

[I] By the first, a Regency was appointed, &c.] Mr. Macpherson remarks, that 'this Bill, by forming an eventual Regency, of the First Officers of State, upon the death of the Queen, effectually secured the kingdom, by providing a continuation of legal government, till the successor should arrive, and assert his own authority (9).'

[K] One from the Lord-Keeper to the Elector.] The letter was as follows:

London, April 11, 1706.

' May it please your Electoral Highness,

' When I was first, by her Majesty's great goodness, raised to the station I am now in, I could not

' persuade myself, that a subject of so little importance, would have then excused my presumption in troubling your Electoral Highness in this manner upon that occasion, though with the sincerest assurances, that my heart should ever continue most firmly devoted to the service of your E. H. and your E. H. serene house. But now, since I hope it is allowable for me, to express to your E. H. the very great satisfaction I have, with every good Englishman, received from the effectual securities lately provided by the Parliament, for the Protestant succession to the Crown of England; I beg leave humbly to present to your E. H. at the same time, his most faithful promise of a most ardent zeal for your E. H.'s. prosperity, and promise never to neglect any thing in my little power, that may possibly conduce to it; being fully persuaded, it is impossible to be in the true interest of England, and not to be a fast friend to that succession, which the sense of the kingdom hath so often declared to be its only defence from the most deplorable condition a people can be reduced to. I was one of those, who have had the honour, for a long time past, constantly to have adhered to that opinion, for excluding a Romish successor, even while it was unfashionable, and decried by those that were in authority; and, therefore, that the same persons should now continue firm to the same, when it is owned by the legislative authority, and the general bent of the people, can admit, I think, of no question. This I chose to mention, as an evidence of my sincerity in what I profess, rather than multiply expressions, which are in every one's power to make; not that I am at all apprehensive of those endeavours, which have been used to render your E. H. and your E. H. serene

In consideration of the Lord-Keeper's merit and services, he was advanced, on the 9th of November, 1706, to the dignity of a Peer of this kingdom, by the style and title of Lord Cowper, Baron Cowper of Wingham in Kent (s); and on the 4th of May, 1707, her Majesty in Council declared him Lord High Chancellor of Great Britain (t). When the second Parliament of Great Britain assembled, on the 16th of November, 1708, which was soon after the death of Prince George of Denmark, the Archbishop of Canterbury, the Lord-Chancellor Cowper, the Lord-Treasurer, the Lord-Steward, and the Master of the Horse, were appointed to represent her Majesty in Parliament; and on this occasion both Houses were addressed in a Speech by Lord Cowper (u). On the first of March, 1708-9, by order of the House of Peers, he returned thanks to the Duke of Marlborough, who had then returned from abroad, and taken his place in the House, for the important services performed by him during the preceding campaign (w); and the following year his Lordship presided at the trial of Dr. Sacheverell. The same year, in consequence of the intrigues of Harley and Mrs. Masham, the Earl of Sunderland, son-in-law to the Duke of Marlborough, was removed from the office of Secretary of State; and it being apprehended, that this event would give so much disgust to that great general, that he might be induced to quit the command of the army, a joint letter was sent to his Grace by Lord Cowper, the Dukes of Newcastle and Devonshire, Lords Somers, Oxford, and Halifax, and Mr. Henry Boyle, then Secretary of State, in which they conjured him, in the strongest terms, not to quit his command [L]. But soon after, on the 8th of August, 1710 (x), the Earl of Godolphin

(s) Collins, *ubi supra*, p. 353.
(t) *Ibid.*

(u) Tindal's Continuation, vol. iv. p. 105, 106.

(w) *Ibid.* p. 117.

(x) Salmon's Chronological Historian, p. 304.

serene house disgusted, with those who have the truest concern for your service; since it is impossible, that so excellent a judgment as that of your E. H. should ever prefer the surprizing starts of a sudden unaccountable zeal, contrary to known principles, affected merely for popularity, and shewing itself in one particular only, (while all other means tending to the same are neglected) to a steady, uninterrupted, and uniform course of acting for the Protestant succession, and flowing from principles, that were owned, when most discountenanced. But these endeavours in me to give your E. H. any satisfaction of this kind, are perfectly unnecessary, since my Lord Halifax, who is so able and thoroughly versed in all the affairs of this kingdom, and so acquainted with the inclinations and practices of all men in business here, is to be for some time in your E. H.'s Court, where none can so well disperse all unfair representations of facts; and when that is done, your E. H. cannot but make the wisest conclusion, and such as next, under the blessing of God, may best tend to make yet more effectual, those prudent provisions which the wisdom of this kingdom hath, on mature deliberation, thought fittest to be made for the interest and honour of your E. H.'s serene house and the public happiness.

I am, &c.

WILLIAM COWPER (10).

(10) Macpherson's Original Papers, vol. ii. p. 32, 33.

To this letter his Electoral Highness wrote an answer, of which the following is a translation:

My Lord, June 20, 1706.
I am very much obliged to you for the letter which you were at the trouble of writing to me; and for the assurances which it contains of your affection for me, and of your zeal for the interests of my family. I approve, more than any one, of the choice which the Queen made of a man of your merit, for an employment so considerable as that which she trusted to you. I am already sufficiently acquainted with your principles, and with the constancy with which you followed them in the most difficult times, to be persuaded that her Majesty could not place that employment in better hands. You are in the right to believe, that it will be always easy for me to distinguish those who are truly zealous for the Protestant succession. I know the rank which you hold among them, and the confidence which they place in you; and I shall be always very happy to find opportunities of shewing you how much I am,

My Lord, &c (11).

(11) *Ibid.* p. 54.

[L] They conjured him, in the strongest terms, not to quit his command.] In this letter was the following passage: 'We are fully convinced, that it is impossible

VOL. IV.

sible for your Grace to quit the service at this time, without the utmost hazard to the whole alliance. And we must therefore conjure you, by the glory you have already obtained, by the many services you have done your Queen and country, by the expectation you have justly raised in all Europe, and by all that is dear and tender to you at home, whose chief dependance is upon your success, that you would not leave this great work unfinished, but continue at the head of the army. This we look upon as the most necessary step that can be taken to prevent the dissolution of this Parliament. Your Grace's compliance with this our earnest request would be the greatest obligation to us, and all that wish well to our country (12).'

It has been asserted, that a scheme was formed to make the Duke of Marlborough General for life, and that it was prevented only by the refusal of Lord Cowper to put the Great Seal to the commission. Dr. Johnson, speaking of Dean Swift's "Conduct of the Allies," which was published in 1712, says, 'That is now no longer doubted, of which the nation was then first informed, that the war was unnecessarily protracted to fill the pockets of Marlborough; and that it would have continued without end, if he could have continued his annual plunder. But Swift, I suppose, did not yet know what he has since written, that a commission was drawn which would have appointed him general for life, had it not become ineffectual by the resolution of Lord Cowper, who refused the seal (13).' The account given by Swift, to which Johnson alludes, is as follows: 'Upon the admission of these men (the Whig ministry) into employments, the Court soon ran into extremity of Low Church measures; and although, in the House of Commons, Mr. Harley, Sir Simon Harcourt, Mr. St. John, and some others, made great and bold stands in defence of the constitution, yet they were always borne down by a majority. It was, I think, during this period of time, that the Duke of Marlborough, whether by a motive of ambition, or a love of money, or the rash counsels of his wife the Duchess, made that bold attempt of desiring the Queen to give him a Commission to be General for life. Her Majesty's answer was, "That she would take time to consider of it;" and, in the mean while, the Duke advised with the Lord Cowper, then Chancellor, about the form in which the Commission should be drawn. The Chancellor, very much to his honour, endeavoured to dissuade the Duke from engaging in so dangerous an affair; and protested, "he would never put the Great Seal to such a Commission (14)." It appears from this quotation, that Dr. Johnson's statement from Swift is not quite accurate; and that no such Commission was drawn, it being merely, supposing Swift's account to be true, a project

Godolphin was removed from the post of Lord-Treasurer, and the other Whig Ministers resigned [M]. The Queen signified her inclination, notwithstanding the change of ministry, that Lord Cowper should still continue in the post of Chancellor: but he also resigned, as he did not choose to remain in office, when an administration was formed, consisting of men whose political sentiments and views were totally different from his own [N]. Soon after the new Ministry came into office, Mr. Harley being at the head of the Treasury, some inquiries were set on foot in order to criminate the late Administration; and a vote of censure was passed relative to the management of the war in Spain. Lord Cowper took an active part in the debates occasioned by these inquiries [O]; and he joined

ject of the Duke himself; and it is perfectly conformable to Lord Cowper's character, that he should firmly refuse to put the Great Seal to so illegal and unconstitutional a Commission.

[M] *The other Whig Ministers resigned.* Dr. Smollet says, 'There was not one Whig left in any office of State, except the Duke of Marlborough, who would have renounced his command, had not he been earnestly dissuaded by his particular friends from taking such a step as might have been prejudicial to the interest of the nation (15).'

(15) History of England, from the Revolution, vol. ii. p. 178.

[N] *He did not choose to remain in office, &c.* It is said by one writer, that in the high station of Lord-Chancellor of Great Britain, Lord Cowper's 'integrity, moderation, candour, humility, and disinterestedness, gained him the esteem of all good men, and the particular regard and favour of his Royal Mistress, who found in him the greatest comfort she had among all her servants, upon the loss of her dear comfort. The Queen had so high an opinion of his virtue and merit, that when, by a train of Court-intrigues, and an insuperable aversion to the Earl of Sunderland, she had fixed a resolution to change her Ministers, and call a new Parliament, she used all endeavours to bring the Lord Cowper into her measures. But his Lordship rightly foreseeing, that the new scheme not only tended to the making a peace derogatory from the engagements of the grand alliance, but likewise to the weakening of the settlement of the Protestant succession, which he ever had firmly at heart, resisted all temptations, and voluntarily resigned the Seals; and, in the most difficult and dangerous junctures, acted with the utmost vigour, in concert with the staunchest sticklers for the most serene House of Hanover (16).'

(16) Chron. Diary, in the Historical Register for the Year 1723. p. 43, 44.

(17) History of Great Britain, vol. ii. p. 464.

(18) Vid. Hist. vol. ii. p. 531. 596; and Original Papers, vol. ii. p. 380. 482. 489.

(19) Original Papers, vol. ii. p. 25.

Mr. Macpherson says, that "the Queen signified her inclination, that the Lord Cowper should continue Chancellor. He derived, perhaps, this favour from his insignificance (17)." The idea of Lord Cowper's insignificance seems never to have entered the head of any man, but that of Mr. Macpherson. Few circumstances are better ascertained in the history of this period, than that Lord Cowper was in high estimation with his own party. Mr. Macpherson's representation is undoubtedly contrary to the real state of things; and, indeed, inconsistent with the facts stated in his own history (18). But this writer seems to have conceived a great prejudice against this Nobleman, of whom he says in another place, that he was "a man of heavy and confused parts (19)." He appears to have no other ground for this assertion, but Cowper's letter to the Elector of Hanover, which has been given in note [K]. That letter is not entitled to much commendation; but a formal letter of that kind is too slight a foundation for making such a statement of the abilities of the writer. His Lordship's letters to Mr. Hughes, as published by Mr. Duncombe, exhibit him in a very amiable light, and are written with perspicuity and good sense. It may be admitted, that Lord Cowper's abilities were not of the first rate; but they have certainly been very improperly and unjustly degraded by Mr. Macpherson. This nobleman was personally known to Bishop Burnet and Sir Richard Steele; and Burnet says of him, that he was considered, for many years, as the best Speaker in the House of Commons; and Steele, speaking of Lord Cowper, in the 130th number of the *Tatler*, says, 'Who is not pleased to see a person in the highest station in the law, who was the most eminent in his profession, and the most accomplished Orator at the Bar?' Is it credible, that a Nobleman, who is spoken of in such terms, by

Burnet and by Steele, could be "a man of heavy and confused parts?"

[O] *Took an active part in the debates occasioned by these inquiries.* Lord Galway and Lord Tyrawley were both examined before the House of Peers, concerning the management of the war in Spain. Lord Galway readily answered the questions that were put to him, and gave in an account of his conduct in Spain to the House in writing; but Lord Tyrawley declined answering, desiring previously to be informed whether there was any accusation against him. His Lordship insisted, that no man was obliged to accuse himself; and that if he were accused, he ought to make his defence according to the forms of Courts of Judicature. Lord Cowper maintained, that 'the House ought to declare, clearly and plainly, whether there was, or was not, any accusation against the Lords Galway and Tyrawley. That the reputation of men of honour was their liberty and property; and that if the inquiry that was instituted tended to censure the reputation of the Lords Galway and Tyrawley, by what name soever it might be called, it was an accusation. They, therefore, had a right to require it in writing, and ought to be allowed time to make good their answers.' He added, 'That he did not speak this so much in favour of those two Gentlemen, as for the honour of that illustrious Assembly (20).' His Lordship also asserted, in a subsequent debate, that, in that House, 'in things essential to justice, the ordinary form of Courts of Judicature ought to be observed (21).'

A resolution being afterwards moved by the Earl of Scarfdale, importing, that the design of an offensive war in Spain had been approved and directed by the Cabinet Council, which had contributed to the misfortunes in Spain; and the words *Cabinet-council* in the motion being afterwards altered to *ministers*, and this alteration giving rise to some debate, Lord Cowper said, 'That the word *ministers* was of an uncertain signification, and *Cabinet-council* a phrase unknown in our law. That if that august Assembly proceeded to a censure upon men, the world ought to know who they were. That he hoped the Lord who proposed this question would explain himself; and hoped, at the same time, that if any body were accused, it would appear to be without ground. That he had the honour to be one of the Ministry, and did not know whether it was designed to involve him in the same censure; but he protested, with the utmost sincerity, that, while he was in that post, he gave his advice, and acted to the best of his understanding, and with an honest intention to serve the Queen and his country (22).'

A vote of censure having been proposed against the late Ministry, on account of their having supported an offensive war in Spain, Lord Cowper said, that it was at that time the popular opinion; 'every body in England being then for an offensive war. That he wished every Member of that august Assembly would lay his hand upon his heart, and say, in conscience, whether he would not have been of the same opinion? That to have advised a lingering, expensive, defensive war, would, no doubt, have now been more criminal than this charge. That the raising the siege of Toulon could not, in reason, be imputed to the offensive war in Spain, and to the loss of the battle of Almanza; but rather to the expedition to Naples, the slow march of the German recruits through the country of the Grisons, and other unforeseen accidents, which attend all human affairs. But if this question should pass into a resolution, it will be the comfort of those on whom

in several protests against the determinations of the House of Peers concerning the conduct of that war (y). When Prince Eugene was in England, he is said to have been consulted about some dangerous schemes formed by that Prince and the Duke of Marlborough [P]. It may reasonably be questioned, whether any such schemes were ever really formed

(23) *Ibid.* p. 383.

whom the censure will fall, that the world will judge, that it is founded on strained deductions, and forced consequences, foreign from the premises. My Lords, all Englishmen love action: it is their temper and inclination (23).²

(24) History of
England, *ubi*
supra, p. 182.

The vote against the late Ministry, however, passed, by the influence of the new Ministry, united with the Tory party; but even Dr. Smollet acknowledges, that these resolutions "were not the proceedings of candour and national justice, but the ebullitions of party zeal and rancorous animosity (24)."

[P] *Some dangerous schemes formed by that Prince and the Duke of Marlborough.* Of the nature of these schemes it may be here proper to give some account. Mr. Macpherson says, that the Prince of Savoy had formed no doubt of being able to defeat the Treaty of Peace, by embarrassing the British Ministry with splendid offers of advantage for continuing the war. He had resolved to propose, in the name of the Emperor, to leave Great Britain in absolute possession of the Commerce of Spain and America; to induce the King of Denmark and the Czar of Muscovy to join in the grand confederacy; to make up the Imperial forces in Spain to thirty thousand men; to pay one million of crowns, out of four, to be expended in the military operations on that side. Should either House of Parliament accept these terms, in opposition to the Ministry, the Elector of Hanover was to have passed into Great Britain with an army. A revolution to be made in favour of that Prince would enable him to carry on the war to the last extremity against the House of Bourbon. But when Prince Eugene perceived, that the Commons were firm in the support of the Ministry; that a majority had been secured in the House of Lords; that the Duke of Marlborough was disgraced, and rendered incapable to second his views; that the Whigs, though obstinate in their opposition, were divided in their Councils; that men of influence and property were inclined to a peace; that the mob of London were only clamorous for war; he resolved to spare no sort of violence to accomplish his views.

In forming his measures, the Prince of Savoy resolved to consult chiefly the Duke of Marlborough and the Baron de Bothmar, the Hanoverian Envoy at the Court of London. The Duke, at their first interview, chided the Prince for the unfortunate delay in his journey. His arrival, he said, might have been of great advantage to the party, about a month before. He ascribed his dilatoriness to that Austrian gravity, which had been often fatal to the affairs of the Imperial family. He told him, that, at the opening of the Session, their friends had a majority in the House of Lords. That they could have sent two or three of the opposite party to the Tower, without any difficulty. That their vacant places might be supplied with men willing to continue the war. That now the whole state of affairs was changed; that twelve new Peers had been created; that the Scottish Peers were arrived; that they must have recourse to violence, or drop altogether their design; that three or four persons, together with the Lord-Treasurer, who possessed the confidence of a *silly woman*, and governed her at pleasure, must be removed. That the Prince must, in the mean time, behave himself with great moderation and discretion. That he should endeavour to gain the good opinion of the Minister, and induce the Commons to grant ample supplies; and that the whole party should watch such accidents as might arise in the progress of time.

The Duke descended from these particular facts to reflections more general. He affirmed, that the state of the kingdom at present resembled its situation at the late Revolution; that the disorders were similar, and demanded the same remedies; that

should a Prince of the Electoral Family appear in Great Britain, under the cover of a manifesto, setting forth, that the Pretender was coming with a Popish army, the mob might be deceived, and Queen Anne, like her father, would steal away to France. That then the Crown might be settled by the Whigs, and the war be carried on with redoubled vigour. These observations devolved the discourse on the Baron de Bothmar. He averred, that though the disorders might be the same, the same remedies were impracticable; that the nation was not sufficiently prepared for a revolution; that the prejudices of the vulgar, the great engine in such daring enterprizes, were still upon the side of the enemy; that though the Queen was suspected of favouring a Popish successor, she herself was a strict Protestant; that the jealousy concerning religion was too feeble, on account of the distance of the danger; that though circumstances had even been more favourable, the experiment would be extremely dangerous; that a miscarriage would inevitably ruin the undertaking, load the Family of Hanover with the public hatred, and exclude them from the succession to the Crown. The Duke of Marlborough suffered himself to be argued out of his observations by the eloquence of the Baron de Bothmar. But he is said to have proposed another project, more safe, and equally effectual. He suggested, that bands of ruffians should be sent through the streets by night, to insult the inhabitants, to raise disturbances, and to excite mobs. That, should people become accustomed to these nocturnal alarms, there would be no difficulty in assassinating such persons as the party might wish to remove, and to throw the whole blame on a licentious band.

Though Prince Eugene rejected this project, his own was not distinguished with more humanity. He proposed to set fire to London, in different places, in the night; particularly to the Palace of St. James's, where the Queen resided. He shewed, that the proper time for the execution of this design was when the Guards on duty were commanded by an officer whom the party could trust. That, in the midst of the confusion, the Duke of Marlborough should appear at the head of a party in arms. That he should first possess himself of the Tower, the Bank, the Exchequer. That then he should seize the person of the Queen, force her to dissolve the Parliament, to call a new representative, to make a free inquiry into the clandestine correspondence with France, to punish the guilty with death. The Lords Somers, Cowper, and Halifax, were consulted upon this scheme. They refused at first to declare their own opinion; but they at last absolutely rejected the violent proposal of the Prince. They signified their inclination to proceed in the legal and ordinary way (25).³

In support of these extraordinary conversations, which in themselves are certainly not very credible, and which ought not to be admitted without good evidence, Mr. Macpherson refers his readers to Torcy's Memoirs, and to the Stuart Papers published in his own collection. As to the Marquis de Torcy, he has pretended to give an account of conversations between the Duke of Marlborough and Prince Eugene, at which he certainly was not present, and of which it is extremely improbable that he could be authentically informed of the particulars. Torcy, perhaps, received his information from Plunket; for it appears, from Macpherson's papers (26), that Plunket sometimes communicated information to Torcy: but the hearsay stories of such a man ought not to be received as historic evidence. Indeed, it is manifest from some passages in Torcy's Memoirs, that he was himself conscious, that he could not depend upon the truth of some of the facts mentioned by him. After

(25) History of

Papers, vol. ii.
p. 296.

formed by those great men; but however that be, it is allowed on all hands, that they received no countenance or approbation from Lord Cowper.

On the 6th of June, 1712, the Queen came to the House of Peers, and made a Speech to both Houses, in which she stated the terms upon which her Ministers were about to conclude a Treaty with the French at Utrecht. The following day, when the House of Lords took her Majesty's Speech into consideration, the Duke of Marlborough, who was now removed from the command of the army, asserted, "That the measures, which had been pursued for a year past, were directly contrary to her Majesty's engagements with her allies; that they sullied the triumphs and glories of her reign; and would render the English name odious to all nations." The Earl of Strafford said, "That some of the allies would not have shewn such backwardness to a peace, as they had hitherto done, had it not been for some Members of that illustrious Assembly, who had maintained a secret correspondence with them, and endeavoured to persuade them to carry on the war, feeding them with hopes that they should be supported by a strong party here." Lord Strafford, who had been some time abroad, expressing himself in but indifferent English, Lord Cowper said, "That the noble Lord had been so long abroad, that he had almost forgotten, not only the language, but the constitution of his own country. According to our laws, it could never be considered as a crime in the meanest subject, much less in any Member of that august Assembly, to hold correspondence with our allies: such allies especially, whose interest her Majesty had declared to be inseparable from her own, in her Speech at the opening of this Session. Whereas it would be a hard matter to justify, and to reconcile, either to our own laws, or to the laws of honour and justice, the conduct of some persons in treating clandestinely with the common enemy, without the participation of the allies (z)."

(z) *Ibid.* p. 375.

The part which Lord Cowper took, in opposition to the administration of the Earl of Oxford, occasioned him to be attacked by Dean Swift, with much virulence, in the *Examiner* [2]; and some reflections were thrown out against him, relative to his private

mentioning a proposal pretended to have been made by the Duke of Marlborough, he says, "To the honour of Prince Eugene, it is said, he rejected so odious a project; yet a much bolder scheme, and of a more detestable nature, is laid to his charge. It consisted, if we can depend upon the relations of some people, who perhaps were misinformed, in setting fire to different parts of the City of London, and pitching upon a time to put that purpose in execution, when the Guards upon duty were commanded by an Officer whom they could trust. Marlborough, at the head of a strong party in arms, should appear when the fire was spreading its devastation widest; then seize on the Tower of London; next on the Queen's person; afterwards oblige her to dissolve the Parliament, and call a new one, in order to make a free inquiry into the correspondencies and negotiations established with France, and to punish with the utmost severity those who had been concerned in them (27)." After considering the whole of what is said respecting these pretended plots of Prince Eugene and the Duke of Marlborough, we are of opinion, that these charges against these great men ought not to be admitted, without better evidence is produced in their support, than has been exhibited by Mr. Macpherson.

(27) *Memoirs*,
vol. iii. p. 273,
274.

[2] *In the Examiner.* Particularly in Numbers 18, 23, and 27. In No. 23, folio edition, is the following passage relative to *Will Bigamy*, a name which is given to Lord Cowper in these papers. "This Gentleman, knowing that marriage fees were a considerable perquisite to the Clergy, found out a way of improving them *cent. per cent.* for the good of the Church. His invention was to marry a second wife while the first was alive, convincing her of the lawfulness by such arguments, as he did not doubt would make others follow the same example. These he had drawn up in writing, with intention to publish for the general good; and it is hoped he may now have leisure to finish them."

Swift has also drawn an unfavourable character of Lord Cowper, in his "History of the Four last Years of the Queen." It is as follows: "The Lord Cowper—was considerable in the station of a practising Lawyer; but as he was raised to be a Chancellor and a Peer, without passing through any of the intermediate steps, which in late times hath been the constant practice, and little skilled in the nature of Government, or the true interests of Princes, farther than the Municipal or Common

Law of England, his abilities, as to foreign affairs, did not equally appear in the Council. Some former passages of his life were thought to disqualify him for that office, by which he was to be the Guardian of the Queen's conscience; but these difficulties were easily over-ruled by the authors of his promotion, who wanted a person that would be subservient to all their designs, wherein they were not disappointed. As to his other accomplishments, he was what we usually call a piece of a scholar, and a good logical reasoner, if this were not too often allayed by a fallacious way of managing an argument which makes him apt to deceive the unwary, and sometimes to deceive himself (*)." But Swift's characters, of those who were of the opposite party to himself in politics, are written with such a manifest disregard to equity and candour, that they seem entitled to very little credit. In one of Lord Chesterfield's letters to the Bishop of Waterford, is a passage, in which he gives a character of Swift's "History of the Four last Years of the Queen," and also makes some reference to the stories propagated relative to Prince Eugene, and of which we have treated in note [P]. He says of Swift's work, "It is a party pamphlet, founded on the lie of the day, which, as Lord Bolingbroke who had read it often assured me, was coined and delivered out to him, to write *Examiners*, and other political papers upon. That spirit remarkably runs through it. Macartney, for instance, murdered Duke Hamilton; nothing is false, for though Macartney was very capable of the vilest actions, he was guiltless of that, as I myself can testify, who was at his trial in the King's Bench, when he came over voluntarily to take it, in the late King's time. There did not appear even the least ground for a suspicion of it, nor did Hamilton, who appeared in Court, pretend to tax him with it, which would have been in truth accusing himself of the utmost baseness, in letting the murderer of his friend go off from the field of battle, without either resentment, pursuit, or even accusation, till three days afterwards. This lie was invented to inflame the Scotch nation against the Whigs; as the other, that Prince Eugene intended to murder Lord Oxford, by employing a set of people called Mohocks, which society, by the way, never existed, was calculated to enflame the mob of London. Swift took those hints *de la meilleure foi du monde*, and thought them materials for history. So far he is blameless (†)."

(*) *History of the Four last Years of the Queen*, p. 22, 23.

(†) *Miscellaneous Works of Lord Chesterfield*, vol. ii. p. 498, 499.

character,

character, which is said to have been somewhat licentious with respect to women [R].

As a public man, he continued to adhere steadfastly to the Whigs [S]; and when a debate took place relative to the Catalans, on the 2d of April, 1714, it was observed by Lord Cowper, and some other Lords, that the Crown of Great Britain having drawn in the Catalans to declare for the House of Austria, and engaged to succour and support them, those engagements ought to have been made good; and Lord Cowper moved for an address to her Majesty, importing, 'That her Majesty's endeavours for preserving to the Catalans the full enjoyment of their liberties, having proved ineffectual, their Lordships made it their humble request to her Majesty, that she would be pleased to continue her interposition, in the most pressing manner, in their behalf (a).' An address to this purpose, though with some alterations, was afterwards agreed to; but to which the Queen returned a very evasive answer. Lord Cowper strongly opposed giving any Parliamentary approbation to the Peace of Utrecht [T], in which he appears to have acted according to the full conviction of his own mind; and, indeed, though peace was at that time, as at all others, a very desirable object, it is manifest, from the manner in which the Treaty of Utrecht was commenced and concluded, that a due attention was not paid to the honour or interest of Great Britain; and that the chief object of those by whom the Treaty was negotiated, on the part of England, was not the interest of their country, but the promotion of their own private views.

(a) *Ibid.* p. 411.

On the 5th of June following, when a debate took place concerning the Schism Bill [U], that

[R] *Somewhat licentious with respect to women.* The reflections that have been thrown out against Lord Cowper on this subject may, perhaps, receive some light from the following passage, in a book called the *English Traveller*, vol. ii. p. 315. 'Hertingfordbury, by some esteemed one of the pleasantest villages in England. The seat of the Earl Cowper here, called *Hertingfordbury Park*, was the estate of Mrs. Elizabeth Culling, who lies buried in the Church-yard. This Lady, having two natural children by that Lord, a son and daughter, the former dying soon after he came of age, the young Lady, his sister, sold this estate, in the year 1720, to her father's brother, the late Judge Cowper, for fifty year's purchase at least, and he again disposed of it to his brother, the late great Lord Cowper, Lord High Chancellor of England.' It has been said, that, in the early part of his life, a pretended marriage, without the forms of law, took place between Mr. Cowper, afterwards the Chancellor, and the Lady here mentioned, Mrs. Elizabeth Culling; and hence probably originated the story of the Chancellor having two wives, and the name given him by Swift of *Will Bigamy*.

[S] *Continued to adhere steadfastly to the Whigs.* In one of Plunket's letters, extracts from which are given in Macpherson's *Original Papers*, vol. ii. p. 390, it is said, that 'Cowper, the late Chancellor, if he could get off handsomely from the Whigs, would join with Princess Anne (meaning the Queen) in all her measures.' There is not the least probability in this assertion of Plunket's, as no man appears to have attached himself more firmly to the Whig party than Lord Cowper. But the vague assertions of this Irish Jesuit and spy are too often considered as evidence in Mr. Macpherson's History; and his surmises, insinuations, and hearsay stories, received with a degree of credit to which they are in no respect entitled.

It may also be remarked, that it is not unusual for Mr. Macpherson to state facts in his History, which are not supported by his own authorities. Of this an instance occurs in an account of a Speech pretended to have been made by the Duke of Marlborough, Hist. vol. ii. p. 502. as an authority for which he refers to the Stuart Papers, Nov. 3, 1711; but those who will take the pains to examine the Speech given in these papers, by the Agents of the House of Stuart, will find that it materially differs from the Speech made for the Duke by Mr. Macpherson. It may likewise be observed, that manifest inconsistencies are not very uncommon in this gentleman's History. Thus he says of the Earl of Wharton, in one place, that he possessed "distinguished talents;" and in another, that "with talents which could scarce gain him bread in any other line, he became considerable in politics (28)."

VOL. IV.

[T] *Lord Cowper strongly opposed giving any Parliamentary approbation to the Peace of Utrecht.* 'A motion was made for taking into consideration the state of the nation, in relation to the Treaties of Peace and Commerce, and some Speeches were made on both sides thereupon, after which the Debate was adjourned to Friday the 16th of April. That day, the Whig Lords being apprehensive, that if any Debate arose about the Spanish Treaty, the other party would propose an Address to the Queen, approving of the said Treaty, they therefore agreed to say nothing against the Treaty that might draw them into a Debate. The Lord North and Grey stood up first, and said, that if any Lord had any objection against the Spanish Treaty, he was ready to answer them: and so, in a challenging manner, skirmished for some time. After he sat down, there was a silence for a quarter of an hour; and then the Lord Clarendon stood up, and said, "My Lords, since no objections can be raised against the Spanish Treaty, we should address her Majesty to return her our most humble thanks, for having by a safe, honourable, and advantageous Peace with Spain, delivered these nations from a long consuming land war, and to desire her Majesty, notwithstanding any obstructions that may be thrown in her way, to proceed to the settlement of Europe, according to the principles laid down in her Majesty's most gracious Speech." Lord Cowper now rose, and said, "My Lords, This is the most barefaced attempt that ever was made by this, or any other Ministry, to secure themselves by endeavouring to get the sanction of this House. My Lords, are not the Ministry themselves jealous, that their actions stand in need of the sanction of this House? Else why this endeavour at an Address, to make their act the act of the House? The noble Lord that spoke first, acting like a soldier, would by skirmishing have drawn on a general engagement; the troops, however, are too well disciplined, to fall into an ambuscade of his laying; but I cannot remove my finger from the original of our misfortune, the *cessation of arms*. We were then told, that if a blow had been struck, it would have ruined the peace. Would to God it had ruined this peace (29)."

If Lord Cowper had lived to the present times, he would not have thought it any thing unusual, or extraordinary, that a Ministry should endeavour to procure a Parliamentary sanction to a Treaty of Peace.

[U] *The Schism Bill.* By this arbitrary, unjust, and oppressive Bill, which passed both Houses, and received the Royal Assent, and which was entitled, 'An Act to prevent the growth of Schism, and for the farther Security of the Churches of England and Ireland, as by law established,' it was enacted,

5 G

That

(28) Hist. vol. ii. p. 456.

(29) Torbuck's Parliamentary Debates, vol. vi. p. 165, 166.

that Bill was very strongly opposed by Lord Cowper, who observed, that 'No man was more ready than himself to do every thing that should be necessary to attain the seeming intention of that Bill, namely, the preventing the growth of Schism, and the farther securing of the Church of England; but that the enacting part would be so far from answering the title of it, that, in his opinion, it would have a quite contrary effect, and prove equally pernicious to Church and State. Instead of preventing Schism, and enlarging the pale of the Church, this Bill tended to introduce ignorance, and its inseparable attendants, superstition and irreligion.' In support of this idea of the tendency of the Bill, his Lordship farther remarked, 'That in many country towns, reading, writing, and grammar-schools, were chiefly supported by the Dissenters, not only for the instruction and benefit of their own children, but likewise of those of the poor Churchmen; so that the suppressing of those schools would, in some places, suppress the reading of the Holy Scriptures (b).' He also opposed that clause in the Bill, by which Justices of the Peace were empowered finally to hear and determine offences against it (c). The Bill, however, passed both Houses, and received the Royal Assent; but a protest against it was entered, signed by Lord Cowper, twenty-six other Peers, and five Bishops (d); and in the subsequent reign the Act was repealed.

On the demise of Queen Anne, Lord Cowper was nominated one of the Lords Justices of the kingdom, till the arrival of King George I. from Hanover. On the 29th of August, 1714, he was appointed Lord Chancellor of Great Britain (e); and shortly after Lord Lieutenant and Custos Rotulorum of the county of Hertford (f). When a new Parliament was assembled, on the 27th of March, 1715, King George I. declared from the Throne, "That he had ordered the Lord Chancellor to declare the causes of calling this Parliament, in his Majesty's name and words." He then delivered his Speech into Lord Cowper's hands, who read it to both Houses (g). On the 6th of February, 1716, his Lordship was appointed Lord High-steward for the trial of the Rebel Lords (h); as he was also, the following year, at the trial of the Earl of Oxford [W], to whom he behaved

That every person who should, from and after the first day of August following, keep any public or private school or seminary, or teach or instruct any youth as Tutor or Schoolmaster, within that part of Great Britain called England, the dominion of Wales, or town of Berwick upon Tweed, before such person or persons should have made a declaration before the Archbishop, Bishop, or Ordinary of the Diocese, that they would conform to the Liturgy of the Church of England, and received a licence from the Archbishop, Bishop, or Ordinary, in consequence of such declaration, they should be committed to the common Gaol of such county, riding, city, or town corporate, in which they should be convicted, there to remain without bail or mainprize, for the space of three months, to commence from the time that such person or persons should be received into the said gaol. It was also enacted, that no Licence should be granted by any Archbishop, Bishop, or Ordinary, unless the person or persons who should sue for the same, should produce a certificate of his or their having received the Sacrament, according to the usage of the Church of England, in some parish Church, within the space of one year before the grant of such Licence, under the hand of the Minister, and one of the Churchwardens of the said parish; and that any person who should have obtained a Licence, and subscribed the declarations required, and should at any time after, during the time of his or their keeping any public or private school or seminary, or instructing any youth as Tutor or Schoolmaster, knowingly or willingly resort to, or be present at, any conventicle, assembly, or meeting, for the exercise of religion in any other manner, than according to the Liturgy and practice of the Church of England, should be liable to the penalties in this Act, and should from thenceforth be incapable of keeping any public or private school or seminary, or instructing any youth, as Tutor or Schoolmaster. It was also farther enacted, that it should be lawful for the Bishop of the Diocese, or other proper Ordinary, to cite any person or persons whatsoever, keeping school or seminary, or teaching without licence, and to proceed against and punish them by Ecclesiastical censure; and that if any person licensed, as aforesaid, should teach any other Catechism than the Catechism set forth in the book of Common Prayer, the licence of such person should from thenceforth be void, and such person should be liable to the penalties of this Act. A clause, however, was added, that this

Act should not extend to any person, who as a tutor or school-master should instruct youth in reading, writing, arithmetic, or any part of mathematical learning only, so far as such mathematical learning related to navigation, or any mechanical art only, and so as such reading, writing, arithmetic, or mathematical learning, should be taught in the English tongue only.

Petitions were presented to Parliament against this Bill from the Dissenters and Quakers, and from the Dutch and French Protestant Churches in England; and it was strongly opposed in both Houses. In the House of Commons it was remarked, that this Bill 'tended to raise as great a persecution against our Protestant brethren, as the Primitive Christians ever suffered from the Heathen Emperors, particularly Julian the Apostate (30).' Queen Anne died on the day in which this act took place, which was the first of August, 1714; and the Ministry of King George the First had no inclination to put the Act in force; so that from them it received little countenance; and in the fifth year of that Prince's reign it was repealed (31).

[W] *At the trial of the Earl of Oxford.* Of the manner of his going to Westminster-hall on this occasion, the following account is given: 'About ten o'clock in the morning, (June 24, 1717), the Lord High Chancellor Cowper, in quality of Lord High Steward of Great Britain, appointed by his Majesty for the trial of the Earl of Oxford, was attended from his house by all the Judges of his Majesty's Courts in Westminster-hall, in their robes; as also by Garter King of Arms, and the Gentleman Usher of the Black Rod, to whom his Majesty had delivered the white wand to be carried before his Lordship; and set forward in his coach towards Westminster, sitting at the hinder end thereof; Garter, and the Gentleman who bore the Great Seal, sitting both uncovered at the other end; one of the Serjeants at Arms, with his mace, being placed on the right side of the coach, and the Usher of the Black rod carrying the white wand on the left; the Judges, and his Lordship's Gentlemen, following after in several coaches. Being thus come to the stairs-foot, ascending to the House of Peers, the Judges went up two and two together, the juniors first, next the Lord High Steward's Gentlemen, after them the Serjeant at Arms with his mace, and the Seal-bearer; and lastly, the Gentle-

on that occasion with great politeness [X]. When a Bill was brought in by Lord Stanhope, "for strengthening the Protestant interest," which included in it a repeal of the Schism Act, some clauses of the Bill were opposed by Lord Cowper (i), who thought they too much interfered with the Test and Corporation Acts: for though his Lordship had strongly opposed the Schism Bill in the preceding reign, he appears not to have been sufficiently enlightened on the subject of Toleration. A change taking place in the Ministry in the beginning of March, 1718, Lord Cowper resolved to resign the Great Seal; but, before his resignation, the King, on account of his great merit and services, on the 18th of that month, raised him to the dignity of a Viscount and Earl, by the title of Viscount Fordwich, in the county of Kent, and Earl Cowper (k). The preamble to his Patent was drawn up by Mr. Hughes [Y]. He resigned the Great Seal [Z] in the month of April;

(i) Hist. and Proceedings of the House of Lords, vol. iii. p. 103, 101.

(k) Collins, ut supra.

Lords

man Usher of the Black Rod, bearing the white wand, Garter King of Arms going on his right; then his Lordship alone, his train borne by one of his Gentlemen. In this manner entering the House of Peers, he found all the Lords in their scarlet robes, also the Bishops in their rochets, and took his place upon the uppermost wool-pack. This done, and prayers ended, his commission for Lord High Steward was read: and then the Lords adjourned themselves into the erected Court in Westminster Hall, where the Managers, and other Members of the House of Commons, in a grand committee, had, by this time, taken their respective places. The King, the Prince, and Princess of Wales, were also seated in the boxes prepared for the Royal Family; as were also the foreign Ministers in the seats appointed for them; and the other part of the Amphitheatre was filled up with a vast number of Gentlemen, Ladies, and other persons of distinction (32).

[X] *To whom he behaved on that occasion with great politeness.* At the beginning of the trial, Lord Cowper addressed Lord Oxford in the following terms:

Robert Earl of Oxford and Earl Mortimer,
It has been usual, before the Commons proceed, to say something from this place to persons in your Lordship's present condition; partly by way of exhortation to a reasonable confidence in the great honour, justice, wisdom, integrity, and candour of their Judges, their peers, the House of Lords in Parliament assembled, and partly by way of direction, to assist them in their behaviour and conduct during the course of their trial. But, considering the many great offices your Lordship has borne in the State, your long experience and known learning in all Parliamentary proceedings, I cannot but think it would seem improper for me to be speaking to your Lordship in that manner. Wherefore I proceed barely to acquaint your Lordship, and others whom it may concern, with such orders as the Lords have made, which it is fit should be taken notice of thus early in this trial, &c (33).

[Y] *The preamble to his Patent was drawn up by Mr. Hughes.* It is as follows:

Quemadmodum semper erit nobis in primis gratum, viros verè dignos titulis ornare, qui virtute fulgente, & claris animi dotibus, honores quos accipiunt decorant; statuimus perquam fidelem & dilectum nostrum GULIELMUM Dominum COWPER, Baronem de Wingham, Cancellarium Magnæ Britanniae, in omni tempore optimè de nobis & de republicâ meritum, ad provectiorem nobilitatis gradum vocare. Quem, maximè in arduis regni consiliis judicium, diu conspecta probitas, semper inconcussa fides, summa legum peritia, & æquibonique studium, sapientiæ non parum, multum eloquentiæ, non magis nobis quam patriæ suæ dilectum reddidit. Regnante Annâ, vir tantis virtutibus præcellens, ad munus Cancellarii Magnæ Britanniae maturè accersitus est. Florente republicâ, omnia implevit consiliiarii solertis, subditi fidelis, bonique civis officia; periclitante postea libertate, otium honestum summis dignitatibus præposuit. Nec tamen destitit in senatu iniquitati temporum quantum potuit obviam ire, hostesque patriæ, & perditâ consilia, fortiter, sagaciter, diligenter oppug-

nare. Quum verò res nostræ, pene labefactatæ, in solido rursus locatæ sunt, ut primum, providentiâ divinâ, ad regnum nostrum pervenimus, merito revocandus erat ad priora munera sustinenda. Ex eo tempore satis superque est nobis conspectum, quantum meruit & meretur, & quam bene honores magis ampli, non tam quæsitum quam parti, summis virtutibus largiundi sunt. Quapropter, &c (34).

[Z] *He resigned the Great Seal.* On this occasion Mr. Hughes wrote his Lordship the following letter:

My Lord,
London, May 1718.
Though I cannot help joining with the general voice in lamenting, with much concern, the loss the public has sustained in your Lordship's quitting that great trust, which never has, nor can be placed in more worthy hands than your Lordship's; yet I think it my duty, at the same time, to congratulate your Lordship on your being honourably eased from a very great burden; the constant fatigue of which must have made it uneasy, and might have proved prejudicial to your health. Your Lordship has been seen to act in every thing with that prudence, mature thought, and equal temper, that, I am sure, the resolution you had taken must have been founded on the best reasons; and I most zealously and sincerely wish your Lordship all the satisfaction in the consequences of it, which you can expect or desire.

I never can express to your Lordship the half of what I feel, as often as I think of your very generous and distinguished favours to me; all the circumstances of which will ever leave on my mind the most grateful impressions. I esteem that short space of my life, in which I had the honour to attend your Lordship, as one of the happiest parts of it; and if I cannot avoid, on this occasion, having a proportionable concern, yet to your Lordship, who has shewn so very humane and tender a regard to my welfare, I think myself obliged in duty to declare, that I have no regret for any consequences to myself, so much as that of being deprived of the sanction of being near your Lordship, and the frequent opportunities of being honoured with a conversation filled with goodness and condescension, and every thing that could render it valuable and agreeable.

I wish your Lordship increase of health and happiness, and with the most dutiful regards to your Lordship and my Lady Cowper,

I am, &c.

JOHN HUGHES (35).

Lord Cowper very generously patronized Mr. Hughes, and appears to have had a great regard for him; and he, on his part, had a high sense of his Lordship's kindness to him. During the time that Lord Cowper held the Great Seal, Mr. Hughes addressed the following Ode to him:

O D E

To the Lord Chancellor COWPER. In allusion to Horace, Book II. Ode 20.

I.

"I'm rais'd, transported, chang'd all o'er!
Prepar'd, a tow'ring swan, to soar
Aloft; see, see the down arise,
And cloath my back, and plume my thighs!"

My

of the House of
Lords, *ut supra*,
p. 112, 119.

After his resignation, Lord Cowper diligently attended the public business in the House of Peers, and frequently opposed the measures of the Court. He spoke and voted against the Peerage Bill (1); and the famous South-sea scheme also received from him a very powerful opposition. Of the extraordinary infatuation which then prevailed in the kingdom, and which seems never to have been sufficiently accounted for, he appears in some degree to have foreseen the pernicious consequences. For when a motion was made, that the South-sea Bill should be referred to a Committee of the whole House, he observed, "That, like the Trojan horse, the Bill was ushered in, and received with great pomp and acclamations of joy; but it was contrived for treachery and destruction (m)." He advanced a variety of arguments against the Bill [AA], but it was carried by a large majority, and was productive of great national evils. Lord Cowper also opposed a Bill which was brought in "for the more effectual suppressing of blasphemy and profaneness [BB];" by which persons were to be subjected to penalties, who denied the doctrine of the Trinity, or the inspiration of the Scriptures; and by which any preachers, who should deny any of "the fundamental articles of the Christian Religion," were to be deprived of the benefit of the Act of Toleration. The Bill was supported by the Archbishop of Canterbury, the Bishops of London and Winchester, and by other Bishops and some Lay-lords (n); but, after a debate, was rejected by the House.

Parliamentary
Debates, vol. vii,
p. 299.

(n) Torbuck's
Parliamentary
Debates, vol. vii,
p. 48, 49.

On the 13th of December, 1721, Lord Cowper made a motion in the House of Peers, that a Bill should be brought in, for repealing so much of an Act, which had passed the preceding Session, relative to the plague, as gave a power to remove to a lazaretto, or pest-house, any persons whatsoever infected with the plague [CC], or healthy persons out of an infected family, from their habitations, though distant from any other dwelling; and also so much of the said Act, as gave power for drawing lines or trenches round any city, town, or place infected. His Lordship observed, that the powers given by the Act in question were altogether unknown to our excellent constitution, inconsistent with the lenity of our free government, and such as could never be wisely or usefully put in practice; and they were the more odious, because they seemed to be copied from the arbitrary government of France, and could not be executed but by a military force (o). The motion was seconded by Lord Trevor, and supported by several other Lords; but was rejected by a majority. A protest was entered against the rejection of the motion [DD], signed

Lords, *ut supra*,
p. 199.

My wings shoot forth; I now will try
New tracts, and boldly mount the sky,
Nor envy, nor ill fortune's spite,
Shall stop my course, or damp my flight.

II.

"Shall I, obscure, or disesteem'd,
Of vulgar rank henceforth be deem'd?
Or vainly toil my name to save
From dark oblivion and the grave?
No—he can never wholly die,
Secure of immortality,
Whom Britain's COWPER condescends
To own, and numbers with his friends.

III.

"'Tis done—I scorn mean honours now;
No common wreaths shall bind my brow.
Whether the muse vouchsafe t'inspire
My breast with her celestial fire;
Whether my verse be fill'd with flame,
Or I deserve a poet's name,
Let fame be silent; only tell
That generous COWPER loves me well.

IV.

"Through Britain's realms I shall be known
By COWPER's merit, not my own:
And when the tomb my dust shall hide,
Stripp'd of a mortal's little pride,
Vain pomp be spar'd, and every tear;
Let but some stone this sculpture bear,
"Here lies his clay, to earth consign'd,
"To whom great COWPER once was kind (36)."

(36) *Ibid.* p. 260,
261.

[AA] He advanced a variety of arguments against the Bill.] Earl Cowper urged, that in all public bargains the individuals in the Administration ought to take care, that they shall be more advantageous to the State than to private persons; but that a contrary method had been followed in the contract made with the South-sea Company; for, should the

stocks be kept at the advanced price to which they had been raised by the oblique arts of stock-juggling, either that Company or its principal Members would gain above thirty millions, of which no more than one-fourth part would be given towards the discharge of the national debts. He apprehended, that the re-purchase of annuities would meet with insuperable difficulties: and, in such case, none but a few persons who were in the secret, who had bought stocks at a low rate, and afterwards sold them at a high price, would in the end be gainers by the project (37).

(37) Smollet, *ad
supra*, p. 362.

[BB] A Bill which was brought in for the more effectual suppressing of blasphemy, &c.] Among others who opposed this Bill was the Earl of Peterborough, who said, "That though he was for a Parliamentary King, yet he did not desire to have a Parliamentary God, or a Parliamentary Religion; and if the House were for such a one, he would go to Rome, and endeavour to be chosen a Cardinal; for he had rather fit in the conclave, than with their Lordships upon those terms (38)." The Bishop of Peterborough also spoke on the same side, and said, "That neither himself, nor, he hoped, any of that Bench, would be executioners of such a law, which seemed to tend to the setting up of an Inquisition (39)."

(39) *Id. ibid.*

[CC] Any persons whatsoever infected with the plague.] The plague which broke out in the year 1720, at Marseilles, seems to have given rise to this act.

[DD] A protest was entered against the rejection of the motion.] It was observed in this protest, that in the plague with which England was visited in 1665, though none of the methods prescribed by the late Act were made use of, much less authorized by Parliament, yet the infection, however great, was kept from spreading itself into the remoter parts of the kingdom; nor did the city of London, where it first appeared, and chiefly raged, suffer so long or so much, in proportion to the number of its inhabitants, as other cities and towns in France had suffered, where those cruel experiments had been tried (40).

(40) *Ibid.* p. 183.

by

(q) *Ibid.* p. 230.

by Lord Cowper, and many other Lords (p). He also signed a protest against the rejection of the Bill, for the better securing the freedom of election of Members to serve for the Commons in Parliament (q). This protest, which was signed by twenty-three Lay-Lords, and two Bishops, though it contained much truth and good sense, gave so much offence, that a vote was passed for expunging it [EE] from the Journals (r); and another vote was afterwards passed, at the motion of the Earl of Sunderland, for limiting the time allowed for entering protests (s).

(r) *Ibid.* p. 232.

(s) *Ibid.* p. 236.

When an inquiry was instituted, in 1722, relative to the great increase of the Navy Debt, Earl Cowper repeatedly spoke upon that subject, arraigned the proceedings of Government in that business, and signed several protests (t). He opposed the Bill for suspending the Habeas Corpus Act for a year [FF]; as he did also the commitment of the Duke of Norfolk to the Tower, on the suspicion of High Treason (u). A protest against the commitment of that Nobleman was also signed by Lord Cowper, and several other Peers (w). On the 20th of February, this year, his Lordship made a motion, in the House of Peers, relative to the National Debt. He remarked, that the National Debt had been greatly increased for several years past, as appeared by the state of the Public Debt, extracted from the books of the Treasury, and this without any visible occasion; since every thing that had been asked of the Parliament, had been readily granted and provided for, every one of those years. He, therefore, moved, that it should be resolved by the House, "That it appeared by the state of the Public Debt before that House, that

(t) *Ibid.* p. 188,

&c.
(u) *Ibid.* p. 249.

(w) *Ibid.* p. 250,
251, 252.

"the same, exclusively of the Debt of the Navy, was increased between the 31st of December, 1717, and the 31st of December, 1720, at least the sum of 2,300,000*l.* notwithstanding that the Sinking Fund had produced within that time 1,910,385*l.* 14*s.* 6*d.*" This motion was seconded by Lord Bathurst, and supported by several other Lords, but was rejected by the majority (x). A protest was entered on the occasion, signed by Lord Cowper, and others, but which was expunged by a subsequent Order of the House. Another motion was afterwards made, that it should be resolved by the House, "That the lessening the Public Debt annually, by all proper methods, was necessary to the restoring and preserving the Public Credit." But the Ministerial party evaded this motion, by putting the previous question (y).

(x) *Ibid.* p. 234.

(y) *Ibid.* p. 235.

In the year 1723, Christopher Layer, who had been convicted of High Treason, underwent a long examination before a Secret Committee of the House of Commons, relative to a conspiracy for raising the Pretender to the Throne. The Report of this examination was printed by order of the House of Commons; and it appeared from this Report, that Layer, in the course of his examination, had mentioned a club of disaffected persons, of which, he said, John Plunket had told him, that Lord Cowper was one. This occasioned his Lordship to remark in the House of Peers, that after having on so many occasions, and in the most difficult times, given undoubted proofs of his hearty zeal and affection for the Protestant Succession, and of his attachment to his Majesty's person and government, he had just reason to be offended, to see his name bandied about in a list of a chimerical club of disaffected persons, printed in the Report of the Secret Committee, on the bare hearsay of an infamous person, notoriously guilty of prevarication [GG]; and who, in the opinion even of the Secret Committee, "in order to magnify the number of the Pretender's friends, did, in several lists, insert the names of persons as well affected to the Pretender's service, without having the least authority for so doing:" which alone was sufficient to give an air of fiction to the whole conspiracy. But, in justice to his own character, he thought it necessary to move, That John Plunket, from whom Layer pretended to have received the list of the club, mentioned in the Report of the Committee, should be immediately sent for to the Bar of that House, to be there examined (z). This motion, after some debate, was rejected by the majority; and it was observed by Lord Townshend, that as the Secret Committee had declared, that they were entirely satisfied of Lord Cowper's innocence, his Lordship's reputation could not have suffered upon that account (a). Lord

(z) *Ibid.* p. 266,
267.

(a) *Id. ibid.*

[EE] *A vote was passed for expunging it.* Perhaps few things can be more absurd, in any body of men whatever, than admitting a right of entering protests, with reasons for such protests, against the proceedings of the majority, and yet at the same time supposing, that the majority can have any right to expunge such protests.

[FF] *He opposed the Bill for suspending the Habeas Corpus Act for a year.* The Earls of Anglesey, Cowper, Strafford, and Coningsby, the Lords Trevor, Bathurst, and Bingley, represented, That the Habeas Corpus Act being, on all hands, admitted to be the greatest and strongest bulwark of English liberty, it did not consist with the wisdom of Parliament, to suspend it without an absolute necessity. That, indeed, in cases of actual rebellion, or intended invasion, that Act had been, at

times before, suspended; but yet this was done sparingly, by degrees, and never for above the term of six months. That this consideration put them under a very melancholy apprehension for the very being or effect of that excellent law; since the suspension of it for a year, might be as good a precedent for suspending it, on another occasion, for the term of two years, as any former precedent was now for the present suspension (41).

[GG] *Notoriously guilty of prevarication.* It had been resolved by the House of Commons, That it appeared to that House, that Christopher Layer, in his several examinations before the Lords of the Council, and the Committee of that House, had grossly prevaricated, suppressed the truth, contradicted himself, &c. (42).

(41) Torbuck's
Parliamentary
Debates, vol. viii.
p. 244.

(42) Hist. Reg.
vol. x. p. 150.

Cowper, however, thought proper to make a public declaration of his innocence [HH].

On the 15th of May, this year, Earl Cowper made a long Speech in the House of Peers, in opposition to the Bill for inflicting pains and penalties on Bishop Atterbury (b). He urged a variety of arguments to shew, that the evidence against the Bishop was extremely insufficient; and he pointed out the danger of such a precedent, as that of inflicting pains and penalties on a man without law, and without proper evidence against him. His Lordship strongly objected to the distinction that had been made in the debate, between *real* evidence, and *legal* evidence; and maintained, that the law required only "such real and certain proof, as ought, in natural justice and equity, to be received."—"The wisdom and goodness of our law, my Lords," said he, "appear in nothing more remarkably, than in the perspicuity, certainty, and clearness of the evidence it requires, to fix a crime upon any man, whereby his life, his liberty, or his property, might be concerned. Herein we glory and pride ourselves, and are justly the envy of all the neighbouring nations. Our law, in such cases, requires evidence so clear and convincing, that every by-stander, the instant he hears it, must be fully satisfied of the truth of it. It admits of no surmises, innuendoes, forced consequences, or harsh constructions, nor any thing else to be offered as evidence, but what is real and substantial, according to the rules of natural justice and equity. These are the rules the Judges go by, nor have they any other in determining what is, or what is not to be admitted as evidence before them; and, therefore, to say, that the law refuses such evidence as is real, and ought in natural justice and equity to be admitted, is to cast an imputation upon the law, which is not only unjust, but entirely groundless (c)."

(b) Proceedings of the House of Lords, *ut supra*, p. 383—398.

(c) *Ibid.* p. 388 389.

The last public transaction, in which we find Earl Cowper engaged, was opposing the Bill for taxing the Papists; which he represented as an impolitic and indefensible measure. He remarked, that it might afford a pretext to some foreign Princes for treating their Protestant subjects with severity; and he observed, that no state had ever got any thing by persecuting its subjects. In France, he said, persecution had been the means of driving away the wealthiest of their merchants, and their most industrious artificers; and this Bill might also force the English Roman Catholics to leave the kingdom, and carry eight or nine hundred thousand pounds into foreign countries (d). The Bill, however, passed; but Lord Cowper, and several other Lords, signed a protest against it (e). His Lordship lived but a few months after; for he died at his seat at Colne Green, in Hertfordshire [II], on the 10th of October, 1723; and on the 19th of that month, he was interred in Hertfordbury Church, in the same county (f). A Pindaric Ode, occasioned by his death, was published by Mr. Ambrose Philips [KK].

(d) *Ibid.* p. 403.

(e) *Ibid.* p. 404.

The

[HH] *A public declaration of his innocence.*] It was as follows:

"The declaration of William Earl Cowper, shewing that the matters contained in some hearsays, relating to him, in the examination of Christopher Laver, are false and groundless.

March 20, 1722-3.

"Though hearsay does not affect any one, either in law, or reason, yet it deserves contradiction, where the truth will bear it, especially if printed: and, therefore, finding that Laver, in his examinations of the 19th of January and 4th of February last, hath said, that one Plunket told him, (as explaining what was meant by *Burford's club*), that Lord Orrery was Chairman; and that Lord Cowper, and seven other Lords, and six Commoners named, were of that club; and that this club met monthly; as he, Laver, thought, at one another's houses; and not doubting but my averment will be believed before any hearsay, especially from one in Laver's sad circumstances; I do hereby declare and affirm upon my honour, That I do not know, or believe, and never heard, before the said examinations were talked of, that there was any such club, or meeting: That as to three of the Commoners named, viz. Sir Henry Goring, Mr. Dawkins, and Mr. Shippen, I do not know them so much as by sight; and as for two of the remaining three Commoners, viz. Sir Constantine Phipps, and General Webb, I have not been in their, or either of their companies, at any time within sixteen years last past: and as to the Lords, I never met them, or any of them, but either accidentally, on visits of ceremony, or in the time of Parliament, and that, with other Lords, on the business of Parliament only. And for one of the said Commoners, whom I am acquainted with, viz. Mr. Hutcheson, I never once was at any meeting with him, together with any of the said Lords or Commoners. And

whereas Laver, in his examination of the 19th of September last, said, that Lord Orrery told him, that Lord Cowper told him (Lord Orrery), that two hundred Tories, and ninety Grumbletonians, would try their last effort in the House of Commons; and in another examination of the 21st of the same month, Laver repeats the same, except that he uses the words *angry Whigs*, instead of the word *Grumbletonians*: I do hereby declare, and affirm upon my honour, that I never said so to Lord Orrery, nor to that effect, nor any thing like it: and I do therefore verily believe, that Lord Orrery never said that I did.

"COWPER (43)."

(43) Hist. Reg. for the Year 1723, p. 255, 256.

[II] *At his seat at Colne-green, &c.*] At this seat, now the property of the present Earl Cowper, which we lately visited, we saw three portraits of the first Earl Cowper, one at full length, in his robes as Chancellor; another in his robes, three quarters; and a third in an undress. From these portraits he appears to have been a very handsome man, with an open and intelligent countenance.

In one of the rooms at this seat are hung up, in glass cases, the purses that contained the Great Seals when he held them; namely, the last Great Seal of England, the first Great Seal of Great Britain, and the Great Seal that he held after the accession of King George I. and which are severally inscribed, *Sigillum Angliæ Ultimæ*, *Sigillum Britanniae Primæ*, *Sigillum Britanniae Restitutæ*.

[KK] *A Pindaric Ode, occasioned by his death, &c.*] From this Ode we shall select two or three stanzas.

Here we come, and hence we go,
Shadows passing to and fro;
Seen a while, forgotten soon:
But thou, to fair distinction born,
Thou COWPER, beamy in the morn
Of life, still brightening to the pitch of noon,
Scarce

The eloquence and abilities of Earl Cowper were highly celebrated in his own time; he made a very conspicuous figure at the Bar; he was a distinguished Member of both Houses of Parliament; his general character as a public man appears to have been extremely respectable; and in his conduct in the Court of Chancery he displayed great disinterestedness. He opposed the frequency and facility with which private bills passed in Parliament; and refused the New Year's Gifts, which it had been customary to present to those who held the Great Seal [LL]. Dr. Smollet observes, that England, by his death, 'lost a worthy Nobleman, who had twice discharged the office of Lord-chancellor, with equal discernment and integrity. He was profoundly skilled in the laws of his country; in his apprehension quick and penetrating; in his judgment clear and determinate. He possessed a manly eloquence: his manner was agreeable, and his deportment graceful (e).' Mr. Tindal says of him, that he 'was eminent for his integrity in the discharge of the office of Lord-chancellor, which he had twice filled. There may have been Chancellors of more extensive learning, but none of more knowledge in the laws of England. His judgment was quick, and yet solid. His eloquence manly, but flowing. His manner graceful and noble [MM] (f).' Lord Chesterfield, in his letters to his son (g), represents Earl Cowper as more distinguished, as a Speaker, by the elegance of his language, and the gracefulness of his manner, than by the force of his arguments. He says, 'The late Lord-chancellor Cowper's strength as an Orator, lay by no means in his reasoning, for he often hazarded very weak ones. But such was the purity and elegance of his style, such the propriety and charms of his elocution, and such the gracefulness of his action, that he never spoke without universal applause. The ears and the eyes gave him up the hearts and the understanding of the audience.'

(g) Letter 173.

(b) Collins, *ut supra*.

Earl Cowper was one of the Governors of the Charter-house, and a Fellow of the Royal Society (b). He was twice married. By his first wife, Judith, who was daughter and heiress of Sir Robert Booth, of London, Knight, he had one son, who died young. Mary, his second wife, who did not long survive him, was daughter of John Clavering, Esq; of Chopwell, in the Bishopric of Durham. By this Lady he had issue two sons and two daughters. His eldest son, William, succeeded him in his titles and estate; and his second

' Scarce verging to the steep decline,
' Hence summon'd while thy virtues radiant shine;
' Thou singled out, the fosterling of fame,
' Secure of praise, nor less secur'd from blame,
' Shalt be remember'd with a fond applause,
' So long as Britons own the same indulgent laws.'

* * * * *
' Hear him speaking, and you hear
' Reason tuneful to the ear!
' Lips, with thymy language sweet,
' Distilling on the hearer's mind
' The balm of wisdom, speech refin'd,
' Celestial gifts!—Oh, when the nobles meet,
' When next, thou sea-surrounded land,
' Thy nobles meet at Brunswick's high command,
' In vain they shall the charmer's voice desire!
' In vain those lips of eloquence require;
' That mild conviction which the soul assails
' By soft alarms, and with a gentle force prevails.

' To such persuasion, willing, yields
' The liberal mind, in freedom train'd;
' Freedom, which, in crimson'd fields,
' By hardy toils our fathers gain'd;
' Inheritance of long descent!
' The sacred pledge so dearly priz'd
' By that blest spirit, we lament.
' Grief-easing lays, by grief devis'd,
' Plaintive numbers, gently flowing,
' Soothe the sorrows to him owing.'

* * * * *
' Winning aspect! winning mind!
' Soul and body aptly join'd;
' Searching thought, engaging wit,
' Enabled to instruct, or please.
' Uniting dignity with ease,
' By nature form'd for every purpose fit;
' Endearing excellence!—O, why
' Is such perfection born, and born to die?
' Or, do such rare endowments still survive,
' As plants remov'd to milder regions thrive
' In one eternal spring? And we bewail
' The parting soul, new-born to life that cannot fail (44).'

(44) Ode (in the manner of Pindar) on the Death of the Right Hon. W. Earl Cowper, by Mr. Philips, fol. 1723, p. 3. 5. 8.

[LL] *And refused the New Year's Gifts, which it had been customary to present to those who held the Great Seal.* Bishop Burnet observes, that there was a general complaint made of Private Acts of Parliament, that they passed 'through both Houses too easily, and in so great a number, that it took up a great part of the Session to examine them,' though in a cursory manner, which was found very inconvenient. But, he says, the fees that were paid for these, 'to the Speakers and Clerks of both Houses, inclined them to favour and promote them.' Lord Somers proposed such a regulation concerning them, as it was supposed would prove beneficial for the future: and Lord Cowper, the Bishop adds, 'did very generously obstruct these Private Bills, as much as his predecessor, (Sir Nathan Wright), had promoted them. He did another thing of a great example. On the first day of the year, it was become a custom, for all those who practised in Chancery, to offer a New Year's Gift to the Lord who had the Great Seal. These grew to be so considerable, that they amounted to 1,500*l.* a year. On this New Year's Day (1706), which was his first, he signified to all who, according to custom, were expected to come with their presents, that he would receive none, but would break that custom. He thought it looked like the insinuating themselves into the favour of the Court; and that if it was not bribery, yet it came too near it, and looked too like it. This contributed not a little to the raising of his character. He managed the Court of Chancery with impartial justice, and great dispatch; and was very useful to the House of Lords, in the promoting of business (45).'

(45) Burnet, *ut supra*, p. 439.

[MM] *His manner graceful and noble.* His manner was celebrated by Pope. In his imitation of the Second Epistle of the Second Book of Horace, (l. 133, 134.) he introduces two Serjeants at Law complimenting each other in the following terms:

'Twas, "Sir, your law;"—and "Sir, your eloquence,"
' "Yours, Cowper's manner,—and yours, Talbot's sense."

son,

(i) Collins, *ubi supra*.

son, Spencer, became Dean of Durham (i). His eldest daughter, Lady Sarah Cowper, who is said to have been "distinguished for her sense and accomplishments (k)," died unmarried in 1758. His youngest, Lady Anne, was married, in 1731, to James Edward Colleton, Esq; of Haynes-hill in Berkshire, and died in 1750 (l).

(k) Hughes's Correspondence, vol. ii. p. 65.
(l) Collins, *ut supra*.

William, the second Earl Cowper, was twice married; in 1732, to Lady Henrietta, youngest daughter and coheir of Henry D'Auverquerque Earl of Grantham; and in 1750, to Lady Georgina, daughter to Earl Granville, and widow of the Hon. John Spencer, Esq; by whom she was mother of John Earl Spencer. By Lady Georgina, Lord Cowper had no issue; but by his first Countess, who died in 1747, he was father of George Nassau, now Earl Cowper, and of Lady Caroline, who was married, in 1753, to Henry Seymour, Esq; who was only son and heir of Francis Seymour, Esq; of Sherborne, in the county of Dorset, brother to Edward, the eighth Duke of Somerset of that family. The present Earl Cowper was created, in 1778, a Count of the Holy Roman Empire (m); and has resided some years at Florence.]

C O X (RICHARD), a learned Bishop in the XVIth century, was born at Whaddon in Buckinghamshire, of mean parentage (a), in the year 1499 (b). He had, probably, his first education in the small priory of Snellshall in the parish of Whaddon; but being afterwards sent to Eton-school, he was thence elected into a Scholarship at King's-college in Cambridge, of which he became Fellow in the year 1519 (c). Having the same year taken his Bachelor of Arts degree, and being eminent for his piety and learning, he was one of those bright Scholars, who were invited to Oxford by Cardinal Wolsey, to fill up his new foundation (d). He was accordingly preferred to be one of the Junior Canons of Cardinal-college (e); and on the 7th of December, 1525, was incorporated Bachelor of Arts at Oxford, as he stood at Cambridge (f). Soon after, performing his exercises, he was, on the 8th of February following, licensed to proceed in Arts, in which he took the degree of Master, July 2, 1526 (g). He was reputed one of the greatest Scholars of his age; and his poetical compositions were in great esteem among the best judges. His piety and virtue were not inferior to his learning, and commanded the respect of all impartial persons. But shewing himself averse to many of the Popish superstitions, and declaring freely for some of Luther's opinions, he incurred the displeasure of the Governors of the University, who stripped him of his preferment, and threw him into prison on suspicion of heresy (h). When he was released from his confinement, he left Oxford; and, some time after, was chosen Master of Eton-school, which was observed remarkably to flourish under his vigilant and industrious care (i). In 1537, he commenced Doctor in Divinity at Cambridge (k). And on the 4th of December, 1540, was made Archdeacon of Ely (l); as he was also appointed in 1541, the first Prebendary in the first stall of the same Cathedral, upon the new building of it by King Henry VIII. on the 10th of September 1541 (m). He was likewise, the 3d of June 1542, presented by the same King to the Prebend of Sutton with Buckingham in the Church of Lincoln, and installed the 11th of that month. But this he surrendered up in 1547 (n). In the year 1543, he supplicated the University of Oxford, that he might take place among the Doctors of Divinity there, which was unusual, because he was not then incorporated into that University, as Doctor in Divinity; nor was he so till June 1545 (o). When a design was formed, of converting the Collegiate Church of Southwell into a Bishoprick [A], Dr. Cox was nominated Bishop of it (p). On the 8th of January 1543-4, he was made the second Dean of the new-erected Cathedral of Osney near Oxford; and in 1546, when that See was translated to Christ-church, he was also made Dean there (q). These promotions he obtained by the interest of Archbishop Cranmer and Bishop Goodrich, to the last of whom he had been Chaplain; and, by their recommendation, he was chosen Tutor to the young Prince Edward, whom he instructed with great care in the true principles of religion, and formed his tender mind to an early sense of his duty, both as a Christian and a King (r). On that Prince's accession to the Throne, he became a great favourite at Court, and was made a Privy-Counsellor, and the King's Almoner [B]. The 21st of May, 1547, he was elected Chancellor of the University of Oxford (s); installed July 16, 1548, Canon of Windsor; and, the next year, made Dean of Westminster (t). About the same time he was appointed one of the Commissioners to visit the University of Oxon (u), in which he is ac-

[A] When a design was formed, of converting the Collegiate Church of Southwell into a Bishoprick, &c.] For, after the dissolution of the Monasteries, besides the six new erected Bishopricks of Oxford, Peterburgh, Gloucester, Bristol, Chester, and Westminster, the King intended to have erected new Bishopricks; at Dunstable in Bedfordshire, with 1140l. 5d. yearly revenue; Colchester in Essex with 1003l. 5d. Shrewsbury in the county of Salop; Bodmin with Launceston in Cornwall; and Southwell in Nottinghamshire. But, either the King's luxury and extravagance,

or the greediness of his courtiers, swallowed up the revenues wherewith they were to be endowed (1).

[B] And the King's Almoner.] This office was granted him *durante beneplacito*, during the King's pleasure: and he had afterwards a farther grant made him, of all the Goods and Chattels of Felons, as well within liberties as without, for the augmentation of the King's alms. *In augmentationem Eleemosynæ suæ, omnia Bona & Catalla Felonum de se tam infra Libertates quam extra, infra Regnum Angliæ habendi. quamdiu in Officio prædict. steterit* (2).

cused

cused of having much abused his commission [C]. In 1550, he was ordered to go down into Suffex, and endeavour, by his learned and affecting sermons, to quiet the minds of the people, who had been disturbed by the factious preaching of Day Bishop of Chichester, a violent Papist (w): and when the noble design of reforming the Canon Law was in agitation, he was appointed one of the Commissioners. Both in this and the former reign, when an act passed for giving all Chantries, Colleges, &c. to the King, through Dr. Cox's powerful intercession, the Colleges in both Universities were excepted out of that act (x). (x) *Ibid.* Soon after Queen Mary's accession to the Crown, he was stripped of his preferments; and on the 15th of August 1553, committed to the Marshalsea. He was indeed soon discharged from this confinement (y); but foreseeing the inhuman persecution likely to ensue, he resolved to quit the realm, and withdraw to some place, where he might enjoy the free exercise of his religion, according to the form established in the reign of King Edward (z). He went first to Strasburgh in Germany, where he heard with great concern of the rash proceeding of some of the English exiles at Franckfort (a), who had thrown aside the English Liturgy, and set up a form of their own, framed after the French and Geneva models [D]. On the 13th of March 1555, he came to Franckfort in order to oppose this innovation, and to have the Common-Prayer-Book settled among the English congregation there (b), which he had the satisfaction to accomplish [E]. Then he returned

(a) A brief Discourse of the troubles begonne at Franckfort, Anno Domini 1544. Printed in 1575, 4to. p. 6, 7.

[C] *In which he is accused of having much abused his commission.* For he, and the rest of the Commissioners, made a dreadful havock among the Libraries; destroying, burning, or selling for the vilest uses, all the illuminated books, such as had in them mathematical figures or other diagrams, under pretence that they tended to Popery or Conjurat[i]on: and also books of School-Divinity; and, in general, sparing very few that had been composed by Roman-Catholic authors (3).

[D] *Set up a form of their own, framed after the French and Geneva models.* Of which we have this account, 'After having perused the English Liturgy, it was concluded amongst them, That the answering aloud after the Minister should not be used; the litany, surplice, and many other things also omitted, because in the reformed Churches abroad such things would seem more than strange. It was farther agreed upon, that the Minister, in the room of the English Confession, should use another, both of more effect, and also framed according to the state and time. And the same ended, the people to sing a psalm in metre in a plain tune, as was and is accustomed in the French, Dutch, Italian, Spanish, and Scottish Churches: that done, the Minister to pray for the assistance of God's holy Spirit, and so to proceed to the Sermon. After the sermon, a general prayer for all estates, and for England, was also devised: at the end of which prayer was joined the Lord's Prayer, and a rehearsal of the Articles of the Belief; which ended, the people to sing another psalm as afore. Then the Minister pronouncing this blessing, The peace of God, &c. or some other of like effect, the people to depart. And as touching the ministrat[i]on of the Sacraments, fundry things were also by common consent omitted, as superstitious and superfluous (4).'

[E] *Which he had the satisfaction to accomplish.* The particulars of these remarkable transactions, were as follow. After the settling of the Form and Discipline mentioned in the last note, the Exiles advertised their dispersed countrymen at Strasburgh, Zurich, Weisfel, Emden, &c. of the singular benefit they enjoyed, of having a Church granted them, and endeavoured to persuade them, to come and join with them. Those at Strasburgh answered, That they had considered the contents of their letter, and perceived the effect of it was, to have one or two take the chief government of the congregation: and in case they could get Dr. Poinet, Mr. Scory, Dr. Bale, or Dr. Cox, or two of them, they should be well provided; if not, they would appoint one at Strasburgh, and another should come from Zurich. Accordingly, Mr. Grindall wrote to Mr. Scory at Emden, to desire him to accept of the office; but before his answer came, the congregation had chosen Mr. Knox, Had-don, and Lever, for their Ministers; not liking to have any Superintendent, as those at Strasburgh proposed, but to be governed by two or three Ministers of equal authority (5). In the mean time, several

members of the congregation were for retaining the English Liturgy, and did not approve of the Form set down in the last Note. This occasioning very great contention, it was at length agreed, on the 6th of February 1554, That another Form should be drawn up out of the English Liturgy, with some additions, to be used till the last day of April following. But Dr. Cox, and some others coming to Franckfort on the 13th of March, resolved to stand up for the English Liturgy. Accordingly, they answered aloud after the Minister; for which being reproved by the Seniors of the Congregation, they made answer, That they would do as they had done in England, and would have the face of an English Church. On the Sunday following, one of Dr. Cox's company going up into the pulpit without the consent of the congregation, read the Litany, whilst Dr. Cox and his company made the responses aloud. The same Sunday in the afternoon, Knox preaching, and reflecting upon these proceedings, was by Dr. Cox sharply rebuked for it. The Tuesday following was appointed to talk of these things more at large. When they were assembled, request was made, that Dr. Cox and his company should be admitted to have votes in the congregation. The others answered, That matters still in dispute amongst them ought first to be determined; and Dr. Cox and his friends subscribe to the Discipline, as the rest had done, before they were admitted into the congregation (6). Knox at last began to make intreaty, that they might have votes among the rest; to which some yielding, the majority came thereby to be on their side, and they were accordingly admitted. But immediately after, Dr. Cox forbade Mr. Knox to meddle any more in that congregation (7). The next day, complaint of this being made to one of the Magistrates, he ordered, That two on each side should consult and agree upon some good order for divine service, and make report of it to him. For that purpose, Dr. Cox and Mr. Lever were chosen on one side, and Mr. Knox and Whittingham on the other. But, when they came to a Conference, before they had gone through the Morning-service (Dr. Cox being very earnest for restoring the Liturgy, and the others as violent against it) they parted without coming to an agreement. The Puritans thereupon addressed the Senate, highly complaining of the others for endeavouring to force the English Liturgy upon them; and so far prevailed, that the Magistrates ordered the Congregation to agree with the French Church both in Doctrine and Ceremonies. Dr. Cox not being able to withstand the torrent, said, 'He had read the French order, and thought it to be both good and godly in all points, and therefore desired the congregation to obey the Magistrates commandment.' Requesting the magistrate at the same time, to shew unto him and his friends, his accustomed favour and goodness, notwithstanding their ill behaviour. Nevertheless, these did not rest here; but seeing that Knox was in great credit with many of the congregation, they accused him to the Senate of High-trea-

turned to Strasburgh for the sake of conversing with Peter Martyr, with whom he had contracted an intimate friendship at Oxford, and whom he loved and honoured for his great learning and moderation (c). After the death of Queen Mary he returned to England; and was one of those Divines who were appointed to revise the Liturgy (d). When a disputation was to be held at Westminster between eight Papists and eight of the Reformed Clergy, he was the chief champion on the Protestants side (e). He preached often before Queen Elizabeth in Lent; and, in his sermon at the opening of her first Parliament (f), exhorted them in most affecting terms, to restore religion to its primitive purity, and banish all the Popish innovations and corruptions. These excellent discourses, and the great zeal he had shewn in support of the English Liturgy at Franckfort, so effectually recommended him to the Queen's esteem (g), that in June 1559, she nominated him to the Bishoprick of Norwich (h); but her mind altering, she preferred him to the See of Ely, in the room of Dr. Thirlby, who was deprived (i). His *congé d'eslire* bore date July 15, 1559. He was elected the 28th day of the said month, had the Royal Assent December the 18th, was confirmed in the Church of St. Mary le Bow the 20th of the same month, consecrated at Lambeth the next day, and received the temporalities the 23d of March following (k). Before his consecration, he joined with Dr. Parker elect Archbishop of Canterbury, and the Bishops elect of London, Chichester, and Hereford, in a petition to the Queen, against an Act lately passed, for the alienating and exchanging the lands and revenues of the Bishops; and sent her several arguments from Scripture and reason against the lawfulness of it; observing withal, the many evils and inconveniencies both to Church and State that would thence arise (l). He enjoyed the episcopal dignity about twenty-one years and seven months, reckoning from the time of his consecration; and was, all that time, one of the chief pillars and ornaments of the Church of England. Both to Archbishop Parker, and his successor Grindal, he was very serviceable; and, by his prudence and industry, contributed to the restitution of our Church in the same beauty and good order, it had enjoyed in King Edward's reign. He was indeed no great favourite of the Queen; but that is to be imputed to his zealous opposition to her retaining the crucifix and lights on the Altar of the Royal Chapel [F], and his strenuous defence of the lawfulness of the marriage of the Clergy, against which the Queen had contracted a most inveterate and unaccountable prejudice. He was a great patron to all learned men, whom he found well affected to the Church; and shewed a singular esteem for Dr. Whitgift, afterwards Archbishop of Canterbury, whom he made his Chaplain, and to whom he gave the Rectory of Teversham in Cambridgeshire, and a Prebend of Ely (m). He did his utmost to get a body of Ecclesiastical Laws, (which was drawn up by Archbishop Cranmer, and other learned Divines, of whom himself was one, in the latter end of King Edward's reign) established by authority of Parliament [G]; but through the unreasonable

oppo-

son against the Emperor, his Son, and Queen Mary, on account of some virulent expressions of his against those Princes, in a book intituled *An Admonition to Christians*. Whereupon, the Senators commanded that he should preach no more till their pleasure were farther known; and soon after ordered him to depart the city of Franckfort (8). The 26th of March, Dr. Cox and his friends presented a petition to the Magistrates, subscribed by three Doctors, thirteen Bachelors of Divinity, and others, for the full use of the English Liturgy; which accordingly was established. When Whittingham was acquainted with it, he said, he did not doubt, but it might be lawful for him and others to join themselves to some other church. But Dr. Cox desired that it might not be suffered. Whereunto Whittingham answered, that it would be too great cruelty to force men, contrary to their consciences, to obey all their disorderly proceedings; offering, if the magistrate would be pleased to give them the hearing, to dispute the matter against all the contrary party, and prove, that the order which they sought to establish, ought not to take place in any reformed Church: but herein they were not indulged. The 28th of March, Dr. Cox assembled all the English Clergy to his lodgings, and having declared to them, how the Magistrates had granted them the use of the English Liturgy, he said, That he thought it requisite they should consult together, whom they thought fittest to be Bishop, Superintendant, or Pastor, with the rest of the officers, as Seniors, Ministers, and Deacons (9). When that was settled, Dr. Cox proceeded to form a kind of University, and appointed a Greek, and a Hebrew Lecturer, a Divinity-Professor, and a Treasurer for the contributions remitted from England (10). The Puritans offered, as their last refuge, to refer the whole matter to four arbitrators,

two chosen on each side; that it might appear where the fault lay, and they might have an opportunity of vindicating themselves from the guilt of Schism. But that proposal being rejected, they departed in a rage, and withdrew, some to Basil, and others to Geneva (11).

[F] *His zealous opposition to the Queen's retaining the Crucifix and Lights on the Altar of the Royal Chapel.* He scrupled for a great while to officiate there upon that account; and when he did it, it was with a trembling conscience, as he said. To excuse himself, and to give his humble advice to the Queen, he wrote to her a most submissive Letter (12); wherein he sets down certain considerations, why he could not yield to 'have Images set up in Churches.' And concludes in these words, 'yet my meaning is not hereby to enter into consideration of such as are otherwise minded, much less of your Majesty (God forbid) who I believe meaneth not to use the thing to any evil end. — Bear with me, most gracious sovereign; for the tender mercy of God, force not my conscience to fore (13).'

[G] *He did his utmost to get a body of Ecclesiastical Laws — established by authority of Parliament.* That was, the famous book intituled *Reformatio Legum Ecclesiasticarum*, compiled, by order of King Henry VIII. and Edward VI. out of the Canon and Civil Law. Thirty two persons were commissioned for that work, but the person who had the chief hand in it, was Archbishop Cranmer; and it was put into proper and elegant Latin, by Sir John Cheke, and Dr. Had- don, Regius Professor of the Civil Law in the University of Cambridge. For a farther account of that work, see Dr. Burnet's *History of the Reformation*, 2d Edition, Part I. p. 330. Part II. p. 141. 196. and Part III. p. 208. and Strype's *Ecclesiastical Me-*

opposition of some of the chief Courtiers, this noble design miscarried a third time. As he had, in his exile at Franckfort, been the chief champion against the innovations of the Puritans; so he now continued, with some vigour and resolution, to oppose their attempts, against the Discipline and Ceremonies of the Established Church. At first he tried to reclaim, or win them over, by gentle means; but finding, that, instead of behaving themselves with due moderation, they only grew more audacious, and reviled both Church and Bishops in scurrilous libels, he thought timely severities necessary (n). Therefore he wrote to Archbishop Parker, to go on vigorously in reclaiming or punishing them, and not be disheartened at the frowns of those Court-favourites who protected them; assuring him, that he might expect the blessing of God on his pious labours, to free the Church from their dangerous attempts, and to establish uniformity. When the Privy-Council interposed in favour of the Puritans, and endeavoured to screen them from punishment, he wrote a bold letter to the Lord-Treasurer Burleigh; wherein he warmly expostulated with the Council, for meddling with the affairs of the Church, which, as he said, ought to be left to the determination of the Bishops; admonished them to keep within their own sphere; and told them he would appeal to the Queen, if they continued to interpose in matters not belonging to them (o). He is blamed by some (p) for giving up several manors and other estates belonging to his See [H]; but he rather, in some respects, deserves commendation, for his great firmness in resolving to part with no more, and for being proof against the strongest solicitations, and most violent attacks. Several he had to encounter, even from those who were most in favour at Court, and who were backed by Royal Command and Authority. In the years 1574 and 1575, Sir Christopher Hatton, a noted favourite of the Queen, endeavoured to wrest Ely-House in Holborn from him (q); so that, in order to preserve it to his See, he was forced to have a long and chargeable suit in Chancery, which was not determined in 1579 (r). The Lord North also attempted, in 1575, to oblige him to part with the manor of Somersham, in Huntingdonshire, one of the best belonging to his Bishoprick; and with Downham Park (s); which he refusing to yield, that Lord endeavoured to stir up the Queen's indignation against him, and do his utmost to have him deprived. For that purpose, North, and some others of the Courtiers, examined and ransacked his whole conduct since his first coming to his See, and drew up a large body of articles against him, which he was to give answers to before the Privy-Council (t). But the Bishop, in his replies, so fully vindicated himself from all aspersions, and so clearly confuted the groundless and malicious calumnies of his enemies, that the Queen was forced to acknowledge his innocence (u); though the Lord North boasted, he had found five *Praemunire's* against him (w). However, vexed and wearied with the implacable malice of the Lord North, and other his adversaries, he desired, in 1577, leave to resign his Bishoprick (x); but the Queen put him off (y). North, though disappointed in his former attempt, yet not discouraged thereby, brings three actions against the poor old Bishop for selling of wood (z); whereupon the Bishop offered again, in 1579, to resign; provided he had a yearly pension of two hundred pounds out of his See, and Donnington, (the least of five country houses belonging to Ely Bishoprick) for his residence during life (a). The Lord-Treasurer Burleigh, at the Bishop's earnest desire, obtained leave of the Queen for him to resign; and in February 1579-80, upon the Bishop's repeated desires, forms of resignation were actually drawn up (b). But the Court could not find any Divine of note, who would take that Bishoprick on their terms, of surrendering up the best manors belonging to it. The first offer of it was made to Freak Bishop of Norwich; and, on his refusal, it was proffered to several others; but the conditions were so ignominious and base, that they all rejected it; by which means Bishop Cox enjoyed it till his death, which happened on the 22d (c) of July 1581, in the 82d year of his age (d). By his will he left several legacies, amounting in all to the sum of nine hundred and forty-five pounds; and died worth, in good debts, two thousand three hundred and twenty-two pounds (e). He had several children [I]. His body

morials, Vol. II. p. 303. and Life of Cranmer, book I. ch. 30. It was first published, in 1571, by Archbishop Parker, or John Fox, with a preface; and again in 1640, 4to. The most probable reason why those Laws were never suffered to be confirmed by Parliament, is that assigned by Dr. Burnet (14), because it was found more for the greatness of the Prerogative and the Authority of the Civil Courts, to keep those points undetermined.

[H] *Giving up several manors and other estates belonging to his See.* In 1562, he alienated to Queen Elizabeth, the manors of Hatfield, Little Hadham, and Kelsall. Moreover, he gave up East Dereham, Pulham, Bridgeham, the Hundred and manor of Mitford, the manors of Terrington, Walpole, West-Walton, Brandon, Westeringate, Battlesden, Hecham, Harthurst, Berking, and Totteridge, in the counties of Norfolk, Suffolk, Hertford, and Bedford, of the yearly value of 695 *l.* 11 *s.* 4 *d.* in lieu of which, the

Queen granted him, the tenths of his Diocese amounting to 384 *l.* 14 *s.* 9 *d.* per Annum, and the Improvements of Gildon-Morden, Swaffham-Bulbeck, Stokequi, Waterbech, St. Giles Cambridge, Comberton, Hinxton, Harleston, Swavesey, and Drayton, of the value of 207 *l.* 10 *s.* So that, as Browne Willis, Esq; observes, he parted with about 700 *l.* a year of the old Demesnes, being a third part of the Revenues of the Bishoprick (15). Before, whilst he was Dean of Christ-Church, he had alienated the Parsonage-glebe, and a manor, at Harrow on the Hill; and the Rectory and Advowson of Preston on Stour in Gloucestershire, and Priory of Clatercote in Oxfordshire (16).

[I] *He had several children.* Namely, John, whom he made his executor; Richard, who was knighted, and a Justice of Peace for Ely. After his father's decease, he had a Grant from the Crown, of Dodington manor and palace. The Bishop had also two daughters, married, to John Parker, and John Duport, Prebendaries

body was interred in Ely-cathedral, near Bishop Goodrich's monument, under a marble stone, with an inscription; which having been defaced, there are only four verses of it [K] now legible (f). Divers things, of which he was author, have been published, chiefly since his decease [L]. As to his character; He was a man of a sound judgment, and clear apprehension, and attained to great perfection in all polite and useful learning. He wanted no advantages of education, and improved them with such diligence and industry, that he soon became an excellent proficient both in divine and human literature. The Holy Scriptures were his chief study; and he was perfectly well versed in the original language of the New Testament. He was extremely zealous for the true interest of our Reformed Church, and a constant and vigorous defender of it against all the open assaults of its Popish adversaries, and of the Puritans (g). He is accused by some (b) of having been a worldly and covetous person; and is said to have made a great havock and spoil of his woods and parks, feeding his family with powdered venison to save expences. Several

[L] Divers things, of which he was author, have been published chiefly since his decease.] They are, I. ' An Oration at the beginning of the Disputation of Dr. Tresham and others with Peter Martyr.' II. ' An Oration at the conclusion of the same.' These two Orations, which are in Latin, were printed in 1549, 4to. and afterwards among Peter Martyr's works. The second is also printed in the Appendix to the Memorials of Archbishop Cranmer, by J. Strype (20). III. He had a great hand in compiling the first *Liturgy of the Church of England*: and was one of the chief persons employed in the review of it in 1559 (21). IV. He turned into verse the Lord's Prayer, commonly printed at the end of Sternhold and Hopkins's Psalms. V. When a new Translation of the Bible was made in the reign of Queen Elizabeth, now commonly known by the name of *the Bishop's Bible*, the *Four Gospels*, the *Acts of the Apostles*, and the *Epistle to the Romans*, were allotted to him, for his portion (22). VI. He wrote, ' Resolutions of some Questions concerning the Sacraments;' in the collection of Records at the end of Dr. Burnet's History of the Reformation (23). VII. He had a hand, in the ' Declaration concerning the Functions and Divine Institution of Bishops and Priests (24);' and in the ' Answers, to the ' Queries concerning some abuses of the Mass (25). ' VIII. Several Letters, and small pieces of his, have been published by the industrious Mr. Strype, in his *Annals of the Reformation*: namely, 1. A Letter to Wolfgang Weidner at Wormes, 20 May 1559 (26). 2. To the Queen, wherein, he excuses himself for refusing to minister in the Royal Chapel, on account of the Crucifix there (27). 3. To Bullinger, on occasion of his answer to the Pope's Bull against the Queen (28). 4. To the Queen, upon her requiring his house in Holbourn for Mr. Hatton (29). 5. To the same, upon her desiring him to surrender Somersham (30). 6. Reasons sent to the Lord Burghley to tender the state of God's Ministers (31). 7. Answers to the accusations of the Lord North, and others against him (32). 8. To the Lord Burghley, upon the Queen's having ordered Archbishop Grindall to be suspended (33). 9. Letter congratulatory to the Queen in her progress, and to excuse himself for not waiting upon her (34). 10. To the Lord Burghley, upon the Queen's granting him leave to resign his Bishoprick (35). 11. To the same, informing him he had received intelligence, that twelve

thousand Spaniards were to be sent by the Pope and Spaniard against the realm, 1580 (36). 12. Account of his conference with Dr. Fecknam (37). 13. To the Lord Burghley, of the ill state of St. John's College Cambridge, for want of Statutes (38). 14. Proofs and Evidences from ancient Grants, to show, that his Manor and House in Holborn is exempt from the jurisdiction of the city of London (39). He also had a hand in Lily's Grammar.

(36) Ibid. p. 139.
(37) Ibid. p. 142.
(38) Ibid. p. 156.

(39) Appendix to Vol. iii. p. i. No. lviii. p. 124.

* * [Of Bishop Cox it is said, in the preceding article, that his poetical compositions were in great esteem among the best judges. Encomiums of this kind are frequent among our old Biographical writers, when there were very slender grounds for applause. The good Bishop's version of the Lord's Prayer, at the end of Sternhold and Hopkins's Psalms, will scarcely serve to raise him high in the character of a Poet. Perhaps he might compose some Latin verses in his youth, which is a common thing with those who have received a classical education; and it is probably upon this foundation that a great number of authors are represented as having been Poets, by Leland, Bale, and Anthony Wood, though there are no works remaining which can justify such assertions.

If it be true, as is asserted in note [C], that Bishop Cox, in conjunction with the rest of the Commissioners, made a dreadful Havock among the libraries at Oxford, his memory, so far as this matter is concerned, deserves to be held in execration. The bigotry and false zeal of reformers have done infinite mischief to the interest of knowledge and literature. Many manuscripts, and monuments of antiquity, have hence been destroyed, which were highly worthy of preservation, either for their beautiful execution, or the light they were calculated to throw on the history, sentiments, and manners of former ages. Even the books of School-divinity, which excited the indignation of our Prelate, might have been permitted to rest in the oblivion to which they were tending.

When Bishop Cox could not reclaim, or win over, the Puritans by gentle means, *he thought timely severities necessary*. Such hath ever been the plea for persecution; and if this plea is to be esteemed valid, all the cruelties will be justified which have been exercised on a religious account, and which have reflected so much disgrace on human nature. The conduct of our Prelate can only be extenuated by a consideration of the narrow spirit of the times in which he lived.

Upon the whole, this Bishop, though certainly a learned, and probably a good man, does not appear to have been of an amiable temper; and his faults were too numerous to render him the object of very high estimation.

A letter written by him, in 1569, directed to the Parson of Downham, and found in the parish chest of that place, has lately been published in the Gentleman's Magazine. It relates chiefly to the state and condition of the poor, before the statutes of the 14th and 43d of Queen Elizabeth were enacted; and it shews that the Bishop was animated with a very laudable zeal for engaging persons of wealth and substance to contribute liberally, cheerfully, and charitably to their indigent neighbours (40).]

(40) Gentleman's Magazine for Dec. 1786. K. p. 1041.

complaints, and long accusations, were exhibited against him and his wife, in 1579, to Queen Elizabeth, upon these accounts, by some false and evil disposed persons; but the Bishop fully vindicated himself, and shewed, that all these complaints were nothing but malicious calumnies, and groundless imputations (i). It is likewise said, that he appears to have been of a vindictive spirit, by reason of his prosecution of, and severity to, the deprived Catholics in his custody; and especially by his complaints against Dr. Feckenham the last Abbot of Westminster (k). But the Bishop alleges in his own excuse, that the Doctor was a very troublesome guest, and good for nothing (l): and that his endeavours to convert him, were by order of the Court (m). It must be remembered of this Bishop, that he was the first who brought a wife to live in a College (n); and that he procured a new body of Statutes for St. John's College in Cambridge, of which, as Bishop of Ely, he was Visitor (o).

* * [C O X (Sir RICHARD), Bart. Lord Chancellor of Ireland, and author of a History of that kingdom, was son to Richard Cox, Esq; Captain of a Troop of Horse [A], and was born at Bandon, in the county of Cork, on the 25th of March, 1650 (a). He had the misfortune to become an Orphan before he was full three years of age; and was then taken care of by his mother's father, Walter Bird, Esq; of Cloghnakilty. But his grandfather also dying when he was about nine years old, he was then taken under the protection of his uncle, John Bird, Esq; who placed him at an ordinary Latin school at Cloghnakilty, where he soon discovered a strong inclination to learning. He seems, however, to have been very ill provided with books: for it is said, that having no other school-book but a Grammar, he constantly transcribed his lessons from the books of his school-fellows; by which means what he learned was deeply imprinted on his mind, and his writing was wonderfully improved without the assistance of a master. At this school he continued till he had acquired as much knowledge as was to be obtained in such a situation; and not having a fortune adequate to the expences of a regular education, he spent three years in the country, not in indolence, or dissipation, but in the perusal of such histories as he could procure the use of (b). In 1668, having attained the age of eighteen years, and being of a vigorous and active mind, he resolved to engage in some profession, which might tend to promote his advancement in the world. Accordingly by his uncle's consent, and under his countenance, he practised as an Attorney in several Manor Courts, where his uncle was seneschal, for three years: during which period, besides supporting himself decently, he laid up the sum of fifty pounds. He was now of age, and in possession of his father's lot for his arrears, which fell in Galway, and yielded twenty-six pounds *per annum*. Besides which he sold an interest near Kilworth, which was left to him by his grandfather, for an hundred and fifty pounds; and with this small stock, he resolved to apply himself closely to the study of the law, with a view of being called to the Bar; and was accordingly entered at Gray's Inn in September, 1671. Here he was so much distinguished by his great assiduity, and consequent improvement, that in the summer of 1673 he was made one of the Surveyors at Sir Robert Shaftoe's reading. The Reader fell ill two days before he was to perform his part in the Hall, and Mr. Cox was pitched upon by Sir Robert himself to supply his place. Though the warning was short, yet he argued the Reader's case so much to the satisfaction of a numerous auditory, that he was called to the Bar on the Monday following with great applause (c); and was offered very considerable advantages by Sir Francis Radcliff, afterwards Earl of Derwentwater, to settle near him in the North of England. These offers, however, he gratefully declined, and returned to Ireland the same year. He soon after married Mrs. Mary Bourne, a Lady who had a right to a considerable fortune, and of which he naturally expected to obtain possession. But her fortune being in the hands of her mother, a woman of bad œconomy, it was drawn from her in such small sums, and with so little satisfaction, that Mr. Cox, whose education at Gray's Inn had consumed the greater part of his small fortune, was disabled and discouraged from pushing forward in his profession. This disappointment so much affected him, that in a fit of despondency, very unsuitable to the other parts of his life, he took a farm near Cloghnakilty, to which he retired for seven years. Being at length roused from his lethargy, by a great increase of his family, he was, by the interest of Sir Robert Southwell, who was much attached to him, elected Recorder of

(b) Harris, ubi supra, p. 208.

(c) Id. *ibid.*

[A] Son to Richard Cox, Esq; Captain of a Troop of Horse. Richard Cox, Esq; Captain of a Troop in Major-general Jephson's Regiment of Horse, first employed in the service of King Charles, afterwards of the English Parliament against the Irish Rebels, was third son to Michael Cox, a younger son of a reputable family, fixed for many years at Bishops-Cannings, near Devizes, in Wiltshire, and descended from Dr. Richard Cox, one of the Compilers of the Liturgy, Tutor to King Edward VI. and in the reign of Queen Elizabeth Bishop of Ely. Captain Richard Cox was a man of great

strength and courage, and signalized himself in several battles against the Irish; but was in July, 1651, basely murdered by Captain Norton of the same regiment, by a stab with a pen-knife in his back; and his widow pined and languished until the winter of the year 1652, and then died (1). Sir Richard Cox's mother was Catharine, daughter to Walter Bird, of Cloghnakilty, Esq; first married to Captain Thomas Batten, who was killed at the Siege of Dungarvan in the county of Waterford (2).

(d) Harris, *ubi supra*, p. 208.

Kinfale in the year 1680. He now removed to Cork, where he practised in the profession of the law with great success (d).

But it is necessary here to relate an incident of his life, which happened some time before his being appointed Recorder of Kinfale, and which considerably operated upon his future fortune. In April, 1679, he was chosen Chairman at the Quarter-sessions for the county of Cork. It was at a critical period, at a time when it was fashionable for all persons, who were solicitous to recommend themselves at Court, to ridicule the Popish Plot. Mr. Cox, however, being a zealous Protestant, took occasion, in his charge, to expose the cruelties, and the impostures of Popery, with such spirit and acuteness, that he greatly animated the Protestants, and as highly exasperated the Papists. The former, considering him as having rendered them an important service, by a charge which they regarded as very seasonable, publicly returned him thanks for it in a body; and one of them said, that "he must expect, that the revenge of the Papists, if ever it fell into their power, " would be proportioned to his merit with the Protestants." Mr. Cox replied, that "he " was not in danger; for he had studied them thoroughly, and therefore would never " trust them, nor live under their jurisdiction." Accordingly in 1687, when the Earl of Tyrconnel was become Lord-deputy of Ireland, Mr. Cox, foreseeing the storm that would fall on the Protestants, quitted his practice, which was then very considerable, and his estate, which at that time amounted to 300*l. per annum*, and removed with his wife and five children to England, and settled at Bristol (e). Great numbers of Protestants quitted Ireland about the same time with Mr. Cox [B]. At Bristol, he was treated with much kindness and generosity, as a sufferer for the Protestant Religion; and he obtained sufficient practice in his profession to support his family genteely, independently of his Irish estate (f). At his leisure hours, he compiled the History of Ireland, the first part of which he published soon after the revolution, in 1689, under the following title: '*Hibernia Anglicana*; or the History of Ireland, from the Conquest thereof by the English, to this present Time [C]: with an introductory Discourse, touching the Antient State of that Kingdom, &c.' He dedicated this work to King William and Queen Mary [D]; and

(e) Harris, *ubi supra*, p. 209.

(f) *Id. ibid.*

[B] *Great numbers of Protestants quitted Ireland about the same time with Mr. Cox.* Dr. Leland, speaking of the elevation of Tyrconnel to the office of Lord-deputy of Ireland, says, 'To this Popish delegate of a Popish Prince, Lord Clarendon resigned the Sword of State, in a general and violent agitation of the kingdom. He embarked at the port of Dublin, attended by fifteen hundred Protestant families of Dublin, who abandoned a country where the peace, the property, and the lives of Protestants, were exposed to the malice of the meanest and most malignant of a party now exulting in the fulness of their triumph, with their friend and patron in supreme authority, attended by Popish ministers and officers of State (3).'

(3) History of Ireland, vol. iii. p. 502.

[C] *Hibernia Anglicana; or the History of Ireland, from the Conquest thereof by the English, to this present time:* Our author brought his History of Ireland no lower than the year 1653; but at the end of his second part is 'A brief Account of the Transactions in that Kingdom, since 1653,' written by another hand, which brings the History down to the landing of King James at Kinfale, and the Siege of Londonderry.

Some of the laws passed in Ireland, as recorded by Sir Richard Cox, are curious. In 1465, it was enacted,

'That any body may kill thieves, or robbers, or any person going to rob or steal, having no faithful men of good name, in English apparel, in their company.'

'That the Irish within pale shall wear English habit, take English names, and swear allegiance, upon pain of forfeiture of goods.'

'That English and Irish, speaking English, and living with the English, shall have an English bow and arrows, on pain of two-pence (4).'

(4) *Hibernia Anglicana*, Part i. p. 169.

In 1472, it was likewise enacted, 'That every Merchant shall bring twenty shilling's worth of bows and arrows into Ireland, for every twenty pound's worth of other goods he imports from England (5).'

(5) *Ibid.* p. 171.

In 1494, 'That the soldier shall pay three-half-pence a meal, and his man a penny, and a penny for six field-sheaves of oats, and litter accordingly; and whoever refuses to quarter soldiers at this rate, forfeits twelve-pence a time, unless he be a man of

'twenty marks estate *per annum*, and except cities and corporate towns (6).'

(6) *Ibid.* p. 189.

In 1537, 'That no subject shall be shaved above his ears, or wear glibbs, or crommeals, (i. e. hair on the upper lip) or linen died in saffron, or above seven yards of linen in their shifts; and that no woman wear any kirtle, or coat tucked up, or embroidered, or garnished with silk, or couched, nor laid with usker, after the Irish fashion, and that no person wear mantles, coats, or hoods, after the Irish fashion, (except women, horse boys, cow-boys, and soldiers, all which may wear mantles;) and that every body shall endeavour to learn the English language, and conform to the English fashion.'

'And that benefices shall not be given to any that cannot speak English, unless after four proclamations in the next market-town to the benefice, on four several market-days, a person that can speak English, cannot be got; and that then an honest able Irishman may be admitted, on his oath, that he shall do his utmost endeavour to learn the English language, and observe the English order and fashion, and teach those under him to do the like, and shall keep an English school in his parish to that purpose (7).'

(7) *Ibid.* p. 250.

In 1537, it was made treason "to marry with the child of any man who had not sworn allegiance

"(8);" but this law was repealed, 11 Jac. I. cap. 5. In 1542, 'that larceny above the value of fourteen-pence shall be punished with the loss of one ear the first time, and the other ear the second time, and the third time with death (9).'

(8) *Ibid.* p. 251.

(9) *Ibid.* p. 271.

'No horseman shall keep more boys than horses, on pain of twenty shillings.'

'That Noblemen shall have but twenty cubits, or bundles of linen, in their shifts, horsemen eighteen, footmen sixteen, garçons twelve, clowns ten; and that none of their shirts shall be dyed with saffron, on pain of twenty shillings (10).'

(10) *Ib.* p. 272.

[D] *Dedicated this work to King William and Queen Mary.* Though Mr. Cox was a native of Ireland, he expressed himself in his dedication, as well as in other parts of his work, in a manner that would not be agreeable to the inhabitants of that kingdom at the present period. In his dedication, he says, 'It is of great advantage to it (Ireland), that it is a subordinate kingdom to the Crown of England; for it

and in the following year published the second part of it. Bishop Nicolson, speaking of the first part of it, says, 'It was published at a time when Ireland was the seat of war and desolation, under the guidance of the late unfortunate King James the Second; which raised an extraordinary curiosity in inquiring after the affairs of this kingdom. This obliged the Author to hasten the continuation of his History; the second part whereof was, early in the next year, recommended to the press by two Secretaries of State (g). Such encouragements as these pushed the work a little too fast forward; so that it came into the world in somewhat of a looser dress than was, most certainly, at first intended by the compiler: who nevertheless found his own account in it; being soon after advanced to the highest posts of honour in the law (h).'

(g) The Earls of Shrewsbury and Nottingham.

(h) Irish Historical Library, p. 19, edit. 1776.

During the residence of Mr. Cox at Bristol, the vicinity of that city to Kingsweston afforded him opportunities of cultivating a more intimate acquaintance with Sir Robert Southwell; of whom we are told, that "the world could not shew a man of more religion, virtue, and wisdom (i)." He was, to the end of his life, a sincere and active friend, and great benefactor to Mr. Cox; who, on his part, ever retained the utmost respect and affection for Sir Robert. Mr. Cox had also the honour to be so much in the esteem and confidence of the first Earl of Burlington, that a constant correspondence was kept up between them; and from letters written by the Earl, it appeared, that his Lordship seldom did any thing of importance without first consulting Mr. Cox, of whose fidelity he had a high opinion, and whom he considered as having done him more service than all the world besides (k). This friendship continued during the whole of the Earl's life, and descended to his grandson, Henry Boyle, afterwards Lord Carleton (l).

(i) Harris, ut supra.

(k) Id. ibid.

(l) Id. ibid.

When the Prince of Orange arrived in London, Mr. Cox immediately left Bristol, and repaired to the metropolis; and the great question being then agitated, whether the Prince of Orange should be King or Regent, Mr. Cox printed 'A Sheet of Aphorisms, proving, by a fair deduction, the Necessity of making the Prince of Orange King, and of sending speedy Relief to Ireland;' and he presented a copy to every Member who entered the Parliament House on the first day of the Convention. After the important business of the Revolution was accomplished, and the Prince and Princess of Orange were declared King and Queen, Mr. Cox published half a sheet, intitled, "A brief and modest Representation of the present State and Condition of Ireland;" which was intended to excite the attention of the Legislature to the affairs of that kingdom, and to induce them to afford speedy relief to the Protestants there. His zeal for the promotion of the Revolution having been observed, and his abilities being well known, it was proposed, that he should go to Ireland as Secretary to the Duke of Schomberg. But that offer he thought proper to decline, on account of his not being acquainted with the French language (m). However, when his Majesty himself resolved to go in person to Ireland, Mr. Cox accepted the post of Secretary to Sir Robert Southwell, then appointed principal Secretary of State, and took upon him the chief care and business of that office.

(m) Id. ibid.

In this situation, Mr. Cox's knowledge of business, and dexterity in the management of it, greatly recommended him to the King. The most secret dispatches of the office, and the greatest part of the intelligence, passed through his hands (n). Of the goodness of his intelligence, as well as of his sagacity, a particular instance occurred, which made a very favourable impression on his Majesty. Before the Battle of the Boyne, there were in the English Camp several strong reports of the number and strength of the enemy, which Sir Robert Southwell, upon the credit of Mr. Cox, affirmed to the King to be false. But a day or two before the action, an officer came from the Irish Camp, and stated to his Majesty the posture and number of the enemy, in such magnified, and yet such regular and plausible terms, that the King was much disconcerted, and told Sir Robert, that "he was certainly misinformed, and the Irish Forces were more than he imagined." Sir Robert immediately imparted the King's doubts, and the reasons of them, to Mr. Cox. He insisted on the goodness of his intelligence, and desired that the officer might be led from the King's presence about the English Camp. When he had surveyed it at his leisure, he was asked, "what he computed the number of the English Forces to be?" He confidently affirmed them to be more than double that number of which the King knew them to consist. His Majesty was then convinced, that the officer was a superficial and inaccurate observer, and was much pleased at the manner in which this was discovered (o).

(n) Ibid. p. 210.

(o) Id. ibid.

Upon King William's march to Dublin, after his signal victory over King James at the Boyne, he published his Declaration, called, "The King's Declaration at Finglas." This was drawn up by Mr. Cox, and not a single word was altered of the first draught; of which his Majesty was pleased to say, "that Mr. Cox had exactly hit his own mind (p)." After the surrender of Waterford, Mr. Cox was immediately made Recorder of that city;

(p) Id. ibid.

' it is from that Royal fountain that the streams of justice, peace, civility, riches, and all other improvements have been derived to it; so that the Irish are (as Campion says) beholden to God for being conquered. And yet Ireland has been so blind, in this great point of its true interest, that

' the natives have managed almost a continual war with the English, ever since the first conquest thereof; so that it has cost your Royal predecessors an unspeakable mass of blood and treasure, to preserve it in due obedience.'

and

and his Majesty, sensible of the importance and fidelity of his services, and being willing to reward him in such a manner as should be most agreeable to himself, commanded Sir Robert Southwell to ask him what employment he would choose. The office which he mentioned, as most acceptable to him, was that of Second Justice of the Court of Common Pleas; and accordingly he was sworn into that office, on the fifteenth of September, 1690. He was now fixed in a respectable post, of his own choosing, of moderate profit, and little business; and in this situation he hoped to be able to employ a great part of his time in the study of history, which was his favourite pursuit. It was his design to revise his History of Ireland, which he was sensible had been published too hastily, and would admit of great additions and improvements (q). But he was found too useful a person to the Government, to be long suffered to enjoy the quiet for which he wished; and, therefore, was sent with Robert Rochfort, Esq; one of the Commissioners of the Great Seal, in October, that year, to execute a Commission of Oyer and Terminer at Athirdee and Drogheda; and in December with Sir Richard Pine, another of the Commissioners of the Great Seal, to execute a similar commission at Wexford, Waterford, and Cork. They were also entrusted with an absolute power of ordering and commissioning the Militia, delivering out arms and stores to them, and of granting protections to all those Rebels who were willing to submit to his Majesty. The Commissioners proceeded to execute their trust with so much zeal and diligence, that General Ginkle, by a letter from Clonmell, applied to them, among their other inquiries, to inspect the behaviour of the officers and soldiers in Garrisons, that, upon their report, he might reform abuses, and punish the offenders. The good conduct of the Commissioners in a great measure restored peace and order to the country through which they passed: and in January, Mr. Justice Cox received a letter from Lord Sidney, dated at Whitehall, 'acknowledging the great zeal and affection, which, upon all occasions, he had shewn for his Majesty's Service; and assuring him, that it would be remembered to his advantage (r).'

(q) Harris, *ubi supra*.

(r) *Ibid.* p. 211.

In March, 1691, Lord Chief Justice Reynel, and Mr. Justice Cox, went Judges of Assize to Cork and Waterford, which were the only places in Munster absolutely in the power of the English; and they carried instructions for promoting peace, and securing those two counties, and also a Commission for inspecting the stores of war, and for inquiring into embezzlements. Among their instructions was one, which was extremely cruel and arbitrary; but we are told, that it was "so wholesome, and attended with so good circumstances, that it is fit to be recorded (s)." It was as follows: "That as often as any murder, or robbery, shall be committed within his Majesty's quarters, all such parents in that county, who have sons in the enemies quarters, shall be apprehended and sent to the common gaol, until reparation made, or they be otherwise delivered by due course of law." And we are informed, that "the strict execution of these instructions contributed greatly to the settlement of those two counties, even before the war was finished in other parts of the kingdom (t)." In April, the same year, the Lords Justices sent for Mr. Justice Cox, and acquainted him, that it was their intention to appoint him Governor of the county and city of Cork; and that they expected, that he would immediately repair to his post, in order to put the Militia into a posture of defence with all possible expedition. He was sensible of the weight of such a charge, at a time when both sides would probably make their utmost efforts for victory in the field; and that he should have much to answer for, if matters should not succeed well with him in that large county, at so critical a period. He, therefore, endeavoured to decline the acceptance of the office, by urging his want of military knowledge. But Lord Coningsby replied, 'That he was a popular man, and beloved by the Protestants, and that his zeal would supply his want of military skill.' Being at length prevailed upon to undertake the office, that he might be enabled to answer the expectations that were formed of him, he desired, that he might be supplied with sufficient arms and ammunition; and that positive orders should be sent, that no affront should be offered on any occasion to the Militia by the Army; that the regular troops should be posted in such a manner, that no dispute might arise about precedence; and that seven regiments of the Regulars should be ordered to join in defence of that county. These requisitions were all complied with; and he arrived at Cork, on the 5th of May, furnished with ample powers for the execution of his office, and also with a Commission of Oyer and Terminer (u).

(s) *Id. ibid.*

(t) *Id. ibid.*

(u) *Id. ibid.*

The situation of Mr. Cox, as a Judge, and a military Governor, was somewhat singular; and he was certainly not deficient in zeal for the Government, whatever objections may be made to his conduct on the principles of justice and humanity. A proclamation, which was issued by him on the 18th of the same month, was extremely arbitrary and severe. All Papists were forbidden by it 'to be out of their dwellings, from nine at night till five in the morning, or to be found two miles from their places of abode, except in a highway to a market-town, and on market-days, or to keep or conceal arms or ammunition, on pain of being treated as rebels.' It was likewise ordered, 'That hue-and-cry should be made after murderers or robbers; and that all persons should, on their allegiance, enlist themselves in the Militia; and that none should traffick, correspond with, or send provisions to the enemy, or shelter or entertain Tories, Raparees, &c. that no protected person

(w) Harris, *ubi*
supra, p. 212.

‘ person should desert his habitation, or go to the enemy, or otherwise absent himself above three days, on pain of the imprisonment of his wife and family, and the demolishing of his house.’ It concluded, with promising ‘ *impartial justice*, without distinction of nation (w).’ This proclamation, we are told, produced wonderful effects; and by the help of it, and by Governor Cox’s care to place the Gentlemen of the county in the Militia according to their quality and fortune, he raised in three weeks eight regiments of Dragoons, and three of Foot. The men entered so cordially into the service, that they were not long in learning discipline, and soon became capable either of attack or defence (x). When the English army was ready to take the field, the Lords Justices sent the Governor full instructions for his conduct, and particularly empowering and directing him to try the Militia for breach of military discipline, and to administer to them an oath of allegiance to the King and Queen, and of obedience to their officers. In a letter from the Lords Justices, dated the 23d of May, he was also told, ‘ that if any thing happened amiss in his county, it would lie at his door; and that, therefore, since the army was marched every where, it concerned him to be more than ordinarily vigilant.’ This language might have intimidated a man of less resolution than Governor Cox; and the rather, as the strongest garrison of the Irish, that of Limerick, was not far from the borders of his county. But he had put the county into such a state of defence, and so well disciplined the Militia, that when he found the English army was entering on action, he wrote to General Ginkle, “ that if he wanted, he could spare him five regiments of the seven he had of the army to defend the county.” This offer was very thankfully accepted by the General, who accordingly drew off one regiment of Horse, one of Dragoons, and three of Foot. Indeed, the Cork Militia had acquired so high a reputation, that in August General Ginkle wrote for one thousand of them to assist him at the Siege of Limerick; and they were posted at Killaloe, a pass of great importance, which they effectually secured, as long as the General thought it necessary (y). And on this occasion an instance occurred of Governor Cox’s conduct, which was afterwards highly commended by the great Duke of Marlborough. The detachment from the city of Cork, which was to complete the thousand men to go to Limerick, consisted of 160; who grew mutinous in their march, and at last absolutely refused to leave their county; so that their Commander, Colonel Rogers, after having ineffectually endeavoured to bring them to compliance, rode to the Governor, and complained of their disobedience. The Governor calmly answered, that he would make them march. Accordingly, accompanied by several Gentlemen, he came up to the head of the refractory men, and assuming as much severity in his countenance as he could, he asked them, Why they did not march? One of them then began to answer for the rest: but the Governor stopped him short, and said, ‘ That he scorned to make use of the power which the Government had given him to punish them, considering that some of them might be *cuckolds*, and some *cowards*, whose company he did not desire; but that he was sure there were many among them, who loved their King and country, and were not afraid to fight for them; and that such would follow him. As to the rest, they had liberty to return to their own houses.’ They all instantly and eagerly pressed forward, and did signal service at the siege (z).

(x) *Id. ibid.*

(y) *Id. ibid.*

(z) *Id. ibid.*

During the time of Mr. Cox’s Government, which continued till the reduction of Limerick, though he had a frontier of eighty miles extent to defend, and twenty places to garrison, besides Cork and the Fort of Kinsale, where the two regiments of Regulars were posted, yet he did not lose a single inch of ground. The Militia under his command made daily incursions into the enemy’s quarters, and obtained plunder to the amount of thirty thousand pounds; of which, though he had a right to the tenth share, yet he generously refused to take any part. His great services to the Protestant cause were so well known, and so generally acknowledged, that every post brought him grateful acknowledgments of them from the Government, or from some absentee, who had a property within his line. The Earl of Burlington, in a letter from London, dated the 29th of October, expressed himself in the following terms: ‘ I am very sensible of the great pains and care you took last summer for the preservation of the county of Cork, and particularly of my concerns therein, and of those parts adjacent thereunto, which lie on the Black Water; for which I return you most thankful acknowledgments; assuring you, that I shall be ready upon all occasions to express the sense I have thereof.’ The Grand Juries of the county and city of Cork, who had been the witnesses of his actions, also presented him with addresses of thanks, ‘ for the indefatigable pains he had taken in their Majesties service, and for the benefit of the country, and for the affectionate concern he had in all his actions manifested for the inhabitants of the county; and to beseech, that he would, if it stood with his convenience, remain among them; or wherever he was, that he would always persevere in the same affections for the county and city (a).’

(a) *Ibid.* p. 213.

On the 12th of April, 1692, Mr. Justice Cox was sworn Deputy Governor of the Royal Fishery Company under Lord Sidney, who was Governor of that Company; and on the 13th of the same month he was sworn a Privy Counsellor. Some apprehensions

were about this time entertained of an invasion from France; which occasioned Mr. Justice Cox to be again sent into Munster, but with a more extensive commission than formerly. He was invested with the Command of the Militia of the cities of Cork and Limerick, and of the counties of Cork, Limerick, Clare, and Kerry, and carried with him orders to the Store-keepers to deliver to him whatever arms and ammunition he should demand. He had also a secret commission to disarm the Irish, and other Papists, on the 20th of May, which was the day appointed for doing that business throughout the kingdom: and for that purpose he was ordered to distribute the Militia in small parties, so that no suspicion might arise of the design, but that the blow might fall with its full force. On the 24th of the same month, orders were also sent him to seize all serviceable horses in the possession of Papists, or persons disaffected to their Majesties Government; with which he received a discretionary power to trust arms in the hands of the Papists for the destruction of Raparrees [E]. But the great naval victory, which was gained over the French this month at La Hogue, having removed all fears of an invasion, orders were sent to Governor Cox to restore all the horses which he had seized, in pursuance of his former directions. He continued, however, to act as Governor of Munster, the inhabitants of which were much secured against the Raparrees by his prudent management of the Militia, till Lord Chief Justice Reynel carried down a Commission of Assize for that province, directed to him and Mr. Justice Cox, who then went the Summer Circuit, and afterwards returned to Dublin. On the 5th of November following, Mr. Justice Cox was Knighted with the Sword of State, in the Castle of Dublin, by Lord Sidney, Lord Lieutenant, who gave him all the marks of favour and esteem that were in his power, during the time that he continued Chief Governor of Ireland, and afterwards continued his friendship and good offices to him during his Lordship's life (b).

(b) Harris, *ubi*
supra, p. 213.

On the 26th of April, 1693, at a meeting of the Philosophical Society, at the Provost's lodgings in Trinity College, Dublin, Sir Richard Cox read "A Geographical Description of the City and County of Derry, and of the County of Antrim," being part of an entire Geographical Description of the whole kingdom, which he intended to complete; and in which also was to be contained "A Natural History of Ireland," in which all the natural productions of the Island were to be described. These designs he never executed: however, upon reading his Geographical Description, before mentioned, he was admitted a Fellow of the Philosophical Society at Dublin, together with Dr. John Vesey, Archbishop of Tuam, and Francis Roberts, Esq; younger son to the Earl of Radnor. About this time Sir Richard Cox was made one of the Justices of the King's Bench; and in May, this year, he went to England, and was received by the persons in power in a very distinguished manner. Lord Godolphin, who was at the head of the Treasury, told him, "that his services were so considerable, that they were all obliged to do what they could for him." As an evidence of the sincerity with which his Lordship spoke, he afterwards delivered to him an order from the Treasury for the abatement of one moiety of his quit-rent for ever; and a reservation was afterwards made for grants of this kind in the famous Act of Resumption, chiefly in favour of Sir Richard Cox, whose zeal for the Protestant interest had recommended him to all parties at that time in power. It was this favourable opinion of him, which induced the Lords of the Treasury, without any application from him, to nominate him one of the Commissioners for Forfeitures, with a salary of 400*l. per annum*, into which office he was sworn on the 10th of February, 1694 (c).

(c) *Ibid.* p. 214.

But though the services of Sir Richard Cox were thought very important in England, as well as in Ireland, it appears that his conduct, in some respects, procured him many enemies in the latter kingdom. Much, however, of the animosity that was conceived against him, arose from particulars in his conduct which were wholly unexceptionable. At the surrender of Limerick to the arms of King William, in 1691, more equitable and liberal terms were granted to the Papists, than were agreeable to the more zealous Protestants. Many of the latter, who were enflamed and exasperated at the barbarities which had recently been committed by the Irish Catholics, were extremely disgusted at these concessions made "in favour of vanquished Rebels, who had exercised such acts of cruelty and rapine." They complained, that they themselves, who had deeply suffered by their attachment to the cause of King William, were neglected, and obliged to sit down with their losses, while their enemies, who had shed so much blood in opposing his govern-

[E] For the destruction of Raparrees.] Those lawless Irish plunderers, who were called *Raparrees*, were so termed, Dr. Leland observes, 'from the Irish name of their half pike, a weapon easily procured by the most barbarous. Many were influenced by example, and many driven by necessity to unite with them. They who received protections from William's Generals, and were yet plundered by his soldiers, ran with particular animosity to swell the numbers of these ravagers. In Summer they hung about the English camp; every straggling soldier

' they killed, even for the sake of his arms or cloathing; and, in the rage of national hatred, frequently mangled his dead body. In winter, they appeared in the different quarters with all the marks of humility and abasement. Their weapons were carefully concealed, but lay ready for execution. They assembled in the dead of night in solitary places, projected their excursions, rushed suddenly on their prey, vanished at the first appearance of opposition, and were again readily collected (11).'

ment, were indemnified by the articles of the capitulation, and even favoured with particular indulgencies (d). Some of the Protestants are also supposed to have been the more averse to the articles of Limerick, because they expected to derive advantage from the forfeitures which would have been obtained from the Papists, if the terms granted to them had been more rigorous; though it is said, that more liberal terms were at first intended, than those that were at last granted [F]. However, it was contended by many, that the articles of Limerick "ought not to be observed; and that it was High Treason even to capitulate with the King (e)." Doctrine similar to this was inculcated even from the pulpit [G]. But Sir Richard Cox was one of those Protestants who resolutely maintained, that the articles of Limerick should be inviolably observed; and the firmness and zeal, with which he asserted this opinion, procured him many enemies. Favourable articles had been granted to the Papists at Galway, as well as at Limerick; and when Sir Richard Cox came to appear openly in a Court of Judicature, as a Commissioner of Forfeitures, he made so eloquent a Speech in behalf of the Galway men, insisted so strongly on the heinousness of breaking the public faith, and on the ingratitude that it would manifest to King William, as well as to the General who had granted those conditions, that he brought over the rest of the Commissioners to his opinion, and saved the estates of the claimants, to the great dissatisfaction of those who hoped to have shared in the Irish Forfeitures (f).

(f) *Ibid.* p. 216.

The influence of his enemies at length so far prevailed against him, that in June, 1695, he was superseded from the Council, though with high compliments for his past services, and an apology for his dismissal from the Council, drawn from "the jealousy the subject began to entertain of so many Judges sitting at the Council-board, which began to look like, and might soon grow into a Court of Judicature (g)." An indirect attack was afterwards made against him, by an attempt to get a vote in Parliament, that "the Irish Forfeitures were mismanaged." But Sir Richard Cox being heard before a Committee, insisted, "that as there had been several Commissions of Forfeitures, common justice required, that they should point out the particular mismanagements, that it might be known to whom to object them, and that the innocent might not be confounded with the guilty." Sir Richard Bulkely then produced a list of objections against the Commissioners, which were immediately, and without any preparation, answered in so satisfactory a manner by Sir Richard Cox, that the design of a vote against the Commissioners was dropped. The Commission of Forfeitures was, however, dissolved, and the business transferred to those persons who had the management of the revenue, under the idea of saving the salaries of the Commissioners to the public (h).

(g) *Ibid.* p. 217.

(h) *Id. ibid.*

When a Bill was brought into the Irish Parliament "for liberty of conscience," Sir Richard Cox did not oppose it, but he endeavoured, and with too much success, to render it circumscribed and limited; for, on this subject, his sentiments seem not to have been sufficiently liberal and enlightened. In 1696, he went over again into England, for the recovery of his health, which had been somewhat impaired, by the great variety of business that he had gone through since the Revolution. King William was in Flanders, during the whole time of Sir Richard's stay in England; so that he had no opportunity of presenting, as he intended, a Petition to his Majesty, setting forth the unjust treatment that he had met with from his Majesty's servants, who ought to have protected, and not oppressed him. But after his return to England, before the end of the year, he had the satisfaction to receive a letter from his friend, Sir Robert Southwell, by which he was informed, that the King was well pleased with the resolute stand that he had made in support of the articles of Limerick. The four following years Sir Richard Cox had no public employment, excepting that which resulted from his duty as a Judge; and at this period he wrote, "An Essay for the Conversion of the Irish;" in which he laboured to convince

[F] *More liberal terms were at first intended, than those that were at last granted.* Mr. Harris says, that King William, "hoping thereby to put a speedy end to the Irish war, sent to the Lords Justices instructions for a declaration, by which the Irish were to be assured of much more favourable and extensive conditions, than they afterwards obtained by the articles of Limerick. His Majesty's instructions were reduced into a proclamation, which was afterwards styled the *Secret Proclamation*; because, though it was printed, yet it never was published. For the Lords Justices, finding that Limerick was reduced to a capitulation, smothered the proclamation, of which they thought there was then no need, and went in all haste to the English camp, that they might hold the Irish to as hard terms, as the King's affairs would admit of. This they did very effectually, and put an happy end to a war, which had nigh destroyed the kingdom (12)."

(12) History of
the Writers of
Ireland, *ubi*
supra, p. 214.

[G] *Doctrine similar to this was inculcated even from the pulpit.* The Bishop of Meath, on the very next Sunday after the Lords Justices returned from the camp, preaching before the Government at Christ-

church, argued, "That the peace ought not to be observed with a people so perfidious; that they kept neither articles nor oaths longer than was for their interest; and that therefore the articles, which were intended for a security, would prove a snare, and would only enable the rebels to play their pranks over again on the first opportunity." The Bishop of Kildare mounted the pulpit the following Sunday, and shewed the obligation of keeping the public faith. Dean Synge afterwards preached in the same pulpit, and maintained, "that the Papists were not to be trusted, but the articles were to be performed; that they deserved no favour, yet they were entitled to justice, even for the sake of conscience and honour." The sermon of the Bishop of Meath gave so much offence to the Government, that he was on account of it removed from the Privy Council, and the Bishop of Kildare was appointed in his room (13). Those Protestants who were desirous that the articles of Limerick should not be observed, seem to have been ambitious of emulating those Roman Catholics, who have maintained, that "Faith was not to be kept with Heretics."

(13) *Ibid.* p. 215.

them

(i) Harris, *ubi supra*, p. 218.

(k) *Id. ibid.*

them of their errors; and is said to have had the satisfaction to see a proper effect wrought on several persons of great understanding (i). Another piece is attributed to him, which was printed at Dublin, in 4to. in 1698, entitled, "Some Thoughts on the Bill depending before the Right Honourable the House of Lords for prohibiting the Exportation of the Woollen Manufactures of Ireland to Foreign Parts. Humbly offered to their Lordships (k)."

On the 16th of May, 1701, Sir Richard Cox was sworn in Lord Chief Justice of the Court of Common Pleas; and in a few days after a Member of the Privy Council. It was notified to him by the Earl of Rochester, the Lord Lieutenant, that his Majesty had granted him this preferment, "as a reward of his long and faithful services in the stations he had been in, and to give him an opportunity of doing more." In this situation he had acquired an high reputation, when the Duke of Ormond, in 1702, was appointed Lord Lieutenant in the room of the Earl of Rochester. Queen Anne had now ascended the Throne; and Lord Chief Justice Cox received a letter from the Earl of Nottingham, dated the 16th of February, 1703, acquainting him, 'That her Majesty having under her consideration many matters relating to Ireland, in which he might be very useful to her service, had commanded him to write, that he should go to London, as soon as conveniently he could, that she might have his advice.' He received this letter when he was on the Connaught circuit, and immediately set forward on his journey. During his attendance on the Queen in England, sundry important measures were proposed by him, and which were afterwards adopted for the security of the Protestant interest in Ireland, and the benefit of the inhabitants of that kingdom. Among other subjects upon which he was consulted, one was, What would be the most convenient time for the sitting of the Irish Parliament? and another, Which manufacture, linen or woollen, it would be most the interest of England to encourage in Ireland? As to the first of these points, he advised, 'that the meeting of Parliament should be put off, if possible, until the proceedings of the Trustees of Confiscated Estates, appointed in consequence of the Act of Resumption [H], should be in some measure forgotten: for the grievances which the people, especially the Protestants, had undergone from the arbitrary power lodged in their hands by the English Parliament, and their actions pursuant to that power, were so great, that whilst the nation was in a ferment on that account, no great good could be expected from a Parliament, which would probably bring with it the temper of the people (l).' With respect to the other of those points, he was clearly of opinion, 'That it was the interest of England to encourage the woollen manufacture in Ireland, in the coarse branches of it, which would prevent the wool and the manufactures from being carried to France, and would not interfere with the manufacture of England. He thought it was the most impolitic step, which was ever taken by England, to prohibit the whole exportation of woollen manufactures from Ireland. He said, that if, at the time of making the law, the fine sorts only had been prohibited, the manufacturers would never have turned themselves to the making them even for the consumption of Ireland. If they had had the free exportation of the coarse sort, England would for ever have had the Irish market for fine cloths. But, as the case stood, those workmen who chose to stay in Ireland, must of necessity fall to the making of cloths for the future wearing of the inhabitants, because no other manufacture was left to them; and the remaining wool would be carried to France. France would be always able to give a greater price than England for the wool, being sure to have an allowance for the difference in the cheapness of the work. So that England, far from being a gainer by the project, would in time lose the whole Irish market for fine cloths, and gain no new share in the foreign trade; but would run a great hazard of losing the whole, by having so cheap a country as France for its rival (m).' It would have been happy if the sound and judicious sentiments of Sir Richard Cox upon this subject had been attended to; but a narrow, unjust, and illiberal policy then prevailed, which was not only oppressive respecting Ireland, but eventually highly injurious to both kingdoms.

(l) Harris, *ubi supra*, p. 219.

(m) *Id. ibid.*

[H] *In consequence of the Act of Resumption.* After the reduction of Ireland by King William, many estates which had been forfeited by their owners having engaged in the Rebellion, were granted to officers who had assisted in the suppression of the Rebellion, and to other favourites of the King and the Ministry. The English Parliament, however, were of opinion, that his Majesty and his Ministers had been abundantly too liberal in their grants of this kind. An act, therefore, was passed for the resumption of the Irish Forfeitures. In order to compel the King to give his assent to it, it was tacked to a Bill of supply (14). Mr. Crawford observes, 'That some justice might be done to the persons affected by it, the Act of Resumption was not absolute. A number of Trustees were named in it, in whom were vested all

(14) Macpherson's History of Great Britain, vol. ii. p. 176.

the confiscated estates. In determining all claims, and disposing of the lands to purchasers, they were vested with uncontrollable authority. The Trustees passed over to Ireland. After spending some time in the business, in one of their Reports they declare, that they had not as yet thought fit to leave any thing to the determination of the people of this country. Irishmen were much obliged to them for this favourable opinion of their honesty. A number of claims were determined by them in favour of Roman Catholics; notwithstanding they violated, in many instances, the articles of Limerick and of Galway. Their appointment was very offensive to the nation, and their conduct equally obnoxious. They were charged with injustice, venality, and corruption (15).'

(15) History of Ireland, vol. ii. p. 241.

Though

Though the English Ministry did not adopt all the measures recommended by Sir Richard Cox, he yet gave great satisfaction to them, and received from them very high compliments, together with a present from the Queen of five hundred pounds, to defray the expences of his journey. He returned to Ireland with the Duke of Ormond; and in July, 1703, was nominated, by her Majesty in Council, Lord Chancellor of that Kingdom. This appointment met with very general applause; and it is said that all the Members of the Council, who had either estates in Ireland, or who by their employments were acquainted with the characters of considerable men there, expressed their hearty approbation of her Majesty's choice (n). From the time of his return to Ireland, it was generally known that he was to be Chancellor; and the English Ministry, therefore, corresponded with him about the Bills transmitted by the Council, and all other matters of State, before he had entered on that high office. On the 6th of August he was sworn Lord Chancellor, and on the 10th issued writs for a new Parliament. On the 24th of September the Parliament assembled; and Sir Richard Cox was now to appear in a character which was quite new to him, that of Speaker to the House of Lords. But though it was a busy and critical Session, and various attempts were made by his enemies to confound him, and even to expose him to ridicule, he yet discharged the duties of his station with so much ability, that Archbishop Vesey, who had long been a Member of that House, and who was well known to be a competent judge, repeatedly said, "that no person in his time had guided the Debates of that House with so much readiness, impartiality, and dignity, as Sir

(n) Harris, *ubi supra*, p. 220.

(o) *Ibid.* p. 221. "Richard Cox (o)."

Among other Bills, which were promoted by him, and transmitted by the Council to England, during the time that he held the office of Chancellor, were the following: A Bill "for quieting possessions, and disposing of the undisposed and plus acres;" by which all contention with the Crown about lands not granted, was taken away, and the security of the subject preferred to the profit or power of the Crown; a Bill "to prevent Popish Priests from coming into the Kingdom;" a Bill "to make it High Treason to impeach the Succession to the Crown as limited by several Acts of Parliament;" a Bill "to prevent the Growth of Popery;" and a Bill "for the Recovery of small Debts in a summary way [I]." On the 23d of March, 1704, the Lord Lieutenant having quitted the kingdom, the Lord Chancellor was sworn one of the Lords Justices, with Hugh Earl of Mount Alexander, and Lieutenant-general Thomas Earl. During their Administration, there was a considerable embarkation of Troops to Portugal; in the promoting of which the Lord Chancellor Cox was so remarkably active and expeditious, that he received a letter of thanks from the Earl of Galway, then Commander of the Forces in Portugal. About this time an Act of Parliament was passed in England, for permitting the Irish to export their linen directly to the Plantations; a law which was first projected and proposed by Sir Richard Cox (p). On the 27th of June, 1705, he was again sworn one of the Lords Justices, with Lord Cutts, Commander in Chief of the Queen's Forces; and in October, 1706, he was created a Baronet, as a mark of her Majesty's favour, and in consideration of his many public services (q). His colleague, Lord Cutts, died on the 26th of January following; and this event involved Sir Richard Cox in some considerable difficulties [K]. However, the Primate of Ireland, and the Chancellor, were sworn in as Lords

(p) *Ibid.* p. 223.

(q) *Id. ibid.*

[I] A Bill "for the Recovery of small Debts in a summary way." Mr. Harris says, that Sir Richard Cox was "thoroughly acquainted with the general poverty of the kingdom, and well knew, that the inferior people were often injured by men of riches and power, and by many of their own degree, for want of a method to recover their debts with small expence, and of having their demands speedily determined, which the usual course of the common law would not admit of, especially if they had litigious persons to deal with, who would lay hold of every advantage the law gave them to delay, vex, and disappoint their adversaries. The Chancellor, therefore, supported this Bill with all his reason and interest, though he had a discouraging opposition to contend with. For Sir Simon Harcourt, in a letter, dated January the 8th, wrote to him in the following manner: "The Bill for Recovery of small Debts is a great alteration of the Common Law, for which your Lordship, I am sure, notwithstanding your present station, will always have the greatest regard imaginable. I am not able to answer for its success." But the Chancellor soon convinced him, as well as the Privy Council of England, of the necessity there was for such a law in Ireland, and he had the pleasure to hear, that his opinion had determined them to pass it. Sir Gilbert Dolben, who was a zealous Solicitor at London in matters relating to Ireland, wrote to him

VOL. IV.

thus: "The Bill for the Recovery of small Debts will return with very little alteration.—The authority of your Lordship's opinion has been the main support of the Bill; otherwise the great alteration it makes in the Common Law would, probably, have overthrown it." Though the law has been much altered in this matter, yet it is but improved on the plan of the Act passed at this time; and the effect has been so beneficial to rich and poor, that they cannot with too much gratitude remember the person, who so early laboured for their relief (16)."

[K] This event involved Sir Richard Cox in some considerable difficulties.] Mr. Harris, after observing, that, by the death of Lord Cutts, the Commission of the Lords Justices was dissolved, says, that "the Statute of Henry VIII. required, "that the Chancellor should issue writs to the King's Counsellors in the shires of Dublin, Cork, Kerry, &c. to elect a Governor, upon the avoidance of every the King's Lieutenant, Deputy or Justice of the Realm by Death, Surrender or Departure out of the Realm; and upon the election, that he should seal Letters patent, and such person, being sworn, should have like authority, pre-eminence, and dignity, to every purpose and respect, as the King's Lieutenant or Deputy there next before him used to have, &c. until the King do admit and authorize one to be his Lieutenant or Gover-

"nor,

5 M

(16) History of the Writers of Ireland, *ubi supra*, p. 222.

Lords Justices in less than three weeks after the death of that Nobleman. But the Duke of Ormond being soon after removed from the Government of Ireland, and the Earl of Pembroke appointed Lord Lieutenant in his room, Sir Richard Cox was also removed from the Chancellorship. It was on the 30th of June, 1707, that he delivered up the Great Seal to the Lord Lieutenant; and he did this with so much cheerfulness and composure, that from his behaviour, it was said, he might be supposed to have received a favour from the Government. He afterwards entered into no opposition against the measures of Administration, but promoted the service of the Crown, as much as he could in a private situation; having no inclination to disturb the Government, because he had no share in it.

“nor, and until he be sworn as accustomed.” The Lord Chancellor met the Council at the Castle the morning after Lord Cutts’s death, and desired their advice how he should proceed. The Council were at first unanimously of opinion, that he ought immediately to issue writs, and proceed to an election; and some of the most zealous for this method offered to elect him sole Governor, as Sir Charles Porter was elected on the death of Lord Capel, hoping by that bait to draw him into the snare. But he, who could not deceive those who had intrusted him, declared frankly, “that it was his opinion, he could not in the present case proceed to an election, but must wait the Queen’s nomination of new Justices: Because, 1. The Statute plainly related to Head Governors only, and the Lord Lieutenant was Head Governor. For the Lords Justices by their Patent were to act by his instructions, even after his departure. His authority was to continue by an express clause in their Patent; he signed all Commissions of the Army, and all orders from the Queen were directed to him. 2. There was no avoidance of his Commission by departure; for he was absent by licence, and therefore within the Statute. 3. The words, *Until the King authorize a new Governor, and until he be sworn*, demonstrate, that the Statute cannot operate where there is a Governor in being, authorized by the Queen and sworn already; and therefore he concluded, that the Government was not *Void*, but *unsupplied*. He added, that he thought it would be very dangerous, and of evil consequence, if he should assume a power not warranted by the Statute; but that no detriment could arise from deliberating and considering well what ought to be done; and since even proceeding on such writs would take up at least a fortnight, and that he might reasonably expect to know her Majesty’s pleasure within that time, having sent two express for that purpose, there was no reason to be precipitate, unless the kingdom were in danger, or there were some manifest inconvenience now in view.” These reasons contented all moderate men; but others expected hereby to vacate the Lord Lieutenant’s Commission, and therefore threatened the Lord Chancellor heavily. But he applied himself to examine into precedents, and found them all expressing the words *Void* or *Vacant*, where the Head Governor failed. The only precedent from the time of making the Act suitable to the present case, was that of Lord Deputy Wandesford, who died December the 3d, 1640, the record of which said, “the Government was *unsupplied*,” which justified the Chancellor’s distinction: and though the Earl of Strafford, Lord Lieutenant, was then a prisoner in the Tower, and the times troublesome, yet there being a *Head Governor*, they did not proceed to an election, but took the same course as the Lord Chancellor chose to take at this time. He referred his reasons, and the precedent, to the Judges, Prime Serjeant, and Attorney and Solicitor General, who (one or two excepted) agreed, that the Chancellor ought not to issue writs. The Queen and the Lawyers of England applauded his conduct: but the Statesmen disliked it; because it drove them to the necessity of displacing the Duke of Ormond, which was the thing they would have avoided, having no design to provide for him in England, in such an honourable manner as was customary when persons returned from that Government with merit.

“This was the most critical juncture of the Chancellor’s life: for his judgment, his courage, and his integrity, were all put to a trial. His judgment was at first a little shaken by the universality of the opinions against him; but the precedent being found, and many of the loudest against him being convinced, his judgment was confirmed and esteemed. His courage was attacked by threats of an impeachment; but his integrity supported his courage, and both easily prevailed on him to despise the vain boastings of his enemies. The business being at length laid before the Attorney-general of England, he prepared a letter for the Lords Justices, pursuant to the practice on the Death of Lord Deputy Wandesford; a Patent passed accordingly; and on the 15th of February, 1706, the Primate and Chancellor were sworn Lords Justices in less than three weeks from Lord Cutts’s death (17).”

The conduct of Sir Richard Cox in this business gave, however, considerable offence to the Irish House of Commons. Accordingly they resolved, “That on the death, surrender, or departure of a Lieutenant, Deputy, Justice, or other Head Governor of the Realm, *so that the Kingdom becomes destitute of a Governor thereby*, it is the indispensable duty of the Lord Chancellor, or Keeper of the Great Seal, to issue writs for the electing a new Governor, or Governors, pursuant to the Stat. 32 Hen. VIII.” Mr. Harris observes, “that the resolution was proposed without these words, *So that the Kingdom becomes destitute of a Governor thereby*. But Sir Richard Cox’s friends insisted on these words as an amendment to the question, and to make it consonant to the Act of Parliament; and, indeed, the amendment was so obvious, and agreeable to law and reason, that it could not be refused. But it quite disconcerted the scheme for that time. However, enough was not yet done; and, therefore, within a few days, the subject was resumed; and then they resolved, “1. That by the death of the Lord Cutts, on the 26th of January, the kingdom became destitute of a Governor residing in the same, till the 15th of February following. 2. That no writ was issued by Sir Richard Cox, Lord Chancellor, for electing a Justice, pursuant to the Statute of 33 Hen. VIII. from the 26th of January till the 15th of February, 1706, at which time the Primate and Lord Chancellor were constituted Lords Justices under the Great Seal. 3. That it was and is the indispensable duty of the Lord Chancellor, or Lord Keeper, when the kingdom is destitute of a Lieutenant, Deputy, or other Chief Governor *residing* within this kingdom, immediately to issue writs to summon the Privy Counsellors to elect a Chief Governor, pursuant to the Statute of 33 Hen. VIII.” The resolution of the first day was approved of, by the most eminent Lawyers, as a fair construction of the Statute. But the work of the last day was done against precedent, and against the opinions of the Attorney and Solicitor-general of England, and ten of the Judges and most eminent Lawyers in Ireland: so that Sir Richard suffered by it neither in fortune nor reputation; rather indeed he gained credit by what he had done. For from thence it appeared, that inclination and industry were not wanting to detect some misbehaviour in his judicial capacity, or some miscarriage in his conduct as Lord Justice; neither of which being done, it was concluded none such could be found out (18).”

(17) History of the Writers of Ireland, *ubi supra*, p. 223, 224.

(18) *Ibid.* p. 225.

When

When the Irish Parliament broke up, Sir Richard Cox went over into England, and was very favourably received at Court. After his return to Ireland, he spent his time chiefly in retirement, in the cultivation of his mind, in the conversation of his family and friends, and in adorning and improving his estate (r). He was much addicted to the study of divinity, and at this period particularly applied himself to the perusal of a variety of ecclesiastical writers, of different ages and denominations. In 1709, he published at Dublin, in 12mo. "An Address to those of the Roman Communion in England, occasioned by the late Act of Parliament to prevent the Growth of Popery, recommended to those of the Roman Communion in Ireland upon a late like Occasion." The following year he went again into England, and published at London, in 1711, in 8vo. "An Enquiry into Religion, and the Use of Reason in Reference to it." About this time he was offered by the Ministry the post of Lord Chief Justice of the Court of Queen's Bench; an offer which, it is supposed, they did not expect him to accept; as they did not imagine that he would take an office inferior to what he had formerly enjoyed (s). He did not, however, stand upon that punctilio; but accepted the office, and immediately entered upon the duties of it. Party animosity at that time so much prevailed, that he soon found his situation attended with little tranquillity. He acted in a treble capacity, in the Queen's Bench, in the Privy Council, and as Judge of Assize; in each of which he was often obliged to give judgment between the contending parties [L]: in the Queen's Bench, and as Judge of Assize, in criminal prosecutions; and in the Council, in struggling for interests in Corporations (t). On the death of Queen Anne, and the accession of King George the First, Sir Richard Cox, with the other principal Irish Judges, was removed from his office, and also from the Privy Council [M]. He then retired to his seat in the county of Cork, where he hoped to have ended his days in peace; but his tranquillity was disturbed by several attacks which were made against him in the Irish Parliament. On the 18th of November, 1715, it was ordered by the House of Commons, "That Sir Richard Cox should attend that day fortnight, to give an account what proceedings were had against Jacob Twisleton, who had been a servant to the Pretender; and by Order of the House, in 1713, was delivered to the Lord Chief Justice." As he was at the distance of an hundred miles from Dublin, at the time when this Order was made, he wrote to the Speaker, and requested, "That on the account of his age, (which was then sixty-five), the badness of the roads, and the shortness of the days, and in consideration that he could say little more about Twisleton, than the Officers of the Court might inform the House, the Order might be adjourned to the 5th of December." This was accordingly complied with; and at the time appointed, Sir Richard appeared before a Committee of the whole House, and sufficiently cleared himself with respect to the case of Jacob Twisleton, which was found, upon examination, to be a very trifling business [N]. But about the

[L] Often obliged to give judgment between the contending parties.] Mr. Harris says, "That every where his conscience and his judgment were the directors of his actions, and consequently each party in its turn had the benefit of his justice. But these considerations little availed him: for each grudged the right done to the other, which was deemed injustice to itself. It was no time for cool reasoning; and so he became suspected by the violent men of that party, and of which he was reputed one, and hated by the furious men of the other. A better testimony could not be given of his moderation. But he had the comfort to be much in the esteem of the Duke of Shrewsbury, who was Lord Lieutenant for the greater part of those mad times, and who was known to be a Nobleman of great integrity, candour, and good nature (19)."

(19) History of the Writers of Ireland, ubi supra, p. 227.

[M] Removed from his office, and also from the Privy Council.] The removal of Sir Richard Cox, and the other Judges, from their offices, and from the Privy Council, seems to have been chiefly occasioned by their refusal, in conjunction with the other Members of the Privy Council, to comply with the directions of the Lords Justices of Great Britain, respecting the election of Magistrates for the city of Dublin. Great contests having arisen concerning the election of Lord Mayor for the city of Dublin, the British Regency, after the death of Queen Anne, in order to put an end to these contests, directed the Irish Privy Council "to approve of the person elected (for Lord Mayor) without entering into the merits of the election." Upon this occasion, Sir Richard Cox made a Speech, in which, among other things, he said, "That as to the qualifications of the party the Council was ministerial, and ought in obedience to the Lords Regents to approve of any person, who should be lawfully elected. But as to the legality of elec-

tion, the Council acted in a judicial capacity, and could not approve of any election that was unlawful (20)." In October, 1714, new Lords Justices having been appointed for the Government of Ireland, the Archbishop of Dublin, who was one of them, demanded of the Privy Council, "Whether they would without difficulty, or entering into any consideration of the merits of the election of Magistrates for the city of Dublin, approve the person who should be returned for Lord Mayor by the majority of the Board of Aldermen, pursuant to the directions of the Lords Justices of Great Britain." To which the Privy Council unanimously answered, "That they should always pay a due regard to the Lords Justices of Great Britain; but that they were not then ripe to give their opinion, unless an election of Magistrates should be certified and brought before them." Upon this answer the Council was dissolved, and the Judges displaced (21).

(20) Ibid. p. 244.

(21) Ibid. p. 245.

[N] The Case of Jacob Twisleton, which was found, upon examination, to be a very trifling business.] Mr. Harris informs us, that "Twisleton was a noted good trumpeter, and had travelled through most parts of Europe for his profit. His fame was so great, that all persons were desirous to hear him. At some place abroad, he was hired to sound the trumpet before the Pretender, and afterwards came to Ireland, and sounded for hire before Sir Constantine Phipps (22)." Twisleton was brought before Sir Richard Cox, as a servant of the Pretender, in pursuance of an Order of the House of Commons, of the 12th of December, 1713. He committed him to Newgate, upon an information of a Member of the House; and Twisleton remained there till the latter end of the following term. He was then bailed, according to the custom of the Court, for want of an indictment

(22) Ibid. p. 230.

the same time the following resolutions were also passed by the House of Commons: "I. That by the Laws of the Land, and by the constant uninterrupted usage of the Court of King's Bench, all Juries in criminal cases ought to be nominated and returned by the Sheriff, or Sheriffs only; unless there be a legal challenge to his or their making such return. II. That the Rule made in the Court of Queen's Bench, in the case of Dudley Moore, Esq[O]; whereby the Clerk of the Crown was ordered to strike a Jury for his Trial, was unprecedented, arbitrary, and illegal, and an high invasion of the Rights and Liberties of the Subjects of Ireland. III. That Sir Richard Cox, late Lord Chief Justice of the said Court, by making such Rule, acted partially, arbitrarily, illegally, and contrary to his oath and duty of a Judge." The same resolution was passed against each of the other Judges of that Court (u). It must be confessed, that in the affair to which these votes refer, Sir Richard Cox, and his brother Judges, appear to have been influenced by that partiality in favour of the crown, by which other Judges have too frequently been actuated: but in their conduct in this respect they were countenanced by the conduct and opinions of English Judges and Crown Lawyers. In June, 1716, several votes were also passed, by the House of Commons, against Sir Richard Cox, and the other Judges, censuring their conduct and determinations respecting the election of Lord Mayor of the city of Dublin [P]. It was resolved, that "they had acted partially and corruptly;" and

(u) Harris, *ubi supra*, p. 228.

(23) History of the Writers of Ireland, *ubi supra*, p. 230.

indictment against him, which the information could not support, and was continued on his bail until Trinity Term, 1714 (23).

[O] *The Case of Dudley Moore, Esq.* The Case of Mr. Moore was this. The Government had forbidden a Prologue to be spoken at the Theatre on the 4th of November, 1712, to the Play of Tamerlane. Mr. Moore, supported by ten or twelve Gentlemen, repeated one on the stage in spite of the actors. The persons in Administration, considering this action as a designed affront to themselves, ordered Mr. Moore, and his companions, to be prosecuted for a riot. They were accordingly indicted in the Court of Queen's Bench. But the Queen commanded, that the prosecution should cease against all but Mr. Moore. Sir Richard Cox thought the offence so slight, that he discharged Mr. Moore's bail, and took his own recognizance for his appearance, on which he was never called. Upon Mr. Moore's pleading, and entering into a recognizance to prosecute his traverse, the Attorney-general moved, "That the partiality of Juries returned by Sheriffs having appeared lately in many instances, the Court would be pleased to order their Officer to strike an indifferent Jury out of the Book of Freeholders to be returned by the Sheriffs, to try the issue between the Queen and Traverser, as was constantly done in England in like cases." This motion was opposed, and learnedly argued on both sides. The Court took time to consider, and procured in the mean time certificates of the practice of the Queen's Bench in England, and consulted the rest of the Judges of Ireland, who solemnly delivered their opinions in favour of the motion. And then, being pressed by Mr. Moore's Council at three several times to give judgment, at last gave it in favour of the Queen, for several reasons, among which were the following:

I. "Because the Common Law of England and Ireland is the same, and is preserved in Ireland by the jurisdiction which the Court of Queen's Bench in England hath over that Court in Ireland: and, for this reason, the Queen's Bench in Ireland is always governed by the practice and authorities of the Queen's Bench in England. For if the judgments of Ireland differed from those in England, they would be set aside as erroneous.

II. "This has been the constant practice of the Queen's Bench in England for one hundred years past. In the reigns of Queen Elizabeth, King James the First, Charles the First and Second, James the Second, and King William the Third. It was done in the trial of the Seven Bishops, and never was complained of or mentioned in the Bill of Rights; as it would certainly have been, if it had been thought either illegal, or a grievance (24)."

(24) *Ibid.* p. 228.

[P] *Respecting the Election of Lord Mayor of the city of Dublin.* Mr. Crawford says, "One of the many disputes, occasioned by the party spirit which became every day more violent in both kingdoms,

was that which arose in Dublin, in 1713, relative to the election of a Lord Mayor. That office was then filled by Sir Samuel Cooke, whose principles were hostile to the Revolution. In his absence, the Aldermen elected Mr. Pleasants, a Whig, as his successor. By certain late regulations, calculated to promote the interest of the Tory party, the Lord Mayor had been invested with a right to nominate three Aldermen, one of whom, unless to them all reasonable objections could be made, must be chosen to succeed him. Sir Samuel would not acquiesce in the election, which, upon the matter being referred to their determination, was set aside by the Privy Council. The Aldermen then were summoned by the Lord Mayor, to make a new choice. To one of the three, whom he proposed to their consideration,—twenty of them objected. Before any thing could be determined, the Court was dismissed. This contest communicating to the friends and the connexions of the opposite parties, threw the city into a flame, which was attended by the greatest disorder and confusion, and continued to the death of the Queen. It was raging when the Duke of Shrewsbury arrived to take upon him the Government of Ireland (25)."

(25) History of Ireland, vol. ii. p. 262, 263.

Of the disputes and proceedings concerning the election of Lord Mayor of the city of Dublin, a very copious account is given by Mr. Harris, in his Continuation of Sir James Ware's History of the Writers of Ireland (26); but it is extended to so great a length, that it would probably be thought extremely dull and uninteresting by most of our Readers. We shall, therefore, only mention a few particulars relative to this subject. It appears, that by a Charter granted in the reign of King Henry the Third, the Citizens of Dublin had a right to choose their own Mayor; but by an Act made in the reign of King Charles II. the Lord Lieutenant, or other Chief Governor or Governors, and Council of Ireland, had power given them "to make Rules for the electing Magistrates, and other Officers, and for inflicting such penalties for the breach thereof, as they in their wisdom should think fit;" and it was farther enacted, that these "rules, when made, should be as good and effectual in law, as if the same had been established by Parliament." By this Act the Citizens of Dublin were deprived of their right of electing their Chief Magistrate; for one of the new Rules which were made for that city was, "That the election of Lord Mayor, Sheriffs, &c. shall be by Lord Mayor and Aldermen only, eight Aldermen being always present." Another Rule was, "That the names of Lord Mayor, and Sheriffs, &c. elected, shall be by the Corporation presented within ten days after election to the Lord Lieutenant, or other Chief Governors, and the Council, to be approved by them, and the persons elected shall be incapable to serve until approved of under their hands; and if not approved of in ten days after they are presented, the Corporation shall proceed

(26) P. 230—244.

and been "guilty of high crimes and misdemeanours:" and it was also voted, "That the removing the Lord Primate, and Sir Constantine Phipps from the Government of that kingdom, the dissolving the late Privy Council, and displacing the late Judges and Queen's Council, was a seasonable instance of his Majesty's justice, and tender regard for the welfare and happiness of that kingdom (w)." It was likewise resolved by the House of Commons, in the same Session, "That an humble Address be presented to their Excellencies the Lords Justices, desiring their Excellencies to lay before his Majesty the humble Request of this House, that the original Representation of the late Privy Council in the Case of the City of Dublin, and the Report of the late Judges [2]; and also the farther Report of the late Judges and Queen's Council, in the Case of the Aldermen and Sheriffs of Dublin, transmitted to her late Majesty, may be returned to this Kingdom, to be given in Evidence against the Persons who made the same, when this House shall have the Opportunity to proceed against them for the High Crimes and Misdemeanours, of which this House hath voted them guilty (x)." ^{(w) Harris, ubi supra, p. 231; 232.} ^{(x) Ibid. p. 243.}

These votes were not followed by any farther proceedings against Sir Richard Cox, or the other Judges. Their conduct in the affair of the election of Lord Mayor of the city of Dublin appears to have been censurable; but the votes against them were carried with too much heat and violence. Insinuations were thrown out against Sir Richard Cox, in the Irish Parliament, as if he had been attached to the interest of the Pretender; but these insinuations seem to have been totally destitute of the least foundation. He had taken that side, in the business relative to the election of the Magistrates of Dublin, which was considered as the Tory side; but as he was eminently active and zealous in the promotion of the Revolution, so he appears to have been a firm friend to the Protestant succession in the House of Hanover. After his removal from office, he passed his time chiefly in retirement. He divided his latter days between study, making improvements on his estate, and acts of benevolence. But in April, 1733, he was seized by a fit of apoplexy, which ended in a palsy, under which he languished till the 3d of May that year, when he expired, without pain, at the age of eighty-three years, one month, and a few days (y). ^{(y) Ibid. p. 248.}

Sir Richard Cox was in his person tall, and well-proportioned; his features were regular, and his complexion fair; his countenance was agreeable, his eyes full and lively, and his carriage easy and graceful. His private life was virtuous, and he was regular and exact in his attendance on the duties of religion. He was an affectionate husband, a tender parent, a sincere friend, and a kind master to his domestics (z). His memory was very retentive, and he applied himself much to the studies of History and Geography, in both of which his knowledge was extensive. He was also well read in Divinity, and had a strong inclination to Poetry, in which he made some attempts, but was dissuaded from any farther efforts of that kind [R]. In his freer hours, he was a cheerful and entertaining companion, and in his general behaviour he was affable and courteous. As a Judge, he was patient and attentive, and diligent in the discharge of the duties of his office. He was considered as a very able Chancellor, and his decrees were seldom reversed. Mr. Harris says, that "if he had lived in quiet times, he would have been revered by all his contemporaries for his moderation and integrity (a)." He appears, however, to have been too complaisant a Courtier, and too ready to concur in the measures of Government, without sufficiently inquiring into the rectitude of those measures. In judging of some parts of his conduct, allowance should, indeed, be made, for the critical state of Ireland at that period, and the effects which had been produced upon men's minds, by the barbarities and murders that had been committed by the Papists. The massacre of Ireland, and other Popish cruelties, were then fresh in the minds of men; and the Roman Catholics were not considered as objects either of justice or humanity. Too much injustice had undoubtedly been committed on both sides; but, in judging of the

^{(27) Harris, ubi supra, p. 232, 233.} "ceed to a new election, and shall in like manner present the names, until they shall choose persons who shall be approved of (27)." The Act by which these Rules were enforced, passed in the reign of Charles II. was only a temporary Act, and yet the rules were continued to be acted upon as if they were perpetual. The citizens at large were deprived of their right of election, and even the Aldermen were not allowed a free election. Sir Samuel Cooke was continued two years in office, without being elected for the second year even by the Aldermen; but he was agreeable to the then Administration, and was, therefore, arbitrarily continued in office. In the part which was taken by Sir Richard Cox, and the other Judges, in this business, there was too manifest a partiality in favour of the Administration; and not that attention, which there ought to have been, to the rights of the Citizens of Dublin.

[2] *The Report of the late Judges.* Complaint

VOL. IV.

was made, that the Report of Sir Richard Cox, and the other Irish Judges, which was transmitted to England, relative to the Election of Lord Mayor for the city of Dublin, contained a false statement of the case, and was calculated to deceive the Queen and her Ministers; and, indeed, the Report appears to have been by no means fair and impartial.

[R] *Was dissuaded from any farther efforts of that kind.* Mr. Harris says, "He had a strong bent to Poetry, which appeared in a piece, much approved, 'On General Ginkle's success in Ireland,' and of which he printed but a few copies; and in another 'On the death of Lord Chancellor Porter.' But the last being transmitted to his friend Sir Robert Southwell, he wrote to him, 'That poetry was not the way to preferment, but a weed in a Judge's garden.' This kind rebuke checked his poetical progress, and turned him to more serious and more useful studies (28)."

persons

(b) Harris, *ubi*
supra, p. 248.

persons and characters of that age, some attention must be paid to the sentiments and views by which different parties were at that time actuated. As an Historian, Sir Richard Cox is entitled to more applause for the assiduity of his researches into the History of Ireland, than for any merit in his arrangement or composition. He was the author of those Remarks upon Ireland, which were printed in Bishop Gibson's Translation of Camden's Britannia, edit. 1695. Of many children, only one son and one daughter survived him; but he had many grand-children, and great grand-children. His eldest son, Richard, died in 1725; but his second son, Michael, became Bishop of Ossory. One of his daughters was married to Sir William Mansel, Bart (b).]

(*) Written and

son, Professor of
Humanity in the
University of
Glasgow.

* * [CRAIG (WILLIAM), (*) an excellent Divine of the Church of Scotland, was the son of a respectable Merchant in Glasgow. He was born there in February 1709: and in the Seminaries of education in that city, he began and prosecuted his studies. At College he distinguished himself by his early taste and uncommon proficiency in classical learning; and in applying to this sort of literature, he received great assistance and encouragement from his kinsman the Reverend Mr. Clerk, Minister of the Gospel at Neilston in Renfrewshire. That deserving young man, who died at an early period of his life, and before his worth became sufficiently known, was one of the first Clergymen in the West of Scotland, who began to study and teach Christianity in a manner different from that usually practised since the Reformation; and who thought the interests of true religion could be promoted by such elegance of composition, and knowledge of Philosophy, as might be derived from ancient Authors. To studies of this sort, therefore, the excellent person who is the subject of this memoir, incited by his own original inclination, and assisted by his ingenious friend, was very early attached. The moral Philosophy of the antients engaged his attention in a very particular manner: and the moral writers of Greece and Rome were his favourite authors. By the attentive perusal of their works, and of the moral Poets of Antiquity, he had committed to his memory a great number of their most striking passages; and used to apply them occasionally in the company of his select friends with great ease, judgment, and ingenuity. In this he had an excellent example in the practice of his friend and instructor the justly celebrated Doctor Hutcheson, who was elected to the Professorship of moral Philosophy, in the University of Glasgow, about the time that Craig had nearly finished his theological and philosophical course. With this amiable and eminent Philosopher he was early and intimately connected. Hutcheson discerned in him that character which he esteemed: and he expressed his regard by associating with him, by entering into, and assisting him in his literary labours. Early inclined by temper and disposition to the study and profession of Theology, Craig derived every advantage from the conversation of a friend so highly enlightened; and whom he regarded with just and affectionate deference. Commencing Preacher in the year 1734, his philosophical Monitor embraced every opportunity of hearing him; and with a frankness which shewed the opinion he entertained of the candour and abilities of his disciple, he offered such remarks on his Sermons as he thought necessary. He particularly admonished him against a propensity to which young Clergymen of ability are very liable, of indulging themselves in abstruse and philosophical disquisition. He advised him, because he knew he was able to follow the advice, "to preach to and from the heart." He did so. Habitually pious, ardently devout, and deeply interested in the welfare of those who listened to his instruction, he delivered himself with genuine and becoming earnestness. This was the spirit that directed his manner. Loud exclamation, outrageous action, violence of look or gesture, were not the characters of his delivery. It was solemn, yet animated; earnest, but correct; and though correct, not formal. He arrested the attention without alarming the imagination: he touched the heart without rousing the passions. His manner was elegant, and he pleased: he spoke as he felt, and was affecting.

It is not to be supposed that a Preacher of such eminence, especially at a time when this mode of preaching was rare, should remain unknown or unnoticed. He soon received a presentation from Mr. Lockhart, of Cambusnethan, to be Minister of the parish of Cambusnethan; and was settled in that charge in the year 1737. About this time great opposition was made by the populace of Scotland, and particularly by those of Clydesdale, to the manner of appointing Ministers by presentations from Lay-Patrons. On this account, therefore, and perhaps, because his Sermons inculcated active virtue more frequently, and more earnestly, than his audience, who would have been better pleased with obscure and mystical theology, thought necessary, he encountered considerable opposition. Zealous, however, in the discharge of his duty, and hoping, in the conscious ardour of his endeavours, to reconcile his parishioners to that system of instruction which he thought best suited to their condition, and most consistent with Christianity, he refused a presentation to a Church in Airshire, offered him by Mr. Montgomery of Coilsfield; and another offered him by the amiable but unfortunate Earl of Kilmarnock. At length, he accepted of a presentation to a Church in Glasgow, the place of his nativity, where most of his relations resided; where he could have opportunities of conversing with his literary friends; and where the field for doing good was more extensive. He was first appointed Minister of the

the Wynd Church in that city : and after the building of St. Andrew's Church, one of the most elegant places of public worship in Scotland, he was removed thither. His audience was at no time so numerous, but especially during the last twenty-five years of his life, as those who valued good composition and liberality of sentiment, apprehended that he deserved. Instead of the abstruse tenets of speculative theology, and the mysterious doctrines inculcated by many popular Clergymen in the Church of Scotland, he thought his flock would be better edified by such a plain exposition of their duty, as was laid down in the precepts and example of Jesus Christ ; and by such a direct, but judicious application to themselves, as in their situation seemed requisite. " A Minister of the Gospel," he tells us, in his excellent Sermon on the character and obligations of a Minister, " will, with
 " unvariable constancy and fortitude, declare unto his people the whole counsel of God.
 " He will faithfully and fairly set before them the whole extent of their religious and moral
 " obligations, and with all that minuteness and detail with which they are delivered in
 " the Sacred Scriptures, and which he sees the circumstances of his people may require.
 " No aversion which their ignorance, their prejudice, or sinful passions, may suggest on
 " this account, no unpopular injurious epithets that may be given him as a legal or a
 " moral Preacher, will prevail upon him either to conceal or to disguise any part of that
 " divine religion, upon which, with the deepest earnestness, he founds the prospect of his
 " own salvation. He will search, with all the diligence and candour that he can, the
 " Holy Bible ; look for genuine religion there ; and from thence, rather than from any
 " human system upon earth, learn what he is to teach as a Minister of Christ."—But this mode of instruction has never been very fashionable. Not much relished in Galilee and Jerusalem, when practised by one " who spake as never man spake," it was not likely to become more popular in Clydesdale and the city of Glasgow. But though Craig might regret, what seemed to him the misguided or mistaken sentiments of many who professed themselves Christians ; yet steadfast in his own opinions, founded on mature reflection, and unmoved by the indiscriminating praise or blame of the multitude, he still persisted in the delivery of such doctrines as his reason convinced him were most essential to the real improvement and eternal welfare of his hearers. As his Church was not much frequented by the vulgar, neither was it very generally resorted to by those exalted by their opulence to a higher rank. Early and constantly engaged in commercial pursuits, they did not give much attention to such distinctions in doctrine or composition, as would otherwise have induced them, perhaps, to have given a preference to those of Craig. But though he disdained every unworthy art to captivate popular applause, he was so sincerely attached to those who seemed to profit by his instruction, that he declined the proposals of Provost Alexander, and some of his friends in Edinburgh, who wished at one time to have removed him thither. He had the satisfaction also of knowing, that in another quarter, persons whose opinion he valued, were not insensible to his merits. He was proposed by his friends to be the successor of Professor Potter, in the Professorship of Divinity in the University of Glasgow. Doctor Leechman, lately Principal in that University, then Minister of the Gospel at Beith ; and the Reverend Mr. M'Laurin, brother to the celebrated Mathematician, were also candidates. Leechman and Craig were united in the closest friendship : their religious sentiments were similar, and alike obnoxious to the popular Clergy. M'Laurin was a man of worth and sincere piety ; he was believed to entertain religious opinions of a kind very agreeable to the multitude : and if both the other two had continued candidates, he would probably have succeeded. But Craig, apprehending that the interests of religion would be better served by the appointment of Leechman, and influenced perhaps by the intimacy subsisting between them, prevailed with his friends to transfer their voices to him, and withdrew from the contest. Accordingly, by the casting vote of George Bogle, Esq; of Daldowie, then Lord Rector of the University, a man of unblemished integrity and real zeal for the public good, Dr. Leechman was chosen. How much this measure contributed to promote the interests of religion, learning and classical taste, among the Students in that Seminary, is very generally known, and will be long remembered.—In truth, though Craig's early attention to good composition, and to what was accounted liberality of opinion in religious matters, shewed a turn of mind a good deal different from the spirit and improvement of the times, he was not altogether singular. Clerk, Minister of the Gospel at Neilston, Paton at Renfrew, Fleming at Kilmacollm, Warner at Kilbarchen, Dr. Wilhart, his Predecessor in the Wynd Church, and Dr. Leechman, his contemporaries or intimate friends, were eminent promoters of true learning, correct taste, and such views of religion, as seemed to them more agreeable to the original form of Christianity, than those usually recommended by many popular Presbyterian Preachers.

Craig was married about this time to the daughter of Mr. Anderson, a considerable Merchant in Glasgow. She lived with him sixteen years ; and by her he had several children : two of whom, namely William, an eminent Lawyer at the Scottish Bar ; and John, a Merchant in Glasgow, survived their father. But the excellent understanding and amiable dispositions of his wife, which rendered his married state happy, contributed, by their painful recollection, to embitter the sufferings of his declining age. She died in
 the

the year 1758: and though he was afterwards very happily married to the daughter of Gilbert Kenedy, Esq; of Auchinfardale, he scarcely ever recovered the shock of his first separation. Several years before he died, his strength and health gradually declined: his spirits were overwhelmed with melancholy: he seemed to have lost the power of enjoying happiness: no amusement could relieve his depression: he lamented that he was become useless; and that he felt not only his body, but the faculties of his soul impaired. His sufferings were heightened by many additional afflictions; particularly by the death of his son Alexander, a very agreeable young man, who had been bred a Merchant, but who was strongly inclined to the study of polite literature: and soon after by the death of his second wife, whose affectionate assiduities had been invariably employed in endeavouring to solace and support his infirmities. In this state of feebleness and dejection, notwithstanding the unwearied attention of his surviving sons, he continued to languish: and, at length, in the seventy-fifth year of his age, he was released by an easy death.—Great sensibility seems to have given the general and prevailing colour to his character. It rendered his piety devout, his benevolence tender, and his friendship affectionate. In the culture of his understanding it inclined him to those studies that please by their beautiful imagery, or touch the heart with agreeable feelings. He was, therefore, very early addicted to classical learning; and cherished those views of religion that represent both God and man in a favourable light. Such sentiments and propensities, though not altogether singular at the time that he commenced his studies, were however so rare among Students of Theology, that speaking figuratively, we may call them singular. But singularity of disposition or opinion is usually disliked or opposed. The man of fortitude and strong nerves encounters the opposition; and either makes converts, or, by a bold authoritative tone, though he does not conciliate affection, imposes respect. But the man of extreme sensibility, yielding to his native bias, is afraid of the struggle, declines the contest, and, excepting in the retirements of confidential friendship, not only appears, but really becomes shy and reserved. This disposition is nearly allied to modesty, and even humbleness of mind; yet the appearance of distance it so often assumes, is misapprehended by the undiscerning multitude; and by a violent misapplication of terms, is misconstrued pride. Effects almost of an opposite appearance, are produced by the same principle, yet tend in their final issue to confirm this mistaken reserve. The man of sensibility, conscious of powers, exerts them; and conscious of his own candour, expects suitable returns. He is disappointed. The observation of men is otherwise engaged: accidental circumstances, and other causes than such as arise from perversion of mind, carry away their attention from the merit that claims and deserves their notice. Of these the man of shy and retired sensibility is not aware; he becomes still more cautious in his intercourse with mankind; more shy and more retired. But Craig, under the sacred shade, and in the retirements of intimate and confidential friendship, was unreserved, open, and even ardent. The spirit of real enjoyment, with which in his better days he engaged in literary and familiar conversation with his friends, displayed the most interesting view of his character. Conversations on the merits of elegant authors, both antient and modern, but above all, the liberal discussion of moral and religious topics, were the joy of his soul. On these occasions, his eyes, naturally animated, sparkled with additional lustre; his voice, naturally musical, became delightfully mellow; his features brightened, for his heart glowed. These were blessed intervals, anticipations perhaps of what he now enjoys. By degrees this glowing mood became tinged with melancholy: at first it was amiable and interesting; but became at last distressful. The sensibility which gave him such moments of rapture, had not perhaps been duly managed; and contributed to, or occasioned his sufferings. It had rendered him averse to indiscriminate society, and thus precluded him from many innocent means of relieving the lassitude, or alleviating the weight of declining age. It quickened his sense of misfortune, and rendered his affliction for the loss of friends too poignant. It overwhelmed him with too much sorrow if at any time he apprehended that the affection of those, in whose love he trusted, had suffered change. The errors and delusions, as he conceived, into which many believers in Christianity had fallen, gave him the anxious solicitude which a father feels for the apprehended failings of a darling child; and he regretted that many teachers of religion, to whom popularity gave extensive influence, seemed not sufficiently aware that these errors were full of danger. His sensibility too, especially after the publication of some celebrated works in favour of scepticism, was painfully affected by the progress, as he apprehended, of irreligion. His sense of Deity was strong and lively. Even though the dejection and the despondency of affliction might at times have brought a gloomy cloud between him and the radiance of heaven, the cloud was transient: his religious opinions, founded not merely on feeling but on conviction, were permanent: and even in the earlier periods of his life, when he was not so anxiously alarmed at the growth of impiety as afterwards, he often lamented that men of worth and integrity were not pious; and though they performed many charitable and disinterested actions from very laudable motives, yet that their conduct did not seem to be founded on any principles of religion. It might be friendship, it might be compassion, it might be benevolence, but it wanted “those aids, those supports and comforts which alone could
“ arise

“ arise from hope and trust in God.” It is unnecessary to say of such a character, that he was just, charitable, and temperate. His virtues were those of a Christian; his failings were those incident to the weakness of human nature; and his sufferings were occasioned, or much aggravated by his failings. It is consistent with his own opinions to say, that if there is a region beyond the grave into which human weakness can have no admission, where there is employment for every excellent talent, and objects for every worthy affection, he is supremely blessed.

To this account of his life I shall subjoin a short account of his writings.—In the year 1761, he published at Glasgow a Sermon on the “ Reverence due to the name of God.” His Sermon on the “ Character and Obligations of a Minister of the Gospel” was published in the year 1764. Previously to this publication he had the degree of Doctor in Divinity conferred upon him by the University of Glasgow. In the year 1767 he published his Essay on the “ Life of Jesus Christ.” This work met with great approbation; and its design may be seen in the following extract from the Preface. “ The principal
“ design of the following Essay is to delineate the character of Jesus Christ from the facts
“ recorded in the history of his life.—Many useful observations have been made by dif-
“ ferent writers on this subject; and the several virtues and perfections which appeared
“ in the life of Jesus have been marked. But what these writers have observed gives us
“ rather a detail of scattered though beautiful particulars, than a single and connected
“ view of the whole character at once. It would appear, however, from the records of
“ the Gospel, that the character of Jesus Christ was formed in every part of it upon the
“ influence of one great and leading principle; and that the whole tenor of his life pro-
“ ceeding from this influence was one united and consistent thing. To give this simple
“ and united view is the design of what is offered in the second and third Sections, &c.” Two editions of this Essay were printed with great elegance, by the Foulis’s at Glasgow: and a French translation appeared on the continent, soon after its first publication.—In the year 1775 “ Twenty Discourses on various Subjects, by William Craig, D.D.” were published in London. Some of these Discourses are practical and others speculative. Of the practical, those that are employed in delineating and drawing observations from Scripture characters, deserve particular notice. Those on the characters of Judas Iscariot, and Pontius Pilate, are executed in a masterly manner; and shew that the author’s powers of observation were very considerable. Of the speculative Discourses, those that discuss the Scripture Doctrine of Regeneration demand the serious and deep attention of every one who would really understand this important doctrine. But though they require serious and deep attention, it is not on account of their being composed in a dry, abstruse, or metaphysical manner. They are clear and obvious: they contain a natural and easy explanation of passages in the New Testament that treat of Regeneration: they are addressed with plainness and simplicity to the common sense of mankind: and by a transition which affords a presumption in favour of the Author’s argument, they connect speculation with practice.—The style and composition of Dr. Craig’s Essay and Discourses, no less than the sentiments, have been admired. They resembled his manner. His excellent taste, early formed by the perusal of the best classical authors, preserved him alike from the groveling, quaint, and verbose jargon of mere illiterate, and from the trim ornaments, the studied figures, and laboured imagery of mere artificial eloquence. If a figure or image presented itself, suggested as all such embellishments ought to be, by the present disposition, he gave them admission. He neither anxiously solicited, nor affectedly refused their assistance. Accordingly, as imagination was not his most powerful faculty, his images are not very frequent. He wished also to be correct in the use of words, and the structure of sentences; but thought it unnecessary to be very nicely correct. He did not think that such attention suited the serious and solemn dignity of the pulpit. Nor at the time when he began to write, had the critics of language become fastidious. Hence, perhaps, more carelessness and inaccuracy of expression may be discovered in his style, than if he had begun to write at a later period. But the age that censures with severity the style of Hume and of Addison, will not be merciful to that of Craig. Perhaps the method, structure, or what is properly the composition of his Discourses, may appear less exceptionable than the expression. They possess a great share of that excellence which is conferred by unity of design, and perspicuity of arrangement. The divisions are natural; the parts are easily connected with one another; and the leading observations or propositions are often so stationed in regard to their importance or ingenuity, that by a delightful progress, they seem to rise on the mind. But in order to point out more particularly our author’s own opinion of pulpit eloquence, I will conclude this account with the following passages from his Sermon on the character of a Minister. “ In the Discourses of our blessed Lord, we meet with nothing of that laboured
“ eloquence which is the mark of human art, and tends rather to excite a vain applause
“ and admiration of the art itself, than a serious impression of the things which it is de-
“ signed to represent.—On this account, a man of a discerning and unbiassed mind will
“ be able to perceive a mighty difference betwixt the Gospel, as it lies before us in its
“ native and original simplicity, and those descriptions that are given of it in the laboured
“ artificial forms into which it has been modelled by the hand of man; a difference not
Vol. IV. 5 O “ unlike

"unlike to what is found in all the other works of God and man. The works of God are solemn and majestic, and by their inexpressible grandeur and simplicity enlarge and elevate the heart. The works of man, though modelled by the nicest art and skill, are but little and diminutive; and, however they may amuse the fancy, seldom raise any great or elevating emotions in the heart. For this reason it might at least deserve inquiry, if it would not better serve the original intentions of the Gospel, to represent it to the world, as nearly as possible, in that artless and divine simplicity in which it was delivered by its blessed Author."]

CRANMER (THOMAS), the most eminent Archbishop that ever sat in the See of Canterbury, was the son of *Thomas Cranmer, Esq* [A]; and of Agnes daughter of Laurence Hatfield of Willoughby in Nottinghamshire (a). He was born at (*) Aslahton in that county, July 2, 1489 (b), and educated in Grammar learning under a rude and severe Parish-Clerk, of whom he learned little, and endured much (c). In 1503, at the age of fourteen, he was admitted into Jesus College in Cambridge, of which he became Fellow (d). Here he studied the Sophistry, and useless learning of those times, till the age of twenty-two. For the next four or five years he applied himself to polite Literature; and for three years more, to the study of the Scriptures (e). After he was Master of Arts, he married a Gentleman's daughter, named Joan (f), living at the Dolphin, opposite Jesus-Lane (g). Losing by that his Fellowship, he went and lived with her at the Dolphin, and became Reader of the common Lecture in Buckingham, now Magdalen, College (h). But his wife dying in child-bed within a year, he was again admitted Fellow of Jesus College (i). Upon Cardinal Wolsey's foundation of his new College at Oxford, Cranmer was nominated to be one of the Fellows; but he refused the offer (k). In 1523, and the 34th year of his age, he was made Doctor of Divinity, Reader of the Theological Lecture in his own College, and one of the Examiners of those that took the degrees in Divinity (l). The most immediate cause of his advancement to the greatest favour with King Henry VIII. and, in consequence of that, to the highest dignity in the Church of England, was the Opinion he gave in the matter of that King's Divorce. For having, on account of the plague at Cambridge, retired to Waltham-Abbey in Essex, at the house of one Mr. Cressy, whose wife he was related to, and whose sons were his pupils at the University; Edward Fox the King's Almoner, and Stephen Gardiner the Secretary, happened accidentally to come to that house (m). Here, the conversation turning upon what then mostly employed the Nation's thoughts, namely, the King's Divorce; Cranmer, who was well known to the two others, being desired by them to speak upon that point, delivered it as his opinion, that 'it would be much better, to have this question, *Whether a man may marry his brother's wife, or no?* decided and discussed by the Divines, and by the authority of the word of God, than thus from year to year to prolong the time by having recourse to the Pope: that there was but one truth in it, which the Scripture would soon declare and manifest, being handled by learned men; and that might be done as well in England as in the Universities here, as at Rome, or elsewhere (n). This opinion being communicated by Dr. Fox to the King, his Majesty approved of it much; saying, 'that that man (meaning Cranmer) had the fow by the right ear (o). Whereupon Cranmer was sent for to Court, made the King's Chaplain, ordered to write upon the subject of the Divorce, furnished with books for that purpose, and placed in the family of Thomas Boleyn Earl of Wiltshire and Ormond (p). When he had finished his book [B], he went to Cambridge to dispute upon that point, and brought several over to his opinion (q). About this time he was presented to a Living, and made Archdeacon of Taunton (r). In 1530 he was sent, with some others, into France, Italy, and Germany, to discuss the affair of the King's Marriage (s). At Rome he got his book presented to the Pope, and offered to dispute openly against the validity of King Henry's Marriage; but no one chose to engage him (t). While he was at Rome, the Pope constituted him his Pœnitentiary throughout England, Ireland, and Wales (u). In Germany he was sole Ambassador upon the forementioned affair; and in 1532 concluded a Treaty of Commerce between England and the Low-Countries (w). He was also employed on an Embassy to the Duke of Saxony, and other Protestant Princes (x). During his residence in Germany, he married, at Nuremberg, a second wife, named Anne, niece of Oslander's wife (y). Upon the death of Archbishop Warham in August 1532, Cranmer was nominated for his successor; but he refused to accept of that Dignity, unless he was to receive it immediately from the King without the Pope's intervention (z). Before his consecration, the King so far engaged him in the business

[A] *Son of Thomas Cranmer, Esq.* That Family is said to have come in with William the Conqueror, and to have been fixed for many generations in Nottinghamshire, and in Lincolnshire, where there is a House still called Cranmer-hall. There were still in France some of his name and family in King Henry the VIIIth's time; one whereof came in company with the French Ambassador; to whom, for name, or re-

lation sake, our Bishop gave a noble Entertainment. The Family's Arms, were, Three Cranes; but King Henry the VIIIth altered them to Three Pelicans (1).

[B] *When he had finished his book.* In that book, he showed, by the authorities of the Scriptures, of general Councils, and ancient writers, that the Bishop of Rome (or the Pope) had no such authority, as that he might dispense with the word of God (2).

of

of his Divorce, that he made him a party and an actor almost in every step he took in that affair (a). It was he that pronounced the sentence of Divorce between King Henry and Queen Catharine at Dunstable, May the 23d, 1533; and he likewise it was who married him to Anne Boleyn [C], and confirmed her marriage on the 28th following. March the 30th, 1533, he was consecrated Archbishop of Canterbury (b), by the Bishops of Lincoln, Exeter, and St. Asaph, when he made an unusual Protestation [D]. The Temporalities of the Archbishoprick were restored to him the 29th of April following (c). Soon after he forbade all preaching throughout his Diocese, and visited it this year in December (d). The Pope threatening him with excommunication, on account of his sentence against Queen Catharine, he appealed from his Holiness to a general Council; and, in the ensuing Parliaments, strenuously disputed against the Pope's supremacy (e). All along he showed himself a zealous promoter of the Reformation; and, as the first step towards it, procured the Convocation to petition the King that the Bible might be translated into English. When that was obtained, he diligently encouraged the printing and publication of it, and caused it to be recommended by Royal Authority, and to be dispersed as much as he possibly could (f). Next, he forwarded the dissolution of the Monasteries [E], which were one of the greatest obstacles to a reformation (g); and, in every point, he endeavoured by all gentle and human means to restore the Church of England to its true and original purity. In 1535 he performed a Provincial Visitation, in order to recommend the King's Supremacy (h); and preached upon that subject in several parts of his Diocese [F]. In 1536, he divorced King Henry from Anne Boleyn (i). In 1537 he visited his Diocese, and endeavoured to abolish the superstitious observation of Holidays (k). In 1538, he was in a commission against the Anabaptists, and visited the Diocese of Hereford (l). The next year, he and some of the Bishops fell under the King's displeasure, because they could not be brought to give their consent in Parliament, that the Monasteries should be suppressed for the King's sole use (m). He also strenuously opposed the Act for the six Articles, in the House of Lords, speaking three days against it (n); and upon the passing of that Statute sent away his wife into Germany (o). In 1540 he was one of the Commissioners for inspecting into matters of Religion, and explaining some of its chief Doctrines (p). The result of their commission was, the book intitled 'A necessary Erudition of any Christian man.' After Lord Cromwell's death, (in whose behalf he had written to the King), he retired, and lived in great privacy, meddling not at all with State affairs (q). In 1541, he gave orders, pursuant to the King's directions, for taking away superstitious Shrines: and exchanging Bishopsbourn for Bekebourn, united the latter to his Diocese (r). In 1542, he procured the 'Act for the advancement of true Religion, and the abolishment of the contrary;' which moderated the rigour of the Six Articles (s). But, the year following, some enemies preferring accusations against him [G], he had like to have been ruined, had not the King interposed in his behalf (t). Nay, he was complained of in the House of Commons [H], and in the Privy-Council [I], and was very near being sent to

[C] He likewise it was who married him to Ann Boleyn.] This is expressly asserted by the author of *Antiquitates Britannicæ* (3). But the Lord Herbert says (4), they were privately married by Rowland Lee afterwards Bishop of Coventry and Litchfield; none being present but the Lady Ann's father, mother, and brother; Dr. Cranmer, and the Duke of Norfolk.

[D] When he made an unusual Protestation.] The curious Reader may see the form of it, in the Appendix to Strype's Memorials of Archbishop Cranmer, N° V. p. 9. His Design was by this expedient to save his Liberty, to renounce every clause in his Oath which barred him doing his duty to God, the King, and his Country. A certain Church Historian (5) who loves upon all occasions to blacken our first Reformers, thinks there was something of human infirmity in this management, because it was not made at Rome to the Pope, nor by Cranmer's proxies there, before the obtaining of the Bulls.

[E] He forwarded the dissolution of the Monasteries.] Instead of those nurseries of Idleness, and out of their Revenues, he had projected, That there should be a Provision made, in every Cathedral, for Readers of Divinity, and of Greek and Hebrew, and a great number of Students to be both exercised in the daily worship of God, and trained up in study and devotion; whom the Bishop might transplant out of this nursery, into all the parts of his Diocese. And thus every Bishop should have had a College of Clergymen under his eye, to be preferred according to their merit. But this Design miscarried (8).

[F] Preached upon that subject, in several parts of his Diocese.] In his Sermons, he showed, 1. That the Bishop of Rome was not God's vicar upon earth, as he was taken. Here he declared by what arts and crafts

the Bishop of Rome had obtained his usurped authority. 2. That the Holiness that See so much boasted of, and by which name Popes affected to be stiled, was but a Holiness in name; and that there was no such Holiness at Rome. And here he launched out into the Vices of the Court of Rome. 3. He inveighed against the Bishop of Rome's Laws; which were miscalled *Divinæ Leges*, and *Sacri Canones* (9).

[G] Some enemies preferring accusations against him.] These enemies were, Richard Thornden Suffragan of Dover, Arthur Sentleger, Richard Parkhurst, William Gardiner, John Milles, all Canons of Canterbury. And Robert Serles, and Edmund Shether, two of the six Preachers there: with Dr. Willoughby, the King's Chaplain. The sum of their Accusations against the Archbishop and his Chaplains was, That they opposed the six Articles, and other parts of Popery. See Strype's Memorials of Archbishop Cranmer (10).

[H] He was complained of in the House of Commons.] By Sir John Gostwick, one of the Knights for Bedfordshire; for preaching heresy against the Sacrament of the altar. But the King severely rebuked Gostwick for his impertinence (11).

[I] And in the Privy-Council.] The substance of his Accusation there, was, 'That he, with his learned men, had so infected the whole Realm with their unfavoury Doctrine, that three parts of the land were become abominable hereticks. And that it might prove dangerous to the King, being likely to produce such commotions and uproars, as were sprung up in Germany. And therefore they desired, that the Archbishop might be committed to the Tower, till he could be examined.' The whole was a contrivance of Gardiner's (12).

the Tower; but the King again protected him, and gave him his Ring, as a token that he took the affair into his own hands (u). In the year 1545, he undertook to reform the Canon-Law; but the book he compiled upon that subject was, through Bishop Gardiner's artifices, never confirmed by the King. He likewise corrected some Service or Prayer-books (w). Upon King Henry's decease, he was one of the Executors of his Will, and one of the Regents of the Kingdom (x). February the 20th, 1545-6, he crowned King Edward VI. to whom he had been godfather; as he was also to the Lady Elizabeth (y). Soon after, he took out a Commission for executing his office of Archbishop (z); and caused the Homilies to be composed, being himself the author of some of them; and likewise encouraged the translation of Erasmus's paraphrase on the New Testament (a). He also laboured earnestly in the Reformation of Religion: and, for that purpose, procured the repeal of the Six Articles; the establishment of the Communion in both kinds; and a new office for that Sacrament; the revival and amendment of the rest of the Offices of the Church; frequent preaching; a Royal visitation to inspect into the manners and abilities of the Clergy; and visited his own Diocese himself for the same purpose (b). He likewise showed himself a patron to the Universities, in defending their Rights, securing their Revenues, and encouraging the Learning there professed and taught (c). In 1549, he was one of the Commissioners for examining Bishop Bonner, with a power to imprison or deprive him of his Bishoprick (*). Upon the insurrection in Devonshire, he expressed his zeal for Religion and his Prince, by giving an excellent and full answer to the Rebels articles, and ordered Sermons to be composed and preached upon that occasion (d). The same year he ordained several Priests and Deacons according to the new form of Ordination in the Common-Prayer-Book; which, through the Archbishop's care, was now finished and settled by Act of Parliament [K]. A review was made of this book towards the end of the next year, and several things changed or amended that were thought to favour too much of superstition (e). In 1552, it was printed again with amendments and alterations, by the Archbishop's care, and authorized by Parliament [L]. This same year, he and some others compiled the Articles of Religion, and caused them to be enjoined by the King's authority (f). He confined not his care to the Church of England, but extended it also to those Protestant Foreigners who fled to England [M], by obtaining Churches for them, and recommending them to the favour and protection of the Crown (g). Another point that much employed his thoughts, was, to preserve the Revenues of the Church, which the greedy Courtiers were swallowing up without mercy, and parceling out among themselves (h). As the Archbishop had in 1534 endeavoured to save the lives of Bishop Fisher and Sir Thomas More (i); so now, when Tostal Bishop of Durham came into trouble, and a Bill was brought into the House of Lords for attainting him for misprision of Treason, Cranmer spoke freely, nay protested, against it, though they two were of different persuasions (k). In 1553, he opposed the new settlement of the Crown upon Lady Jane Gray, and would no way be concerned in that affair, (though at last, through many importunities, he was prevailed upon to set his hand to it,) neither would he join in any of Dudley's ambitious projects (l). However, upon King Edward the VIth's decease, he appeared for Jane Gray. Soon after, it being reported that he had offered to sing mass at the funeral of the late King, he vindicated himself in a Declaration (m). But now his Troubles came upon him apace, after Queen Mary's accession to the Throne. He was, first, ordered to appear before the Council, and bring an inventory of his Goods; which he did August the 27th, when he was commanded to keep his house, and be forth-coming. September the 13th, he was again summoned before the Council, and enjoined to be at the Star-Chamber the next day, when he was committed to the Tower (n); partly, for setting his hand to the instrument of the Lady Jane's succession; and, partly, for the public offer he had made a little before, of justifying openly the religious Proceedings of the late King (o). Some of his friends, foreseeing the storm that was likely to fall upon him, advised him to fly, but he absolutely refused [N]. In the ensuing Parliament, on November the 3d, he was attainted, and at Guild-hall found guilty of High Treason; whereupon the

fruits

fruits of his Archbishoprick were sequestered. However, upon his humble and repeated application, he was pardoned the Treason, but it was resolved he should be proceeded against for heresy (*p*). In April 1554, he, and Ridley and Latimer, were removed to Oxford, in order for a public disputation with the Papists (*q*); which was accordingly held there towards the middle of the month, with great noise, triumph, and impudent confidence on the Papists side, and with as much gravity, learning, modesty, and convincing sufficiency on the side of the Protestant Bishops [*O*]. The 20th of April, two days after the end of these disputations, Cranmer and the two others were brought before the Commissioners, and asked, whether they would subscribe (to Popery)? which they unanimously refusing, were condemned as hereticks (*r*). From this sentence the Archbishop appealed to the just judgment of the Almighty; and wrote to the Council, giving them an account of the disputation, and desiring the Queen's pardon for his treason, which it seems was not yet remitted (*s*). By the Convocation, which met this year, his 'Defence of the true and Catholic Doctrine of the Sacrament of the Body and Blood of our Saviour Christ,' was ordered to be burnt (*t*). Some of his friends petitioned the Queen in his behalf; putting her in mind, how he had once preserved her in her father's time, by his earnest intercessions with him for her [*P*]; so that she had reason to believe he loved her, and would speak the truth to her, more than all the rest of the Clergy. But all his friends endeavours were ineffectual (*u*). The Sentence pronounced against him by Weston at Oxford being void in Law, because the Pope's authority was not yet re-established in England, a new Commission was sent from Rome for his trial and conviction. Accordingly, on September the 12th, 1555, he appeared before the Commissioners [*Q*] at St. Mary's Church, Oxon, where he was accused of blasphemy, perjury, incontinency, and heresy [*R*], against all which he vindicated himself (*w*). At last, he was cited to appear at Rome within eighty days, to answer in person; which he said he would do, if the King and Queen would send him, but no care was taken to send him. Therefore, the Pope dispatched, on December the 14th, his Letters executory to the King and Queen, and to Bonner and Thirlby Bishops of London and Ely, to degrade and deprive him (*x*). In these Letters, Cranmer was declared contumacious, for not appearing at Rome within eighty days, according to his citation: which was a most shameless and infamous allegation; for, how could he possibly appear at Rome, when he was all the while kept a prisoner? However, upon the coming of the letters, Bonner and Thirlby, with Dr. Martin and Dr. Story the King's and Queen's Proctors, went to Oxford to degrade him. They dressed him in all the garments and ornaments of an Archbishop, only in mockery every thing was of canvas, and old clouts: and then he was, piece by piece, stripped of all again. When they came to take the Crosier out of his hand, he refused to part with it, and pulled out an Appeal, whereby he appealed to the next general Council (*y*). After he was degraded, they put him on a poor yeoman-beadle's gown, thread-bare, and a towns-man's cap, and remanded him to prison (*z*). From thence he wrote Letters to the Queen, to give her a true and impartial account of what had passed at his degradation, to prevent mis-reports, and to justify himself in what he had said and done (*a*). Hitherto the Archbishop had manifested a great deal of courage, wisdom, and fortitude in his sufferings, but at last human frailty made him commit such a fault, as was the greatest blemish of his life. For, through flatteries, promises, importunities, threats, and the fear of death, he was prevailed upon to sign a Recantation [*S*], wherein he renounced the Protestant Religion, and embraced again all the Errors of Popery;

[*O*] *He, and Ridley, and Latimer, were removed to Oxford in order for a public Disputation, &c.* The Questions there disputed upon, were these, 1. In the Sacrament of the Altar, the natural body of Christ conceived of the Virgin Mary, and his natural blood, are really present, under the species of bread and wine, by virtue of the divine word pronounced by the Priest. 2. After the consecration, there doth not remain the substance of bread and wine, nor any other substance, but the substance of Christ, God and man. 3. In the mass, there is a lively propitiatory sacrifice of the Church, for the sins as well of the living as of the dead (*).

[*P*] *How he had preserved her in her father's time, &c.* Namely, when the King was resolved to send her to the Tower, and to make her suffer as a subject: because she would not obey the Laws of the Realm, in renouncing the Pope's Authority and Religion (18).

[*Q*] *He appeared before the Commissioners.* Brooks Bishop of Gloucester was appointed upon this occasion Subdelegate to Cardinal Puteo, to whom the Pope had committed this process; and Martin, and Story, Doctors of the Civil Law, were the Queen's Commissioners (19).

[*R*] *Where he was accused of blasphemy, perjury, incontinency, and heresy.* He was accused of blasphemy and heresy for his writings against Popery; of perjury, Vol. IV.

for breaking his oath to the Pope; and of incontinency, or adultery, on account of his being married (20).

[*S*] *He was prevailed upon to sign a Recantation.* We are informed by the industrious Mr. Strype (21), that Archbishop Cranmer was subtilly drawn in by the Papists to subscribe six different Papers; the first being expressed in ambiguous words, capable of a favourable construction, the five following were added as explanations of it. That *first* Recantation was in these words, 'For as much as the King's and Queen's Majesties, by consent of their Parliament, have received the Pope's Authority within this Realm, I am content to submit myself to their Laws herein, and to take the Pope for chief Head of this Church of England, so far as God's Laws, and the Laws and Customs of this Realm, will permit.' In the *next*, he submitted himself to the Catholic Church of Christ, and unto the Pope, supreme Head of the same Church. In the *third*, he submitted to the King and Queen, and to all their Laws, as well concerning the Pope's supremacy, as others: and promised, that he would stir and move all others to live in quietness and obedience to their Majesties. As for his Book, he was content to submit to the Judgment of the Catholic Church, and the next General Council. This was followed by a *fourth*, wherein he professed firmly, stedfastly, and assuredly to believe in all Articles and

Popery; which Recantation was immediately printed and dispersed about by his enemies (b). Notwithstanding that, the merciless Queen, not satisfied with this conquest, resolved to glut her revenge, by committing Cranmer to the flames. Accordingly, she sent for Dr. Cole, Provost of Eton; and gave him instructions to prepare a Sermon for that mournful occasion (c). And on the 24th of February a Writ was signed for the burning of Cranmer (d). The 21st day of March, which was the fatal day, he was brought to St. Mary's Church, and placed on a kind of stage over against the pulpit, where Dr. Cole was to preach. While Cole was haranguing, the unfortunate Cranmer expressed great inward confusion; often lifting up his hands and eyes to heaven; and frequently pouring out floods of tears (e). At the end of the Sermon, when Cole desired him to make an open profession of his Faith, as he had promised him he would; he, first, prayed in the most fervent manner; then made an exhortation to the people present, not to set their minds upon the world; to obey the King and Queen; to love each other; and to be charitable. After this he made a Confession of his Faith, beginning with the Creed, and concluding with these words, 'And I believe every word and sentence taught by our Saviour Jesus Christ, his Apostles and Prophets, in the Old and New Testament.—And now, added he, I come to the great thing, that so much troubleth my conscience more than any thing I ever did or said in my whole life; and that is the setting abroad a writing contrary to the truth, which I here now renounce as things written with my hand contrary to the truth which I thought in my heart, and written for fear of death, and to save my life if it might be; that is, all such bills and papers which I have written or signed with my hand since my degradation, wherein I have written many things untrue. And forasmuch as my hand offended, writing contrary to my heart, my hand shall first be punished; for, may I come to the fire, it shall be first burned. As for the Pope, I refuse him as Christ's enemy and antichrist, with all his false doctrine. And as for the Sacrament, I believe as I have taught in my book against the Bishop of Winchester (f).' Thunderstruck as it were with this unexpected Declaration, the enraged Popish crowd admonished him not to dissemble: 'Ah, replied he with tears, since I lived hitherto, I have been a hater of falsehood, and a lover of simplicity, and never before this time have I dissembled (g).' Whereupon, they pulled him off the stage with the utmost fury, and hurried him to the place of his martyrdom, over-against Baliol-College (h); where he put off his clothes in haste, and standing in his shirt, and without shoes, was fastened with a chain to the stake (i). Some pressing him to agree to his former recantation, he answered, showing his hand, 'This is the hand that wrote it, and therefore it shall first suffer punishment (k).' Fire being applied to him, he stretched out his right hand into the flame, and held it there unmoved (except that once with it he wiped his face) till it was consumed, crying with a loud voice, 'This hand hath offended;' and often repeating, 'This unworthy right hand (l).' At last, the fire getting up, he soon expired, never stirring or crying out all the while, only keeping his eyes fixed to heaven, and repeating more than once, 'Lord Jesus receive my spirit.' Such was the end of the renowned Thomas Cranmer, in the 67th year of his age. As to his Character: He is represented as a man of an open and generous Mind, of great Sincerity and Candour, a lover of Truth, and a declared enemy to Falshood and Superstition: Humble and affable; and in every condition the same. Gentle and mild in his Temper; always ready to forgive, and be reconciled: Not soon heated, nor apt to give his opinion rashly of persons, or things. And though his Gentleness often exposed him to his Enemies, who from it took an advantage to use him ill, yet it did not lead him into such a weakness of Spirit, as to consent to every thing that was uppermost: But, in general, he never dissembled his opinion, nor disowned his friend. His Charity and Munificence to the indigent were extensive, and his Hospitality well regulated, not bestowed upon the Rich and the Powerful, but on his honest and poor Neighbours. He

Points of the Christian Religion and Catholic Faith, as the Catholic Church doth believe. Moreover, as concerning the Sacraments, he declared he believed unfeignedly in all points as the said Catholic Church did. In the *fifth* Paper, which is that in Fox (22), and has been thought to be his only Recantation, they required of him, to renounce and anathematize all Lutheran and Zuinglian heresies and errors; to acknowledge the one only Catholic Church, to be that whereof the Pope is the Head; and to declare him Christ's Vicar. Then followed an express acknowledgment of Transubstantiation, the seven Sacraments, and of all the Doctrines of the Church of Rome in general. A *sixth* was still required of him, which was drawn up in so strong terms, that nothing was capable of being added to it. For it contained a large acknowledgment of all the Popish errors and corruptions, and a most grievous accusation of himself as a blasphemous, enemy of Christ, and murderer of Souls, on account of his being the author of King Henry's divorce, and of all the calamities, schisms,

and heresies of which that was the fountain. This was subscribed on the 18th of March. These six Papers were, soon after his death, sent to the press by Bonner, and published with the addition of another, which they had prepared for him to speak at St. Mary's, before his Execution: and though he then spoke to a quite contrary effect, and revoked his former Recantations, Bonner had the confidence to publish this to the world, as if it had been approved and made use of by the Archbishop.—In 1736, William Whiston, M. A. published a little book entitled, 'An Enquiry into the Evidence of Archbishop Cranmer's Recantation: or Reasons for a suspicion that the pretended Copy of it is not genuine.' In that book he supposes, that what Cranmer signed, was only the first part of the Recantation printed in Fox's Acts and Monuments, as far as the words—'without which there is no Salvation,'—that the rest was added by the Papists, but that Cranmer never set his hand thereto.

had

had a good Judgment, but no great quickness of apprehension, nor closeness of stile, which was diffused (m). However, he was a man of great Learning in Divinity, and in the Civil and Canon Laws (n). He generally spent about three parts of the day in study (o); and being of a most wonderful Diligence, he drew out of all the Authors he read, every thing that was remarkable, digesting those quotations into Common-place. He published, and left behind him in manuscript, several works [T]. As he was a lover of Learning,

[T] He published, and left behind him in manuscript, several works.] His printed works are, I. An account

of Mr. Pole's book, concerning King Henry VIIIth's marriage (23). II. Several Letters, to divers persons — To King Henry VIII — To Secretary Cromwel. — To Sir William Cecil. — To foreign Divines

(24). III. Three Discourses, upon his review of the King's book, intituled, *The Erudition of a Christian man* (25). IV. Other Discourses of his (26). V.

The Bishops Book, in which he had a part. VI. Answers to the fifteen Articles of the Rebels in Devonshire in 1549 (27). VII. The examination of

most points of Religion (28). VIII. A Form for the alteration of the Mass into a Communion (29).

IX. Some of the Homilies. X. A Catechism, intituled, A short Instruction to Christian Religion, for the singular profit of Children and young People (30).

XI. Against Unwritten Verities (31). XII. A Defence of the true and Catholic Doctrine of the Sacrament of the Body and Blood of our Saviour Christ;

with a Confutation of sundry Errors concerning the same: Grounded and established upon God's holy word, and approved by the consent of the most ancient Doctors of the Church. This was translated into

Latin by John Young. In opposition to it, Gardiner published, 'An Explication and Assertion of the true Catholic Faith touching the most blessed Sacrament of the Altar, with the Confutation of a book

'wrote against the same.' XIII. Cranmer replied in the following book, 'An Answer by the Reverend Father in God, Thomas Archbishop of Canterbury, Primate of all England, and Metropolitan,

'unto a crafty and sophistical Cavillation, devised by Stephen Gardiner, Doctor of Law, late Bishop of Winchester, against the true and godly Doctrine of

'the most Holy Sacrament of the Body and Blood of our Saviour Christ. Wherein is also, as occasion serveth, answered such Places of the Book of Dr.

'Richard Smith, as may seem any thing worthy the answering. Also a true Copy of the book written,

'and in open Court delivered by Dr. Stephen Gardiner, not one word added or diminished, but faithfully in all Points agreeing with the original.'

Lond. 1551. reprinted 1580. It was translated into Latin by Sir John Cheke. An Answer was also made to this book by Ste. Gardiner, under the feigned name of *Marcus Antonius Constantinus*, and intituled,

Confutatio cavillationum, quibus sacrosanctum Eucharistiae Sacramentum ab impiis Capernaitis impeti solet. Paris 1552. XIV. Cranmer began an Answer to

this, and finished three parts of it, but lived not to compleat the whole (32). XV. Preface to the English translation of the Bible. XVI. A Speech in the

House of Lords, concerning a general Council (33). XVII. Letter to King Henry VIII. in justification of

Anne Boleyn, May 3, 1535 (34). XVIII. The Reasons that led him to oppose the Six Articles (35). For this he had like to come into great trouble, as may

be seen in Fox (36). XIX. Resolution of some Questions concerning the Sacrament (37). XX. Injunctions given at his visitation within the Diocese of Hereford (38). XXI. A collection of passages out

of the Canon-Law, to show the necessity of reforming it (39). XXII. Some Queries in order to the correcting of several abuses (40). XXIII. Concerning a farther reformation, and against sacrilege (41).

XXIV. Answers to some Queries concerning Confirmation (42). XXV. Some considerations offered to King Edward VI. to induce him to proceed to a

farther reformation (43). XXVI. Answer to the Lords of the Privy-Council (44). XXVII. Manifesto against the Mass (45).

Those works of his which still remain in manuscript, are I. Two large Volumes of Collections out of Holy Scripture, and the ancient Fathers, and later

Doctors and Schoolmen. The first Volume contains 545 pages, and the second above 559. They are

chiefly upon the points controverted between us and the Church of Rome; namely, about their seven Sacraments, Invocation of Saints, Images, Relicks, of

true Religion and Superstition, the Mass, Prayer, the Virgin Mary, &c. These two Volumes are in the

King's Library (46). When they were offered to sale, they were valued at 100*l*. but Bishop Beveridge, and Dr. Jane, appraisers for the King, brought down

the price to 50*l* (47). II. The Lord Burleigh had fix or seven Volumes more of his writing (48). III. And

Dr. Burnet mentions two Volumes besides, that he saw, but they are supposed to be now lost (49). IV. There are also several Letters of his in the Collections of Sir Robert Cotton (50).

M.

* * [The character of Archbishop Cranmer was in many respects extremely amiable, but it must at the same time be acknowledged, that there were several

parts of his conduct which were very censurable. Some just observations on this subject have been made by the ingenious Mr. Gilpin, in his elegant Life of

Archbishop Cranmer, published, in 8vo. in 1784. That Gentleman remarks, that 'the character of

'Archbishop Cranmer hath been equally the subject of exaggerated praise, and of undeserved censure

'(51).' The most indefensible parts of the Archbishop's character are the readiness with which he sometimes concurred in the unjustifiable proceedings

of Henry VIII. and the instances wherein he shewed himself to be actuated by intolerant principles.

He first recommended himself to Henry by the zeal which he displayed in promoting the King's Divorce from Queen Catharine; and Mr. Gilpin, speaking

of his undertaking to collect the opinions of the foreign Universities in Henry's behalf, makes the following observations: 'This expedition so readily

'projected, and so chearfully undertaken, does not perhaps place Dr. Cranmer in the most advantageous point of light. There were good political

'reasons, no doubt, to induce the King to wish for a divorce. His marriage with Catharine was by no

'means generally approved, either at home, or abroad: the legitimacy of Mary, in treaties of

'marriage with neighbouring Princes, had been questioned; and the terrible effects of the late civil

'wars in England, occasioned by disputed titles, were wounds not yet entirely healed. Male issue

'to the King, which might prevent such consequences, was therefore very desirable to all men.

'But reasons of State, however admissible in a Cabinet, should never be supposed to influence a church-

'man. We allow, that Dr. Cranmer might think the marriage wrong: but though it possibly might

'be a point of conscience with the King, it could however be none with him; and there was manifestly a difference between advising not to do a

'thing; and advising to undo it, when already done; at least in a matter of so disputable a nature. He

'knew, that, in the Old Testament, the marriage of a sister was allowed; and among the Patriarchs

'often practised: and that the marriage of a brother's wife was, in some cases, enjoined. The New

'Testament was silent on the subject. There could, therefore, be no moral turpitude in it: nor

'any thing but the common law, and usage of nations, to restrain it.

'On the other hand, the baseness, and ungenerous behaviour, which followed the contrary part, were

'evident at sight. To repudiate a woman, with whom the King had cohabited near twenty years

'as his wife; and to illegitimate a daughter, bred up in the highest expectations, and now marriageable, were acts of such cruelty, that it seems to indicate a want of feeling to be in any degree accessory to them. To this may be added, that the notoriety of the King's passion for Anne Boleyn,

'which all men believed to be, if not the first mover,

Learning, so was he also an encourager of it; allowing yearly Salaries to many Scholars in Germany, and other places (p). With regard to some of his Opinions; he had the same

at least the principal spring of his pretended scruples, threw a very indelicate imputation on all who had any concern in the affair. No serious Churchman, one would imagine, could be fond of the idea of administering to the King's passions. It is with concern, therefore, that we see a man of Dr. Cranmer's integrity and simplicity of manners, acting so much out of character, as to compound an affair of this kind, if not with his conscience, at least with all delicacy of sentiment; and to parade through Europe, in the quality of an Ambassador, defending every where the King's *pious intentions*.

But the cause animated him. With the illegality of the King's marriage, he endeavoured virtually to establish the insufficiency of the Pope's dispensation; and the latter was an argument so near his heart, that it seems to have added merit to the former. We cannot, indeed, account for his embarking so zealously in this business, without supposing his principal motive was to free his country from the tyranny of Rome, to which this step very evidently led. So desirable an end would, in some degree, he might imagine, sanctify the means (52).

(52) Life of Archbishop Cranmer, p. 19
—22.

Of two of the instances of persecution, in which Archbishop Cranmer was concerned, Mr. Gilpin gives the following account. 'Joan Bocher and George Paris were accused, though at different times, one for denying the humanity of Christ; the other for denying his divinity. They were both tried, and condemned to the stake: and the Archbishop not only consented to these acts of blood; but even persuaded the aversion of the young King into a compliance. "Your Majesty must distinguish (said he, informing his Royal Pupil's conscience) between common opinions, and such as are the essential articles of faith. These latter we must on no account suffer to be opposed." Mr. Gilpin justly observes, that "nothing even plausible can be suggested in defence of the Archbishop on this occasion; except only that the spirit of Popery was not yet wholly repressed (53)." These instances of injustice and barbarity were, indeed, totally indefensible, and a great disgrace to Cranmer, and to all who were concerned in them. It does not appear, that he endeavoured to promote the death of Lambert; but, as Mr. Gilpin observes, "it were to be wished he had rid his hands of the disputation

(53) Ibid. p. 131,
132.

(54) Ibid. p. 59.

"likewise (54)." The public disputation, in which Cranmer bore some part, proved the means of bringing Lambert to the stake.

It has been observed in the text, that Cranmer "was one of the examiners of those that took the degrees in Divinity." In this office he was eminently useful. Mr. Strype says, that "out of the value the University had of his learning, he was appointed one of the examiners of such as commenced Bachelors and Doctors in Divinity. According to whose approbations, the University allowed them to proceed. In which place he did much good; for he used to examine these candidates out of the Scriptures. And by no means would let them pass, if he found they were unskilful in it, and unacquainted with the History of the Bible. So were the Friars especially, whose study lay only in school-authors. Whom, therefore, he sometimes turned back as insufficient, advising them to study the Scriptures for some years longer, before they came for their degrees, it being a shame for a Professor in Divinity to be unskilled in the book, wherein the knowledge of God, and the grounds of Divinity lay. Whereby he made himself from the beginning hated by the Friars. Yet some of the more ingenuous sort of them afterwards rendered him great and public thanks for refusing them; whereby, being put upon the study of God's word, they attained to more sound knowledge in religion. One of these was Dr. Barat, a White Friar, who lived afterwards in Norwich (55)."

(55) Memorials of Archbishop Cranmer, p. 3.

One of the most honourable transactions of Arch-

bishop Cranmer's life, was the firm stand that he made against the Act of the Six Articles. This Act was so strongly supported by the King, that even the Protestants in Parliament made little opposition to it. But Cranmer opposed it with great zeal and steadiness. 'The good Archbishop,' says Mr. Gilpin, 'never appeared in a more truly Christian light, than on this occasion. In the midst of so general a defection, (for there were numbers in the House, who had hitherto shewn great forwardness in reformation), he alone made a stand. Three days he maintained his ground; and baffled the arguments of all opposers. But argument was not their weapon; and the Archbishop saw himself obliged to sink under superior power. Henry ordered him to leave the House. The Primate refused: "It was God's business," he said, "and not man's." And when he could do no more, he boldly entered his protest. Such an instance of fortitude is sufficient to wipe off many of those Courtly stains, which have fastened on his memory (56).'

(56) Life, p. 71.

His behaviour in the case of the Duke of Norfolk was also entitled to great commendation. 'The last Act of this reign,' says Mr. Gilpin, 'was an Act of blood; and gave the Archbishop a noble opportunity of shewing, how well he had learned that great Christian lesson of forgiving an enemy. Almost without the shadow of justice, Henry had given directions to have the Duke of Norfolk attainted by an Act of Parliament. The King's Mandate stood in lieu of guilt; and the Bill passed the House with great ease. No man, except the Bishop of Winchester, had been so great an enemy to the Archbishop as the Duke of Norfolk. He had always thwarted the Primate's measures; and oftener than once had practised against his life. How many would have seen with secret pleasure the workings of Providence against so rancorous an enemy; satisfied in having themselves no hand in his unjust fate! But the Archbishop saw the affair in another light: he saw it with horror; and although the King had in a particular manner interested himself in this business, the Primate opposed the Bill with all his might; and when his opposition was vain, he left the House with indignation, and retired to Croydon (57).'

(57) Ibid. p. 109,
110.

He was remarkable for the placability of his temper, and for shewing kindness to those by whom he had been greatly injured. Hence it is mentioned, in Shakespeare's Henry the Eighth, as a common saying concerning him:

— "Do my Lord of Canterbury
"But one shrewd turn, and he's your friend for
"ever."

Bishop Burnet takes notice of some malevolent accusations that had been privately brought to the King against Cranmer, with a view to ruin him, including a charge of heresy, and on which subject his Majesty conversed with him; and the Bishop adds: 'His candour and simplicity wrought so on the King, that he discovered to him the whole plot that was laid against him; and said, that instead of bringing him to any trial about it, he would have him try it out, and proceed against those his accusers. But he excused himself, and said it would not be decent for him to sit Judge in his own cause. But the King said to him, he was resolved none other should judge it, but those he should name. So he named his Chancellor, and his Register; to whom the King added another: and a commission being given them, they went into Kent, and sat three weeks to find out the first contrivers of this accusation. And now every one disowned it, since they saw he was still firmly rooted in the King's esteem and favour. But it being observed, that the Commissioners proceeded faintly, Cranmer's friends moved, that some man of courage and authority might be sent thither, to canvas this

same notions as Calvin about Predestination and Grace. He also was zealous at first for the real presence, but afterwards altered his mind (q). And he seemed to make Ecclesiastical

(q) Strype, *ubi supra*, p. 65, 66.

accusation more carefully. So Dr. Lee, Dean of York, was brought up about Allhallow-tide, and sent into Kent. And he, who had been well acquainted with the arts of discovering secrets, when he was one of the visitors of the Abbies, managed it more vigorously. He ordered a search to be made of all suspected persons; among whose papers letters were found, both from the Bishop of Winchester, and Dr. London, and some of those whom Cranmer had treated with the greatest freedom and kindness, in which the whole plot against him was discovered. But it was now near the Session of Parliament: and the King was satisfied with the discovery, but thought it not fit to make much noise of it. And he received no addresses from the Archbishop to prosecute it further: who was so noted for his clemency, and following our Saviour's rule of *doing good for evil*, that it was commonly said, the way to get his favour was to do him an injury. These were the only instances in which he expressed his resentments. Two of the conspirators against him had been persons signally obliged by him. The one was the Bishop Suffragan of Dover; the other was a civilian, whom he had employed much in his business. But all the notice he took of it was to shew them their letters, and to admonish them to be more faithful and honest for the future. Upon which he freely forgave them, and carried it so to them afterwards, as if he had absolutely forgotten what they had contrived against him. And a person of quality coming to him about that time, to obtain his favour and assistance in a suit, in which he was to move the King, he went about it, and had almost procured it: but the King calling to mind, that he had been one of his secret accusers, asked him whether he took him for his friend. He answered that he did so. Then the King said, the other was a knave, and his mortal enemy; and bad him, when he should see him next, call him knave to his face. Cranmer answered, that such language did not become a Bishop. But the King suddenly commanded him to do it; yet his modesty was such, that he could not obey so harsh a command. And so he passed the matter over. When these things came to be known, all persons, that were not unjustly prejudiced against him, acknowledged, that his behaviour was suitable to the example and doctrine of the meek and lowly Saviour of the world: and very well became so great a Bishop, and such a reformer of the Christian Religion; who in those sublime and extraordinary instances practised that which he taught others to do (58).

(58) Hist. of the Reformation, vol. i. p. 328, 329.

Archbishop Cranmer was a great friend and patron of learned foreigners, who had been persecuted for their attachment to the principles of the Reformation. Mr. Gilpin says, 'the suffering professors of Protestantism, who were scattered in great numbers about the various countries of Europe, were always sure of an asylum with him. His Palace at Lambeth might be called a seminary of learned men; the greater part of whom persecution had driven from home. Here, among other celebrated reformers, Martyr, Bucer, Alesius, Phage found sanctuary. Martyr, Bucer, and Phage were liberally pensioned by the Archbishop, till he could otherwise provide for them. It was his wish to fix them in the two Universities, where he hoped their great knowledge, and spirit of inquiry, would forward his designs of restoring learning; and he at length obtained Professorships for them all. Bucer and Phage were settled at Cambridge; where they only shewed what might have been expected from them, both dying within a few months after their arrival. But at Oxford, Martyr acted a very conspicuous part; and contributed to introduce among the Students there a very liberal mode of thinking.

Alesius had been driven from Scotland, his native country, for the novelty of his opinions. The cause in which he suffered, added to his abilities

VOL. IV.

and learning, so far recommended him to the University of Leipzig, to which he retired, that he was chosen a Professor there. At this place he became acquainted with Melancthon, who having written a treatise on some part of the controversy between the Papists and Protestants, was desirous of consulting the Archbishop on a few points; and engaged Alesius, otherwise not averse to the employment, to undertake a voyage into England for that purpose. In the course of the conference, the Archbishop was so much taken with his simplicity and learning, that he settled a pension on him, and retained him in his family.

The misfortunes of the times drew Alesius also into England, where the Archbishop became an early patron to him; and shewed, on this occasion at least, the candour and liberality of his sentiments, by permitting a person, who held many opinions very different from his own, to collect his brethren, and such as chose to communicate with him, into a Church. At the head of this little assembly Alesius long presided; exhibiting an eminent example of piety and decency of manners.

Among other learned foreigners, John Sleidan was under particular obligations to the Archbishop. Sleidan was, at that time, engaged in writing the History of the Reformation; a work from which much was expected; and which the Archbishop, by allowing him a pension, and opportunities of study, enabled him to prosecute with less difficulty, than had attended the beginning of his labours (59).

(59) Life of Cranmer, p. 133, 134, 135.

As Archbishop Cranmer was a learned man himself, so he was also a great patron of all solid learning, and of whatever he thought calculated to promote it. Mr. Gilpin observes, that 'the Archbishop always thought himself much interested in the welfare of both the Universities, but of Cambridge in particular; and though he does not appear to have had any legal power there, yet such was his interest at Court, and such was the general dependence of the more eminent Members of that Society upon him, that scarcely any thing was done there, either of a public or a private nature, without consulting him. It was his chief endeavour to encourage, as much as possible, a spirit of inquiry; and to rouse the Students from the slumber of their predecessors; well knowing, the *libertas philosophandi* was the great mean of detecting error, and that true learning could never be at variance with true religion. Ascham, and Cheke, two of the most elegant scholars of that age, were chiefly relied on, and consulted by the Archbishop in this work (60).

(60) *Ibid.* p. 129.

Mr. Gilpin also observes, that 'Leland, the first British Antiquarian, was among the Archbishop's particular friends. Leland had a wonderful facility in learning languages; and was esteemed the first Linguist in Europe. The Archbishop soon took notice of him; and, with his usual discernment, recommended him to be the King's Librarian. His genius threw him on the study of antiquities; and his opportunities, on those of his own country. The Archbishop, in the mean time, by procuring preferment for him, enabled him to make those inquiries, to which his countrymen have been so much indebted.

Among others, who were under obligations to the Archbishop's generosity, was the amiable Bishop Latimer; who not choosing to be reinstated in his old Bishopric, and having made but an indifferent provision for his future necessities, spent a great part of his latter life with the Archbishop, at Lambeth.

Besides this intimacy with learned men at home, the Archbishop held a constant correspondence with most of the learned men in Europe.

The great patron of Erasmus had been Archbishop Warham; than whom, to give Popery its due, few churchmen of those times led a more apostolical life. When Cranmer succeeded Warham, Erasmus was in the decline of age. He found, however,

5 Q

during

stical Functions and Offices wholly dependant on the Magistrate, as much as the Civil
 (r) Burnet, vol. i. were (r). What was most blameable in his Conduct (besides his Recantation) was the
 p. 172. part

‘ during the short time he lived, as beneficent a friend under the new Archbishop, as he had lost in the old one.

‘ The Primate corresponded also with Osiander, Melancthon, and Calvin. His foreign correspondence, indeed, was so large, that he appointed a person with a salary at Canterbury, whose chief employment it was, to forward, and receive, his packets.

‘ Among the most eminent of his correspondents, was Herman, Archbishop and Elector of Cologne. This Prelate had been early impressed with the principles of the Reformation by Melancthon; and had used all his influence to introduce them in his Electorate. But he met with powerful opposition; the Pope and Emperor combining against him, the former in his spiritual, the latter in his temporal capacity. So potent a combination crushed him. Terms, indeed, were offered; but he would hearken to no dishonourable compromise. “ Nothing,” he would say, “ can happen to me unexpectedly: I have long since fortified my mind against every event.” Instead of a splendid life, therefore, at variance with his opinions, he chose a private station; in which he enjoyed the pleasures of study, the friendship of good men, and the tranquility of a good conscience (61).’

(61) Life of Cranmer, p. 136, 137, 138.

Of the learning of Archbishop Cranmer, Mr. Gilpin remarks, that ‘ it was chiefly confined to his profession. He had applied himself in Cambridge to the study of the Greek and Hebrew languages; which though esteemed at that time as the mark of heresy, appeared to him the only sources of attaining a critical knowledge of the Scriptures. He had so accurately studied canon-law, that he was esteemed the best canonist in England: and his reading in theology was so extensive, and his collections from the Fathers so very voluminous, that there were few points, in which he was not accurately informed; and on which he could not give the opinions of the several ages of the Church from the times of the Apostles. “ If I had not seen with my own eyes,” says Peter Martyr, “ I could not easily have believed, with what infinite pains and labour, he had digested his great reading into particular chapters, under the heads of Councils, Canons, Decrees, &c.” His parts were solid, rather than shining; and his memory such, that it might be called an index to the books he had read, and the collections he had made (62).’

(62) Ibid. p. 217, 218.

‘ He was a sensible writer, rather nervous than elegant. His writings were entirely confined to the great controversy which then subsisted; and contain the whole sum of the theological learning of those times. His Library was filled with a very noble collection of books; and was open to all men of letters. “ I meet with authors here, Roger Ascham would say, which the two Universities cannot furnish.” At the Archbishop’s death, the greater part of his original MSS. were left at his Palace of Ford near Canterbury, where they fell into the hands of his enemies. In the days of Elizabeth, Archbishop Parker, who had an intimation, that many of them were still in being, obtained an order from Lord Burleigh, then Secretary of State, in the year 1563, to search for them in all suspected places; and recovered a great number of them. They found their way afterwards into some of the principal Libraries of England; but the greatest collection of them were deposited in Benet-College in Cambridge (63).’

(63) Ibid. p. 220, 221.

Mr. Gilpin, after remarking that Archbishop Cranmer preached often, wherever he visited, says, ‘ In his sermons to the people he was very plain and instructive; insisting chiefly on the essentials of Christianity.’—Sir Richard Morison, a Gentleman who had been much employed in embassies abroad, both under Henry the eighth and Edward the sixth, gives us this character of the Archbishop’s sermons, of which he was a frequent auditor.

‘ The subjects of his sermons, for the most part, were, from whence salvation is to be fetched; and on whom the confidence of man ought to lean. They insisted much on doctrines of faith and works; and taught what the fruits of faith were, and what place was to be given to works. They instructed men in the duties they owed their neighbour; and that every one was our neighbour, to whom we might any way do good. They declared, what men ought to think of themselves, after they had done all; and lastly, what promises Christ hath made; and who they are, to whom he will make them good. Thus he brought in the true preaching of the Gospel, altogether different from the ordinary way of preaching in those days, which was to treat concerning saints, to tell legendary tales of them, and to report miracles wrought for the confirmation of transubstantiation, and other Popish corruptions. And such a heat of conviction accompanied his sermons, that the people departed from them with minds possessed of a great hatred of vice; and burning with a desire of virtue (64).’

(64) Ibid. p. 161, 162, 163.

He was a great economist of his time. Mr. Gilpin says, ‘ He rose commonly at five o’clock; and continued in his study till nine. These early hours, he would say, were the only hours he could call his own. After breakfast he generally spent the remainder of the morning either in public, or private business. His Chapel-hour was eleven; and his dinner-hour twelve. After dinner, he spent an hour either in conversation with his friends, in playing at chess, or in what he liked better, overlooking a chess-board. He then retired again to his study, till his Chapel-bell rang at five. After prayers, he generally walked till six, which was, in those times, the hour of supper. His evening meal was sparing. Often he ate nothing; and when that was the case, it was his usual custom, as he sat down to table, to draw on a pair of gloves; which was as much as to say, that his hands had nothing to do. After supper, he spent an hour in walking, and another in his study, retiring to his bed-chamber about nine. This was his usual mode of living, when he was most vacant; but very often his afternoons, as well as his mornings, were engaged in business. To this his chess-hour after dinner was commonly first assigned, and the remainder of the afternoon, as the occasion required. He generally however contrived, if possible, even in the busiest day, to devote some porportion of his time to his books besides the morning. And Mr. Fox tells us, he always accustomed himself to read and write in a standing posture; esteeming constant sitting very pernicious to a studious man (65).’

(65) Ibid. p. 216, 217.

Mr. Gilpin also observes, that ‘ he was a very amiable master in his family; and admirably preserved the difficult medium between indulgence and restraint. He had, according to the custom of the times, a very numerous retinue; among whom the most exact order was observed. Every week the Steward of his household held a kind of court in the great Hall of his Palace, in which all family affairs were settled; servants wages were paid; complaints were heard; and faults examined. Delinquents were publicly rebuked, and after the third admonition discharged.

‘ His hospitality and charities were great and noble, equal to his station, greater often than his abilities. A plentiful table was among the virtues of those days. His was always bountifully covered. In an upper room was spread his own; where he seldom wanted company of the first distinction. Here a great many learned foreigners were daily entertained, and partook of his bounty. In his great Hall a long table was plentifully covered, every day, for guests, and strangers of a lower rank; at the upper end of which were three smaller tables, designed for his own Officers, and inferior Gentlemen. The learned Tremellius, who had himself

(1) Burnet, ubi
supra, vol. i.
p. 253.

part he had in Lambert's death (3), and in Joan Bocher's and Van Pare's (4). But notwithstanding these blemishes, he must be allowed to have been the Glory of England, and one of the chief Founders and Ornaments of the Reformation.

(4) Idem, vol. ii.
p. 111, 112.

himself often been an eye-witness of the Archbishop's hospitality, gives this character of it: *Archiepiscopi domus, publicum erat doctis, et piis omnibus hospitium; quod ipse hospes, Mecænas, et pater, talibus semper patere voluit, quoad vixit, aut potuit; homo φιλοζενος nec minus φιλοδογος.*

Among other instances of the Archbishop's charity, we have one recorded which was truly noble. After the destruction of monasteries, and before hospitals were erected, the nation saw no species of greater misery, than that of wounded and disbanded soldiers. For the use of such miserable objects, as were landed on the southern coasts of the island, the Archbishop fitted up his Manor-house of Beckesburn in Kent. He formed it indeed into a complete Hospital; appointing a Physician, a Surgeon, Nurses; and every thing proper, as well for food, as physic. Nor did his charity stop here. Each man, on his recovery, was furnished with money to carry him home, in proportion to the distance of his abode (66).

(66) Life of
Cranmer, p. 233.

It appears, that in his youth, and even after he became an Archbishop, Cranmer was a good horseman, and not unpractised in field-sports and exercises. Mr. Strype says, 'Though his father were minded to have his son educated in learning, yet he would not he should be ignorant of civil and gentleman-like exercises. Inasmuch that he used himself to shoot. And many times he permitted himself to hunt and hawk, and to ride rough horses. So that when he was Bishop, he feared not to ride the roughest horses that came into his stables; which he would do very comely. As otherwise, at all times, there was not any in his house that would become

an horse better. And after his studies, when it was time for recreation, he would both hawk and hunt, the game being prepared for him. And sometimes he would shoot in the long bow, and many times kill his deer with the cross-bow, though his sight was not perfect; for he was pore-blind (67).'

(67) Memorials
of Archbishop
Cranmer, p. 2.

It has been taken notice of in the text, that after the passing of the Act for the Six Articles, Archbishop Cranmer sent his wife into Germany. But she afterwards returned again to England; and Mr. Strype informs us, that 'in the time of King Edward, when the marriage of the Clergy was allowed, he brought her forth, and lived openly with her (68).' Mr. Gilpin says, 'He left behind him a widow and children; but as he always kept his family in obscurity, for prudential reasons, we know little about them. They had been kindly provided for by Henry the Eighth; who, without any solicitation from the Primate himself, gave him a considerable grant from the Abbey of Welbeck in Nottinghamshire; which his family enjoyed after his decease. King Edward made some addition to his private fortune: and his heirs were restored in blood by an Act of Parliament, in the reign of Elizabeth (69).'

(68) Ibid. p. 418.

Mr. Hume says, that Archbishop Cranmer was undoubtedly a man of merit; possessed of learning and capacity; and adorned with candour, sincerity, and beneficence, and all those virtues which were fitted to render him useful and amiable in society. His moral qualities procured him universal respect; and the courage of his martyrdom, though he fell short of the rigid inflexibility observed in many, made him the hero of the Protestant party (70).']

* * [C R A S H A W (RICHARD), (*) an accomplished Scholar and a devout Poet of the last century, whose genius and virtue, though celebrated by one of the most eloquent among his poetical cotemporaries, have suffered such unmerited neglect, that his name was omitted in the first edition of this work. The singular incidents of his life, and the peculiar turn of his compositions may, in great measure, account for the oblivion into which he sunk for so considerable a period. Few particulars of his personal history can be traced; and for these we are chiefly indebted to Anthony Wood; who placing the name of Crashaw in his List of Persons admitted to Degrees in Oxford [A] Ann. Dom. 1641, 17 Car. 1. proceeds to inform us, that he was the son of an eminent Divine whose name was William; that he was educated at the Charterhouse, that he became a Student of Pembroke-hall, and a Fellow of Peterhouse in Cambridge, where he was distinguished for his poetical talents in 1637; for it appears from the signature to one of his academical Latin Poems, that he was at this time Fellow of Peterhouse (a). As the researches which have been made in the two societies of Cambridge to which this amiable scholar belonged, have furnished no new memorials of his person or his genius, we must content ourselves with repeating the few melancholy incidents which have hitherto formed the slender history of his life. In 1644, when the Earl of Manchester, under the authority of the Parliament, new-modelled the University of Cambridge, by expelling such Members as refused the Covenant, Crashaw, on the loss of his Fellowship, sought a refuge in France, and embraced the religion of that country [B]. Being found there in great distress by Cowley, his generous

[A] Degrees in Oxford.] Not that it appears so in the public Register, says Wood, but in the private observations of a certain Master of Arts, that was this year living in the University; but in what degree he was incorporated those observations mention not (1).

(1) Ath. Oxon.
vol. ii. Fast. p. 3.

The name of Richard Crashaw occurs in the Index to the manuscript Lives of illustrious men, educated at Cambridge, which were compiled by Morris Drake Morris, and are preserved in the Harleian collection. But this Index seems to comprize a List of all the Lives, which the author intended to execute; for in his work itself, which he left unfinished, no article is allotted to our Poet.

[B] The religion of that country.] Those who have attributed the conversion of Crashaw to motives of interest, must have been utterly unacquainted with

the extreme tenderness and enthusiasm of his character. So far from being induced to change his religion from any worldly motives, he seems rather to have been converted by his passionate admiration for that fair canonized enthusiast, St. Teresa of Spain: her pious compositions appear to have been his favorite study, and the reader who peruses the following address to her, whatever he may think concerning the tender bigotry of the Poet, will hardly suspect that his piety was not perfectly sincere.

O thou undaunted daughter of desires,
By all thy dower of lights and fires;
By all the eagle in thee, all the dove,
By all thy lives and deaths of love;
By thy large draughts of intellectual day,
And by thy thirsts of love more large than they;
By

tical Functions and Offices wholly dependant on the Magistrate, as much as the Civil were (r). What was most blameable in his Conduct (besides his Recantation) was the part

‘ during the short time he lived, as beneficent a friend under the new Archbishop, as he had lost in the old one.

‘ The Primate corresponded also with Osiander, Melancthon, and Calvin. His foreign correspondence, indeed, was so large, that he appointed a person with a salary at Canterbury, whose chief employment it was, to forward, and receive, his packets.

‘ Among the most eminent of his correspondents, was Herman, Archbishop and Elector of Cologne. This Prelate had been early impressed with the principles of the Reformation by Melancthon; and had used all his influence to introduce them in his Electorate. But he met with powerful opposition; the Pope and Emperor combining against him, the former in his spiritual, the latter in his temporal capacity. So potent a combination crushed him. Terms, indeed, were offered; but he would hearken to no dishonourable compromise. “Nothing,” he would say, “can happen to me unexpectedly: I have long since fortified my mind against every event.” Instead of a splendid life, therefore, at variance with his opinions, he chose a private station; in which he enjoyed the pleasures of study, the friendship of good men, and the tranquility of a good conscience (61).’

(61) Life of Cranmer, p. 136, 137, 138.

Of the learning of Archbishop Cranmer, Mr. Gilpin remarks, that ‘it was chiefly confined to his profession. He had applied himself in Cambridge to the study of the Greek and Hebrew languages; which though esteemed at that time as the mark of heresy, appeared to him the only sources of attaining a critical knowledge of the Scriptures. He had so accurately studied canon-law, that he was esteemed the best canonist in England: and his reading in theology was so extensive, and his collections from the Fathers so very voluminous, that there were few points, in which he was not accurately informed; and on which he could not give the opinions of the several ages of the Church from the times of the Apostles. “If I had not seen with my own eyes,” says Peter Martyr, “I could not easily have believed, with what infinite pains and labour, he had digested his great reading into particular chapters, under the heads of Councils, Canons, Decrees, &c.” His parts were solid, rather than shining; and his memory such, that it might be called an index to the books he had read, and the collections he had made (62).’

(62) Ibid. p. 217, 218.

‘ He was a sensible writer, rather nervous than elegant. His writings were entirely confined to the great controversy which then subsisted; and contain the whole sum of the theological learning of those times. His Library was filled with a very noble collection of books; and was open to all men of letters. “I meet with authors here, Roger Ascham would say, which the two Universities cannot furnish.” At the Archbishop’s death, the greater part of his original MSS. were left at his Palace of Ford near Canterbury, where they fell into the hands of his enemies. In the days of Elizabeth, Archbishop Parker, who had an intimation, that many of them were still in being, obtained an order from Lord Burleigh, then Secretary of State, in the year 1563, to search for them in all suspected places; and recovered a great number of them. They found their way afterwards into some of the principal Libraries of England; but the greatest collection of them were deposited in Benet-College in Cambridge (63).’

(63) Ibid. p. 220, 221.

Mr. Gilpin, after remarking that Archbishop Cranmer preached often, wherever he visited, says, ‘In his sermons to the people he was very plain and instructive; insisting chiefly on the essentials of Christianity.’—Sir Richard Morison, a Gentleman who had been much employed in embassies abroad, both under Henry the eighth and Edward the sixth, gives us this character of the Archbishop’s sermons, of which he was a frequent auditor.

‘ The subjects of his sermons, for the most part, were, from whence salvation is to be fetched; and on whom the confidence of man ought to lean. They insisted much on doctrines of faith and works; and taught what the fruits of faith were, and what place was to be given to works. They instructed men in the duties they owed their neighbour; and that every one was our neighbour, to whom we might any way do good. They declared, what men ought to think of themselves, after they had done all; and lastly, what promises Christ hath made; and who they are, to whom he will make them good. Thus he brought in the true preaching of the Gospel, altogether different from the ordinary way of preaching in those days, which was to treat concerning saints, to tell legendary tales of them, and to report miracles wrought for the confirmation of transubstantiation, and other Popish corruptions. And such a heat of conviction accompanied his sermons, that the people departed from them with minds possessed of a great hatred of vice; and burning with a desire of virtue (64).’

(64) Ibid. p. 161, 162, 163.

He was a great economist of his time. Mr. Gilpin says, ‘He rose commonly at five o’clock; and continued in his study till nine. These early hours, he would say, were the only hours he could call his own. After breakfast he generally spent the remainder of the morning either in public, or private business. His Chapel-hour was eleven; and his dinner-hour twelve. After dinner, he spent an hour either in conversation with his friends, in playing at chess, or in what he liked better, overlooking a chess-board. He then retired again to his study, till his Chapel-bell rang at five. After prayers, he generally walked till six, which was, in those times, the hour of supper. His evening meal was sparing. Often he ate nothing; and when that was the case, it was his usual custom, as he sat down to table, to draw on a pair of gloves; which was as much as to say, that his hands had nothing to do. [A] *Degrees in Oxford.* Not that it appears so in the public Register, says Wood, but in the private observations of a certain Master of Arts, that was this year living in the University; but in what degree he was incorporated those observations mention not (1).

(1) *Atb. Oxon.* vol. ii. Fast. p. 3.

The name of Richard Crashaw occurs in the Index to the manuscript Lives of illustrious men, educated at Cambridge, which were compiled by Morris Drake Morris, and are preserved in the Harleian collection. But this Index seems to comprize a List of all the Lives, which the author intended to execute; for in his work itself, which he left unfinished, no article is allotted to our Poet.

[B] *The religion of that country.* Those who have attributed the conversion of Crashaw to motives of interest, must have been utterly unacquainted with

the extreme tenderness and enthusiasm of his character. So far from being induced to change his religion from any worldly motives, he seems rather to have been converted by his passionate admiration for that fair canonized enthusiast, St. Teresa of Spain: her pious compositions appear to have been his favorite study, and the reader who peruses the following address to her, whatever he may think concerning the tender bigotry of the Poet, will hardly suspect that his piety was not perfectly sincere.

O thou undaunted daughter of desires,
By all thy dower of lights and fires;
By all the eagle in thee, all the dove,
By all thy lives and deaths of love;
By thy large draughts of intellectual day,
And by thy thirsts of love more large than they;

By

stical Functions and Offices wholly dependant on the Magistrate, as much as the Civil were (r). What was most blameable in his Conduct (besides his Recantation) was the part

‘ during the short time he lived, as beneficent a friend under the new Archbishop, as he had lost in the old one.

‘ The Primate corresponded also with Osiander, Melancthon, and Calvin. His foreign correspondence, indeed, was so large, that he appointed a person with a salary at Canterbury, whose chief employment it was, to forward, and receive, his packets.

‘ Among the most eminent of his correspondents, was Herman, Archbishop and Elector of Cologne. This Prelate had been early impressed with the principles of the Reformation by Melancthon; and had used all his influence to introduce them in his Electorate. But he met with powerful opposition; the Pope and Emperor combining against him, the former in his spiritual, the latter in his temporal capacity. So potent a combination crushed him. Terms, indeed, were offered; but he would hearken to no dishonourable compromise. “Nothing,” he would say, “can happen to me unexpectedly: I have long since fortified my mind against every event.” Instead of a splendid life, therefore, at variance with his opinions, he chose a private station; in which he enjoyed the pleasures of study, the friendship of good men, and the tranquility of a good conscience (61).’

(61) Life of Cranmer, p. 136, 137, 138.

Of the learning of Archbishop Cranmer, Mr. Gilpin remarks, that ‘it was chiefly confined to his profession. He had applied himself in Cambridge to the study of the Greek and Hebrew languages; which though esteemed at that time as the mark of heresy, appeared to him the only sources of attaining a critical knowledge of the Scriptures. He had so accurately studied canon-law, that he was esteemed the best canonist in England: and his reading in theology was so extensive, and his collections from the Fathers so very voluminous, that there were few points, in which he was not accurately informed; and on which he could not give the opinions of the several ages of the Church from the times of the Apostles. “If I had not seen with my own eyes,” says Peter Martyr, “I could not easily have believed, with what infinite pains and labour, he had digested his great reading into particular chapters, under the heads of Councils, Canons, Decrees, &c.” His parts were solid, rather than shining; and his memory such, that it might be called an index to the books he had read, and the collections he had made (62).’

(62) *Ibid.* p. 217, 218.

‘ He was a sensible writer, rather nervous than elegant. His writings were entirely confined to the great controversy which then subsisted; and contain the whole sum of the theological learning of those times. His Library was filled with a very noble collection of books; and was open to all men of letters. “I meet with authors here, Roger Ascham would say, which the two Universities cannot furnish.” At the Archbishop’s death, the greater part of his original MSS. were left at his Palace of Ford near Canterbury, where they fell into the hands of his enemies. In the days of Elizabeth, Archbishop Parker, who had an intimation, that many of them were still in being, obtained an order from Lord Burleigh, then Secretary of State, in the year 1563, to search for them in all suspected places; and recovered a great number of them. They found their way afterwards into some of the principal Libraries of England; but the greatest collection of them were deposited in Benet-College in Cambridge (63).’

(63) *Ibid.* p. 220, 221.

Mr. Gilpin, after remarking that Archbishop Cranmer preached often, wherever he visited, says, ‘In his sermons to the people he was very plain and instructive; insisting chiefly on the essentials of Christianity.’—Sir Richard Morison, a Gentleman who had been much employed in embassies abroad, both under Henry the eighth and Edward the sixth, gives us this character of the Archbishop’s sermons, of which he was a frequent auditor.

‘ The subjects of his sermons, for the most part, were, from whence salvation is to be fetched; and on whom the confidence of man ought to lean. They insisted much on doctrines of faith and works; and taught what the fruits of faith were, and what place was to be given to works. They instructed men in the duties they owed their neighbour; and that every one was our neighbour, to whom we might any way do good. They declared, what men ought to think of themselves, after they had done all; and lastly, what promises Christ hath made; and who they are, to whom he will make them good. Thus he brought in the true preaching of the Gospel, altogether different from the ordinary way of preaching in those days, which was to treat concerning saints, to tell legendary tales of them, and to report miracles wrought for the confirmation of transubstantiation, and other Popish corruptions. And such a heat of conviction accompanied his sermons, that the people departed from them with minds possessed of a great hatred of vice; and burning with a desire of virtue (64).’

(64) *Ibid.* p. 161, 162, 163.

He was a great economist of his time. Mr. Gilpin says, ‘He rose commonly at five o’clock; and continued in his study till nine. These early hours, he would say, were the only hours he could call his own. After breakfast he generally spent the remainder of the morning either in public, or private business. His Chapel-hour was eleven; and his dinner-hour twelve. After dinner, he spent an hour either in conversation with his friends, in playing at chess, or in what he liked better, overlooking a chess-board. He then retired again to his study, till his Chapel-bell rang at five. After prayers, he generally walked till six, which was, in those times, the hour of supper. His evening meal was sparing. Often he ate nothing; and when that was the case, it was his usual custom, as he sat down to table, to draw on a pair of gloves; which was as much as to say, that his hands had nothing to do. After supper, he spent an hour in walking, and another in his study, retiring to his bed-chamber about nine. This was his usual mode of living, when he was most vacant; but very often his afternoons, as well as his mornings, were engaged in business. To this his chess-hour after dinner was commonly first assigned, and the remainder of the afternoon, as the occasion required. He generally however contrived, if possible, even in the busiest day, to devote some porportion of his time to his books besides the morning. And Mr. Fox tells us, he always accustomed himself to read and write in a standing posture; esteeming constant sitting very pernicious to a studious man (65).’

(65) *Ibid.* p. 216, 217.

Mr. Gilpin also observes, that ‘he was a very amiable master in his family; and admirably preserved the difficult medium between indulgence and restraint. He had, according to the custom of the times, a very numerous retinue; among whom the most exact order was observed. Every week the Steward of his household held a kind of court in the great Hall of his Palace, in which all family affairs were settled; servants wages were paid; complaints were heard; and faults examined. Delinquents were publickly rebuked, and after the third admonition discharged.

‘ His hospitality and charities were great and noble, equal to his station, greater often than his abilities. A plentiful table was among the virtues of those days. His was always bountifully covered. In an upper room was spread his own; where he seldom wanted company of the first distinction. Here a great many learned foreigners were daily entertained, and partook of his bounty. In his great Hall a long table was plentifully covered, every day, for guests, and strangers of a lower rank; at the upper end of which were three smaller tables, designed for his own Officers, and inferior Gentlemen. The learned Tremellius, who had himself

(s) Burnet, *ubi supra*, vol. i. p. 253.

part he had in Lambert's death (s), and in Joan Bocher's and Van Pare's (t). But notwithstanding these blemishes, he must be allowed to have been the Glory of England, and one of the chief Founders and Ornaments of the Reformation.

(t) *Idem*, vol. ii. p. 111, 112.

‘himself often been an eye-witness of the Archbishop's hospitality, gives this character of it: *Archiepiscopi domus, publicum erat doctis, et piis omnibus hospitium; quod ipse hospes, Mecenas, et pater, talibus semper patere voluit, quoad vixit, aut potuit; homo φιλοζενος nec minus φιλοδογος.*’

‘Among other instances of the Archbishop's charity, we have one recorded which was truly noble. After the destruction of monasteries, and before hospitals were erected, the nation saw no species of greater misery, than that of wounded and disbanded soldiers. For the use of such miserable objects, as were landed on the southern coasts of the island, the Archbishop fitted up his Manor-house of Beckesburn in Kent. He formed it indeed into a complete Hospital; appointing a Physician, a Surgeon, Nurses; and every thing proper, as well for food, as physic. Nor did his charity stop here. Each man, on his recovery, was furnished with money to carry him home, in proportion to the distance of his abode (66).’

(66) *Life of Cranmer*, p. 233.

It appears, that in his youth, and even after he became an Archbishop, Cranmer was a good horseman, and not unpractised in field-sports and exercises. Mr. Strype says, ‘Though his father were minded to have his son educated in learning, yet he would not he should be ignorant of civil and gentleman-like exercises. Inasmuch that he used himself to shoot. And many times he permitted himself to hunt and hawk, and to ride rough horses. So that when he was Bishop, he feared not to ride the roughest horses that came into his stables; which he would do very comely. As otherwise, at all times, there was not any in his house that would become

an horse better. And after his studies, when it was time for recreation, he would both hawk and hunt, the game being prepared for him. And sometimes he would shoot in the long bow, and many times kill his deer with the cross-bow, though his sight was not perfect; for he was pore-blind (67).’

It has been taken notice of in the text, that after the passing of the Act for the Six Articles, Archbishop Cranmer sent his wife into Germany. But she afterwards returned again to England; and Mr. Strype informs us, that ‘in the time of King Edward, when the marriage of the Clergy was allowed, he brought her forth, and lived openly with her (68).’ Mr. Gilpin says, ‘He left behind him a widow and children; but as he always kept his family in obscurity, for prudential reasons, we know little about them. They had been kindly provided for by Henry the Eighth; who, without any solicitation from the Primate himself, gave him a considerable grant from the Abbey of Welbeck in Nottinghamshire; which his family enjoyed after his decease. King Edward made some addition to his private fortune: and his heirs were restored in blood by an Act of Parliament, in the reign of Elizabeth (69).’

(67) *Memorials of Archbishop Cranmer*, p. 2.

(68) *Ibid.* p. 418.

(69) *Life*, p. 235.

Mr. Hume says, that Archbishop Cranmer was undoubtedly a man of merit; ‘possessed of learning and capacity; and adorned with candour, sincerity, and beneficence, and all those virtues which were fitted to render him useful and amiable in society. His moral qualities procured him universal respect; and the courage of his martyrdom, though he fell short of the rigid inflexibility observed in many, made him the hero of the Protestant party (70).’

T.

* * [CRASHAW (RICHARD), (*) an accomplished Scholar and a devout Poet of the last century, whose genius and virtue, though celebrated by one of the most eloquent among his poetical cotemporaries, have suffered such unmerited neglect, that his name was omitted in the first edition of this work. The singular incidents of his life, and the peculiar turn of his compositions may, in great measure, account for the oblivion into which he sunk for so considerable a period. Few particulars of his personal history can be traced; and for these we are chiefly indebted to Anthony Wood; who placing the name of Crashaw in his List of Persons admitted to Degrees in Oxford [A] *Ann. Dom.* 1641, 17 *Car.* 1. proceeds to inform us, that he was the son of an eminent Divine whose name was William; that he was educated at the Charterhouse, that he became a Student of Pembroke-hall, and a Fellow of Peterhouse in Cambridge, where he was distinguished for his poetical talents in 1637; for it appears from the signature to one of his academical Latin Poems, that he was at this time Fellow of Peterhouse (a). As the researches which have been made in the two societies of Cambridge to which this amiable scholar belonged, have furnished no new memorials of his person or his genius, we must content ourselves with repeating the few melancholy incidents which have hitherto formed the slender history of his life. In 1644, when the Earl of Manchester, under the authority of the Parliament, new-modelled the University of Cambridge, by expelling such Members as refused the Covenant, Crashaw, on the loss of his Fellowship, sought a refuge in France, and embraced the religion of that country [B]. Being found there in great distress by Cowley, his generous

By all thy lives and deaths of love;
By thy large draughts of intellectual day,
And by thy thirsts of love more large than they;

By

generous admirer, in 1646. He was recommended by that Poet to the patronage of the exiled Queen, Henrietta Maria. This Princess, who wanted rather power than inclination to reward English Catholics, supplied Crashaw with Letters of Recommendation to Italy. He became Secretary to a Cardinal at Rome; and obtained the office of a Canon in the Church of Loretto, where he died of a fever soon after his election; and to use Wood's expression, about 1650—Had the interesting letters of Cowley been given to the world by his friend and biographer Dr. Sprat, they would probably have supplied us with many particulars relating to a literary exile, so warmly beloved by a Poet remarkable for the fervency and steadiness of his friendship. But although such particulars might have gratified our curiosity, they could hardly have added to the honour which the talents and virtues of Crashaw have received, from the Poem of Cowley on his Death [C]. Our author appears to have been personally regarded by another very eminent literary character of his time [D]. Whatever esteem his genius and his probity might obtain from

(2) Crashaw's
Poems, p. 197.

(3) Life of
Cowley.

By all thy brim-fill'd bowls of fierce desire,
By thy last morning's draught of liquid fire;
By the full kingdom of that final kiss,
That seal'd thy parting soul and made thee his;
By all the heavens, thou hast in him
Fair sister of the seraphim;
By all of him we have in thee,
Leave nothing of myself in me;
Let me so read thy life, that I
Unto all life of mine may die (2).

[C] *On his death.* "Cowley seems to have had," says Dr. Johnson, "what Milton is believed to have wanted, the skill to rate his own performances by their just value; and has therefore closed his Miscellanies with the Verses upon Crashaw, which apparently excell all that have gone before them; and in which there are beauties which common authors may justly think not only above their attainment, but above their ambition (3)."

The Poem, which our celebrated Critic has thus commended, with a quaint obscurity, rarely found in his forcible language, is indeed so beautiful, and so highly honourable, both to Crashaw and Cowley, that long as it is, the poetical reader may wish to find it inserted here at full length.

On the DEATH of Mr. CRASHAW.

Poet and Saint! to thee alone are given
The two most sacred names of earth and heaven;
The hard and rarest union which can be,
Next that of Godhead and humanity.
Long did the Muses banish'd slaves abide,
And built vain pyramids to mortal pride:
Like Moses thou (tho' spells and charms withstand)
Hast brought them nobly home, back to their
holy land.

Ah, wretched we, Poets of earth! but thou
Wert living the same Poet which thou'rt now;
Whilst angels sing to thee their ayres divine,
And joy in an applause so great as thine.
Equal society with them to hold,
Thou need'st not make new songs, but say the old;
And they (kind spirits!) shall all rejoice to see,
How little less than they, exalted man may be.

Still the old heathen gods in numbers dwell,
The heavenliest thing on earth still keeps up hell:
Nor have we yet quite purg'd the Christian land;
Still idols here, like calves at Bethel stand.
And tho' Pan's death long since all oracles broke,
Yet still in rhyme the fiend Apollo spoke;
Nay, with the worst of heathen dotage, we
(Vain men!) the monster woman deifie;
Find stars, and tie our fates there in a face,
And Paradise in them, by whom we lost it, place.
What different faults corrupt our muses thus?
Wanton as girls, as old wives fabulous.

Thy spotless muse, like Mary, did contain
The boundless Godhead; she did well disdain
That her eternal verse employed should be
On a less subject than eternity;
And for a sacred mistress scorn'd to take
But her whom God himself scorn'd not his spouse
to make:

It (in a kind) her miracle did do,
A fruitful mother was, and virgin too.

How well (blest Swan) did fate contrive thy
death,
And made thee render up thy tuneful breath
In thy great mistress' arms? Thou most divine,
And richest offering of Loretto's shrine!
Where, like some holy sacrifice t' expire,
A fever burns thee and love lights the fire.
Angels (they say) brought the fam'd chapel there,
And bore the sacred load in triumph thro' the air:
'Tis surer much they brought thee there; and they,
And thou, their charge, went singing all the way.

Pardon, my mother Church, if I consent
That angels led him, when from thee he went;
For ev'n in error, sure no danger is,
When join'd with so much piety as his.
Ah! mighty God, with shame I speak't, and grief;
Ah! that our greatest faults were in belief!
And our weak reason were ev'n weaker yet,
Rather than thus, our will's too strong for it!
His faith, perhaps, in some nice tenets might
Be wrong; his life, I'm sure, was in the right:
And I, myself, a Catholick will be;
So far at least, great Saint! to pray to thee.

Hail, Bard triumphant! and some care bestow
On us, the Poets militant below:
Oppos'd by our old enemy, adverse Chance,
Attack'd by Envy and by Ignorance;
Enchain'd by Beauty, tortured by desires,
Expos'd by Tyrant-love, to savage beasts and fires.
Thou from low earth in nobler flames didst rise,
And like Elijah mount alive the skies.
Elisha like (but with a will much less,
More fit thy greatness and my littleness;)
Lo here I beg (I whom thou once didst prove
So humble to esteem, so good to love)
Not that thy spirit might on me doubled be,
I ask but half thy mighty spirit for me:
And when my muse soars with so strong a wing,
'Twill learn of things divine, and first of thee to sing.

In these verses, fine as they are, Cowley has sometimes fallen into the principal defect of the Poet whom he is praising. He now and then speaks of sacred things with a vulgar and ludicrous familiarity of language, "by which (to use a happy expression of Dr. Johnson's) Readers, far short of sanctity, may be offended in the present age, when devotion, perhaps not more fervent, is more delicate."—Let us add, that if the poetical talents of Crashaw seem not to answer this glowing panygerick; yet in his higher character of *Saint*, he appears to have had the purest title to this affectionate Eulogy.

[D] *Another very eminent literary character of his time.* The learned Selden, who in his *Table Talk* has the following passage under the article *Poetry*.

"I never converted but two, the one was Mr. Crashaw from writing against plays, by telling him a way how to understand that place (of putting on women's apparel) which has nothing to do in the business; as neither has it that the fathers speak against plays in their time with reason enough; for they had real idolatries mixed with their plays, having three altars perpetually upon the stage."

his

his contemporaries, his poetry was sinking into utter oblivion, when the merits of this neglected Bard were asserted by an Editor who favoured the public with a judicious selection from his works (b). But his zeal in vindicating the memory of Crashaw, has led him to make some severe, and, we apprehend, unjust remarks on several English Poets; particularly on Pope, who seems to be wrongfully accused of an invidious desire to sink the reputation of his poetical and Catholic brother: A point, that for the credit of Par-nassus, we shall discuss in a note of considerable length [E]. One of the most striking perform-

[E] *A note of considerable length.* We shall begin with quoting the passages from Pope's Letters, in which he speaks of our author.

"This Poem (the celebrated Latin production of Strada, on the Nightingale) was many years since imitated by Crashaw, out of whose verses the following are very remarkable.

From this to that, from that to this he flies,
Feels Music's pulse in all its arteries;
Caught in a net, which there Apollo spreads,
His fingers struggle with the vocal threads" (4).

L E T T E R XXVI.

Dec. 17, 1710.

"It seems that my late mention of Crashaw, and my quotation from him, has moved your curiosity. I therefore send you the whole author, who has held a place among my other books of this nature for some years; in which time, having read him twice or thrice, I find him one of those whose works may just deserve reading. I take this Poet to have writ like a Gentleman; that is, at leisure hours, and more to keep out of idleness than to establish a reputation; so that nothing regular or just can be expected from him. All that regards design, form, fable, (which is the soul of poetry); all that concerns exactness or consent of parts (which is the body) will probably be wanting; only pretty conceptions, fine metaphors, glittering expressions, and something of a neat cast of verse (which are properly the dress, gems, or loose ornaments of poetry) may be found in these verses. This is indeed the case of most other poetical Writers of Miscellanies; nor can it well be otherwise, since no man can be a true Poet who writes for diversion only. These authors should be considered as versifiers and witty men, rather than as Poets; and under this head will only fall the thoughts, the expressions, and the numbers. These are only the pleasing part of poetry, which may be judged of at a view, and comprehended all at once. And (to express myself like a painter) their colouring entertains the sight, but the lines and life of the picture are not to be inspected too narrowly.

This author formed himself upon Petrarch, or rather upon Marino. His thoughts, one may observe, in the main, are pretty; but oftentimes far-fetched, and too often strained and stiffened to make them appear the greater. For men are never so apt to think a thing great, as when it is odd or wonderful; and inconsiderate authors would rather be admired than understood. This ambition of surprizing a reader, is the true natural cause of all fustian or bombast in poetry. To confirm what I have said, you need but look into his first Poem of the Weeper, where the 2d, 4th, 6th, 14th, 21st stanzas are as sublimely dull, as the 7th, 8th, 9th, 16th, 17th, 20th, and 23d stanzas of the same copy are soft and pleasing; and if these last want any thing, it is an easier and more unaffected expression. The remaining thoughts in that poem might have been spared, being either but repetitions, or very trivial and mean: and by this example in the first, one may guess all the rest to be like this, a mixture of tender gentle thoughts, and suitable expressions, of forced and inextricable conceits, and of needless fillers up to the rest. From all which it is plain, this author writ fast, and set down what came uppermost. A reader may skim off the froth, and use the clear underneath; but if he goes too deep, he will meet with a mouthful of dregs: either the top or bottom of him are good for little; but what he did in his own natural middle way is best.

VOL. IV.

To speak of his numbers is a little difficult, they are so various and irregular, and mostly Pindaric. 'Tis evident his heroic verse (the best example of which is his Music's Duel) is carelessly made up: but one may imagine from what it now is, that had he taken more care, it had "been musical and pleasing enough; not extremely majestic, but sweet: and the time considered of his writing, he was (even as uncorrect as he is) none of the worst versifiers.

"I will just observe, that the best pieces of this author are a Paraphrase on Psalm xxiii.—On Lessius,—Epitaph on Mr. Alliton,—Wishes to his supposed Mistress, and the *Dies Iræ*."

"The Reader must determine (says the Editor of Crashaw) whether Mr. Pope has mentioned the best pieces: on the contrary, whether many much superior are not to be met with in the little work before us; and if so, what fair reason could there be for such a partial selection (4)."

In answer to this question, it may be sufficient to observe, that Pope, when he drew this character of Crashaw, was writing, at the age of twenty-two, a private letter to a friend, and of course delivered his genuine sentiments of the author in question, without a chance of his being influenced by any invidious design. Whoever takes the trouble of comparing the opinion of Pope with the passages of Crashaw, to which he has referred in his letter, will find no reason to question the integrity of his judgement. His not commending the translation from Marino, might proceed from his contempt of the original author, who was then considered as the prime corrupter of Italian poetry. The Editor of Crashaw, in speaking of passages borrowed from his works, supposes that Pope's "faint praise might be the most probable means of secreting his obligations to one whom he affects rather to condemn." But Pope was so far from wishing to secrete his obligations to Crashaw, that he has professedly borrowed a line from this Poet in his *Eloisa*, and surely no compliment could be more flattering. If Pope has taken other passages without acknowledgment, it is but just to imagine that he thought the obligation too trifling to be noticed; or what is equally probable, that he was not aware of it. Many instances may be found in the records of Poetry, where an author has written the verse of another with a full persuasion that it belonged solely to himself. Gray, who seems to have been most scrupulous in noting his slightest imitations, has failed to remark that his line,

The Curfew tolls the knell of parting day,

is closely copied, in point of expression, from the following passage in Dryden's Prologue to his *Troilus and Cressida*;

For love they rhyme dispense,
That tolls the knell of their departed sense:

and if our memory does not deceive us, the following very beautiful verse in the *Elegy* just cited,

The paths of Glory lead but to the grave,

is literally translated from the Latin prose of Bartholine, in his *Essay on Danish Antiquities*. It is highly unjust to accuse an author of intentional and invidious secrecy, who does not always specify his obligations of this kind, because it is hardly possible, from the nature of the human faculties, that he should be able, at all times, to distinguish the genuine off-

5 R

spring

(5) Philip's
Crashaw, p. 22.

performances of Crashaw is, a Translation from a posthumous and scarce work of Marino, a Poet, to whom severe critics might apply, what Boileau said of Le Moine,

Il s'est trop élevé pour en dire du mal ;
Il s'est trop égaré pour en dire du bien.

that he is too sublime to be censured, and too fantastic to be praised. He had certainly a strong, though not a refined imagination; and as the version of Crashaw is executed with spirit, we shall select from it a few passages, with the corresponding stanzas of the Italian [F]. As the original verses of Crashaw are chiefly devoted to pious subjects, we ought

spring of his own imagination, from the adopted children of memory. As it is fair, however, that all such literary property should be marked with the name of the original proprietor, we shall, in justice to our author, transcribe the passages of Pope, with those from which they seem to be borrowed.

(6) Pope's *Eloise*. Oh! Death, all-eloquent, you only prove
What dust we doat on, when 'tis man we love (6).

(7) Crashaw's *Death's Lecture*. All-daring dust and ashes, only you
Of all interpreters read nature true (7).

(8) Pope's *Epitaph on Fenton*. This modest stone, what few vain marbles can,
May truly say, here lies an honest man (8).

(9) Crashaw's *Epitaph on Mr. Ashton*. The modest front of this small floor,
Believe me, Reader, can say more
Than many a braver marble can,
Here lies a truly honest man (9).

(10) Pope's *Elegy to the Memory of an unfortunate Lady*. Is it in heaven a crime to love too well (10)?

(11) Crashaw's *3d Elegy on St. Alexis*. And I, what is my crime? I cannot tell,
Unless it be a crime to have lov'd too well (11).

We shall hazard a conjecture, that these Elegies of Crashaw, suggested to Pope the idea of his *Eloise*. They are written as the complaint of a tender female deserted on her wedding night by her bridegroom, from motives of religion. But if Pope borrowed any thing from Crashaw in this article, it was only as the sun borrows from the earth; when drawing from thence a mere vapor, he makes it the delight of every eye, by giving it all the tender and gorgeous colouring of heaven.

[F] *Of the Italian.* The Poem of Marino was published at Venice 1633, eight years after the death of its author. It is entitled *Strage de gli Innocenti*; The Slaughter of the Innocents; and consists of four books with the following titles, 1. *Sospetto d'Herode*, Suspicion of Herod. 2. *Consiglio de Satrapi*, Council of Nobles. 3. *Esecutione della Strage*, Execution of the Slaughter. 4. *Il Limbo*—Limbo.—The complete Poem was published in English verse, by an anonymous Translator, 1675 (12): but in Crashaw we find only the first book, which opens thus,

(12) Maty's *Review*, April 1785.

I.

Muse, now the servant of soft loves no more,
Hate is thy theme; and Herod, whose unblest
Hand—what dares not jealous greatness?—tore
A thousand sweet babes from their mother's breast,
The blooms of martyrdom! O be a door
Of language to my infant lips, ye best
Of confessors! whose throats answering his swords,
Gave forth your blood for breath!—spoke souls
for words.

I.

Musa, non più d'amor cautiam lo sdegno!
Del crudo Ré che mille infanti afflitti
(Ahi! che non pote avidità di regno?)
Fé dal materno sen cader trafitti.
E voi reggete voi l'infermo ingegno
Nanti di Cristo, e testimoni invitti
Che destate fuor de le squarciate gole
Sangue in vece di voce, e di parole.

After an invocation to the Viceroy of Naples, the native city of Marino, the Poem exhibits this striking portrait of Lucifer.

V.

Below the bottom of the great abyss,
There, where one center reconciles all things,
The world's profound heart pants: there placed is
Mischief's old master; close about him clings
A curl'd knot of embracing snakes that kiss
His correspondent cheeks: these loathsome strings
Hold the perverse Prince in eternal ties
Fast bound, since first he forfeited the skies.

VI.

The Judge of Torments and the King of Tears,
He fills a burnish'd throne of quenchless fire;
And for his old fair robes of light he wears
A gloomy mantle of dark flames: the tire
That crowns his hated head on high appears,
Where seven tall horns, his Empire's pride, aspire;
And, to make up hell's majesty, each horn
Seven crested Hydras horribly adorn.

VII.

His eyes, the fullen dens of death and night,
Startle the dull air with a dismal red;
Such his fell glances as the fatal light,
Of staring comets that look kingdoms dead!
From his black nostrils and blue lips, in spite
Of hell's own stink, a worse stench is spread:
His breath hell's light'ning is; and each deep
groan
Disdains to think that heaven thunders alone.

VIII.

His flaming eyes, dire exhalation!
Unto a flaming pile gives fiery breath,
Whose unconsum'd consumption preys upon
The never-dying life of a long death.
In this sad house of slow destruction
(His shop of flames) he fries himself beneath
A mass of woes; his teeth for torment gnash,
While his steel sides sound with his tail's strong
lash.

IX.

Three rigorous Virgins waiting still behind,
Assist the throne of th' iron-scepter'd King
With whips of thorns and knotty vipers twin'd,
They rouse him when his rank thoughts need a
sting:
Their locks are beds of uncomb'd snakes, that
wind
About their shady brows in wanton rings.
Thus reigns the wrathful King; and while he
reigns
His scepter and himself both he disdains.

V.

Sotto gli abissi, in mezzo al cor del Mondo
Nel punto universal de l'universo,
Dentro la bolgia del più cupo fondo
Stasi l'antico spirito peruerso,
Conmordaci ritorte un groppo immondo
Lo stringe di cento aspidi a traverso.
Di tai legami in sempiturno il cinse
Il gran Campion, che'n Paradiso il vinse.

VI.

Giudice di tormento, e Re di pianto,
D'ineffinguibile foco ha' trona, e vesta;
Vesta, già ricco, e luminoso manto,
Hor di fiamme, e di tenebre contesta.

ought to observe, for the honour both of Poetry and Religion, that the works of our Poet have been neglected not merely because they are devotional, but because their author has frequently fallen into the worst defects of style, in his mode of treating subjects that peculiarly require a chaste dignity of expression [G]. He seems to have chosen the pious George Herbert for his model; and the anonymous poems subjoined to the works of that very religious and once popular Bard, are said, by Mr. Granger (c), to have been written by Crashaw. The publication which bears his name [H], first appeared during the exile of

(c) Biographical History. Article (HERBERT).

Porta (e sol questo è del suo regno il vanto)
Di sette corna alta corona in testa.
Fan d'oggi intorno al suo diadema regio,
Hidre verdi, e Cerafte horribil fregio.

VII.

Ne gli occhi, oue mestitia alberga, e morte,
Luce fiammeggia torbida, e vermiglia
Gli sguardi obliqui, e le pupille torte.
Sembran Comete, e lampadi le ciglia.
E da lenari, e da le labra smorte
Caligine, e fetor vomita, e figlia,
Iracondi, superbi, e disperati,
Tuoni i gemiti son, folgori i fiati.

VIII.

Che la vista pestifera, e sanguigna
Con l'alito crudel, ch' anampa, e fuma,
La pira accende horribile, e maligna,
Che'n consumabilmente altrui consuma.
Con amaro stridor batte, e digrigna
I denti aspri di augine, e di schiuma;
E de membri d'acciaio entro le fiamme
P'a con E'estremo suo sonar le squamme.

IX.

Tre rigorose Virgini vicine
Sonno assistenti, a l'infernal Tiranno,
E con sferze di vipere, e di spine
Intente sempre a stimular lo itanno
Crespi han di serpi innanellato il crine,
Ch' horrida intorno al Volto, ombra lor fanno
Scettro ei sostien di ferro, e mentre regna
Il suo regno, e se stesso abhorre, e sdegna.

We shall add a speech of Alecto to the infernal King, observing that Milton has been thought indebted to the Version of Crashaw.

34.

What thy Alecto, what these hands can do,
Thou mad'st bold proof upon the brow of heaven;
Nor should'st thou bate in pride, because that now
To these thy footy kingdoms thou art driven.
Let heavens, Lord, chide above, louder than thou,
In language of his thunder; thou art even
With him below. Here thou art, Lord, alone,
Boundless and absolute: hell is thine own.

35.

If usual riot and strength will do no good,
Vertues of stones, nor herbs; use stronger charms,
Anger and love, best hooks of humane blood;
If all fail, we'll put on our proudest arms,
And pouring on heaven's face the seas huge flood,
Quench his curl'd fires; we'll wake with our alarms
Ruine, wher'ere she sleeps at nature's feet,
And crush the world till his wide corners meet.

34.

Provasti in Ciel la magnanim' opra
Ciò che sà far con le compagne Aletto.
Nè perc' hoggi quaggiu t'accoglia, e copra
Ombroso albergo, e ferrugineo tetto,
Mem superbir dei tù; che se la sopra
Al Monarca tonante eri soggetto,
Qui siedi Ré, che libero, et intero
Hai de la Terra, e l'Abisso impero.

35.

Se vater potrà nulla industria, ò senno,
Virtu d'erbe, e di pietre, ò suon di carmi
Inganna, Ira, et Amor, che spesso fenno
Correr gli huomini al sangue, e trallar l'armi

Tu ci vedrai (sol che ti piaccia) à un cenno
Trar le stelle dal Ciel, l'ombre da i marmi
Por soffoura la terra, e'l mar profondo,
Crollar, spiantar da le radici il Mondo.

It is very remarkable that Milton has taken no notice of this Poem in his Latin Epistle to his elegant Italian friend, Manso, where he alludes to the other work of Marino, whose life is supposed to have been written by that accomplished Nobleman, the Biographer of Tasso. It is the more remarkable, as Milton visited Italy about four years after the publication of this singular performance, which it seems he has now and then condescended to imitate in his infinitely nobler poem the Paradise Lost, if indeed the similar passages may be justly called imitations, a point that we shall leave the Editors of our divine Bard to settle.

[G] *Require a chaste dignity of expression.* We shall insert a very striking example of the deplorable conceits by which pious poetry was sometimes debased in the pages of Crashaw upon the infant Martyrs.

To see both blended in one flood,
The mother's milk, the children's blood,
Makes me doubt if heaven will rather
Roses hence, or lilies gather.

Let us add, in justice to our unequal author, that he has passages as tender and as beautiful as the preceding lines are absurd and disgusting. The following verses from an Epitaph, on a faithful couple buried together, have a certain pathetic sweetness (bordering on affectation) highly characteristic of this singular Poet.

Peace, good Reader, do not weep!
Peace, the lovers are asleep!
They (sweet turtles) folded lye,
In the last knot love could tye.

[H] *The publication which bears his name.* This volume is divided into three parts, 1. *Steps to the Temple*; 2. *The Delight of the Muses*; 3. *Sacred Poems presented to the Countess of Denbigh, by her most devoted Servant, Richard Crashaw, in hearty acknowledgment of his immortal obligation to her Goodness and Charity.* Perhaps the last division to which Car's Poem is prefixed, was the only one published in 1646. The second edition appeared in 1649, and afterwards with the false date of 1670. Since the preceding pages were prepared for the press, the liberality of Dr. Farmer has indulged us with the sight of a literary curiosity, a Collection of Sacred Epigrams in Latin, printed at Cambridge, 1634, and dedicated to Benjamin Lany, Master of Pembroke-hall, with the signature of R. C. These are unquestionably the production of our Author, and the fruits (as he tells us in the Dedication) of a tender age. Indeed, tenderness and piety were the characteristics of Crashaw at every period of his life; many of the Epigrams contain precisely the turn which we find in his English compositions. For example, On the Infant Martyrs mentioned in a preceding note.

Sic pueros quisquis vidit, dubitavit an illos
Lilia cælorum diceret anne Rosas.

We shall insert one Epigram because it contains a well-known verse, which has been frequently celebrated without being appropriated to its real author.

Joan.

of the author, 1646. He entrusted his muse to a very affectionate Guardian, who, under the signature of Thomas Car, informs us in a few introductory verses,

Sweet Crashaw was his friend, he Crashaw's brother,
So Car hath title then: 'twas his intent
That what his riches penn'd, poor Car should print;
Nor fears he check, praising that happy one
Who was beloved by all, disprais'd by none.

Car's panegyrick does not appear extravagant; and we trust this article will not be thought too long, when it is remembered that Crashaw, however neglected in later days, was the companion of Selden, and the idol of Cowley.]

Joan. 2.

Aquæ in vinum versæ.

Unde rubor vestris, et non sua purpura lymphis
Quæ rosa mirantes tam nova mutat aquas.
Numen (Convivæ) præfens agnoscite numen
Nympha pudica deum vidit et erubuit.

We are indebted for an English Version of it to a

CREECH (THOMAS), famous for his Translations of *Lucretius* [A], *Horace* [B], and from other antient authors, both in prose and verse [C], was son of Thomas

[A] *His Translation of Lucretius.* It is intitled; *T. Lucretius Carus, Of the Nature of Things. Translated into English verse by Thomas Creech, A. M. and fellow of Wadham College in Oxford.* It was printed at Oxford in 1682, in 8vo. and recommended by a Latin Distich of Dr. Edward Barnard, Savilian Professor of Astronomy in that University, and by a copy of English verses of Mr. Thomas Brown of Christ-Church. It was re-printed in the year following, with Commendatory verses by several eminent hands (1): among which, those, which pass under the names of Mr. Dryden and Mr. Waller, we are assured from undoubted authority, were not theirs. However, Mr. Dryden, who himself translated some parts of *Lucretius*, has given the highest character of Mr. Creech's performance, in the following words. 'This puts me in mind of what I owe to the ingenious and learned translator of *Lucretius*. I have not here designed to rob him of any part of that commendation, which he has so justly acquired by the whole author, whose fragments only fall to my portion. The ways of our translations are very different: he follows him more closely than I have done; which became an interpreter of the whole Poem. I take more liberty, because it best suited with my design, which was to make him as pleasing as I could. He had been too voluminous, had he used my method in so long a work, and I had certainly taken his, had I made it my business to translate the whole. The preference then is justly his, and I join with Mr. Evelyn (*) in the confession of it, with this additional advantage to him; that his reputation is already established in this poet, mine is to make its fortune in the world. If I have been any where obscure, in following our common author, or if *Lucretius* himself is to be condemned, I refer myself to his excellent Annotations, which I have often read, and always with some new pleasure (2).' Mr. Creech published an Edition of *Lucretius* in Latin, intitled; *Titi Lucretii Cari de Rerum Natura libri sex, quibus Interpretationem et Notas addidit Thomas Creech.* Oxon. 1695, 8vo. The Annotations on this Latin Edition were afterwards printed at the end of the English Translation, and all together by themselves. In the Edition of Mr. Creech's *Lucretius*, London 1714, in Two Volumes Octavo, all the verses of the Text, which Mr. Creech had left untranslated, are supplied. Those particularly that were omitted towards the end of the 4th book, where the poet treats of the nature of love, are taken from Mr. Dryden's translation of that part of the author. The Translator's Notes are disposed in the body of the Book, under the several places to which they properly belong; intermixed with several Annotations by another hand; and all together form-

little circle of poetical friends, who having translated the Epigram various ways, selected the four following lines—

Whence does the chrystal redden to the eye,
And lucid water take a roseate dye?
Here own him present who gives nature law!
This element saw God; and blush'd with awe.

ing a compleat System of the Epicurean Philosophy (3). And here impartiality obliges us not to suppress the severe censure passed on Mr. Creech by a certain writer, who, having observed, that *the only book now in being, which from one end to the other is an open defence of Atheism, is that of Lucretius*, tells us (4), that 'this most impious book in Charles II's reign was with infinite pains turned into English verse, that the smoothness and sweetness of the metre might supply what was wanting in the argument; that the elegance of the expression, the melodious harmony of numbers, and all those other bewitching beauties, which attend good poetry, might insensibly instil the poison into the minds of unthinking people, especially of the youth, whose imagination is generally too strong for their reason, and their fancy too powerful for their judgment. And this celebrated Translation was not only made by an Oxford Scholar (who was thereupon preferred) but it was licensed by the University of Oxford, where he was looked on as a raw lad, that had not read the *Lucretius* of Creech, who died, as he lived, like a true Atheist; but being a High-Church Priest, his murdering himself was not made to pass for a judgment.' This calumny is sufficiently answered in the Preface to the two volumes.

[B] *His Translation of Horace.* It is entitled; *The Odes, Satyrs, and Epistles of Horace. Done into English by Mr. Creech.* It is dedicated *To the very much esteemed John Dryden, Esq;* In the Preface, having observed, that Quintilian was of opinion, that all Horace's *Odes* ought not to be interpreted, he adds: 'what he means by *Interpretation* is evident to every one that understands the extent of the word, and the Ancients method of instructing: and why this caution is restrained to the *Odes*, and not applied to the *Satires* as well, since the reason upon which he fixes it seems common to both, must be taken from the design and subject-matter of the Poems. To describe and reform a vicious man necessarily requires some expressions, which an *Ode* can never want. The paint, which an Artist uses, must be agreeable to the piece which he designs. *Satire* is to instruct, and that supposeth a knowledge and discovery of the Crime; while *Odes* are made only to delight and please, and therefore every thing in them that justly offends is unpardonable.' These principles, he says, made him cautious of some *Odes*, though he omitted to translate three more upon a different Account. The *Odes*, not translated by Mr. Creech, are; the 6th, 9th, 21st, 25th, and 27th of the *Third Book*; the 4th of the *Fourth Book*; and the 12th *Epode*. As to the *Satires* of Horace, he was advised, he tells us, to turn them to our own time, since Rome was now rivalled in

Thomas Creech, Gent. and born, in 1659, at Blandford in Dorsetshire. He was educated in Grammar learning under Mr. Thomas Curganven, Master of the Free-school at Sherburne; and admitted a Commoner of Wadham College in Oxford [D], in Lent-Term 1675, under the tuition of Mr. Robert Pit, and afterwards of Mr. Robert Balch, Fellows of that College. The 28th of September the year following, he was admitted a Scholar of that House, and acquired the reputation of a good Philosopher, Poet, and a severe Student (a). October the 27th, 1680, he took the degree of Bachelor of Arts (b). In 1680, he was appointed by his Tutor Mr. Balch, then one of the Proctors of the University, his Quodagesimal Collector of the Bachelors that were to determine the latter end of that year (c). June the 13th, 1683, he took the degree of Master of Arts (d); and about the beginning of November following, was elected a Probationer-Fellow of All-Souls College, having given singular proofs of his Classical learning and Philosophy before his Examiners (e). In 1701, having taken Holy Orders, he was presented by his College to the Living of Wellwyn in Hertfordshire: but, before he had taken possession of it, he unfortunately put an end to his own life [E], at Oxford (f). He has the character

her vices; and parallels for Hypocrisy, Profaneness, Avarice, and the like, were easy to be found. But those crimes, he declares, 'were much out of his acquaintance, and since the character is the same whoever the person is, he was not so fond of being hated, as to make any disobliging application.' Such pains, says he, would look like an impertinent labour to find a dunghill, only that I might satisfy an unaccountable humour of dirtying one man's face, and bespattering another. He concludes his Preface with acknowledging himself indebted to other writers, particularly Lord Roscommon, to whose admirable version he owed the sense, and the best lines in the *Art of Poetry*.

[C] His translations from other ancient authors, both in prose and verse. They are: I. A Translation of the *Idylliums of Theocritus*, with Rapin's *Discourse of Pastorals*, Oxford, 1684, 8vo; dedicated to Mr. Arthur Charlett of Trinity College in Oxford. II. The 2d *Elegy of Ovid's First Book of Elegies*: and the 6th, 7th, 8th, and 12th of *Ovid's Second Book of Elegies*: and the *Story of Lucretia*, out of *Ovid de Fastis*. III. The 2d and 3d of *Virgil's Eclogues*; and part of *Virgil's Fourth Georgic*. IV. The *Thirteenth Satire of Juvenal*, with Notes. V. A Translation into English of the verses prefixed to Mr. Quintinie's *Compleat Gardiner*. VI. The *Lives of Solon, Pelopidas, and Cleomenes*, from *Plutarch*. VII. The *Life of Pelopidas* from *Cornelius Nepos*. VIII. *Laconic Apophthegms, or remarkable Sayings of the Spartans*, from *Plutarch*. IX. A *Discourse concerning Socrates his Daemon*, and The two first Books of the *Symposiasts*, from *Plutarch*. X. A Translation of *Manilius's Astronomicon*.

(5) Vol. i. p. 39.

[D] Admitted a Commoner of Wadham College in Oxford. The Author of the *Poetical Register* (5) tells us, that his parents circumstances not being sufficient to support him in a liberal Education, his disposition and capacity for learning raised him a Patron in Colonel Strangeways, whose generosity supplied that defect; and that this gentleman sent him to Wadham-College, where he was admitted a scholar on the foundation.

[E] He put an end to his own life. Neither the motives to, nor the circumstances of, this affair are certainly known. The author of the *Nouvelles de la Republique des Lettres* (6), informs us, that, in the year 1700, Mr. Creech fell in love with a woman, who treated him with great neglect, though she was complaisant enough to several others. This affront he could not bear, and resolved not to survive it. Whereupon he shut himself up in his study, where he hanged himself about the end of June 1700, and was found in that circumstance three days after. The *Poetical Register* says nothing of the particular manner of his death, but only that he unfortunately made away with himself in the year 1701; and ascribes (7) this fatal catastrophe of Mr. Creech's life to the moroseness of his temper, which made him less esteemed than his great merit deserved, and engaged him in frequent animosities and disputes upon that account.

(6) For Sept. 1701.

(7) *Ubi supra*.

(8) Catalogue of Oxford Graduates.

VOL. IV.

Our predecessor is mistaken, both with regard to the time in which Mr. Creech became possessed of the Rectory of Welwyn, and the time of his decease. In a bond for the payment of the first fruits of that Rectory into the Exchequer, (in the possession of the late John Baynes, Esq.) dated June the 9th, 1699; and in which Dr. Lloyd of Doctor's Commons, and Jacob Tonson the Bookseller, are bound along with him, he is called *Thomas Creech de Welwyn in Com. Herts*. It is evident, therefore, that he had been presented to that living in the year 1699. It is equally evident, from the Letters of Administration granted to the Executrix of his will, and from a clause added to the will, that he died in 1700, and that his death must have taken place between the 18th and the 28th of June in that year.

The account given in note [E], that our author destroyed himself because he was treated with great neglect by a woman whom he loved, appears to be groundless. From an original letter of Arthur Charlett, preserved in the Bodleian Library, it has lately been discovered, that this unhappy event was owing to a very different cause. There was a fellow Collegian of whom Creech frequently borrowed money; but repeating his applications too often, he met one day with such a cold reception, that he retired in a fit of gloomy disgust, and in three days was found hanging in his study (9).

From Creech's will, an authentic copy of which was, likewise, in Mr. Baynes's possession, and of which he favoured me with a transcript, several particulars may be collected concerning our Poet that have not hitherto been known. In this will he orders, that his body be buried in the Church-yard of the parish where he dies, that no stone or inscription be put upon the grave, and that nothing be given or distributed at his funeral besides one pair of white gloves to each of his bearers. He adds, that he would particularly remember his College, and his good friends Colonel Codrington, Dr. Charlett, Dr. Sykes, Dr. Bathurst, Dr. Eaton, Rivers, Hinton, Collins, Kenton, &c. but that he is not in a condition to give legacies, and he hopes none will think this omission to be disrespectful. He then directs, that all the goods he leaves behind him be sold, and the money arising by the sale, together with the ready cash he leaves, and what debts are owing him, after his debts are paid, be divided into two equal portions, one of which he gives and bequeaths to his dear sister Bridget Bastard of Blandford in the county of Dorset, to be employed to the best advantage for the use of his father Thomas Creech, during his natural life, and after his decease to his said sister for ever. The other portion he gives and bequeaths to Mrs. Philadelphia Playdell of St. Giles's parish in Oxford, Spinster, for ever. He likewise constitutes and appoints the said Philadelphia Playdell the sole Executrix of this his last Will and Testament. The will bears date, Jan. 18, 1699; and on the 18th of June, 1700, a direction is added, that all his written papers of all sorts, excepting those in his chest of drawers and his almanack, be burnt without reading. It was on the 28th of the same month that Letters of Administration were granted to his Executrix.

(9) Warton's *Life of Ralph Bathurst*, p. 198. note.

5 S

Mrs.

of having been a man of excellent parts and sound judgment; a perfect master of the Greek and Latin Languages; but naturally of a morose temper, and too apt to despise the understandings and performances of others (g).

(g) Jacob's Poetical Register, &c. vol. i. p. 39.

Mrs. Philadelphia Playdell was a Lady in Oxford whom Mr. Creech wished to have married, but he could not obtain the consent of her friends. There is reason to believe that their affection was mutual; for, in a will of her's, dated April 24, 1703, she makes the following bequest: "Item, I give and bequeath to Mr. Thomas Creech of Blanford in the county of Dorset the interest and produce of one hundred and fifty pounds for and during the term of his natural life." It is most probable, not to say certain, that it must have been the father of the Poet whom she thus remembers. This will, however, had no force, as she was married, in 1704, to Mr. Ralph Hobson, Butler of Christ-Church. That she did not long live with her husband, is evident from the following inscription, which was over her tomb at Oxford, on a brass plate, now supposed to be destroyed.

In
Memory of
Philadelphia,
Wife of
Ralph Hobson, and
Daughter of,
Richard Playdell, Gent.
She deceased Feb. 22th.
Ann. Dom. 1705.
Aged 34 (10).

(10) From Mr. Baynes's Communications.

As to Creech's poetry, it will scarcely at present be deemed an object which calls for much criticism. He has of late years been regarded rather as a good scholar than a good Poet. Dr. Joseph Warton, however, who will be allowed to be an admirable judge, has spoken of him in terms of applause. "Creech," says the Doctor, "in truth, is a much better Translator than he is usually supposed and allowed to be. He is a nervous and vigorous writer: and many parts, not only of his Lucretius, but of his Theocritus and Horace (though now decried) have not been excelled by other

Translators. One of his pieces may be pronounced excellent; his Translation of the thirteenth Satire of Juvenal; equal to any that Dryden has given us of that author (11)."

It has hitherto been almost universally understood, that Mr. Creech's Translation of Lucretius is his capital production. In Horace it is generally allowed that he failed; and this was early the sentiment of the public. Dr. William Coward, in his "Licentia Poetica discussed," has the following lines.

"Wherefore be wise, if once you've rais'd your
fame,
And by just merit gain'd a popular name.
After Lucretius was translated well,
Weak was th' attempt in Horace to excel (12)."

(11) Essay on the Writings and Genius of Pope. vol. ii. p. 400, 401.

(12) From the Copy in the British Museum.

I have mentioned that for the historical part of this addition, I am indebted to the materials communicated by the late John Baynes, Esq. It was the same Gentleman who enabled me to write the curious note concerning Anne, Countess of Dorset, Pembroke, and Montgomery, which is subjoined to the article of her father, George Clifford, third Earl of Cumberland. Many other obligations would have been conferred upon the Biographia Britannica by Mr. Baynes, if he had not been cut off by a putrid fever, this month of August, 1787, in the 30th year of his age, to the great concern of his friends, and, it may be added, to the great loss of the public; for, if his life had been continued, there is no doubt but that he would have arisen to distinguished eminence, both as a Lawyer and a Scholar. It is proposed to pay a tribute of respect to his abilities and character, under the article of Dr. John Jebb, with whom he was closely connected in friendship, and with whom he concurred in an ardent zeal for liberty, civil and religious, though without adopting every particular idea which was entertained by that excellent man. J

K.

CRESSEY or CRESSY (HUGH-PAULIN, or SERENUS) a celebrated writer, in behalf of the Papists, and one of their Ecclesiastical Historians, who flourished in the seventeenth Century. He derived his descent from an ancient and honourable family, seated formerly in Nottinghamshire; but before his time it had removed into Yorkshire, of which county he was himself a native, being born at Wakefield in the year 1605 (a). His father was Hugh Cressley, Esq; Barrister of Lincoln's-Inn; his mother's name was Margery the daughter of Dr. Thomas Doylie, an eminent Physician in London (b). He was educated at a Grammar-school in the place of his nativity, till such time as he had attained the age of fourteen or thereabout, and then in Lent-term 1619, he was removed to Oxford where he studied with great vigour and diligence, and in the year 1626 was admitted Fellow of Merton-college in that University (c). After taking the degrees of Bachelor and Master of Arts he entered into Holy Orders, and became Chaplain to Thomas Lord Wentworth, then Lord President of the North, with whom he had the honour to live some years (d). About the year 1638 he went over to Ireland with that wife and worthy Nobleman Lucius Carey, Lord Viscount Falkland, to whom he was likewise Chaplain, and by him much countenanced and esteemed (e). By the favour of this noble person, when Secretary of State, he was in the year 1642, promoted to a Canonry in the Collegiate Church of Windsor, and to the dignity of Dean of Laughlin in the kingdom of Ireland, but through the disturbances of the times he never attained the possession of either of these preferments (f). After the unfortunate death of his patron, who was killed in the battle of Newbury, he found himself in a manner destitute of subsistence, and therefore readily accepted a proposal that was made him of travelling with Charles Bertie, Esq (g); afterwards created Earl of Falmouth, a great favourite of King Charles II. unhappily slain in a battle at sea in the first Dutch war after the Restoration (h). He quitted England in the year 1644, and making the tour of Italy with his pupil, moved by the declining state of the Church of England, he began to listen to the persuasion of the Romish Divines, and in the year 1646 made a public profession at Rome of his being reconciled to that Church (i). He went from thence to Paris, where he thought fit to publish what he was pleased to stile the motives of his conversion, which work of his, as might reasonably be expected, was highly applauded by the Romanists, and is still considered by them as a

very extraordinary performance [A]. After taking this step he was much inclined to become a Monk of the Carthusian Order, and had thoughts of entering into the Monastery of English Carthusians at Newport in Flanders, but from this he was dissuaded by some of his zealous countrymen, who were desirous that he should continue to employ his pen in defence of their religion, for which the severe discipline of that Order would have allowed him but little time; and therefore by their advice he laid aside that design, and being recommended to Henrietta-Maria, Queen Dowager of England, he was taken under her protection, and being invited by the Benedictine College of English Monks at Douay in Flanders, he at length resolved to retire thither, and for the expence of his journey received one hundred Crowns as a bounty from that Princess, who could but ill spare even so small a sum at that time. Sometime after his arrival at Douay he entered into the Benedictine Order, and upon that occasion changed the name he received at his baptism of Hugh-Paulin, for that of Serenus de Cressy, by which he was afterwards known to the learned world (k). He remained about seven years or more in that College, and during his residence there published a large work, of which the reader will find some notice taken at the bottom of the page [B]. After the Restoration and the marriage of King Charles II. Queen Catharine appointed our author, who was then become one of the Mission in England, her Chaplain, and thence forward he resided in Somerset-house in the Strand (l). The great regularity of his life, his sincere and unaffected piety, his modest and mild behaviour, his respectful deportment to persons of distinction, with whom he was formerly acquainted when a Protestant, and the care he took to avoid all concern in political affairs or intrigues of State, preserved him in quiet and safety, even in the most troublesome times. He was, however, a very zealous champion in the cause of the Church of Rome, and was continually writing in defence of her doctrines, or in answer to the books of controversy, written by Protestants of distinguished learning or figure, and as this engaged him in a variety of disputes, he quickly gained a great reputation with both parties, the Papists looking upon him to be one of their ablest advocates, and the Protestants allowing that he was a grave, a sensible, and a candid writer (m) [C]. But that which of all his performances contributed to make him most known, was his large and copious Ecclesiastical History, which was indeed a work of great pains and labour, and executed with much accuracy and diligence. He had observed that nothing made a greater impression upon the people in general of his communion, than the reputation of the great antiquity of their Church, and the fame of the old saints of both sexes, that had flourished in this island; and therefore he judged that nothing could be more serviceable, to that which he stiled the Catholick Interest, than composing such a History as might set these points in the fairest and fullest light possible. He had before him the example of a famous Jesuit, Michael Alford, alias Griffith, who had adjusted the same History under the years in which the principal events happened, in four large volumes, collected from our ancient Historians: but as this was written in Latin, he judged that it was less suited to the design which he had in view, of bringing it into the hands of common readers; and therefore he set himself this painful task of putting it into English, with such helps and improvements

(k) Sir James Ware's Works, vol. iii. p. 356.

(l) Wood's *Artb. Oxon.* vol. ii. col. 530.

(m) See Dr. Whitby's Preface to his Reply to S. C's. Answer to Dr. Pierce's Court-Sermon. The Christian Moderator, Lon. 1652, p. 97.

[A] *As a very extraordinary performance.*] The author was pleased to entitle this work, EXOMOLOGESIS: or a faithful narration of the occasions and motives of his Conversion to Catholic Unity. Paris 1647 and 1653, in 8vo. To the last edition is an appendix, In which are cleared certain misconstructions of his Exomologesis, published by J. P. author of the Preface to the Lord Falkland's discourse of Infallibility. As soon as this was finished, he sent it over to his dear friend Dr. Henry Hammond, as to one whose sincerity he had experienced, and for whose judgment he had a high esteem. That learned person wrote him a very kind letter in answer; in which he thanked him for his book, but at the same time, told him there was a vein of fallacy ran through the whole contexture of it; adding, we are friends, and I do not propose to be your antagonist. At the close of this epistle, he invited him into England, assuring him that he should be provided with a convenient place to dwell in, and a sufficient subsistence to live comfortably, without being molested by any, about his religion and conscience. This offer, though our author did not accept, yet he returned, as became him, an answer full of respect and gratitude to the kind friend who had made it (1). Few books are more admired than this by the Papists, who flatter themselves, that he has fully answered the judicious Mr. Chillingworth, and his own kind patron the learned Lord Falkland; but we know that they are so apt to magnify the performances of all their converts, that there is no laying any great stress upon such commendations (2).

[B] *At the bottom of the page.*] This was a treatise

of the mystical theology, entituled, SANCTA SOPHIA; or, Directions for the prayers of contemplation, &c. extracted out of more than XL treatises, written by the late Reverend Father Aug. Baker, a Monk of the English congregation of the holy order of St. Benedict. Douay, 1657, in 2 vol. in a large 8vo. To which are added, Certain patterns of devout exercises of immediate acts and affections of the will. Of this Father Augustine Baker, whose true name was David Baker, who had studied the Law in the Middle Temple, and who from being little better than an Atheist, became a convert to Popery, and a very zealous devotionist, the Oxford Historian has given us a very large account (3). He had once it seems some intention of writing the Ecclesiastical History of England, for which he had made very copious collections, that were of great service to our author, when he entered upon the execution of the same project.

[C] *That he was a grave, a sensible, and a candid writer.*] The first work that he published after his return to England, bore this title *A non est inventus returned to Mr. Edward Bagshaw's enquiry and vainly boasted discovery of weakness in the Grounds of the Church's infallibility.* 1662. 8vo.

He wrote next, *A letter to an English gentleman dated July 6th, 1662, wherein Bishop Morley is concerned,* and therefore we find it printed amongst some of the treatises of that Reverend Prelate.

He published after this, *Roman Catholic Doctrines no Novelty; or, an answer to Dr. Pierce's Court-Sermon, miscalled, The primitive rule of Reformation.* 1663, 8vo; answered by Dr. Daniel Whitby.

(1) This circumstance is taken from his Apologetical Epistle to a person of Honour, p. 47.

(2) The Christian Moderator, by John Austin, to which an Answer was written under the title of *Legenda Ligneæ*, in the 36th chapter of which our author is very harshly treated.

as he thought necessary (n). His History was very much approved by the most learned of his countrymen, of the same religion, as appears by the testimonies prefixed to it. To speak impartially, the order, regularity, and coherence of the facts contained therein, deserve to be commended, and the gravity, or rather solemnity of the language is very agreeable to the author's aim and intention, as are likewise the care and punctuality shewn in citing his authorities (o). But, on the other hand, he is justly, though modestly, censured by a learned prelate, for giving in to the superstitious notions of many of our old writers, and transcribing from them such fabulous passages as have been long ago exploded by the inquisitive and impartial criticks of his own faith (p). Anthony Wood thinks this however excusable, because he tells us whence he had them; and perhaps we may render this excuse rather better, by observing that he meant to excite his readers to a zealous imitation of their pious ancestors, rather than afford them historical instruction, from a nice and critical examination of what the authors, from whom he collected his materials, had delivered. The book however still maintains its credit amongst the Romanists, is reputed a most authentic ecclesiastical chronicle, and is frequently cited by their most considerable authors, as a performance of established reputation (q) [D]. He proposed to have published another volume of this History, which was to have carried it as low as the dissolution of monasteries by King Henry VIII. but before he had proceeded full three hundred years lower than the Norman conquest, his life and labours were together suspended (r). We are not however to suppose from hence, that his whole time was devoted to this large work. On the contrary, we find him very warmly engaged in all the controversies of the times, and yet that he had some leisure to bestow upon works of another nature [E]. His last dispute was in reference to a book written by the learned Dr. Stillingfleet,

[D] *As a performance of established reputation.* The reader will form a very just and clear notion of the author's real intentions in composing this work, by perusing the title of it, which, for this reason, I shall insert at large. *The Church History of Britanny, from the beginning of Christianity to the Norman Conquest; under Roman Governors, British Kings, the English Saxon Heptarchy, the English Saxon and Danish Monarchy. Containing, I. The Lives of all our Saints, assigned to the proper ages wherein they lived. II. The erection of Episcopal Sees, and Succession of Bishops. III. The celebration of Synods, National, Provincial, and Diocesan. IV. The foundations of Monasteries, Nunneries, and Churches. V. And a sufficient account of the Successions of our Kings, and of the civil affairs of this Kingdom; from all which is evidently demonstrated, that the present Roman Catholic Religion hath from the beginning, without interruption, or change, been professed in this our holy Island, &c.* By the Reverend Father Serenus Cressley, of the Holy Order of St. Benedict, 1668, fol (4). He very fairly acknowledges that the bulk and substance of his work is taken from the three first volumes of the *Ecclesiastical Annals*, written in Latin by Father Griffith, and that for the additions and improvements he has made, he stands chiefly indebted to the *Monasticon Anglicanum*, published by Sir William Dugdale, the *Decem Scriptores*, the *Flores Historiæ Ecclesiasticæ*, by Dr. Smith, whom the Papists stiled Bishop of Chalcedon, and the large collection of manuscripts chiefly made by Father Augustine Baker, of whom some account has been given in the former note. He offers some apologies, for the fabulous relations inserted in his History; which however amounts to no more than this; that he did not think himself obliged to believe all that he had taken the pains to collect, and consequently he leaves the same liberty to his reader, who without doubt is not at all bound to have a larger measure of faith than the author. There is one thing very singular in his preface. His education at Oxford had taught him civility, his living at Court had improved it, and the obligations he lay under to several eminent and worthy persons of our religion, compelled him to shew it in the manner of his treating such prelates of our Church, as he had occasion to mention, in reference to the matters recorded in his History. But for this however, he thought himself obliged to make an apology to those of his own communion, which is so very remarkable as to deserve the reader's particular notice. 'But for my excuse, or defence, I must take leave to say, I. That herein I follow not only the example of the ancient best Fathers in their disputes, even against Arians, Photinians, Novatians, &c. but of the most learned author of the Protestant's Apology.

II. I am assured, that if my accusers were personally to converse with these Protestant prelates, they would not after such a manner change their titles. Now I see no reason, why an obligation should be imposed on any, to be uncivil with his pen, and not with his tongue. I do not find, that ever any Protestants esteemed such civility an advantage to them in the debate concerning their ordinations; for to instance in a case in just reason, far less disputable than that, yet not long ago actually and terribly disputed: If during the late rebellion, a faithful subject of the King should have petitioned for a pass to go through the rebels quarters, no man would have suspected him of disloyalty, because in his petition to Fairfax, Cromwell, or Waller, he stiled them Lords Generals. Has not the King himself, in addresses to the unlawful Parliament, done the like? yet all this surely without engagement to acknowledge their authority to be legitimate: particularly as touching the forementioned writers, it cannot be denied but that we are much obliged to their diligence in the search of public records, and their sincerity in delivering what they found. True it is, that B. Parker, according to the impulse of a Calvinistical spirit, often inserts malicious invectives against the Catholic Church as being indeed the patriarch of Calvinistical prelacy. B. Godwin is less cholerick, and may be excused, if now and then he seeks some advantage, particularly upon the account of married prelates. But as for B. Usher, his admirable abilities in Chronological and Historical Erudition, as also his faithfulness and ingenuous sincerity in delivering without any provoking reflections, what with great labour he has observed, ought certainly at least to exempt him from being treated by any one rudely and contemptuously, especially by me, who am moreover always obliged to preserve a just resentment of very many kind effects of friendship, which I received from him.'

[E] *Some leisure to bestow upon works of another nature.* We have already taken notice of his inclination to the Mystic Divinity, which led him to take so much pains about the works of Father Baker, and from the same disposition he also published *Sixteen revelations of divine love, shewed to a devout servant of our Lord, called Mother Juliana, an Anchorite of Norwich, who lived in the days of King Edward III.* printed 1670, 8vo. and dedicated to the Lady Blount, of Sodingdon, widow of Sir George Blount; and likewise changed from old into Modern English more compendiously. A book written before the change of Religion, entitled, *An abridgment of the book called The cloud of unknowing, and of the counsel referring* to

(4) There is no name of the place in the title page of most of the copies, but it was actually printed at Roan.

lingfleet, afterwards Bishop of Worcester, to which, though several answers were given by the ablest of the Popish writers, there was none that seemed to merit reply, excepting that penned by Father Cressey; and this procured him the honour of a very illustrious antagonist, his old friend and acquaintance at Oxford, Edward Earl of Clarendon (s), who, notwithstanding, treated him upon this occasion somewhat severely, which induced our author to pen and publish that letter which is mentioned in the notes. Being now grown far in years and having no very promising scene before his eyes, from the warm spirit that appeared against Popery amongst all ranks of people, and the many excellent books written to confute it by the most learned of the Clergy, he was the more willing to seek for peace in the silence of a country retirement; and accordingly withdrew for some time to the house of Richard Caryll, Esq; a gentleman of an ancient family and affluent fortune, at East Grinstead in the county of Sussex, and dying upon the 10th of August 1674, being then near the seventieth year of his age, was buried in the parish church there (t). His loss was much regretted by those of his communion, as being one of their ablest champions, ready to draw his pen in their defence on every occasion, and sure of having his pieces read with singular favour and attention (u). His memory also was revered by the Protestants, as well on account of the purity of his manners, and his mild and humble deportment, as for the plainness, candour, and decency, with which he had managed all the controversies that he had been engaged in, and which had procured him in return, much more of kindness and respect, than almost any other of his party had met with, or indeed deserved (w).

(w) See Dr. Daniel Whitby's Preface to his Reply to our author's Answer to Dr. Pierce's Court-Sermon.

(s) His Work was called *Animadversions on a book intituled, Fanaticism fanatically imputed, &c.*

to the same. This is not printed, but in MS. and was shewn to Anthony Wood, by Father W. R. a Benedictine Monk (5).

(5) Wood's *Art. Oxon.* vol. ii. col. 531.

The next performance of his was upon occasion of a famous treatise, written by Dr. Stillingfleet, against the Church of Rome, which made a very great noise in those days, and put for some time a stop to the encroachments their Missionaries were daily making, which highly provoked those of the Roman communion. This was entitled,

Answer to part of Dr. Stillingfleet's Book, entitled Idolatry practised in the Church of Rome, 1672. 8vo. He published also,

Fanaticism fanatically imputed to the Catholic Church by Dr. Stillingfleet, and the imputation refuted and retorted, &c. 1672. 8vo.

Question, Why are you a Catholic? Question, Why are you a Protestant? 1673. 8vo.

In support of Dr. Stillingfleet, the Earl of Clarendon

wrote *Animadversions upon our author's answer*; in which he very plainly tells him and the world, that it was not devotion, but necessity and want of a subsistence, which drove him first out of the Church of England, and then into a Monastery. As this noble peer knew him well at Oxford, it may be very easily imagined that what he said made a very strong impression, and it was to efface this, that our author thought fit to send abroad an answer under the title of

Epistle apologetical to a Person of Honour, touching his vindication of Dr. Stillingfleet, 1674. 8vo. In this work he gives a large relation of the state and condition of his affairs, at the time of what he styles his conversion, in order to remove the imputation of quitting his faith to obtain bread. The last work that he published was entitled,

Remarks upon the Oath of Supremacy.

C.

CREW (NATHANAEL), Bishop of Durham in the end of the seventeenth, and beginning of the eighteenth, century, was the fifth son of John Lord Crew of Stene in the county of Northampton [A], by Jemima, daughter and coheir of Edward Walgrave of Lawford in Essex, Esq (a). He was born at Stene, the 31st of January 1633 (b); and in 1652 admitted Commoner of Lincoln-college in Oxford (c), where he took the degree of Bachelor of Arts the 1st of February 1655-6 (d); soon after which he was chosen Fellow of that College (e). The 29th of June 1658, he took the degree of Master of Arts (f). At the Restoration, he declared heartily in favour of the Crown and Hierarchy (g); and in 1663 was one of the Proctors of the University (h). The year following, on the 2d of July, he took the degree of Doctor of Law (i); and soon after went into Holy Orders. August the 12th, 1668, he was elected Rector of Lincoln-college, upon the decease of Dr. Paul Hood. On the 29th of April 1669, he was installed Dean of Chichester, and held with that dignity the Præcentorship, in which he had been installed the day before. He was also appointed Clerk of the Closet to King Charles II (k). In 1671, upon the translation of Dr. Blandford to the See of Worcester, he was elected Bishop of Oxford in his room on the 16th of June, confirmed June the 18th, consecrated July the 2d, and enthronized the 5th of the same month; being allowed to hold with it in commendam the Living of Whitney, and the Rectorship of Lincoln-college (l). But this last he resigned the 18th of October 1672 (m). In 1673 he performed the ceremony of the marriage of

[A] Was the fifth son of John Lord Crew of Stene, &c.] This John Lord Crew was son and heir to Sir Thomas Crew, Kt. one of the Serjeants at Law to King Charles I. Speaker of the House of Commons 21 Jacob. & 1 Caro. and descended from the ancient family of Crew in the County Palatine of Chester. Having been instrumental in the Restoration of K. Charles II. he was advanced by that King, in the 13th year of his reign, April 20, 1661, to the dignity of a Baron of this realm, by the title of Lord Crew of Stene, and to the heirs male of his body (1).
The elder brother of Sir Thomas Crew

above-mentioned, was Sir Randolph Crew, Kt. who on the 1st of July 1614, was made Serjeant at Law; and the 26th of January 1623 constituted Chief Justice of the King's Bench, but deprived of the same again on the 9th of November 1626, for openly manifesting his dislike at King Charles the 1st's. raising money by way of Loan. On his being displaced, we are informed, he discovered no more discontent, than the weary traveller is offended, when told that he is arrived at his journey's end. He is said, to have first brought the model of excellent building into Cheshire (2).

James Duke of York with Maria of Este (n). Through that Prince's interest, with whose measures he seems to have been very compliant, he was translated, the 22d of October 1674, to the rich Bishoprick of Durham; which had been kept vacant ever since the death of Bishop Cosin, January 15, 1671-2 (o). In the beginning of the year 1675, he baptized Katharina-Laura, the new born daughter of James Duke of York (p). The 26th of April 1676, he was sworn of the Privy Council to King Charles II (q). Upon the accession of King James II. to the Crown, he was in great favour with that Prince, who thought him most obsequious to his will. Accordingly, on the 29th of December 1685, he was made Dean of his Majesty's Royal Chapel in the room of Henry Bishop of London who had been removed; and within a few days after, namely January 8, was admitted into the Privy Council (r). In 1686 he was appointed one of the Commissioners in the new Ecclesiastical Commission erected by King James (s), and seemed to be proud of that honour [B]. By virtue of that Commission, he appeared, on the 9th of August, at the Proceedings against Henry Bishop of London, and was for suspending him during the King's pleasure; though the Earl, and Bishop, of Rochester, and Chief Justice Herbert, were against it (t). Immediately after that Bishop's suspension, Commissioners were appointed to exercise all manner of Ecclesiastical jurisdiction within the Diocese of London, of which Bishop Crew was one (u). The 20th of November following, he was present at, and consenting to, the degradation of Mr. Samuel Johnson (w); previously to the most severe punishment that was inflicted on that eminent Divine. In the fore-mentioned quality of an Ecclesiastical Commissioner, he countenanced with his presence a prosecution carried on, in May 1687, against Dr. Peachy, Vice-Chancellor of Cambridge, for refusing to admit one Alban Francis, a Benedictine Monk, to the degree of Master of Arts in that University, without taking the oaths (x). And, in July the same year, he offered to attend the Pope's Nuncio at his public Entry into London; but his coachman refused to drive him that way (y). His name was put again in a new Ecclesiastical Commission issued out this year, in October (z); in which he acted, during the severe proceedings against Magdalen-college in Oxford, for refusing to elect one Anthony Farmer their President, pursuant to the King's mandate (a). The Bishop continued acting as an Ecclesiastical Commissioner till October 1688; when that Commission was abolished. Towards the end of the year 1687, he was employed, with the Bishops of Rochester and Peterborough (b), to draw up a Form of Thanksgiving for the Queen's being with child (c). Thus he complied with the King's designs, till he found that the Prince of Orange's party was likely to prevail. But, then, he absented himself from the Council-board, and told the Archbishop of Canterbury, that he was sorry for having so long concurred with the Court; and desired now to be reconciled to his Grace, and the other Bishops (d). Moreover, in the Convention that met January the 22d, 1688-9, to consider of filling the Throne, he was one of those who voted, on the 6th of February, that King James II. had abdicated the Kingdom (e). Notwithstanding all this, his thorough compliance with the late Court's arbitrary designs, had rendered him so obnoxious to the Nation, that he was excepted by name out of the Pardon granted by King William and Queen Mary, May the 23d, 1690 (f), which so terrified him, that he absconded for a time, and was ready to go, or actually went, beyond Sea [C]: and offered to compound, by resigning his Bishoprick (g). However he found means afterwards to make his peace, and to preserve his Bishoprick. But, in order to secure to himself the possession of that dignity, he was forced to permit the Crown to dispose of, or at least to nominate to, his Prebends of Durham, as they should become vacant (h). By the death of his two elder brothers, he became in 1691, Baron Crew of Stene; and, about the 21st of December the same year, he married, but left no issue (i). During the rest of King William's reign, he remained quiet and unmolested, though not much considered. In the year 1710, he was one of the Lords that opposed the prosecution then carried on against Dr. Sacheverell, and declared him Not Guilty; and likewise protested against several steps taken in that affair (k). He applied himself chiefly, in the latter part of his life, to works of Munificence and Charity. Particularly, he was a very great benefactor to Lincoln-college, of which he

[B] And seemed to be proud of that honour.] Bishop Burnet tells us (3), 'that he was lifted up with it, and said, now his name would be recorded in history: And when some of his friends represented to him, the danger of acting in a Court so illegally constituted, he said, he could not live, if he should lose the King's gracious smiles: so low and so fawning (adds the Bishop) was he.'

[C] And was ready to go, or actually went, beyond Sea.] This particular is variously related by two of our Historians. One of them (4) writes thus; 'The Bishop of Durham had paid so much court to the King, and to the very Nuncio of the Pope, that he despaired of any favour at the Revolution; and he was once got beyond Sea in a fright: but being brought back by the importunity of a domestick ser-

'vant, he made a new interest in the new Court and Parliament, and bought off the complaints of Mr. Samuel Johnson, and others, who had suffered by him.' The other Historian's words are as follows (5), 'The poor Bishop of Durham, who had absconded for some time, and was waiting for a Ship to get beyond Sea, fearing public affronts, and had offered to compound by resigning his bishoprick, was now prevailed on to come, and by voting the new settlement to merit at least a pardon for all that he had done: which, all things considered, was thought very indecent in him, yet not unbecoming the rest of his life and character.' He did not attempt to go beyond sea till after he was excepted out of the Act of Indemnity; so that the last writer is mistaken in that particular.

 bove, p. 251.

had been Fellow, and Rector [D]; and laid out large sums in beautifying the Bishop's Palace at Durham (l); besides many other instances of generosity and munificence of a more private nature. At length, his Lordship departed this life on Monday September 18, 1721, aged eighty eight; and was buried in his Chapel at Stene, the 30th of the same month (m), with an inscription on his monument [E]. He held the See of Durham forty-seven

[D] *He was a very great Benefactor to Lincoln-College, of which he had been Fellow, and Rector.* He added Twenty pounds *per annum*, to the Headship, or Rectory; and Ten pounds *per annum* to each of the twelve Fellowships, for ever. He made up the Bible Clerk's place, and eight Scholarships belonging to that College, Ten pounds a year each, for ever, which before were very mean. He made an augmentation of Ten pounds *per annum* a-piece for ever, to the Curates of four Churches belonging to the said College, viz. All-Saints and St. Michael in Oxford, Twyford in Buckinghamshire, and Comb in Oxfordshire. All these were to take place from Michaelmas 1717. He likewise settled Twenty pounds a year a-piece on twelve Exhibitioners, which took place at Lady-day 1718. His Lordship intended also to have rebuilt that College, or at least the best part of it; but the Fellows having disobliged him, in refusing to chuse for their Rector, a Gentleman whom he recommended to them, upon the death of Dr. Fitzherbert Adams; his Lordship thought fit to alter his design.

[E] *With an inscription on his monument.* Which is as follows.

Near this Place lyeth the Body
 Of the Right Reverend and Right Honourable
 NATHANIEL LORD CREW
 Lord Bishop of DURHAM, and Baron of STENE,
 Fifth Son of John Lord CREW.

He was born Jan. 31, 1633.
 Was consecrated Bishop of OXFORD 1671.
 Translated to DURHAM in 1674.
 Was Clerk of the Closet and Privy Counsellor
 In the Reigns of King CHARLES II. and
 King JAMES II.
 And died Sept. 18, 1721.
 Aged 88. M.

* [There was but little in the character and conduct of this prelate which could entitle him to a place in the Biographia. He was distinguished, indeed, by passing through a variety of ecclesiastical preferments, by being the Rector of a College, and by sustaining, for an uncommon length of time, a very high rank in the Church; but he was not celebrated either for his learning or for other eminent qualities. We do not read of any thing that was published by him; and his benefactions to Lincoln College did not take place till he was between eighty and ninety years of age. As a Peer of the Realm, he makes no figure in the annals of his country, unless his having joined in some Tory protests is to be considered in that light (6). The chief historical event of his life reflects nothing but dishonour upon him; we mean his being one of King James the second's ecclesiastical Commissioners, together with his behaviour in that character, which was marked with servility. Indeed, this servile spirit had been displayed by him many years before, on his promotion to the Bishopric of Durham. After he had obtained the promise of that Bishopric, it was long before he could get into the possession of it, though he solicited the matter with great diligence. Still there was something that hindered his success, and which he could not find out till he applied to Lord Lumley. That Nobleman discovered that the King had promised a sum of money to Mrs. Eleanor Gwyn, which was to be paid out of the Bishopric, and that without an agreement with her nothing could be done. Upon this our Prelate applied to her, by his agent, and agreed to pay her five or six thousand pounds. One Arden was bound with the Bishop for the money, and upon this he was put into possession of the See. The money, in the proper course of time, was duly paid, and the Bishop appointed Arden to be his Steward (7). Dr. Walter Pope, in his Life of Dr.

Seth Ward, Bishop of Salisbury, relates the following circumstance concerning that Prelate. "I well remember the time, when he told me, he had the proffer of the Bishopric of Durham, after Bishop Cofin's death. Pray my Lord, said I, accept it: we shall have brave horses there, and the long journey betwixt Bishop's-Auclands and London will conduce much to the melioration of your health. He replied, I just now entered it in my blue book, that this day I refused it. I replied, and pray, my Lord, why did you so? *Because*, said he, *I did not like the conditions.* But what they were, it would have been unmannerly for me to inquire, and he did not think it convenient to tell me (8)." The conditions intended to be imposed on Dr. Ward will probably be thought to receive some illustration from the preceding anecdote concerning Bishop Crew.

So subservient was this Prelate to the designs of James the second, that he severely checked Dr. Patrick, who had preached strongly against popery, and refused to introduce that eminent Divine to the King, when his Majesty had sent for him (9). However, notwithstanding all the Bishop of Durham's compliances, he shrunk in the time of danger, and interposed his counsel for the retraction of the measures in which he had himself so zealously concurred. The following is the letter which he wrote to his Majesty on the occasion.

"To the King's most excellent;
 "The most humble and faithful advice of your Majesty's ever dutiful subject and servant the Bishop of Durham.
 "That your Majesty would be pleased to withdraw your protection of those Romish Chapels, which are daily made the occasion of so much disturbance and mischief here, and, if continued any longer, I fear, will unavoidably endanger the peace and safety of this your great city, and consequently of your whole kingdom.
 "That the Archbishopric of York, which your Majesty hath been pleased to offer me, may be filled with some other more deserving person: and that your Majesty would be pleased to make another Dean of Christ Church in Oxford, instead of Mr. Massey, who is utterly incapable thereof by law: that the Fellows of Sidney-College in Cambridge, for whom I have so often moved your Majesty, may have leave to elect a new Master, in the place of Mr. Bassett (he being also unqualified on the same account,) and to proceed on all other affairs relating to that society, according to their original statutes and constitution.
 "That your Majesty would be pleased to call a free Parliament so soon as may be, this being the only probable means for preserving your sacred person, for preventing the effusion of Christian blood, and for establishing your Throne and Government, both in Church and State, upon sure and lasting foundations."

N. DURHAM (10).

With regard to the Bishop's attempt to make his escape from this country, the tradition about Durham, some years ago, was, that he actually hired a Sunderland Collier, and went over to Holland; but that the Master of the vessel remonstrated with him, and prevailed upon him to return back, instead of going beyond sea (11). It was Dr. Burnet to whom he offered to resign his Bishopric, on the consideration of his receiving a thousand pounds a year during his life; and it was the intercession of Dr. Tillotson to which he was principally indebted for being admitted to favour by the Government (12).

Vanity was among the other qualities which detracted from the character of Bishop Crew. "The

seven years, as he had done that of Oxford three, continuing a Bishop fifty years, three months, and two days; which was a longer time than any Englishman ever enjoyed that honour,

"organ and ornaments about it at Durham Minster," says a valuable correspondent, "will be a lasting monument of the vain munificence of this man. His Baron's Coronet and Episcopal Mitre stuck up together, may afford some matter of exultation to those who consider the ornamenting of Churches as proceeding sometimes from motives foreign to Christian piety." A most striking instance of his vanity was his giving Dr. Mangey a Prebend of Durham, for a flattering Dedication prefixed to a Sermon, which Sermon he never read. He was fully satisfied with the Dedication (13).

(13) Granger's Biographical History, vol. iv. p. 285.

The conduct of our Prelate to Mr. Henry Wharton involves him in a more serious charge. When he was one of the Commissioners for exercising the Ecclesiastical Jurisdiction of the Diocese of London, he was present at the examination of that learned young man for Orders, and so much admired the readiness of his answers, that he promised to make him his Chaplain, which promise he violated. On this account, Mr. Wharton, in his manuscript Diary of his Life, speaks of the Bishop with great contempt, as a man of no veracity. His language is, *Levis iste ac versipellis episcopus. — Summam levissimi viri perfidum detestatus* (14).

(14) Birch, ubi supra.

Lord Crew was very zealous in maintaining the Palatine rights of his Diocese, and made strict enquiry into the ancient Records, which he caused to be thoroughly searched, and stated by his Secretary. In one instance he endeavoured to carry his authority to a most unjustifiable excess. During the latter end of his time, on the death of Serjeant Stroud, he made an entry upon an estate at Hullam and Sheraton, claiming the same as an escheat for want of an heir; and getting the tenants to attorn, he kept possession till the Heir at Law, Mr. Evans, brought his ejectment. All this was illegally done by the Bishop, without an office found; in consequence of which he was told by Mr. William Lee, the Heir at Law's Solicitor, that his predecessor, Anthony Beke, had been impeached in Parliament for the like offence. A letter of Mr. Lee's to our Prelate on the occasion, is so admirably written, and contains such a fund of constitutional and legal reasoning, that it deserves to be inserted, in honour to the memory of the writer. The letter was as follows:

"MY LORD,

"The rights and privileges of your Lordship's county palatine having been often examined in Parliament, upon several petitions and informations, which have been exhibited both by and against your Lordship's predecessors, Mr. Evans is advised by his Counsel, to exhibit his information in Parliament against your Lordship; for that your Lordship and agents have entered upon and detain his inheritance, (under pretence for being an escheat) without having either your Lordship's title first found upon record, or suing out of legal process, to warrant the entry of your Lordship's officers.

"This proceeding, my Lord, he is advised, is a manifest violation of the rights and privileges of the gentlemen and freeholders of the county of Durham, established to them by the public submissions of your Lordship's predecessors; confirmed and ratified by the Crown.

"That it is directly contrary to the known usage and constitution of the county palatine; that it tends to vest a higher prerogative in your Lordship, than is claimed and enjoyed by the Crown itself, who cannot, in this case, enter upon the estate of any subject, without an inquisition first taken to find the title of the Crown:

"That it tends to subvert and evade the several laws made for restraining of the prerogative, and for securing the rights and properties of the subject; particularly by the statute of Magna Charta, chap. 29, which provides, that no freemen be disseized of his freehold, without lawful judgment of his Peers. Stat. 28. Edw. III. chap. 3. which further provides, that

no man shall be disinherited without due process of law; and hath been since confirmed by the petition of right, 3 Char. I. chap. 1. and the Stat. 16 Char. I. chap. 14. that it is also contrary to the statute of 5 Rich. II. chap. 7. which provides, that none shall make entry into any lands, but where the entry is given by law: As also the statute 8 Hen. VI. chap. 9. made against forcible detainer of possession; and several other statutes and public laws, too tedious to be recited:

"That if such proceeding as this should be brought into practice, it would absolutely destroy the ancient privilege, which all the freeholders in this county have hitherto enjoyed, in having an opportunity given them to defend their rights both upon taking the inquisition, or finding the title of the Bishop, and traversing the inquisition after it is taken.

"And if this proceeding against Mr. Evans can be justified, it is conceived, the Bishop of Durham may, under colour of the same right, enter and seize upon all men's inheritances within the county, and put all to make out their title, before the Bishop makes out any.

"Your Lordship has certainly been very ill-advised in this affair, and if the opinion of any eminent Counsel has been taken, I doubt they have either been misinformed, or not very well instructed in the constitution, rights and usages of the county palatine.

"I dare, my Lord, undertake to produce five thousand precedents of inquisitions taken, for finding the Bishop's title upon record, before an entry was ever made; and it does appear, that the Bishop's officers used always to enter, in cases of this nature, by virtue of a special writ for that purpose, setting forth the title as it was found; and (indeed my Lord) I have reason to believe that such a seizure as this was never attempted by any of your Lordship's predecessors, since the time of Anthony Beke.

"That Bishop (whose character your Lordship cannot be unacquainted with) did take upon him to seize on several estates within the county, without suing out any writ or commission for having his title first found, and without awarding of any process, to warrant that entry: But how sensible the gentlemen of the county then were of the tendency it had to bring them under slavery and arbitrary government, what disturbance it bred within the county, and what were the consequences that attended that case, will best appear from the records of those times.

"I shall only beg leave to put your Lordship in mind, that one of the articles then agreed to between that Bishop and the gentlemen and freeholders of the county, upon the mediation of King Edward I. was, That neither the Bishop, nor any of his successors, should ever afterwards seize any man's estate without first suing a writ or commission out of the Bishop's Court of Chancery.

"I doubt (my Lord) your Lordship's agents do not distinguish very well betwixt the case of the Bishop of Durham, and of an ordinary Lord of any manor, where no person is in possession of the estate, against whom he may bring his escheat, for otherwise, the Lord of the manor would be without remedy.

"But the Bishop of Durham will appear, I believe, to stand upon a different foot; he has rather remedy for escheat, and ought to be considered as a public person, (*quasi rex*) and under a capacity much different from a private Lord of a petty manor; such a right in a private Lord, and in a particular case only, cannot be hurtful to the public; but such a power in the Crown, or in the Bishop of Durham, who has *jura regalia*, within his county palatine, may admit of a different consideration.

"It must be agreed, my Lord, that the Bishops of Durham have been always esteemed to be persons invested with royal dignity, or as it is expressed in the ancient record, *jurisdictionem temporalem in omnes subditos suos libertatis Dunelmensis et auctoritatem regium tanquam personæ privilegiis regalibus, insignite per ministros, exercuerunt*, or as another record expresses it,

tanquam

honour, excepting Thomas Bouchier, Archbishop of Canterbury, who held the Sees of Worcester, Ely, and Canterbury, fifty-one years and twenty-one days. His Lordship dying without issue, the title of Baron Crew of Stene became extinct with him.

tanquam reges et principes mitram gesserit loco coronæ in signum suæ regalitatis; yet it must be allowed at the same time, that all the liberties of the Bishop have been adjudged to be derived, and still dependent upon the Crown, to be circumscribed by the same laws, to be all forfeited upon the misuser or abuse of them, during the Bishop's time who commits the abuse; and that they have been accordingly seized, both upon judgment in Parliament, and other Courts; and that the reason given in some of these judgments, why the Bishop's liberty ought to be forfeit, for any misuser or abuse of it, is *quia justum est quod in eo quo peccat, in eo puniatur*; or as we find it expressed in another of them, *in eo quo insignius delinquit, sit de jure puniendus*.

"In short (my Lord) Mr. Evans is advised, this proceeding is a very great misuser of the liberty, and he having received your Lordship's answer, that he is not to expect any favour, or any restitution of his estate, until he does by law recover it; your Lordship having likewise thought fit to deprive him of all the best Counsel of the Circuit, he is partly necessitated, and does resolve to exhibit informations, both in Parliament and the Court of Queen's Bench, in order to have the illegality of these proceedings examined into.

"I was indeed desired by him to exhibit his information in Parliament, the first day that the Parliament sat, but I was unwilling, in a case of this nature, to take any advantage of your Lordship's absence, or to proceed any farther upon it, until I had given your Lordship fair notice of the measures intended to be taken; so that your Lordship might have an opportunity of advising further upon the case, and of being satisfied, in these matters, from your Lordship's own Counsel.

"Mr. Evans, my Lord, knows nothing as yet, of my writing any thing to your Lordship; but I must do justice to my client, and intend to let him know by next post, what I have done, for he is very pressing to have his prosecution carried on with all vigour and expedition; and it cannot, I think, reasonably be expected, that an estate of three or four hundred pounds *per annum* should be lost without some struggle; or that the title of Mr. Evans, which has been long since proved, allowed and decreed by the Court of Chancery, is to be easily overthrown by an imaginary title, that has not yet, in fifty years time, been so much as found by a common inquest.

"It is true, my Lord, Mr. Evans, at present, is somewhat a stranger to most of the Gentlemen of the country, and his interest in Parliament is not, perhaps, very considerable; however, he does not doubt, but that justice will prevail in that honourable House, and that some will be found to stand up in the defence of the liberties of the country.

"I am afraid, my Lord, I have trespassed too much upon your Lordship, but your Lordship may be assured, if it were not from a respect I have for your Lordship's honour, as well as interest, I should hardly have taken so much pains to convince your Lordship, and to deprive myself, at the same time, of those advantages, which I had reason to expect from such a prosecution as this might be.

"I shall submit the whole to your Lordship's censure and consideration, hoping your Lordship will believe me to be, with the utmost respect, my Lord, your Lordship's most obedient servant,

"WILLIAM LEE."

It is to the credit of Lord Crew that he gave a due attention to this remonstrance. He surrendered the possession of the estate, and paid costs; beside which, he was so well satisfied with the Solicitor's plain dealing, or rather with his knowledge of the Palatine rights, that he granted to him and his son a Patent for life of the office of Register of the Court of Chancery at Durham (15).

With all the faults of this Bishop, he was possessed of some amiable qualities. He was hospitable, generous, and charitable; though it is said that his charity was sometimes observed to be exerted with too much ostentation (16). Besides the benefactions mentioned in note [D], he made large bequests, by his last will, to the purposes of Religion, education, and charity, an account of which may be seen in Mr. Hutchinson's History and Antiquities of the county palatine of Durham. "Many men, says "that Gentleman, have been canonized for much "inferior works of beneficence than those of this "Prelate. His mistaken principles in the affairs of "Government, though they stain his memory, under "the pens of political writers, are all obliterated "from the benevolent mind by his charity and extensive acts of munificence (17)." This encomium would have been more just if the Bishop's generosity had not been displayed so late in life; and, indeed, if it had not been for the most part posthumous. His benefactions, during the space of forty-seven years, were not to be compared with those which in eleven years had flowed from his predecessor in the See of Durham, Dr. Cosin.

In the former edition of the Biographia, Bishop Crew is represented as having died on the 18th of September, 1722. Dr. Richardson and Mr. Hutchinson have both fallen into the same error with regard to the year of our Prelate's decease (18). It is the more remarkable that these two Gentlemen should have been guilty of such a mistake; as they immediately proceed to relate that it was in 1721 that Dr. William Talbot was translated from the Bishopric of Salisbury to that of Durham.] K.

* * [CRICHTON (JAMES), was a Scots Gentleman, who lived in the sixteenth century, and of whom very extraordinary things are related, with regard to his endowments, both of body and mind. These were esteemed so great, that he obtained the appellation of "The Admirable Crichton," and by that title he has continued to be distinguished, down to the present day. The accounts given of his abilities and attainments are indeed so wonderful, that they seem scarcely to be credible; and many persons have been disposed to consider them as almost entirely fabulous, though they have been delivered with the utmost confidence, and without any degree of hesitation, by various writers. It is, therefore, with diffidence, and even with anxiety, that I have entered upon this article; being desirous, on the one hand, not to detract from Crichton's real merit, and, on the other, to form a just estimate of the truth of the facts which are recorded concerning him. Upon mature deliberation, I have determined to relate, first, from his several Biographers, the representations they have made of his talents and exploits, and then to subjoin such observations, as may enable the reader to judge how far their stories are to be credited. In drawing up this life I am not only assisted by the printed accounts of Crichton, but by a manuscript memoir, composed by the Earl of Buchan for the Society of Antiquaries at Edinburgh; of which memoir his Lordship has obligingly permitted me to be favoured with a copy.

(e) Mackenzie,
ubi supra, p. 137,
138.

The time of Crichton's birth is said, by the generality of writers, to have been in 1551 (a); but, according to Lord Buchan, it appears, from several circumstances, that he was born in the month of August, 1560. What the circumstances were which determined his Lordship to fix upon the latter date, are not related; though it cannot be doubted but that it was in consequence of a more particular and accurate enquiry, that he was induced to differ in this respect from preceding authors. There is a difference, likewise, between the Earl of Buchan and other Biographers, with regard to the family of Crichton, and the rank and situation of his father. The common accounts assert that James Crichton's father was Robert Crichton of Clunie, in the county of Perth; and that this Robert Crichton commanded Queen Mary's army at the battle of Langside, in the year 1568 (b). But from the Earl of Buchan we learn, that this Gentleman was of Elliock in the same county [A], and that he was Lord Advocate of Scotland in Queen Mary's Reign, from 1561 to 1573; part of which time he held that office in conjunction with Spens of Condie. The mother of James Crichton was Elizabeth Stuart, the only daughter of Sir James Stuart of Beath, who was a descendant of Robert Duke of Albany, the third son of King Robert the second, by Elizabeth Muir or More, as she is commonly called (c). It is hence evident that when the admirable Crichton boasted (as he did abroad) that he was sprung from Scottish Kings, he said nothing but what was agreeable to truth. Nevertheless Thomas Dempster, who sufficiently amplifies his praises in other respects, passes a severe censure upon him on this account; which is the more remarkable, as Dempster lived so near the time, and was well acquainted with the genealogies of the great families of Scotland (d) [B].

James Crichton is said to have received his grammatical education at Perth, and to have studied philosophy in the University of St. Andrew. His Tutor in that University was Mr. John Rutherford, a Professor at that time famous for his learning, and who distinguished himself by writing four books on Aristotle's Logic, and a commentary on his Poetics. But nothing, according to Mackenzie, can give us a higher idea of Rutherford's worth and merit, than his being Master of that wonder and prodigy of his age, the great and admirable Crichton (e). However, it is not to this Professor alone that the honour is ascribed of having formed so extraordinary a character. There are others who may

[A] *This Gentleman was of Elliock in the same county.* Mr. Pennant's account says, that Robert Crichton was of Clunie and Elliock. But it is erroneous, according to Lord Buchan, to style him of Clunie. It may here be observed, that the life of the admirable Crichton, given in Mr. Pennant's tour, was not drawn up by that Gentleman, but is a narrative which was printed some years ago at Aberdeen. "I have had opportunity, says Mr. Pennant, of comparing it with most of the authorities quoted in support of the history of so extraordinary a person, and find them used with judgment and fidelity. Excepting a few notes, I present it to the readers in the state I found it (1)." The real character and authority of this compilation will hereafter appear.

(1) Pennant's
First Tour in
Scotland, p. 313.

[B] *Was well acquainted with the genealogies of the great families of Scotland.* Thomas Dempster, after speaking of the endowments of Crichton's mind, has these words: *Hanc sane ingenii ostentationem labentius ferrem et fidentius predicarem, quam possem pati jactabunde ad Scotiæ Reges genus ipsius referendum; nam inane est ea se gentis aut sanguinis gloria perperam arrogata venditare, cum tanta claritudo in tenui fortuna ridicula videatur; quare ut verum sit, familiam Clunium nobilem esse, ita illud mendacissimum, Reges Scotiæ Jacobi Crichtoni majores ullos extitisse (2).* In answer to this censure, Lord Buchan has traced the descent of Crichton from Robert the first and Murdoch the second Duke of Albany, through Sir James Stuart, the fourth lawful son of the last named Duke, to Elizabeth Stuart, who married Robert Crichton, as above-mentioned. The only difficulty that occurs, is with regard to the legitimacy of the descendants of Sir James Stuart. This Gentleman retired to Ireland, where, by a Lady of the family of the Mac Donalds, he had seven sons, three of whom were legitimated by King James the third, and were the ancestors of several considerable families, particularly those of Evandale and Ochiltree (3). Though, according to Lord Buchan, Sir James Stuart was really married to the Irish Lady, the marriage, nevertheless, having been contracted out of the kingdom, was, by the law of Scotland, at that time considered as illegitimate. "It is somewhat singular, says his Lordship, that although the marriage of Sir James Stuart, fourth son of Murdoch Duke of Albany, with

(2) Dempster's
Historia Ecclesiastica, p. 189.

(3) Douglas's
Peerage of Scotland,
p. 17.

his Irish Lady, seems to have been allowed, and that, by the law of Scotland, the ante-nuptial children were legitimated to all intents and purposes by the subsequent marriage; yet, weak as was the male stock of the House of Stuart at that time, the issue of this marriage was set aside from the Succession to the Crown, and Letters of Legitimation were passed in favour of Andrew Lord Evandale, Arthur and Walter Stuart his brothers, April 17th, Anno 1479. Thus injustice has been sanctified by the prejudices of a barbarous age, and a long lapse of time has now almost effaced the remembrance of it, even from the tables of our Genealogists (4)." Perhaps some of our readers may think that a cloud still rests upon the subject of Crichton's descent from Scottish kings; not with regard to the reality of it, but its strict legitimacy, according to the legal ideas which then prevailed in Scotland. This, however, is not a matter of great importance, since his celebrity has arisen from very different causes.

On the father's side, the family of the Admirable Crichton was undoubtedly noble; and this is acknowledged by Dempster. Three branches of that family have been raised to the Peerage of Scotland. These were James Crichton Earl of Caithness, in whom the title began and ended; the Crichtons, Lord Crichtons, and afterwards Viscounts Fren draught; and the Crichtons, Lord Crichtons of Sanquhar, afterwards Earls of Dumfries; which Earldom, by female descent, now belongs to the Earl of Stair. The title of Viscount Fren draught was lost by the attainder of Lewis the fifth Viscount. James Crichton of Auchingowl, Esq; is the present representative of the family (5). The great offices held by some of the Crichtons, and the high alliances formed by them, might be enlarged upon, were it necessary. William, the first Lord Crichton, was Chancellor of Scotland. James, the second Lord, was Great Chamberlain of that kingdom. His Lady was the daughter and co-heiress of James Dunbar, Earl of Murray, and was descended from the illustrious Thomas Randolph, the first Earl of that county. William, the third Lord Crichton, married Lady Margaret Stuart, daughter of King James the second (6).

Lord Buchan's
Manuscript.

put in their claim to a share in the same glory; for Aldus Manutius, who calls Crichton first Cousin to the King, says that he was educated, along with his Majesty, under Buchanan, Hepburn, and Robertson, as well as Rutherford (f). Indeed, whatever might be the natural force of his genius, many Masters must have been necessary, in order to his acquiring such a variety of attainments as he is represented to have possessed. For it is related that he had scarcely arrived to the twentieth year of his age, when he had run through the whole circle of the Sciences, and could speak and write to perfection in ten different languages. Nor was this all; for he had likewise improved himself to the highest degree in riding, dancing, and singing, and in playing upon all sorts of instruments (g).

(f) Pennant, *ubi supra*, p. 314. note. Ald. Manut. Paradox. Cic. Dedic.

(g) Mackenzie, *ubi supra*, p. 198. Pennant, *ubi supra*.

Crichton, being thus accomplished, went abroad upon his travels, and is said to have gone to Paris, of his transactions at which place the following account is given. He caused six placards to be fixed on all the gates of the Schools, Halls, and Colleges belonging to the University, and on all the pillars and posts before the houses of the most renowned men for literature in the city, inviting all those who were well versed in any art or science, to dispute with him in the College of Navarre, that day six weeks, by nine of the clock in the morning, where he would attend them, and be ready to answer to whatever should be proposed to him in any Art or Science, and in any of these twelve languages, Hebrew, Syriac, Arabic, Greek, Latin, Spanish, French, Italian, English, Dutch, Flemish, and Sclavonian; and this either in verse or prose, at the discretion of the disputant. During this whole time, instead of closely applying to his studies, he regarded nothing but hunting, hawking, tilting, vaulting, riding of a well-managed horse, tossing the pike, handling the musket, and other military feats; or else he employed himself in domestic games, such as balls, concerts of music vocal and instrumental; cards, dice, tennis, and the like diversions of youth. This conduct so provoked the Students of the University, that, beneath the placard which was fixed on the Navarre gate, they caused the following words to be written: "If you would meet with this Monster of Perfection, to make search for him either in the tavern or bawdy-house, is the readiest way to find him." Nevertheless, when the day appointed arrived, Crichton appeared in the College of Navarre, and acquitted himself beyond expression in the disputation, which lasted from nine o'clock in the morning till six at night. At length, the President, after extolling him highly, for the many rare and excellent endowments which God and Nature had bestowed upon him, rose from his chair, and, accompanied by four of the most eminent Professors of the University, gave him a diamond ring, and a purse full of gold, as a testimony of their love and favour. The whole ended with the repeated acclamations and huzzas of the spectators; and henceforward our young disputant was called "The Admirable Crichton." It is added, that he was so little fatigued with the dispute, that he went on the very next day to the "Louvre," where he had a match of tilting, (an exercise then in much request,) and in the presence of some Princes of the Court of France, and a great many Ladies, carried away the ring fifteen times successively, and broke as many lances on the Saracen (h) [C] (*).

(b) Mackenzie, *ubi supra*, p. 199, 200. Pennant, *ubi supra*, p. 315, 316. Sir Thomas Urquhart's Tracts, p. 65—70. (*) What is meant by the Saracen no one has condescended to explain.

The

[C] And broke as many lances on the Saracen.] The account given above, and which is taken from Mackenzie and Pennant, rests entirely on the authority of Sir Thomas Urquhart, the language of whose narration has directly not been adopted, since it would only serve to cast an air of ridicule on the whole story. Mackenzie, however, and the writer in Pennant, have endeavoured still farther to confirm the truth of the extraordinary exploits performed by Crichton at Paris, by the testimony of an author whom they consider as an eye-witness. The passage which is produced for this purpose, is as follows: *In Navarrae Collegium venit adolescens quidam natus Annos XX, qui bonas Artes apprime callebat, ut peritissimi quique Academiae magistri testabuntur. Præclare fidibus canebat: Numeris, voce, modis, symphonia cunctos vincebat, pingebat, et imaginibus, colores inducebat optime omnium. In militia experimentissimus est: Gladium ambabus manibus distringebat tam bene et fortiter ut cum eo certare nullus auderet: statim atque videbit hostem suum, saltu se in eum projiciebat, remotus spatia Pedum XX aut XXIV. Erat magister in Artibus, in medicina, in utroque jure, in theologia. Nobiscum in Navarrae schola disputando congressus est, tametsi magistrorum quinquaginta perfectissimorum numerum excederemus. Mitto alios ter mille, et eo amplius, qui concertationi interfuerunt. Tam argute et cumulate respondit questionibus quæ propositæ sunt omnibus, ut nisi præsentium, certe absentium fidem superet. Latine, Græce, Hebraice, Arabice, et linguis aliis pluribus loquitur, ut qui politissime; equitabat quoque ut qui optime. Quin etiam si quis homo annos centum viveret, et sine cibo et potu, dies noctesque infomnes traduceret, quas ille animo complexus*

est scientias afficeretur nunquam, et revera metum ingentem nobis incussit, nam plura novit quam natura humana ferre possit. Doctores ecclesiæ quatuor redarguit; sapientia comparandus nemini videbatur; pro antichristo habitus est (7). For this passage Mackenzie refers to Steph. Pasch. Disquis. Lib. 5. Cap. 23. We shall insert the translation of it given in Pennant. "There came to the College of Navarre, a young man of twenty years of age, who was perfectly well seen in all the Sciences, as the most learned Masters of the University acknowledged. In vocal and instrumental music none could excel him; in painting and drawing in colours none could equal him. In all military feats he was most expert, and could play with the sword so dexterously with both his hands, that no man could fight him. When he saw his enemy or antagonist, he would throw himself upon him at one jump of twenty or twenty-four feet distance. He was a Master of Arts, and disputed with us in the Schools of the College in medicine, the civil and canon Law, and Theology: and although we were above fifty in number, besides above three thousand that were present, so pointedly and learnedly he answered to all the questions which were proposed to him, that none but they who were present can believe it. He spake Latin, Greek, Hebrew, and other languages most politely. He was likewise a most excellent horseman; and truly if a man should live a hundred years without eating, drinking, or sleeping, he could not attain to this man's knowledge, which struck us with a panic fear; for he knew more than human nature

(7) Mackenzie's Scottish Writers, vol. iii. p. 199.

"can

The next account we have of Crichton is, that he went to Rome, where he affixed a placard upon all the eminent places of the city, in the following terms: *Nos Jacobus Crichtonus Scotus, cuicumque Rei propositæ ex improvise respondebimus.* In a city which abounded in wit, this bold challenge, to answer to any question that could be proposed to him without his being previously advertised of it, could not escape the ridicule of a pasquinade. It is said, however, that being no wise discouraged, he appeared at the time and place appointed; and that, in the presence of the Pope, many Cardinals, Bishops, Doctors of Divinity, and Professors in all the Sciences, he displayed such wonderful proofs of his universal knowledge, that he excited no less surprize than he had done at Paris (i). Bocalini, who was then at Rome, gives something of a different relation of the matter. According to this author, the pasquinade against Crichton, which was to the following effect, "*And he that will see it let him go to the sign of the Falcon and it shall be shewn,*" made such an impression upon him, that he left a place where he had been so grossly affronted as to be put upon a level with jugglers and mountebanks (k).

(i) Mackenzie, *ubi supra.*
Pennant, *ubi supra*, p. 317, 318.

(k) Pennant, p. 317, note.

From Rome he went to Venice, at his approach to which city he appears to have been in considerable distress, of mind at least, if not with regard to external circumstances. This is evident from the following lines of his poem, *In suum ad urbem Venetam appulsum.*

Sæpè meos animo casus meditabar iniquos,
Sæpè humectabam guttis stillantibus ora.

(l) *Delitæ Pæ-
tarum Sotorum*,
p. 268—272.

The chief design of Crichton, in his poem, was to obtain a favourable reception at Venice, and particularly from Aldus Manutius, whose praises he celebrates in very high strains (l). When he presented his verses to Manutius, that Critic was struck with a very agreeable surprize, and judged, from the performance, that the author of it must be a person of an extraordinary genius. Upon discoursing with the stranger, he was filled with admiration; and finding him to be skilled in every subject, he introduced him to the acquaintance of the men of principal learning and note in Venice. Here he contracted an intimate friendship not only with Aldus Manutius, but with Laurentius Massa, Speron Speronius, Johannes Donatus, and various other learned persons, to whom he presented several poems in commendation of the City and University. Three of Crichton's Odes, one addressed to Aldus Manutius, another to Laurentius Massa, and a third to Johannes Donatus, are still preserved. At length, he was introduced to the Doge and Senate, in whose presence he made a speech, which was accompanied with such beauty of eloquence, and such grace of person and manner, that he received the thanks of that illustrious body, and nothing was talked of through the whole city but this *rara in Terris Avis*, this Prodigy of Nature (m). He held, likewise, disputations, on the subjects of theology, philosophy, and mathematics, before the most eminent Professors, and large multitudes of people. His reputation was so great, that the desire of seeing and hearing him brought together a vast concourse of persons, from different quarters, to Venice (n). It may be collected from Manutius, that the time in which Crichton exhibited these demonstrations of his abilities, was in the year 1580 [D].

Lord Buchan's
Memoir.

During his residence at Venice, he fell into a bad state of health, which continued for the space of four months. However, before he was perfectly recovered, he went, by the advice of his friends, to Padua, the University of which city was at that time in great reputation. The next day after his arrival, there was a meeting of all the learned men of the place, at the house of Jacobus Aloysius Cornelius; when Crichton opened the assembly with an extemporary Poem in praise of the city, the University, and the company who had honoured him with their presence. After this, he disputed for six hours with the most celebrated Professors, on various subjects of learning; and he exposed, in particular, the errors of Aristotle and his commentators, with so much solidity and acuteness, and, at the same time, with so much modesty, that he excited universal admiration. In conclusion, he delivered, extempore, an Oration in Praise of Ignorance, which was conducted with such ingenuity and elegance, that his hearers were astonished. This exhibition of Crichton's talents was on the fourteenth of March, 1581. Soon after, he appointed a day for another disputation, to be held at the Palace of the Bishop of Padua; not for the purpose of affording higher proofs of his abilities, for that could not possibly be done, but in compliance with the earnest solicitations of some persons, who were not present at the former assembly. However, several circumstances occurred, which prevented this meeting from taking place (o). Such is the account of Manutius; but Imperialis relates, that he was informed by his father, who was present upon the occasion, that Crichton was opposed by Archangelus Mercenarius, a famous philosopher, and that he acquitted himself so well

"can well bear. He overcame four of the Doctors of the Church; for in learning none could contest with him, and he was thought to be Antichrist (8)." It will be seen in the sequel, how far this story relates to Crichton.

[D] Was in the year 1580.] As Aldus Manutius writes, in 1581, that he received the Ode addressed to himself in the former year, it is hence apparent that Crichton came to Venice in that year (9).

(9) Lord Bu-
chan's Memoir.

(p) *Joan. Imperial. Muse. Hist. ubi supra.*

as to obtain the approbation of a very honourable company, and even of his antagonist himself (p) [E].

Amidst the discourses which were occasioned by our young Scotsman's exploits, and the high applauses that were bestowed on his genius and attainments, some persons there were who endeavoured to detract from his merit. For ever, therefore, to confound these invidious impugnors of his talents, he caused a paper to be fixed on the gates of St. John and St. Paul's Church, wherein he offered to prove before the University, that the errors of Aristotle, and of all his followers, were almost innumerable, and that the latter had failed, both in explaining their master's meaning, and in treating on theological subjects. He promised, likewise, to refute the dreams of certain Mathematical Professors; to dispute in all the Sciences; and to answer to whatever should be proposed to him, or objected against him. All this he engaged to do, either in the common logical way, or by numbers and mathematical figures, or in a hundred sorts of verses, at the pleasure of his opponents (q) [F]. According to Manutius, Crichton sustained this contest without fatigue, for three days; during which time he supported his credit, and maintained his propositions, with such spirit and energy, that, from an unusual concourse of people, he obtained acclamations and praises, than which none more magnificent were ever heard by men (r).

(q) *Ald. Manut. Mackenzie and Pennant, ubi supra.*

(r) *Ald. Manut. ubi supra.*

The next account we have of Crichton, and which appears to have been transmitted, through Sir Thomas Urquhart, to later Biographers, is of an extraordinary instance of bodily courage and skill. It is said, that at Mantua there was at this time a Gladiator, who had foiled, in his travels, the most famous fencers in Europe, and had lately killed three persons who had entered the lists with him. The Duke of Mantua was much grieved at having granted this man his protection, as he found it to be attended with such fatal consequences. Crichton, being informed of his Highness's concern, offered his service, not only to drive the murderer from Mantua, but from Italy, and to fight him for fifteen hundred pistoles. Though the Duke was unwilling to expose such an accomplished Gentleman to so great a hazard, yet, relying upon the report he had heard of his warlike achievements, he agreed to the proposal; and the time and place being appointed, the whole Court attended to behold the performance. At the beginning of the combat, Crichton stood only upon his defence; while the *Italian* made his attack with such eagerness and fury, that, having overacted himself, he began to grow weary. Our young Scotsman now seized the opportunity of attacking his antagonist in return; which he did with so much dexterity and vigour, that he ran him through the body in three different places, of which wounds he immediately died. The acclamations of the spectators were loud and extraordinary upon this occasion; and it was acknowledged by all of them, that they had never seen Art grace Nature, or Nature second the precepts of Art, in so lively a manner as they had beheld these two things accomplished on that day. To crown the glory of the action, Crichton bestowed the prize of his victory upon the widows of the three persons who had lost their lives in fighting with the Gladiator (s).

(s) *Pennant, ubi supra, p. 320, 321. Mackenzie, ubi supra, p. Sir Thomas Urquhart's Tracts, p. 59—64.*

It is asserted that, in consequence of this and his other wonderful performances, the Duke of Mantua made choice of him for Preceptor to his son Vincentio di Gonzaga, who is represented as being of a riotous temper and a dissolute life. The appointment was highly pleasing to the Court. Crichton, to testify his gratitude to his friends and benefactors, and to contribute to their diversion, framed, we are told, a Comedy, wherein he exposed and ridiculed all the weaknesses and failures of the several employments in which men are engaged. This composition was regarded as one of the most ingenious satires that ever was made upon mankind. But the most astonishing part of the story is, that Crichton sustained fifteen characters in the representation of his own play. Among the rest, he acted the divine, the philosopher, the lawyer, the mathematician, the physician, and the soldier, with such inimitable grace, that every time he appeared upon the Theatre, he seemed to be a different person (t) [G].

EXORDIUM SUMET.

[G] *He seemed to be a different person.* As a specimen of Sir Thomas Urquhart's manner of writing, we shall insert part of his account of this transaction.

‘ It happened on a Shrove-Tuesday at night, that this ever-renowned Crichton, (who, in the afternoon of that day, at the desire of my Lord Duke (the whole Court striving which should exceed the

other

From being the principal Actor in a Comedy, Crichton soon became the subject of a dreadful Tragedy. One night, during the time of Carnival, as he was walking along the streets

other in foolery, and devising of the best sports to excite laughter; neither my Lord, Dukes, nor Prince, being exempted from acting their parts, as well as they could) upon a Theatre set up for the purpose, begun to prank it (*à la Venetiana*) with such a flourish of *mimick*, and *ethopoetick* gestures, that all the Courtiers of both sexes, even those that a little before that, were fondest of their own conceits, at the sight of his so inimitable a garb, from ravishing actors, that they were before, turned then ravished spectators. O! with how great liveliness did he represent the conditions of all manner of men! how naturally did he set before the eyes of the beholders the rogueries of all professions, from the overweening monarch to the peevish swaine, through all intermediate degrees of the superficial courtier or proud warrior, dissembled churchman, doting old man, cozening lawyer, lying traveler, covetous merchant, rude seaman, pedantick scholar, the amorous shepherd, envious artisan, vainglorious master, and tricky servant; he did with such variety display the several humours of all these sorts of people, and with a so-bewitching energy, that he seemed to be the original, they the counterfeit; and they the resemblance whereof he was the prototype: he had all the jeers, squibs, flouts, bulls, quips, taunts, whims, jests, clinches, gybes, mokes, jerks, with all the several kinds of equivocations, and other sophistical captions, that could properly be adapted to the person by whose representation he intended to inveigle the company into a fit of mirth, and would keep in that miscellany discourse of his (which was all for the spleen, and nothing for the gall) such a climacterical and mercurially digested method, that when the fancy of the hearers was tickled with any conceit, and that the jovial blood was moved, he held it going, with another new device upon the back of the first, and another, yet another, and another againe, succeeding one another, for the promoval of what is a stirring into a higher agitation; till in the closure of the luxuriant period, the decumanal wave of the oddest whimsy of all, enforced the charmed spirits of the auditory, (for affording room to its apprehension) suddenly to burst forth into a laughter; which commonly lasted just so long as he had leisure to withdraw behind the screen, shift off with the help of a page, the suite he had on, apparel himself with another, and return to the stage to act afresh; for by that time their transported, disparpled, and sublimated fancies, by the wonderfully operating engines of his solacious inventions, had from the hight to which the inward scrues, wheelles, and pullies of his wit had elevated them, descended by degrees into their wonted stations, he was ready for the personating of another carriage; whereof, to the number of fourteen several kinds, (during the five hours space, that at the Dukes desire, the solicitation of the Court, and his own recreation, he was pleased to histrionize it) he shewed himself so natural a representative, that any would have thought he had been so many several actors, differing in all things else, save only the stature of the body; with this advantage above the most of other actors, whose tongue, with its oral implements, is the onely instrument of their minds disclosing, that, besides his mouth with its appurtenances, he lodged almost a several oratour in every member of his body; his head, his eyes, his shoulders, armes, hands, fingers, thighs, legs, feet, and breast, being able to decipher any passion, whose character he purposed to give.

First, he did present himself with a crown on his head, a scepter in his hand, being clothed in a purple robe furred with ermyne; after that, with a mitre on his head, a crosier in his hand, and accourtred with a paire of lawn sleeves: and thereafter, with a helmet on his head, the visiere up, a commanding-stick in his hand, and arrayed in a buff-suit, with a scarf about his middle: then, in a rich apparel, after the newest fashion, did he shew himself, (like another *Sejanus*) with a periwig

daubed with Cypres powder: in sequel of that, he came out with a three cornered cap on his head, some parchments in his hand, and writings hanging at his girdle like Chancery bills; and next to that, with a furred gown about him, an ingot of gold in his hand, and a bag full of money by his side; after all this, he appears againe clad in a country-jacket, with a prong in his hand, and a *Monmouth*-like-cap on his head: then very shortly after, with a palmer's coat upon him, a bourdon in his hand, and some few cockle-shells stuck to his hat, he look't as if he had come in pilgrimage from *Saint Michael*; immediately after that, he domineers it in a bare unlined gowne, with a pair of whips in the one hand, and *Corderius* in the other: and in suite thereof, he *bondspondered* it with a pair of pannier-like breeches, a Mountera-cap on his head, and a knife in a wooden sheath, daggerways, by his side; about the latter end he comes forth again with a square in one hand, a rule in the other, and a leather apron before him: then very quickly after, with a scrip by his side, a sheep hook in his hand, and a basket full of flowers to make nosegays for his mistress: now drawing to a closure, he rants it first in *cuerpo*, and vapouring it with gingling spurrs, and his armes a kenbol like a *Don Diego* he strouts it, and by the loftiness of his gate plaies the *Capitan Spavento*: then in the very twinkling of an eye, you would have seen him againe issue forth with a cloak upon his arm, in a livery garment, thereby representing the serving-man; and lastly, at one time amongst those other, he came out with a long gray beard, and bucked ruff, crouching on a staff tip't with the head of a Barber's Cithern, and his gloves hanging by a button at his girdle.

Those fifteen several personages he did represent with such excellency of garb, and exquisiteness of language, that condignely to perpend the subtlety of the invention, the method of the disposition, the neatness of the elocution, the gracefulness of the action, and wonderful variety in the so dextrous performance of all, you would have taken it for a comedy of five acts, consisting of three scenes, each composed by the best poet in the world, and acted by fifteen of the best players that ever lived, as was most evidently made apparent to all the spectators, in the fifth and last hour of his action, (which, according to our Western account, was about six a'clock at night, and, by the calculation of that country, half an hour past three and twenty, at that time of the year) for, purposing to leave off with the setting of the sun, with an endeavour nevertheless to make his conclusion the master-piece of the work, he, to that effect, summoning all his spirits together, which never failed to be ready at the cal of so worthy a Commander, did, by their assistance, so conglomerate, shuffle, mix, and interlace the gestures, inclinations, actions, and very tones of the speech of those fifteen several sorts of men whose carriages he did personate, into an inestimable *Ollapodrida* of immaterial morsels of divers kinds, sutable to the very Ambrosian relish of the Heliconian Nymphs, that in the *Peripetia* of this Drammatical exercitation, by the enchanted transportation of the eyes and eares of its spectabundal audiorie, one would have sworne that they all had looked with multiplying glasses, and that (like that Angel in the Scripture, whose voice was said to be like the voice of a multitude) they heard in him alone the promiscuous speech of fifteen several actors; by the various ravishments of the excellencies whereof, in the frolickness of a jocund straine beyond expectation, the logofacinated spirits of the beholding hearers and auricularie spectators, were so on a sudden seized upon in their risible faculties of the soul, and all their vital motions so universally affected in this extremitie of agitation, that to avoid the inevitable charmes of his intoxicating ejaculations, and the accumulative influences of so powerful a transportation, one of my Lady Dutche's chief

Maids

streets of Mantua, and playing upon his guittar, he was attacked by half a dozen people in masks. The assailants found that they had no ordinary person to deal with, for they were not able to maintain their ground against him. In the issue, the leader of the company, being disarmed, pulled off his mask, and begged his life, telling him, that he was the Prince his pupil. Crichton immediately fell upon his knees, and expressed his concern for his mistake; alledging, that what he had done was only in his own defence, and that if Gonzaga had any design upon his life, he might always be master of it. Then, taking his own sword by the point, he presented it to the Prince, who immediately received it, and was so irritated by the affront which he thought he had sustained, in being foiled with all his attendants, that he instantly ran Crichton through the heart (*u*).

Various have been the conjectures concerning the motives which could induce Vincentio di Gonzaga to be guilty of so ungenerous and brutal an action. Some have ascribed it to jealousy, asserting that he suspected Crichton to be more in favour than himself with a Lady whom he passionately loved; and Sir Thomas Urquhart has told a story upon this head which is extravagant and ridiculous in the highest degree (*w*). Others, with greater probability, represent the whole transaction as the result of a drunken frolic; and it is uncertain, according to Imperialis, whether the meeting of the Prince and Crichton was by accident or design (*x*). However, it is agreed on all hands, that Crichton lost his life in this rencontre. The time of his decease is said, by the generality of his Biographers, to have been in the beginning of July, 1583; but Lord Buchan (we doubt not in consequence of a more accurate enquiry) fixes it to the same month in the preceding year. There is a difference, likewise, with regard to the period of life at which Crichton died. The common accounts declare that he was killed in the thirty-second year of his age; but Imperialis asserts that he was only in his twenty-second, when that calamitous event took place, and this fact is confirmed by Lord Buchan (*y*).

Crichton's tragical end excited a very great and general lamentation. If Sir Thomas Urquhart is to be credited, the whole Court of Mantua went, three quarters of a year, into mourning for him; the epitaphs and elegies that were composed upon his death, and stuck upon his hearth, would exceed, if collected, the bulk of Homer's works; and, for a long time afterwards, his picture was to be seen in most of the bed-chambers and galleries of the Italian Nobility, representing him on horseback, with a lance in the one hand, and a book in the other. The same Author tells us, that Crichton gained the esteem of Kings and Princes, by his magnanimity and knowledge; of Noblemen and Gentlemen, by his courtliness and breeding; of Knights, by his honourable deportment and pregnancy of wit; of the rich, by his affability and good fellowship; of the poor, by his munificence and liberality; of the old, by his constancy and wisdom; of the young, by his mirth and gallantry; of the learned, by his universal knowledge; of the soldiers, by his undaunted valour and courage; of the merchants and artificers, by his upright dealing and honesty; and of the fair sex, by his beauty and handsomeness; in which respect, he was a masterpiece of nature (*z*).

Extravagant as this account must appear, something as extravagant hath been advanced by earlier writers. Joannes Imperialis, an Italian Biographer, to whom we have already referred, says, in his life of Crichton, that he was the Wonder of the last Age; the prodigious production of Nature; the glory and ornament of Parnassus, in a stupendous and unusual manner; and that, in the judgment of the learned world, he was the phoenix of literature, and rather a shining particle of the divine Mind and Majesty, than a model of what could be attained by human industry. The same Author, after highly celebrating the beauty of his person, asserts that his extraordinary eloquence, and his admirable knowledge of things, testified that he possessed a strength of genius wholly Divine. "What, adds this writer, can more exceed our comprehension, than that Crichton, in the twenty-first year of his age, should be master of ten different languages, and perfectly well versed in philosophy, mathematics, theology, polite literature, and all other Sciences? Besides, was it ever heard, in the whole compass of the globe, that, to these extraordinary endowments of the mind, should be added a singular skill in fencing, dancing, singing, riding, and in every exercise of the gymnastic Art?" Nay, Imperialis, in his account of Crichton's death, declares that the report of so sad a catastrophe was spread to the remotest parts of the earth; that it disturbed universal Nature; and that in her grief

‘ Maids of Honour, by the vehemencie of the shock
‘ of those incomprehensible raptures, burst forth into
‘ a laughter, to the rupture of a veine in her body;
‘ and another young Lady, by the irresistible violence
‘ of the pleasure unawares infused, where the tender
‘ receptibilitie of her too too tickled fancie was least
‘ able to hold out, so unprovidedly was surpris'd, that
‘ with no less impetuositie of ridibundal passion then
‘ (as hath been told) occasioned a fracture in the
‘ other young Ladie's modestie, she, not able longer to
‘ support the well-beloved burthen of so excessive
‘ delight, and intranſing joys of such Mercurial

‘ exhilarations, through the ineffable extasie of
‘ an overmastered apprehension, fell back in a
‘ swoon, without the appearance of any other life
‘ into her, then what by the most refined wits of
‘ theological speculators is conceived to be exerce'd
‘ by the purest parts of the separated *entelechies* of
‘ blessed saints in their sublimest conversations with
‘ the celestial hierarchies: this accident procured the
‘ incoming of an Apothecarie with restoratives, as
‘ the other did that of a Surgeon, with consolidative
‘ medicaments (*10*).’

for the loss of the Wonder she had produced, she threatened never more to confer such honour upon mankind [H]. Compared with these extravagancies, the assertion of Bayle, that Crichton was one of the greatest prodigies of wit that ever lived, and the testimony of Fœlix Astolfus concerning his wonderful memory, may be considered as modest encomiums (a).

(a) Mackenzie and Pennant, *ubi supra*. Astolfi *Officina Historica*, p. 102.

From the portraits which remain of Crichton, it appears that in his face and form he was beautiful and elegant, and that his body and limbs, though not muscular or athletic, were well proportioned, and fitted for feats of agility. Aldus Manutius describes him as distinguished by a mark of a red rose about his right eye. No such mark, however, is to be traced in any of the pictures or prints of him which have come down to our times. There are two portraits of him in Scotland, one of which is in the possession of Mr. Graham of Airth. From a copy of this picture, belonging to Lord Eliock, a Lord of Sessions, the print is taken which is given by Mr. Pennant. A friend of the writer of this article is of opinion, that in Mr. Graham's Original, Crichton does not appear to be so handsome as he is represented in Mr. Pennant's print. The other portrait of Crichton is the property of Mr. Morison, of Bògnie and Frendraught in Aberdeenshire. This Gentleman's father became possessed of the estate of Frendraught by purchase; at which time he found, in the principal Mansion, the picture of which we are speaking. It is said to be a very fine one, and is understood to have been sent over from Italy to Lord Frendraught by Crichton himself, and to have been painted in the year of his death (b). There is a print of him in *Imperialis*, which, though poorly executed, is probably authentic (c).

Several of the Biographers of Crichton have given a formal Catalogue of his works, though it does not appear that any productions of his have ever been committed to the press, excepting four Latin Poems. What his Encomiasts have been pleased to call his works are, for the most part, nothing more than the heads of the topics upon which he declaimed or disputed, at the public exhibitions of his talents. That we may not, however, detract, in any degree, from his just praises, we shall insert the Catalogue below [I]. Of the poetic encomiums that have been written upon him, three only have been preserved, and these are not distinguished by their merit. What they are, will be seen in the note subjoined [K].

[H] She threatened never more to confer such honour upon mankind.] As *Imperialis's* Museum Historicum is not in every hand, we shall insert the original passages. *Transacti dudum sæculi monstrum, prodigioso Naturæ opificis conatu editum, quò parnassi spacia stupendo, et inusitato spectaculo illustrarentur. Hic est totius adhuc orbis Judicio phœnix habitus ingeniorum, divinæ mentis igniculis summi potiùs datoris referens majestatem, quàm mortalem ad æmulandum laceffens industriam. — Præalta facundia, rerumque notitia præclarissimarum, dæmonicum prorsus ei subesse animi testabantur vigorem. Quid aut magnificentius, aut admirabilius, quàm in ipsis ephēbis, belli detentum studiis ingenium, tantam in doctrinarum arvis messem cogere potuisse? Quid humanum magis exsuperans caput, quàm vigesimo Etatis Anno, decem linguarum peritia; necnon philosophiæ, mathematicæ, theologiæ, mitiorum artium, cæterarumque omnium disciplinarum apicibus præstitisse? Porro quid magis in toto terrarum ambitu inauditum, quàm digladiandi, saltandi, sonandi, equitandi, totius gymnasticæ præstantiam singularem, tot arcanis elatæ mentis junxisse prærogativis? — Miserabilis herculè fati rumor in ultimas usque terras expansus nedum tetricis viuentes institutis homines perculit, sed naturam probe turbavit universam, quæ pompam excidisse suam ingemens, haud amplius tantis se mortales cumulatam honoribus minatus est (11).*

(11) *Joan. Imperial. Museum Historicum & Physicum*, p. 140 — 143.

[I] We shall insert the Catalogue below.] It is as follows: I. *Ode ad Laurentium Massam plures*. II. *Laudes Patavinæ, Carmen extempore effusum, cum in Jacobi Moyssii Cornelii Domo experimentum Ingenii coram tota Academiæ Frequentia non sine Multorum Stupore faceret*. III. *Ignorationis Laudatio, extemporale Thema ibidem redditum, post sex Horarum disputationes, ut Præsentis Somnia potius fovere quam Rem se veram videre affirmarint, ait Manutius*. IV. *De Appulsu suo Venetias*. V. *Ode ad Aldum Manutium*. VI. *Epistola ad Diversos*. VII. *Prefationes solennes in omnes Scientias sacras et profanas*. VIII. *Judicium de Philosophis*. IX. *Errores Aristotelis*. X. *Armis an Literæ præstant, Controversia oratoria*. XI. *Refutatio Mathematicorum*. XII. *A Comedy in the Italian Language (12)*.

(12) Dempster, *ubi supra*, p. 189. Mackenzie, *ubi supra*, p. 307. Pennant, *ubi supra*, p. 328.

[K] Will be seen in the note subjoined.] The first is by Dr. John Johnston, in his *Historical Inscriptions upon the Scottish Kings and Heroes*. It is observable, that this writer places the death of Crichton in the year 1581.

JACOBUS CRITTONIUS CLUNIUS,

Musarum pariter ac martis alumnus, omnibus in studiis admirabilis, Mantua a Ducis Mantuani filio cæsus, 1581.

Et genus et censum dat Scotia: Gallia pectus
Excolit. admirans Itala terra virum
Ambit, et esse suum vellet. Gens æmula vitam
Abstulit. An satis hoc, dicat ut illa suum?
Mantua habet cineres, scelus execrata nefandum,
At tumuli tanti gaudet honore tamen (13).

(13) *Delit. Poetarum*, p. 696.

The inscription prefixed, by Dr. Johnston, to these verses, is very inaccurately given in Mackenzie and Pennant.

The second encomium is by Georgius Rotinus, an Italian.

Ignoto latuit Phœnix, Critonius ævo,
Funereis postquam Mantua meruit aquis.
Scilicet ut surgat redivivus in æthera Phœnix,
Auxilium posset qui dare nullus erat.
Famigeras iterum Critonius exit in auras,
Et volat ingenio docta per ora virum.
Addit imperio mansuras dadalus alas,
Et penna has pennas imperialis habet.

The last is by Julius Ranconius, another Italian.

Fert præjudicium sapiens Critonius annis,
Dum vincit roseis tempora cana comis.
Hinc parat insidias quibus illa recedat
Invida quæ tantum nolle habere virum.
Ast iterum superat languens fera secula, namque
Quæ superest, famam non gelida urna capit.
Ingenio Phœnix, Phœnicis forte novare
Debuit occiduum non moritura Dies (14).

(14) *Imperial. ubi supra*, p. 143. Mackenzie, *ubi supra*, p. 206.

Who Rotinus and Ranconius were, it is not in my power to ascertain; nor is it a matter of any importance. From a perusal of their verses, it appears highly probable that they were written for the purpose of being annexed to *Imperialis's* Life of Crichton, and consequently long after Crichton's death.

Such

Such are the accounts which, by a succession of writers, and particularly since the time of Mackenzie, have been given of the Admirable Crichton, with little variation, and scarcely with any degree of hesitation or reflection. It is, therefore, an object of importance, to examine, somewhat more accurately and extensively than hath hitherto been done, what measure of faith is to be allotted to the different parts of the preceding narrative. And here it must be observed, that no credit can be granted to any facts which depend upon the sole authority of Sir Thomas Urquhart. Sir John Hawkins, indeed, seems to think that the stories told of Crichton by this writer may be considered as sufficiently authenticated to all the purposes of historical information (*d*). Mr. Pennant, likewise, speaks of him with approbation; and Dr. Samuel Johnson laid a stress on his veracity, in the account of Crichton which he dictated to Dr. Hawksworth, and is inserted in the eighty-first number of the *Adventurer*; of which account it may be observed, that it is only an elegant summary of the life written by Mackenzie. But with all deference to these respectable names, I must declare my full persuasion that Sir Thomas Urquhart is an author whose testimony to facts is totally unworthy of regard; and it is surprizing that a perusal of his works does not strike every mind with this conviction. His productions are so inexpressibly absurd and extravagant, that the only rational judgment which can be pronounced concerning him is, that he was little, if at all, better than a madman. To the character of his having been a madman must be added that of his being a liar. Severe as this term may be thought, I apprehend that a diligent examination of the treatise which contains the memorials concerning Crichton would shew that it is strictly true. But of his total disregard to truth there is incontestible evidence in another work of his, entitled, "The true Pedigree, and Lineal Descent, of the most ancient and honourable Family of the URQUHARTS in the House of CROMARTY, from the Creation of the World until the Year of God, 1652." In this work it is almost incredible what a number of falsities he has invented, both with respect to names and facts. Perhaps a more flagrant instance of imposture and fiction was never exhibited; and the absurdity of the whole pedigree is beyond the power of words to express. It can only be felt by those who have perused the Tract itself [K].

(*d*) Life of Dr. Samuel Johnson, p. 299.

Such

[K] *It can only be felt by those who have perused the Tract itself.* Though a few specimens cannot sufficiently expose the absurdity and falshood of the whole performance, it may not be disagreeable to our readers to be presented with some examples of our author's fictions. In enumerating the Patriarchs before the Deluge, he regularly mentions the names of their wives, as he does those of the wives of other persons, through the whole succeeding series. Seth, he asserts, married Shifkah; Enos, Mahla; Cainan, Bilhah; Mahalaleel, Timnah; Jared, Aholimah; Enoch, Zilpah; Methuselah, Noema; Lamech, Ada; and Noah, Titea; who was the daughter of Tubal-Cain, the son of Jubal. Among his ancestors posterior to the Flood, he reckons ESORMON, in the eighteen hundredth and tenth year of the world, who was Sovereign Prince of Achaia. "For his fortune, says Sir Thomas, in the wars, and his affability in conversation, his subjects and familiars surnamed him *εποχάρτος*, that is to say, *fortunate and well-beloved*. After which time, his posterity ever since has acknowledged him the father of all that carry the name of URQUHART. He had for his arms three banners, three ships, and three ladies, in a field Or; with the picture of a young Lady above the waist, holding in her right hand a brandished sword, and a branch of myrtle in the left, for his crest: and for supporters two Javanites, after the soldier habit of Achaia, with this motto in the scroll of his coat-armour, *Ταυτα η τρια αξιοβιάτα*: that is, *these three are worthy to behold*. Upon his wife Narfesia, who was Sovereign of the Amazons, he begat CRATYNTER. He was likewise surnamed *εποχάρτος*, as ever since have been all the male-race of Esormon."—Of another of Sir Thomas Urquhart's ancestors, whom he calls Phrenedon, he says, "This Phrenedon was in the house of the Patriarch Abraham at the time of the Destruction of Sodom and Gomorrah."—Of Molin, who is placed in the Year of the World 2415, our author relates as follows: "This is he that came with Gathelus from Egypt into Portugal, and of whom are descended the Clanmoline-spick in Ireland. His wife Panthea was the daughter of Deucalion and Pirra, of whom Ovid maketh mention in the first of his *Metamorphosis*. In that part of Afric, which, after his name, is till this hour called Molinea, by cunning and valour together, he killed,

VOL. IV.

"in one morning, three lions, the heads whereof, in a basket, presented to his Lady Panthea, so terrified her, that (being quick with child) for putting her right hand to her left side, with this sudden exclamation, [*O Hercules, What is this?*] the impression of three lions heads was found upon the left side of the child as soon as he was born. How Portugal was so called, after Gathelus; the Scots after Scota; and that the Scotobrigantes were the race of Molin in Spain, is clearly set down in the ample History of the House."—Of Pamprofodos, previous to Molin, we are told that he married Ter-muth, who was that daughter of Pharaoh Amenophis, which found Moses amongst the bulrushes, and brought him up as if he had been her own child.—Concerning Propetes, who is placed fourth in succession from Molin, it is said, that he married Hypermetra, the choicest of Danaus's fifty daughters.—A few generations after, we meet with Cainotomos, who took to wife Thymelica the daughter of Bacchus, in recompence of his having accompanied him in the conquest of the Indies. "Cainotomos, adds our author, in his return from thence into Greece, passed through the territories of Israel, where being acquainted with Deborah the Judge and Prophetess, he received from her a very rich jewel, which afterwards, by one of his successors, was presented to Pentasilea, that Queen of the Amazons that assisted the Trojans against Agamemnon."—We must not omit Melleffen, and his wife Nicolia. "This Nicolia, says Sir Thomas, before she married to him, travelled from the remote Eastern countries, to have experience of the Wisdom of Solomon; and by many is supposed to have been the Queen of Sheba. Melleffen, nevertheless, sent some of his children to Ireland and Britain, to be brought up with the best of his own father and mother's kindred."—One specimen more shall be transcribed of Sir Thomas Urquhart's power of invention. In the Year of the World 3560, and before Christ 389, "NOMOSTOR married DIOSA. This Diosa was the daughter of Alcibiades, and Hipparete. Nomostor, after the lamentable decease of his father-in-law, whom his native country had so ungratefully used, took his farewell of Greece; and after many dangerous voyages, both by sea and land, arrived at last at the harbour of Ochondar, now called Cromarty, or *Portus Salutis*, first found

5 Y

"out

Such a man, therefore, can justly be entitled to no degree of credit, especially when he has a purpose to serve, as was the case with Sir Thomas Urquhart. His design was to exalt his own family and his own nation at any rate. With respect to his own nation, there was no occasion for having recourse to fiction, in order to display the lustre of Scotland, in the eminent men whom it has produced in Arms and Literature. The Pencil of Truth alone would have been amply sufficient for that purpose.

So far, therefore, as Sir Thomas Urquhart's authority is concerned, the wonderful exhibitions of Crichton at Paris, his triumph at Rome, his combat with the Gladiator, his writing an Italian Comedy, his sustaining fifteen characters in the representation of that Comedy, the extraordinary story of the Amour which is described as the cause of his death, the nine months mourning for him at Mantua, and the Poems hung round his hearse to the quantity of Homer's works, must be regarded as in the highest degree doubtful, or rather as absolutely false. I cannot forbear mentioning two circumstances, which shew how much Sir Thomas Urquhart was destitute of prudence, as well as of scrupulosity in his violations of truth. He says that the Duke of Mantua was pleased to confer upon the young Lady that was Crichton's mistress, and future wife, a pension of five hundred ducats a year; and that the Prince also bestowed as much upon her, during all the days of his life, "which was, adds Sir Thomas, but short; for he did not long enjoy himself after the cross fate of so miserable an accident (e)." Now it is well known that Vincenzo di Gonzaga succeeded his father in the Dukedom of Mantua, in 1587, and that he did not die till the year 1612; which was almost, if not entirely, thirty years after Crichton's decease (f). The other instance of the imprudence of Sir Thomas Urquhart in the contrivance of his fictions, occurs at the conclusion of his narrative, where he asserts that the verity of the story which he hath related concerning the incomparable Crichton, "may be certified by two thousand men yet living, who have known him." *Two thousand men yet living!* that is, in 1652, sixty-nine, or seventy years after Crichton's death, for such was the time of Sir Thomas's publication (g). Our author would have been sadly puzzled to collect together these two thousand living witnesses, who could certify the verity of his story.

(e) Urquhart, *ubi supra*. p. 95, 96.

(f) *Traſſatus de Territoriis, &c. Principum, Rerum Publicarum, et eorum qui bodie in Italia Rerum Potiuntur*, p. 224.

(g) Urquhart, *ubi supra*.

With regard, however, to the account which is given of the prodigious exertions of Crichton, both corporal and mental, at Paris, Mackenzie imagines that he has found a full confirmation of them in a passage produced by him from the *Disquisitiones* of Stephen Pasquier, and which he considers as the testimony of an eye-witness. The passage is inserted in note [C]. But the whole of what has been built upon it, by Mackenzie, and succeeding Biographers, is founded on a mistake. In the quotation from the *Disquisitiones*, the name of Crichton is not mentioned, and the author doth not appear to have been personally present at the exhibitions of the extraordinary youth there described. The expressions which are supposed to carry that meaning may well be referred not to the writer himself, but to his countrymen the French, before whom the young man is said to have displayed his surprising talents. But the discussion of this point is totally needless, because the passage in question is not an original Authority. The book entitled, *Stephani Paschieri Disquisitiones*, is only an Abridgment, in Latin, of Pasquier's "Des Recherches de la France." Now in this last work there is, indeed, an account of a wonderful youth, such as is related in Mackenzie's quotation, and from which that passage was formed. But this wonderful Youth, whoever he might be, was not the Admirable Crichton; for Pasquier, who does not tell his name, expressly says, that he appeared in the year 1445 (h) [L]. The evidence, therefore, produced by Mackenzie falls entirely to the ground. Indeed,

(h) *Recherches de la France*, liv. 6. chapitre xxxix. p. 579.

"out by his predecessors Alypos and Beltistos, ag-
named Chonchar, inhabited by many of his kind-
red at the time of his landing there; and there-
after, all the days of his life, honoured with his
presence, as Prince of the race (15)."

(15) True Pedigree, p. 2, 3, 4, 5, 6, 9, 10, 11, 12, 14, 10.

(*) It is from a copy of Sir Thomas's Tracts obligingly lent me by Sir John Hawkins, that I have been enabled to make these extracts and remarks.

These fictions speak for themselves. It must, however, be acknowledged, that though Sir Thomas Urquhart had no regard to truth, he exercised an uncommon degree of ingenuity, as well as labour, in framing his pedigree (*).

[L] Says that he appeared in the year 1445.] This matter has lately been set in a clear light, by a learned and judicious writer, in the Edinburgh Magazine, for May, 1787, whose letter we shall transcribe.

"S I R,

"WE are informed by Sir John Hawkins, that Dr. Johnson dictated, from memory, that account of the person vulgarly named the Admirable Crichton, which is to be found in one of the papers of the *Adventurer*.

"That account is plainly an abridgement of the Life of Crichton, by Dr. George M'Kenzie (16).

"Dr. M'Kenzie supposes that Pasquier, the French

Lawyer and Antiquary, was an eye-witness of the feats performed, in arts as well as in arms, by Crichton.

"This is one of the grossest errors in Biography which has occurred to me in the course of my reading; and it is an error which, I perceive, is gaining ground daily, and bids fair, in a short time, to be received as an indisputable truth.

"The error seems to have arisen from the following circumstance: Dr. M'Kenzie had never read the original work of Pasquier, entitled, *Recherches de la France*; what he quotes concerning the wonderful young man, is taken from a Latin abridgement of that work; he refers to *Steph. Pasch. Disquis. lib. v. cap. 23.* and he gives his quotation in Latin; indeed it does not appear that Dr. M'Kenzie had ever heard of the original work.

"Now Pasquier, instead of saying that he was an eye-witness of the wonders exhibited by Crichton, says, in the most unequivocal terms, that what he relates was taken "from a manuscript which was occasionally used by him," (*d'un livre écrit à la main dont je m'aide selon les occurrences.*) And he adds, "I will represent the story in its own simple garb, without

(16) Scots Writers, vol. iii. p. 196—207.

Indeed, if the story of Crichton's exploits at Paris had been true, no man was more likely to be acquainted with them than Stephen Pasquier, who lived at the time, and who would be fond enough of recording transactions so extraordinary. It may farther be observed, that Thuanus, who was likewise a contemporary, and who, in his own life, is very particular in what relates to learned men, makes no mention of Crichton. The only authority for his having ever resided in France at all (Sir Thomas Urquhart excepted) is that of Dr. John Johnston, who says, "*Gallia Pectus excolit.*" But this amounts to no proof of the truth of the transactions related by Urquhart. The whole which can be deduced from it is, that Crichton, in the course of his travels, might make some stay in France, for the purpose of improvement. Even this, however, doth not agree with the narration of Imperialis, who informs us, that when troubles arose in Scotland on account of Religion, and Queen Mary fell into so many calamities, Crichton was sent by his father directly from that country to Venice, as a place of security (i).

(i) *Museum Historicum, ubi supra.*

It is acknowledged by Sir John Hawkins, that Sir Thomas Urquhart has produced no authorities in support of his surprizing narrations. But this defect Sir John thinks is supplied in the Life of Crichton which is given in Mr. Pennant's Tour (k). I am under the necessity of saying, that this is by no means the case. The article in Pennant, was not drawn up by that ingenious and learned Gentleman, but is the transcript of a pamphlet that was printed some years ago at Aberdeen; and which pamphlet is nothing more than a re-publication, with a few verbal alterations, of the Life of Crichton written by Mackenzie. It doth not, therefore, furnish a single additional testimony in confirmation of Sir Thomas Urquhart's stories, excepting in the mistaken instance from Pasquier. In other respects, it only borrows facts from Sir Thomas Urquhart, without establishing them upon fresh proofs. It is observable, that the earlier Biographers of Crichton had no knowledge of most of the transactions enlarged upon by this extravagant writer; for, if they had known them, they would have been eagerly disposed to relate them, and to do it with every circumstance of exaggeration. How much this was the character of Thomas Dempster, with regard to his own countrymen, is sufficiently understood, and hath frequently been remarked; and yet his account of Crichton is uncommonly modest, compared with those of succeeding Authors. The extravagance of Imperialis in respect to Crichton has already appeared. There seems, indeed, to have been an universal tendency in the writers of this young Scotsman's life to produce wonder and astonishment. Mackenzie remarks, that Imperialis could not but know the truth of all, or at least of most of the things he has related concerning Crichton, since he lived upon the places in which they were transacted, and had them from an eye and ear witness, even his own father (l). It is, however, to be remembered, that Imperialis's Museum Historicum was not published till 1640, nearly sixty years after the events recorded by him happened; to which may be added, that the information he derived from his father was probably very imperfect. Imperialis the elder was not born till 1568, and consequently was only thirteen years old when Crichton displayed his talents at Padua (m). What real dependence, therefore, could there be on the accuracy of the account given by a youth of that age? He could only relate, and perhaps from inadequate intelligence, the things which were talked of when he was a boy. Besides, his authority is appealed to for no more than a single fact, and that a doubtful one, since it does not accord with Manutius's Narrative: and who ever heard of the famous Philosopher Arcangelus Mercenarius?

(k) Life of Dr. Johnston, p. 308.

(l) Mackenzie, *ubi supra*, p. 203.

(m) Collier's Historical Dictionary, vol. i. New Universal Biographical Dictionary, vol. vii. p. 399.

The truth of the matter is, that, some slight circumstances excepted, neither Dempster [M] nor Imperialis have produced any evidences of Crichton's extraordinary abilities

"without any artificial colouring, so that my readers may be the more inclined to give credit to it," (*vous representant cette Histoire en sa simplicité sans y apporter aucun fard pour ce que vous y adjousteriez plus de foy.*) He then transcribes the narrative from the MS. which places the appearance of this phenomenon in the year one thousand four hundred and forty-five, a full century before the birth of our Crichton. See *Recherches de la France*, lib. vi. c. 38, 39.

"Dr. M^rKenzie, although he had not read the original of Pasquier, appears to have read an author who quotes the same story: "The learned M. du Launoy, says he, in his History of the College of Navarre, finding the history of this dispute recorded in a MS. History of the College of Navarre, and the like account of a Spaniard in Trithemius, confounds the two together, and robs our author of the glory of this action, and places it in the year 1445; whereas it should be in the year 1571." This charge of robbery is singular enough!

"Let me only add, that Pasquier transcribes some verses written by George Chastelain, a French Poet, in the reign of Charles VII. King of France, which allude to the same story; and that Pasquier himself

was born at Paris in 1528, passed his life in that city, and was an eminent Lawyer and Pleader in 1571; so that it is impossible the feats of Crichton, had they been really performed at Paris, could have been unknown to him, and most improbable that, knowing them, he would have omitted to mention them; for, in the same, lib. vi. c. 39. he is at pains to produce examples of great proficiency, displayed by men in a much humbler rank of life than that of philosophers and public disputants.

"I am, &c."

[M] *Some slight circumstances excepted, neither Dempster.* It is related by Dempster, that Crichton was for some time at Genoa, and that he was offered a considerable salary, if he would remain in that city.

I shall take this opportunity of remarking, that there is no mention of an Italian Comedy in Dempster's Catalogue of Crichton's works. That article, therefore, was added to the Catalogue by Mackenzie, on the sole authority of Sir Thomas Urquhart.

abilities besides those which are recorded by the younger Aldus Manutius. He, therefore, is to be regarded as the only living authority upon the subject. Manutius was contemporary with Crichton; he was closely connected with him in friendship; and he relates several things on his own personal knowledge. He is a positive and undoubted witness with respect to our young Scotsman's intellectual and literary exertions at Venice and at Padua; and from him it is that our account of them is given above. Nevertheless, even Aldus Manutius is to be read with some degree of caution. Dedication is apt to assume the stile of exaggeration, and this is the case with Manutius's Dedication of the Paradoxa Ciceronis to Crichton. In addition to the general language of such addresses, he might be carried too far by his affection for his friend, which appears to have been very great: nor was the younger Aldus eminent for steadiness and consistency of character. It is even said that, by his imprudencies, he fell into contempt and misery (n). But independently of any considerations of this kind, it may be observed, that Manutius's narrative, previously to Crichton's arrival at Venice, could not be derived from personal knowledge. For that part of it (which is sufficiently erroneous) he was probably indebted to Crichton himself. Neither does he appear to have been an eye-witness of the whole of the disputations which were held at Padua; for speaking of his young friend's paise of ignorance, he relates that those who were present told him afterwards how much they were struck with that Oration. However, at the other Disputation, which lasted three days, Manutius seems certainly to have attended; for he concludes his accounts of it with saying, that he was not only the adviser but the spectator of Crichton's wonderful contests. It is evident, however, from the Dedication, that his extraordinary abilities were not universally acknowledged and admired. Some there were who detracted from them, and were displeased with Manutius for so warmly supporting his reputation. As this Dedication is not easy to be met with, and is in fact the chief foundation upon which all the Biographies of Crichton have been built, it shall be inserted below [N].

(n) New Biographical Dictionary, vol. ix. p. 53, 54.

As

[N] It shall be inserted below.]

Nobilissimo juveni JACOBO CRITONIO Scoto.

CUM nihil in te sit summissum, et popolare, (mi Jacobe Critoni) quin omnia tam ampla, excelsa, atque admiranda, ut elapsi temporis viris illustribus, ac sapientissimis gloriam, futuris vero etiam spem tua amplitudo auferat, nostro autem sæculo singulare afferat ornamentum: cumq. non minus opiniones tibi, quam vita sint admirabiles: sententias illas, quæ Paradoxa vocantur, quæ non sane probantur in vulgus philosophorum, in Stoicorum scholis natas, nudas admodum, et squalidas, nunc vero M. Tullii Ciceronis eloquentia exornatas, et auctoritate, meis Commentariis illustratas nomini tuo dicare volui: cui ista maxime conveniunt. non tantum, ut amoris erga te mei indicium præbeam, qui nisi jam antea tibi extantis constitit argumentis, nunquam ex ullo patebit officio, quam ut animi grati pro Carminibus, quæ in tuo ad urbem Venetam appulsu mihi dedisti. Nunc vero etiam lætor, toti Italiæ, et orbi fortasse universo perspectum esse judicium de te meum, et ea, quæ, cum huc venisses, scriptis commendavi. quæ tibi ipsi, ac nonnullis acerrimis censoribus, aspera atque injucunda videbantur. Nam, licet tuum amorem malui ostendere, quam prudentiam, nunc ambo cum amicis tuis, tum inimicis, si qui amplius tam feri, atque inhumani reperiuntur, manifesta sunt, postquam tua virtus tam clarum sui splendorem diffudit. Ego enim junctam invidiæ, ac multorum inimicitiiis eximiam quandam, atque immortalem gloriam sum consecutus. Nam, quid illustrius, quid honestius, quid vero etiam gloriosius ad nomen meum accedere potuit, quam ut a me prolata *παράδοξα* primum, tum *εγκωμιαστικά* viderentur, nunc vero *ιστορικά* ab omnibus habeantur. Cum multi homines sui judicii levitatem, infirmitatemque, cum essent stultitia obcæcati, mei vero constantiam, veritatemque perspiciant. Poteram enim (*) (*ἱστορίας σου μοι μόνους*) Illustriss. Critonium, et serenissimam Stuardam, quibus oriundus es, familias extollere. Sed, quid Reges tui majores (licet ea laus Scottorum Regibus merito tribui possit, quod inter omnes Europæ Reges vetustissimi Christiani sint) quos nunquam Romani imperio suo subegere; cum Cæsar, propter tumultus excitatos, et res Gallia fluctuantes, exercitum a regni expugnatione revocaret: quid, inquam, isti, tuis virtutibus, animiquæ dotibus amplius solidæ laudis afferunt? Quid Critonii, qui cum Scotorum militiæ Imperatores summi plerumque essent,

Anglos e Galliæ regno, et Scotiæ finibus toties, ac tanta virtute ejecerunt? Quid Robertus Critonius, pater tuus, Fifeensis in Scotia, et Stormondienensis, Elioki, et Clunæi, tot oppidorum, tot præsidiorum dominus, qui longo tempore inter omnes Regni proceres ærumnosissimæ simul, et beatissimæ Regiæ, quæ apud Anglos (pro dolor) jam captiva est, et Christianæ religionis acerrimus exstitit propugnator, præsertim qui copias ad proelium, quod Langsydium vocant, duxisset; quid ille tibi splendoris veri affert? Non tantum illi fortasse debes, quod te genuerit, quod maximos hujus tempestatis viros, Buchananum, Hepburnium, Robertsonium, et Rhetorfortem præceptores tibi dederit, quod tam amplas pecunias fortunasque in te erudiendo insumperit, et omnes vires animi, atque ingenii in educando profuderit, quantum quod ob intestinas seditiones, et proelia domestica, contra te suscitata, quæ cum patre gessisti, Regno discedere, et Regem relinquere, coegit. Sed laudem, quæ a majoribus ad nos derivatur, ne laudem quidem esse, sapientissimus ille vir Ulixes existimavit. Neque te vero multum commendo, quod specie, et corporis viribus polleas. Fateor tamen aliquid esse in his, quod non tam a fortuna, quantum ab animo pendet, immortalitatis memoria prosequendum. Quod scilicet Regno, patria, domoque ob Catholicæ fidei ardorem tam longe abes, nec ullum ex his aerumnis dolorem, sed incredibilem animo sentias voluptatem: neque Regis in consobrinum tuum Jacobum Stuardum clementia, cui cum Moraviæ principatu suam consobrinam uxorem dedit: neque communis cum Rege educatio permovet, immo ne movent quidem. Putas enim, majores quasdam opes, et firmiora, quam quæ amisisti, præsidia esse quærenda. In corporis vero bonis id habes, quod effigies oris, atque sermonis animi nobilissimi filia sit. Sed belli studia in ipsis ephebis inire, eadem animo, atque amore prosequi, et cum literis, et Philosophia, tanquam alter Brutus, conjungere, nemini unquam ab initio humani generis obtigit. Magna sunt ista profecto, et inaudita: mediocria tamen, si cetera spectemus. Quod scilicet decem linguarum, multorum idiomatum, omnium disciplinarum cognitionem ante vigesimum primum ætatis annum sis adeptus: et digladiandi, saltandi, omnium gymnasticarum exercitationum, et equitandi studia tanta cum alacritate ingenii, animique humanitate, mansuetudine, et facilitate conjunxeris, ut nihil te admirabilius, nihil etiam amabilius reperiri possit. Sed non innumerales vitæ tuæ transactæ laudes; non mirificam illam coram Serenissimo Principe, ac Illustrissimis Venetæ

(*) Sic. Orig.

As to the real cause and manner of our young Scotsman's death, both of them still remain in some degree of obscurity. That he was killed in a rencontre at the Carnival at Mantua, is testified by too many authors to be reasonably doubted. But whether there was that particular malignity on the part of Vincenzo di Gonzaga, which is commonly ascribed to him, may be considered as uncertain.

One important method yet remains, by which we may be enabled to form a judgment of Crichton's genius, and that is, from a perusal of the four Poems of his which are still preserved. It is, however, to be feared, that these will not exhibit him in a very high point of view. Some Fancy, perhaps, may be thought to be displayed in the longest of his Poems, which was written on occasion of his approach to the city of Venice. He there represents a Naiad as rising up before him, and, by the order of the Muses and of Minerva, directing him how to proceed. But this is a sentiment which so easily presents itself to a classical Reader, that it can scarcely be considered as deserving the name of a Poetical Invention. The three other Poems of Crichton have still less to recommend them. Indeed, his Verses will not stand the test of a rigid examination even with regard to quantity. That our readers may be able to judge for themselves upon the subject, the four Poems shall be given in a note [P]; and this will probably be the more acceptable,

not

Venetæ Reip. proceribus actionem; non subtilissimas tuas de Theologia, Philosophia, et rebus Mathematicis disputationes in plerisque maximorum hominum confectibus recensebo; non tantorum hominum ad te videndum concursus, ut olim Platoni a Sicilia revertenti, relicto Olympico spectaculo, tota Atheniensium celebritas occurrere fertur; cum te omnes rubeæ Rosæ, quod tibi natura circa dextrum lumen impressit, tanquam unicam, et raram in terris avem homines cognoscerent. Quæ enim gentes tam feræ sunt, quæ, te cum adspexerint, non maximum cepisse fructum putent? Sed, his prætermittis, nunc propria narrabo: quæ scilicet in Patavina Academia fecisti, tum quæ in hac urbe, totius orbis nobilissima, cujus amplitudinem, et augustissimam majestatem inter omnes alias civitates te accipere, fovere, atque amplecti decuit; te vero etiam humani generis miraculum, admirandam urbem incolere, amare, et omnibus aliis antepone. Nam, postquam adversa valetudine jam quatuor menses laborasses, priusquam in integrum præcæ sanitatis statum redires, amicorum consilio ad Patavinam Academiam, tanquam ad Sapientiæ officinam, profectus es, ubi Idibus Martii in diem sequentem, suscepto consilio omnes omnium disciplinarum professores in ædibus Clarissimi viri Jacobi Aloisii Cornelii, ejus auctoritate, et precibus, ut convocarentur, petisti. Cum autem maximus doctissimorum hominum coetus, et omnes ex imperato pæne studiosi, et nobiles Gymnasii juvenes una convenissent, statim in primi ingressus vestibulo elegantissimo carmine Patavinas laudes, (nam ea tibi propofita erat ad dicendum materia) ex tempore decantasti: deinde cum celeberrimis illis doctoribus multa ex variis disciplinis tam acute exagitasti, tam docte pertractasti, erroresque Aristotelis, ac interpretum tam solide refutasti, tanta denique cum maxime viris modestia egisti, ut omnes in virtutis admirationem et morum suavitatis amorem simul allexeris. Neque id silentio prætereundum est, quod ex tempore etiam, post sex horarum de re literaria colloquia, et disputationes, cum oblata tibi esset ignorantem laudandi occasio, tam ornate de ea re dixisti, ut illi ipsi, qui intererant, potius somnia fovere, quam rem veram, et præsentem videre se putasse mihi postea affirmarint. Alium postea diem indixisti in ædibus Illustrissimi Patavini Episcopi, non ut altius ingenii tui specimen præberes, quod profecto frustra fecisses, sed ut eorum, qui primis disputationibus non interfuerant, obnoxio (*) precibus satisfaceres. Variæ res huic proposito obstaculo fuere. Ad secundum certamen ventum non est. Sed plerique cum primis Europæ viris sermones habiti sunt. Nonnunquam hominum expectationes, licet propter facta tam illustria de te maximas, plerumque etiam et te ipsum superasse dictus es. Ex quibus actis cum illico surrexisset magna fama, obrectatores aliqui; quibus ex aliorum bene gestis et rebus secundis invidentia esse solet, homuli, nescio quid dicam, tuæ virtuti aliquid derogare frustra tentaverunt. Ostendentes in obscuro odio apertas inimicitias, et, in quo nihil nocere poterant, summam voluntatem nocendi. Tum tu, ut istas obrectationes malevolentissimas pusillorum malevolorumque prof-

terneres, atque obtereres, duo hæc Theoremata in hac urbe edidisti: [these Theorems are given in note[F].] et per triduum indefessus sustinisti; et, quamdiu tua auctoritas tibi defendenda fuit, sic acriter et vehementer præliatus es, ut clamor concursusque insolitus ad studia tua lenienda tanta cum laude fieret, ut nihil unquam magnificentius ab hominibus auditum sit. Tu vero me non solum auctorem consiliorum, sed spectatorem pugnarum mirificarum habuisti. Nunc, quoniam laudis semper avidissimus fui, et præter ceteros φιλοκρίσιος ab omnibus habeor, multorumque odia, pro tua causa suscepi, cura obsecro, et effice, ut facis, ut, quia veram virtutem cognovi, ab omnibus amer, amari, et laudari possim, et ut major in ea mihi indies spes resideat. Mea igitur in Ciceronis Paradoxa lubricationes, hoc ipso quia in Paradoxa sunt, sub tuo nomine prodire volui, quod veteribus gratiam, novis favorem conciliare solet. Tu autem has nostras vigilias, et Stoicorum opiniones simul (quoad veritas patitur) tuebere. Id enim tibi admodum erit facile. Jam enim pæne omnes homines aut gratiam, aut eloquentiam, aut tantarum rerum, ne dicam omnium, scientiam suspiciunt. Vive nostri memor et vale.

Venetis. XIV. Kal. Jun. 60. D. XXCI. [1581.]

[P] The four Poems shall be given in a note.]

JACOBUS CRITTONIUS.

IN SUUM AD URBEM VENETAM APPULSUM.

DUM procul à patria, Hadriaci prope littora Ponti—
Confedi, mediis celsam miratus in undis
Stare urbem, sævi obtingunt cui jura tridentis,
Et pelagi imperium constans, æternaque sceptrum:
Sæpe meos animo casus meditabar iniquos,
Sæpe humectabam guttis stillantibus ora:
Cum mihi sese offert diva veneranda figura
Naias, Eridani quondam propè cognita ripas,
Naias, una quidem doctis gratissima Musis.
Principio rebar simulacrum, aut vana videre
Somnia (nulla fides oculis) cum protinus illa
His me ultro aggreditur dictis: Non te tua fallunt
Lumina; nec nostri vana est, quam cernis, imago.
Nam mandata fero Musarum, et jussa facesso
Palladis armisonæ, quibus una est cura salutis
Certa tuæ: nec te per tanta pericula vectum
Urbem in præclaram tumido sub pectore curas
Fas premere est: meliora jubent sperare, monentque.
Non hæc ista tibi tantum infortunia nota
Contingunt: nec cede malis, neu te sine vinci.
Cernis enim, ut late terras Saturnus in omnes
Acer agit pestem, quæ fibris cæca sub ipsis
Conditur, atque alias magno jam turbine clades:
Haud secus, ac Phæbi juratos Aulide Graios:
Quando Agamemnonio tetigit pro crimine dextra.
Hic natos vitæ exfortes, ast ille parentem
Grandævum deflet, vel matris triste feretrum,
Proque viro conjux, aut vir pro conjuge luget.
Ast alios volacris fortunæ incommoda tangunt.
Reges, indomitas gentes, populosque rebelles,
Aut urbes domini terrarum, atque oppida cernunt.
Erepta,

(*) Sic in orig.

not only as they constitute the whole remains of Crichton's productions, but as copies of them, and especially of the two latter Odes, are extremely difficult to be obtained.

What, then, is the opinion, which, on the whole, we are to form of the Admirable Crichton? It is evident that he was a youth of such lively parts as excited great present admiration,

Erepta, hic auri fulvum sibi pondus adeptum,
Morborumque cohors alios immissa fatigat.
Namque in hyperboreis tabes quæ coeperat oris,
Materiem inveniens primum, dehinc viribus ille
Sensim fota suis, Europam irrepsit in omnem.
Non secus ac lentus flatu succenditur ignis,
Paullatimque alimenta trahit, mox flamma per
auras

Illa crepat, seseque involvit lumine fulvo
Fumida, Vulcanum latè per inania jactans.
Primum exorta quidem flavos infausa Britannos,
Germanos tum cæruleos, Gallosque feroces,
Hinc etiam atra lues calidos infecit Iberos.
Fertilis Italiæ dehinc altas fusa per urbes
Invaluit. Sensere omnes (miserabile dictu)
Aut pauci evasere mali exitiale venenum.
Torquet adhuc primo pueros in limine vitæ,
Invalidosque senes extremo in limite vitæ,
Et juvenes rapido firmissima pectora bello
Disjicit: infractæ languent at prælia vires.
Una etiam matres petit, intonasque puellas,
Parcere nec formæ, nec parcere sueta juventæ.
Nec non armenta in campis errantia cernas,
Quæ vix ægra caput fessa cervice retentant,
Horribileque feras, picturatasque volucres
Languere, ut lassæ demissa papavera collo.
Nam circumfusus cunctis animantibus æther
Concepit nocuos gremio densosque vapores.
Utque aliquas leges, æternaque fœdera rebus
Imposuit natura parens, sine nomine multa
Sic in principiis latitant discrimina rerum, et
Mille movent. Nam ni Veneris placidissimus ignis
Sedaret varios infausi luminis ignes,
Discuteretque potens radiis contraria Phœbus,
Mille malis rueret sævis obnoxius orbis.
Namque intemperiem ostendit modò marcidus ær,
Sapèque mutatus, præsens occasio morbi est.
O genus humanum, quantas te audacia fecit
Japeti proles; species perferre malorum,
Cum nova supplicia, et pœnas immisit acerbas
Jupiter omnipotens subduclum infensus ob ignem
Curribus ætheriis, perfectaque corpora limo?
Quisque Deos, et fata vocat crudelia: culpæ
Nemo suæ justum capit imo in corde dolorem.
At placanda foret Divûm inclementia ture,
Et precibus, sic mortales, sic vivere dignum est.
Dixerat, et pressis tacuit formosa labellis.
Tum me luminibus tacitis intenta pererrat,
Ut responsa petens. Trepidanti ego pectore
tandem

Verba coacta dedi: Fateor me, candida Nais,
Promeritum quæcunque fero: nec turpis egestas;
Infandumve scelus servî mea pectora vexat.
At me quis miserum magna cognoscit in urbe,
Aut quis at æquoreas flentem solatur arenas?
Cumque sinum irroto lacrymis, verba irrita
ventis

Trado, nec quisquam est gemitus qui sentiat imos.
Collidunt vitreo auricomæ sub gurgite Nymphæ,
Assiduoque novos Glaucus meditatur amores,
Alma latet Doris, latet et Panopeia virgo,
Quas Siren blando mulcet sub gurgite cantu.
Nec me Carpathiis vates in fluctibus audit
Cæculus, et variis assuetus ludere formis,
Ac sese in rerum miracula vertere cuncta.
Sed nec equos bipedes tangunt tam parva furentes,
Quæ ficcis oculis turpes in gurgite Phocas
Depasci humanos pavitantes dentibus artus,
Cernunt Scylla vorax, aut navifragum Scylacæum,
Cum rapiunt fractas sinuosa sub æquora puppes,
Numina nil nostros miserantur torva labores.
Ergo præces scopulis, monstrisque natantibus ultro
Fundimus. Heu nimium sardent immania saxa.
At vos assuetæ nostras audire quærelas,
O Nymphæ, ad sacros latices quæ dulcia rura
Incolitis, gelidumque nemus, placidosque recessus,
Cur me numinibus disjungunt æquora vestris?
Cur non virgineas patiantur cernere Musas?

8

Pœnarum exhaustum satis est, heu parcite fata,
Tuque graves, ô Diva, meos miserere labores.
Illa autem roseo rursus sic ore locuta est:
Ipsa tibi expediam casus, si scire cupido est,
Auxiliumque feram certum modo rebus egenis.
Num te divini, divisque parentibus orti,
Aldi fama latet, totum diffusa per orbem?
Hunc Asiæ gentes norunt, et Cantaber atrox,
Decolor atque Indus, vel qui colit incola terras
Extremas penitus, sive auro insignis Orion,
Sive Hyades pluviae, seu septem adversa Trioni
Sidera clara caput semper sublime coronant.
Huic (pharetra tantum insignis) crinitus Apollo
Se Tritoniaca confessus arundine victum,
Atque lyra cedit: nec se negat esse secundum,
Formosæ natus Maiæ: neque docta Minerva
Dedignata parem est: tantum niter aurea virtus.
Hunc pete, namque regens filo vestigia cæca
Diriget ille tuos optato in tramite gressus.
Inde via pandet, sequere hunc quæcunque ju-
bentem:

Sic te Diva monet sævum quæ Gorgona gestat.
Quæ plerumque tuis præsens erit optima votis,
Namque hic contemptis tandem dominatur
Athenis.

Nec te tam longè disjungunt æquora Musis,
Imo hæc indigenæ veniunt at litora Musæ,
Necnon et Drymo, Lygeaque, Cymodoceque,
Nymphaque Junonis pulcherrima Deiopeja,
Quæque illas superant, atque Oceanitides ambas,
Hæc eadem Hadriacæ fulgent ad litora Nymphæ,
Doctæ Palladias Veneri conjungere curas.
Ipsa etiam, spretis Cnidoque, Paphoque, Cythe-
raque,

Aurea collucens Venetas Venus incolit arces.
Præterea summo coram te Principe ducet,
Quem tibi Diva dedit comitem, sacrumque Se-
natum

Adspicies, divosque omnes longo ordine Patres.
Non ita Tantalides, Regum cingente corona
Argolica, solio enituit sublimis ab alto,
Atque orbis dominos inter, patresque Latinos,
Augustus Cæsar, qualem fulgere videbis
Grandævum, atque annis, et majestate verendum,
Eximios inter proceres, gentemque togatam,
Patrem Urbis Venetæ: divumque ut Jupiter ipse
Confilio, in magno testum omnipotentis Olympi
Concutit, ac terras humiles, Erebumque so-
nantem

Apparens cælo ac terris, Ereboque tremendus:
Dique etiam fulgent reliqui splendore perenni:
Sic patri ætherio modo Principis æmula virtus
Semideumque, deis prædatur sidera et altum
Religione polum, hinc terras ditione, opibusque
Et bello quatit, ac sævum pietate Acheronta.

Donec nocturnis Dictynna investa quadrigis
Cum Phœbo alterno lustrabit lumine terras,
Pulchraque per tacitum labentur sidera mundum,
Stabunt res Venetæ, et præclaræ gloria gentis
Æternum positis tutissima fundamentis.

Dixerat, et levibus vix æquora tingere plantis
Visa petit binis propriis de cornibus unum,
Quo pater Eridanus violentibus influit undis
In mare purpureum, et vitreo caput abdidit amne.

AD ALDUM MANUTIIUM.

INTERMISSA diu Chelys:
Nec Lydiis cecini carmina tibiis,
Nec molles cytharæ modos,
Carmen perpetuo flebile personans.
Sed nunc mente feror nova,
Per sacrumque trahit Melpomene nemus.
Cinctum Pierius me rapit, et chorus
Phœbo, quâ tumidus sequor,

Te

admiration, and high expectations with regard to his future attainments. He appears to have had a fine person, to have been adroit in his bodily exercises, to have possessed a peculiar facility in learning languages, to have enjoyed a remarkably quick and reten-

Te clarum recinens, Alde, in Apollinis
Arte, et conspicuum, tuæ
Laudes lætitiæ, dulceque gaudium,
Solamenque dabunt mihi,
Et mentem eripient, tristibus è malis.
Syren carminibus truces
Ceum mulcet pelagi præcipitis minas
Cantu vel fide Lesbica,
Dum lenit virides Nereidum Choros,
Et Thetis cupidè sonos
Dulces sub vitreo gurgite concipit:
Sic laudes quoties tuas
Pulsis exerior corde molestiis,
Non suspiria ab intimo
Ducam corde, dolens, ut soleo nimis:
Sed Phœbus facilis, meæ
Erranti injiciens fræna licentiæ,
Permittet pede candido
Errare, et gelidos visere liberum
Nympharum latices finet.
Tunc ipse ex adytis ritè Heliconiis
Metrum grandius eloquar,
Candoremque canam semper amabilem (17).

Edition of ALDUS MANUCIUS, 1583.

JACOBI CRITONII, SCOTI,

AD CLARISSIMUM VIRUM, PATRITIUM VENETUM
JOHANNEM DONATUM.

O D E.

DUM cupidus, tumidusque Deo tua dicere facta,
Donate, quæro, maxime;
Mens desideriiis ardet; sed lenta fatiscit
Sub corde virtus anxio:
Non tenui tentanda videns freta turbida velo,
Tardoque Pontum remige,
Compresso fervore semel sub pectore anhelio
Labore desisto gravi.
Sed nihil intonsus frustra mihi Cinthius unquam
Suasit, vel alta numina.
Ergo Deum, et doctas sæpe in mea vota camænas
Rursus invoco furens.
Tum mente evehitur multa seu candidus aura
Olor levatus evolat,
Præpetibusque petit volitans sublimia pennis,
Magnumque inane dividit.
Victorem armatæ flammis si Musa Chimæræ
Canora vatis extulit,
Sive trucidantes immania monstra, vel ipsum
Vatum marinæ Tethyos,
Aut Anchisiaden Priameiumque Hæctora grande
Carmen poetarum beat,
Si vivunt Theronque Hieronque, atque Ithæus ille,
Ob vana Clari ludicra,
Quos nunquam obscura sub nube silentia condent
Obliviosa Tartari,
Hoc opus o vestrum, Musæ est; mihi cingite frontem
Tempusque lauro Apollinari (*).
Nec deerit divos inter regeſque, Deorum
Genus, Donato gloria.

(*) *F. Apollinis.*

Prefixed to the LÆLIUS of CICERO,

A. MANUCIUS in his Dedication LAURENTIO
MASSÆ, REIP. VENETÆ SECRETARIO.

“ Me studiorum paritas, virtutis amor, communisque
“ animorum ardor, quo Critonium nostrum, divinum
“ plane juvenem, prosequimur, subigit, ut te æque
“ ac ipsum amem, et, quæ ipse de te cecinit, in pri-
“ misque ea, quæ hic subscripsi, dulcis utriusque
“ vestrum memoria ergo sæpe, ac libenter usur-
“ pem.”

“ Vale, Venetius, Id. ib. Jun. CIO. IOXXCI.”

JACOBI CRITONI, SCOTI,

AD LAURENTIUM MASSAM.

O D E.

ERRANTEM ab oris me Caledoniis
Postquam triremis per Freta Nerei
Vexit, volentem, mox remotos
Conspicere, et populos, et urbes,
Musæ per undas præcipites piæ
Vagum secutæ, numine candido
Sævis obarmatum procellis
Incolumem sine labe servant.
Nati labores seu (+) dea Cypria
Secuta, longas per pelagi vias
Hostile per ferrum, per ignes
Perque minas comes ibat omnes.
Si forte Gades impiger ultimos,
Syrtesve aut Indos visere barbaros
Vellem, nec Indos, interve Syrtis
Destituent ope contumaces.
En obstrepentis qui Oceani freta
Mutavi amicæ fluctibus Hadriæ,
Latinus hospes, jam relictis
Diis patriis gelidoque cælo
At non egenum cœtus Aonius
Abjecit, adsunt mihi faciles deæ,
Præstantque dulces una amicos
Quos eadem pia cura jungit.
Te, Massæ, clari gloria sanguinis,
Pars una summi et maxima consili,
Ardensque virtus te nitentem,
Te decorant et opes beatum.
Musis amicus cum vigeas tamen,
Musis amico Critonio fove;
O digne Divarum favore,
Quique Deum faveas amicis.

(+) Probably for
sic.

The following remarks on the two last Odes have
been communicated to us by a learned friend.
There are few such glaring errors in prosody as
those to be found in the two Odes of Crichton; a man
who allowed himself such licences might well engage
to dispute in verse.

In the Ode to Massæ *Aut.* is made short; in the very
next line there is a syllable too much at the word
interve; presently after, we have two false quantities
in one word, “*Catus Aonius* instead of *Aonius*.”

“*Sævis obarmatum periclis*” means, in Latin,
“armed with dangers.”—in the last stanza but one *te*
is repeated to fill up the verse.—In the last stanza *fove*
is placed by a Typographical error for *fave*; if not, it
is false Latin: and, supposing *fave* to be the word,
fave, favore, faveas, all in a breath, is very ineleg-
gant. Of the last line I can make nothing.—

In the Ode to Donatus, there is a line out of all
shape.

“*rursus invoco furens.*”

And afterwards one more irregular, if possible,

“*Tempusque lauro Apollinari,*”

possible *Apollinis*, so, a typographical error.

He also uses

“*Ithæus*” for “*Ithacus*.”

He says,

“*Labore desisto gravi;*”

in prose there should be “*a labore*.” *Quere*, may
a be omitted in verse?

In this Ode the epithets are merely expletives, and
are just such as an idle boy would take from the *Gradus*
ad Parnassum.

tive

tive memory, and to have excelled in a power of declamation, a fluency of speech, and a readiness of reply. His knowledge, likewise, was probably very uncommon for his years; and this, in conjunction with his other qualities, enabled him to shine in public disputation. But whether his knowledge and learning were accurate or profound may justly be questioned; and it may equally be doubted whether he would have arisen to any extraordinary degree of eminence in the literary world. It will always be reflected upon with regret, that his early and untimely death prevented this matter from being brought to the test of experiment.

It is natural, on the present occasion, to recollect the case of John Picus of Mirandula. He is celebrated for having been such a prodigy of parts and literature as scarcely ever existed; and yet his works are not understood by any means to correspond with his once splendid reputation.

A circumstance has been pointed out to us concerning Crichton, which must not be omitted. He was very much dissatisfied (as appears from an incidental passage of Manutius) [2], with Socrates's manner of disputing against the Sophists. Manutius expresses great surprize at this sentiment of his friend, but surely without reason; for Crichton was himself too like the ancient Sophists not to be fond of their character.

I am under no apprehension that any single Gentleman of Scotland will be displeased with the present article. That country, as hath already been noticed, stands not in need of falsehood to support its reputation. It produced many eminent scholars at the time in which Crichton lived; and hath continued to produce writers of the first Order. The names that adorn the present age it is needless to mention. Lord Buchan, in his Memoir, lays no stress upon any account of Crichton's literary exhibitions, excepting that which is given by Manutius; and even Manutius is blamed by his Lordship, for having had a great share, by his own extravagance of language, in occasioning the bombastic and intemperate praises which afterwards appeared of his young friend. It is to a respectable and learned Gentleman of North Britain, who doth not permit me the honour of mentioning his name, that I am indebted for several hints and communications, by which I have been greatly assisted in my endeavours to furnish a more complete and authentic Narrative of the Life of the Admirable Crichton than has hitherto been written by any of his Biographers.]

K.

[2] From an incidental passage of Manutius.] Sed quid est, per Deum, mi Jacobe Critoni, quod Socratis disputandi Modum in Sophistas laceffis, aut si non

laceffis, favè non satis approbare videris? Sanè me fateor non hoc abs te planè intellexisse (18).

CRISPE (Sir NICHOLAS), an eminent and loyal citizen in the reigns of King Charles the First and King Charles the Second, was the son of a very eminent merchant, and grandson of an Alderman of London (a). He was born in the year 1598, and bred according to the custom of those times, in a thorough knowledge of business, though heir to a great estate (b). He made a considerable addition to this by marriage; and being a man of an enterprising genius, ever active and solicitous about new inventions and discoveries, and, which very rarely happens, wonderfully industrious and diligent about things he had brought to bear, he was soon taken notice of at Court, was knighted, and became one of the Farmers of the King's Customs (c). When the trade to Guinea was under great difficulties and discouragements, he framed a project for retrieving it, which required a very large sum of money to bring it about; but his reputation was so great, that many rich Merchants willingly engaged with him in the prosecution of the design (d): and to give a good example, as well as to shew that he meant to adhere to the work that he had once taken in hand, he caused the Castle of Cormantyn upon the Gold Coast, to be erected at his own expence (e). By this judicious precaution, and by his wise and wary management afterwards, himself and his associates carried their trade to such a height, as to divide amongst them fifty thousand pounds a year (f). When the times grew dark and cloudy, and the King's affairs were in such distress he knew not how to turn himself for want of money, Sir Nicholas Crispe, and his partners in the Farming of the Customs, upon very short warning, and when their refusing it would have been esteemed a merit with the Parliament, raised him so large a sum as one hundred thousand pounds at once (g); and that with such circumstances of cheerfulness as might be truly said to double the value of this service [A]. After the war broke out, and in the midst of all the distractions with

(d) Historical Account of the English Trade to Guinea, p. 31.

(g) Lloyd's Loyal Sufferers, p. 627.

[A] As might be truly said to double the value of this service.] It was but a short time before the King was obliged to leave London, that he found himself under the necessity of applying to those four eminent citizens, who were then farmers of the customs, for no less a sum than one hundred thousand pounds, and that to be advanced immediately (1). These farmers of the customs, were Sir Nicholas Crispe, Sir Abraham Dawes, Sir John Jacob, and Sir John Wolstenholme. When the matter was proposed to Sir Nicholas, he said,

‘ it was a large sum and short warning, but that providence had made him able, and his duty made him willing to lay down his proportion, whenever his Majesty called for it.’ Sir Abraham Dawes had some relations, whose affections leaned the other way, and who besides had great expectations from him: they magnified the sum that was desired, the uncertainty of its been repaid, and the danger that it would be taken ill by Parliament, who might insist upon the like sum. ‘ Well, said Sir Abraham, this then is the worst

(b) Characters of
eminent Citizens
in London, p. 97.

which it was attended, he continued to carry on a trade to Holland, France, Spain, Italy, Norway, Moscovy, and Turkey, which produced to the King nearly one hundred thousand pounds a year, besides keeping most of the Ports open and ships in them constantly ready for his service. All the correspondence and supplies of arms which were procured by the Queen in Holland, and by the King's agents in Denmark, were consigned to his care, and by his prudence and vigilance safely landed in the North, and put into the hands of those for whom they were intended (b). In the management of so many nice and difficult affairs, he was obliged to keep up a very extensive correspondence, in doing of which he discovered a most surprising dexterity, for he hardly ever made use of cypher, but penned his letters in such a peculiar stile, as removed entirely his intentions from the apprehension of his enemies, and yet left them very intelligible unto those with whom he transacted (i). He had also an incomparable address in bringing any thing to bear that he had once contrived, to which it contributed not a little, that in matters of secrecy and danger he seldom trusted to any hands but his own, and to facilitate this, he made use of all kinds of disguises. Sometimes when he was believed to be in one place he was actually at another; letters of consequence he carried in the disguise of a porter; when he wanted intelligence he would be at the water side with a basket of flounders upon his head, and often passed between London and Oxford in the dress of a butter-woman on horseback between a pair of panniers (k). He was the principal author of that well-laid design for publishing the King's Commission of Array at London, which was defeated by another design that Mr. Waller through fear betrayed, for which Tomkins and Chaloner suffered (l), and of which we have but a very obscure account in a very celebrated history (m) [B]. It is however

formerly belong-
ing to Peter Le
Neve, Esq;

' worst that can happen, and I bless God, who has
' made me able to pay my allegiance, and to pay for
' it (2). Something of the same kind was insinuated
to Sir John Jacob, who was not only very sincerely
loyal, but a man of a warm temper and a tender
heart. ' What, said he in reply, shall I keep my
' estate, and see the King want wherewithal, to pro-
' test me in it? If it please God to bless the King,
' though I give him all I have, I shall be no loser; if
' not though I keep all I have, I shall be no savor
' (3). Sir John Wolstenholme, a stout and plain
man, advanced his proportion, as he afterwards did
larger sums, without any speeches (4). He and Sir
Nicholas Crispe lived to see the Restoration, and to
be Farmers of the Customs again under King Charles
the second, after they and the rest had paid deeply
for this proof of their loyalty.

(4) From the in-
formation of the
family.

[B] And of which we have but a very obscure ac-
count, in a very celebrated History.] We have in the
Earl of Clarendon's Work, a very large account of
Mr. Waller's design, and the methods employed by
him to bring it to bear, and of the manner in which
it was discovered. His Lordship then takes occasion
to tell us, that the Parliament, to magnify their dan-
ger, blended this with another design that was formed
in the King's quarters; and as this relates expressly
to the person of whom we are speaking, it is necessary
the reader should see it (5). From the King's com-
ing to Oxford, many citizens of good quality, who
were prosecuted or jealously looked upon, in London,
had resorted to the King, and hoping if the winter
produced not a peace, that the summer would carry
the King before that city with an army, they had
entertained some discourse of raising upon their own
stocks of money and credit, some Regiments of Foot
and Horse, and joining with some Gentlemen of
Kent, who were likewise inclined to such an under-
taking. Among these was Sir Nicholas Crispe, a
citizen of good wealth, great trade, and an active
spirited man; who had been lately prosecuted with
great severity by the House of Commons, and had
thereupon fled from London for appearing too great
a stickler in a petition for peace in the city. This
Gentleman industriously preserved a correspondence
still therein, by which he gave the King often very
useful intelligence, and assured him of a very con-
siderable party which would appear there for him,
whenever his own power should be so near as to give
them any countenance. In the end, whether invited
by his correspondents there, or trusting his own
sprightly inclinations and resolutions too much, and
concluding that all who were equally honest, would be
equally bold, he desired his Majesty ' to grant a com-
' mission to such persons whom he would nominate
' of the city of London, under the Great Seal of

(5) Clarendon's
History of the
Rebellion, p.
318.

England, in the nature of a Commission of Array,
' by virtue whereof, when the season should come,
' his party there would appear in discipline and order,
' and that this was desired by those who best knew
' what countenance and authority was requisite, and
' being trusted to them, would not be executed at all,
' or else at such a time, as his Majesty should receive
' ample fruits by it, provided it were done with se-
' crecy equal to the hazard they should run, who were
' employed in it.' The King had this exception to
it: ' The improbability that it could do good, and
that the failing might do hurt to the undertakers.'
But the promoter was a very popular man in the city,
where he had been a Commander of the Trained-
bands, till the Ordinance of the Militia removed
him, which rather improved than lessened his credit,
and he was very confident it would produce a notable
advantage to the King. However they desired it,
who were there, and would not appear without it, and
therefore the King consented to it, referring the no-
mination of all persons in the commission to him,
who he verily believed had proceeded by the instruc-
tion and advice of those that were nearest the con-
cernment; and for the secrecy of it, the King referred
the preparing and dispatch of the commission to Sir
Nicholas Crispe himself, who should acquaint no
more with it than he found requisite. So without the
privity or advice, of any Counsellor, or Minister of
State, then most trusted by his Majesty, he procured
such a Commission as he desired, (being no other than
the Commission of Array in English,) to be signed by
the King, and sealed with the Great Seal. This being
done and remaining still in his custody, the Lady
Aubigny, by a pafs, and with the consent of the
Houses, came to Oxford to transact the affairs of her
own fortune with the King, upon the death of her
husband, who was killed at Edghill; and she having
in a few days dispatched her business there, and being
ready to return, Sir Nicholas Crispe came to the
King, and besought him ' to desire that Lady, who
' had a pafs, and so could promise herself safety in
' her journey, to carry a small box (in which that
' Commission should be) with her, and to keep it in
' her own custody, until a Gentleman should call to
' her Ladyship for it, by such a token.' That token
he said, ' he could send to one of the persons trusted
' who should keep it by him, till the opportunity came
' in which it might be executed.' The King ac-
cordingly wished the Lady Aubigny to carry it with
great care and secrecy, telling her ' it much con-
' cerned his own service,' and to deliver it in such
manner, and upon such assurance, as is before-men-
tioned, which she did; and within few days after her
return to London, delivered it to a person who was
appointed to call for it. How this Commission was

very certain that there was nothing dishonourable in the design itself, so far as Sir Nicholas Crispe was concerned, or any just grounds of throwing reproach, or so much as suspicion upon him, for the discovery of it. But it seems the noble author was not entirely possessed of the facts relating to it, and either willingly or inadvertently confounds Sir Nicholas Crispe's design of executing the King's Commission of Array in London (n), which might have been done as legally as any where else, with another design, superinduced by Mr. Waller, of surprizing the Parliament, in bringing which to bear he proceeded very vigorously at first, till finding that he had engaged in a matter too big for his management, he suddenly lost his spirits, and some of the chief men in the House of Commons gaining intelligence that something was in agitation to their prejudice, May 31st, 1643 (o), they presently seized Mr. Waller and drew from him a compleat discovery, which, from the account they published, plainly distinguished these two projects [C]. By the discovery of this

(n) May's Hist. of the Parliament of England, l. iii. p. 45.

(o) Rushworth's Collections, p. iii. vol. ii. p. 324.

discovered, I could never learn, for though Mr. Waller had the honour to be admitted often to that Lady, and was believed by her to be a Gentleman of most entire affections to the King's service, and consequently might be fitly trusted with what she knew, yet her Ladyship herself not knowing what it was she carried, could not inform any body else. It is very evident from this account, that the noble Historian was not much in the secret himself; and this perhaps might incline him not to entertain a better opinion of it: for it is very apparent, that he looked upon Sir Nicholas Crispe's zeal as pushing him a little too far in this business; that he very much doubted whether that Commission, however managed, could turn to the King's advantage, because of the want of spirit in those concerned; and that after all, he could never find out how the original Commission came into the Parliament's hands; because the Lady Aubigney delivered it, as she was directed, so that it was out of her hands before it was discovered; and while it was in her hands, she could say nothing about it to Mr. Waller, because she herself did not know what it was.

[C] Which from the account they published, plainly distinguished these two projects.] We have, at the close of the last note, pointed out the difficulties under which, from his own account, it is very plain that the noble Historian laboured. It is true, that he remarks it as a point of insincerity in the Parliament, that they kneaded these two projects together, which remark of his is very well founded; but then it is very evident, that he does not himself distinguish them sufficiently, but imputes the failing of Sir Nicholas Crispe's design, to the want of spirit in those who were to manage it. To say the truth, there is no one point of so great importance, in the History of those times, that is so darkly, so imperfectly, and so confusedly related by all our general historians. Mr. Archdeacon Echard (6) takes all that he says about it, from the Earl of Clarendon, and blames the Parliament for blending these two designs, at the same time that he justifies them, by not shewing how they ought to be distinguished. This afforded occasion to another writer (7) to attack the sincerity, or at least the consistency, both of the noble Peer and of the reverend writer; and he thinks that he has fully proved his point, and justified the Parliament, by producing some passages from the dying speeches of Mr. Tomkins and Mr. Challoner. A little attention to facts and dates will clear up this whole affair, and enable us to set it in its proper light, which is certainly one of the most useful purposes to which this kind of writing can be applied. Sir Nicholas Crispe remained at London, as long as he could remain there with safety, or had any hopes of doing his Majesty service; but being removed from his command in the Trained-Bands, censured for promoting a petition for peace, and seeing Sir Richard Gurney then Lord Mayor of London, imprisoned, deposed, and punished for doing what he took to be his duty, in publishing the King's Proclamation, which tended to the execution of the Commission of Array, he retired to Oxford (8). As he had the King's ear, it is no wonder that he informed his Majesty, that there was a strong party for him in the city of London; who were desirous of acting for his service, and of levying regiments of horse and foot, at their own expences, which they were the rather induced to do, because while they remained

under the power of the Parliament, they were obliged to contribute both arms and money, against the dictates of their consciences, and to act in some measure against the side to which they wished well. But to enable them to carry their intentions into execution, and to have what they took to be a legal authority to warrant their proceedings, it was necessary they should have the King's Commission, empowering them to do what they inclined to do, as well as to appoint a General, and to grant Commissions, which was the purport of the Commission under the King's Broad Seal, dated at Oxford, March 16th, in the eighteenth year of his Majesty's reign (9). The person, they had in view, to command the men they were to raise, was Sir Hugh Pollard, a Member of Parliament, but at that time a prisoner in the Compter; and a body of the King's Forces were to advance within fifteen miles of London, to countenance their proceedings, to support them, if that was found practicable, or to join them in case they were forced to retreat (10). This Commission was directed to Sir Nicholas Crispe, Sir George Stroud, Knights; to Sir Thomas Gardiner, Knight, Recorder of London; Sir George Binion, Knight, Richard Edes, and Marmaduke Royden, Esquires; Thomas Brown, Peter Passon, Charles Gennings, Edward Charleton, Roger Abbot, Andrew King, William White, Stephen Bolton, Robert Alden, Edmund Foster, Thomas Blinkhorne, of London, Gentlemen, and to all such other persons, as according to the true intent and purport of that Commission should be nominated and appointed to be Generals, Colonels, Lieutenant-Colonels, Serjeant-Majors, or other officers of that Council of War. It is hence very evident, that this Commission was not at all intended to countenance a secret conspiracy, or to cover a dark and private plot against the Parliament, but to enable those who, in this dispute between the King and Parliament, were for the former, to declare themselves. This business was carried with so much secrecy, that it was entirely ripe for execution, and the day fixed for the rising was the last of May (11). But amongst the persons trusted in this affair was one Mr. Tomkins, an old and faithful servant of the King's, who was brother-in-law to Mr. Waller, and to him that Gentleman communicated his designs, which were of another nature, and by his assistance Mr. Waller had likewise a considerable party in the city, whom he encouraged by assuring them that most of the Lords, and many Members of the House of Commons, wished well to, and would at a proper season join with, them. Tomkins depending upon this, got his other friends to postpone their insurrection, and that very day on which it was to have been made, Mr. Waller's schemes were discovered (12). How that happened, is not material to be discussed here, but it was this that gave occasion to the seizing Mr. Tomkins, Mr. Challoner, Mr. Blinkhorne, and several others. As to the finding the Commission, though the noble Historian was ignorant of it, it was nevertheless a thing very publicly known; for Mr. Tomkins was the person who was sent for it to the Lady Aubigney, and for his own security he buried it in his cellar, as he confessed upon his examination; upon which it was immediately dug up, and thus it came into the Parliament's hands (13). Yet it does not appear that any great discoveries were made of the persons originally embarked in that design, though it was, as has been already observed, ripe for execution,

this business, Sir Nicholas Crispe found himself obliged to declare openly and plainly the course he meant to take; and having at his own expence raised a regiment of Horse for the King's service, he put himself at the head of it, and distinguished himself as remarkably in his military as he had ever done in his civil capacity. When the siege of Gloucester was resolved on, Sir Nicholas Crispe was charged with his Regiment of Horse to escort the King's Train of Artillery from Oxford, which important service he very gallantly performed (p). In the month of September following a very unlucky accident befel him, in which he was no way to blame; and though the circumstances attending it clearly justified his conduct to the world, yet the concern it gave him was such as he could not shake off so long as he lived. He happened to be quartered at Roussidge in Gloucestershire, where one Sir James Ennyon, Baronet, of Northamptonshire, and some friends of his took up a great part of the house, though none of them had any commands in the army, which however Sir Nicholas bore with the utmost patience, notwithstanding he was much incommoded by it. It fell out some time after, that certain horses belonging to those gentlemen were missing, upon which Sir James Ennyon, though he had lost none himself, came to Sir Nicholas Crispe on their behalf, insinuating that some of his troopers must have taken them, and after a long expostulation conceived in pretty rough terms, insisted that he should immediately draw out his regiment, that search might be made for them. Sir Nicholas answered him with all the mildness imaginable, offered him as full satisfaction as it was in his power to give, but excused himself from drawing out his regiment, as a thing improper and inconvenient at that juncture, for reasons which he assigned him (q). This however was so far from contenting Sir James, that he left him abruptly, and presently after sent him a challenge, accompanied with a message to this effect, that if he did not comply with it he would pistol him against the wall. Upon this Sir Nicholas Crispe taking a friend of his with him, went to the place appointed, where he found Sir James Ennyon and the person who brought him the challenge. Upon their meeting, Sir Nicholas began to use his utmost endeavours to pacify him, but to no purpose: he was determined to receive no satisfaction but by the sword (r), and they accordingly engaged, and in this duel Sir James having received a wound in the rim of the belly, languished for near two days and then expired; but first of all sent for Sir Nicholas Crispe, and in a manner becoming a Gentleman and a Christian, was sincerely reconciled to him (s). Upon the 2d of October following Sir Nicholas was brought to a Court Martial for this unfortunate affair, and upon a full examination of every thing relating to it, was most honourably acquitted [D]. He continued to serve with the same zeal and fidelity during the year 1644, and in the spring following. When a Treaty was set on foot at Uxbridge, the Parliament thought fit to mark him, as they afterwards did in the Isle of Wight Treaty, by insisting that he should be removed from his Majesty's presence (t). A few months after, they proceeded to an act of greater severity; for April 16th, 1645, they ordered his large house in Bread-street to be sold (u), which had been for many years belonging to his family. Neither was this stroke of their

tion, when Mr. Waller's plot was but in embryo. On the 30th of June, a Council of War sat at Guildhall, of which the Earl of Manchester was President, before whom Mr. Tomkins, Mr. Challoner, Mr. Blinkhorne, Mr. Abbot, and Mr. White, were tried; of whom the four first received sentence of death. Mr. Tomkins was executed over against his own house, and at his death he called the matter for which he suffered a *foolish business*, and said he was drawn into it by affection for his brother-in-law; which plainly shews, that by *foolish business*, he meant Mr. Waller's scheme. As to Mr. Challoner, he was assisted by Mr. Peters, and appears to have been a zealot in the Puritan way. He does indeed say, that he died justly, but then he was acquainted only with Mr. Waller's design. He was executed the same day, before the Royal Exchange. In his dying speech he observes, that he had been wrongfully charged. With respect to the Commission; he said, he knew nothing of the procuring it, nor of the Commission itself, till the Friday before the discovery (14). The day before these men suffered, Mr. Waller received sentence of death, at the Court-martial, though a Member of the House of Commons; was reprieved by the Earl of Essex, as General; and afterwards pardoned for his discoveries (15). Upon the whole it appears, that Sir Nicholas's design was open and honourable, and was conducted with great secrecy and success, and that it was disappointed by the breaking out of a thing quite different from it in its nature, of which Sir Nicholas Crispe had no knowledge, and in the credit or event of which therefore he could have no concern.

[D] Was most honourably acquitted.] The best justification of what has been said in the text, is to give the reader the sentence of the Court-martial, by which

he was tried, and which was conceived in the following terms (16). 'In the cause depending against Sir Nicholas Crispe, Knight, concerning the death of Sir James Ennyon, Knight, slain by him in a Duel, in September last; the Court being informed that an assize was duly set up upon the Court-house door, according to their Order, of the 28th of September last, and the assize afterwards taken down, and brought into the Court, and Proclamation being made, and no man appearing against him, yet upon examination of all the matter, and difference between them, and that the friends of the slain taking notice thereof, the Court proceeds to sentence. That although the Court doth condemn all manner of Duels, and utterly disallow them; yet in this particular case of Sir Nicholas Crispe, in consideration of the great injury he received, in his own quarters, and how much he was provoked, and challenged, the Court have thought fit to acquit him of any punishment in this Court, and doth leave, and recommend him to his Majesty's mercy, for his gracious pardon; the 2d of October, 1643.'

Signed Forth Lord Lieutenant-General and President. Dorset, Bristol, Northampton, Andover, Dunsmore, Jacob Astley, Arthur Ashton, William Brumchard, and John Byron.

By whom the whole matter was reported to the King, and Sir Nicholas brought to kiss his hand, from whom he received a gracious pardon, under the Great Seal of England, and was afterwards intrusted in high commands for his Majesty, both by land and sea.

vengeance judged a sufficient punishment for his offences, since having resolved to grant the Elector Palatine a pension of eight thousand pounds a year, they directed that two thousand should be applied out of the King's revenue, and the remainder made up out of the estates of Lord Culpeper and Sir Nicholas Crispe (w), which shews how considerable a fortune he had left at their mercy. The King's affairs were now grown desperate, when Sir Nicholas finding himself no longer in a capacity to render him any service, thought it expedient to preserve himself, with which view, in the beginning of the month of April, 1646, he embarked with Lord Culpeper and Colonel Monk, and a few days after was safely landed in France (x). As he had many rich relations who had a great interest with those in power, they interposed in his favour; and as Sir Nicholas knew very well that he could be of no service to the Royal Cause abroad, he did not look upon it as any deviation from his duty to return and live quietly at home (y). Accordingly, having submitted to a composition, he came back to London and took all the pains he could to retrieve his shattered fortunes. He was indeed a person of so clear a head, had such thorough and extensive notions of trade, and was withal of so quick an invention, that he very soon engaged again in business, with the same spirit and success as before (z). In this season of prosperity he was not unmindful of the wants of his Royal Master then in exile, but contributed cheerfully to his relief, when his affairs seemed to be in the most desperate condition (a). Upon the great change that happened after the death of Oliver Cromwell, he was instrumental in reconciling many to their duty, and so well were his principles known, and so much his influence apprehended, that when it was proposed that the Royalists in and about London should sign an instrument signifying their inclination to preserve the public tranquillity, he was called upon and very readily subscribed it (b). He was also principally concerned in bringing the city of London, in her corporate capacity, to give the encouragement that was requisite to leave General Monk without any difficulties or suspicion (c), as to the sincerity and unanimity of their inclinations. It was therefore very natural, after reading the King's Letter and Declaration in Common-Council, May 3d, 1660, to think of sending some Members of their own Body to present their duty to his Majesty. Accordingly, having appointed nine loyal Aldermen and their Recorder, the next person they thought of was Sir Nicholas Crispe (d), whom, with several other worthy persons, they added to that Committee, from an assurance that the King would receive a double satisfaction from the nature of their message, and from its being brought by several of those who had suffered deeply in his own and in his father's cause. His Majesty received these Gentlemen very graciously in their public capacities, and afterwards testified to them separately the sense he had of their past services. Upon the King's return, Sir Nicholas Crispe and Sir John Wolstenholme, though the latter was then near fourscore, were re-instated as Farmers of the Customs, which they put into very good order (e). As Sir Nicholas was now in years and somewhat infirm, he spent a great part of his time at his noble country seat near Hammersmith, where he was in some measure the Founder of the Chapel (f). He had now an opportunity of returning the obligation he had received from some of his relations, nor did he neglect it, but procured for them that indemnity from the King gratis, for which he had so dearly paid during the late confusion (g). The last testimony he received of his royal Master's favour, was his being created a Baronet, April 16th, 1665 (h), nor did he long survive it; dying February 26th the same year (i), in the sixty-seventh year of his age (k), leaving a very large estate to his grandson Sir Nicholas Crispe. His corps was interred with his ancestors in the parish Church of St. Mildred in Bread-street, and his funeral sermon was preached by his reverend and learned kinsman Mr. Crispe of Christ-church, Oxford (l). But his heart was sent to the Chapel at Hammersmith, where there is a short and plain inscription upon a cenotaph erected to his memory (m); or rather upon that monument which himself erected in grateful commemoration of King Charles I. as the inscription placed there in Sir Nicholas's life-time tells us, under which, after his decease, was placed a small white marble urn, upon a black pedestal, containing his heart. As to the character of this active, generous, and loyal person, who lived universally admired, and died generally lamented, it has been already represented from his actions, and if any thing be still wanting, it will be found in the Eulogy of this loyal subject which is inserted in the notes [E].

[E] *Inserted in the notes.* We have taken all possible care, to prevent his character from appearing a repetition of what is said, either in the text or notes, by avoiding, as much as we could, the mention of most of the particulars that are contained therein (17). Amongst the worthy citizens of those times, who, in the midst of most epidemic corruption, escaped the smallest stain of infection, was Sir Nicholas Crispe; a Gentleman descended both by father and mother, from the richest families in the city, in which they had borne the highest offices, to which, however, Sir Nicholas did not aspire. He came very young into business, and with a fortune larger than most men carry out of it. He had excellent

notions of Commerce, and he knew how to reduce them to practice, and to bring whatever he engaged in up to them. He was the most general trader of his time, but was principally concerned in the commerce to Guinea, which was immensely profitable to him and his associates. He was very remarkable for interesting himself in all domestic Arts and Manufactures, for any improvements, in which he gave extraordinary gratuities. All new inventions he also encouraged, and the art of brick-making, as since practised, was his own, conducted with incredible patience, through innumerable trials, and perfected at a very large expence. His principles were equally sound, in religion and politics, and as he

he derived these from a good education, so their effects not only appeared early, but were conspicuous through the course of his whole life. In 1630, he gave in money and materials, towards building the new Chapel at Hammer-smith, seven hundred pounds; besides being at the expence of adorning the roof, with the arms of the crown, and sprinkling it with roses, thistles, and flower de lues, all effaced in the troublesome times that ensued. Himself with his partners in the customs, having advanced one hundred thousand pounds to the King, were fined one hundred and fifty thousand to the Parliament, which was levied to the last farthing upon their estates. He loved exercise, and was remarkable for the pains he took to render his company in the London trained-bands, as well disciplined as any troops could be; and this natural inclination to military affairs, proved very serviceable to him, when he became a Commander of Horse in the Royal Army. He was basely betrayed at Cirencester, to the Earl of Essex, who surprized him with the small force he commanded, and gained thereby an advantage fatal to the King's design upon Gloucester, and which, to say the truth, had a very unhappy influence on the general state of his affairs. When Sir Nicholas was obliged to quit the kingdom, and fly into parts beyond the seas, he made his private misfortunes turn public benefits; by making such nice inquiries into agriculture, manufactures, and mechanic arts, as enabled him, upon his return, to make vast improvements in England of every kind. By his instructions, and through his

encouragement, the farmers and gardeners in Middlesex changed their old system for a better. At his expence, the banks of the river were secured, and the channel cleansed; by his communication, new inventions, as to water-mills, paper-mills, and powder-mills, came into use. After the Restoration, he caused to be erected at his own expence, in the south-east corner of the Chapel at Hammer-smith, near the pulpit, a very neat and beautiful monument of black and white marble, eight feet in length, and near two in breadth, upon which he placed a brass busto of his beloved master, with this short and plain inscription underneath. *This Effigie was erected by the especial appointment of Sir Nicholas Crispe, Knight and Baronet, as a grateful Commemoration of that glorious Martyr King Charles I. of blessed Memory.* He also directed that after his decease, his own heart, in token of undying affection to his Royal Master, should be here in a white urn entombed. He spent twenty-five thousand pounds, in building his noble seat, which attracts all eyes from the river. This house was purchased by Prince Rupert, for Mrs. Margaret Hughes, and was not long since sold to Mr. Lannoy, a scarlet dyer. It was there he spent the calm evening of his day, in honour and repose, loved by the great, prayed for by the poor, universally esteemed by all ranks of people; and being full of years and glory, with much patience and piety, resigned his soul to the mercy of his Creator, in the sixty-seventh year of his life.

C.

CROFT (HERBERT), an eminent and worthy Divine, as well as venerable prelate of the Church of England, in the seventeenth century, was descended, though not from a noble, yet of an ancient and honourable family, which had flourished in great wealth and credit in the county of Hereford (a) from before the Norman Conquest; and amongst his ancestors there were many highly distinguished by their personal reputation and merit, as well in respect to arms as arts, whose names we find recorded with honour, by authors of unquestionable veracity [A]. He was the third son of Sir Herbert Croft, of Croft-Castle, by Mary, daughter and coheirefs of Anthony Browne, of Holt-Castle in Worcestershire (b), and was born October 18th, 1603, at Great Milton near Thame in Oxfordshire, in the house of Sir William Green, his mother being then on a journey to London (c). He was very carefully educated in his junior years in Herefordshire, and having pregnant parts, joined to great steadiness of mind and unwearied application, he very early qualified himself for academical studies; and in order to his improvement in these, he was in the year 1616 sent to Oxford, and entered as is supposed of Christ-church College (d). But he had not been long there before his father unhappily joined himself with the Church of Rome, and became a Lay Brother in the Benedictine Monastery at Douay, and a most zealous advocate for the Romish religion (e) [B]. Upon his father's command he went over to him,

[A] By authors of unquestionable veracity.] We have no distinct account of the original of this family; only the tradition of the country refers the building of Croft-Castle, which has always been the seat of it, to the Saxon times, which is the more probable, since, from the earliest accounts we have, at least with any tolerable degree of certainty, this appears to have been a family of eminence in Herefordshire, and to have been even then, reputed of great antiquity (1). Thus it occurs in the famous inquisition taken in the reign of King Henry VI (2). In the reign of his successor Edward IV. Sir Richard Croft, of Croft-Castle, was High Sheriff of the county; and at the battle of Tewksbury, took Prince Edward, eldest son to Henry VI. prisoner; whom, upon proclamation, and promise of safety for his person, he produced, but had no hand whatever in the barbarous murder of that young Prince, which was committed by the King's two brothers, the Dukes of Clarence and Gloucester (3). From this Sir Richard Croft, in a direct line, descended Sir James Croft, Knight, who suffered severely in the reign of Queen Mary, upon a suspicion of his having some intercourse with Sir Thomas Wiatt, for which however he had ample amends made him by Queen Elizabeth, to whom he was Comptroller of the Household, and a Member of the Privy-Council (4). This Sir James Croft married Alice, daughter of Richard Warwick, Esq; by whom he had issue

Edward Croft, Esq; who espoused Mrs. Anne Brown, and dying in the life-time of his father, left behind him a son Herbert (5), afterwards Sir Herbert Croft, Knight, who was the father of our prelate.

[B] And a most zealous advocate for the Romish religion.] This gentleman, Sir Herbert Croft, received the honour of Knighthood from King James I. at Theobalds, in the year 1603 (6). And about fourteen years afterwards, turned Papist, and went over to Douay, where he died (7). He had four sons, and two daughters. His eldest son William, was knighted by King Charles I. in the beginning of his reign, and adhering firmly to the interests of that Prince, became a Colonel in his service, and was killed gallantly fighting against the Parliamentary forces at Stone-Castle, near Ludlow in Shropshire, June the 9th 1645 (8). His loyalty was the more extraordinary, since he had been very ill treated by the Court, on account of his opposition to the great favourite Buckingham; and therefore the King took particular notice of his fidelity, when he saw him putting himself at the head of his regiment at the battle of Edge-hill (9). James, the second son, was also a Knight, and a Colonel in the King's service, and died, as Wood assures us, in the year 1659, after suffering deeply for his loyalty (10). Robert, the fourth son, was a Colonel likewise (11), but of him we have no farther account. Elizabeth, one of the daughters of Sir Herbert

him, and after some short stay at Douay was sent to the English College of Jesuits at St. Omer's, where by the persuasion of Father Lloyd he was reconciled to the Church of Rome, and by the insinuations of the same person and some others, contrary to his father's advice in that particular, was wrought upon to enter into the order (f). Some time before his father's death, which happened about five years after his going abroad, he was by him sent back again to England, in order to manage some family affairs, and becoming happily acquainted with Dr. Thomas Morton, Bishop of Durham, he was by his arguments brought back to the Church of England, and soon after, at the desire of Dr. William Laud, he went a second time to Oxford, and was admitted a Student of Christ-church (g). Having supplicated the University November 21st, 1635, that the time he had spent in his studies in foreign nations might be reckoned as if he had continued there, and that on performing the exercise requisite by statutes for the degree of Bachelor of Divinity, he might have his Grace proposed in Congregation, this was granted; and having performed his exercise with applause, he was admitted to the said degree, and entering into Holy Orders became Minister of a Church in Gloucestershire, and Rector of Harding in Oxfordshire (h). In the spring of the year 1639, he attended the Earl of Northumberland, as his Chaplain, in his expedition into Scotland (i); and on the 1st of August following was collated to a Prebend in the Cathedral Church of Salisbury, vacant by the resignation of Mr. William Townson (k). In the year 1640, being then the King's Chaplain in Ordinary, he was admitted to his degree of Doctor of Divinity (l). He was employed by his Majesty upon various occasions, in those dangerous and difficult times, and always discharged his duty with fidelity and credit, though sometimes at the hazard of his life. The same year he became a Prebendary of the Cathedral Church of Worcester, on the death of Dr. Charlet (m). July 10th, 1641, he was installed Canon of Windsor in the place of Dr. John Pocklington, who was deprived of all his ecclesiastical preferments by Parliament (n). In the year 1644, upon the death of Dr. Jonathan Brown, he was nominated Dean of Hereford, where he married Mrs. Ann Brown, the daughter of his predecessor. He resided chiefly in this city, and discharged his duty with great punctuality and freedom, even in the worst of times, at the constant peril of his then small fortune, and sometimes to the imminent endangering of his life (o) [C]. His circumstances were but very narrow for some years, notwithstanding he had so good preferments, for the dissolution of Cathedrals following so close upon his coming to have any relation to them, he had very little if any benefit from his several promotions; but at length, in the year 1659, by the successive deaths of his elder brothers, Sir William and Sir James Croft, he became possessed of the estate of the family. The provocation he had given to the persons who were then vested with power was so great, that he did not conceive it safe, even after he was possessed of the estate, to live in his own county; and therefore chose for the place of his retreat the house of his good friend Sir Rowland Berkeley, at Cotheridge in Worcestershire, where he patiently expected the restoration of Church and State, by the restitution of his Royal Master, which happening in May, 1660, Dr. Croft, as well as other loyal subjects, came again into possession of his livings and spiritual preferments (p). Upon the death of Dr. Nicholas Monk, Lord Bishop of Hereford, he was promoted to that See December 27th, 1661, and consecrated on the 9th of February following at the Archbishop's Chapel in his Palace at Lambeth, Dr. Jasper Maine preaching the Consecration Sermon (q). He officiated likewise in his spiritual function frequently in the King's Chapel, and being very remarkable for his plain and practical preaching, and for the corresponding sanctity of his manners and purity of his life, King Charles II. offered him more than once a better See, that which he then possessed being scarcely of the value of eight hundred pounds a year, but he very conscientiously refused it. He became afterwards, about the year 1667, Dean of the Chapel Royal, which he held to 1669 (r), and then resigned it, being weary of a Court life, and finding but little good effects from his pious endeavours. He then retired to his Bishopric, where he was exceedingly beloved for his constant preaching, edifying conversation, hospitable manner of living, and most extensive charity. He gave weekly alms to sixty poor people at his Palace-gate in Hereford, whether resident there or not; and besides this he augmented several small livings, supported many decayed families, and did various other Christian acts

Herbert Croft, married Sir Thomas Cave, of Stamford in the county of Northampton (12). But whether Mary, the other daughter, was married or not, does no where appear: only this we know of her, that she was a zealous Protestant, and wrote an answer to her father's letter, persuading her to change her religion, to which Sir Herbert Croft made a warm reply (13).

[C] *And sometimes to the imminent endangering his life.* He shewed upon all occasions, as far as fell within the compass of his power, or the sphere of his employment, not only the same loyalty, but the same courageous spirit that animated the rest of his brethren. After Hereford fell into the hands of the Parliamentary forces, he not only continued to preach,

but to preach that kind of doctrine, which how much soever they needed to learn, was nevertheless what they could hardly bear to hear. Once particularly in the Cathedral, he undertook to shew them the wickedness and impiety of sacrilege, which he painted in such lively colours, as provoked them to return the argument in their own way; for they primed and presented their pieces, and asked their Governor, Colonel Birch, whether they should fire upon him in the pulpit; but being restrained by him they forbore (14); and Dr. Croft soon after very wisely quitted a place, where he was every moment in danger of suffering evil, and was thoroughly satisfied it was no longer in his power to do any good.

of the same nature, with such privacy that they were never known till after his decease. His country house being conveniently situated in the very centre of his Diocese, he spent a considerable part of his time there, where he was no less charitable in relieving the poor and visiting the sick in all the neighbouring parishes. He was very strict in his manner of admitting persons to Holy Orders, and more especially to that of the priesthood, which gained him some ill will, yet but little in comparison of what arose from another method in which however he was inflexible, and that was his refusing to admit any Prebendaries into his Cathedral Church, excepting such as lived within his Diocese, that the duty of the Church might not be neglected, and that the addition of a Prebend might be a comfortable augmentation to a small living (s). He expressed a great desire to be able to accomplish this design of his, so as to see all the dignities of his Church bestowed in this manner, and God was pleased to grant him his desire, which he hoped might prove a precedent to his successors. He was very modest and charitable in his opinions, and though a true son and a worthy father of the Church of England, yet he had a great abhorrence of whatever carried the aspect of persecution, desiring that his zeal should appear in the soundness of his doctrines and the holiness of his life, as the surest and most effectual means of supporting his authority, and drawing reverence to the Episcopal character, in which no man was more successful (t). His Sermons preached at Court, had given the world a specimen of the fervency of his spirit, and at the same time of his charity and forbearance; but when the controversy with the Nonconformists came to its greatest height, and the quarrel was so artificially widened that the Papists entertained hopes of entering through the breach, our wise and tender condescended Prelate thought it his duty to interpose, and to offer his assistance for healing these wounds in the Protestant Church. Accordingly, in the year 1675, he published his truly famous work, which though no more than a small pamphlet of four or five sheets, made a prodigious noise in the world, and was read and studied by all people of sense and learning in the kingdom (u). It is indeed a most extraordinary performance as it was then thought, and has kept its character to this day; for though it has often been re-printed it has never been common; and notwithstanding the numberless volumes written on the same subject since, it is yet looked upon as inimitable in its kind, and worthy of all the praises that have been bestowed upon it. As to the title and the circumstances attending this piece, the reader will find them at the bottom of the page, where we mention his Lordship's works [D]. We there likewise mention the answers that were given to it, and the

(s) Willis's Survey, vol. ii. p. 529. *Athen Oxon.* vol. ii. col. 865, 866.

(t) English Baronetage, vol. iv. p. 541.

(u) *Athen Oxon.* vol. i. col. 866.

[D] *Where we mention his Lordship's works.* While his Lordship continued about the Court, and was generally applauded for his pathetic manner in the pulpit, he was prevailed upon to print two of his sermons.

I. *Sermon on Isaiah Chap. XXVII. the last verse, preached before the Lords assembled in Parliament upon the Fast-day, February 4th, 1673.* London 1674. 4to.

II. *Sermon preached before the King at Whitehall, April 12, 1674. on Philippians I. and the 21st verse.* London 1675. 4to.

III. *The naked truth; or, the true state of the Primitive Church.* London 1675. 4to; again in 1680. fol. and many times since. This is that extraordinary work mentioned in the text, and the press being at that time under a licence, he found himself under the necessity of causing it to be printed privately, though he intended it for the most public use; and for that reason, addressed it to the Lords and Commons assembled in Parliament. After having observed, that notwithstanding all the laws made for establishing Uniformity in religion, Protestants remain still more divided than ever, to the great scandal as well as danger of the Church, he proceeds thus. 'Many, who were formerly very zealous for our Church, seeing these our sad divisions, and not seeing those of the Roman Church, nor their gross superstitions, which their priests conceal till they have got men fast, are easily seduced by their pretended Unity, and daily fall from us. This makes my heart to bleed, and my soul with anguish ready to expire, rather than live to see that dismal day of relapse into their manifold idolatries. Wherefore I humbled my soul before God, in fasting and prayer, begging daily the assistance of his Holy Spirit, to direct me to some healing salve for these our bleeding wounds; and therefore I have some reason to believe that what is contained in these following papers, comes from the great goodness, who never fails those who seek him in humility and sincerity, both which I am confident I have done; and this I am sure of, that no worldly designs have moved me to this, but have often

tempted me to give it over. I am also sure that there is nothing contained therein, which is contrary to the laws of the land: in this only I confess I have transgressed, in putting it forth without a licence; and for this I beg of God, and you, as Naaman did of Elisha, *In this thing the Lord and you pardon your servant*; and I hope you will say unto me, as Elisha did unto Naaman, *Go in peace.* And I farther hope, this shall not cast such a prejudice upon it, as to make you cast it by, or read it with disgust.' In this work he begins with articles of faith, and having shewn the danger of imposing more than are necessary, more especially as terms of communion, he proceeds next through all the great points, in dispute between the Church of England, and those that dissent from her; labouring throughout to prove, that Protestants differ about nothing, that can be truly stiled essential to religion, and that for the sake of Union compliances would be more becoming, as well as more effectual, than enforcing Uniformity by penalties and persecution. The whole is written with great plainness and piety, as well as with much force of argument and learning. If we consider however the temper of those times, and the warm disposition of most of the Divines in the established Church, we need not at all wonder at the fate this piece met with, which was immediately written against with much heat and zeal, not to use the harsher terms of fury and resentment. It was first attacked by Dr. Francis Turner, Master of St. John's College in Cambridge, in a piece intitled,

Animadversions on a Pamphlet, called the Naked Truth, &c. Lond. 1676. 4to. printed twice the same year. This was penned, like all the rest of the writings of the same author, in a very elegant and flowing style, which however could hardly atone for the severity and bitterness expressed in it. But even this fell very far short of the vivacity with which it was replied to, by the famous Andrew Marvel, who entitled his piece, *Mr. Smirke, or the Divine in mode*, and in which he ridicules the Animadvertiser with all that life and spirit, of which he was so much master. In this

the long and warm controversy which it occasioned; though it was certain that our Prelate meant nothing less than not to enter into a debate, and therefore very prudently declined making any reply to his opponents. What he wrote was with a view to promote charity and peace, and when he saw this was not to be done by any kind of writing whatever, he took care to add no new fuel to the fire by labouring to support principles which he had stated in such a manner as he thought must have rendered them self-evident (w). We have another pregnant instance of his sincerity and disinterestedness, in the resolution he took of resigning his Bishopric, the motives to which he expressed in a long letter to the learned Dr. Stillingfleet (x), and they are such as shew him to have been a truly primitive and pious Prelate. He thought the receiving the income of his See, as it rose in a great measure out of impropriate tythes which were withheld from parochial Ministers, was hardly justifiable. He was troubled at the power of Lay Chancellors, who under pretence of the Bishop's authority did wrong things, and likewise often hindered Bishops from redressing many disorders. It grieved him to ordain men poorly qualified, though it was but to poor livings, which men of better capacities would hardly accept. The law-suits to which

(w) See the Account of this matter at large in the notes.

(x) Miscellaneous Discourses by Stillingfleet, Bishop of Worcester. Lond. 1735, 8vo. p. 1—36.

this reply he gives the following character of the original work. 'It is a treatise, which if not for its opposer, needs no commendation, being writ with that evidence and demonstration of truth; that all sober men cannot but give their assent and consent to it unasked. It is a book of that kind, that no Christian scarce can peruse it, without wishing himself to have been the author, and almost imagining that he is so: the conceptions therein being of so eternal idea, that every man finds it to be but a copy of the original of his own mind.' Another answer came out with this title:

Lex Talionis; or, the author of the Naked Truth stripped naked, Lond. 1676. 4to. This was at first ascribed to Dr. Peter Gunning, Bishop of Chichester, afterwards of Ely; who, upon the first coming out of the Naked Truth, had preached a warm Sermon at Court against it. It was afterwards attributed to Dr. William Lloyd, Dean of Bangor, a very learned and pious Divine. But upon better grounds it was ascribed to the Reverend Mr. Philip Fell, one of the Fellows of Eton College. There was yet a third answer published to this work of our author's, which was entitled,

A modest survey of the most considerable things in a discourse lately published, entitled the Naked Truth, Lond. 1676. 4to. This Anthony Wood affirms (15) was written by Dr. Gilbert Burnet afterwards Bishop of Salisbury, upon the credit, as he says, of a Bookseller's Catalogue, at the end of another book, in which this treatise is ascribed to that Prelate.

(15) *Atb. Oxon.* vol. ii. col. 866.

It was indeed afterwards owned by his Lordship, and that upon the following occasion. The famous Dr. Hickee, in a bitter invective he wrote against Bishop Burnet (16), charged him with stealing the materials of this answer from Bishop Gunning, who intended to answer it, as has been before observed, and who upon his communicating the method he intended to pursue in his answer, was supplanted by the appearance of this of which we are speaking. In his Defence Bishop Burnet declares that the fact was absolutely false (17). That Bishop Gunning had indeed great learning, and true piety, but his ideas were so confused, and so over subtle, that he could never learn any thing from him, in all the time that he conversed with him. Thus much may serve for the answers written to this work. We will next say somewhat of the imitations and copies that it produced, and these were what follow, viz.

(16) Some Discourses upon Dr. Burnet and Dr. Tillotson, occasioned by the Funeral Sermon of the former upon the latter, p. 23.

(17) Reflections upon a pamphlet intitled, Some Discourses, &c. p. 93.

There was a second part of *Naked Truth* published in 1681, in fol. which was written by Edmund Hicckeringhill, Rector of All-Saints in Colchester; who likewise wrote a *Vindication* of it. There also appeared the same year a treatise called the *third part of Naked Truth*, which was said to be a posthumous work, written by one Dr. Benjamin Worsley. The year following appeared the *fourth part of Naked Truth; or the complaint of the Church to some of her sons for breach of their Articles, &c.* The reader may hence see the credit of this work of Bishop Croft, when so many different authors placed the hopes of procuring a reading for their performances, by giving them a likeness in their titles to his. This was still farther pursued by persons of quite different principles, as appears from the following book.

The Catholick Naked Truth; or, the Puritans Converted to Christianity. 1676. 4to. The author sets the initial letters of his name to his work, viz. W. H. which stand for William Hubert, alias Berry, who being a Minister of the Church of England, went over to the Papists, and wrote this and several other treatises for the support of that cause. To this we may add,

Naked Truth, or Truth manifesting itself in several particulars, &c. by way of question and answer, 1677. 8vo. This piece was written in support of the Quakers, for which reason Mr. Wood gave it the title of *the Quakers Naked Truth*.

As for our author, Bishop Croft, we have observed, in the text, that he wrote no reply to any of his adversaries, or vindication of his own performance, the design of which was to try, whether the legislature could be prevailed upon to take any measures for reconciling the differences subsisting among Protestants for the common benefit of all, and for securing and strengthening the Church against the endeavours of the Papists, whether by force or fraud, to subvert or undermine it. His view was unquestionably truly pious, though perhaps his scheme might not be very practicable, of which he left the determination to the proper judges, fully satisfied in his own mind, with having discharged what he took to be his duty, and not in the least affected with the warm things that were said by his adversaries, who treated his performance as if it had been intended to overturn what he seemed to maintain, by giving up the cause of the Church to those who differed from her, without reason. There were however no grounds at all for these suspicions, since our Right Reverend Author had, upon all occasions shewn an exact and punctual conformity to her Canons, and even in this work, professes himself fully satisfied with her doctrine and discipline, though he could not prevail upon himself, to be absolutely unconcerned for those who did not see the reasons for being satisfied so clearly as he did. Therefore it is exceedingly unjust, to cast any aspersions upon this Prelate, for publishing in the sincerity of his heart, what his real sentiments were, about things indifferent, more especially as it never was pretended, that he had any other view, than that of promoting a real Union, and unfeigned harmony amongst Protestants, and this at a time, when he apprehended no other method could be effectually taken for their preservation; since the measure of tolerating, which has been since found very practicable, was held to be not so at that time. Thus much seemed to be necessary in respect to a work, which however small in its bulk was then, and will be ever, esteemed of very great importance, in regard to its matter, and which, considering the station and circumstances of its author, was by judicious persons in those times allowed to be the highest mark of candour and unaffected piety that could be given, as well as of the most disinterested temper and unfeigned humility, virtues highly capable of adorning the episcopal character, and of recommending it to the veneration of all, who have a real attachment to the Doctrines of the Reformation, as they are professed and taught by the Church of England, as it is by law established.

Bishops became liable, for the sake of defending the right of their Sees, was very troublesome to him, and he was very much dissatisfied with being obliged to attend the service of Parliament, when scarcely any thing fit for a Bishop to meddle with was treated there. His scruples taking air, as well as his settled resolution of resigning, the Papists and Nonconformists made advantage of it to serve their respective purposes, and this gave him infinite disquiet; more especially when he found that some churchmen also reflected deeply upon him for inclining to retire from his Bishopric in so dangerous a season, and when his zeal and labours might be as useful, as such a deserting of his charge might give scandal to its Members, and advantage to its enemies. The answer given by Dr. Stillingfleet satisfied his conscience, and disposed him to continue his labours with the same earnestness and vigour. He saw that various attempts were making to the prejudice of the Church from different quarters, which served only to inspire him with stronger sentiments of the necessity there was, that such as had her cause at heart, and were more immediately called upon to espouse it, should do it with cheerfulness and diligence, and shew at once their courage and constancy by defending it in their words and writings, and adorning it by their lives. Full of these laudable and generous notions he resumed his former spirit, and let no opportunity slip of signalizing his attention to and affection for the Protestant cause. He contented himself, therefore, with doing all the good that was in his power, within that sphere of action which providence had allotted to him, and was more especially attentive to the preservation of his Diocese from the attempts of Popish Missionaries, in order to which he was very assiduous in the pulpit, where with great clearness he discovered, and with much solidity refuted, the errors of that religion; but as he grew in years, and yet had no prospect of less danger from that quarter in succeeding times, he thought fit to leave these discourses which had been delivered to a numerous audience, and received with very uncommon marks of satisfaction and attention, under a very endearing title to those for whose use they had been composed (y) [E]. He continued the same pious care upon particular occasions, and never failed to supply proper antidotes to every kind of spiritual poisons that were spread by the different enemies of the Protestant Religion. In the reign of King James, when the famous Declaration that was ordered to be read in Churches was transmitted to him, he thought fit to digest in writing his thoughts upon that subject, in which as he clearly expressed his willingness to give a sanction to whatever might tend to the indulgence of tender consciences; so he shewed with equal plainness the danger the Church of England would be in, in case of the repeal which was then endeavoured of the penal laws and of the test. This, which was the last employment of his pen, was shewn by a certain courtier to King James, who directed that so much of the discourse as concerned the reading of the Declaration should be published to the world, but ordered the rest to be suppressed, as being directly contrary to the views with which that Declaration had been set forth (z). At length, full of years and in the highest reputation, this venerable Prelate ended his days in his Palace at Hereford, on the 18th of May, 1691 (a), and as he lived so he died, a true member and a zealous defender of the Protestant Church, as appears from a very remarkable clause in the preamble to his will (b) [F]. He had for some years before his death

paid

[E] *For whose use they had been composed.* We shall here give the reader the title of the second edition of this work, that we may speak of it, and of the Supplement his Lordship thought fit to make at once. It runs thus:

IV. *The Legacy of the Right Reverend Father in God, Herbert, Lord Bishop of Hereford, to his Diocese; or a short determination of all controversies we have with the Papists by God's holy word. The second impression corrected, with additions, by the Author.* Lond. 1679. 4to. This piece contains an epistle to all the people within his Diocese, especially those of the city of Hereford; then comes the Preface, afterwards, three Sermons upon this text, JOHN V. 39, *Seek ye the Scriptures, for in them ye think ye have eternal life.* Lastly, a supplement to the preceding sermons, together with a tract concerning the holy Sacrament of the Lord's-Supper promised in the Preface. If we take the whole together, we may certainly pronounce it as plain, as clear, and as convincing a defence of the Protestant religion, as is to be met with in our own, or any other language. There is one passage in the Preface, that is very remarkable; which for that reason we will insert, as it tends to shew how difficult a thing it is to decide, who was the author of a certain excellent treatise, or of the other treatises that were said to be written by the same author. The passage referred to is as follows: 'I have this one thing more only to trouble the reader with. The first of my three sermons on that text, *Search the scriptures*, was preached in September 1677, and in June 1678 comes out a little Book to the same intent with that

VOL. IV.

sermon, and expressing several things in it, and in the very same manner, by what means I know not; but this I and many others know, that my sermon was preached almost a year before that book came forth, and therefore I could not have them from that author, called the same author that wrote *The whole Duty of Man*, who it seems must countenance books to the world's end. However I thought it fit to print that sermon with the other two, first because it contains several things not in that book; and secondly, the other two would be very defective without it.'

V. *A second call to a farther humiliation, being a Sermon preached at the Cathedral Church in Hereford, the 24th of November.* Lond. 1678. 4to.

VI. *A Letter written to a friend concerning Popish Idolatry.* Lond. 1679. 4to.

VII. *Some Animadversions on a book entitled, the Theory of the Earth.* Lond. 1685. 8vo.

VIII. *A short discourse concerning the reading his Majesty's late Declaration in Churches.* Lond. 1688. 4to.

[F] *As appears from a very remarkable clause, in the preamble to his Will.* The passage referred to in the text, is conceived in the following terms (18). 'I do in all humble manner most heartily thank God, that he hath been most graciously pleased, by the sight of his most holy Gospel, to recall me from the darkness of Popish Errors and gross superstitions, into which I was seduced in my younger days, and to settle me again in the true antient Catholic and Apostolic Faith professed by our Church of England, in which

paid the sum of fourteen pounds a year by way of augmentation to the small living of Yarpoll, and the sum of twelve pounds by way of addition to the living of his own parish Church at Croft, both which charities were settled and secured by his will, and lands assigned for the payment of them (c). He likewise gave the remainder of the produce of twelve hundred pounds, after these augmentations were deducted, to the relief of indigent persons, and other such purposes (d). He was buried in his Cathedral Church, where there remains a short and modest memorial of him (e) [G]. He sat almost thirty years in the Bishopric of Hereford, and in that space of time established thoroughly the regulations that he had very wisely contrived, as well for the particular benefit of the Chapter, as the general advantage of his Diocese; the people of which regarded him with the utmost veneration, and the Clergy, as they had a particular relation to him, so in the latter part of his time more especially, they loved and respected him for that diligence and care with which he promoted their welfare, by preserving all the dignities of his Church to the Clergy beneficed in his Diocese, the consequences of which at first some of them did not so fully comprehend (f). He married the daughter of his predecessor in the Deanery, Dr. Jonathan Brown, as we before observed, and by her had his only son Herbert, who was educated as a Commoner in Magdalen-college in Oxford, and becoming a person of great worth and honour, a true patriot, and a warm friend of the Protestant Religion, he was by his Majesty King Charles the II^d. created a Baronet November 18th, 1671, and was twice Knight of the Shire in the reign of King William (g). He married Elizabeth, daughter of Thomas Archer of Umberlade in the county of Warwick, Esq; (b) by whom he had Sir Archer Croft, the second Baronet, and several other children.

"I was born and baptized, and in which I joyfully die, with full assurance, by the merits of my most blessed Saviour Jesus, to enjoy eternal happiness."

[G] *Where there remains a short and modest memorial of him.* The inscription upon his grave-stone, which is within the Communion rails, runs thus (19). *Depositum Herberti Croft de Croft Episcopi Herefordensis obiit 18 die Maii A.D. 1691 ætatis suæ 88, in vita conjuncti; that is, Here are deposited the remains of Herbert Croft, of Croft, Bishop of Hereford, who died May 18th, 1691, in the 88th year of his age, in life united.* The last words allude to his lying next Dean Benson, at the bottom of whose grave-stone is this, *In morte non divisi, i. e. in death not divided*: The two grave-stones having hands engraven on them, conjoined, reaching from one to the other, to signify the lasting and uninterrupted friendship, which had subsisted between those truly pious and venerable persons in their life-times. Dr. Croft was succeeded in his Bishopric by Dr. Gilbert Ironside. C.

* * [There seems to have been some slight tincture of Enthusiasm in what Bishop Croft says, in note [D], concerning the influence of his prayers in obtaining extraordinary aid from the Divine goodness, with regard to what he wrote in his "Naked Truth." It was, however, an enthusiasm of the most generous and gentle kind, since it only led him to plead the cause of Christian Union, Forbearance, and Humanity. Our author hath added to the instances of those who have obtained great celebrity by a single composition; for his other writings, whatever may be their value, have been very little noticed by the world. Few productions were more read, or excited more attention

for a time than the "Naked Truth." Our ingenious Predecessor, Dr. Campbell, represents it as still being esteemed a work of very great importance; but this is no longer the case. It is now, I believe, known only to the few persons who love to search after curious Tracts. Notwithstanding the merit of the performance, such is the change in the circumstances, manners, and controversies of the times, that the perusal of it is not at present deemed a matter of peculiar moment. It ought to be remembered, with respect to our worthy Prelate, that it was not from any predilection for the principles or persons of the Nonconformists, that he so zealously pleaded their cause. It is related in Wodrow's History, that Dr. Croft, in a Sermon before the King, which was preached in 1660, inveighed warmly against the Presbyterians, and represented God as having defeated his Majesty at Worcester, and pursued him with a nine years exile, on account of his having taken them into his Councils (20). If this be a fact, it is evident that age and reflection added greatly to the improvement of the Bishop's Christian temper.

(20) From the information of a Correspondent.

It is rather surprizing that Dr. Gilbert Burnet should be one of the writers against the "Naked Truth." Perhaps that eminent Divine was not then so enlarged in his sentiments as he afterwards became.

The Rev. Herbert Croft, Author of the Life of Dr. Young, in Johnson's Lives of the Poets, and who is engaged in the arduous design of forming the most extensive and important Dictionary of the English language which hath ever yet been attempted, is a descendant of our Prelate.] K.

CROMWELL, or CRUMWELL (THOMAS), an eminent Statesman in the sixteenth century, and created by King Henry VIII. Earl of Essex, was the son of — Cromwell, a black-smith, at Putney near London, and in his latter days a brewer; after whose decease, his mother was married to a Sheerman in London (a). His honest parents gave him a good and strong constitution; which, accompanied with excellent endowments of mind, and an uncommon industry, raised him to that high pitch of honour to which he afterwards arrived. What education he had, was in a private School (b): and all the learning he attained to, was, (according to the standard of those times,) only reading, and writing, and a little Latin. When he grew up, having a very great inclination for travelling, he went into foreign countries; though at whose expence is not known; and, by that means, he had an opportunity of seeing the world, of gaining experience, and of learning several languages, which proved of great service to him afterwards. Coming to Antwerp, where was then a very considerable English Factory, he was by them retained to be their Clerk, or Secretary. But that office being too great a confinement to his roving and aspiring mind, he embraced an opportunity, that offered, in 1510 (c), of taking a journey

to Rome [A]. Whilst he remained in Italy, he served for some time as a Soldier under the Duke of Bourbon, and was at the sacking of Rome: and at Bologna, he assisted John Russel, Esq; afterwards Earl of Bedford, in making his escape, when he had like to be betrayed into the hands of the French; being secretly in those parts about our King's affairs (d). An instance we have, moreover, at this time, of Cromwell's great industry, and of his improving every moment; namely, that, in his journey to and from Rome, he learned by heart the New Testament, of Erasmus's translation (e). After his return from his travels, he was taken into the family and service of the famous Cardinal Wolsey; who observing his great parts and diligence, made him his Solicitor, and often employed him in business of great importance (f). Among other things, he had the chief hand, in the foundation of the two Colleges begun at Oxford and Ipswich by that magnificent Prelate, and in suppressing, in 1525, small Monasteries for the endowment of them (g). Upon his master, the Cardinal's disgrace, in 1529, he used his utmost endeavours and interest to have him restored to the King's favour (h): And when Articles of High-treason against him were sent down to the House of Commons, of which Cromwell was then a Member, he defended his master with so much wit and eloquence, that no treason could be laid to his charge: which honest beginning procured Cromwell great reputation, and made his parts and abilities to be much taken notice of (i). After the Cardinal's household came to be dissolved, Cromwell was taken into the King's service, upon the recommendation of Sir Christopher Hales, afterwards Master of the Rolls, and Sir John Russel, Knt. above-mentioned; as the fittest person to manage the disputes the King then had with the Pope: though some endeavoured to hinder his promotion, and to prejudice his Majesty against him, on account of his rude behaviour in defacing the small Monasteries that were dissolved for endowing Wolsey's Colleges. But he discovering to the King some particulars that were very acceptable to him [B], he took him into the highest degree of favour (k). Soon after, he was sent to the Convocation, then sitting, to acquaint the Clergy, that they were all fallen into a præmunire (l) [C]. In 1531 he was knighted; made Master of the King's Jewel-house, with a salary of fifty pounds *per annum*; and constituted a Privy-Counsellor (m). The next year, he was made Clerk of the Hanaper, an office of good profit and repute in Chancery; and, before the end of the same year, Chancellor of the Exchequer (n). As also, in 1534, Principal Secretary of State; and Master of the Rolls (o). About the same time, he was chosen Chancellor of the University of Cambridge; soon after which followed a general visitation of that University; whereupon the several Colleges delivered up their Charters, and other instruments, to Sir Thomas Cromwell (p). The year before, he assessed the fines laid upon those, who having forty pounds *per ann.* estate, refused to take the Order of Knighthood (q). In 1535 he was appointed Visitor-general of the Monasteries throughout England, in order for their suppression (r): and in that office, is accused of hav-

[A] He embraced an opportunity that offered — of taking a journey to Rome.] That opportunity was as follows. There being at that time a famous Gild of our Lady in the Church of St. Botolph's at Boston in Lincolnshire, to which several Popes had granted very large Indulgences, or Pardons, which were then highly valued, and held in the utmost veneration, and very much resorted to; the brethren and sisters of that Gild were very desirous of having those Indulgences renewed, and confirmed, by the then Pope Julius II. They dispatched therefore two persons to Rome with a considerable sum of money, to obtain the desired confirmation: which persons taking Antwerp in their way, became acquainted there with Thomas Cromwell; and observing that he was as perfectly qualified for procuring easily what they wanted from the Court of Rome, as they were themselves unqualified for it, they persuaded him to go along with them. Accordingly he was of very great service to them. For, being informed, that Pope Julius was a great lover of delicacies, and dainty dishes, he presented him with fine dishes of Jelly, made after the English fashion, then unknown at Rome; wherewith the Pope was so delighted, that he very readily granted Cromwell and his companions what they came about. See this whole matter related at full length, in J. Fox's *Acts and Monuments* (1).

[B] But he discovering to the King some particulars that were very acceptable to him.] He acquainted the King, that his princely authority was abused within his own realm, by the Pope and his Clergy, who being sworn to him, were afterwards dispensed from the same, and sworn a-new unto the Pope, so that he was but a half-King, and they but half his subjects in his own land; which, said he, was derogatory to his crown, and utterly prejudicial to the common Laws of his Realm: Declaring thereupon, how his Majesty

might accumulate to himself great riches, nay as much as all the Clergy in his Realm were worth, if he pleased to take the occasion now offered. The King giving ear to this, and liking right-well his advice, asked, if he could avouch that which he spake. All this he could (he said) avouch to be certain: And thereupon shewed the King the Oath which the Bishops took to the Pope at their consecration; wherein they swore: 'To help, retain, and defend against all men, the Popedom of Rome, the rules of the holy Fathers, and the regalities of St. Peter, &c (2).'

[C] He was sent to the Convocation then sitting, to acquaint the Clergy, that they were all fallen into a præmunire.] When he discovered to the King what is mentioned in the last note, his Majesty taking his ring, or signet, off his finger, sent Cromwell with it to the Convocation: who placing himself among the Bishops, began to declare to them the authority of a King, and the office of subjects, and especially the obedience of Bishops and Churchmen under public Laws; which Laws notwithstanding they had all transgressed and highly offended in derogation of the King's royal estate, falling in the Law of *Præmunire*: in that, they had not only consented to the power Legatine of Cardinal Wolsey, but also because they had all sworn to the Pope, contrary to the fealty of their sovereign Lord the King, and therefore had forfeited to the King all their goods, chattles, lands, possessions, and whatever livings they had. The Bishops hearing this, were not a little amazed, and first began to excuse and deny the fact. But after Cromwell had shewed them the very copy of the Oath they took to the Pope at their consecration, the matter was so plain, they could not deny it. And to be quit of that *Præmunire* by Act of Parliament, the two Provinces of Canterbury and York were forced to make the King a present of 118,840 pounds (3).

ing committed some illegal acts of violence [D]. However, having behaved in that affair, generally to the satisfaction of the King and his Courtiers, he was, on the 2d of July 1536, constituted Lord Keeper of the Privy-Seal, when he resigned his Mastership of the Rolls (s). On the 9th of the same month he was advanced to the dignity of a Baron of this Realm, by the title of Lord Cromwell of Okeham in Rutlandshire; and, six days after, took his place in the House of Lords (t). The Pope's Supremacy being now abolished in England, the Lord Cromwell was made, on the 18th of July, Vicar-general, and Vicegerent, over all the Spirituality, under the King [E], who was declared supreme Head of the Church (u). In that quality, his Lordship sat in the Convocation holden this year, above the Archbishops, as the King's representative (w). Being invested with such extensive Power, he made use of it for destroying Popery as far as he possibly could, and for promoting a Reformation in this Kingdom. For that purpose, he caused certain Articles to be set forth and enjoined by the King's Authority (x), differing in many essential points from the established system of the Roman-Catholic Religion [F]. Next, in September this same year, he put out some Injunctions to all Deans, Parsons, Vicars, and Curates, wherein they were ordered, to preach up the King's Supremacy; not to lay out their rhetoric in extolling Images, Relicks, Miracles, or Pilgrimages, but rather to exhort their people to serve God, and make provision for their families: to put parents and other directors of youth in mind, to teach their children the Lord's-prayer, the Creed, and the Ten Commandments in their mother-tongue: to provide a Bible in Latin and English, to be laid in the Churches, for every one to read at their pleasure; and the like (y). He likewise encouraged the translation of the Bible into English [G]; and, when it was finished, enjoined, that

Collier, as above, p. 129, 130; and Lord Herbert, as above, p. 204.

[D] *Is accused of having committed some illegal acts of violence.* For, he and his under-agents are charged with having forced several Abbies by threats and other instances of violence into a surrender: some indeed they allured thereunto, by promises, and large pensions: but most they frightened into a compliance, by encouraging the Monks, not only to accuse their Governors of the most horrid and unnatural crimes, but also to inform against each other. In particular, we are told, that the Commissioners threatened the Canons of Leicester, 'That they would charge them with adultery and buggery, unless they would submit.' And Dr. London, one of the visitors, told the Nuns of Godstow, 'That because he found them obstinate, he would dissolve the House by virtue of the King's Commission, in spite of their teeth.' The Monks of the Charter-house near London, being refractory, were committed to Newgate, where, with hard and barbarous usage, five of them died, and five more lay at the point of death, as the Commissioners signified (4).

We are farther informed, that there were some agents employed to practise on the chastity of the Nuns, and afterwards to accuse them for being guilty of incontinence (5). Several Monasteries granted Thomas Cromwell large Pensions to save them from ruin; but all in vain (6).

[E] *The Lord Cromwell was made—Vicar-general, and Vicegerent over all the Spirituality under the King.* What the design and extent of this Commission was, we best learn from the following Clause of the Act for regulating Precedency—namely, That 'for the good exercise of the said most Royal Dignity and Office (the Supremacy) his Highness hath made Thomas Lord Cromwell and Lord Privy-Seal, his Vicegerent for a good and due ministration of Justice, to be had in all Causes and Cases touching the Ecclesiastical Jurisdiction, and for the godly reformation and redress of all Heresies and abuses in the said Church (7).—Or, as it is elsewhere expressed to the same purpose—*ad exercendum, expediendum, & exerendum omnem & omnimodam Jurisdictionem, Auctoritatem, sive Potestatem Ecclesiasticam, quæ nobis tanquam Supremo Capiti Ecclesiæ Anglicanæ competit* (8).

[F] *Differing in many essential points from the established system of the Roman-Catholic Religion.* For, instead of the seven Sacraments commonly received in the Church of Rome, these Articles mention only three; namely, the Sacrament of Baptism, the Sacrament of Penance, and the Sacrament of the Altar. Then, they enjoin all Bishops and Preachers, to teach the people committed to their charge, to believe and defend all these things to be true which are comprehended in the whole body and canon of the Bible; and in the three Creeds, that of the Apostles, the Nicene, and the Atha-

nasian; without the least mention of Tradition. And, to prevent superstition and idolatry, that they should restrain the people, from 'censing, kneeling to, and worshipping Images; and teach them to do it only to God, and in his honour, though it be done before Images. Finally, Purgatory is therein declared uncertain by Scripture (9).

[G] *He likewise encouraged the translation of the Bible into English.* As it will be no small satisfaction to the Reader, to know, what translation of the Bible is hereby meant, we shall endeavour to give an exact account of it; and likewise of such translations as were made about this time. The first translation of any part of the Holy Scriptures into English, that was committed to the press, was, *The New Testament*, translated from the Greek, by William Tyndale, with the assistance of John Fry and William Roze, and printed first in 1526, in octavo. Tyndale published afterwards, in 1530, a translation of the *Five Books of Moses*; and of *Jonas*, in 1531, in octavo—(10). An English translation of the *Psalter*, done from the Latin of Martin Bucer, was also published at Argentine in 1530, by Francis Foye, 8vo. And the same book, together with *Jeremiah*, and the *Song of Moses*, were likewise published in 1534, 12mo, by George Joye, sometime Fellow of Peterhouse in Cambridge. But the first time the whole Bible appeared in English, was in the year 1535, fol. The translator and publisher was Miles Coverdale, afterwards Bishop of Exeter, who revised Tyndale's version, compared it with the originals, and supplied what had been left untranslated by Tyndale. It was printed at Zurich, and dedicated by Coverdale to King Henry VIII. And this was *the Bible*, which, by Cromwell's injunctions of September 1536, was ordered to be laid in Churches. The next year, 1537, whether it was that Archbishop Cranmer had a mind to have Tyndale's Prologues and Notes reprinted, which had been left out in Coverdale's edition, or that the Printers thought such an edition would sell well, the Bible was printed at Paris in folio, with this title, 'The Byble, which is all the Holy Scripture, in which are containyng the Olde and Newe Testament, truelye and purelye translated into English. By Thomas Matthewe.' This name of Matthewe is fictitious, the real author being John Rogers. In this Edition, from Genesis to the end of the Chronicles is Tyndale's translation: thence to the end of the Apocrypha is Coverdale's; except the book of Jonas, which is Tyndale's: as is also the whole New Testament. In 1538, a resolution was taken to revise this edition of Matthewe's, and to print it again without the Prologues or Annotations, at which great offence was pretended to be taken, as containing matters heretical, and very scandalous and defamatory. For this purpose Grafton and Whit-

(9) See Fuller, Burnet, and Collier, as quoted above.

(10) Hall says he translated also, *Joshua, Judicum, Ruth*, the books of *Kings*, the books of *Paralipomenon*, and *Nehemiah*, or the first of *Esdra*s; but, if he translated these, it does not appear they were ever printed. Hall's Chronicle, in Henry VIII. fol. 227.

that one, of the largest volume, should be provided for every parish-church, at the joint charge of the Parson and Parishioners (z). These several alterations, made by Cromwell's contrivance in the established Religion of those times; together with the dissolution of the Monasteries; and, (notwithstanding the immense riches gotten from thence,) his demanding at the same time for the King Subsidies, both from the Clergy and Laity, occasioned very great murmurs against him (a). No wonder, therefore, that the Rebels of Yorkshire demanded, among other things, that the Lord Cromwell should be brought to 'condigne ponyment, as one of the subverters of the gud lawes of the Realm (b). However, so far was the popular clamour from prejudicing, that it rather served to establish him in the King's esteem. For, in the year 1537, his Majesty constituted him Chief Justice Itinerant of all the Forests beyond Trent (c): and on the 26th of August, the same year, he was elected Knight of the Garter (d); as also Dean of the Cathedral Church of Wells (e). The year following, he obtained a grant of the Castle and Lordship of Okeham in the county of Rutland; and was also made Constable of Carebrook-castle in the Isle of Wight (f). In September, he put forth new Injunctions, directed to all Bishops and Curates (g), wherein he ordered, that a Bible of the largest volume in English, should be set up in some convenient place in every Church, where the parishioners might most commodiously resort to read the same: That the Clergy should, every Sunday and holiday, openly and plainly recite to their parishioners, twice or thrice together, one article of the Lord's Prayer, or Creed, in English, that they might learn the same by heart: That they should make, or cause to be made, in their Churches, one Sermon every quarter of a year at least, wherein they should purely and sincerely declare the very Gospel of Christ, and exhort their hearers to the works of charity, mercy, and faith; not to pilgrimages, kissing or licking of Images, &c: That they should forthwith take down all Images, to which pilgrimages or offerings were wont to be made: That in all such Benefices whereupon they were not themselves resident, they should appoint able Curates: That they, and every Parson, Vicar, or Curate, should for every Church keep one book of Register, wherein they should write the day and year of every Wedding, Christening, and Burying, within their Parish; and therein set every person's name that shall be so wedded, christened, or buried, &c [H]. Having been thus highly instrumental in promoting a Reformation, and in pulling down, for the three years past, the Monasteries in this Kingdom; he was amply rewarded by the King, in 1539, with many noble Manors and large Estates [I] that had belonged to those dissolved Houses (b). On the 17th of April, the same year, he was advanced to the dignity of Earl of Essex (i); and soon after constituted Lord

church were employed, who, because there were at that time in France better Printers and Paper than could be had here in England, procured the King's Letters to the French King for liberty to print it at Paris. Accordingly they had the Royal Licence for so doing, and had almost finished their design, when by an order of the Inquisition dated December 17, 1538, the Printers were forbidden under canonical pains to print the said English Bible, and being carried before the Inquisition, were charged with heresy. The English who were there to correct the press, and take care of the impression, were all forced to fly, and the impression, consisting of two thousand five hundred books, was seized and confiscated. But by the encouragement of the Lord Cromwell, some of the English returned to Paris, and got the presses, letters, and printing servants, and brought them over to London, where they resumed the work; which was finished and published in 1539, with this title, 'The Byble in Englyshe, that is to say the content of all the holy Scripture, bothe of the olde and newe Testament, truly translated after the veryte of the Hebrue and Greke textes by the dylygent studie of dyverse excellent learned men, expert in the forsayde tonges.' Printed by Richard Grafton and Edward Whitchurch. fol.— This was the Bible of the largest Volume, which was ordered to be set up in every Church. The Psalms in our Liturgy, are of this translation, with some few alterations (11).

[H] Every person's name that shall be so wedded, christened, or buried.] There are among them two other Injunctions, that deserve to be taken notice of. One is, 'Item, yee shall discourage no man, prively nor apertly, from the reading or hearing of the Bible, but shal expressly provoke, stirre, and exhort every person to reade the same, as that which is the very lively word of God, that every Christen person is bounden to embrace, beleve, and follow, if he looke to be saved.'—The other is as follows, 'Item, forasmuch as by a lawe established, every man is

bound to pay his tithes, no man shall, by colour of duty omitted by their Curates, deteine their Tithes, and so redub one wrong with another, or be his owne judge, but shall truly pay the same as hath ben accustomed to their parsons and curates, without any restraint or diminution (12).'

[I] He was rewarded by the King, in 1539, with many noble Manors, and large Estates.] For, on the 10th of April, he obtained a grant from the King, in fee, of the dissolved Monastery of St. Osythes in Essex, with all the houses, buildings, Church, and other appurtenances thereunto belonging: as also of the manors and Lordship of Chich St. Osythes, Barnton, Coketwyke, Wigburgh, Erles-hall, Westwyke, Howyke, Lewyke, Wyershall alias Withston-hall; Cannon, alias Can, hall; Abbots-hall, Cost, or Costed, hall; Mileend-hall, Broke-hall, and Birch-hall; with Horsfey, and all and singular their members, parcel of the possessions of the same monastery of St. Osythes. Likewise of the Manor or Lordship of Chalwedon in Essex, parcel of the possessions of the hospital of our Lady, without Bishopsgate in London: as also of the Manors and Lordships of Tollesbury, High-hall, Abbesse-hall, and Hockley, in the said County of Essex, parcel of the possessions of the Monastery of Berkyng. And of the Manor of Gorewells in Tolesbury, parcel of the possessions of the Monastery of Bileigh near Maldon in Essex. Likewise of the Manors of Wileghe, Brykelsey, Pichesaye, Mondone, and Grynstede in the same County, parcel of the possessions of the Monastery of St. John in Colchester. Also of the Manors of Dedham, and Langham in the same county, with the Manor and Lordship of Stratford in Suffolk. And also of the whole scite of the Grey Friars in Yarmouth in Norfolk, with all the houses and buildings thereunto belonging; together with a multitude of other Lands, and advowsons of Churches, which did belong to some one or other of the then suppressed Religious Houses (13).

mistaken.

High Chamberlain of England [K]. The same day he was created Earl of Essex, he procured Gregory his son to be made Baron Cromwell of Okeham (k). On the 12th of March 1540, he was put in commission with others, to sell the Abbey-Lands, at twenty years purchase (l): which was a thing he had advised the King to do, in order to stop the clamours of the people; to attach them to his interest; and to bring them to a liking of the dissolution of the Monasteries (m). Hitherto the Lord Cromwell had sailed with a prosperous gale, and was arrived to a very high degree of Honour. But an unhappy precaution he took, to secure (as he imagined) his greatness, proved his ruin; and the higher he was raised, the more sudden and dangerous was his fall. Observing that some of his most inveterate enemies, particularly Stephen Gardiner Bishop of Winchester, began to be more in favour at Court than himself, he used his utmost endeavours to procure a marriage between King Henry and Anne of Cleves: for he expected a great support from a Queen of his own making; and as her friends were all Lutherans, it tended very much, as he imagined, to bring down the Popish party at Court, and again to recover the ground, he and Cranmer had now lost (n). But, see the shortness of human policy: this very thing wherein he placed his safety, was his certain destruction. For the King, who was very nice in love-affairs, not liking the Queen, he took an invincible aversion to Cromwell the great promoter of the marriage; and soon found an opportunity to sacrifice him to his own resentment, and to the malice and revenge of his enemies. Many circumstances concurred to his ruin. He was odious to all the Nobility by reason of his low birth: hated particularly by Stephen Gardiner, and the Roman Catholics, for having been so busy in the dissolution of the Abbies: the Reformers themselves found he could not protect them from burning: and the nation in general was highly incensed against him, for his having lately demanded and obtained (o) a subsidy of four shillings in the pound from the Clergy, and one Tenth and one Fifteenth from the Laity; notwithstanding the immense sums that had lately flowed into the Treasury out of the Monasteries. King Henry considering this, and having besides divers Articles brought against him, resolved to give him up, judging him no longer necessary. Therefore he gave way to all his enemies accusations, which could not but be material; it being impossible, that any man who meddled so much in great and public affairs, should not in several instances so mistake, forget, and err, as to lay himself open to the law, when severe inquisition was made against him. The King having gotten sufficient proof against Cromwell, caused him to be arrested at the Council table, by the Duke of Norfolk, on the 10th of June, when he least suspected it. However, he obeyed, and was committed to the Tower, though judging his ruin the more certain, because the Duke was uncle to the Lady Catharine Howard, whom the King began now to be in love with (p). During his imprisonment he wrote a Letter to the King [L], to vindicate himself of the

p. 374.

[K] *He was advanced to the dignity of Earl of Essex, and soon after constituted Lord High-Chamberlain of England.* Henry Bouchier, the last Earl of Essex of that surname, broke his neck, March the 12th, 1539, by a fall from a young unruly horse; leaving only one daughter: And the 19th of the same month, died John de Vere Earl of Oxford Lord Chamberlain (14). But Cromwell's aspiring after, or even accepting of, these two great Honours, procured him a great deal of envy and ill-will. For there were several branches of the noble family of Bouchier then in being, who might think they had a right to the dignity of Earl of Essex. And, the office of Lord High-Chamberlain of England had been for many years hereditary in the ancient and honourable Family of the De Veres Earls of Oxford; so that the heirs of it could not but be highly incensed against the Lord Cromwell for robbing them of what their Ancestors had so long enjoyed.

[L] *During his imprisonment he wrote a Letter to the King.* Wherein he strenuously vindicates himself of the Crimes laid to his charge, in the following words.——— 'Wher I have bene accusyd to your Majesty of Treason. To that I say, I never in alle my lyfe thought wyllingly to do that thyng that myght or sholde displease your Majesty; and much less to do or say that thyng, which of itself is so high and abhominable offence; as God knowyth, who I doubt not shall reveale the trewth to your Highnes. Myne accusers your Grace knowyth, God forgive them: For, as I ever have had love to your honor, person, lyfe, prosperite, helthe, welthe, joy, and comfort; and also your most dere and most entyerly belovyd sone, the Prynce his Grace, and your proceedyngs; God so helpe me in this myne adversitie, and confound me yf ever I thought the contrary. What labours, paynes, and travailes I have taken, according to my most boun-

den deuty, God also knowyth. For, yf it were in my power, (as it is Godds) to make your Majesty to live ever young, and prosperous, God knowyth I wolde. If it hadde bene, or were in my power to make yow so ryche, as ye myght enrych alle men, God helpe me, as I would do hit. If it had bene, or were in my power to make your Majesty so puyssant, as alle the world sholde be compellyd to obey yow, Christ he knowyth I wolde; for so am I of alle othyr most bounde: for your Majesty hath bene the most bountifull Prynce to me, that ever was Kyng to his Subject: ye, and more like a dere Father (your Majesty not offendyd) than a Master. Such hath bene your most grave and godly counsaile towards me, at sundry tymes. In that I have offendid I ax yow mercy. Should I now, for such exceeding goodnes, benygnyte, libralite and bounty be your Traytor, nay then the greatest paynes were too little for me. Should any faccyon, or any affeccyon to any point make me a Traytor to your Magestie, then all the Devylls in Hell confound me, and the Vengeance of God light upon me, yf I sholde once have thought yt, most gracious Soverayn Lord.———

——— 'Sir, as to your Common welthe, I have after my wytte, power, and knowledge, travayled therein, having had no respect to persons, (your Magestie only except) and my dewtye to the same: but that I have don any Injustice, or Wrong, wyllfully, I trust God shall bere my wytnes, and the world not able justly to accuse me.———

——— 'Nevertheless, Sir, I have medelyd in so many matyers, under your Highnes, that I am not able to answer them all. But one thing I am well assured of; that willingly and wyttingly I have not had wille to offend your Highnes: but hard it is for me, or any other, medelyng, as I have done, to live under your Grace, and your Laws, but we must daylie

(14) Stow's *An-
nal*, p. 579.

the guilt of treason, whereof he was accused (q); and another to the same (r), concerning his marriage with Anne of Cleves [M]. But all his entreaties, and endeavours for pardon, were ineffectual. And, as he had himself servilely complied with the King's pleasure, in procuring some to be attainted without being admitted to answer for themselves, so he now fell under the same unjustifiable severity. For, whether it was that his enemies knew, if he were brought to the Bar, he would so justify himself, by producing the King's orders and warrants for what he had done (s), that it would be very difficult to condemn him: or that they blindly resolved to follow that most vile precedent (t), of condemning a person unheard; the Bill of Attainder was brought into the House of Lords the 17th of June, and read the first time, and on the 19th was read the second and third times, and sent down to the Commons. Here it did not pass with the same rapidity as it had done in the Upper House, but stuck ten days. At last, a new Bill of Attainder was sent up to the Lords, framed in the House of Commons: and they sent back at the same time the Bill, the Lords had sent to them (u). What were the grounds of his condemnation, as expressed in the Bill of Attainder, may be seen in the Note [N]. Like other falling favourites, he was deserted by most of his friends, except the worthy Archbishop Cranmer, who wrote to the King very warmly in his behalf (w) [O]. But the Duke of Norfolk, and the rest of the Popish party, prevailed; and, accordingly, in pursuance of his attainder, the Lord Crom-

'daylie offend.' — After which, he proceeds to clear himself of some particular matters laid to his charge. — And concludes the whole in these words. —

'Wryten with the quaking hand, and most sorrowful heart of your most sorrowful subject, and most humble servant and prysoner, this Saturday at your Tower of London.' (15). The King caused this Letter to be thrice read, and seemed touched with it. But the charms of Catherine Howard, and the endeavours of the Duke of Norfolk, and of the Bishop of Winchester, prevailed (16).

[M] He wrote another Letter to the King, concerning his marriage with Anne of Cleves. This he wrote by the King's express order, on purpose to declare what he knew of that marriage. Among other things, he says, That after the King had seen her at Rochester, he told him [Cromwell] 'That if he had known so much before as he then knew, she should not have come within this realm.' Saying by way of lamentation, 'what remedy?' And, the day after the marriage, his Majesty told him, 'I liked her before not well, but now I like her much worse; for, I have felt her belley, and her breasts, and thereby, as I can judge, she should be no maid; which struck me so to the heart when I felt them, that I had neither will nor courage to proceed any farther in other matters; saying, I have left her as good a maid as I found her.' This Letter concludes with these words, '— beseeching most humbly your Grace to pardon this my rude writing, and to consider that I a most woful prisoner, ready to take the death, when it shall please God and your Majesty; and yet the frail flesh inciteth me continually to call to your Grace for mercy and grace for mine offences; and thus Christ save, preserve, and keep you.

'Written at the Tower this Wednesday, the last of June, with the heavy heart, and trembling hand, of your Highness's most heavy and most miserable prisoner, and poor slave. T. C. Most gracious Prince, I cry for mercy, mercy, mercy (17).'

[N] The grounds of his condemnation are expressed in the Bill of Attainder. And are as follows. 1. That his Majesty having received Thomas Cromwell, a man of very base and low degree, into his service, advanced him to the estate of an Earl, and very much enriched him; yet the said T. Cromwell had proved the most false and corrupt Traitor and Deceiver that had been known in that reign. 2. That he had set at liberty, without the King's command or assent, several persons convicted and attainted of misprision of Treason, and others that were imprisoned for suspicion of treason. 3. That he had, for money, granted great numbers of Licences or passports, for carrying money, corn, horses, tallow, metals, &c. out of the kingdom, without any search. 4. That he had appointed, and deputed, Commissioners, in many great, urgent, and weighty affairs, without the King's knowledge or consent. 5. That he pretended to have so great a stroke about the King, as that he did not scruple boasting, 'That he was sure of him.' 6.

That being a detestable Heretic, he had secretly set forth and dispersed throughout the kingdom, great numbers of false erroneous Books, written against the Sacrament of the Altar. 7. That being the King's Vicegerent, he had, without his Majesty's assent and knowledge, licensed under the Seal of his office, several persons detested and suspected of heresies, to preach openly within this realm. 8. That he had caused Sheriffs and other persons, to set at large many Hereticks, some of whom were indicted, and others apprehended, and in custody: and being a maintainer and supporter of Heretics, had divers times terribly rebuked their accusers, and persecuted and imprisoned some of those accusers. 9. That he had great numbers of Retainers, which he had infected with Heresies. 10. That when Robert Barnes, and others of the new Preachers, were prosecuted and imprisoned, he the said Thomas Cromwell, hearing of it, said, on the last day of March, 1539, 'If the King would turn from it, yet I would not turn; And if the King did turn, and all his people, I would fight in the field in mine own person, with my sword in my hand against him and all others.' And then pulling out his dagger, and holding it up, he added, 'Or else this Dagger thrust me to the heart, if I would not die in that quarrel against them all: and I trust, if I live one year or two, it should not lie in the King's power, to resist or let it, if he would.' And then swearing a great oath, he said, 'I will do so indeed.' 11. That on the last day of January, 1539, being put in mind how others guilty of the same treason as himself (†), had been served by the Parliament, he declared, 'That if the Lords would handle him so, he would give them such a Breakfast as never was made in England, and That the proudest of them should know.' 12. Finally, That he had acquired innumerable sums of Money and Treasure, by oppression, bribery, and extortion, which made him despise the rest of the Nobility (18).

[O] Archbishop Cranmer wrote very warmly to the King in his behalf. In his Letter he hath these expressions — 'Who cannot but be sorrowful and amazed that he should be a Traitor against your Majesty? He that was so advanced by your Majesty; he whose surety was only by your Majesty; he who loved your Majesty (as I ever thought) no less than God; he who studied always to set forward whatsoever was your Majesty's will and pleasure; he that cared for no man's displeasure to serve your Majesty; he that was such a servant, in my judgment, in Wisdom, Diligence, Faithfulness, and Experience, as no Prince in this realm ever had; he that was so vigilant to preserve your Majesty from all Treasons, that few could be so secretly conceived, but he detected the same in the beginning? If the noble Princes of happy memory, R. John, Henry II. and Richard II. had had such a Counsellor about them, I suppose they should never have been so traiterously abandoned, and overthrown, as those good Princes were (19).'

well was brought to a Scaffold erected on Tower-hill, where, after having made a Speech, [P], and prayed, he was beheaded, July the 28th 1540(x). Thus fell Thomas Lord Cromwell, under the weight of his fickle and cruel Master's displeasure, King Henry VIII. after he had served him, with great faithfulness, courage, and resolution, in the most hazardous, difficult, and important Undertakings. But, it was that Prince's method, to take Favourites from the meanest of the people, who being less scrupulous than others, and wholly intent upon their own advancement, obeyed his will without reserve; and then, to content his subjects, he would readily sacrifice them to their resentment. As for the Lord Cromwell's character, tis no wonder, that, between Papists and Protestants, it should be so various. The first represent him as a crafty, cruel, ambitious, and covetous man; and a heretic (y). The latter assure us, that he was a person of great wit, and excellent parts, joined to extraordinary diligence and industry (z): that his apprehension was quick and clear; his judgment methodical and solid; his memory strong and rational; his tongue fluent and pertinent; his presence stately and obliging; his heart large and noble; his temper patient and cautious; his correspondence well laid and constant; his conversation insinuating and close: none more dexterous in finding out the designs of men and Courts; and none more reserved in keeping a secret (a). Though he was raised from the meanest condition to a high pitch of honour, he carried his greatness with wonderful temper (b); being noted in the exercise of his places of judicature, to have used much moderation, and in his greatest pomp to have taken notice of, and been thankful to mean persons of his old acquaintance (c) [Q]. In his whole behaviour, he was courteous and affable

to

[P] *After having made a Speech.* Which was as follows. 'I am come hether to dye, & not to purge myself, as maie happen some thynke that I will, for if I should so do, I wer a very wretche & miser: I am by the Law condempned to die, & thanke my Lord God that hath appoynted me this deathe, for myne offence: For sithence the tyme that I had yeres of discretion, I have lived a sinner, and offended my Lord God, for the whiche I aske hym hartely forgevenes. And it is not unknowne to many of you, that I have been a greate traveler in this worlde, and beyng but of a base degree, was called to high estate, and sithens the tyme I came thereunto, I have offended my prince, for the which I aske hym hartely forgevenes, & beseeche you all to praie to God with me, that he will forgeve me. O father forgeve me. O sonne forgeve me. O holy ghost forgeve me. O thre persons in one God forgeve me. And now I praie you that be here, to beare me record, I die in the Catholike faith, not doubtyng in any article of my faith, no nor doubtyng in any Sacrament of the Church. Many hath slandered me, & reported, that I have been a bearer of such as have mainteigned evill opinions, whiche is untrue; but I confesse, that like as God by his holy spirite doth instruct us in the truthe, so the devill is redy to seduce us, and I have been seduced: but beare me witnes that I dye in the Catholike faith of the holy Church. And I hartely desire you to praie for the Kynges grace, that he maie long live with you, in healthe and prosperitie. And after him that his sonne Prince Edward, that goodly ympe maie long reigne over you. And once again I desire you to pray for me, that so long as life remaineth in this flesh, I waver nothyng in my faith (20).'

(20) Hall's Chr. edit. 1550, in Hen. VIII. fol. ccxlii. and J. Fox, as above, p. 1190.
(21) Life and Death of Tho. Lord Cromwell, by W. Shakespeare.

(22) Acts and Monuments, ut supra, p. 1186, 1187.

[Q] *And been thankful to mean persons of his old acquaintance.* This is represented in a very agreeable and advantageous light by Shakespeare, under the character of Goodman Seely, and his wife Joan (21): but more truly by J. Fox, in the account he gives of a poor woman that kept a victualling house at Hounslow; to whom Cromwell owing forty shillings before he arrived to his greatness, he not only repayed her that sum, but also gave a yearly pension of four pounds, and a livery every year while she lived. He likewise takes notice, of his generosity to the son of a poor man, who had given him many a meal's meat in his youth (22). His *Gratitude* was also very remarkable, in the case of Francis Frescobald (or Friskibal, as Shakespeare calls him.) This Frescobald was an eminent Florentine Merchant, who handsomely relieved Cromwell in Italy, when he was reduced to the utmost distress and poverty, after the defeat of the French Army at Castiglione: he not only furnished him with clothes, and a horse, but also with sixteen ducats of gold, to carry him back to England. Fres-

cobald being afterwards reduced to poverty; Or, as Shakespeare expresses it (23),—

(23) *Ubi supra.*

Fortune that turns her too unconstant wheel,
Having turn'd his wealth and riches in the sea,

he came over to England, where he had had considerable dealings, to endeavour to recover fifteen thousand ducats, that were due to him from several persons. The Lord Cromwell finding him out, assisted him in recovering his dues, and not only repaid him the sixteen ducats above-mentioned, but also made him a present of sixteen hundred more (24). However, I cannot conclude the Lord Cromwell's character, without observing, That J. Stow the famous historian complains (25), He took a piece of ground from his father, to enlarge his own garden in Throgmorton-street, without making him any satisfaction. Whereupon he makes this pertinent remark, That the sudden rising of some men, causeth them to forget themselves.

(24) Fox, p. 1186, 1187.

(25) In his Survey of London.

M.

* * [Bishop Burnet hath made the following judicious remarks on the charges which are produced against Thomas Cromwell, in the Act of Attainder: "From these particulars the Reader will clearly see, why he was not brought to make his answer, most of them relating to orders and directions he had given, for which it is very probable he had the King's Warrant. And for the matter of Heresy, it has appeared how far the King had proceeded towards a Reformation, so that what he did that way, was most likely done by the King's order. But the King now falling from these things, it was thought they intended to stifle him by such an attainder; that he might not discover the secret orders or directions given him for his own justification. For the particulars of bribery and extortion, they, being mentioned in general expressions, seem only cast into the heap to defame him. But for those treasonable words, it was generally thought that they were a contrivance of his enemies: since it seemed a thing very extravagant, for a favourite in the height of his greatness to talk so rudely. And if he had been guilty of it, *Bedlam* was thought a fitter place for his restraint than the *Tower*. Nor was it judged likely that he having such great and watchful enemies at Court, any such discourses could have lain so long secret: or if they had come to the King's knowledge, he was not a Prince of such a temper as to have forgiven, much less employed and advanced a man after such discourses. And to think that during these fifteen months, after the words were said to have been spoken, none would have the zeal for the King, or the malice to Cromwell, as to repeat them, were things that could not be believed."

to all; a favourer in particular of the poor in their suits; and ready to relieve such as were in danger of being oppressed by their mighty adversaries (d); and so very hospitable and bountiful, that about two hundred persons were served, at the gate of his house in Throgmorton-street, London, twice every day, with bread, meat, and drink sufficient (e). He was one of the chief instruments in the Reformation of Religion; and though he could not prevent the promulgation, he stopped the execution as far as he could, of the bloody Act of the Six articles (f). But when the King's command pressed him close, he was not firm enough to hazard his own interest, or person; as was manifest, from his concurring in the condemnation and cruel burning of John Lambert (g). As he was good abroad, so was he also at home; calling upon his servants yearly, to give him an account of what they had got under him, and what they desired of him; warning them to improve their opportunities; because he said, he was too great to stand long; providing for them as carefully, as for his own son, by his purse and credit, that they might live as handsomely when he was dead, as they did when he was alive (h). In a word, we are assured, that for piety towards God, fidelity to his King, prudence in the management of affairs, gratitude to his benefactors, dutifulness, charity, and benevolence, there was not any one then superior to him in England (i).

“lieved. The formality of drawing his dagger made it the more suspected; for this was to affix an Overt Act to these words, which, in the opinion of many Lawyers, was necessary to make words treasonable (26).”

(26) Burnet's Hist. of the Reformat. of the Church of England, vol. i. p. 279.

Mr. Hume observes, that, though Cromwell was accused of Heresy and Treason, the instances of his treasonable practices are utterly improbable, or even absolutely ridiculous. “The only circumstance of his conduct,” adds our elegant Historian, “by which he merited this fate, was his being the instrument of the King's tyranny, in conducting like iniquitous Bills, in the former Session, against the Countess of Salisbury and others.” Cromwell is characterized, by Mr. Hume, as a man of prudence, industry, and ability; worthy of a better master, and of a better fate (27). Mr. Hume's censure of the conduct of the Earl of Essex, with regard to the Countess of Salisbury is extremely just. According to Rapin, the Act against the Countess of Salisbury and the Marchioness of Exeter, met with great opposition in Parliament; many objecting, that to condemn persons unheard was a breach of the most sacred and unalterable rules of justice. “But Cromwell,” continues this Historian, “having sent for the Judges to his house, asked them, whether the Parliament had power to condemn persons accused without a hearing? The Judges replied, it was a nice and dangerous question; that equity, justice, and all sorts of laws required that the accused should be heard; that however, the Parliament being the supreme Court of the Realm, from which there could be no appeal, the validity of their sentences, of what nature soever they were, could not be questioned. This was saying in other words, that the Parliament would therein commit an injustice, for which

(27) Hume's Hist. of England, vol. iv. p. 226, 227. edit. of 1763.

“they could not be called to an account. Cromwell having reported to Parliament the opinion of the Judges, the two Ladies of the Blood Royal were condemned to die, by a sentence which established a precedent the most pernicious that had ever been seen in England, and which proved fatal to its author (28).”

Mr. Gilpin, speaking of the Earl of Essex's condemnation, elegantly remarks: “Among all the arts of expediency laid up in the cabinets of Princes; the readiest is to sacrifice a Minister. The death of Cromwell was represented to the King as the best mean of composing the people. But though prudential reasons may necessitate a Prince to discard a Minister, yet guilt only, and that nicely examined, can authorize an Act of Blood. The hand of a tyrant, however, generally throws aside the balance. It is a nice machine; and requires pains and temper to adjust it. The sword is an instrument more decisive; and of easier dispatch. Henry's was always stained with blood—often with innocent blood—but never with blood more innocent than that of Essex (29).”

(28) Rapin's Hist. of England, vol. vi. p. 465. fourth edit.

Mr. Granger has mentioned six engraved heads of Thomas Cromwell. The same Biographer mentions the instance recorded by Stow, of Cromwell's rapine, in seizing on another's property. If the story be true, which, however, is contrary to his general character, it shews that he indeed forgot himself after his elevation (30).

(29) Gilpin's Life of Cranmer, p. 77.

Gregory Cromwell, the son and heir of the Earl of Essex, about five months after his father's death, was created a Baron of this Realm, by the title of Lord Cromwell; which title continued in the family, in regular descent, for several generations (31).]

K.

CROMWELL (OLIVER), who raised himself to the possession of the supreme power, under the title of Protector of the Commonwealth of England, was equally remarkable for his great military skill, by which he obtained so many victories in the field, and by his amazing abilities in the cabinet, which enabled him to overcome all opposition at home, and to strike even the most powerful nations abroad with terror. He was very honourably descended, both by his father and his mother, from families of great antiquity; and which had produced persons of distinguished reputation, both for arms and arts, as may be sufficiently proved by indisputable evidence (a) [A]. It is the more necessary to

(a) May's Hist. of the Parliament of England, B. iii. p. 79.
Wood's Fasti Oxon., vol. ii. col. 83.

[A] By indisputable evidence.] It has been so generally said, and authors have so frequently transcribed it one from another, that, if no check be given to it in time, it will pass for an unquestionable truth with posterity, not only that the name of this family was originally Williams, but that Sir Richard Cromwell, who may be esteemed the founder of it, was sister's son to Thomas Cromwell, Earl of Essex, Prime-Minister and favourite to Henry VIII. and that this Knight owed all his fortunes to the interest of that potent Nobleman (1). The story commonly told is this, that Morgan Williams, of an ancient family in Wales, married the sister of Thomas Lord Cromwell, by whom

(1) Carrington's History of the Life and Death of Oliver, Lord Protector, Lond. 1659, 12mo. p. 3.

VOL. IV.

he had a son, Richard, who took his uncle's name of Cromwell, who was afterwards knighted by King Henry, from whom he received large grants of Abbeylands in Huntingdonshire; that this Sir Richard Williams, or Cromwell, married Frances the daughter of Sir Thomas Murfyn, by whom he had a son Henry, knighted by Queen Elizabeth, in the sixth year of her reign; which Sir Henry, marrying Joan, daughter and heiress of Sir Ralph Warren, became the father of six sons, the second of which was the father of Oliver, of whom we are speaking (2). There is no doubt that this notion prevailed in the life-time of the Protector; for we find it mentioned in that history

(2) See the Life of O. Cromwell, Lord Protector, of p. 2, 3.

6 E

(b) History and Policy reviewed, in the heroic transactions of his most Serene Highness Oliver late Lord Protector, by Mr. Dawbeny.

deliver the less known points of his history copiously and clearly, because, through envy on one side, flattery on the other, and strong prejudices upon both, it may be truly said, that more of falsehood and fable is to be met with in the accounts given of him in our own (b), as well as foreign languages (c), than of almost any other person living so near our own times [B]. He was the son of Mr. Robert Cromwell, who was the second

(c) La vie d'Olivier Cromwell, par l'Abbe Raguenet. Vie d'Olivier Cromwell, par Gregorie Leti.

(3) Dugdale's Baronage, vol. ii. p. 374.

of him, which was published but a year after his death. Some points in this genealogy have been filed and brightened up by that eminent Antiquary Sir William Dugdale (3); yet he seems to be not at all clear as to the very beginning of the tale: for he takes notice that some said, the Lord Cromwell, afterwards Earl of Essex, married a Williams, but he rejecting this, without citing authority, supposes, that one Mr. Williams married Lord Cromwell's sister, and so goes on with the story, which has been already told. Dr. Goodman, Bishop of Gloucester, who turned Papist, and was very desirous of making his court to the Protector, dedicated a book to him (4); and besides, presented him with a printed paper, by which he pretended to scrape kindred with him, as being himself some way allied to Thomas, Earl of Essex: but the Protector, with some passion, told him, that Lord was not related to his family in any degree (5). If therefore he knew any thing of his own family, this story, though so very well told, cannot be true. It is much more probable, that the father of Sir Richard Cromwell, supposed to be the nephew of the Earl of Essex, was Thomas Cromwell, Esq; who was Sheriff of Cambridgeshire and Huntingdonshire in the 28th of Hen. VIII (6); and, indeed, four years afterwards we find this Sir Richard, Sheriff of the same counties (7), and from him there is no doubt at all that the genealogy runs right. It must be confessed, that this gentleman had very large grants of Abbey-lands in Huntingdonshire, to the amount, as they were then rated, of at least three thousand pounds (8) a year; but it does not thence follow, that he must be related to the Lord Cromwell. Some of these grants are as early, in point of time, as the high favour of that great Minister, but none of them so early as the year in which Thomas Cromwell, Esq; was Sheriff, which makes it probable he was his father, and that, upon his demise, Richard came to have an estate in the county (9).

(13) Catalogue of the Nobility, by R. B. p. 83.

Another reason, which inclines me to think that Sir Richard Cromwell was no near relation or dependant upon the Earl of Essex, in King Henry the VIIIth's time, is this, that he received the honour of Knighthood, and several large grants, precisely at the time of that famous Minister's fall, and others in so constant and regular a succession, that there is no appearance he was ever out of King Henry's favour (10). If it be asked, how any account can be given of the tradition, that Cromwell was some way related to the Earls of Essex, by the females, and how his family came by the name of Williams, which is unquestionably matter of record; my answer is, that a probable account may be given of both; at least, a more probable account than hitherto has been given of either. It is not at all unlikely, that in Cromwell's family, more especially after he became Protector, there might be frequent mention made, of a descent from the Earls of Essex by the females: but this must be understood not of himself, but of his wife, who was really descended from the Bouchiers, Earls of Essex (11). In reference to the surnames of Williams, it might possibly arise from the marriage of a Gentleman of that name with the heiress of Thomas Cromwell of Huntingdonshire; and Sir William Dugdale renders this more probable than his own story; for, in speaking of John Lord Williams, of Thame in Oxfordshire, he tells us, that he was of the same family with that Sir Richard Williams, who took the surname of Cromwell, and both of them the sons of John Williams, of Burfield in the county of Berks (12): now this has nothing to do with Morgan Williams the Welshman, whom he supposes to have married Lord Cromwell's sister, or with the Lady of the same country, whom Brooke (13), and other writers, assert was married to Cromwell Earl of Essex. Neither will it be any answer to say, that this is only the mistake of a Berkshire family for a family of Wales, since there is direct evidence to prove, that Cromwell was so far from being any way

allied to Williams of Berkshire, that he was an enemy to, and an oppressor of, that family (14). Upon the whole, therefore, I should rather incline to think, that this family descended by the females from Ralph Lord Cromwell, of Tattershall in Lincolnshire, the last heir-male of which was Lord High-Treasurer in the reign of King Henry the VIth; and one of his coheires married Sir William Williams (15), whose descendants might afterwards take the surname of Cromwell, in hopes of obtaining that title which Humphry Bouchier, a younger son of the then Earl of Essex, who married the eldest of the co-heires, actually had, and was killed at Barnet field, fighting on the side of King Edward the IVth (16). However, if we consider only those ancestors of Oliver Cromwell, of whom there is no dispute, we may support all that has been said in the text; for Sir Richard Cromwell was a great favourite with Henry the VIIIth, and an eminent Commander in his wars (17). His son Sir Henry was four times Sheriff of his county, and universally esteemed. As for Sir Oliver Cromwell, he gave King James the First the greatest feast that had been given to a King by a subject (18), when his Majesty passed by his house in his way to London; and, in return, King James made him a Knight of the Bath at his coronation (19). He had a very large estate, and was a very loyal worthy Gentleman; lived high, and spent a great part of his fortune, dying in the year 1654 (20), without receiving any favours from his nephew.

(22) The title of this book at large runs thus: *History and Policy reviewed, in the heroic transactions of his most Serene Highness Oliver, late Lord Protector, from his cradle to his tomb, declaring his steps to princely perfection, as they are drawn in lively parallels to the ascents of the great Patriarch Moses, in thirty degrees, to the height of honour*, by H. D. Lond. 1659. 12mo.

[B] So near our own times.] It is no great wonder, that, in the life-time of the Protector, or immediately after his decease, those, who had suffered by his power, should endeavour to avenge themselves upon his character, and even a little at the expence of truth. In this the Cavaliers, if we abate the story of Colonel Lindsey, who was eye and ear-witness to Oliver's contract with the Devil (21), were by far the most modest; for the republican party, whom he had likewise humbled, kept no measures, but vented their spleen in all the malicious and groundless fictions they could invent; On the other hand, the courtiers of those times, as in most other times, were egregious flatterers, ready to magnify him to the skies, and to say whatever they thought might please, though it lay ever so much out of the reach of truth. Amongst others, one Mr. Dawbeny undertook, in a book (22) which he dedicated to the most Serene Highness of Richard, by the Grace of God Lord Protector of England, Scotland, and Ireland, to draw a parallel, in thirty different steps, between Moses the Man of God, and Oliver late Protector. This Gentleman, foreseeing that some might object to this the profaneness of the design, apologizes for it thus, in his preface. 'Certainly, says he, this piece is not the first that has gone that way; we have very sufficient precedents, and authority too, to warrant us. Have we not seen a compleat parallel between Elias and Dr. Luther, even to the chariots of Israel and the horsemen thereof? and another betwixt his successor Elisha and Mr. Calvin, to the double portion of his spirit? and many of our modern Doctors put in scale with some of the Apostles themselves. Nor has this way of comparison been taken up only by Divines, in honour of their own function, but many parallels we find in print, between some of our late Kings, how well deserving I say not, and some of those holy Princes and Prophets of God's own people, as David, Solomon, Josiah, Hezekiah, &c. And one very express parallel between Queen Elizabeth, of famous memory, and that great Princess and Prophetess Deborah. Then why should not our late incomparable Prince and Protector stand as well placed in line parallel with that glorious Patriarch Moses?' The first step in this parallel, or, as the author calls it, the first ascent, is, as to nobility of birth; and, upon this subject, he is very clear as to Moses, and sets forth his pedigree at large from the

Scrip-

son of Sir Henry Cromwell, of Hinchinbrooke in the county of Huntingdon, Knight, by Elizabeth, daughter of Sir Richard Stuart, of the Isle of Ely, Knight (d), both of them persons of great worth, and no way inclined to disaffection, either in their civil or religious principles; but remarkable for living upon a small fortune, with much decency, and maintaining a large family handsomely by their frugal circumspection [C]. He was born

(d) Wood's *Faßt*
Oxon. vol. ii.
col. 88.

Scriptures. One would have imagined hence, that this writer should have taken care to have been perfectly master of Cromwell's pedigree: but, to shew the reader how little help is to be expected from such writers, we will transcribe what he says upon this subject. 'I cannot say his late Highness was extracted from so priestly a family, but altogether as princely, being lineally descended from the loins of our most antient British Princes, and tied in near alliances to the blood of our later Kings, as by that thrice noble family of the Barringtons, and divers others, which, to make a pedigree of, would take up more paper than we intend for our volume, and make me appear more a Herald than an Historian. Nay, indeed, should I but go about to prove his Highness's most illustrious house noble, I should commit a sacrilege in the temple of honour, and only violate his most glorious family with a more solemn infamy.' I will trespass so far on the reader's patience, as to give him another instance, from an author (23) who attempted to make court to the Protector upon this subject, in his lifetime, but in the same vague incoherent stile, promising mighty things, but performing nothing. 'He is well born, and of a noble and ancient extract; and hath so much piety of his own, such virtues and honours of his own acquisition and getting, so much splendor and glory, as might illustrate and dignify not only his progenitors, had they been never so mean and inferior, but also his posterity for all ages to come, should they be never so low and degenerated. He hath deserved highly, and merited for all that can lay claim to his blood, or any ways derive from the stock and lineage of his house, and will leave them all very great legacies, and patrimonies of glory.' On all other topics these authors write just at the same rate, so that it is not easy to discern their sense, and hardly possible to collect any facts from them, that are worth preserving: yet their conduct, bad as it is, deserves commendation rather than censure, when compared with the books that some foreigners have published. The Abbe Raguenet (24) has written a history full of faults and mistakes, in reference to the dates and circumstances of events, and more erroneous still in the remarks and the reflections, which are very often precisely the reverse of what they ought to be, and what it is very apparent they would have been, had the author had a competent knowledge of the subject upon which he was writing. This history, however, is equally authentic and exact, in comparison of that of Gregorio Leti (25), which is a master-piece in its kind; for whereas in other works there is a greater or a less mixture of error, there is in this scarcely a sprinkling of truth; and one would really conceive it an impossibility for any man, capable of putting a book so well together, to contrive that there should be so very little in it, I will not say of veracity, but of probability. He makes Oliver a prodigy of learning at the University, exceedingly admired by the Bishops, a great favourite with King James: he then sends him over to France upon his travels, gives us a particular account of his galantries, introduces him to an audience of the French King, and an intimacy with Cardinal Richlieu. Upon his return he assures us, that Cromwell was highly in the good graces of Dr. Williams, Bishop of Lincoln, to whom, he says, he was nearly related; whereas, in fact, no man saw so early into Cromwell's bad designs as that Prelate, though he had no more than a general acquaintance with him. But, what is still more extraordinary than all this, Mr. Leti lets us into the secret, that the Bishop had an amour with Cromwell's wife; though an author of the highest character has assured us, that Dr. Williams was altogether incapable of any criminal act of that kind; and in the same stile, and with the like attention to truth, he perseveres through the whole work, assuring us, that he wrote it during his

stay in England; and that he took care to be perfectly well informed as to every thing which he relates; nor does he scruple to name the Earl of Anglesey, the Earl of Aylesbury, and several other persons of distinction, for the authors of these notorious falsehoods, which no man of common understanding would venture to repeat in public company, with any shew of giving them credit; yet weak and silly as it is, this book is in some esteem abroad; writers very frequently borrow from it; and sometimes we see it cited; which shews how necessary it is to set this article in a proper light, more especially as we have not hitherto had any distinct or clear account of Cromwell's government, notwithstanding there has been so much controversy about it; for as to what we find in satires, panegyrics, or declamations, we should be careful of mistaking that for history, which ought to be composed of unquestionable facts, related with simplicity rather than ornament.

[C] *By their frugal circumspection.* The father of the Protector, Robert Cromwell, Esq; lived mostly at Huntingdon; and though a man of very good sense, and of competent learning, yet so fond of a private life, that it does not appear he ever sought or affected, farther than being a Justice of Peace, a public station (26). As to the Lady he married, she has been said, and not without some degree of truth, to have been descended from the royal House of Stuart. Her great uncle, Robert Stuart, the last Prior of the Monastery, and the first Dean of the Cathedral Church of Ely, left behind him a very full account of his family, which is still preserved (27); and thence it appears, that Sir James Stuart, being one of the retinue of James, Prince of Scotland, was detained with him in the year 1406, and afterwards chose to settle in England; and was preferred and taken into the service of Henry IV. His son Sir John Stuart was created a Knight of the Bath at the marriage of Hen. V. His son Thomas Stuart addicted himself to the sea, and, by the daughter of Sir John Hamerton, Knight, had Richard Stuart, Esq; who married the daughter of John Burleigh, Esq; by whom he had Nicholas Stuart, a very learned Lawyer of the Middle Temple, who was the father of Dr. Robert Stuart before-mentioned; as also of Simeon Stuart, Esq; (28) who married Joan, daughter and heiress of Edward Besteney, of Soham in the county of Cambridge, by whom he had eight sons, and amongst these Thomas, who was the father of Sir Richard Stuart, Knight, whose daughter Elizabeth married Robert Cromwell (29), of whom we have been speaking. It was commonly said by the Cavaliers, in the life time of the Protector, that he was a Brewer, or the son of a Brewer; nor was this altogether without foundation; for his mother, finding it hard to breed up so large a family, out of the narrow income of Mr. Cromwell's small estate, and being too well acquainted with his temper, to expect that he should take any measures for augmenting it, thought proper to engage in the brewing trade herself, which she managed with great skill and prudence (30), and without the least assistance, either from the father or the son. Out of the profits of this trade, and her own small jointure of sixty pounds a year, she provided fortunes for her daughters, sufficient to marry them into good families. The eldest was the wife of Mr. John Desborough, afterwards one of the Protector's Major-Generals; another married first Roger Whetstone, Esq; and afterwards Colonel John Jones, who was executed for being one of the King's Judges; the third espoused Colonel Valentine Walton, who died in exile; the fourth, Mrs. Robina Cromwell, married first Dr. Peter French, and afterwards Dr. John Wilkins, Bishop of Chester, a famous Preacher, and a celebrated Mathematician. It may not be amiss to add, that an aunt of Cromwell's married Francis Barrington, Esq; another aunt John Hampden, Esq; of Buckinghamshire, by whom she was mother to the fa-

born in the parish of St. John, in the ancient borough of Huntingdon, April 24th (e), or, as most writers say, April 25th, 1599 (f), in the forty-first year of the reign of Queen Elizabeth; so that what a foreign writer says, in reference to his birth upon the same day that Queen Elizabeth died (g), is like many other facts in his book, absolutely false and groundless. He was christened in the parish church, on the 29th of the same month, when his uncle Sir Oliver Cromwell, a very worthy Gentleman, gave him his name (h). It is said, that he received the first tincture of learning from the Rev. Mr. Long (i); but it is very certain, that his father, who was highly attentive to his education, put him, as soon as he was fit to go to school, under the care of Dr. Thomas Beard (k), a very learned and sensible man, who was, at that time, Master of the Free-school at Huntingdon. We have very different accounts of his behaviour, while he remained in the hands of this Gentleman: some say that he shewed very little propensity to learning, and others that he made a great proficiency in it (l). It is highly likely, that both are in the wrong; and that he was not either incorrigibly dull, or wonderfully bright, which might also be owing to the levity or fickleness of his temper; for that he was an unlucky boy, and of an uneasy and turbulent temper, is reported by authors of unsuspected veracity (m). It would be tedious, and beside the design of this work, to mention the several stories that have been told of him, even in this early part of his life, as to the proofs he gave of a very singular and extraordinary disposition; but there are two, of which the reader might justly blame us in case of omission. The first respects a kind of a vision, he saw, or fancied he saw, for which, at the desire of his relations, Dr. Beard corrected him severely (n) [D]. As to the other, it relates to a part he acted in the Comedy of LINGUA, when performed by himself, and the rest of the boys at Huntingdon School (o), which, it is pretended, filled his mind with the desire of obtaining the Crown, and affording him also what he always understood to be an omen of future success [E]. He was thence removed

mous John Hampden; a third aunt was the wife of Mr. Whaley, and the mother of Colonel Whaley, in whose custody the King was while he remained at Hampton Court. He had two other aunts, but of their marriages we have no account (31).

[D] Dr. Beard corrected him very severely.] There is reason to believe, that Oliver was not a little unlucky in his youth; for one of his panegyrist says, that he had several escapes in his infancy from fire, little less wonderful than the deliverance of Moses out of the water: but of these, as we can say nothing with certainty, we shall be silent (32). In reference to his vision, it happened, while he was a boy, in the daytime, when lying melancholy upon his bed, he thought he saw a spectre, and that it told him, that he should be the greatest man in this kingdom; which having related to his father, he was very angry, and desired his master to correct him severely; which, however, had no great effect; for he was still persuaded of the thing, and would sometimes mention it, notwithstanding his uncle Stuart told him, it was traitorous to repeat it

(33). Sir Philip Warwick tells us, that he was well acquainted with one Dr. Simcot, who was Cromwell's Physician, in the earlier part of his life, and who assured him, that he was a very fanciful man; that he had been often called to him at unreasonable hours, when he imagined himself to be dying; and that, in these black fits of the vapours, he had many whimsical notions about the cross that stood in the town of Huntingdon (34). Nor was he altogether free from these fits during the whole course of his life, not even in the highest of his prosperity; of which many instances might be given, if the bounds prescribed to this article would permit.

[E] To be an omen of future success.] We have different reports concerning the author of this play from Winstanley and Langbaine, with which it does not seem requisite to trouble the reader. It is sufficient to observe, that it was originally printed in 1607, and afterwards with this title. LINGUA, or, The combat of the tongue and the five senses for superiority, a pleasant comedy, first acted at Trinity-College in Cambridge, after at the free-school at Huntingdon (35). Winstanley says that it was at Cambridge (36), but it is more likely that it was at Huntingdon, that Cromwell performed the part of Tactus, which affected him strangely. The scheme of the play is, that Lingua gives a crown and a robe to be contested for by the senses: the two following scenes will shew what gave rise to this notion of Cromwell's being so much struck by his playing this part (37).

ACT I. SCENE V.

MENDACIO. TACTUS.

MEND. Now, chaste Diana, grant my nets to hold.

TACT. The blasting childhood of the cheerful morn
Is almost grown a youth, and overclimbs
Yonder gilt eastern hills, about which time
Gustus most earnestly importuned me

To meet him hereabouts; what cause I know not.

MEN. You shall do shortly, to your cost, I hope.

TACT. Sure, by the Sun, it should be nine o'clock!

MEN. What a Stargazer, will you ne'er look down?

TACT. Clear is the Sun, and blue the firmament:

Methinks the heavens do smile

MEN. At thy mishap,

To look so high, and stumble in a trap.

[Tactus stumbleth at the Robe and Crown.

TACT. High thoughts have slippery feet, I had well

high fall'n.

MEN. Well doth he fall, that riseth with a fall.

TACT. What's this?

MEN. O! are you taken? 'tis in vain to strive.

TACT. How now!

MEN. You'll be so entangled straight.

TACT. A Crown!

MEN. That it will be heard.

TACT. And a Robe!

MEN. To lose yourself.

TACT. A Crown and Robe!

MEN. It had been fitter for you to have found a fool's

coat, and a bauble, hey, hey.

TACT. Jupiter! Jupiter! how came this here?

MEN. O! Sir, Jupiter is making thunder, he hears

you not; here's one knows better.

TACT. 'Tis wond'rous rich: ha! but sure it is not

so: ho!

Do I not sleep, and dream of this good luck, ha?

No, I am awake, and feel it now.

Whose should it be? [He takes it up.

MEN. Set up a si quis for it.

TACT. Mercury! all's mine own; here's none to cry

half's mine.

MEN. When I am gone.

SCENE VI. A SOLILOQUY.

TACT. Tactus, thy sneezing somewhat did portend,

Was ever man so fortunate as I?

To break his shins at such a stumbling-block.

Roses and bays pack hence: this Crown and Robe

My

removed to Sidney-College in Cambridge, where he was admitted, April 23d, 1616, under the tuition of Mr. Richard Howlett (*p*), who, by a very strict attention to his pupil's disposition, quickly discovered, that he was less addicted to speculation than to action. We have very different accounts of the progress he made in his studies while a Member of the University. As for those wild stories that a foreign writer tells us, of his amazing proficiency, and which he loads with so many false authorities (*q*) and contradictory circumstances, they are not only unworthy of belief, but of notice; and, on the other hand, it is not easy to give credit to what some report, of his being scarcely master of the Latin tongue, because it is certain that he was well read in the Greek and Roman history (*r*); but whether he acquired this knowledge at Cambridge, is a point that may be doubted. His father dying he returned home, where his conduct was far enough from being regular, inasmuch that it gave his mother, who was a notable and prudent woman, much uneasiness. She was advised by some near relations to send him up to London, and to place him in Lincoln's-Inn (*s*); which she accordingly did, but without any extraordinary effects, since it served only to bring him acquainted with the vices of the town, by way of addition to those to which he had been addicted in the country. It does not at all appear, that he applied himself to the study of the Laws, which was what his friend aimed at. On the contrary, he continued to pursue his pleasures, and gave himself up to wine, women, and play, in which last, though he was sometimes fortunate, yet, taking all his expences together, they so much exceeded his income, that he quickly dissipated all that his father left him (*t*): but, after a few years spent in this manner, he saw plainly the consequences of his follies, renounced them suddenly, and began to lead a very grave and sober life (*u*) [*F*]. This, however, ought not to be imputed to his falling in with the Puritans, since it is very certain, that he remained then, and for some time after, a zealous Member of the Church of England, and entered into a close friendship with several eminent Divines, who looked upon his reformation as very extraordinary, and spoke of him as a man of strong sense and great abilities (*w*). As he was nearly related to Mr. Hampden of Buckinghamshire, to the Barringtons of Essex, and other considerable families, they interested themselves in his favour, and were very desirous of seeing him settled in the world; in order to which a marriage was proposed, which soon after took effect (*x*). The Lady he married was Elizabeth, daughter of Sir James Bouchier, of Essex, Knight, a woman of spirit and parts, and who, being descended from an ancient family, did not want a considerable portion of pride (*y*). Mr. Cromwell soon after

My brows and body circles and invests,
How gallantly it fits me; sure the slave
Measur'd my head that wrought this *Coronet*.
They lye that say complexions cannot change;
My blood's ennobled, and I am transform'd
Unto the sacred temper of a KING.
Methinks I hear my noble parasites
Stiling me *Cæsar* or great *Alexander*,
Licking my feet, and wond'ring where I got
This precious ointment; how my pace is mended,
How princely do I speak, how sharp I threaten:
Peasants, I'll curb your headstrong impudence,
And make you tremble when the lion roars:
Yea earth-bred worms: O for a looking-glass!
Poets will write whole volumes of *this change*:
Where's my attendants? Come hither, Sirrah,
quickly,
Or by the wings of *Hermes* —

[*F*] And began to lead a very grave and sober life.]

We are informed by some writers, that while he was at the University, he spent much of his time at football, cricket, and other robust exercises, for his skill and expertness in which he was very famous (38). In all probability, it might be this that led him into ill company, and drew him into extravagancies of another kind; and this will, in some measure, account for his mother's being so desirous to remove him out of the country, in hopes that, when he was at a distance from his old companions, he might lose the ill habits they had taught him. His stay at Lincoln's-Inn could not be long, nor was this season of wildness and dissipation of much continuance. It appears, by the entry in the register of Sidney-College, that he came thither when he was but two days short of seventeen (39); and it is very certain, that he was married by that time he was one-and-twenty; so that if he staid but two years at the University, and it is very probable that he did not stay there longer, there was not above two years more for his going to Lincoln's-Inn, and running through the whole circle of his follies (40). It is very likely that, after he married and settled at Huntingdon, he fell into those fits of melancholy in which Dr.

Simcot attended him; and this is the more probable, if what many writers tell us be true, that he shewed a very deep concern for the idleness of his former conduct, and readily offered to make satisfaction to every person whom he had wronged during the time that he lived so freely (41). These circumstances, and the noise made by his conversion, recommended him to the notice of the Nonconformists, who, by degrees, drew him over to their interest, so that he frequently attended Dr. Williams, then Bishop of Lincoln, afterwards Archbishop of York, and was very importunate with him to dispense with the severity of the law, when these ecclesiastical friends of his came into any trouble for their conduct (42). This gave that Prelate an opportunity of judging of him so early; and, as he was a man of very extraordinary sagacity, and singular penetration, so, at that time, he saw clearly into Mr. Cromwell's spirit, which he found to be hasty, and yet obstinate, very quick in resenting, but very slow in forgiving injuries. It does not appear on what account he differed with his uncle Sir Thomas Stuart, or at what time; but it seems he made a complaint against him at Court, in which he had not the success that he expected; and this gave him the first distaste to the King; which, however, upon certain occasions, he might dissemble, as upon some he certainly did, even before things came to extremities, of which we shall have occasion to take notice; but he never forgot this supposed injury, notwithstanding he afterwards, by his mother's interest, compromised matters with that uncle. We have likewise an account of an odd exploit of his at Sir Oliver Cromwell's, which drew upon him very rough usage, and which, with other things, so thoroughly disoblighd that old Knight (43), as to deprive him entirely of his good opinion. These are matters that might perhaps be better cleared up, if any one should take the trouble of writing his history at large, with that industry and care that it deserves; but, considering the nature of our design, it may probably be thought, that we have bestowed too much notice upon particulars of so trivial a nature already, and therefore we will forbear them for the future.

returned to his own country, and settled at Huntingdon till the death of his uncle Sir Tho. Stuart, who left him an estate of between four and five hundred pounds a year, which induced him to remove into the Isle of Ely (z). It was about this time that he began to fall off from the Church, to converse mostly with those who were then stiled Puritans, and by degrees to affect their notions, as indeed he did every thing which he affected at all, with great warmth and vehemence. He was elected a Member of the third Parliament in the reign of Charles I. which met January 20th, 1628 (a), and was of the Committee for religion, where he distinguished himself by his zeal against Popery, and by complaining of Dr. Neile, then Bishop of Winchester's licensing books which had a very dangerous tendency (b). After the dissolution of that Parliament, he returned again into the country, where he continued to express much concern for religion, to frequent silenced ministers, and to invite them often to lectures and sermons at his house; by which he again brought his affairs into a very indifferent situation (c); so that he judged it requisite to try what industry might do towards repairing these breaches, which led him to take a farm at St. Ives, and this he kept about five years; though, instead of repairing, it helped to run out the rest of his fortune; and had totally undone him, if he had not thrown it up (d). Some have charged this upon his enthusiasm, and being religious over-much, which induced him to have long prayers with his family in a morning, and again in the afternoon, at which his ploughmen, and all his country servants, always attended (e). But granting this to be true, it was a proof of his sincerity, of which indeed he gave many: amongst others, he gave public notice, that he was ready to make restitution to any from whom he had won money at play; and he actually did return thirty pounds to Mr. Calton, from whom he won it several years before (f). His disappointments being such as allowed him very little reason to hope he should either make any great figure in his country, or secure a reasonable provision for his children, great part of his uncle's estate being now gone, he revived, in his own mind, a scheme, which his bad circumstances first put into his head while at Lincoln's-Inn, of going over to New England (g). This was in 1637, and this design, it is thought, he would certainly have executed, if he had not been hindered by the issuing out a proclamation for restraining such embarkations (h). The next year he had less time upon his hands; for the Earl of Bedford, and some other persons of high rank, who had large estates in the fen country, were very desirous of seeing it better drained; and though one project of this sort had failed, they thought it expedient nevertheless to set on foot another, countenanced by the royal authority, and which, without doubt, was intended for the public benefit; but for all that it was violently opposed, under pretence, that it was injurious to private property, though in reality it gave much more to private people than it took away, and made those rents safe and secure, which before were very precarious (i). At the head of this opposition Mr. Oliver Cromwell placed himself, and pushed things with great spirit and vigour, as he did every thing in which he once embarked, so that he gave the great men concerned in this affair abundance of trouble (k) [G]. It was the vigour and vigilance which he shewed upon this occasion, that first rendered him conspicuous and considerable, and gave occasion to his friend and relation Mr. Hampden to recommend him afterwards to his friends in Parliament, as a person capable of contriving and conducting great things (l). But for all this, he was not very successful in the matter of which we have been speaking; and, as his private affairs were still declining, he was in a very necessitous condition at the approach of the Long Parliament (m). In these circumstances one might wonder how he should form a design, at a time when elections were considered as things of the utmost consequence, of getting himself chosen, more especially for the town of Cambridge, where he was so far from having any interest, that in reality he was not so much as known, and if he had been known would never have been elected. The whole of that affair was owing

[G] So that he gave the great men concerned in this affair abundance of trouble.] The Earl of Bedford living at that time, was one of the wealthiest, and also one of the wisest, men in England: he had a very large estate in the fen country (44), and a very great influence over most of those who had great estates in that neighbourhood: it was no wonder therefore that he patronized a scheme for improving the great work of draining, which, in a country where there are millions of acres depending upon it, must be always a point of very high importance. He found himself however, after great pains taken, and much money laid out, obliged to abandon one very probable and profitable project, for want of the power requisite to carry it into execution (45). It was this which induced that noble Peer, and those who concurred with him, in so great and good a design, to apply themselves to the Crown for that assistance, which was requisite to perfect the great scheme they had formed, and for the carrying on of which they desired, that such commissions of sewers might from time to time be issued, as might prove necessary: they likewise, for the honour of the

business, though fit to stile it a royal undertaking, and, as was highly reasonable, settled a share of the profits upon the Crown (46). But, as it was impossible to manage an affair of this nature, without levying a kind of land-tax upon those who were to have the benefit of it, and providing that no man's private property should impede the carrying on the works that were requisite, this furnished a subject for clamour, not only against the undertakers, but against the King; which, however groundless and unreasonable, was carried to a very great height; and, in a meeting held at Huntingdon in 1638, Mr. Cromwell, who had a considerable interest in those parts, was very active, and by his vigilance, and plausible speeches, created a very formidable opposition (47); which, though it did not absolutely subvert, it greatly hindered and retarded the progress of the works; for which these obstinate people were severely punished in 1657, when, upon the melting of the snows, the banks gave way, and a considerable quantity of land was, at least for the present, lost, and a large number of cattle destroyed (48).

to an accidental intrigue, in which himself had at first no hand; but, from the time he meddled with it, he conducted every thing with such sagacity and dexterity, that, by the help of the party, who first thought of him as a proper instrument for carrying on the cause, he was, to the wonder of others, and perhaps, in some measure, of his own, chosen by a great majority (n). This, which was the beginning of all his greatness, ought to be considered as a point of consequence, and therefore we have taken some pains to set it in a proper light [H]. When he came into Parliament he shewed himself very active, was very constant in his attendance, and a frequent speaker; though he did not, at that time, discover any of the great qualities which afterwards appeared in him, and which seemed to be called out as occasion required; for had he at first been esteemed so considerable a person in point of abilities as he was afterwards found, those of his own party would have probably been jealous of him, and sought his destruction; but he had an art of concealing his faculties, so that he seemed always fit for the station in which he was, and for that only (o). He affected not only plainness but carelessness in dress, was very uniform in his conduct, spoke warmly and roundly, but without either art or elocution. He was very forward in censuring what were called grievances, both in Church and State, though he had not framed to himself any plan of reformation. This he frankly acknowledged with respect to ecclesiastical affairs, when pressed by Sir Thomas Chicheley and Mr. Warwick to declare his sentiments upon that subject; *I can tell*, said Mr. Cromwell, *what I would not have, though I cannot tell what I would have* (p). He was very zealous in promoting the Remonstrance which was carried on the 14th of November 1641, and which in reality laid the basis of the civil war. He shewed himself more sanguine in his expectations upon that head, than the rest of his party; for he thought they were so strong, so steady, and so well connected; and that those who were for the King were some of them so timorous, others so careless, and not a few so indolent, that it would have been carried almost without a debate; nor had he any regard to the Lord Falkland's opinion, who thought the quite contrary. But when, after a debate which lasted all day and all night, it was at length carried by so small a majority as nine, and that rather by discipline than argument, (for weariness and fatigue were really the parents of that dear bought victory), he could not forbear speaking his mind freely (q). In short, he told Lord Falkland, that he would take his word another time; and, that if the Remonstrance had not been carried, he was resolved to have converted the small remains of his estate into ready money the next day, and to have taken the first occasion of quitting the kingdom; and this he affirmed was the sentiment also of some of the most considerable men of the party (r). The noble Historian had reason therefore to say, upon this occasion, *that this poor nation was very near its deliverance*; near it indeed! for if zeal for the Church, or duty to the King, could have kept ten more of those, who made such strong professions of both, from their suppers and their beds for a few hours, all the consequences

(p) Life of O. Cromwell, Lord Protector, p. 5.

(q) Echard's History of England, p. 514, 515.

[H] *And therefore we have taken some pains to set it in a proper light.* One reason why Mr. Cromwell quitted Huntingdon was, a dispute he had with Mr. Bernard, upon his becoming Recorder, about prece-dency, a point in which he was very nice (49). After he came to Ely, he resorted entirely to Nonconformist meetings, where he quickly distinguished himself by his gifts, as they stiled them in those days, in preach-ing, praying, and expounding (50). At one of these meetings he met with Richard Tims, a tradesman at Cambridge, who rode every Sunday to Ely for the sake of pure doctrine, and captivated his heart entirely. This man hearing that a Parliament was to be called, and being himself one of the Common council, took it into his head, that there could not be a fitter man to be their Burgees than Mr. Cromwell; and, with this notion in his brain, he went to Mr. Wildbore, a Draper in the town, who was Cromwell's relation, who agreed with him exactly as to the fitness of the person, but told him the thing was impossible, as he was not a freeman (51). Tims, not satisfied with that, addressed himself next to Mr. Evett, a Tallow-chandler, who was also a Puritan. He too liked the thought, but, as he was not a freeman, pronounced the design impracticable: however, Tims was hardly got out of his house before he sent for him back, to give him a whisper, that the Mayor had a freedom to bestow; and that one Kitchingman, an Attorney, who had married his wife's sister, and was of their party, had a great influence over him; and therefore he advised him to move Mr. Kitchingman in it, who was to use his interest with the Mayor, under colour that Mr. Cromwell was a Gentleman of fortune, and had a mind to come and live in the town, then but in a poor condition, but with a strict charge to hide the true

design, Alderman French, who was then Mayor, being a declared royalist. When they came to make this application to him, Mr. French said he was sorry, but that in reality they came too late, for he had promised his freedom to the King's Fisherman. Mr. Kitchingman easily removed this objection, by under-taking that the town should confer a freedom upon the person he mentioned; and so, at the next Court-day, the Mayor declared his intention to bestow his freedom upon a very worthy Gentleman of the Isle of Ely, one Mr. Cromwell, who, being apprized of his friend's industry, came to town over night, and took up his lodgings at Mr. Almond's, a Grocer (52). Thither the mace was sent for him, and he came into Court dressed in scarlet richly laced with gold, and, having provided a pretty parcel of strong claret and sweetmeats, they were so well circulated amongst the corporation, that they unanimously declared, Mr. Mayor's freeman was a very civil worthy Gentleman. When the election came on, the Mayor discovered his mistake, but it was then too late, for the party amongst the Burgees was strong enough to chuse him (53), and, at the next election in the ensuing year, he threw out Mr. Meawtis, who had served the Corporation in every Parliament in that reign (54). After the Corporation Act passed in King Charles the Second's time, this transaction being called to mind, occasioned the displacing Alderman French, who was then Mayor also, which affected him so strongly, that he was taken sick upon it, and died in three days through downright grief; and Mr. Richard Tims, who, by this time, was become an Alderman, was degraded, for the pains he took in this transaction; which circumstances occasioned the preserving so particular an account of it to posterity (55).

of that fatal night had been prevented. This success in the Senate so much strengthened the courage of the victors, gave so much reputation to their cause, drew over so many that were wavering, and dispirited such as adhered to the King, so strangely, that, from this time, all things went to their wish in the House of Commons; and Mr. Cromwell's firmness recommended him so effectually to Mr. Hampden, Mr. Pym, and the rest of the leading men on that side, that they took him into all their councils; which gave him, in a very short space, so clear an insight into things, and so perfect a knowledge of men, that he was not only able to manage when they were removed, but even to contrive the removal of several, who, at this juncture, looked upon themselves, and that justly too, as very much his superiors (s). For to say the truth, the circumstances of his fortune, interests, and connections, compared with many who were then members, and of the same party, would have made it very improbable, in the sense of the most competent judges, that he should ever have opened a passage to such greatness, as afterwards, in spite of these very men, he obtained (t). As soon as the Parliament formed any schemes of raising forces for their service, which was in the very beginning of the year 1642, Mr. Cromwell shewed his activity, by going immediately to Cambridge, where, in a short space of time, and with very little trouble, he raised a very good troop of horse, which he commanded by virtue of a Commission from the Earl of Essex, acting, in other respects, under the Lord Grey of Wark, who had the power of a Major-General in the associated counties for some time (u). However, Capt. Cromwell, being a Member, and at the head of the Committee, knowing very well the sense of the House, and being thoroughly assured, that what he performed for their service would be well accepted, did not wait for orders, but took upon him, when his men were once in readiness, to act as he thought proper (w). He fixed his head quarters in Cambridge, where he acted with great severity, towards the University more especially, after he missed of seizing the plate contributed by St. John's and other loyal Colleges, for the King's service (x), which many writers affirm he actually did seize, but that is a mistake; though it is very certain, that he did all that in him lay, and was as near seizing it as could be (y) [I]. He was more successful in his next enterprise; for being informed, that the King had appointed Sir Thomas Coningsby, Sheriff of Hertfordshire, and had sent him a writ, requiring him to proclaim the Earl of Essex and his adherents traitors, Capt. Cromwell marched with his troop directly to St. Alban's, where he seized Sir Thomas Coningsby for that action, and carried him prisoner to London, with which the Parliament was highly pleased; committed Sir Thomas to the Tower, where he lay several years, and seized his estate (z). Capt. Cromwell having received the thanks of the House for this, which passed in the month of November, was encouraged to perform a more important service; for being informed that Sir Thomas Barker, Sir John Pettus, and other Gentlemen of great families and fortunes, were met at Lowestoft in Suffolk, for the King's service, he marched thither early in the succeeding Spring, where he not only surprized, and made most of these Gentlemen prisoners, but took also a large quantity of arms, ammunition, and military stores, which they had provided (a). This enabled him to increase his forces, so that we find him soon after at the head of a thousand horse, with the title of Colonel Cromwell; and it deserves particular notice, that, entering so late in life, for he was in his forty-third year before he had thoughts of appearing in a military character, he should notwithstanding, in the space of a few months, not only raise the reputation of an officer, but really become a very good one (b); and, which is still stranger, should, by mere dint of discipline, make his new raised men excellent soldiers, and lay the foundation of that invincible strength which was afterwards exerted on the behalf of the Parliament. That all this is strictly true, we

[I] And was as near seizing it as could be.] The King wrote a letter to the Vice-chancellor, Dr. Richard Holdsworth, Master of Emanuel College, dated June 29th, 1642, signifying the extreme want he was then in, so as not to have wherewithal to subsist his private family; upon which the University resolved to send his Majesty a small supply, which, though no way adequate to his occasions, or to their zeal for his service, was, however, as much as lay in their power. What the sum might be appears not; only it is certain, that the loyal College of St. John's sent one hundred and fifty pounds in money, and two thousand sixty five ounces of plate. It was for the share they had in this transaction that Dr. Beale, Master of St. John's, Dr. Martin, Provost of Queen's, and Dr. Sterne, Master of Jesus College, were by Cromwell carried up prisoners to London, where they suffered a long imprisonment in the Tower (56). Many Members of the University were much worse treated, being kept prisoners for a long time in the hold of a ship in the river, and that too in very severe weather; and the three heads before-mentioned shared in process of time the same fate, and were in danger of suffering still worse, one Rigby, a Lawyer, having twice moved, that they

should be sold as slaves at Algiers, or sent as transports to the plantations, because he had contracted with two merchants for the purchase of them (57). The person intrusted with this small treasure was Mr. Barnaby Oley, President of Clare Hall, who, being very well acquainted with the bye-ways, set out with a small party of horse the very night in which Cromwell took post upon the common road, and had the good fortune to bring it safe to his Royal Master, at the very time he set up his standard at Nottingham (58). It was, very probably, not long after this that Mr. Cromwell had a very remarkable interview with his uncle, which Sir Philip Warwick had from the good old Gentleman's mouth, and therefore we shall give it in his own words. 'Visiting old Sir Oliver Cromwell, his uncle and godfather, at his house at Ramsey, he told me this story of his successful nephew and godson, that he visited him with a good strong party of horse; and that he asked him his blessing; and that the few hours he was there, he would not keep on his hat in his presence; but at the same time he not only disarmed but plundered him, for he took away all his plate (59).'

have

have not only the authority of his own assertion to prove, and he was not a vain man, but that likewise of the best writers on all sides, who agree perfectly well in this point, and in the principal circumstances relating to it (c) [K]. In the Spring of the year 1643, having settled all things in the six associated counties, viz. Essex, Hertford, Norfolk, Suffolk, Cambridge, and Huntingdon, he advanced into Lincolnshire, which was now added to the number, having disarmed in his passage such as he took to be disaffected in Huntingdonshire, and increased his forces to about two thousand men (d). Here he did very great service by restraining the King's garrison of Newark, gave a check to the Earl of Newcastle's troops at Horncastle, and performed many other things, of which mention is made by those who have written the history of this fatal war; which gained him still farther credit with the Parliament, and more especially with that party, which meant to prosecute things to extremity, and till they should be terminated by compleat victory on their side (e). It was to accomplish these views that new armies, under the Earl of Manchester and Sir William Waller, were set on foot, and in the former, though the Earl had the title, yet the power was chiefly in Cromwell; for things were so dexterously managed between him and his friends at Westminster, that, as they knew they might depend upon all in his power, so they took care to put as much in his power as they could (f) [L].

[K] *Who agree perfectly well in this point, and in the circumstances relating to it.* When he first raised his troop of horse, he gave a very singular specimen of his skill in purging; for, not doubting that some of them might prove cowards, he devised a most effectual method of discovering which they were, by posting twelve men in ambuscade, who rushed out upon them at their first muster. Upon this twenty of them rode out of the field as fast as their horses could carry them; and these Mr. Cromwell dismissed, and lifted bolder fellows in their places (60). We are told, by a writer of great credit, that Cromwell's brave regiment of horse were his countrymen, most of them freeholders, or freeholders sons, men who had something to lose besides their lives, and who, upon all occasions, gave the strongest testimonies of steadiness and resolution (61). A learned person, who knew him well, and loved him little, accounts for this clearly, by giving us a sketch of his method of managing them (62). 'He used them, says he, daily to look after, feed, and dress their horses, and, when it was necessary, to lie together on the ground, and besides, taught them to clean and keep their arms bright, and have them ready for service; to chuse the best armour, and to arm themselves to the best advantage. Trained up in this kind of military exercise, they excelled all their fellow-soldiers in feats of war, and obtained more victories over the enemy. These were afterwards preferred to be commanders and officers in the army, and their places filled up with lusty strong fellows, whom he brought up in the same strictness of discipline.' But Cromwell's own account is far clearer, and more satisfactory, than any, and cannot therefore but be welcome to the judicious reader (63). 'I was,' said he, in one of his speeches, 'a person that, from my first employment, was suddenly preferred, and lifted up, from lesser trusts to greater. From my first being captain of a troop of horse, I did labour, as well as I could, to discharge my trust, and God blessed me, as it pleased him. I had a very worthy friend then, and he was a very noble person, and I know his memory is very grateful to all; Mr. John Hampden was the person. At my first going out into this engagement, I saw our men were beaten on every hand. I did indeed, and desired him that he would make some additions to my Lord of Essex's army, of some new regiments. And I told him, it would be serviceable to him in bringing such men in as I thought had a spirit, that would do something in the work. Your troops, said I, are most of them old decayed serving-men and tapsters, and such kind of fellows; and their troops are Gentlemen's younger sons, and persons of good quality. And do you think, that the mean spirits of such base and mean fellows will ever be able to encounter Gentlemen, that have honour, and courage, and resolution, in them? You must get men of a spirit, and, take it not ill what I say, of a spirit that is likely to go on as far as Gentlemen will go, or else I am sure you will be beaten still: I told him so. He was a wise and worthy

person, and he did think that I talked a good notion, but an impracticable one. I told him I could do somewhat in it: and I accordingly raised such men as had the fear of God before them, and made some conscience of what they did. And, from that day forward, they were never beaten, but, wherever they were engaged against the enemy, they beat continually.' We are told by Echard (64), that the very first time he mustered his troops, he dealt with them very plainly; that he would not cozen them by the perplexed expression in his commission, to fight for King and Parliament, but that if the King chanced to be in the body of the enemy, he would as soon discharge his pistol upon him, as any private person; and if their consciences would not permit them to do the like, he advised them not to lift themselves under him. This, as the Archdeacon observes, was thought very bold at that time; and yet, whoever considers it attentively will see, that it was very politically spoken; for, in the first place, it let his soldiers into the true notion of what was required from them before they came to action, and, consequently, before it was expected from them; so that this commander and his men were never at a loss about each other's meaning: and, secondly, it gave the heads of the party a just hint of his resolution; whence they saw, that he was a man determined, whom they might rely upon in going all lengths, and whom no propositions, how high or extraordinary so ever, could astonish; agreeably to Mr. Hampden's notions of him at the beginning of the troubles (65), and his own behaviour during the continuance and to the very end of the war.

[L] *So they took care to put as much in his power as they could.* It must be confessed, that how deficient soever we are in respect to good histories of other periods of time, yet, in reference to this of the civil war, we have as many, and those too as considerable lights, as can well be desired, either in regard to general regular compositions, or in reference to private memoirs, and on both sides of the question; so that if any judicious and impartial person will carefully read, and give himself time cautiously to compare, what all these authors have advanced on any point, he will not find it extremely difficult to fix his judgment about it. The matter we will endeavour to explain in this note is, the subdivision of the views with which the leading members in the Parliament at Westminster began the war; for though themselves, and their Historian Mr. May, would turn this upon the King (66), yet, from the dates of the commissions, and from many other unanswerable reasons alledged by Mr. Coke (67), who was no very zealous Royalist, it is incontestibly proved, that the Parliament began the war; and the business is to know why they began it: for, though numbers of men may concur in one joint resolution, yet it cannot be thence inferred, that they are all governed by the same reasons, or all aim to bring about the same end. Yet it must be allowed, that concurring in one resolution may ground a presumption, that such persons are of the same opinion; and the contrary of this can only be made appear from their subsequent behaviour:

(73) As appears by their conforming during all the time that Presbyterianism was established.

The Scots having been invited into England by that party to whom Cromwell adhered, it was judged highly requisite that the army under the Earl of Manchester, and Cromwell, who was now declared Lieutenant-General of the Horse, should join them, the better to enable them to reduce York, which they had closely besieged. This service, very important in itself, was executed with great vigour and diligence, more especially by Cromwell, who, with all his horse, made a swift and surprizing march, so as to join the Scots unexpectedly (g). In the battle of Marston-Moor, July 3d, 1644, it is unanimously agreed, that Cromwell's cavalry, who were commonly stiled Ironsides, changed the fortune of the day, as that did of the war; for the King's affairs declined, and the Parliament's flourished, ever after (h). It is, I say, agreed, that all the success here was attributed to Cromwell's forces, and, by many good writers, to him who headed and animated them, whereas others give the honour entirely to his men; and would have us believe, that his behaviour was far from being extraordinary (i) [M]. However this matter might

(i) Memoirs of Denzil Lord Holles, p. 16, 17, 18. Sir Roger Manley's History of Rebellions, p. 71.

for if, after going a certain space together, these people divide, and take separate roads, it is plain they had from the beginning different intentions, which remained so long concealed as all parties remained under the persuasion that they might travel with advantage together, and be, at the same time, advancing towards that point which each of them desired to reach (68). This then was the case of the Members who remained at Westminster: they all of them judged, that taking up arms was a thing expedient; and, from the measures they afterwards pursued, we may, with great probability at least, if not with certainty, discover, what the motives were that led them to concur in this first step. Now, not to perplex ourselves, or the reader, with too great nicety, or more than necessary distinctions, we shall be content to observe, that, from their future conduct, it clearly appears, there were three great parties in this Parliament. The first was composed of such as meant to reduce the Prerogative within narrower bounds, to secure the liberties of the people, and to prevent Ministers from misleading the King, or his successors, into acts of arbitrary power with impunity. Without doubt these Gentlemen were right in their intentions; but, whether they pursued a method consistent with the Constitution, is another question; which, however determined, will still leave it certain, that they did not aim to overturn the Constitution. The heads of this party were Mr. Hollis, Mr. Hampden, Mr. Pym, Sir John Maynard, Sir Philip Stapylton, &c. and, at the beginning of the war, this party had the majority in the House of Commons (69). The second were, from the beginning, bent upon changing the Constitution, overturning the Monarchy, and settling a Republic: the chief heads of this faction were Mr. Oliver St. John, Sir Arthur Haslerig, Sir Henry Ludlow, and, after his decease, his son, Mr. Lisle, Sir Henry Vane, Sir Henry Mildmay, Mr. Corbet, &c. (70). The third party might be said to be without any settled principles, as being chiefly bent upon getting what they could for themselves, and steering in such a manner, in this dangerous storm of their own raising, as might contribute to their own safety and prosperity, with no regard whatever, either to the King or Kingdom. Amongst these Mr. Cromwell, Mr. Henry Martin, Mr. Thomas Chaloner, Sir Thomas Widdrington, and many others, might be reckoned (71). The division that is commonly made in respect to religion, making the first *Presbyterians*, and the two last parties *Independants*, is not very clear in itself, and, at the same time, far from being consistent with truth. Some of the first party were very well inclined to the established religion; and, notwithstanding they disliked some Bishops, had no aversion at all to Episcopacy (72). On the other hand, many of the other two parties were well enough satisfied with the Presbyterian discipline, if it could have been moulded so as to serve their civil purposes (73). If indeed it be necessary to assign a religion to each of these parties, the title of Presbyterians may well enough become the first, that of Independents will sit better upon the second, but, truly, as to the religion of the third, it wants a name: some of them indeed professed they had no religion, such as Chaloner and Martin, and, without breach of charity, one may say, there might be others of this sect in their heart, though they professed a great deal. It is requisite to

observe, that there were in reality but two parties among the Lords, that is, such as meant well to the public, such as the Earls of Bedford, Essex, Manchester, &c. and such as meant well to themselves, as the Earls of Salisbury, Warwick, the Lord Grey, and a few others (74). This brief account of parties is the true key to the understanding the history of those times; and, as it may be very useful towards forming a right notion of other articles, so this would be absolutely unintelligible without it.

[M] *That his behaviour was far from being extraordinary.* In order to justify what is said in the text, we must produce a very famous passage from the work of a noble author, who was himself very deeply engaged in these affairs, and who wrote this account when the person he reflects on was living (75). 'However, Lieutenant-General Cromwell, says he, had the impudence and boldness to assume much of the honour of it to himself, or rather, Herod like, to suffer others to magnify him and adore him for it; for I can scarcely believe he should be so impudent to give it out himself, so conscious as he must be of his own base cowardliness. Those who did the principal service that day were Major-General Lesley, who commanded the Scots horse, Major-General Crawford, who was Major-General to the Earl of Manchester's Brigade, and Sir Thomas Fairfax, who, under his father, commanded the Northern Brigade. But my friend Cromwell had neither part nor lot in the business, for I have several times heard it from Crawford's own mouth; and I think I shall not be mistaken, if I say Cromwell himself has heard it from him; for he once said it aloud in Westminster-Hall, when Cromwell passed by him, with a design he might hear him; that when the whole army at Marston-Moor was in a fair possibility to be utterly routed, and a great part of it running, he saw the body of horse of that Brigade standing still, and, to his seeming, doubtful which way to charge, backward or forward, when he came up to them, in a great passion reviling them with the name of poltroons and cowards, and asked them if they would stand still and see the day lost? Whereupon Cromwell shewed himself, and, in a pitiful voice, said, *Major-General, what shall I do?* he begging pardon for what he said, not knowing he was there, towards whom he knew his distance, as to his superior officer, told him, *Sir, if you charge not all is lost*; Cromwell answered, *He was wounded, and was not able to charge*; his great wound being a little burn in the neck, by the accidental going off behind him of one of his soldier's pistols. Then Crawford desired him to go off the field, and, sending one away with him, who very readily followed wholesome advice, led them on himself, which was not the duty of his place, and as little for Cromwell's honour, as it proved to be much for the advancement of his and his party's pernicious designs. This I have but by relation, yet I easily believe it upon the credit of the reporter, who was a man of honour, that was not ashamed nor afraid to publish it in all places. Besides, I have heard a parallel story of his valour from another person, Colonel Dalbiere, not inferior either in quality or reputation to Major-General Crawford, who told me, that, when Basing-house was stormed, Cromwell, instead of leading on his men, stood a good distance off, out of gun-shot, behind a hedge. And something I can

(74) Memoirs of Denzil Lord Holles, p. 155, 156. Behemoth, by T. Hobbs, p. 233.

(75) Memoirs of Denzil Lord Holles, p. 15, 16, 17.

might be, it is very certain, that, on the 19th, Cromwell stormed the Earl of Exeter's fine house at Burleigh; and the courage and conduct of the Lieutenant-General was the theme of every tongue, and no man's fortune or services so much valued at London (k). He was also in the second battle at Newbury, September 17th, in the same year; and is said to have made so bold a charge with his Horse upon the Guards, that his Majesty's person had been in the utmost danger, if the old Earl of Cleveland had not come in to his relief, and preserved his master's liberty at the expence of his own (l). In the winter the disputes in Parliament ran higher than ever: nothing but Cromwell's merit and good fortune were talked of by his party; and some of whom blasphemously stiled him, *the Saviour of the Nation* (m). Yet, notwithstanding this, the wisest men, and the best patriots, saw very clearly to what these excessive praises tended; and, that the nation might be made as sensible in this respect as themselves, the Earl of Manchester exhibited a charge against him in the House of Lords, and Lieutenant-General Cromwell, not to be in his debt, brought in another charge against the noble Peer in the House of Commons (n). It is true, that neither of these charges were prosecuted; but it is nevertheless true, that General Cromwell and his friends absolutely carried their point, by bringing in what was called the *self-denying ordinance* (o), that excluded the Members of either House from having any commands in the army; from which however, on the score of his extraordinary merit, that set him above all ordinances, Lieutenant-General Cromwell was at first occasionally, at length absolutely, exempted. This victory in Parliament was still of greater consequence than that of Marston-Moor; for, as that turned the *fortune* of the war, so this determined the *fate* of the King and Kingdom (p) [N]. Upon the introduction of the

I can deliver of him upon my knowledge, which makes passage for the easier belief of both these, and assures me, that that man is as errant a coward as he is notoriously perfidious, ambitious, and hypocritical. This was, his base keeping out of the field at Keinton battle, where he, with his troop of horse, came not in, impudently and ridiculously affirming the day after, that he had been all that day seeking the army, and place of fight, though his quarters were but at a village near hand, whence he could not find his way, nor be directed by his ear, when the ordnance was heard, as I have been credibly informed, twenty or thirty miles off; so that certainly he is far from the man he is taken for.' His keeping out of the field at the battle of Keinton has been taken notice of by Sir Roger Manley, who says, that Cromwell went to the top of a steeple, whence perceiving part of the Earl of Essex's army routed, he was in such haste to get down, that, instead of descending the stairs, he swung himself to the bottom by the belly-rope (76). This we find confirmed likewise by Sir William Dugdale: yet neither of these writers mention this to the prejudice of Cromwell's character for courage: on the contrary, they regard it as an instance how much the human temper and disposition may be changed from the effects of boundless ambition, and the force of a long continued habit (77). It is also to be remembered, that Colonel Dalbiere, one of Lord Hollis's witnesses, was, at the beginning of the war, a great favourite of Cromwell's, who made use of his advice to keep his troops in better order (78); but, as he differed with him afterwards, it is not at all impossible that there might be a strong mixture of resentment in what Dalbiere delivered upon this subject (79). Major-General Crawford was likewise a competitor with Cromwell, and besides, a great friend to the Earl of Manchester (80), to whom Cromwell was a professed enemy. The accounts we have of the battle of Marston-Moor from the Royalists, unanimously attribute the loss of that day in a manner solely to Cromwell.

[N] So this determined the fate of the King and Kingdom.] As we have, in a former note, given the reader an account of the several parties in the Parliament at the breaking out of the civil war, there will be no great difficulty in making him clearly comprehend how this great change was brought about, by which that assembly manifested an intention at least, inconsistent with, if not directly repugnant to, that which they had shewn at the beginning. While the first of the three parties had the majority, they were very desirous, that as much of the executive power of the Government as possible might be in the hands of their friends, that they might always know whom they had to trust. Many of them being, by this means, at a distance from Westminster, left the other parties,

who generally voted together, much stronger than they would otherwise have been; and this strength they made use of to fill most of the Committees with their friends, which procured them great interest in the country, drew over many to their party, and, whenever exceptions were taken to a Member's character, they had commonly strength enough to vote him out as a malignant, and to bring one of their own party in (81). Cromwell was the officer in the army in whom these people most confided, and he was obliged to make great professions of his willingness to serve them, because, through a series of untoward accidents, he was become very obnoxious to what was stiled the Presbyterian interest. He had seen enough of the Scots when in Yorkshire to be satisfied, that they by no means meant a change of Government in the sense that his friends did, and for this he hated them heartily. His aversion to the Earl of Essex was as warm as implacable: he judged that he was but half an enemy to the King, which produced that Nobleman a whole enemy in himself. Besides, he was informed, that the Earl of Essex had held a private meeting with the Earl of Loudon, the Scotch Chancellor, to concert measures for seizing and impeaching him, which he could never forgive (82). Add to all this, that his quarrel with the Earl of Manchester came to a very great height, as appears from what is said in the text, and therefore we shall mention but one circumstance of it here. He proposed, in discourse to that noble Lord, something of an extraordinary nature, to which his Lordship expressed a doubt, whether the Parliament might be brought to consent; to which Cromwell immediately replied, *My Lord, if you will stick firm to honest men, you will find an army at your command that will give law both to King and Parliament* (83). After premising these points, we may, without fear of being misunderstood, proceed to observe, that the party to which he adhered in Parliament comprehending perfectly his intentions, and confiding in his attachment to them, resolved to make an effort to gain such a superiority, as might enable them to end the war in that manner, and with that expedition, which suited best with their design. In order to effect this they began to complain privately, of want of zeal in some of their great officers, and publickly of want of discipline in their army. To remedy both these it was proposed, that, for the future, such as had seats in either House should be disqualified from having commands in the army; whence the intended law had the title of the *SELF-DENYING ORDINANCE*, and the armies, when put under this direction, were said to be of the *new model* (84). The reader must observe, with what craft this party improved the absence of the leading men on the other side, to gain a prevalence in Parliament; and now being

(81) The whole of this matter is thoroughly discussed in a treatise intitled, *The Mysteries of the two Juntos, Presbyterian and Independant*, printed in 1648. 4to.

the new model, as it was called, the chief command of the army was given to Sir Thomas Fairfax, and, from being Lieutenant-General of the Horse, Cromwell became Lieutenant-General of the Army; nor was it long before he gave a specimen of his great skill in Politics, by procuring an address from his regiment, declaring their satisfaction (q) with the change; which was a precedent soon followed by the rest, and upon the heels of this, as strong an instance of his military abilities (r). For, attacking the Earl of Northampton with a body of the King's forces at Islip Bridge, he routed them entirely, took four hundred horse, two hundred men, and the Queen's standard (s). The same good fortune attended him at Radcod-Bridge, where he beat Sir William Vaughan, and took him, and a great part of his troops, prisoners (t). He pushed his good fortune to the utmost, and, April 24th, 1645, attacked Blechingdon-House, in which Colonel Windebank had a garrison. The place indeed was very indifferently fortified; but, as Cromwell had only horse, he knew it was impossible to take it if defended, and thereupon ordered his men, as they approached, to cry out, *fall on foot* (u). His very name had terrified abundance of Ladies, who came to compliment the Governor upon his marriage, and this cry of *fall on foot* disconcerted the Colonel himself, who, confounded with the cries of the women, and knowing the place was not tenable against infantry, surrendered; for which he was, ten days after, shot at Oxford (w). But Cromwell had not the like success against Farrington-House, where Sir George Lisle commanded, though supported by six hundred foot; and he afterwards received a check from General Goring (x). At this time the King threatening the associated counties, which had not been attacked during the war, the Parliament ordered Cromwell into the Isle of Ely, where he had the power, if not the title of Governor (y). At the request of Fairfax, however, he had orders to return to the army, which he accordingly did; and being informed, that the King intended to march northward, advised Sir Thomas Fairfax to prevent that, by fighting his Majesty; which brought on the battle of Naseby, June 14th, 1645, in which Cromwell commanded the right wing, and his son-in-law Ireton the left; and here it was that the King lost all through the temerity of Prince Rupert (z), and the confessed conduct and courage of Cromwell, who, when Ireton was routed, and taken prisoner, charged the King's foot, and, with much danger to his own person, entirely broke them (a). He prosecuted the success of this day with the same vivacity which acquired it. In a month's time he defeated General Goring, and reduced most of the King's garrisons in Hampshire and Wiltshire; defeated and cut to pieces the poor Clubmen (b); and, having made himself Master of the Devizes, Winchester, and Basing-House, with the person of the Marquis of Winchester, its master, he, for these services, received the thanks of both Houses (c). Afterwards joining Sir Thomas Fairfax, he had his share in reducing the West, till, upon the surrender of Exeter, April 13th, 1646, he found leisure to return to London, in order to receive those rewards (d) which the party he had so effectually served were very willing to bestow, and of which, as an earnest, they had voted him the sum of two thousand five hundred pounds a year, the greatest part of which was to be taken out of the estate of the Marquis of Winchester in Hampshire (e). Upon his taking his seat

being pretty sure of that, they made use of it to secure to their side the army. Yet it is not at all impossible, that they might have failed in this bold project, if they had not insisted upon these two popular points, of putting a short end to the war, and of providing against civil and military power resting in the same hands; for these gained to them the timorous and the weak of the other party, because the former were afraid to oppose men who talked in so high a strain, and the latter were actually imposed upon by the solemnity of their professions. By the passing of the Self-denying Ordinance, and the new modelling of the army, the Presbyterians lost their power, and the King all hopes of making a good peace, or, to say the truth, any peace at all. The first appeared by the little respect shewn to those Members, both Lords and Commons, who had hazarded their lives and fortunes for the Parliament, and the severity with which those were prosecuted, who were suspected of an inclination to return again to the King's obedience; the latter, from the leaving out in the new commission of Sir Thomas Fairfax, the clause for the security of the King's person (85). In the course of the debates which arose upon this subject in the House of Commons, for it did not pass there without very high debates, Mr. Cromwell spoke vehemently on the side of the Bill, and, when some expressed a suspicion, that this new discipline, though it made the army better soldiers, would go near to make them worse subjects, he undertook for the contrary, more especially for his own regiment, which, he said, would fight or not fight, serve or not serve, just as the Parliament pleased, to whose orders they owed an implicit obedience,

Chronicle, p. 74.

which they never had, or ever would, forfeit in any degree (86). It is thought, and not without reason, that many voted for the new model from their credulity in this respect, and from the certainty which they thought they had, that Cromwell would lose his command as well as the Earls of Essex and Manchester, Sir William Waller, and the rest. In this however they were strangely disappointed; for notwithstanding Cromwell went to make a visit to the new General, in which he declared his willingness to resign his command; yet that submissive, that well-disposed, that implicitly obedient regiment, for whom he had so roundly undertaken, mutinied upon this occasion, and refused to serve without their old Commander Cromwell at their head (87). Upon this the Parliament dispensed with the ordinance in respect to him, at first for twenty days, then for forty, and at length, Sir Thomas Fairfax being unwilling to lose so able an assistant, for good and all; and thus, when it was too late, those who had been cheated into an approbation of this scheme, saw their mistake, and repented of their delusion (88). By this refined piece of management the Independants, with the assistance of Cromwell, triumphed both in the Parliament and in the Army. We shall hereafter see how, by the assistance of the latter, he triumphed over them in their turn (89). These are the great points of history that ought to be sifted out, and set in their true light: these are those shining particulars that distinguish Biographical Memoirs; and these are those important secrets that are so seldom explained in a satisfactory manner in general histories, where the course of events is more regarded than the springs of action, whence those events arise.

in the House, thanks were returned to him, in terms as strong as words could express; and the prevailing party in the House received from him such encouragement, as induced them to believe he was wholly at their devotion (f) [O]. But in this they were mistaken: for, while they thought the Lieutenant-General busy in doing their business, he was in reality attentive only to his own; but covered all his designs with such wondrous dexterity, that they were discerned only by a few, and of those there were scarcely any that durst speak their thoughts plainly: neither did their speaking avail, since the majority were of another mind, and some extraordinary methods were practised, to procure and preserve a majority that should be of that mind always (g). That party in the Parliament which began the war for the sake of redressing grievances, and to set some bounds to the Prerogative, were now sincerely desirous of making an end of the war, to which they thought nothing could contribute so much, as having the King's person in their hands; for which reason orders were sent to Sir Thomas Fairfax to besiege Oxford (h). Others would have been better pleased with the King's escape, because it was more likely to promote the design of continuing the army. Accordingly, April 27th, the King quitted Oxford, to go and put himself into the hands of the Scots. This was precisely what the Independants wanted, because it made long treaties necessary, not with the King only, but with the Scots (i). The latter demanded vast sums of money, under the notion of arrears; but Lieutenant-General Cromwell, and his party, who did not either love or value them, opposed such a negotiation as this, as injurious to the honour of the nation, upon a supposition that this might induce the Scots to join with the King, embark their cause and his on the same bottom, and produce thereby a second war (k). It was to promote this that they pushed things so far in Parliament, as to procure an Order of the House of Commons, for burning the proposals that had been made them by the Scotch Commissioners, by the hands of the common hangman. This, however, prevented the two nations from agreeing with his Majesty, and produced some ill blood on both sides, yet none of those heats and tumults that were expected; for at length a bargain was made in the beginning of August, that the Scots should deliver up the King to the English for the sum of two hundred thousand pounds, to be paid them immediately, and the like sum soon after (l). The Parliament Commissioners accordingly received him with very great civility and respect; and this having set open a very wide door, persons of all ages, sexes, and ranks, were assiduous in paying, as far as they were permitted, their duty to him (m). To free the people from the burthens under which they laboured, and, at the same time, to strengthen their own authority by lessening that of the army, the Parliament inclined to disband a part of their forces. As no-body better understood the meaning of this than Lieutenant-General Cromwell, instead of openly opposing it, he contrived to turn it in a double manner to his own and his party's advantage; for, in the first place, he insinuated, by his emissaries,

[O] *As induced them to believe he was wholly at their devotion.* It was a maxim with Cromwell, as we may gather from his constant practice, whenever he had any extraordinary success in the field, to return as soon as he had an opportunity, and shew himself in Parliament, that the hazards he ran in the field might contribute to his victories elsewhere. Another art he practised, as in truth what art is there he did not practise? which availed him highly; he was exceedingly constant in his correspondence with the Parliament; his letters brought them the news of every conquest, nor was any expence thought too great to facilitate the early arrival of his dispatches. His language too, though generally wrapped up in the cant of the times, which no man used more, had in it somewhat peculiarly submissive, and irresistibly insinuating: his soldiers, as he said, were not only dutiful but devoted; and if their courage deserved to be remembered, as at the siege of Bristol, they made it their request to be forgotten: they desired only to be considered as God's instruments in the righteous cause of the Parliament (90).

By these methods he kept himself continually in their thoughts, and in their votes or resolutions. Thus two days after the battle of Naseby, they ordered that he should be Lieutenant-General of the Horse under Fairfax, during the pleasure of the two Houses, which the Lords changed to three months; August 8th, 1645, he was continued for four months longer; and on the first of December, the same year, they voted him two thousand five hundred pounds a year, and that he should be made a Baron; all which he seemed to accept with much less relish for the honours, than for the good-will shewn him by Parliament, to which, upon these occasions, he professed a reverence superior to that which is paid to the most absolute Monarchs of the East (91). By these contrivances both parties enjoyed, for a time, the highest satisfac-

tion; for Cromwell's friends in Parliament believed him unalterably addicted to their measures, and that they might direct and dispose of him how they pleased; while, on the other hand, he promoted his own interest most effectually, and such propositions as he made, purely with a view to that, were by them interpreted as tending only to the maintenance of their authority, and securing the unlimited obedience of the army to their orders (92). Besides all this, he was likewise very attentive to the establishment of an extensive reputation, and that even among enemies; for some of his own soldiers having broken the articles upon which the city of Winchester was surrendered, he caused one of them to be hanged, and sent five more of them prisoners to the Governor of Oxford, to be by him punished as he thought fit; but he very wisely sent them back again (93). At the conferences also which preceded the surrender of Exeter, he entered into a conversation with Sir John Berkeley, of such a nature, as to prove an introduction to a correspondence with that Gentleman when a proper opportunity offered, as afterwards there did. Thus at one and the same time he managed many different interests, creating in all an attention to, and confidence in, his conduct, and yet communicating his real designs to none; for at this juncture, though all the parties in the army and the nation had their eyes particularly fixed upon Lieutenant-General Cromwell's management, in order to penetrate his designs; yet it manifestly appears, from the writings on all sides, that there was not any two of them who concurred in their sentiments. Only the Presbyterians seemed to understand him best; for they judged him as little affected to the Parliament as to the King, and that, for the aggrandizing of his own power, he would make no scruple of conscience to destroy both (94).
